The general principle of the bill is that these lands belong to the Federal Government and that we have control of them. The water originates in them, the water flows through them, and we have control over the dam site, and if we are to allow these lands to be submerged we have got the right to make certain conditions. Certainly no one can come in and use lands in a national park without our consent, and if you give consent you have got the right to make conditions.

I think the rights of the irrigation districts are very well protected here, and that they have the right to call upon the city for additional water.

I think that it is very proper that the Federal Government should use whatever power it has over the public lands, over the parks, and over the forests, to coppel the fullest use of these waters, and indirectly to require through its power to make conditions the lowest possible rate for consumers.

In my judgment, the permission desired by San Francisco to secure water from the Yosemite National Park for municipal purposes, etc., should be accorded. The communities on San Francisco Bay constitute the largest center of population on the Pacific coast and are urgently in need of an adequate supply of pure, wholesome water for domestic consumption and for fire protection.

This project would insure the development of a dependable supply of water for the use of the adjacent irrigation district, and it would also provide for the development of power now going to waste. The city of San Francisco has evidenced its good faith in this matter by providing a large bond issue looking to securing money to effectuate the grant if accorded. The bill under consideration fully protects the interests of the United States in the park and elsewhere. Under the project as proposed by the city, the floor of the Hetch Hetchy Valley, now difficult of access and frequently unhealthy, will be converted into a lake of great beauty and be provided with suitable approaches. Under the provisions of this bill the revenues derived by the Government, which in time will grow into a very considerable sum, are to be used for the maintenance and improvement of the Yosemite National Park, and the city of San Francisco has undertaken to construct and maintain roads, trails, and bridges which will practically result in a great enlargement of the park areas of the high Sierra by making them more safely and easily accessible.

HOUSTON APPROVES.

[Extracts from statement of Hon. David F. Houston, Secretary of Agriculture, before the Public Lands Committee, House of Representatives, June 25, 1913.]

I have examined this proposed bill, and I am in hearty accord with what the Secretary of the Interior says as to the general features. So far as the Department of Agriculture is concerned, I think that all of the interests of the Government are safeguarded in the bill.

the interests of the Government are safeguarded in the bill.

It is unnecessary for me to repeat anything that has been said about the need of the city of San Francisco for water. There is no doubt, from the representations made, that they have a great and growing need for this water supply. It is a prerequisite to the development of a great city. Now, I am also informed that this has been determined as the best way to secure the additional water required. It seems to me that we can not afford to stand in the way of that.

The Chairman. In your opinion the development of roads and trails might mean an additional protection to the forest, might it not?

Secretary Houston. Yes, sir.

The Chairman. Have you considered the matter from the point of view of the people who may think it is a great wrong to put this water to beneficial use because of the possible injury to the natural heauties of the valley or because of the destruction of scenic values?

Secretary Houston. In the first place, if I am correctly informed, it will add to the beauty rather than injure the appearance of the forest and the park. So that answers the question from that point of view. But I think there is a great deal of beauty in San Francisco to be conserved, and I think that the thousands of people there have some claims upon the Government.

**

PINCHOT INDORSES BILL.

PINCHOT INDORSES BILL

[Extracts from statement of Hon. Gifford Pinchot, former Chief Forester, before Public Lands Committee, House of Representatives, June 25, 1913.]

ester, before Public Lands Committee, House of Representatives, June 25, 1913.]

We come now face to face with the perfectly clean question of what is the best use to which this water that flows out of the Sierras can be put. As we all know, there is no use of water that is higher than the domestic use. Then, if there is, as the engineers tell us, no other source of supply that is anything like so reasonably available as this one, if this is the best and within reasonable limits of cost, the only means of supplying San Francisco with water, we come straight to the question of whether the advantage of leaving this valley in a state of nature is greater than the advantage of using it for the benefit of the city of San Francisco.

Now, the fundamental principle of the whole conservation policy is that of use—to take every part of the land and its resources and put it to that use in which it will best serve the most people—and I think there can be no question at all but that in this case we have an instance in which all weighty considerations demand the passage of the bill.

* * The construction of roads, trails, and telephone systems which will follow the passage of this bill will be a very important help in the park and forest reserves. The national forest telephone system and the roads and trails to which this bill will lead =will form an important additional help in fighting fire in the forest reserves. As has already been set forth by the two Secretaries, the presence of these additional means of communication will mean that the national forest and the national park will be visited by very large numbers of people who can not visit them now. I think that the men who assert that it is better to leave a plece of natural scenery in its natural condition have rather the better of the argument, and I believe that if we had nothing else to consider than the delight of the few men and women who would yearly go into the Hetch Hetchy Valley, then it should be left in its natural condition. But the considerations on the

In a colloquy with Hon. John E. Rakes, member of the Public Lands Committee, Mr. Pinchot discussed the effect of the construction of roads and dam site in the Hetch Hetchy Valley. He agreed with Mr. RAKER that this work would make the valley more accessible and that the use of the park would be enormously increased. Mr. Pinchot, in reply to a question by Mr. RAKER, said he had never been able to agree with John Muir in the latter's attitude toward the Sierras.

Mr. Pinchot unequivocally indorsed the bill, and said there was no reason to delay its passage, as every possible phase of the subject had been investigated and discussed for 10 or 12 years. He said:

I am thoroughly and heartily in favor of it. I am in favor of reporting the bill now before the committee and passing it at this session.

GEOLOGICAL SURVEY CHIEF FAVORS BILL.

GEOLOGICAL SURVEY CHIEF FAVORS BILL.

[Extracts from statement of Dr. George Otis Smith, Director of United States Geological Survey, before Committee on the Public Lands, House of Representatives, June 25, 1913.]

The Hetch Hetchy Valley must eventually be made into a reservoir. Now, I believe that the sooner that dam site is actually used, the sooner that reservoir is utilized, the better. * * There are three parties, it seems to me, to this proposition. San Francisco, by reason of its claim for the highest use of the water; the Turlock-Modesto irrigation districts, by reason of their prior use and their actual dependence upon the Tuolumne watershed for their water; and, thirdly, the general public, which is interested in the full utilization of our water resources here, as elsewhere, and also interested by reason of special rights which they have in the national parks. I believe that the citizens of San Francisco and the other bay cities will receive pure water from the cheapest source, and they will also receive municipal power at a lower price. The irrigation interests, with their prior rights, are assured under the terms of this bill of a larger supply than they at present have upon what seems to me to be absolutely equitable terms. The fhird party to this contract, in the form of legislation, is the general public. The visitors to the park, if this plan is carried out, will have the northern part of the Yosemite National Park made more accessible, if not

indeed also more attractive. And right there I would say that in my opinion natural beauty has little value unless there is the human eye to

opinion hattar years, see it.

The sanitary restrictions in the bill are not a bit more than should be placed upon any users of a national park, this and other national parks, whether San Francisco is to get the water from the park or not. In addition, this is necessary in order to protect the campers from themselves.

accessible.

I base my opinions on actual observation of the Hetch Hetchy Valley

I do not think that anyone else (than San Francisco) is liable to develop the Hetch Hetchy dam site, unless there is a reasonable hope that the irrigation use can be connected with the municipal and power

No extensive argument is needed to show that the full utilization of the Tuolumne River is not only desirable but absolutely essential. CHIEF FORESTER O. K'S PLAN.

[Substance of statement of Hon. Henry S. Graves, Chief Forester, before Public Lands Committee, House of Representatives, June 25, 1913.]

Mr. Graves analyzed the bill before the Land Committee, so far as it relates to the jurisdiction of the Forest Service. He approved the provisions and said that the telephones, trails, roads, etc., would materially assist in the proper conduct of the Stanislaus National Forest, and would result in good for all concerned. As to the bill itself, Mr. Graves said he had assisted in the preparation of Secretary Lane's report, which represented the agreed policy of the department, including the Forest Service.

[Extracts from statement of Hon. F. H. Newell, chairman United States Reclamation Commission, before Public Lands Committee, House of Representatives, June 25, 1913.]

Representatives, June 25, 1913.]

I agree fully with what has been stated by the representatives of the Repartments in this particular case. I made a study of the water supply of the higher Sierras 18 years ago. I made this study in the Hetch Hetchy Valley as well as in the surrounding area. It was found then that the irrigation development of the valley (San Joaquin) would require the building of a reservoir in that place. At that time we did not anticipate the needs of the city of San Francisco, and in fact gave that no consideration; but we are now fully aware that the ultimate development of the city of San Francisco will require the use of this reservoir site. Now, touching the question of the destruction of the natural beauty of the valley, I will say that, having been concerned with the building of many large reservoirs, I have naturally come to believe that there is nothing more beautiful than a well-built dam with a reservoir behind it. * *

Those of us who have been handling this water-supply question feel that the municipal or domestic use is so far superior to any other use that it does not enter my mind that there can be any competition.

* * You can supply, perhaps, one hundred times as many people with water for domestic use in a city as could be supplied for irrigation purposes.

Mr. Newell discussed at great length with the members of the committee the cost of water for irrigation and the reasonable investment that should be made by landowners. He stated that in his opinion no encouragement could be held out to irrigationists that the Government would build a reservoir at Hetch Hetchy, the water to be used for irrigation purposes. In his opinion the construction by San Francisco of the Hetch Hetchy Dam would materially benefit the irrigationists and materially benefit the irrigationists and materially benefit the irrigationists. Dam would materially benefit the irrigationists and promote conservation. He approved the passage of the bill.

ARMY BOARD TELLS COMMITTEE BILL SHOULD PASS.

[Extracts from statement of Col. John Biddle, chairman of the Board of Army Engineers which investigated and reported upon the San Francisco water problem, before the Public Lands Committee, House of Representatives, June 26, 1913.]

Responding to Chairman Ferris, Col. Biddle stated that he was stationed in San Francisco from 1907 to 1911 and was in general charge of the rivers of California, and in that way became familiar, to a certain extent, with them, and also with the water situation in California. He further stated that the Army board was appointed in 1910, while he was stationed in California, and that the other members of the board went out there. In 1911 the board went over several of the important sources of supply, and in 1912 the board again went out there and went over a number of these sources. In addition, Col. Biddle said that he had personally seen most of the sources in question.

Following are quotations from testimony of Col. Biddle:

The city of San Francisco obtains its water supply at present from sources all within about 50 miles of the city. It has been recognized for some years past that these sources were insufficient, and therefore San Francisco has been investigating supplies from other points. Early investigation convinced the engineers employed by the city that the most economical supply was from the upper Tuolumne River, making use of two main reservoir sites, Lake Eleanor and Hetch Hetchy Valley, lying within the Yosemite National Park. * *

Col. Biddle recited the appointment of the Board of Army Engineers, and stated that two inspections of the reservoirs in the Yosemite Valley and other proposed sites were made, and also l

that very comprehensive inspections of the available sites were made. In addition, Mr. H. H. Wadsworth, assistant engineer. United States Engineer Service, was secured by the board to make further investigations and examinations. Mr. Wadsworth had been in the employ of the engineer department in California and is familiar with the rivers and reservoir sites in central California. Mr. Wadsworth spent about a year and a half on duty in connection with the work of the Army board.

Resuming, Col. Biddle says:

While the city of San Francisco makes the application, the other cities on the bay are also vitally interested, as in most cases the water supply in those communities is nearing its limit of development, and the more important ones have already taken such steps as seem desirable to join San Francisco in obtaining a new water supply.

The board took into consideration all possible scarces of water supply.

The Hetch Hetchy supply is estimated to cost \$77,000,000, spread over a number of years. The second and third sources are estimated to cost from \$97,000,000 to \$99,000,000.

The data and analysis of these projects appear in the Army board report (H. Doc. No. 54) and also in the hearings before the Public Lands Committee, beginning at page 50. Reference to these reports and hearings is hereby made.

Resuming extracts from the hearings:

Mr. TAYLOR of Colorado. If you know any reason why we should pass this bill, tell us that reason.

Col. Biddle. The reason why you should is that San Francisco has to have the water; that it is a perfectly practicable way, and by far the most economical way.

* * The power development in the Hetch Hetchy is greater than it is at any other source of supply.

Col. Biddle then analyzed the possible alternative sources, which analysis is to be found in the printed hearings, page 56 et seq. He said that all these alternative sources were much more expensive and presented greater engineering difficulties than the Hetch Hetchy. He stated further that, in his judgment, San Francisco would meet opposition from the irrigationists and others if other sources were selected. Further, Col. Biddle stated that it would take San Francisco longer to obtain water rights in other systems, whereas the city now owns the water rights in the Hetch Hetchy. He also stated that the city owns the greater part of the floor of the Hetch Hetchy Valley and a small part of the dam site.

Resuming extracts:

The CHAIRMAN. Are you acquainted with the sentiment of the people of San Francisco touching the supply they desire?

Col. Biddle. Yes, sir; the sentiment is overwhelmingly in favor of the Hetch Hetchy supply.

The CHAIRMAN. There can be no question about that?

Col. Biddle. None whatever.

Col. Biddle. None whatever.

Col. Biddle. There is no question in my mind that the Hetch Hetchy is the best water supply for San Francisco, and that it is the most economical that can be obtained; it can be obtained more promptly, and is better in every way * *.

The Chairman. With the information before you, coupled with the results of these two investigations, if you were a member of this committee, having due regard for the rights of the irrigation people, and having due regard for the rights of the nature lovers, who believe that you should not interfere with the Yosemite National Park, and having due regard for the needs of San Francisco, which system would you vote for?

Col. Biddle. I would vote for the Hetch Hetchy system.

The Chairman. You would vote for the Hetch Hetchy system?

Col. Biddle. Yes, sir.

The Chairman. Would you feel, in casting a vote of that kind, that you had inflicted a greater wrong upon the irrigation people and the nature lovers than if you voted for one of the other systems?

Col. Biddle. No, sir; so far as the nature lovers are concerned, my own preference is for a valley, for the reason that the Sierras are full of beautiful lakes. While there are, of course, a number of valleys, there are very few like the Hetch Hetchy. There are very few in the whole Sierras; still it would be very beautiful as a lake. The difference between the Yosemite Valley and the Hetch Hetchy, in my opinion, is that the Yosemite is far grander than the Hetch Hetchy, but the floor of the Hetch Hetchy is more attractive. The cliffs and waterfalls of that valley are wonderful, and would not be injured by the creation of a lake. So, with this lake you would still have a wonderful piece of scenery. Then, of course, the facilities that the city would give would afford more people an opportunity to visit the valley.

I think the city of San Francisco is agreeing to do a very reasonable

I think the city of San Francisco is agreeing to do a very reasonable thing and that the roads and trails required will satisfy the demand.

The CHAIRMAN. As matters now stand, it would be pretty extravagant for poor people to undertake to go there?

Col. BIDDLE. It is impossible for them to go in there, unless they go in with knapsacks on their backs. In the early summer the mosquitoes are very bad, and in the late summer it is too hot in the Hetch Hetchy Valley.

Col. Biddle stated that the Hetch Hetchy Lake would be 6 or 7 miles long by  $1\frac{1}{2}$  miles wide and would flood an area of approximately 1,100 acres.

Col. Biddle also stated that the proposed sanitary regulations "are such as should be made anyhow, if the park is to be used by any large number of people." Answering a question on this subject, Col. Biddle added:

I think that as soon as the park begins to be used to any extent it will be necessary to have the same rules for the protection of campers as for the protection of the people of San Francisco.

Discussing necessity for a long look ahead in California, on account of the general lack of water, Col. Biddle said:

Cities situated as San Francisco have to look a long time forward. Here at Washington, for instance, you have the Potomac River, and the chances are that the water situation, so far as Washington is concerned, 50 years hence will be the same as it is to-day. In the case of San Francisco, however, there will be danger of so many water rights and water use developments that it might be almost impossible 50 years from now to obtain water rights without great expense and even hardship to agricultural communities. That is the reason we take that advanced

Responding to the chairman, the other members of the Army board expressed their views:

Col. Cosby. I concur fully in the statement of Col. Biddle. There is only one small point of difference, and that is as to whether the Hetch Hetchy Valley would be more attractive with this reservoir in it than in its present condition. I believe that with the lake it would be even more beautiful than it is in its natural condition.

TAYLOR AND COSBY INDORSEMENTS

Col. Taylor. There is not the slightest question in my mind but that this should be used as the source of water supply, and not only that, but that it will be used as a water supply in a very short time independently of whether this project is adopted or not. I think that the pressure will be so great to conserve the water up there that it will be used as a storage reservoir. It is by far the best storage reservoir in that section of the country, and water is so valuable up there that they can not afford to let it run to waste. If you deny the use of it to San Francisco, sooner or later the water will be put to other uses. Somebody will be asking for permission to utilize the Hetch Hetchy Valley as a storage reservoir for irrigation purposes. This water will certainly be used for the city of San Francisco or for irrigation purposes.

Col. Cosby. I presume the members of the committee fully understand how inaccessible the Hetch Hetchy Valley is. I think the roads will make it accessible to a greater number of people. At the present time I think that there are practically only two classes of people who use it, people who are unusually wealthy, or people who are unusually strong and healthy and are able to make the trip.

CITY'S POINT OF VIEW.

CITY'S POINT OF VIEW.

[Extract from statement of Hon. James D. Phelan, former mayor of San Francisco, and representative of Mayor James Rolph, jr., and the city of San Francisco.]

San Francisco, and representative of Mayor James Rolph, jr., and the city of San Francisco.]

I will emphasize the fact that the needs of San Francisco are pressing and urgent. A large number of our population has been lost to Oakland, Alameda, and Berkeley by reason of the fact that we have never had adequate facilities, either of transportation or of water supply. So San Francisco, the chief Federal city on the Pacific coast, asks the Federal Government for assistance in this matter by grant and not by money. It has obligated itself to pay \$70,000,000 for a water supply. We have endeavored to satisfy the needs of the irrigationists in good falth, as well as the local water monopoly, and we come this year to Washington, I think, with the good will of those heretofore opposed to us, possibly with the exception of the gentlemen who are devoted to the preservation of the beauties of nature.

As Californians, we rather resent gentlemen from different parts of the country outside of California telling us that we are invading the beautiful natural resources of the State or in any way marring or detracting from them. We have a greater pride than they in the beauties of California, Mount Whitney, 15,000 feet below the sea, as we have the lowest land, in Death Valley, 300 feet below the sea. We have the lowest land, in Death Valley, 300 feet below the sea. We have the highest tree known in the world, and the oldest tree. It is history goes back 2,000 years, I believe, judged by the internal evidences: as we have the youngest tree in the world, Luther Burbank's plumcot.

All of this is of tremendous pride, and even for a water supply we would not injure the great resources which have made our State the playground of the world. By constructing a dam at this very narrow gorge in the Hetch Hetchy Valley we create not a reservoir but a lake, because Mr. Freeman has shown that by planting trees or vines over the dam the idea of a dam, the appearance of a dam is entirely lost; so coming upon it it will look like an emerald ge

To restore the life of a little child And bring him back to his own, Is a darned sight better business Than loading 'round the throne.

To provide for the little children, men, and women of the 800,000 population who swarm the shores of San Francisco Bay is a matter of much greater importance than encouraging the few who, in solitary lone-liness, will sit on the peak of the Sierra loafing around the throne of the God of Nature and singing his praise. A benign father loves his children above all things. There is no comparison between the highest use of water—the domestic supply—and the mere scenic value of the mountains. When you decide that affirmatively, as you must, and then on top of that, that we are not detracting from the scenic value of the mountains, but enhancing it, I think there is nothing left to be said.

All the Members of Congress from California are favorable to the grant to San Francisco under the provisions of the bill.

A written statement for the Turlock and Modesto Irrigation Districts was presented by the authorized representatives of said water district, which approved the bill as drafted and reserved the right to object should the conditions relating to those irrigation districts be eliminated or materially modified. These districts have telegraphed their approval of this bill.

For the purpose of presenting bill H. R. 7207 with its provisions fully before the House, an analysis is made thereof, as follows.

Section 1 provides a grant of all necessary rights of way not exceeding 250 feet, as in the judgment of the Secretary of the Interior and the Secretary of Agriculture are required for the construction and operation of a water-supply system for the city of San Francisco and other cities which may hereafter join in the Metropolitan Water District about San Francisco Bay. The grantee is required to file maps showing proposed location of rights of way, power houses, pole lines, roads, trails, bridges. and so forth, and procure the approval of the Secretary of the Interior as to these locations. Within the jurisdiction of the Stanislaus National Forest, the approval of the Secretary of Agriculture must be procured. This section is analogous to and practically identical with the grant made to the city of Los Angeles for a water-supply system from the Owens River.

Section 2. This section requires the grantee to file with the registers of the United States land offices within three years all maps showing boundaries or locations, and prohibits permanent construction work until maps shall have been filed and approved. Proviso 1 permits changes in location by approval when engineering problems are met and such changes are advisable. Proviso 2 provides that the rights of the grantee already pro-cured shall be given due consideration and relate back to the filing of maps as provided in this section. Proviso 3 is to the effect that copies of maps already filed and approved under previous permits may be approved by the Secretary of the Interior.

Section 3 provides that the rights of way granted shall not be effective over homestead, mining, or other valid claims which in law constitute prior rights unless the grantee shall procure relinquishment by due process and just compensation; and, further, the section provides that any such entryman or claimant shall have the right to sell and the grantee shall have the right to purchase rights of way over homesteads or other claims. A proviso prescribes that the act shall not apply to lands embraced in rights of way heretofore approved for the benefit of any party other than the said grantee or its predecessors in interest.

(The language of section 3 and preceding sections is designed to protect the vested rights heretofore procured by the grantee or others.)

Section 4 provides that the grantee shall conform to all regulations prescribed to govern the Yosemite National Park and the Stanislaus National Forest, and further provides that no timber shall be cut in the national park or in the forest reserve except such timber as may be actually necessary to construct, repair, and operate its water and electric power system. repair, and operate its water and electric power system. An timber cut shall be designated by the Secretary of the Interior or the Secretary of Agriculture where such timber is outside the right of way. Proviso 1 prohibits the cutting of any timber in the Yosemite National Park, except from land to be submerged or which constitutes an actual obstruction to the rights of way or to any road or trail provided in the act, and to preserve artistic harmony the grantee is compelled to submit designs and structures to the Secretary of the Interior for approval. It is intended that all permanent dams, buildings, etc.,

shall conform to the landscape surroundings.

(The grantee acquiesces in this proviso, which is designed to prevent the cutting of a stick of timber in the Yosemite National Park, and thus prevent any possible destruction of trees within the reservation, and also to make the park as

artistic as possible.)

Proviso 2 of section 4 requires the grantee to construct and maintain bridges and crossings over its rights of way of such character and construction as may be prescribed by the Secre-tary of the Interior or the Secretary of Agriculture, and, further, the grantee shall, upon order of the United States officials, construct and maintain fences along the rights of way. It is still further provided that the grantee shall clear its rights of way of débris and inflammable material, thus preventing forest fires, and also shall permit the free use by Government officials of all trails, telephone and telegraph lines, railroad and other utilities which may be constructed as adjuncts to the watersupply system. (The requirements of this section cause the grantee to expend a considerable sum in the improvement of the park and the forest reserve and make access to these public places easy and comfortable. The expenditure of this money for this purpose is a consideration, in part, for the grant.)

Section 5 provides that the grant by the Federal Government is an easement and that the lands shall be disposed of only subject to such easement. Proviso 1 compels the grantees to diligently prosecute its construction work without cessation, and in the event that such construction work ceases for a period of three years and the Secretary of the Interior determines the grantee has not been duly diligent, all rights under the grant may be declared forfeited by suit in the United States District Court for the Northern District of California. The Attorney General is required to prosecute such suit to final judgment when requested to do so by the Secretary of the Interior. Proviso 2 provides that the Secretary of the Interior shall not attempt to make a forfeiture if the work of the grantee has been delayed or prevented by the act of God or the public enemy, or by engineering or other special or peculiar difficulties which could not have been reasonably foreseen and overcome and were beyond the control of the grantee. Proviso 3 compels the grantee to at all times comply with the regulations authorized by the act, and in the event of material departure from said regulations the United States officials may take such action as may be necessary, in the courts or otherwise, to enforce such regulations.

Section 6 provides that the grantee is prohibited from selling or letting to any corporation or individual, except a municipality, a water district, or an irrigation district, the right to sell or sublet the water or electric energy sold or given to it by the grantee; it is provided also that the rights under the grant shall not be subject to sale, assignment, or transfer to any private person, corporation, or association.

(This provision, acquiesced in by the grantee, was designed to prevent any monopoly or private corporation from hereafter obtaining control of the water supply of San Francisco.)

Section 7 provides that for and in consideration of the grant the grantee shall make certain payments, the proceeds of which are to be used exclusively for the construction of roads and other improvements in the Yosemite National Park and other national parks in the State of California. The theory of this section is that San Francisco is receiving certain privileges and benefits from the national park, and that the consideration is for the use of public lands now owned by the United States. The payments proposed will, it is estimated, amount to more money annually than is at present charged to private corporations under similar Federal conditions. It is proposed that the grantee shall pay, beginning five years after the passage of the bill, the sum of \$15,000 annually for a period of 10 years; \$20,000 for a period of 10 years thereafter; and, unless otherwise provided by Congress, \$30,000 annually for the remainder of the term of the grant. The moneys so paid are to be kept in a separate fund by the United States and applied to park improvements as designated by the Secretary of the Interior. Congress retains the power to revise the schedule.

(The amounts specified in this section are approved by the Secretary of the Interior and his subordinates. The method of providing for improvement of the park is also approved.)

Section 8 defines the grantee as the city of San Francisco and such other municipalities or water districts which may, with the consent of the city or in accordance with the laws of the State of California, hereafter participate in or succeed to the heneficial rights and privileges of the act.

beneficial rights and privileges of the act.

(The cities about the Bay of San Francisco have always approved the granting of the Hetch Hetchy reservoir site to San Francisco, with the understanding that these cities may in the future join with the city of San Francisco in a metropolitan water district. The State law of California provides for the creation of a metropolitan water district, and because of this law the bay cities have not requested at this time to be made cograntees. They know they will have the privilege to share in the benefits after San Francisco has made the necessary investment and brought the needed water to the bay cities for domes-

Section 9 requires the grantee to observe sanitary regulations within the Hetch Hetchy watershed and around reservoir sites. These regulations provide that no human excrement, garbage, or other refuse shall be placed in the waters of any reservoir or stream, or within 300 feet thereof; and, further, that all sewage from permanent camps or hotels within the watershed shall be filtered by natural percolation through porous earth or otherwise adequately purified; and, further, no person shall bathe, wash clothes or cooking utensils, water stock, or in any way pollute the water of the reservoirs constructed under this grant or the streams leading thereto within 1 mile of said reservoir. The cost of inspection necessary to enforce sanitary regulations is to be paid by the grantee, and such inspection shall be under the direction of the Secretary of the Interior. Should these regulations prove insufficient to the grantee, then the grantee shall install a filtration plant, and no other sanitary rules or restrictions shall be granted.

(These sanitary regulations were prepared by experts of the United States Government, and Mr. Allen Hazen, and Prof. Whipple, and are approved by the Board of Army Engineers, the Secretary of the Interior, the Director of the Geological Survey, and others. It is intended that the use of the watershed shall be free to campers and visitors, and that no onerous or prohibitive sanitary regulations shall ever be imposed. The sanitary experts assert that the storage of water in the Hetch Hetchy reservoir will insure adequate purity, and the Govern-

ment officials assert that the regulations herein are only those required by common decency and for the protection of campers themselves; and, further, these regulations are practically identical with the rules now in force in the Yosemite National Park.)

Paragraph (b), section 9, provides that the grantee shall recognize the prior rights of the Modesto and Turlock irrigation districts to 2,350 second-feet of water. This provision permits of the enlargement of the districts as now constituted by an additional area of 43,000 acres, but does not affect the distribution of water.

(The irrigation districts having prior rights desire that those rights be recognized on the theory that the Government, having the right to refuse the grant to San Francisco, has therefore the right to place lawful conditions therein. The recognition of these priorities does not impinge upon California State law or modify existing rights.)

Paragraph (c), section 9, is a condition that the grantee shall be required to release the necessary amount of stored water to assure the flow of 2,350 second-feet included in the priorities of the irrigation districts; and, further, condition (c) recognizes the rights of the said irrigation districts to take 4,000 second-feet of water out of the natural flow of the Tuolumne River during a period of 60 days following and including April 15 of each year.

(Condition (c) is a limitation upon the grant, according to the theory of the bill, and is protective of rights already acquired and which can not be disturbed so far as they relate to the irrigation districts. The provision relating to the 4,000 second-feet of water is to provide for the beneficial use by the irrigationists of water which otherwise goes to waste. In the period mentioned, April 15 to June 15, the Tuolumne River is a torrential flood. Fifty miles of watershed intervene between the Hetch Hetchy Dam and the dam of the irrigationists at La Grange. It is proposed that the irrigationists may take up waste waters, store them, and thus lessen the possible draft upon the stored waters of the city. It should be borne in mind that San Francisco does not contemplate interfering with the natural flow of the Tuolumne. The intent is to store flood waters which come from melting snows and leave the normal flow of the river uninterrupted. The benefit to the irrigation districts in this provision is that the landowners will receive the benefit of an investment of approximately \$50,000,000 without being compelled to put up any part of the cost, and the construction of the system will insure the priorities of the irrigationists and they will receive water in the dry period, when it is most needed. Without the construction of the Hetch Hetchy Dam there can be no flow in the river during the summer and fall.)

Paragraph (d), section 9, provides that the grantee shall sell unused stored water needed for beneficial use on irrigable lands at cost, to be computed by the Secretary of the Interior. The minimum and maximum of such stored waters to be so delivered to the irrigation districts is to be regulated each calendar year, and if the irrigation districts develop sufficient water in the foothill reservoirs for their own needs then the said grantee shall not be required to sell or deliver any stored waters. It is also provided that water used for the generation of electric power be released in the Tuolumne River free.

(The theory of condition (d) is that after the domestic needs of the city are satisfied and a surplus remains then the irrigation districts shall have the right to purchase so much of this surplus as may be beneficially used. In the event of any dispute the Secretary of the Interior may be called in to adjust the differences.)

Paragraph (e), section 9, provides that the Secretary of the Interior shall fix the minimum and maximum of stored waters to be released, and he shall also fix the price to be paid therefor, in accordance with the provisions of paragraph (b).

Paragraph (f), section 9, provides that the Secretary of the Interior shall revise the maximum and minimum amounts of stored water to be released whenever the irrigation districts shall have properly developed certain reservoir and storage dams in the foothills. In the purview of this condition the irrigationists may not be required to expend more than \$15 per acre-foot storage capacity for the development of local storage, and it is further provided that the grantee may require the stoppage of excessive water losses and waste because of defective ditches.

(This and preceding conditions are acquiesced in by the grantee and by the irrigation districts. The provision is the result of an amicable settlement between the two parties.)

Paragraph (g), section 9, provides that the grantee shall not be required to supply stored water to the irrigation districts until the latter shall have first drawn upon their own stored water to the fullest practicable extent.

(This is also agreeable to all parties.)

Paragraph (h), section 9, provides that the grantee shall not divert beyond the limits of the San Joaquin Valley any waters of the Tuolumne watershed in excess of the amount to be used

for domestic and municipal purposes.

(The purpose of this provision is to make possible the use of surplus waters of the San Joaquin Valley and prevent the use of possible surplus for irrigation of lands remote from the Tuolumne River. John R. Freeman, consulting engineer for San Francisco, suggested that surplus water might be economically used for intensive farming in lands contiguous to San Francisco Bay. Inasmuch as San Francisco expects to purchase the local water supply, and thus acquire sufficient water for local irrigation purposes, it was deemed advisable and economical to provide that surplus from the Tuolumne should be used in the San Joaquin Valley. This is an economic use of water for the highest purpose of all concerned.)

Paragraph (1), section 9, provides that the grantee shall at its own expense provide water-measuring apparatus and keep hydrographic records, which apparatus and records shall be open to inspection by any interested party at any time.

Paragraph (j), section 9, is the engineers' definition of the

flow of the Tuolumne River.

Paragraph (k), section 9, requires San Francisco to build a dam at least 200 feet high.

(This means that the city will expend from \$500,000 to \$1,000,000 in excess of initial expenditures necessary for its immediate needs. The intent is to build the dam high enough to provide adequate storage to meet the conditions of the grant,

and is primarily a benefit for the irrigationists.)

Paragraph (1), section 9, provides that the grantee shall sell excess of electrical energy to the irrigation districts and municipalities within the irrigation districts for the beneficial use of landowners, whenever such excess is not required for the actual municipal purposes of the grantee. It is also provided that no power plant shall be interposed on the conduit of the grantee, except by the grantee itself. The proviso of the paragraph is that the grantee shall first satisfy the needs of landowners for pumping water for drainage or irrigation and the needs of the municipalities within the irrigation districts for municipal purposes before excess of electrical power may be sold for commercial purposes.

(This is a direct benefit to the irrigationists, and places no

burden or hardship upon the grantee.)
Paragraph (m), section 9, provides for the development of The grantee is required to develop 10,000 horseelectric power. power within three years after the completion of that portion of the system which is usable for power development. Within of the system which is usable for power development. Within 10 years thereafter the grantee shall develop 20,000 horse power; and within 15 years 30,000 horsepower; and within 20 years 60,000 horsepower; unless, in the judgment of the Secretary of the Interior, the public interests will be satisfied with a lesser development.

The prices of electricity are to be fixed under the laws of California, or if there be no such laws, at prices approved by the Secretary of the Interior, such prices to return to the grantee

actual cost of construction.

Paragraph (n), section 9, provides that if the grantee fails to develop horsepower as directed herein, then the Secretary of the Interior may lease to such person or persons as he may designate those portions of the rights of way, structures, dams, etc., as may be necessary for development, use, and sale of power which the grantee has failed or neglected to develop.

(This is a forfeiture penalty to prevent cold storage of power

possibilities.)

Paragraph (o), section 9, provides that rates to be charged for power for commercial purposes (in the event that lease is

camp purposes at the Meadow camping place, a third of a mile from Hetch Hetchy. It is also provided that all trail and road building shall be done subject to the approval and direction of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions.)

Paragraph (q), section 9, provides that the grantee shall furnish water at cost to any authorized occupant within 1 mile of the reservoir, and shall repair and maintain roads and trails

constructed under the provisions of the grant.

Paragraph (r) provides that the grantee shall pay all the cost of inspection and investigations which may be required of the Department of the Interior where such investigations and inspection involve expense to the department.

Paragraph (s) provides that the grantee shall file an acceptance of the conditions of this act within six months after its

assage.

Paragraph (t) requires the grantee to convey to the United States any and all tracts of land now owned by the city within Yosemite National Park or the national forest, which lands are

not actually required for use under the provisions of this act.

(The city of San Francisco purchased private lands for the purpose of exchanging the same with the Government in lieu of that portion of the floor of the Hetch Hetchy Valley which is not owned by the city. The purpose of this plan is to provide suitable and desirable camping places for visitors who may wish to visit the Sierra and who would otherwise have camped in the Hetch Hetchy, and at the same time compensate the United States for lands to be submerged.)

Paragraph (u) provides that the grantee shall sell the water at cost to the military reservations at San Francisco. This was requested by the Secretary of War and is acquiesced in

by the city.

Section 10 provides that the conditions of this grant shall be a binding obligation upon the grantee so far as the conditions

relate to the irrigation districts.

Section 11 provides that this act shall not be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water or any vested right acquired thereunder, and the Secretary of the Interior is directed to proceed in conformity with the laws of the State of California in carrying out the provisions of this act. The CHAIRMAN. The time of the gentleman from Califor-

nia has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to ex-

tend my remarks in the RECORD.

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the Record. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I yield to the gentleman from Ohio [Mr. WILLIS].

Mr. WILLIS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing the whole of the article from the New York Times to which I referred in my question to the gentleman from California.

Mr. FERRIS. Reserving the right to object, Mr. Chairman, I

would like to ask what the article is.

Mr. WILLIS. The article is from the New York Times, concerning which I interrogated the gentleman from California [Mr.

RAKEB]. It is an article on this subject. Mr. FERRIS. I have no objection. The CHAIRMAN. Is there objection?

There was no objection.

The article is as follows:

A NATIONAL PARK THREATENED.

for power for commercial purposes (in the event that lease is made to another party under paragraph (n)) shall conform to the laws of the State of California, or in the absence of any such law shall be subject to approval by the Secretary of the Interior; and it is also provided that all records, books, etc., shall be open to inspection by the Secretary of the Interior. Paragraph (p), section 9, provides for the building of roads and trails in the Yosemite National Park as designated by the Secretary of the Interior. (The routing of these roads and trails was made by Mr. Marshall, of the Geological Survey, who surveyed the Hetch Hetchy Valley and is familiar with all the scenic and topographical conditions there. These roads will cost the city of San Francisco \$500,000 to \$1,000,000, and are to be turned over, free of charge, to the United States. This is one of the important considerations, and carries compensation to the Government for the rights of way granted. The construction of these roads will make the Hetch Hetchy Valley accessible and will provide a convenient and easy way for mountaineers to reach the higher parts of the Sierra. The paragraph also contains a requirement that the grantee shall provide a water supply for

are disposed of. Even on their insufficient data, the Army engineers report that San Francisco's present water supply can be more than doubled by adding to present near-by sources and more economically than by going to the Slerras.

The suppressed report, showing that the Mokelumne River is a better and cheaper source than the Hetch Hetchy, says that between 600,000,000 and 700,000,000 gallons of water outside the park may be delivered daily into San Francisco and the adjacent bay region, supplying their growing needs for perhaps a century to come. Representative Scott Ferris, chairman of the park lands committee, has been apprised of the existence of this report. A receipt of the copy is worth waiting for. If the water-power grabbers are put off this session or two or three or many more sessions, before gaining an entrance to the Hetch Hetchy Valley, the dwellers of San Francisco will not go thirsty.

Mr. MONDELLI. Mr. Chairman before I begin any extended

Mr. MONDELL. Mr. Chairman, before I begin any extended statement on the bill under consideration I wish to call attention to the fact that quite a number of very good people in the country have misunderstood my attitude in regard to the I was chairman of the Committee on Public Lands legislation. in 1909, at the time when a bill proposing to grant San Francisco the right to utilize the Hetch Hetchy Valley for storage purposes was before the committee. The committee unanimously reported against that bill. Mr. Robert Underwood Johnson, John Muir, and many other good people in the country, lovers of nature, desirous of maintaining our national parks as pleasure grounds for all the people, were opposed to the legislation at that time, as they are at this time. The adverse report of the committee at that time was not, however, based to any considerable extent on the arguments made by those gentlemen: nor was it altogether predicated on the proposition that San Francisco ought never to be allowed to use the Hetch Hetchy Valley for storage purposes. It was based largely on the fact that at that time San Francisco had not, we thought, sufficiently examined other possible sources of water supply, and more particularly because the legislation itself contained a number of provisions that were held to be highly objectionable, to quote the language of the report:

The legislation is objectionable for reasons which take it out of the category of legislation of doubtful propriety and expediency and place it in that of doubtful constitutionality, and of unquestionably mischlevous and dangerous character.

So that report was not intended to voice the conviction of the committee against San Francisco using the Hetch Hetchy Valley, and certainly it was not based on the proposition that the utilization of the Hetch Hetchy Valley by San Francisco would necessarily be a misfortune from a public standpoint. But the nature lovers, the gentlemen to whom I have referred, high-minded, disinterested men, knew that the committee did take into consideration their views and that it was one of the matters that persuaded us to order an adverse report; and so the same gentlemen have assumed that, as I wrote the report of 1909, I would take an adverse position at this time.

Mr. Johnson, in a circular letter which he sent out, which was placed in the Record at the instance of the gentleman from Illinois [Mr. Mann] this morning, asked those opposed to the use of the valley by San Francisco to write me or the Senator from Utah, the Hon. Reed Smoot. I have received, I think, about 60 letters, all of them, or most of them, from people w.l. known in the country-men whose motives are of the best, men to whose opinion I am much inclined to defer-all of them opposing the grant on the ground that the Hetch Hetchy Valley should be retained in its present condition. As much as I appreciate the motives which actuate these gentlemen, as much as from a senti-mental standpoint I am inclined to agree with them, I feel that the situation is such that we can not afford to deny the use of the Hetch Hetchy Valley as a storage reservoir for the reasons they suggest. Eventually and in the running of time, every available storage possibility west of the Sierras must be utilized, and the Hetch Hetchy Valley will eventually be a storage reservoir either for the supply of San Francisco and surrounding cities for domestic and allied purposes or for the purposes of irrigation in the San Joaquin Valley. If I were a Californian living outside of the influence of San Francisco, I am rather inclined to think that I should insist that the Hetch Hetchy should be held for the uses of irrigation.

Mr. KAHN rose.

Mr. MONDELL. I trust that the gentleman will not interrupt me at present. I will endeavor to make a fair statement, and the gentleman knows that I have given a good deal of study to this matter. As I say, I have been rather inclined to think that the Hetch Hetchy Valley should be held for the uses of irrigation rather than utilize it for the use of San Francisco and the surrounding cities, for a number of reasons. There are a number of other possible sources of water supply for San Francisco. Everyone acquainted with the situation must admit that, al-

certain portions of San Joaquin Vailey, and without any desire to influence anyone with regard to his vote on this bill, but to state the matter absolutely fairly as I see it after careful consideration, I think I am justified in saying that we must admit that the granting of the use of the Hetch Hetchy to San Francisco will have the effect of dooming certain areas of the San Joaquin Valley that might otherwise be irrigated to perpetual aridity. Now, of course, that is an expression of opinion. People may not agree with me-the gentleman from California may not agree with me, but that is my personal

Mr. FERRIS. If the gentleman will permit, I know the gentleman is familiar with the bill and I am sure he will admit that the annual flow of the Tuolumne River is in no wise interfered with, and in addition to that some of the flood waters

Mr. MONDELL. It is true that the right of the valley to the use of the normal flow during the irrigation season is recognized. San Francisco is proposing to conserve the entire flood and winter flow of the Tuolumne River, providing the Hetch Hetchy Valley will hold it, and that means a complete utilization primarily for the bay cities and for the irrigated districts to a certain extent as well. I do not say that fact should be controlling in deciding as between the two uses, but I do say that candor compels us to admit that as a feature of the situation that can not be overlooked. If I were a Californian, to repeat my former statement, living outside of the influences of San Francisco, I am inclined to think I should hold to the view that San Francisco should go elsewhere for her water supply and that the Hetch Hetchy storage should be eventually utilized for the irrigation of the San Joaquin

Mr. RAKER. Will the gentleman yield?
Mr. MONDELL. In a moment. Whichever way you view it that disposes of the proposition that you can not or must not use the valley for a reservoir.

Mr. RAKER. Will the gentleman yield?

Mr. MONDELL. Now, Mr. Chairman, I expect to use the full hour. I have quite a number of things to say and prefer not to be interrupted unless I may have an extension of time.

Mr. RAKER. The gentleman has been very accommodating

to me and I will not interrupt.

Mr. MONDELL. I will be delighted to be interrupted, it will please me very much to be interrupted and yield for an interruption, particularly to the gentleman who is so well informed, but I would like to say to the House that if I am to be interrupted I shall ask for a slight extension of time and if there is no objection to that I will be delighted to yield to the gentleman now.

Mr. RAKER. Personally, I have no objection, because I always like to hear the gentleman talk. While I may differ from him I always like to hear him discuss questions which he knows so well.

Mr. MONDELL. No better than the gentleman from Cali-

fornia who has just spoken.

Mr. MANN. The gentleman ought not to assume there is going to be an extension of time. Could not we reach an agreement now as to time?

Mr. FERRIS. I think we could. Mr. MANN. I understand it is the intention of the gentleman in charge of the bill to move that the committee rise at half past 4 o'clock to accommodate a Democratic caucus?

Mr. FERRIS. That is true.

Mr. MANN. And ask that the House meet to-morrow at 11 o'clock?

Mr. FERRIS. That is true.

Mr. MONDELL. I hope this does not come out of my time, Mr. Chairman.

Mr. MANN. It is an hour and three-quarters more now. How much more time do you want on that side of the House?

The CHAIRMAN. The Chair will state that several gentlemen have spoken to the Chair asking to be recognized, probably consuming an hour and a half to two hours.

Mr. FERRIS. We can not conclude to-day. Mr. MANN. But I think we can close general debate tomorrow morning by unanimous consent.

Mr. FERRIS. If it is agreeable to the gentleman, I will ask unanimous consent that we run to-day until 4.30-

Mr. MANN. You can not do that. Mr. FERRIS. In the committee, after which it is tacitly though they may not be as satisfactory to San Francisco as Hetch Hetchy for a number of reasons.

On the other hand, the Hetch Hetchy Valley is the only source of water supply for the full and complete irrigation of finish the bill to-morrow, as a good many want to get away for

Mr. MANN. What you mean is to have general debate to-

Mr. FERRIS. For one hour, and one hour and three-quarters

Mr. MANN. If that were done, would there still probably be liberal debate under the five-minute rule for gentlemen who

want to get in? Undoubtedly. I think there is no disposition ig. We have been waiting quite a while— Mr. FERRIS. to hurry anything.

Mr. MANN. I think we can finish to-morrow.

The CHAIRMAN. The gentleman from Oklahoma [Mr. Fer-RIS] asks unanimous consent that general debate shall continue until 4.30 o'clock this evening, when the committee shall rise, and that to-morrow there shall be one hour of general de-

Mr. FERRIS. Beginning at 11 o'clock a. m. and closing at 12. Mr. FRENCH. Mr. Chairman, reserving the right to object, I have requested that I be given a half hour, and I presume that will be taken into consideration in this arrangement of

Mr. FERRIS. Undoubtedly.

Mr. FRENCH. I think I can give that much time to the question.

Mr. FERRIS. The gentleman is the ranking member of the

committee and ought to have that much time.

Mr. MANN. There are several members of the committee who want to be heard. My colleague from Illinois [Mr. Thomson] might desire time, and the gentleman from California [Mr. KAHN] and the other gentleman [Mr. J. R. KNOWLAND] wants

Mr. STEENERSON. Mr. Chairman. I desire to say that I may want some time. I am not on the committee—
The CHAIRMAN. The Chair will say to the gentleman

from Oklahoma [Mr. Ferris] that, judging from the time the gentlemen have asked the Chair for, he would suggest that at least two hours' time will be required to fill these requests.

Mr. FERRIS. For the present, Mr. Chairman, I withdraw the request. I think we will have no trouble in getting along.

There is no disposition to shut off anybody.

The CHAIRMAN. The gentleman from Oklahoma withdraws

the request.

Mr. MONDELL. Mr. Chairman, as a matter of fact I would prefer to be able to yield to interruptions, because I think perhaps I could illuminate the subject better by answering inter-rogatories than otherwise. I simply suggested I did not feel inclined to yield, because being, so far as I know, about the only one who proposes to speak at length in opposition to the legislation, there is a considerable field to cover, and, therefore, if I had any considerable amount of interruption I should feel constrained to ask for at least a few moments of extension equal to the amount of the interruptions.

Before I begin a discussion of the bill, I want to say, Mr. Chairman, in a way I feel somewhat embarrassed in opposing this legislation. I was long a member of the Committee on Public Lands. I have a very high regard for the men who constitute that committee, the chairman and all the members on both sides. I am inclined to take their view in regard to this legislation. I am taking their view with regard to the legislation so far as the matter of granting this right to San

Francisco is concerned.

I have taken that view a little against my judgment, because I felt that the members of the committee, after hearing the matter so patiently as they had, were probably better informed as to the advisability of doing what is proposed to do, so far as the general proposition is concerned, than I would be. Furthermore, I know, Mr. Chairman, that the members of the committee made a very earnest effort to secure a good bill, and it is with some regret that I shall call attention to the features of the bill that I consider objectionable. I shall not be as frank in regard to what I believe to be the opinions of many members of the committee as I might be. I shall not say that I am certain that a very considerable number of the members of the committee do not like many features of the bill, that a majority of them are much opposed to some of its provisions, and that a majority of them would be delighted to see some of the provisions amended or stricken from the bill. If I were to say that, however, I think, Mr. Chairman, I should be well within the truth.

Argument is made that San Francisco must have Hetch Hetchy because there is no other available source of supply. Well, that is true only in a way. Hetch Hetchy, as some one suggested some time ago, is with San Francisco a state of mind.

Ever since Los Angeles went to the far Sierras and secured a spectacular and magnificent water supply it has been useless for anybody to talk to San Francisco about going anywhere for a water supply except to this majestic valley, only slightly inferior in size, beauty, and grandeur to the Yosemite itself. In other words, San Francisco must needs have not only an adequate water supply, but a more expensive and spectacular one than her sister city farther down the coast.

In my opinion there are other available supplies that would be cheaper than the Hetch Hetchy. They talk about the Hetch Hetchy being cheap, as though that were an argument in favor of it. In my opinion that would be an argument if it were actually true, but in my opinion it is not true. I think that San Francisco could edge over a little and leave the Hetch Hetchy to the San Joaquin irrigators and get her supply from the adjacent lakes and streams at a less cost than that at which she can utilize Hetch Hetchy. But then it would not be the striking and majestic thing that the securing of the water supply from the gem of the Sierras is, and therefore it does not appeal to San Francisco.

In a good many ways San Francisco has been entirely frank and open and fair about this matter; and that being true, it is very much to be regretted that there was a report suppressed unquestionably suppressed.
Mr. FERRIS. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. People say it would have thrown no new light on the subject. Well, in a way that is true, because much contained in that report was contained in a report made by the engineer of a company having some rights in the Mokelumne. But a report officially made by the assistant engineer of the city of San Francisco would be very much more appealing to the average citizen than a report to the same tenor and effect made by some one who wanted to sell a water right; and San Francisco, or her attorneys, have been entirely lacking in frankness

in the suppression of this report on the Mokelumne source. Mr. FERRIS. Mr. Chairman, I did not want to interrupt the gentleman, because I knew he wanted to hasten through his argument, and I dislike to do it now. However, the gentleman from Illinois [Mr. Mann] asked one question on this proposition that ought to be answered. It is an important question. here a letter from Col. Biddle, under date of July 31, 1913, in which he says in substance two things. It will be found on pages 33 and 34 of the committee's report. In the first place, there never was any suppression of a report. They had absolute They had absolute access to everything in the clerk's office. And, furthermore, he says that the report dealt in its entirety only with the 25,000,000gallon supply, which would be only about one-tenth of what the city now needs. It could have been considered by the board if they desired to do so. Again, the limited supply discloses that it would have been valueless if presented or considered, and it is here on the desk and is accessible, and can be taken up if it should be deemed desirable.

Mr. MONDELL. I regret that the gentleman from Oklahoma takes up my time with a point that I said myself would not be material except for the fact that if you are coming to Congress with a case you ought to come with a clean case and with It is not true that that report was available, and if the gentleman from Oklahoma will read in the report of the Army board the list of papers presented to them he will find the Bartel report is not among them, and he will find, further, that the Army engineers never saw that report and never heard of

it until after they had made their report.

Now, I am not putting any particular stress on that. not insisting that it would have affected their decision if they had had it before them. But I do say that some one was lacking, and I can say it very much more strongly if I was disposed to—I could say that some one was much lacking in candor and fairness in suppressing a fresh report, just off the typewriter, a report made by an assistant engineer of the city in regard to what is perhaps the most available water supply pos-There is no doubt about that. sible to secure.

Mr. FERRIS. The report was not suppressed. It was made in 1897.

Mr. MONDELL. No: the report I refer to was made within the last year and a half; completed within a year. I think it was made in April, 1912. There was a report made away back yonder, it is true. I do not say it would have affected the report of the Army board, because, to tell the truth, and departing a little from my line of argument, I do not place a high value on the report of the Army board.

The gentleman from Illinois [Mr. Mann] stated a little while ago in apt language what he thought about that report. The

lean hour and a half one sultry afternoon in the examination of a very small portion of the watershed of the Mokelumne,

and then sought the shade of the orange groves.

While that does not necessarily alter the situation, it casts an illuminating light upon it. There is an opportunity to secure a supply from the McCloud River, water that no one else can use. That is, perhaps, a little expensive, but not nearly as expensive as the engineers of the city of San Francisco have made it appear, and a careful examination of the last report made on the McCloud River convinces me that he who wrote it intended to estimate the cost so high as to make it appear prohibitive, so that no one would think of utilizing it.

Mr. RAKER. Will the gentleman yield right there?

Mr. MONDELL. I will be glad to.
Mr. RAKER. In addition to the report of the Army engineers, is the gentleman familiar with the facts that down along that river there are many people using and diverting the water

by large pumps, pumping out many acre-feet of water per day?

Mr. MONDELL. All the reports state, as the gentleman from California knows better than anyone else, that, taking into consideration every possible use of the water of the McCloud, there is a larger supply there than is to be obtained by the damming of the Hetch Hetchy. Of all the sources that have been sought that is the largest, and the water is as pure as the mountain dew.

There is an unfailing supply in the Sacramento River, better

than most cities have.

But I do not insist that San Francisco be compelled to go away yonder to the McCloud or that she be compelled to take the water from near her doors out of the river or that she take the waters from the Mokelumne, the Stanislaus, and Lake Elinor. So far as I am concerned, if the people of California are satisfied, I am content that San Francisco shall use the Hetch Hetchy to impound the waters of the Tuolumne, but I think in coming to that conclusion we should be entirely fair as to all the features of the situation.

Some gentlemen may wonder why this matter is pressed here at this time. I do not know as to that. Out yonder by the Golden Gate they have an impetuous way, and any business of theirs is business that must be disposed of forthwith, instanter, and without delay. The fact that it comes from the Pacific coast makes it, without any further inquiry, an emergency question, a matter that must be taken up, no matter what the Democratic Party in the House may say with regard to other Democratic Party in the House may say with regard to other and pressing legislation. Why, they do not expect to begin the construction of this system for 2 or 3 years, and if they complete it in 10 years after they begin they will be doing mighty well, even with all of the energy and push that these splendid communities out there on San Francisco Bay have.

So it is not an urgency proposition, by any manner of means, but it is here, so why discuss a small matter of that kind. The Democratic majority have been convinced that it is urgent,

and so we have it before us.

Mr. FERRIS. The political faith of San Francisco would hardly be an inducement to the Democratic Party to act for any partisan reason, would it?

Mr. MONDELL. Oh, I absolve the Democratic Party from any partisan view of the matter at all.

Mr. FERRIS. I thought so.

Mr. MONDELL. And I absolve the gentlemen who urge the matter from anything but the desire to promote the legislation they believe to be useful. I have entire confidence in the good

faith of everyone connected with the whole matter.

Mr. FERRIS. I say that in the height of good humor.

Mr. MONDELL. I realize that. Now, those of us who have been here for some time have noted the divers and curious ways in which legislation is sometimes presented to Congress. come down here with the idea that we represent the people, and that it is our duty to care for the interests of the people and to legislate in their behalf. We therefore expect that when a matter is ripe for consideration the Members from the district or locality, or a community directly interested, or the men charged by reason of committee assignment with responsibility for general legislation shall take the initiative, prepare the legislation, and present it to the committee.

But the city officials of San Francisco evidently for the moment forgot the forcible and energetic representation which they and California, as a whole, has on the floor of this House-a delegation second to none from any State in the Union, either in intelligence, energy, or forcefulness. We would have expected that in an important matter of this kind they would have come to their Members in the very first instance and suggested that they draft a bill. The bill was introduced by my good friend the gentleman from California [Mr. RAKER], and I trust he will not be embarrassed by what I will say in this line, because I say it in the best of humor, realizing his entire ability to draft a very much better bill than has ever been drafted in connection with this matter, not excluding the one which I drafted and which I shall offer as a substitute.

He did not have the opportunity to write this bill either in the first instance or as now presented to the House, and he does not claim it. The city officials of San Francisco went browsing about through the Government departments, inviting the Secretary of the Interior, the Secretary of Agriculture, the Director of the Geological Survey, the Chief Forester, and

Mr. RAKER. Will the gentleman yield?

Mr. MONDELL. Yes.
Mr. RAKER. Let me say that the bill which the gentleman from California introduced was H. R. 112, introduced two years Then, one covering the city and county of San Francisco, introduced by the gentleman from California to-day, contains the ideas and theories of the bill introduced two years ago, with modifications and material changes by the committee, so that practically you might say that the main features of the bill introduced two years ago have been the basis of this bill, and that it was evolved by 21 members of the Committee on Public Lands.

Mr. MONDELL. I think the gentlemen all understood me. The question whether we shall grant San Francisco the right to utilize the Hetch Hetchy Valley for storage purposes is one long before the House, and a bill of 10 lines would carry the grant that would allow that to be done. All of the bills introduced on the subject are similar in that they in one form or another grant a right of way. But what I am referring to is the innumerable pages and multitudinous propositions, some of them difficult of understanding, which encumber the legislation as it appears before us. The first people interviewed seem to have been a certain class of self-styled conservationists well known in the Nation. Next, all of the Secretaries that could by any possibility be persuaded to believe that their departments had an interest, direct or indirect, in legislation of this charac-I do not think the Commissioner of Labor or the Secretary of State contributed to the draft of the bill. With that exception I think we may embrace the majority of the departments of the Government. And they stopped not at Secretaries, but advised with Assistant Secretaries and commissioners, directors, and other gentlemen in Government service intent on extending Federal authority. I doubt if any charwoman in any of the departments has made a suggestion which is written into the bill, but if that be true it must be an oversight.

Of course, I mean no reflection on the ability or patriotism of any of these gentlemen. When the representatives of San Francisco come to them, inviting them to fix conditions and place limitations extending the control of their respective de-partments or bureaus they would be more than human if they

did not respond.

Each had a few suggestions, a few limitations, a few conditions, and as each was made separately it is not to be wondered at that the net result was of great length and somewhat conflicting. As thus put together, the gentlemen representing California we expected to take responsibility for the measure. So that it came into the House, 2 pages in length, containing propositions with which the Federal Government has nothing to do, carrying in one place one of the most curious suggestions of legislation that was ever written in a bill. In attempting to decide the waters San Francisco is to impound it was provided that this was to be accepted, "notwithstanding any general laws of the United States or of the State of California, or any general rule of property established by the courts."

I hasten to say on behalf of the committee that that levely proposition has been stricken from the bill, leaving in it, however, divers and sundry other provisions of practically the same tenor and effect, but in language a little less clear and explicit. I am not certain which of the officials consulted by the officials of San Francisco proposed and insisted upon this particular gem of statute. That the gentleman who introduced the bill

was not responsible for it goes without saying.

Before I go further I am going to read just a few objections to the bill that I have jotted down. Remember, I do this as one who has introduced a bill, H. R. 7297, which is before the House, which grants to the city of San Francisco all the rights which this bill does, in 7 pages as against 27; which does not lay impossible burdens, does not attempt to overturn the Constitution of the United States, filch the sovereignty of California, or set aside beforehand the decisions of the courts during all the running of the years to come.

Mr. FERRIS. Will the gentleman yield?

Mr. MONDELL, Yes,

Mr. FERRIS. Does the gentleman think that his 7-page bill thoroughly safeguards the interests of the Government and the

irrigationists?

Mr. MONDELL. I do not attempt to do what the gentleman knows, as well as I do and better because he is a good lawyer and I am no lawyer at all, that this Congress has no power to divide the waters in the sovereign State of California. words that may be written into the bill would be utterly valueless and futile in the direct accomplishment of any such purpose. So far as any provision in the bill can have any such effect it can only be through San Francisco making a contract with the Government, which contract the courts might or might not hold to have been made under duress, a contract in no event binding upon the Turlock or Modesto irrigation districts, and much less on any other irrigationists in the San Joaquin Valley

Mr. FERRIS. It is fair to say to the gentleman that he goes right at the troublesome feature of the bill when he gets to that question. Let me put to him the proposition. If I own 160 acres of land and it becomes necessary for you to utilize part of that land and have a right of way across that land do you assert I do not have the right to connect with my portion of land such conditions as I may impose? And, again, if the Federal Government owns the Yosemite National Park, which is conceded by everybody, and if they grant certain rightstain storage rights-to impound water, then have not they the right to say how you will put up that dam, how you will construct that dam and impound that water, because it is simply a condition that goes as a condition precedent to the grant, and I do not agree with the gentleman on the proposition laid down

Mr. MONDELL. As I said a moment ago, I am not a lawyer, and therefore perhaps should not argue this legal question with the gentleman from Oklahoma, who is a good lawyer

Mr. FERRIS. I did not bid for that.

Mr. MONDELL (continuing). But no landowner can affix any condition to the use of landed property, he will admit, that shortens the sovereignty of a sovereign State. As a landowner you can affix any condition within the power of the landowner to affix, but neither the gentleman from Oklahoma [Mr. Ferras] as a landowner or the Government of the United States as a landowner can affix any condition to the use of landed property that interferes with the exercise of sovereignty.

Mr. FERRIS. We do not do that in this bill. gentleman does not quite state the proposition correctly.

Mr. MONDELL. If you do not do that, then you do not do anything. I do not think you do it as a matter of fact, but that is what is attempted. But to return to objections to the bill, to which I have referred:

The bill is verbose, prolix, diffuse, and conflicting.

Grant absolute and enforcement of conditions or requirements scattered through the bill doubtful.

Attempt to divide waters without force or effect as a matter of statute law, questionable of enforcement if intended to be made binding on the city as a contract, and in no event binding on Turlock and Modesto or other irrigation claimants.

Attempt to regulate use by a municipality of electric power of doubtful propriety if, indeed, it is within the power of

Congress.

If the terms of water distribution are enforceable, they are

not understandable.

Conditions are onerous and burdensome on San Francisco: First. If the provisions as to water distribution and division of electrical energy are what they appear to be and can be enforced, they are exceeedingly onerous and burdensome on San Francisco and liable to very greatly restrict and hamper the city in the use for its own people of the water and power they propose to ultimately invest nearly a hundred million to

Second. The charges against the city are arbitrary and excessive; are based on no tangible or logical theory as to the

ground for such payment or its reasonableness

The sanitary provisions are ridiculous, inadequate, and unchanging as the laws of the Medes and Persians.

TURLOCK AND MODESTO.

As for the irrigation districts, they may feel that they have fully and liberally protected themselves in this bill, but if it should develop that the terms of the contract, which it is contemplated the Secretary of the Interior shall compel San Francisco to sign, are not enforceable, or if enforceable the benefits are held to apply to all applicants, the irrigation districts may wake up to learn that they have been handed a gilded brick.

A perfectly sane bill with reasonable and understandable rovisions can be passed, therefore there is no excuse for the

bill in its present form.

I started in to remark how the departments of Government were consulted and how each of the Secretaries and the commissioners and directors added his own little suggestion until the bill was enlarged and extended to 26 pages. Not only that, but there was a gentleman who called himself a sanitary engineer, who wrote a few pages of suggestions in regard to sanitation, and they were put into the bill verbatim, and are one of the unique curiosities of the measure. Well, of course, after Mr. Secretary This and Mr. Secretary That and the Secretaries and commissioners, one after another, had all contributed to the legislation, each was compelled, by reason of the fact that he had been consulted, to give his assent and lend his influence to the passage of the bill. Now, I have just this to say in regard to that sort of thing: I hope the time will come when constituencies as well represented as California is will trust their Representatives to draft legislation, as they can draft it, along sane and reasonable lines, and that the time will come when it will not be deemed necessary, as I hope it is not necessary now, to secure the support of administrative officers and of every socalled conservationist throughout the length and breadth of the country by putting into legislation propositions that Members who support it do not and can not possibly fully approve.

Will the gentleman yield? Mr. RAKER. Mr. MONDELL. I will be glad to do so.

Mr. RAKER. Is it not a mighty nice piece of legislation when you get all sides to agree that the provisions of a bill pro-

tect everybody?

Mr. MONDELL. Well, I can understand you might satisfy all of the cooks-not only the cooks proper and the cooks adiacent, but the cooks invited and called in on a proposition-but the kind of soup you would have when you got through, in my opinion, would be very like the bill we now have before us. Of course, the cook that had suggested a pinch of this and the cook that had insisted upon a dash of that and the cook who had hoped there would be a few ounces of something else, his wishes having been acceded to, while feeling no responsibility for the outcome and final result, would no doubt feel bound, by the fact that his wishes were heeded, to say that it was probably a good

In the case of this particular brew, I doubt if any one of the gentlemen outside of Congress who have given it such hearty approval have ever read the bill in its entirety, and I will guarantee there are few, if any, who could explain all of its provisions. Now, there is another thing, and I want to discuss this because I think it is a matter in which we are all interested.

Mr. RAKER. Will the gentleman yield right there? I want

to get the matter straight, and I hope he does

Mr. MONDELL. I do. I hope San Francisco will get Hetch Hetchy, but I hope she will get it under different legislation.

Mr. RAKER. After you have worked and assisted in preparing a bill affecting the Government domain, can you conceive of any better protection to the Government and to the people of the Government than to go to the Secretary of the Interior, the Secretary of Agriculture, the Reclamation Service, and the Geological Survey, and to the War Department-

Mr. MONDELL. To Mr. Pinchot and Mr. Garfield-

Mr. RAKER. That will cover the whole subject, and get their

approval of it-the guardians of the public property?

Mr. MONDELL. I am willing to let the gentleman's statement stand just as he has made it. The plan has been successful in this case. There is no doubt about that. these gentlemen has had his little dip into this legislation. Each bureau has a little something to do with its enforcement. department of the Government has extended a little further the doctrine of federalism. Each has curtailed a little of the sovereign rights of the good people over yonder by the Golden Gate, and each is, in consequence, content. But I am not, because, frankly, I do not take the view of these things that some of these gentlemen do.

Now, another thing. I am something of a "State's righter," but I hope not in an offensive sense, but in the sense that I do not believe this mighty Government can stand unless we shall recognize on the one hand all of the powers and all the dignity of the Federal Government, and, on the other hand, shall recognize and guard jealously the reserved rights of all the people of the Commonwealths of the Union. Of all the States that have been in late years most effective as well as most insistent in that view there is none that stands out in the public eye like

the State of California.

This administration and the last administration have appeared to be sorely tried by reason of the powerful insistence

on the part of the people of that State that they control and manage their own affairs. The last administration pleaded with them that if they must be so insistent they should not, at least, be so precipitate, and this administration has now under consideration some knotty and difficult questions involving our relations with an entirely friendly power, raised by the people of California. During all the time these questions have been under consideration, and to-day, I stand by the view taken by the people of California in those matters. I believe that legally they were right, constitutionally they were right, and unquestionably from the standpoint of the perpetuation and the perpetuity of free institutions and civilization of our form and character they were eternally right. [Applause.] But what shall we say when immediately thereafter there is brought before this Congress as a matter of emergency a proposition that shortens, or attempts to shorten—aye, in express language as introduced, attempted to shorten—the sovereign powers of the people of the Commonwealth out by the Golden Gate?

Will the gentleman yield there? Will the Mr. RAKER. gentleman, just in a concrete statement, point out here where there is one single thing provided in this bill that affects the sovereign power of the great State of California?

Mr. MONDELL. There is an attempt in this bill to divide the waters of the State of California. Does the gentleman from California believe the Federal Government has any authority to do that?

Mr. RAKER. There is no attempt in this bill to divide any waters.

Mr. MONDELL. The gentleman has certainly read his own bill, and knows that five or six pages of it are taken up with the detail of division of waters.

Mr. RAKER. Not a division.

Mr. MONDELL. If not a division, then nothing is accomplished by whole pages of the bill. The gentlemen have tried to get away from the force and effect of what was in the original draft by providing that San Francisco shall be coerced and dragooned into making contracts with the Secretary of the Interior, which, if enforceable, would shorten the sovereignty of the State of California.

Now does that change the matter any? Does that make it any different because it required all of that circumlocution to arrive at the point originally sought? This bill, if it passes, will provide that as long as time shall run, as long as the golden sun shall be seen of men sinking in the peaceful waters of the Pacific, the agents of the Federal Government will be traveling 3,000 miles from Washington to divide the waters of the sovereign State of California between the people of the San Joaquin Valley and the people who dwell on the shores of San Francisco Bay. And the gentleman knows it. The gen-tleman regrets it just as much as I do, but fortunately I am free

to say what I think about it.

My good friend from California [Mr. RAKER], whom I love and honor and who has worked faithfully for this bill and has tried to get a bill that would accomplish what was sought to be accomplished without setting an unfortunate example, is to be congratulated, and I congratulate him and the members of his committee in as far as they have been able to get away from a dangerous precedent. But they have not actually escaped it. They still leave in this bill the seed of the proposition which we have been fighting for years, and against which we shall expect to fight until it shall be admitted by all men that California is as sovereign as Maine-

Mr. FERGUSSON. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Wyoming yield

to the gentleman from New Mexico?

Mr. MONDELL. And as sovereign as Minnesota, and that her star is as undimmed in sovereignty as is the star of Louisiana

Mr. FERGUSSON. Will the gentleman yield? The CHAIRMAN. Does the gentleman yield? Mr. MONDELL. I do.

Mr. FERGUSSON. With reference to the illustration of California curtailing her sovereignty, an individual is sovereign of his own real estate, is he not? Assuming that that is true, and assuming that California enters into a contract for a consideration to be given by another which it very much desires for its prosperity, is it curtailing her sovereignty any more than it is curtailing the sovereignty of a private owner of real estate when for a consideration he binds himself to obtain something that he desires? Is entering into a contract the surrender of important sovereignty—in real estate, for instance?

Mr. MONDELL. Oh, the gentleman probably was not in the

Chamber when I answered the question of the gentleman from Oklahoma. I am not a lawyer, and perhaps it is not fair for gentlemen who are lawyers to propound to me these legal

propositions.

Mr. FERGUSSON. But the gentlerian assumes the rôle of lawyer

Mr. MONDELL. Oh, I have never assumed the rôle of a lawyer at any time. I have never assumed any rôle whatever. I have said, and I repeat it, that no one can fix any condition upon a sale, lease, or grant of property which will deny a sovereign or constitutional right. I trust no man from the West will claim that the Federal Government can, by fixing a condition on the use of property, deprive a State of her author-If that can be done, there is not a guaranty in the Bill of Rights, not a provision of the enabling act of his young State, that can not be made of no force or effect as regards a large portion of the State which is still public domain.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield? Mr. MONDELL. I do.

Mr. KAHN. The gentleman refers to a division of the water between the irrigationists and the city of San Francisco?

Mr. MONDELL. Yes.

Mr. KAHN. Does not the gentleman know that the irrigationists, under the laws of the State of California, are entitled to 2,350 feet of water before San Francisco can get a drop,

and that this bill simply recognizes that right?

Mr. MONDELL. I have no opinion as to whether that is true or not. I do not know whether it is true or not. It is true that people in the southern part of California, John Jones and Bill Smith, let us say, are entitled to divide certain waters, under the law, between them. But I do not find anything in this bill setting out what that division should be; and it would be just as germane to the proposition and just as legal to try to divide the waters in this bill between people in southern California as to try to divide the waters between the people in middle California.

And further, there is not any necessity for it. When this matter was before the committee four years ago we asked these people, "Do you expect that every time anyone comes here asking for a right of way we shall have to go into all the court decisions in regard to the distribution of water from the

stream which it is proposed to impound and divert?'

Do you expect we are going to do that? Is there any way in which we can do it, any way in which we can secure that information? And if we did it, we would take up all our time in attempting to settle by legislation that which is a judicial question, and we should never get anywhere. What should have been said to these people is: "Gentlemen, this is not so urgent but that you can go back to California, take this matter up with the people of Turlock and Modesto, and the other irrigationists in the valley of the San Joaquin, and have an adjustment, an adjudication, or agreement that is binding, so that you can come to us as others come, simply asking the right to build a dam." It would be well to have a provision in the bill that the grant would not be effective until such an agreement or adjudication was had.

While I have no doubt San Francisco has high-minded and energetic engineers and other public officials, it would rather seem that they very much prefer moving on the large stage of national affairs, before the National Congress and before the national bureaus, and talking about \$45,000,000 bond issues, rather than to do the common, hard, drab work of coming to an agreement with their neighbors in their own State touching their own matters. That would require some effort and labor, an appearance before a court, and some really hard work and mental effort that would not be featured in all the news-It would be effective, but it would not appear on the front page of all the newspapers. On the contrary, city officials appear here pledging San Francisco to all kinds of hard conditions, even inviting these conditions, and asking that we pass legislation under which the trail from here to the Golden Gate shall be kept hot so long as time runs as Federal officials pass back and forth dividing the last bucket full of the waters of the Tuolumne between the irrigationists of the San Joaquin and the dwellers along San Francisco Bay.

We are dealing with a great community, now 700,000, to be two and a half million people some day. One would judge from some of the provisions of this bill that we were making a grant to Archbold or Rockefeller or other Standard Oil magnates, and had to surround it with every possible safeguard to prevent a hard-headed and grasping individual from fliching away the rights and taking advantage of the defenselessness of the people in some way. These great communities ought to be dealt with in the generous spirit with which all of the people should deal with a considerable portion of the people in their official collec-

tive governmental capacity.

I am rather inclined to think that if the contract contemplated is enforceable San Francisco could be made drier and

shorter of water after this reservoir is built than she has been in the past. A particular section to which I shall refer later seems to give the Secretary of the Interior the authority and the power to give the San Joaquin Valley at times the major portion of the water that will be impounded at a cost of \$70,000,-

000 by the city of San Francisco.

There is a charge of \$15,000 for five years, \$20,000 for a period of years, and \$30,000 for all time—for what? On what basis does San Francisco pay \$30,000, and what does she pay it for? Land? Scenic beauty? Is that the price she must pay for taking from all the people the enjoyment of the floor of this valley? If so, it is either too much or too little. I do not know which. But there is no logical basis for it, and as a precedent for future legislation it is bound to make no end of trouble for the committee which reported it.

Mr. COOPER. Will the gentleman permit an interruption?

Mr. MONDELL. Yes. Mr. COOPER. The gentleman has made a plea here for the preservation of the rights of California respecting its water power. May I just read this short clause from the bill and get the gentleman's interpretation of it:

SEC. 11. That this act is a grant upon certain express conditions specifically set forth herein, and nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired thereunder, and the Secretary of the Interior, in carrying out the provisions of this act, shall proceed in conformity with the laws of said State.

Mr. MONDELL. It is a question whether the courts will ultimately hold that the provision the gentleman has read is the controlling provision of legislation or whether the pages that precede it and are in direct contradiction of it prevail and control. The two of them can not stand together. One may say "I do" and "I do not" in the same breath, but I either do or I do not. The provision in regard to the distribution of the water is in direct conflict with the provision the gentleman just read. I think the provision the gentleman just read will eventually be held to control, in which event the gilt on the brick Turlock and Modesto is being handed is so thin that a breath of air will brush it off.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. TAYLOR of Colorado. The gentleman is aware that section 11 is a copy of the section 8 of the Reclamation Service

Mr. MONDELL. I am aware of that, and it is in the bill largely through the insistence of my friend from Colorado and others who agree with him.

Mr. TAYLOR of Colorado. That is my portion of the soup. Mr. MONDELL. It has a goodly flavor, and is intended to

take a little of the poison out of the mess.

Mr. TAYLOR of Colorado. When it is put in as the last section in the bill and winds it up by saying that the act is granted on certain conditions, does not the gentleman think that that will be held by the courts to modify and control the entire bill, and if it does, does it not preserve the constitutional rights of the Western States?

Mr. MONDELL. After having read the bill and its conflicting provisions my head was in a perfect whirl of uncertainty as to what the courts would finally hold this legislation to mean.

Mr. COOPER. Will the gentleman permit a question?

Mr. MONDELL. Yes. Mr. COOPER. The gentleman asserts that there is a conflict between some previous sections of the bill and the laws of the State of California, but this last section of the bill, which the gentleman from Colorado claims he is proud of, provides that if there be a conflict with the laws of the State of California the laws of the State will control. Now, what opportunity is there for discussion?

Mr. MONDELL. As a matter of fact, the provision that the gentleman has read is the law of the land. It is constitutional; there is no necessity of writing it there, and it is not any more the law because it is in the bill. That is the law. It is taken from the national reclamation law, and that same provision in the national reclamation law is not a new proposition, it is simply a statement of a legal fact.

Mr. COOPER. In making that statement the gentleman from Wyoming begs the question in assuming, as he does, that Congress will comply with the conditions in the statute as to the distribution of waters over which it has control.

Mr. MONDELL. Congress has no control over any waters for

any purpose except for the purpose of navigation.

Mr. COOPER. Has the gentleman read the decision of the Supreme Court promulgated about six weeks ago?

Mr. MONDELL. Oh, in connection with the question of navigation there are a great variety of provisions and requirements that may be made.

Mr. COOPER. The Supreme Court goes a great deal further than that and says that the power of the Government is not limited as far as that matter is concerned to the purposes of

Mr. KENT. Will the gentleman yield?

Mr. MONDELL, Yes.

Mr. KENT. The gentleman said that the clause at the end of the bill was useless. I agree with him fully that it is the law of the land. I do not see how in legislating Congress can change the law of the sovereign State of California. I think it is making a lot of trouble by having that provision in there by leading people to believe that we are seeking to change the laws of the State of California, which we could not do. If the waters are to be distributed under the laws of California, the bill simply means as a condition precedent to this grant the Federal Government wants to see that the laws of California are obeyed and that there is a proper division. We have the right to make that condition precedent, although we could not legislate for California.

Mr. MONDELL. I can not agree with the gentleman. If I agree with one part of his statement, I could not agree with the other. The gentleman's statements seem to conflict with them selves. You say you are not attempting to infringe upon the sovereignty of the State of California; then why do you attempt to divide the waters of the State by Federal statute?

Mr. KENT. I did not say that.

Mr. MONDELL. Well, but what you do is this: You say we make a grant. The grant is absolute—I doubt if there is any condition here that will affect that grant at all—I doubt if there is a condition in that bill that you can enforce so as to in any way lessen San Francisco's hold on Hetch Hetchy after the bill passes. I do not think any of these conditions—I will not put it as strong as that—I doubt whether—

Mr. KENT. Does the gentleman deny the right— Mr. MONDELL (continuing). This is what the bill attempts

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. I ask that I may have 10 minutes more. The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. HELVERING. Mr. Chairman, I object. Mr. FERRIS. Mr. Chairman, I rather hope the gentleman from Kansas will allow the gentleman from Wyoming to proceed, because the gentleman from Wyoming has been submitting to interruptions all through his speech, and he stated that if he submitted to those interruptions he would have to ask for more time. I rather hope that in view of this phase of the question

Mr. HELVERING. I only objected on account of the time

Mr. FERRIS. I am satisfied the gentleman from Kansas did not know that.

Mr. HELVERING. Mr. Chairman, I withdraw the objection.
Mr. MONDELL. Mr. Chairman, I regret to take up so much
of the time, but I feel I must answer this proposition. What you attempt to do is this: You say that San Francisco shall not have the right to build a dam at the mouth of the Hetch Hetchy Canyon-and that is the only important right you grant here—that they shall not have the right to do that unless they make a contract relative to a division of the water between the cities on the bay and the irrigationists in the valley. Now, if that contract is enforceable in all of its provisions, then

you have shortened the sovereignty of California.

Mr. KENT. What contract? These are conditions to the grant; we are not making a contract, but we are exacting con-

ditions precedent to a grant.

Mr. MONDELL. As printed letters on a page signed by the Speaker and the Vice President and the President, those provisions would have no more force and effect than if they had been written on the sands of the river. If they ever have any force or effect, it will be because they are written into a contract signed by the city of San Francisco. Nobody claims, there are not any of the gentleman's colleagues here who will claim for a moment, that any of these provisions are enforceable as a matter of statute law. Certainly not.

Mr. DECKER. Which provisions?

Mr. MONDELL. If they have any force or ever have any effect whatever it is because San Francisco has entered into a contract.

Mr. DECKER. Will the gentleman yield?

Mr. MONDELL. I will.

Mr. DECKER. Just generally, what provisions does the gentleman refer to?

Mr. MONDELL. Well, provisions running through four or five pages of the bill, providing for a division of the water which is to be impounded by San Francisco between San Francisco and the irrigationists in the San Joaquin Valley.

Mr. DECKER. Turlock and Modesto?

Mr. MONDELL. Yes. Mr. DECKER. Will the gentleman allow me to suggest my understanding of that is—and if I am wrong, I desire to be corrected—that all the bill provides is this: That Modesto claims certain rights under the laws of California. San Francisco claims certain rights under the laws of California.

San Francisco comes to the Federal Government asking for certain rights of way. Now, does not the gentleman think that it is just as equitable as well as legal for the Federal Govern-ment to say to San Francisco, "If the Federal Government gives you these rights of way, we have the right to require of you that you acknowledge the rights of a third party." Now, we do not say that anybody has a right to the water; we just say that San Francisco, so far as San Francisco is concerned, acknowledges the right of Modesto. If anybody else has a right to the water under the laws of the State of California they can enforce them.

Mr. MONDELL. But the actual fact is, I will say to my friend, Turlock and Modesto have certain rights in the Tuolumne Those rights may or may not amount to the ordinary flow of the river in the irrigation season. I do not know; no one here does; I doubt if anyone anywhere does. Turlock and Modesto feel this is a very good opportunity to come forward and attempt to fix rights which it may or may not have under

the laws of California.

Now, that is really the fact in the case. This legislation unquestionably, beyond any controversy, not only compels San Francisco to recognize what is alleged in the bill to be the rights of the irrigation district, but compels it in addition to, under certain circumstances, furnish a supply of water that I am very confident Turlock-Modesto feels it could not enforce under the laws of California. So, as a matter of fact, you have attempted to divide these waters. You have attempted to divide them by shortening the amount that San Francisco is entitled to and giving a larger supply to Turlock-Modesto, providing the contract which you propose to enforce upon San Francisco is not set aside by the courts.

Mr. DECKER. Will the gentleman yield?

Mr. MONDELL. I have only a moment, unless my time can be extended. Unless the court sets aside this contract you are attempting here to establish a new precedent relative to the distribution of water, as you are attempting to establish a new

precedent with regard to other matters.

It is altogether unnecessary, because if the officials of the city of San Francisco were willing to go to work and meet on a friendly footing the people in the valley there would be no difficulty under the law of the State of California in reaching an agreement to fix and adjust and settle the rights of each, and then they could come here just as other people come here, asking us to grant a right of way under proper conditions, and not asking us by some hocus-pocus of legislation to attempt to set up an entirely new rule with regard to the use and distribution of waters throughout the irrigation States of the Union. It is not fair to San Francisco. It is not fair to the men who represent that State. It is not fair to the Congress to have a proposition of that kind placed before it.

I have introduced a bill. I do not claim it is perfect, though I gave it considerable thought, because I wanted to be fair to San Francisco and fair to all others; but I did not go into the domain of the regulation of the waters of California, as I would not want the legislation, if it was in my State, to invade that In my bill I did provide for a grant under express and easily understood and, I think, clearly stated provisions and conditions, enforceable by the United States or by any party in interest. I should like to see San Francisco secure this grant of right of way, not because it is absolutely essential that she should, because there are other sources of water supply available, and perhaps ultimately it would be better to have Hetch Hetchy used to irrigate the San Joaquin Valley. But I should like to see San Francisco secure this grant because the people of California seem to be of the opinion that this is the better way to provide for this construction, which will be useful both to the people present and to come on San Francisco Bay, and very largely, if they can live amicably under the provisions of the bill, to the people in the irrigation districts as well. it is exceedingly unfortunate that in passing legislation of this kind we are called upon to give our assent to propositions that will rise to plague us in the future, and it is unfortunate that

because this beautiful valley is in a national park that we must lay on San Francisco certain onerous conditions which, in my opinion, she will find it exceedingly difficult to comply with.

The charge itself is not based upon any theory of which I know as to the value of the right conferred or as to the shortening of the privileges of the balance of the people by reason of this grant to San Francisco. My bill provided that they should pay for the timber on the right of way; that they should pay for the maintenance of sanitary conditions there; that they should pay for the upkeep of the roads around and approaching their reservoir and works; and, in addition to that, that they should pay their proportion of the cost, whatever it may be, of the supervision and control of the watershed in the national

park and forest reserve.

San Francisco could secure the right to construct these works, without any additional legislation, under the general laws if it were not for the fact that the Hetch Hetchy Valley lies just within the borders of a national park. That fact necessitates special legislation, as the ordinary right-of-way acts do not grant That fact necessitates permanent easements in national parks. The fact that Hetch Hetchy is in a national park, and that it is a region of great scenic beauty, gives all the people of the country a lively interest in the matter. But these facts do not justify an attempt altogether unnecessary to indirectly supersede the laws of California with regard to water rights, or the imposition of onerous or burdensome conditions, conditions particularly objectionable because they contemplate that, as to certain waters and certain power development utilized by a great community, the agents of the Federal Government, in nowise directly responsible to the people directly interested, shall be the final arbiters for all time. For the purpose of clearly expressing my views as to what should be done and how, I shall, at the proper time, move a substitute, which I now ask to have printed at the close of my remarks. [Applause.]

as to what should be done and how, I shall, at the proper time, move a substitute, which I now ask to have printed at the close of my remarks. [Applause.]

A bill (H. R. 7297) granting a right of way over certain public lands and reservations to the city and county of San Francisco for the purposes of a water supply and power development.

Be it enacted, etc., That a right of way through the public lands of the United States, the Yosemite National Park, and the Stanislaus National Forest is hereby granted to the city and county of San Francisco, a municipal corporation in the State of California, for the purpose of enabling the said city and county to construct and maintaining recevorirs, canals, works, and structures of every kind and character necessary or desirable in securing, establishing, and maintaining from the Tuolumne River and its tributaries in said State a water supply for the said grantee, the city and county of San Francisco, and such the said grantee, or in accordance with the said that the said grantee of the extent of the ground occupied by the reservoirs, canals, and all other works or structures of every kind and character necessary or desirable for the purposes specified in this act, together with such additional lands on the marginal limits of all reservoirs and canals or surrounding or bordering on other works or structures or structures. Together with the right to take from the public lands and reservations herein referred to adjacent to its right of way earth, stone, and other like material necessary or desirable for the construction of the reservoirs, canals, works, or structures, together with the right to take from the public lands and reservations herein referred to adjacent to its right of way earth, stone, and other like material necessary or desirable for the construction of the reservoirs, canals, works, or structures her

cent to its proposed aqueduct from Groveland to Portulaca or Hog Ranch and to the Hetch Hetchy dam site, and a road along the southerly slope of Smiths Peak from Hog Ranch past Harden Lake to a junction with the old Tloga Road, in section 4, township 1 south, range 21 east, Mount Diablo base and meridian, together with such other roads and trails as the Secretary of the Interior shall determine are made necessary by reason of this grant. That the said grantee shall lay and maintain a water pipe, or otherwise provide a good and sufficient supply of water for camp purposes at the Meadow, one-third of a mile, more or less, southeasterly from the Hetch Hetchy dam site. That the said grantee shall furnish water at cost to any authorized occupant within 1 mile of its reservoirs.

(d) That the grantee shall, for the benefit of the Yosemite National Park and the Stanislaus National Forest, pay for all timber taken from its right of way and shall pay annually such sums, to be fixed from time to time by the heads of the departments having charge of the said reservations, as shall be amply sufficient for the repair and maintenance of the roads and trails herein provided to be built by the grantee, and for the enforcement of the sanitary regulations provided for in section 1 of this act, together with such further reasonable sums as shall, in the opinion of said heads of departments, fairly measure its proportionate share of the cost of maintaining and protecting that portion of the said national park and national forest as constitutes the watershed of the water supply of said grantee.

(e) That the grantee shall at all times, in the construction and maintenance of its work, conform to all the requirements, rules, and regulations adopted by the head of the department of the Government having jurisdiction of the reservations over which its right of way may extend and shall be responsible for any loss or damage to such reservations or the timber thereon caused by the grantee or its agents. That the grantee shall at all times

ceases to use such lands for the purposes of construction under the provisions of this act.

(g) That the conditions of the grant made herein shall be enforceable and the rights and privileges of the said grant may be canceled or annulled, in whole or in part, upon the failure on the part of the grantee to comply with the terms and conditions thereof, on notice by the Secretary of the Interior, in accordance with the judgment of any court of competent jurisdicton in a suit brought by the United States or any parts in interest.

of competent jurisdicton in a suit brought by the United States or any party in interest.

SEC. 3. That the rights of way hereby granted shall not be effective over any lands upon which homestead, mining, or other existing valid claim or claims shall have been filed or made and which now in law constitute prior rights to any claim of the grantee until said grantee shall have purchased or procured proper relinquishment of or acquired title to, by due process of law and just compensation paid to said entrymen or claimants, such portion or portions of such homestead, mining, or other existing valid claims as it may require for the purposes herein above set forth and caused proper evidence of such fact to be filed with the Commissioner of the General Land Office; and the right of such entrymen or claimants to sell and of said grantee to purchase such portion or portions of such claims are hereby granted: Provided, That this aet shall not apply to any lands embraced in rights of way heretofore approved under any act of Congress for the benefit of any parties other than said grantee or its predecessors in interest.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FERRIS. Mr. Chairman, I want to ask unanimous consent that the gentleman from California [Mr. J. I. Nolan], who is confined to his bed, have permission to extend his remarks in the Record on this subject when he comes back. He is very much interested in this legislation, and very much in favor of it.

The CHAIRMAN. The gentleman from Oklahoma [Mr. Ferris] asks unanimous consent that the gentleman from California [Mr. J. I. Nolan] be granted leave to extend his remarks in the RECORD on this bill. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Chairman, I want to yield three minutes to the gentleman from New Jersey [Mr. Kinkead] to insert something in the RECORD.

Mr. KINKEAD of New Jersey. Mr. Chairman, I ask that the letter which I send to the Clerk's desk be read. Then I would like to add a word in explanation.

The Clerk read as follows:

NEW YORK, August 28, 1913.

Hon. E. F. Kinkead, Congressman for Eighth District, New Jersey, Washington, D. C.

Washington, D. C.

Dear Sir: We take notice of an article on the 26th instant in the Journal of Commerce, New York City, and your interest in the matter of imported beef. In the past eight weeks we have sold 650 hind quarters of imported beef, about 100,000 pounds, at 2 cents a pound less than native beef. We have sold it in New York City, Washington, Boston, Albany. Troy, Ithica, and other places, and find that the goods give good satisfaction.

Of course, if the law will discriminate against foreign inspection, the present importers will become d'sheartened and will withdraw from the field. It is pioneer work in the interest of the public, and the benefit is more for the consumer than anyone else. However, we thank you for your interest in the matter and hope you are successful in your effort to reduce the high cost of living.

Yours, very truly,

Geo. C. Engel Co.,

GEO. C. ENGEL CO., GEO. C. ENGEL, Treasurer.

Mr. KINKEAD of New Jersey. Mr. Chairman and gentlemen, statement after statement was made by myself and other Members on this side of the Chamber that if we were able to open up the markets here to Australian and Mexican and Argentine beef the people of our country would be able to buy their meats at a lower figure than they have been paying for them during the past two or three years. This is but one evidence of many that I have received, principally from New York merchants.

But here in Washington, the week before last, the statement was made by one of our commission merchants here, similar to that which Mr. Engel made. And it must be borne in mind that these independent packers, independent merchants, are now paying 11 cents a pound tariff duty on the meats that they This means that the retail merchant may buy from the import. commission merchant, after the Underwood bill is passed, at at least 3½ cents a pound less than he is paying for it now.

The reports which I have on hand from the Bureau of Foreign and Domestic Commerce, together with the statements that appear from time to time in the trade journals of the packers, indicate that a difference of 31 cents per pound in the price of meats to the retail dealer means a reduction of from 7 to 10 cents per pound to the consumer. It will therefore be seen, Mr. Chairman, that the statements that have been made by the agents of the Beef Trust and by some Republican Members of this House, that the removal of the duty from cattle and meats would in no way tend to reduce the cost of meat products to the consumer are erroneous.

At a later date I propose to submit to the House additional evidence along this line, which will prove to any fair-minded man that the position which I have assumed during my service in the House in endeavoring to secure the removal of all duties from cattle, as well as meat products, will bring about a reduction in the price of meats to the consumer of at least 20 per cent.

As further evidence, I bring to the support of my argument the testimony of at least two of the leading commission mer-chants here in the District of Columbia. They have stated in the public press that they have purchased a supply of Argentine beef and were able to sell it to the people of Washington at about 2½ cents per pound less than the representatives of the Chicago packers were charging the retail dealers here.

In my judgment, the full relief coming from the admission of foreign meats into this country free of duty will not come to the American people until the Underwood bill shall have been in effect about six months. Trade conditions and the delay incident to securing representation here among the independent packers by the foreign houses are responsible. But the relief promised by the Democratic Party will come-statements of the packers and their representatives notwithstanding.

The CHAIRMAN. The time of the gentleman from New

Jersey has expired.

Mr. MANN. Mr. Chairman, I should like to make some observations on the subject introduced by the gentleman from New Jersey [Mr. Kinkead], but I shall refrain. I yield 15 minutes to the gentleman from California [Mr. J. R. Know-LAND].

Mr. J. R. KNOWLAND. Mr. Chairman, San Francisco having taken the initiative in requesting the legislation now before the House granting certain rights on the part of the Government to enable that city to obtain an abundant and pure water supply is generally regarded as the principal if not the sole beneficiary under the proposed act. But there are other Cali-fornia cities as vitally interested, chief among these being the municipalities of Oakland, Berkeley, Alameda, Hayward, and San Leandro, situated directly across the bay from San Fran-cisco and within the congressional district I have the honor to represent

That these are all growing communities is attested by a reference to census statistics. Oakland in 1900 had a population of but 66,960. The census of 1910 increased this to 150,174, and today a conservative estimate is 206,000. Berkeley jumped in 1910 from a population, under the census of 1900, of 27,220 to 40,434, and at the present moment can boast of 45,000. Alameda city in 10 years increased from 16,464 to 23,383, and can now safely claim a population of 27,000. The growth of Hayward and San Leandro has been in like proportion. The combined population of these cities in 1910 was 220,208 and of the entire county 246,131. To-day Alameda County has a population of fully 360,000, which is almost equal to that of the city and county of San Francisco.

It is generally conceded by those who have investigated conditions that these east bay cities will be compelled to eventually seek an additional water supply. At the instance of the cities of Oakland and Berkeley, Mr. J. H. Dockweiler, consulting engineer, was appointed in 1911 to investigate and report on the sources of water supply of the east bay region of San Francisco.

The resolution passed by the city of Oakland on March 20, 1911, providing for the appointment of engineers read as fol-

Whereas on the 21st of November, 1910, the council of the city of Oakland adopted its resolution No. 37418, reading as follows:

"Resolved, That the city of Oakland, in conjunction with the cities of Berkeley and Alameds, appoint some engineer to assist the board of engineers of the city and county of San Francisco in the preparation of the report to the Department of the Interior at Washington to be used at the hearing of the order to show cause now pending in that department for the revocation of the permit heretofore granted by that department for the use of Hetch Hetchy Valley as a reservoir site"; and

site"; and
Whereas on or about the same date a resolution similar in form was
passed by the city council of the city of Berkeley and by the city
council of the city of Alameda: Now, therefore, be it

Resolved, That J. H. Dockweiler, of Oakland, and J. D. Galloway, of
Berkeley, Cal., be, and are hereby, appointed engineers in accordance
with said resolution; the said J. H. Dockweiler to prepare data upon
existing and future needs of water supply for the cities of Oakland,
Berkeley, and Alameda, and upon the possibilities of reenforcing such
local supply from the Sierra Mountains and other outside sources.

Received a similar resolution on Moute 7, 1911. Engi-

Berkelev passed a similar resolution on March 7, 1911. Engineer Galloway resigned shortly after his appointment and the

report was prepared by Mr. Dockweiler.

This comprehensive report shows that all available local sources will fall short of supplying the needs of the growing population of the east bay communities by 1926. Engineer Dockweiler was most careful in his estimates and conservative in his deductions. There are many who contend that there will be a shortage long before that date, particularly if there are successive dry seasons. The present water supply of the cities of Oakland, Berkeley, and Alameda is furnished from what is known as the Lake Chabot Reservoir, located in Alameda County, and also from artesian wells. It should be borne in mind also that part of the San Francisco supply comes from Alameda County, the Spring Valley Co. taking water from what is known as the Alameda Creek system; and it is not at all unlikely that this will eventually affect the Alameda County supply, lowering the water plane on the east side of the bay.

In the report of the advisory board of Army engineers to the Secretary of the Interior the scarcity of the Alameda County supply available for the east bay cities is discussed. In the hearing before the Public Lands Committee on June 26 Col. John Biddle, chairman of the advisory board, stated that the cities of Oakland, Berkeley, and Alameda were in very poor situation and that they had about reached the limit of their

immediate supply.

What I desire to impress upon this House particularly is the fact that this grant is not for a single city, but for the entire bay region. Bordering upon San Francisco Bay are six counties, containing a total population in 1910 of 829,955, or 35 per cent of the entire State. This population of the bay cities is rapidly increasing, for in California during the past decade the urban population increased two and a half times as rapidly as What will contribute to the growth of this particular locality is the fact that practically 80 per cent of the arable land of California is tributary to this San Francisco Bay region.

As these localities grow the development of all the near-by sources, including the supply of the Spring Valley system, the People's Water Co., and other small companies and private plants will fall far short of meeting the needs. This fact being generally recognized, the only question is as to the best and most available future supply. I am convinced after going over the various and most exhaustive reports, including that of the advisory board of Government engineers, that the Hetch Hetchy is the most feasible and, in the long run, will be the most economical of the various projects proposed. Surely the valley could not be put to any higher beneficial use than to furnish the people of the bay cities with a bountiful supply of pure, fresh water. It has been suggested that the language of the pending bill providing for the participation of the east bay cities is not satisfactory to these localities. When the bill was introduced and the hearings began I sent the following wire to Mayor Frank K. Mott, of Oakland:

WASHINGTON, D. C., June 25, 1913.

Washington, D. C., June 25, 1913.

In bill introduced Monday granting San Francisco certain rights in matter of Hetch Hetchy water supply, it is provided that "other municipalities or districts may, with the consent of the city and county of San Francisco, or in accordance with the laws of the State of California, hereafter participate in the beneficial use of the rights and privileges granted." As this bill grants rights for the largest available water supply in the State of California, the only question entering my mind is whether the words "may, with the consent of the city and county of San Francisco, or in accordance with the laws of the State of California," would be satisfactory to Oakland and adjacent cities. San Francisco representatives declare that under the State laws providing for formation of municipal water districts Oakland and adjacent cities could not be barred from this supply by San Francisco. Appreciating tremendous importance of this matter to future of east side of bay cities, I would like to hear from these localities. Am mailing

bills to-day to you and mayors of Alameda and Berkeley, and would suggest when bills arrive you call a meeting and wire me fully position. Hearings are now being held. Furnish copies this wire to Mayor Wilson, Berkeley, and Otis, Alameda.

J. R. KNOWLAND.

To my telegram I received the following reply:

OAKLAND, CAL., July 6, 1913.

Hon. J. B. Knowland, House of Representatives, Washington, D. C.:

Absence from city cause of delay in answering relative to water bill. Have had conference with San Francisco officials, and they agree with our suggestion to insert word "water" before "districts," line 7. page 2. While language of bill relating to other manicipalities is not altogether satisfactory, we feel that under circumstances it is probably the best that can be done. Amended as herein suggested bill ought to be passed. Frank K. Morr.

The amendment to the bill suggested by the mayors of the east bay cities was adopted, the language referring to other municipalities, found on page 2, line 9, now reading as follows:

For conveying water for domestic purposes and uses to the city and county of San Francisco and such other municipalities and water districts as, with the consent of the city and county of San Francisco, or in accordance with the laws of the State of California in force at the time application is made, may hereafter participate in the beneficial use of the rights and privileges granted by this act.

Fear has been expressed in certain quarters that San Francisco might not consent to the participation of the east bay I think such a fear is groundless. In the first place, the compelling reason would be a financial one, for without the assistance of these other localities the burden upon San Francisco would be tremendous. San Francisco will be only too willing to cooperate. Let us consider the remote contingency of a refusal, or an attempt to hold up the bay cities. The constitution of California provides, article 14, section 1:

The use of water now appropriated or that hereafter may be appropriated for sale, rental, or distribution is bereby declared to be of public use and subject to regulation and control of the State in the manner to be prescribed by law.

The Railroad Commission of California, which exercises control over the public utilities of that State, its powers having been broadened by the adoption of a constitutional amendment within the past two years, would unquestionably exercise control over the municipality of San Francisco, having recently de-clared that it would not allow the city of Los Angeles, whose Owens River water grant is not dissimilar to the one now asked of the Government for San Francisco, to fix arbitrary rates for the sale of water for irrigation purposes along the line of its 150-mile aqueduct. In effect the commission held that it was within its power to prevent the city of Los Angeles from fixing such rates for the use of this water as might enable that city to quickly reimburse itself for the vast sums expended in the instal-lation of its system. I am also of the opinion that under the remote possibility of a refusal on the part of San Francisco an appeal to the Secretaries of the Interior and Agriculture could be taken for an adjustment of any differences between the two localities.

On the other hand, should the Alameda County cities be made joint grantees with San Francisco at this time, they would necessarily be immediately asked to assume certain responsibilities and carry their proportion of the financial obligations so far incurred. As it now stands it is optional. If they conclude that the Hetch Hetchy project offers the best and cheapest water supply they can unquestionably participate as separate municipalities or by organizing themselves into a municipal water district under the State act of December 24, 1911. This act provides that the people of any city or county or of one or more municipal corporations in any county with or without unincorporated territory in such county may organize a municipal water district. When the district is organized it has power among other things to acquire or contract to acquire waterworks or a waterworks system, water rights, and so forth. It may also lease waterworks systems, exercise the right of eminent domain, and condemn property for public use. It may borrow money, issue bonds, and cause taxes to be levied to pay any obligation of the district.

While the preliminary steps have been taken to form such a district in Alameda County, considerable opposition has devel-oped. This opposition is not against participation in the Hetch Hetchy project, but is due to certain provisions of the

There is another State law, approved March 24, 1903, which provides that any two or more incorporated cities may jointly acquire and develop a water supply for municipal and domestic

purposes.

If present State laws are not adequate to protect the interests of the east bay cities, a satisfactory legislative act could be passed between now and the time when the water supply will be available, the pending bill providing that municipalities or water districts may participate with the consent of San Francisco or in accordance with the laws of the State of California

in force at time application is made.

To sum up, the supply is urgently needed to-day by San Francisco and will be required by the near-by cities shortly. Every possible source of water supply has been examined, with the result that the Hetch Hetchy project has been determined to be the most practicable and by far the most desirable. The interests of the Government and the people are amply protected. By section 6 of the bill the grantee is prohibited from selling, assigning, or transferring the rights to any private person, corporation, or association. The Secretary of Agriculture, the Secretary of the Interior, the Director of the United States Geological Survey, the chairman of the United States Reclamation Commission, and the Chief Forester of the United States Forest Service have all indersed the bill. It is also harded by Forest Service have all indorsed the bill. It is also backed by the united congressional delegation of California.

I do not hesitate to frankly state that I am not particularly enamored of section 7, providing that the grantee shall pay to the Government after five years from the passage of the act \$15,000 annually for a period of 10 years, and for the next 10 years \$20,000 annually, and the remainder of the term of the grant, unless otherwise provided by Congress, the sum of \$30,000 annually. This simply means that this amount will come out of the pockets of the water consumers of San Francisco and the east bay cities, if they participate. The water is for a public use, and the rights are not granted to a private The committee, however, insisted upon the incorporation.

sertion of this provision.

Notwithstanding this objectional provision, I shall support the bill. Nine years' experience in this body has taught me that no important measure of this character can be framed to meet fully the views of every individual Member. I appreciate that San Francisco has fought long to obtain this grant. Opposed by private water corporations, besieged and hampered by those seeking to unload other water projects, held up by landowners, seeking to unload other water projects, held up by landowners, the city is at last to be given the opportunity of realizing its fondest hopes in obtaining a water supply that will equal, if not excel, that enjoyed by any city in the world. The bill should receive the unanimous support of the membership of

I will insert as part of my remarks two editorials from leading Alameda County papers supporting the Hetch Hetchy bill:

[Editorial from the Oakland (Cal.) Tribune, July 23, 1913.]

LET US STAND WITH SAN FRANCISCO FOR HETCH HETCHY.

[Editorial from the Oakland (Cal.) Tribune, July 23, 1913.]

LET US STAND WITH SAN FRANCISCO FOR HETCH HETCHY.

Oakland and her sister cities have an interest in the Hetch Hetchy water scheme that should make them allies of San Francisco and give their support to the bill now before Congress. This interest is contingent as yet, but it is none the less vital, and the sense of remoteness should not lead us to ignore a proposition which should enlist both our sympathies and self-interest.

Steps are now being taken by the cities on the Alameda shore to inaugurate the policy of public ownership of water supply and the facilities for supplying water. One of the chief objects in view is acquiring a more abundant and dependable supply, for the increasing droughts will in a few years reach the limit of the supply that it is possible to obtain from local sources. We must look to the high Sierras for a future supply that will be at once pure, abundant, and permanent. This can only be obtained by cooperating with San Francisco to bring in a supply that can never be interfered with and which will be a guaranty against all vicissitudes in future and forever remove the menace of water famine from the cities around the bay.

The Hetch Hetchy scheme promises all we could ask in this direction. An adjustment of the differences between the irrigators of the San Joaquin Valley and the authorities of San Francisco which permits of a division of the water of the Tuolumne River has been reached on a basis that will supply the wants of each without interference with the agricultural development of the valley. The only obstacle now to be overcome is the objection made in Congress to granting San Francisco the use of Hetch Hetchy Valley as a storage basin, an objection that Senator Works has unexpectedly and, as we believe, mistakenly volced. Regard for their own interests and their future security against water shortage should prompt the people on this side of the bay to assist in removing this objection. Senator Works should be urged

[Editorial from the Oakland (Cal.) Enquirer, July 23, 1913.]

SAN FRANCISCO'S WATER SUPPLY.

No good purpose can be served by the prevention of a vote of Congress upon the bill whereby the city of San Francisco is seeking to gain rights to carry forward her desired Hetch Hetchy water-supply project. Nothing is asked by her that is designed to work prejudice to the rights of any individual, corporation, irrigation district, or municipality, Nothing is sought in contravention of any law, contract, or public policy. Upon its part, under the terms of the bill, the city of San Francisco stands to make good upon all conditions imposed as a condition of the continued enjoyment of the privilege sought.

The right to immediate consideration of this matter before Congress—and this is all that is now insisted upon—is supported by a condition of dire significance to 500,000 people. Already that city's water supply is less than that of Seattle, with only half San Francisco's present population. Moreover, the water supply now furnished, though inadequate, is of a quality to preclude its use, in part, and to constitute a menace to the health of the users to a considerable extent. Without the district reached by the high-pressure salt-water fire service, there is not sufficient water in San Francisco's present service to afford reasonable protection against fire. Indeed, she has suffered within the past week a very considerable property loss by fire for the lack of an adequate water supply. And, worst of all, the possible capacity of the present system has been reached.

We understand that this matter of granting to San Francisco the rights she desires is already sanctioned by Government engineers who have made the project subject of rigid investigation. It is understood that in making up its findings and recommendations the Board of Engineers set forth an unqualified indorsement of the scheme, emphasizing the fact that the Hetch Hetchy system could be built at a saving of \$20,000,000 over any other possible.

This imperative

I will also print a brief analysis of the Hetch Hetchy bill.

ANALYSIS OF H. R. 7207.

[A bill granting to the city of San Francisco rights of way for water-supply system and incidental hydroelectric power plant in the Yo-semite National Park, the Stanislaus National Forest, and public lands in the State of California.]

IA bill granting to the city of San Francisco rights of way for watersupply system and incidental hydroelectric power plant in the Yosemite National Park, the Stanislaus National Forest, and public lands in the State of California.]

The theory on which this bill is drawn is that the United States, having sole jurisdiction over the national park, has the right to refuse the grant and also has the right in making the grant to impose certain conditions upon the grantee.

The bill is not drafted nor designed nor intended to usurp the powers of the State of California in the matter of control of the distribution of water. The conditions imposed—which are acquiesced in by the grantee—relate only to the protection of certain rights of the Turlock-Modesto irrigation district by recognizing, without affecting one way or the other prior rights of the said districts to certain waters in the Tuolumne River, the source of this river being the Hetch Hetchy Valley.

Section 1 provides a grant of all necessary rights of way not exceeding 250 feet, as in the judgment of the Secretary of the Interior and the Secretary of Agriculture are required for the construction and other cittes which may hereafter join in the stropoloral with the provided of the stanishment of the Secretary of Agriculture are required for the construction and other cittes which may hereafter join in the stropoloral with the provides and other cittes which may hereafter join in the provides and other cittes which may hereafter join in the stropoloral with the provided of the Secretary of the Stanishment of the Secretary of the Stanishment of the Secretary of the Stanishment of the Secretary of Agriculture must be procured. This section is analogous to and practically identical with the grant made to the city of Los Angeles for a water-supply system from the Owens River.

Section 2: This section requires the grantee to file with the registers of the United States land offices within three years all maps showing boundaries or locations, and prohibits permanen

(The grantee acquiesces in this proviso, which is designed to prevent the cutting of a stick of timber in the Yosemite National Park, and thus prevent any possible destruction of trees within the reservation, and also to make the park as artistic as possible.)

Proviso 2 of section 4 requires the grantee to construct and maintain bridges and crossings over its rights of way of such character and construction as may be prescribed by the Secretary of the Interior or the Secretary of Agriculture, and, further, the grantee shall, upon order of the United States officials, construct and maintain fences along the rights of way. It is still further provided that the grantee shall clear its rights of way of débris and inflammable material, thus preventing forest fires, and also shall permit the free use by Government officials of all trails, telephone and telegraph lines, railroad and other utilities which may be constructed as adjuncts to the water-supply system.

(The requirements of this section cause the grantee to expend a considerable sum in the improvement of the park and the forest reserve and make access to these public places easy and comfortable. The expenditure of this money for this purpose is a consideration, in part, for the grant.)

(The requirements of this section cause the grantee to expend a considerable sum in the improvement of the park and the forest reserve and make access to these public places easy and comfortable. The expenditure of this money for this purpose is a consideration, in part, for the grant.)

Section 5 provides that the grant by the Federal Government is an easement and that the lands shall be disposed of only subject to such easement. Proviso 1 compels the grantees to diligently prosecute its construction work without cessation, and in the event that such construction work eases for a period of three years and the Secretary of the Interior determines the grantee has not been duly diligent, all rights under the grant may be declared forfeited by suit in the United States District Court for the Northern District of California. The Attorney General is required to prosecute such suit to final judgment when requested to do so by the Secretary of the Interior. Proviso 2 provides that the Secretary of the Interior shall not attempt to make a forfeiture if the work of the grantee has been delayed or prevented by the act of God or the public enemy, or by engineering or other special or peculiar difficulties which could not have been reasonably foreseen and overcome and were beyond the control of the grantee. Proviso 3 compels the grantee to at all times comply with the regulations authorized by the act, and in the event of material departure from said regulations the United States officials may take such action as may be necessary, in the courts or otherwise, to enforce such regulations.

Section 6 provides that the grantee is prohibited from selling or letting to any corporation or individual, except a municipality, a water district, or an irrigation district, the right to sell or sublet the water or electric energy sold or given to it by the grantee; it is provided also that the rights under the grant shall not be subject to sale, assignment, or transfer to any private person, corporation of the material payments, the pro

other municipalities or water districts which may, with the consent of the city or in accordance with the laws of the State of California, hereafter participate in or succeed to the beneficial rights and privileges of the act.

(The cities about the Bay of San Francisco have always approved the granting of the Hetch Hetchy Reservoir site to San Francisco, with the understanding that these cities may in the future join with the city of San Francisco in a metropolitan water district. The State law of California provides for the creation of a metropolitan water district, and because of this law the bay cities have not requested at this time to be made cograntees. They know they will have the privilege to share in the benefits after San Francisco has made the necessary investment and brought the needed water to the bay cities for domestic use.)

Section 9 requires the grantee to observe sanitary regulations within the Hetch Hetchy watershed and around reservoir sites. These regulations provide that no human excrement, garbage, or other refuse shall be placed in the waters of any reservoir or stream, or within 300 feet thereof; and, further, that all sewage from permanent camps or hotels within the watershed shall be filtered by natural percolation through porous earth or otherwise adequately purified; and, further, no person shall bathe, wash clothes or cooking utensils, water stock, or in any way pollute the water of the reservoirs constructed under this grant or the streams leading thereto within 1 mile of said reservoir. The cost of inspection necessary to enforce sanitary regulations is to be paid by the grantee, and such inspection shall be under the direction of the Secretary of the Interior. Should these regulations prove insufficient to the grantee, then the grantee shall install a filtration plant, and no other sanitary rules or restrictions shall be under the direction of the States Government and Mr. Allen Hazen and Prof. Whipple, and are approved by the Board of Army Engineers, the Secretary of the Unit

refuse the grant to San Francisco, has therefore the right to place lawful conditions therein. The recognition of these priorities does not implinge upon California State law or modify existing rights.)

Paragraph (c), section 9, is a condition that the grantee shall be required to release the necessary amount of stored water to assure the flow of 2,350 second-feet included in the priorities of the irrigation districts; and, further, condition (c) recognizes the rights of the said flow of the Tuolumne River during a period of 60 days following and including April 15 of each year.

(Condition (c) is a limitation upon the grant, according to the theory of the bill, and is protective of rights already acquired and which can not be disturbed so far as they relate to the irrigation districts. The provision relating to the 4,000 second-feet of water is to provide for the beneficial use by the irrigationists of water which is to provide for the beneficial use by the irrigationists of water which is to provide for the beneficial use by the irrigationists of water which is to provide for the beneficial use by the irrigationists of water which is to provide for the beneficial use by the irrigationists of water which is to provide for the beneficial use by the irrigationists and the stored waters of the city. It should be borne in mind that San Francisco does not contemplate interfering with the natural flow of the Tuolumne. The intent is to store flood waters which come from the stored waters of the city. It should be borne in mind that San Francisco does not contemplate interfering with the natural flow of the Tuolumne. The intent is to store flood waters which come from the stored waters will receive the benefit of an investment of approximately \$55,000,000,000 without being compelled to put up any part of the cost, and the construction of the system will insure the priorities of the irrigationists and they will receive water in the dry period, when it is most needed. Without the construction of the summer and fall.)

lumne watershed in excess of the amount to be used for domestic and municipal purposes.

(The purpose of this provision is to make possible the use of surplus waters in the San Joaquin Valley and prevent the use of possible surplus for irrigation of lands remote from the Tuolumme River. John R. Freeman, consulting engineer for San Francisco, suggested that surplus water might be economically used for intensive farming in lands contiguous to San Francisco Bay. Inasmuch as San Francisco expects to purchase the local water supply, and thus acquire sufficient water for local irrigation purposes, it was deemed advisable and economical to provide that surplus from the Tuolumne should be used in the San Joaquin Valley. This is an economic use of water for the highest purpose of all concerned.)

Paragraph (1), section 9, provides that the grantee shall at its own expense provide water-measuring apparatus and keep hydrographic records, which apparatus and records shall be open to inspection by any interested party at any time.

Paragraph (1), section 9, is the engineers' definition of the flow of the Tuolumne River.

Paragraph (k), section 9, requires San Francisco to build a dam at least 200 feet high.

(This means that the city will expend from \$500,000 to \$1,000,000 in excess of initial expenditures necessary for its immediate needs. The

least 200 feet high.

(This means that the city will expend from \$500,000 to \$1,000,000 in excess of initial expenditures necessary for its immediate needs. The intent is to build the dam high enough to provide adequate storage to meet the conditions of the grant, and is primarily a benefit for the irrigationists.)

gationists.)

Paragraph (1), section 9, provides that the grantee shall sell excess of electrical energy to the irrigation districts and municipalities within the irrigation districts for the beneficial use of landowners, whenever such excess is not required for the actual municipal purposes of the grantee. It is also provided that no power plant shall be interposed on the conduit of the grantee except by the grantee itself. The proviso of the paragraph is that the grantee shall first satisfy the needs of landowners for pumping water for drainage or irrigation and the needs of the municipalities within the irrigation districts for municipal purposes, before excess of electrical power may be sold for commercial purposes.

poses, before excess of electrical power may be sold for commercial purposes.

(This is a direct benefit to the irrigationists, and places no burden or hardship upon the grantee.)

Paragraph (m), section 9, provides for the development of electric power. The grantee is required to develop 10.000 horsepower within 3 years after the completion of that portion of the system which is usable for power development. Within 10 years thereafter the grantee shall develop 20,000 horsepower, and within 15 years 30,000 horsepower, and within 20 years 60,000 horsepower, unless in the judgment of the Secretary of the Interior the public interests will be satisfied with a lesser development.

The prices of electricity are to be fixed under the laws of California, or, if there be no such laws, at prices approved by the Secretary of the Interior, such prices to return to the grantee actual cost of construc-

Interior, such prices to return to the grantee fails to develop tion.

Paragraph (n), section 9, provides that if the grantee fails to develop horsepower as directed herein, then the Secretary of the Interior may lease to such person or persons as he may designate those portions of the rights of way, structures, dams, etc., as may be necessary for development, use, and sale of power which the grantee has failed or neglected to develop.

(This is a forfeiture penalty to prevent cold storage of power possibilities.)

Paragraph (o), section 9, provides that rates to be charged for power

bilities.)

Paragraph (0), section 9, provides that rates to be charged for power for commercial purposes (in the event that lease is made to another party under paragraph (n)) shall conform to the laws of the State of California, or in the absence of any such law shall be subject to approval by the Secretary of the Interior; and it is also provided that all records, books, etc., shall be open to inspection by the Secretary of the Interior.

Paragraph (p), section 9, provides for the first of the secretary of the reals in the secretary of the s

Paragraph (p), section 9, provides for the building of roads and trails in the Yosemite National Park as designated by the Secretary of

Paragraph (p), section 9, provides for the building of roads and trails in the Yosemite National Park as designated by the Secretary of the Interior.

(The routing of these roads and trails was made by Mr. Marshall, of the Geological Survey, who surveyed the Hetch Hetchy Valley and is familiar with all the scenic and topographical conditions there. These roads will cost the city of San Francisco \$500,000 to \$1,000,000, and are to be turned over, free of charge, to the United States. This is one of the important considerations, and carries compensation to the Government for the rights of way granted. The construction of these roads will make the Hetch Hetchy Valley accessible and will provide a convenient and easy way for mountaineers to reach the higher parts of the Sierra. The paragraph also contains a requirement that the grantee shall provide a water supply for camp purposes at the Meadow camping place, a third of a mile from Hetch Hetchy. It is also provided that all trail and road building shall be done subject to the approval and direction of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions.)

Paragraph (q), section 9, provides that the grantee shall furnish water at cost to any authorized occupant within 1 mile of the reservoir, and shall repair and maintain roads and trails constructed under the provisions of the grant.

Paragraph (r) provides that the grantee shall pay all the cost of inspection and investigations which may be required of the Department of the Interior where such investigations and inspection involve expense to the department.

Paragraph (a) provides that the grantee shall file an acceptance of the conditions of this act within six months after its passage.

of the Interior where such investigations and inspection involve expense to the department.

Paragraph (s) provides that the grantee shall file an acceptance of the conditions of this act within six months after its passage.

Paragraph (t) requires the grantee to convey to the United States any and all tracts of land now owned by the city within Yosemite National Park or the national forest, which lands are not actually required for use under the provisions of this act.

(The city of San Francisco purchased private lands for the purpose of exchanging the same with the Government in lieu of that portion of the floor of the Hetch Hetchy Valley which is not owned by the city. The purpose of this plan is to provide suitable and desirable camping places for visitors who may wish to visit the Sierra and who would otherwise have camped in the Hetch Hetchy, and at the same time compensate the United States for lands to be submerged.)

Paragraph (u) provides that the grantee shall sell the water at cost to the military reservations at San Francisco. This was requested by the Secretary of War and is acquiesced in by the city.

Section 10 provides that the conditions of this grant shall be a binding obligation upon the grantee so far as the conditions relate to the irrigation districts.

Section 11 provides that this act shall not be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water or any vested right acquired thereunder, and the Secretary of the Interior is directed to proceed in conformity with the laws of the State of California in carrying out the provisions of this act.

Mr. CHURCH. Mr. Chairman, there have never been but two

Mr. CHURCH. Mr. Chairman, there have never been but two real objections urged, as far as I am advised, to the passage of this bill-the one by nature lovers, splendid people, who claim the beauties of the mountains will be marred by the making of this grant; the other by the farmers, thousands of feet below on the great San Joaquin plains, whose farms depend for life upon the waters of the mountains originating in the region of the Hetch Hetchy.

I do not share in the conclusion of the nature lovers that a lake covering a part of this valley will detract from its beauty; on the contrary I am persuaded a lake will add new charms to the scenery. One must understand the geography of our mountains out there in order to be able to properly decide. As you know, the Sierra Nevada Mountains constitute the eastern boundary of the State of California and rise to an average height of 9,000 feet, while now and then a sentinel lifts its snowy head above 14,000 feet.

On the western slope of this mountain range, about midway from the summit to the plains, an ancient forest stands. Its width from east to west has an average of 40 miles, while it extends from north to south 600 miles within the State. And you, my colleagues, who love Allegheny's heights or the Adiron-dack's woods, would stand in rapture anywhere among that California woods; and I invite you some time, when worn with the busy cares of life, to go out there and spend a few summer or autumn days wandering amid those heights, and when you do I want you to climb those mountains and stand at close of day, like the pioneers of old, upon their rugged, ragged tops, and while leaning on your walking stick lift your eyes westward above and beyond the San Joaquin Valley and past San Francisco and her Golden Gate to the sun sinking as behind a mountain range on fire into the Pacific far away, a picture grand, picturesque, sub-

lime, painted by the hand of God, and in the morning you will see the twin sister picture of the night before, the sunrise above the Wasatch, this side of the Great Salt Lake, a thousand miles away. From where you stand take any course and you will be repaid. Go to the Yosemite and look down into its blue abyss.

Stand where the storm king reigns upon his granite throne, Up where the lightnings flash around the thunder's home, Up where the eagle builds her nest, and the lofty peaks defy; Where rivers fall from towering heights, and rainbows paint the sky.

In this sublime place you should stop for a few days and

absorb wonders no tongue has ever yet described.

From there go to the Tehippitti, back in the mountains from Fresno, on the plains, with its domes 5,000 feet hanging overhead, monarchs of the sky, chiseled smooth and polished through the ages by winter's storm and nature's hand, and oh, the mossy glades, the tossing fountains, the drifting spray, the fishes in the stream eager to grasp the hook, the wild deer bounding around the cliffs, and the sighing pine trees overhead will charm your heart.

Go from this to Boyden Cave, but a few miles away, and with lantern travel underground and view chambers more gorgeous than palaces of kings, and see stalactites and stalagmites of rare size and strange hue, pictures crocheted upon the walls which limewaters have silently wrought in the dense darkness through countless ages, palaces and mansions beneath 2,000 feet of rock,

whose architect is God.

Go to our redwood groves, choice as they are, but 8 miles away, and wander about these monstrous trees, for as Mount Whitney, less than a hundred miles from them, lifts its snowy, ancient head above all other mountains of this land so these great trees stand without kith or kin, survivors of another age from which all but they are gone. Oh, if they could speak, what strange stories would they tell of mountain peaks, of canyons, of wilderness, and possibly of men-history not written on tablets or in books, but on circles, strata, petrification, and mountain banks of shells. They would tell of a day about which no others speak, when mad winds swept the land, when strange clouds and smoke filled the sky and when ashes fell, when cliffs went down and mountains rose and canyons deep were made, and the great inland waters burst through the Golden Gate and mingled with the seas and the western plains were born. They would tell how when the storm was past they stood alone, their companions gone, a new world everywhere. Oh, if they could only speak, what history would they tell; but they will not speak. What did I say? They will not speak? Why, in days gone by they have spoken in silvery tones to me. When, a shoeless child, I tried to climb their rough and rugged trunks, they spoke to me; when, in after years at night I camped alone amid their groves and heard the forest winds and saw the shadows change and the great moon drifting overhead, they spoke to me; and in winter, far back in Sierra's heights, when the snow was deep and fond memories constrained me to visit my ancient friends, I found them standing as they had stood through the ages, and there in solitude, clad in overcoats of snow, these sullen, sulky giants spoke to me. I never asked them a question they did not answer; and, oh, the choice lessons they imparted! They taught me to love the lesser trees, the vines, the mountain trail, the snow-clad heights, and all the wonders of the woods. They taught me to love my fellow man. They made me wonder, and as I wondered I thought of God, the destiny of my country, and of the human race.

Mr. Chairman, many lessons during my lifetime I have learned, some that lighten my pathway and make it sure and others that darken and hover as angry clouds; but from the lessons that these California mammoth trees have taught I have gathered dewdrops and honey dew, which has sparkled and

sweetened the hours of life.

I might go on and describe the wonders and beauties of this picturesque mountain range, for we surely have scenery there; but, in my judgment, God, when He commanded the wonders and beauties of all of the earth to appear on the western slope of the Sierra Nevada Mountains, overlooked nothing save a few extra lakes, which He might have placed here and there. The eastern slope of these mountains is not the same, for Donner, Lake Tahoz, and other lakes, beautiful beyond description, make the hearts of the wayfarer glad, but on the Hetch Hetchy side lakes are few and very small; and so I say to you, as I said before, I believe a lake covering part of the Hetch Hetchy Valley will add new charm to this already beautiful place, for around about this lake campers and nature lovers will pitch their tents, and instead of a valley, in which the mountains are already rich, will appear a beautiful mountain lake, blue, deep, and clear, in which fishes swim and on the surface of which rowboats and sailboats glide; and nature lovers and natural lovers and rheumatic members of the Sierra Club will

sit on the rocks along the shore in the morning time, and just before sunrise will look upward at the great cliffs, rising perpendicular, thousands of feet on every side, and then down into the clear waters where the great shadows fall and into the waters as if into a looking-glass all the outlines and beauties of the mountains will again appear; and as the sun sinks in the evening behind the mountains to the west the same picture will greet the eye, and at bedtime, just as the nature lover spreads his blankets upon the pine boughs, the real lovers, hand in hand and arm in arm, will wander among the rocks along the shore, and there will be a sky above and a sky below, for the moon and the stars will shine in the waters even as they do overhead, and the moonlight wanderers, looney and mooney as they are, will see beauty everywhere.

As I said at the outstart, the second real objection to the making of this grant has been urged by the irrigationists of the San Joaquin Valley, who have been fighting the proposition for years; but I am pleased to say most of them are now satisfied with the provisions of this bill and have asked me to support it and urged its passage at this time. They have sent me certain telegrams, which I now read and trust will appear in

the RECORD:

HUGHSON, CAL., August 14, 1913.

Hon. DENVER S. CHURCH. M. C., Washington, D. C.:

At a mass meeting of taxpayers and irrigators of Hughson section of the Turlock irrigation district the secretary of the meeting was instructed by resolution to wire you to vote for and use your influence for the immediate passage of the Raker bill as approved by our committee. E. F. Sawdey, Secretary.

TURLOCK, CAL., August 14, 1913.

DENVER S. CHURCH,
House of Representatives, Washington, D. C.:

We, the committee appointed by a citizens' mass meeting of the Turlock irrigation district, working in conjunction with the directors of said district, do hereby indorse the work of the representatives of the Turlock and Modesto irrigation districts sent to Washington for the purpose of protecting our rights as against the proposed claims of San Francisco, as set forth in a certain bill known as the Raker bill. We further ask our Representatives in Congress to support and vote for the said Raker bill, H. R. 7207, as reported out of the Public Lands Committee and now before Congress.

Unanimously carried.

H. C. Hoskins, Chairman.

Modesto, Cal., August 13, 1913.

DENVER S. CHURCH, M. C., Washington, D. C.:

Washington, D. C.:

At a joint meeting of the board of directors of the Modesto and Turlock irrigation districts held in Modesto this day the action of the committee sent to Washington to represent the districts was fully indorsed and the Raker bill, as recommended by the House committee, was approved. The boards also passed resolutions requesting our Representatives in Congress to use their best efforts to pass such bill and oppose the passage of any bill granting San Francisco the Hetch Hetchy which does not contain provisions recognizing and protecting the rights of the districts in the Tuolumne watershed, as provided in the bill.

Stanislaus County Board of Trade passed resolutions on Monday night in effect that no further opposition would be made to the Raker bill. Some little opposition to the bill has been engendered by persons having special interests outside of the districts and by a few others who feel that the waters of the river should never be taken from the valley. People generally of the irrigation districts believe that under all the circumstances the Raker bill should be adopted without material amendments and that the strongest opposition should be made to any change in the bill which would eliminate any of the conditions in favor of the districts.

C. S. Abbott.

C. S. Abbott,

Secretary Joint Meeting Members of Directors

Modesto and Turlock Irrigation Districts.
P. H. Griffin,

Attorney Turlock Irrigation District.
E. R. Jones,

Attorney Modesto Irrigation District.
L. W. FULKERTH.

Mr. Chairman, the authors of these telegrams, as well as myself, were originally opposed to this grant, and I at first opposed it in no uncertain terms; but the people representing the irrigation districts and the irrigationists in general sent to Washington certain distinguished gentlemen from the San Joaquin Valley to represent the interests of the irrigationists before the Public Lands Committee, of which committee I have the honor of being a member. Among those who thus represented the irrigationists were Hon. J. C. Needham, former Representative in Congress from the San Joaquin Valley; Judge Fulkerth, superior judge of Stanislaus County; Messrs, Griffin and Jones, attorneys who represented the two irrigation districts; also James W. Corson, chairman of the Chamber of Commerce of Modesto. These chosen representatives of the irriga-tionists presented their cause to the Public Lands Committee, and this committee, in order to safeguard in every way the rights of the water users of the San Joaquin, embodied in this bill certain conditions favorable to their interests; and I wish to say, gentlemen, that had these conditions not been thus embodied, instead of the telegrams which I have just read, requesting me

to urge the immediate passage of this measure, 10,000 people, if necessary, from this far-away valley would have been here at this time, protesting against the making of this grant; and I want further to say to you so you will understand the true conditions, should by any means this bill, either here or in the Senate, be shorn of the conditions favorable to the irrigationists, it will cause broken prospects and broken hearts, and a blighting panic in the great San Joaquin Valley; but I feel such a contingency will never arise.

Mr. Chairman, I am a zealous advocate of irrigation. My people were the founders of the greatest system of irrigation that has been established in the West, and it has been with the greatest reluctancy that I have become an advocate of the measure now before this committee; but my constituency, formerly opposed to the grant, are now favorable to it, as shown by the telegrams which I have just read, and my own judgment being convinced I feel that I should follow the dictates of my judg-

ment and the requests of my people.

That you may know the real history of irrigation in the San Joaquin Valley and my natural interest in the same, I desire to

intrude a few moments more upon your time.

The San Joaquin Valley 50 years ago was a desert, bleak and bare, where nothing was seen to stop the desert winds save now and then a cottonwood tree that stood along the river's bank. On the border of this great plain, 200 miles in length and a hundred miles in width, in springtime the shepherd watched and fed his flock. During the remainder of the year nothing lived upon it except coyotes, horned toads, billy owls, and galloping lizards.

It was late in the sixtles my uncle, M. J. Church, drove a span of mules down the eastern border of this valley, traveling from the north toward the south. One night he camped on the highlands near the beautiful Kings River at a point where, after making a descent of 10,000 feet, the river started on its meandering way across the plains. That night as he lay there upon the desert beneath the starlit sky, where no sound was heard save the coyote's cry and the river's swish as it beat against the rocks, he had a dream, and God was in that dream. He dreamed of a desert changed, where sagebrush no longer grew, where galloping lizards no longer beat the sand, where the coyote's howl had ceased and wailing winds no longer sighed. He dreamed of happy homes where orchards and alfalfa grew, where grapevines twined and vineyards made the landscape He dreamed of cities flourishing upon those plains-a civilization of sturdy, rugged men. At daybreak his mules were headed toward the north, to the land from whence he came, not to remain, however, but to bring reenforcements that he might carry out his dream.

A few years ago he died, but his dream had long been fulfilled. A great cement dam he had thrown across that river, and 600 miles of ditches he had dug upon those sandy plains, and hundreds of thousands of people lived, and small cities and towns were there, a hundred million pounds of raisins were annually produced, and tens of thousands of acres of fruit trees and alfalfa everywhere. It was indeed a land transformed, a desert blossoming as the rose; and when the dear old man was gone they erected a monument there on which the sculptor drew with his chisel pictures in the granite stone. On this side a desert bleak, bad lands everywhere. On the other a goodly land with orchards and vineyards, where agriculture reigns, and above it all, impressed upon the rock, I trust for all time, the words "M. J. Church, Father of Irrigation."

Gentlemen, in conclusion let me say I have recited the narrative of my uncle's work so you may know my heart is with the water users of the San Joaquin; to impress upon you the fact that no conditions favorable to them should be stricken from this bill; that they have rights that all are bound to recognize; that their waters are their all. Rob them of these and you loosen pestilence in their land that will cause their vines to cast their fruit before the vintage time; their fruit trees to wither in the sun; their alfalfa, now so green, to turn to straw. So I ask all you who are farmers' friends; all who like to see his spring crops grow and his granaries full; all who believe that he who plows and toils and sows should also reap; I ask all such to guard with zealous care the farmers' interests in this bill.

The CHAIRMAN. Does the gentleman from California [Mr.

CHURCH] reserve the balance of his time?

Mr. CHURCH. Mr. Chairman, I reserved the balance of my time, but I remember that I had a previous arrangement to give to my colleague from California, Mr. Kent, 10 minutes. making that grant I reserve the balance of my time.

Mr. FERRIS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker pro tempore [Mr. Hax] having resumed the chair, Mr. Foster, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, and had come to no resolution thereon.

# ADJOURNMENT UNTIL SATURDAY AT 11 O'CLOCK A. M.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning. I do this at the request of the gentlemen who have in charge the bill that has been under consideration to-day, in the hope that we can complete the bill tomorrow in time to let the Members of the House take the afternoon trains out of town.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow morning at 11 o'clock. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

#### LEAVE TO PRINT.

Mr. CRISP. Mr. Speaker, at the request of the gentleman from Ohio [Mr. Post], chairman of the Committee on Elections No. 1, I ask unanimous consent that those Members who spoke on the contested-election case of MacDonald against Young be permitted to extend their remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Georgia [Mr. Crisp] asks unanimous consent that all those who spoke on the contested-election case of MacDonald against Young be permitted to extend their remarks in the RECORD. Is there objection?

Mr. RAKER. Mr. Chairman, reserving the right to object, in that connection I would like to have permission to extend a few remarks on that same subject. They will not take up more

that 5 or 6 inches of the Record.

The SPEAKER pro tempore. The gentleman from California [Mr. RAKER] asks that the request of the gentleman from Georgia [Mr. CRISP] be modified so that he, too, may extend his remarks in the RECORD on the contested-election case of Mac-Donald against Young. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia as modified? [After a pause.] The Chair hears none, and it is so ordered.

#### THE CURRENCY BILL.

Mr. UNDERWOOD. Mr. Speaker, I overlooked a request of the gentleman from Virginia [Mr. Glass]. At the request of that gentleman, chairman of the Committee on Banking and Currency, I ask unanimous consent that there may be printed 5,000 copies of the bill that he introduced to-day, H. R. 7837, and placed in the folding room for the use of the Members.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that 5,000 copies of the currency bill, introduced to-day by the gentleman from Virginia [Mr. Glass], be printed and placed in the folding room for the use of the Members of the House. Is there objection?

Mr. MANN. Reserving the right to object, the gentleman from Alabama says "the folding room." Of course a very large share of the membership of the House is not here, and the copies of this bill will be only for current use. If they are not used in the next few days, they will be valueless. For the benefit of those Members who are here, why not let the printed copies of the bill go to the document room, so that they may all be available?

Mr. UNDERWOOD. Mr. Speaker, I will modify my request, and ask that the copies be sent to the document room.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. Underwood] modifies his request so that the 5,000 copies of the bill will be sent to the document room. Is there objec-[After a pause.] The Chair hears none, and it is so ordered.

### ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 36 minutes p. m.) the House adjourned until to-morrow, Saturday, August 30, 1913, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting an estimate of appropriation for furnishing permanent quarters to the auditors of the Treasury Department (H. Doc. No. 210); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Belvedere Harbor, Cal. (H. Doc. No. 211); to the Committee on Rivers and Harbors and ordered to be printed, with illus-

3. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Salem Harbor, Mass., with a view to providing a channel 12 feet deep at mean low water from the outer harbor to the mouth of the South River (H. Doc. No. 212); to the Committee on Rivers and Harbors and ordered to be printed.

### CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 6608) granting a pension to Dorothea Christmann, and the same was referred to the Committee on Invalid Pensions.

# PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:

By Mr. SMITH of New York (by request): A bill (H. R. 7834) to authorize the construction and maintenance of a tunnel under Buffalo River; to the Committee on Interstate and Foreign Commerce.

By Mr. BORLAND: A bill (H. R. 7835) to provide a commission of Army engineers to investigate the impounding of flood waters on the Missouri River and its tributaries; to the Committee on Rivers and Harbors.

By Mr. LOBECK: A bill (H. R. 7836) for the recognition of the military services of officers and enlisted men of certain States and Territorial military organizations; to the Committee

on Military Affairs,
By Mr. GLASS: A bill (H. R. 7837) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for other purposes; to the Committee on Banking and Currency.

By Mr. LONERGAN: A bill (H. R. 7838) authorizing the Secretary of the Interior to set aside certain lands to be used as a sanitarium by the Order of Owls; to the Committee on the Public Lands.

By Mr. EDWARDS: A bill (H. R. 7839) to establish a fishhatching and fish-cultural station for the hatching and propagation of shad in Georgia; to the Committee on the Merchant Marine and Fisheries.

By Mr. CARAWAY: A bill (H. R. 7840) to amend an act entitled "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878; to the Com-

mittee on the District of Columbia,

By Mr. BRITTEN: A bill (H. R. 7841) to provide for the erection of a Government armor-plate factory; to the Committee on Naval Affairs.

By Mr. PATTON of Pennsylvania: A bill (H. R. 7842) to establish a fish-cultural station in Center County, in the State of Pennsylvania; to the Committee on the Merchant Marine and Fisheries.

By Mr. GREGG: Resolution (H. Res. 237) providing for a committee to investigate cost of armor plate and gun forgings and the economy of their production by the Government; to the Committee on Rules.

By Mr. FOWLER: Resolution (H. Res. 238) to investigate the dissolution of the American Tobacco Co., and for other pur-

poses; to the Committee on Rules.

By Mr. ESCH: Memorial of the Legislature of Wisconsin, favoring the setting aside of certain islands in the Great Lakes for the purpose of establishing thereon bird reserves; to the Committee on the Public Lands.

Also, memorial of the Legislature of Wisconsin, relating to the use of the postal savings deposits to provide funds for systems of State loans to farmers; to the Committee on the Post Office and Post Roads.

By Mr. GARNER: Memorial of the Legislature of Texas, favoring legislation establishing the Mescalero National Park; to the Committee on Indian Affairs.

### PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DOREMUS: A bill (H. R. 7843) to place Michael James McCormack upon the active list of the Navy; to the Committee on Naval Affairs.

By Mr. DRISCOLL: A bill (H. R. 7844) granting a pension to Edward Lichtenstein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7845) granting a pension to Frederick Rattke; to the Committee on Pensions.

Also, a bill (H. R. 7846) granting a pension to George W.

Neily; to the Committee on Pensions.

Also, a bill (H. R. 7847) to remove the charge of desertion against C. S. Lockwood; to the Committee on Military Affairs. By Mr. GREGG: A bill (H. R. 7848) for the relief of Ten Eyck De Witt Veeder, commodore on the retired list of the United States Navy; to the Committee on Naval Affairs.

By Mr. KEY of Ohio: A bill (H. R. 7849) granting a pension to Henrietta A. Silver-Grim; to the Committee on Invalid Pen-

Also, a bill (H. R. 7850) granting an increase of pension to

D. H. Clifton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7851) granting an increase of pension to John Beckley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7852) granting an increase of pension to

Henry Friar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7853) granting an increase of pension to Joseph A. Beach; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7854) granting an increase of pension to William Goodin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7855) granting an increase of pension to William E. Gault; to the Committee on Pensions.

Also, a bill (H. R. 7856) for the relief of Samuel Cole; to the Committee on Military Affairs.

Also, a bill (H. R. 7857) to correct the military record of

Charles Beach; to the Committee on Military Affairs.

By Mr. LAFFERTY: A bill (H. R. 7858) granting a pension to Alice G. Hudson; to the Committee on Pensions.

Also, a bill (H. R. 7859) for the relief of Joseph Glessner; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 7860) granting a pension to Martha Tincher; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7861) granting a pension to Levi Salier; to the Committee on Invalid Pensions.

By Mr. LOBECK: A bill (H. R. 7862) granting an increase of pension to William Dunn; to the Committee on Invalid Pensions. Also, a bill (H. R. 7863) granting an increase of pension to

Lucinda Hyde; to the Committee on Invalid Pensions. By Mr. MOSS of West Virginia: A bill (H. R. 7864) granting an increase of pension to John E. Iman; to the Committee

on Invalid Pensions. Also, a bill (H. R. 7865) granting an increase of pension to Louisa Wildman; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 7866) granting an increase of pension to Joseph Lambert; to the Committee on Invalid Pen-

By Mr. STEENERSON: A bill (H. R. 7867) granting an increase of pension to Susan I. Keene; to the Committee on Pen-

By Mr. J. M. C. SMITH: A bill (H. R. 7868) granting a pension to Rose Gregory Houchen; to the Committee on Invalid

Pensions. Also, a bill (H. R. 7869) granting an increase of pension to William Birmingham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7870) granting an increase of pension to

Frank W. Dickey; to the Committee on Invalid Pensions.

By Mr. STEPHENS of California: A bill (H. R. 7871) granting a pension to Moses S. Pittman; to the Committee on Invalid Pensions.

By Mr. STONE: A bill (H. R. 7872) granting an increase of pension to T. C. Murphy; to the Committee on Invalid Pensions,

#### PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid

on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of citizens of Milwaukee, Wis., favoring the passage of legislation tending to bring about a final and just settlement on all pending questions concerning the serious Balkan, Prussian, and Austro-Hungarian Slavic controversy; to the Committee on Foreign Affairs.

By Mr. DAVIS of West Virginia: Petition of Local Union No. 3, United Brotherhood of Carpenters and Joiners of America, Wheeling W. Va. favoring the passage of legislation for a re-

Wheeling, W. Va., favoring the passage of legislation for a republican form of government and representation for the city of

Washington and District of Columbia; to the Committee on the District of Columbia.

By Mr. DYER: Papers to accompany House bill 7144, granting an increase of pension to Pleasant F. Clutts; to the Committee on Invalid Pensions.

Also, papers to accompany House bill 6608, granting a pension to Dorothea Christmann; to the Committee on Invalid

Also, papers to accompany House bill 6609, for the relief of Arthur E. Rump; to the Committee on Claims.

By Mr. FITZGERALD: Petition of Association of German Authors of America, protesting against the passage of legislation placing a tax on books printed in a language other than English; to the Committee on Ways and Means.

Also, petition of Local Union No. 169, United Brotherhood of Carpenters and Joiners of America, of Brooklyn, N. Y., favoring the passage of legislation for a republican form of government and representation for the city of Washington and the District of Columbia; to the Committee on the District of Columbia.

By Mr. GARNER: Petition of Southwest Texas Progressive League, Corpus Christi, Tex., favoring the passage of legisla-tion to extend the intercoastal canal to Baffins Bay and the mouth of the Arroyo Colorado; to the Committee on Railways and Canals.

By Mr. HAYES: Petition of citizens of Mountain View, Cal., protesting against the passage of Senate bill 752, providing for the proper observance of Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia,

Also, petition of the Chamber of Commerce of Watsonville and the Pajaro Valley, Cal., favoring the passage of the 1-cent letter postage rate; to the Committee on the Post Office and Post Roads.

Also, petition of the San Jose Grange, No. 10, Patrons of Husbandry, San Jose; J. D. Dunovant, Greenfield; T. J. Henderson, Campbell; J. W. Tennant, Watsonville; C. W. Dayton, Owensmouth; all of the State of California, and all favoring an extension of the parcel-post system; to the Committee on the Post Office and Post Roads.

By Mr. KIESS of Pennsylvania: Papers to accompany House bill 5915, granting an increase of pension to C. R. Taylor; to the

Committee on Invalid Pensions,

By Mr. TAYLOR of Colorado: Petition of the local union, No. 244, of the United Brotherhood of Carpenters and Joiners of America, Grand Junction, Colo., favoring the passage of legislation for a republican form of government and representation for the city of Washington and the District of Columbia; to the Committee on the District of Columbia.

# SENATE.

# Saturday, August 30, 1913.

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. Overman and by unanimous consent, the further reading was dispensed with and the Journal was approved.

#### PETITIONS AND MEMORIALS.

Mr. PERKINS presented a petition of Hall of South San Francisco Parlor No. 157, Native Sons of the Golden West, of California, praying for the construction of a naval station at Hunters Point, on San Francisco Bay, in that State, which was referred to the Committee on Naval Affairs.

Mr. WARREN presented a petition of sundry citizens of Cheyenne and Laramie, Wyo., praying for the enactment of legislation for the prevention of fraud in the manufacture of American watch improvements, which was referred to the Committee on Interstate Commerce.

Mr. ROOT presented a memorial of a special committee of the New York Produce Exchange, remonstrating against the proposed duty on bananas, which was ordered to lie on the table.

### MARSHFIELD (OREG.) TIDAL BASIN.

Mr. CHAMBERLAIN. From the Committee on Commerce I report back favorably without amendment the bill (S. 767) granting permission to the city of Marshfield, Oreg., to close Mill Slough, in said city. As this is a local measure, I ask unanimous consent that the bill may be considered now.

Mr. SMOOT. Let it be read for information. The VICE PRESIDENT. The bill will be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That Mill Slough, a tidal tributary of Coos Bay, lying within the limits of the city of Marshfield, State of Oregon, is hereby declared to be not a navigable waterway of the United States,

within the meaning of the laws enacted by Congress for the preserva-tion and protection of such waterways, and the consent of Congress is hereby given to the filling in of said slough by the said city of Marshfield.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. SMOOT. I should like to ask the Senator from Oregon if there is a favorable report on the bill from the department?
Mr. CHAMBERLAIN. Yes; the Chief of Engineers recommends it.

I may state in this connection that the Government, in connection tion with the local authorities, is dredging Coos Bay. Slough is just a little tidal stream that goes out from the bay about half or three-fourths of a mile. At low tide there is no water in it. At high tide canoes, skiffs, and launches can go up, but at other seasons it is not navigable. It is desired to empty the silt which results from dredging Coos Bay into this tidal stream and so fill it up entirely, resulting in improved sanitary conditions in the city.

Mr. BRANDEGEE. It is not liable to be of any use to general navigation?

Mr. CHAMBERLAIN. No, sir.
Mr. SIMMONS. The Senator from Oregon does not understand that the bill will lead to any debate?

Mr. CHAMBERLAIN. Oh, no.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 3063) to authorize the Secretary of the Treasury to employ consulting architects in connection with the work of the Supervising Architect's Office, and for other purposes; to the Committee on Public Buildings and Grounds.

A bill (S. 3064) granting an increase of pension to James W. Lemison (with accompanying paper); to the Committee on

Pensions.

By Mr. McLEAN:

A bill (S. 3065) granting an increase of pension to Rachael J. Baldwin (with accompanying papers); to the Committee on Pensions.

By Mr. BRADLEY:

A bill (S. 3066) granting an increase of pension to Larkin J. Vanhook; to the Committee on Pensions.

### AMENDMENT TO THE TARIFF BILL.

Mr. JONES submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was ordered to lie on the table and be printed.

# PERMANENT PANAMA EXHIBIT.

Mr. OVERMAN. Mr. President, I present to the Senate a short resolution from the manufacturers and jobbers of the United States, together with a short editorial from the Piedmont Industries, on the matter of the Panama exhibit plan and a ship railroad line in South America. I ask that it be printed in the RECORD without reading.

There being no objection, the matter referred to was ordered

to be printed in the RECORD, as follows:

Resolution favoring a permanent Panama exhibit.

Resolution favoring a permanent Panama exhibit.

Whereas the manufacturers of the United States and jobbers as well desire to take advantage of all possible means to extend their trade in South America; and
Whereas a number of the largest manufacturers of the United States have expressed a desire that a common point be selected from which goods and wares may be exploited; and
Whereas a large number of national conventions, among these being the Associated Advertising Clubs of America, the National Brick Manufacturers' Association, and other associations and chambers of commerce and boards of trade passed resolutions favoring a point of exploitation; and
Whereas the matter having been brought to the attention of Col. George W. Goethals, and he having passed favorably on same, provided the manufacturers of the United States become interested: Therefore

Resolved, That we favor an exhibit hall and permanent exhibit with adjoining warerooms and showrooms to be opened at the opening of the canal to the world, or as soon thereafter as practical and as near after as possible after the world exposition at San Francisco.

Resolved, That this exhibit and exhibit hall shall have for its object the exploitation of the merchandise and manufactures of the United States to South America and the world, and to serve as a common ground on which to meet the trade from South America and the world, and a place where language and customs and manners of trade can be learned in the Latin-American countries.

Resolution passed by the Associated Advertising Clubs of America, National Brick Manufacturing Association, National Building Brick Association, Charlotte Chamber of Commerce.

The possibilities of establishing a permanent exhibit and permanent exhibition hall with adoluting warehouses from which to distribute possibilities to the North American trade.

The Panama Canal is the best advertising "copy" Uncle Sam has ever gotten out.

Exports to South America have shown a phenomenal gain in the fiscal year which ends with the present month. Prior to 1911 the total value of exports to South America has never reached \$100,000,000. In 1911 the total \$100,000,000 and in the current fiscal year which ends which the present month. Prior to 1911 the total value of exports to South America has never reached \$100,000,000, having more than death month sons likely to be about \$135,000,000, having warmed the properties of the peartment of Commerce indicate that the total exports to South America. The figures now available in the Bureau of Statistics of the Department of Commerce indicate that the total exports to Argentina for the complete fiscal year will amount to about \$855,000,000, against twenty-three and one-half in 1905, having thus considerably more than doubled in the period in question. To Brazil the total exports for the fiscal year will exceed \$30,000,000 in 1905.

Brazil the total exports for the fiscal year will exceed \$30,000,000 in 1905.

This increase in exports for the fiscal year will exceed \$30,000,000 in 1905.

This increase in exports to South America, while occurring in a large number of articles, is especially notable in lumber, leather, mineral olis, and railway material. For example, the exports of tuber to Argentina in the 10 months ending with last April amounted to five and three-sponding months of last year, and these control of the preeding year. Illuminating oll exported to Argentina in the 10 months in question amounted to over \$1,000,000 gallons, against substitution of last year, and the cor

way, which Magellan.

way, which would some day extend from Bering Sea to the Strait of Magellan.

The idea fascinated the mind of James G. Blaine, who openly championed it and did much to bring it into notice.

When the rails of Mexico's railway system reached the northern border of Guatemala, at Mariscal, July 1. 1908, the Pan American enthusiasts saw it as a great link in the gigantic railway dreamed of by Helper long years before a north-and-south trunk-line road was projected for that country.

The construction of less than 100 miles southward from Santa Maria will join the railway system of Salvador and connect the capital of that Republic with New York City by rail.

There are short lines in Salvador, Nicaragua, and Costa Rica which will eventually join terminals. Already a railroad extending through a large section of Panama, from David to Panama City, has been surveyed and construction begun. In Colombia there has not been much new construction that would be part of the Pan American system, but new lines are being contemplated and financed. In Ecuador railroad connections already exist between Guayaquil, a port, and Quito, the capital. A good part of this line would be the trunk system of the Pan American railway. In Peru the road from Cuzco south to Lake Titicaca and the road in Bolivia from Lake Titicaca south to the capital, La Paz, and then farther south to Chile would form important links in the Pan Americans system. A new longitudinal line is already under construction in Chile, and a road which reaches from the heart of Bolivia south through Argentina to Buenos Aires lacks only about 175 miles of completion. The construction of less than 500 miles of track will bring the South American section of the Pan American railway as far northward as Lima, connecting the capitals of Argentina, Bolivia, Chile, and Peru by bonds of steel.

Thus at the completion of the canal in a few years we shall see a great concourse of trade passing not only "across" the Isthmus but "through" the Isthmus, making it a great "crossroads" point

We have thus gone into the railroad construction in South America in detail because when a railroad extends from Panama into all South American Republics it will greatly facilitate shipping. The shipping by rail is much safer, because there are no harbors on the South American coast and the ships' cargoes must be unloaded on lighters in an open sea while waves are running high, with great danger both to men and cargo.

The plan of establishing a warehouse and exhibit hall on the Panama Canal has been pronounced feasible and practical by the South American commissioner in Washington, who is associated with Mr. John Barrett, of the Panama American Commission.

The management might be vested in two companies—one a holding company, to operate the building and warehouse, the other an exhibition company, to carry on the exhibition.

I have just received the following letter from Mr. Barrett, director general Pan American Union:

WASHINGTON, D. C., March 5, 1912.

WASHINGTON, D. C., March 5, 1912.

I have to acknowledge receipt of your esteemed note of March 2, with press clipping from the Chicago Evening Post in regard to a showroom in the Canal Zone for displays.

The greatest opportunity before the United States for its future foreign commerce is in the 20 Republics lying south of us, and as a result of the efforts of the Pan American Union the trade of the United States to-day with that part of the world is growing more rapidly than it is with any other foreign group or nations, We are, however, only at the beginning of what we can accomplish in the future if we will simply make the proper effort.

Under separate cover I am sending you a copy of my last annual report, which may be of possible interest to you.

Yours, very cordially,

JOHN BARRETT.

THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate

proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SIMMONS. I think it was agreed on yesterday that section 3, relating to contracts for the sale of cotton for future delivery, should be passed over until Monday. I will ask that the Secretary begin reading at page 214, section 4.

Mr. CLAPP. Before the reading begins, I desire to call the

attention of the chairman of the committee to paragraphs 281 and 282.

Mr. BRANDEGEE. On what page? Mr. CLAPP. On pages 84 and 85. Under the old law mats and rugs were included entirely in the paragraph equivalent of 282. The committee, following the House, has placed them in paragraph 281. I desire to call the attention of the Senator from North Carolina to it, so that when the matter comes before the committee, as I have no doubt many of these matters will that were passed over, the committee may consider the inconsistencies which will arise from using the words "including mats and rugs" in paragraph 281.

Mr. SIMMONS. I understand the Senator is speaking to the point that mats and rugs in paragraph 281 and mats and

rugs in paragraph 282 ought to be in the same classification.

Mr. CLAPP. No; "floor mattings, plain, fancy, or figured,
manufactured from straw," is the language of the present law.

In paragraph 282 we have "carpets, carpeting, mats, and
rugs made of flax, hemp, or jute."

Mr. SIMMONS. Paragraph 281 applies to "floor mattings,

plain, fancy, or figured, including mats and rugs, manufactured from straw." Paragraph 282 applies to "mats and rugs made

from straw." Paragraph 282 applies to "mats and rugs made of flax, hemp, jute, or other vegetable fiber (except cotton)."

Mr. CLAPP. Yes. If you stopped at straw there would be no difficulty, but you say, in paragraph 281, "manufactured from straw, round or split, or other vegetable substances."

Mr. SIMMONS. "Not otherwise provided for."

Mr. CLAPP. Under the existing law the words "including mats and rugs" are not in the equivalent of paragraph 281.

Mr. SIMMONS. We will consider the matter.

Mr. SIMMONS. We will consider the matter.

The Secretary resumed the reading of the bill at page 214, section 4.

The next amendment of the committee was to change the section number by striking out "III" and inserting "IV."

The amendment was agreed to.

The next amendment was, on page 214, line 12, beginning with the word "That," to strike out the remainder of the paragraph in the following words:

That for the purposes of this act bringing or causing merchandise to be brought within the territorial limits of the United States shall be construed to be an attempt to enter or introduce the same into the commerce of the United States.

The amendment was agreed to.

The next amendment was, on page 215, line 12, after the word "owner" and the period, to insert:

That such invoices shall have appended for the purpose of making statistical entry, an enumeration of articles contained therein, in form to be prescribed by the Secretary of the Treasury, with the total of each article, and it shall be the duty of the consular officer, to whom the invoice shall be produced, to require such information to be given.

The amendment was agreed to.

The next amendment was, on page 216, line 6, after the word "purchase," to strike out the words "or agreement for purchase," so as to read:

D. That all such invoices shall, at or before the shipment of the merchandise, be produced to the consular officer of the United States of the consular district in which the merchandise was manufactured, or purchased, or contracted to be delivered from, or when purchases or agreements for purchase are made in several places, in the consular

district where the merchandise is assembled for shipment, as the case may be, for export to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, seller, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, etc.

Mr. SMOOT. Mr. President, this is the subdivision which requires the legalization of invoices by American consuls. It has been amended so as to require that the invoice shall be consulated in the consular district where the merchandise is as-sembled for shipment in cases where the purchases or agreements for purchase were made in several places. Other amend-ments in this paragraph D are apparently for the purpose of securing a true and exact account of the transactions so that their precise nature will be disclosed to the United States appraising officer. In connection with the declaration of the shipper before the American consul required by the statute, it might be proper to call attention to a suggestion which has been made which, if adopted, would probably secure truthful declarations. The suggestion is that shippers be required to make oath to the truth of these declarations before a judge or other functionary who is empowered to administer oaths. This would make false swearing before such a functionary punishable as perjury under the laws of the particular country.

I wanted to call the Senator's attention to that condition of

affairs, because I expect hereafter to call attention to other paragraphs in connection with the words used on page 216, line 7, where the bill says "a true and full statement of the time when," and no oath whatever is required. I believe it should be required, and as we proceed with the other sections of the bill I think the Senator having the bill in charge will fully see the

reason why it should be required.

Mr. WILLIAMS. I have been thinking that perhaps the bill as at present worded may dispense with a part of the present requirements as to oaths to be taken before our consuls. I have in contemplation an examination into that question to see whether there is any danger of that, and if so what remedy will cure it. As we go along with the bill and reach the proper place I will call attention to it.

Mr. SMOOT. What I wanted the Senator to pay particular attention to was that paragraph D, which we have under discussion now, requires simply a true and full statement of the time when, the place where, the person from whom the same was purchased, and then the words "or agreed to be purchased" are stricken out, to which, of course, I have no objection; but this simply requires a statement to be made.

Mr. WILLIAMS. This is merely a repetition of the language

of the present law.

Mr. SMOOT. Under the present law that statement is to be made out in a form approved by the Secretary of the Treasury, and under this provision that is left out entirely, so what kind of a form are you going to have? Is the form to be made by the importer or the exporter from a foreign country, or is it to be made out or approved by the Secretary of the Treasury?

Mr. WILLIAMS. The language of the bill is-

A true and full statement of the time when, the place where, the person from whom the same was purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by this act.

We did not see why there should be any particular form or that the returns should be definitely prescribed, provided those things were contained in it. It is like the statute of a State when there is a declaration setting forth certain things, especially in common-law form.

Mr. SMOOT. As soon as we reach paragraph F, I think it will be emphasized more strongly, and then I will bring it to the Senator's attention again.

Mr. WILLIAMS. Very well; the same matter will present itself later on. The principle runs through the bill.

Mr. SIMMONS. I wish to suggest to the Senator that it seems to be clear that these statements here are part of the general declaration of the statements he refers to.

Mr. WILLIAMS. It is a mere repetition of existing law. It has been on the statute books for years.

Mr. SIMMONS. Yes; and a concluding clause of the section says "if the merchandise was actually purchased," and also "the declaration," referring to the other statements of fact to which the Senator has called attention, "the declaration shall also contain a statement that the currency," and so forth. It is a part of the general declaration. There can not be any question about the bill requiring the declaration to be under oath.

Mr. SMOOT. We will wait until we get to paragraph F

and see.

Mr. WILLIAMS. If the Senator will examine the clause at some time fully, he will find the only thing the committee did was to strike out a provision the House made and to restore the

Now, Mr. President, in this connection I want to make a statement for the benefit of Senators generally. We found ourselves in a situation where it looked to us as if we were about to substitute for a protective tariff a prohibitive administration in the manner in which this came from the other House. We therefore concluded that it would be well to revise, codify, and harmonize the administrative laws of the United States with regard to tax collections and import duties especially. These laws run back for years and years in a most heterogeneous sort of way; some of them are amendments upon appropriation bills, and heaven knows what. So we provided here for a joint committee composed of members of the Finance Committee of the Senate and members of the Ways and Means Committee of the House, whose duty it shall be to revise, codify, and harmonize the tax administration laws of the United States and to report to the Ways and Means Committee of the House not later than February 1, 1914.

For that reason we did not go very far into the new provisions with regard to administration, and we left out most of the amendments which the other House had made, with a view of enabling us to have this report by the time stated, so that both Houses could act upon it and have an harmonious tax administration law. Where we struck little phrases which the other House had put into the old law like the one to which the Senator refers, we struck them out, with the idea that it would go back to this joint committee, who would make a complete report in connection with the subject matter and with all other

subjects matter pertaining to the same question.

The VICE PRESIDENT. The question is on agreeing to the

committee amendment.

The amendment was agreed to. . The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 216, line 8, after the word "purchased," to strike out "or agreed to be purchased"; and on page 217, line 4, after the word "purchased," to strike out "or agreed to be purchased," so as to read:

So as to rend:

The person from whom the same was purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by this act; and that no discounts, rebates, or commissions are contained in the invoice but such as have been actually allowed thereon, and that all drawbacks or bounties received or to be received are shown therein; and when obtained in any other manner than by purchase, or agreement of purchase, the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandises sold in the ordinary course of trade in the usual wholesale quantities, and that it includes all charges thereon as provided by this act, and the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced has been or will be furnished to anyone. If the merchandise was actually purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser, or agreed to be paid, fixed, or determined.

The amendment was agreed to.

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, referring to page 217, lines 4 to 8, inclusive, I have not looked to see whether or not any change has been made in existing law.

Mr. WILLIAMS. No change has been made. Mr. BRANDEGEE. The language is:

If the merchandise was actually purchased the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser, or agreed to be paid, fixed, or determined.

I do not understand exactly what that language means. may have been interpreted by decisions in practice, but if the merchandise was actually purchased what does it mean when it says: "That the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser, or agreed to be paid, fixed, or determined"?

Mr. WILLIAMS. All the goods might have been bought and

agreed to be paid for-

Yes; but what does it mean? Mr. BRANDEGEE.

Mr. WILLIAMS. And paid for in francs, in marks, in pounds sterling, or in dollars.

Mr. BRANDEGEE. That would cover the phrase "or agreed

to be paid"?

Mr. WILLIAMS. And the remainder of the phrase means simply the currency fixed or determined upon in the bargain. At any rate, that is the language of the present law, and the matter has been administered all right under it. So we left it.

Mr. BRANDEGEE. And it produces no friction in adminis-

tration?

Mr. WILLIAMS. None.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph F, page 219, line 5, after the word "declaration," to strike out "upon a form to be prescribed by the Secretary of the Treasury, according to the nature of the case," so as to

F. That whenever merchandise imported into the United States is entered by invoice, a declaration shall be filed with the collector of the port at the time of entry by the owner, importer, consignee, or agent, which declaration so filed shall be duly signed by the owner, importer, consignee, or agent before the collector, or before a notary public or other officer duly authorized by law to administer oaths and take acknowledgments, under regulations to be prescribed by the Secretary of the Treasury.

Mr. SMOOT. Mr. President, this will bring to the attention of the Senate the point I made in connection with paragraph C. This portion of the proposed statute provides for the declarations being filed with the collector at the time of entry by the owner, importer, consignee, or agent who makes entry of the goods, whereas under the present law the forms of these declarations, as suited to the circumstances of the importation, are set forth in the statute. The House adopted an amendment conferring upon the Secretary of the Treasury the power to prescribe the forms of these declarations. This seems proper, because they are purely a matter of administrative detail, and in consequence of the variance in the circumstances of commercial transactions their embodiment in the statute deprives them of necessary flexibility

As reported to the Senate, the words "upon a form to be prescribed by the Secretary of the Treasury, and according to the nature of the case," have been stricken out and nothing has been inserted to take their place. The result is that the provision has been so thoroughly emasculated as to make it as it stands of no avail whatever.

Mr. WILLIAMS. From what is the Senator from Utah

reading?

Mr. SMOOT. I have run through this hurriedly, and I put into writing what I had to say.

Mr. WILLIAMS. The Senator is reading from his own

manuscript?

Mr. SMOOT. Yes. Mr. ROOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New York?

Mr. SMOOT. I yield.
Mr. ROOT. I rise for the purpose of inquiring whether this bill does away with the forms of declaration which are prescribed in the existing law? The existing law contains full forms-one form of declaration of the consignee, the importer or the agent where merchandise has been actually purchased; then, another form of declaration of the consignee, importer, or agent where merchandise has not been actually purchased; then, a declaration of the owner and a declaration of the manufacturer. That is all set out in full in the present statute. My

inquiry is, whether that is proposed to be done away with now?

Mr. SMOOT. That is what I am objecting to, Mr. President. The way the provision is now it requires a simple declaration to be filed with the collector of the port at the time of entry, but it does not prescribe what shall be in the declaration. As it stands, an importer could comply with the law by making some

noncommittal observation of any kind.

Mr. ROOT. Mr. President, may I suggest to the Senator from Mississippi, out of some experience in the enforcement of our customs laws, that that language will lead to a great deal of uncertainty and litigation. If the importers are left by law at liberty to make up their declarations in their own way, clever, adroit, skiliful fellows will make up declarations that come pretty near answering the purpose, but which omit things or are equivocal upon the very matters as to which they want to avoid committing themselves. The result will be that our officers will have to deal with a great variety of different forms of papers, and there will be no end of litigation.

Mr. WILLIAMS. The Senator from New York is taking for granted that the reply given to him by the Senator from Utah is correct, and that this provision will repeal some present regulations of the Treasury Department. So far as I can see,

however, it will not.

Mr. SMOOT. Mr. President, the reason I made that statement was because of the fact that the committee have stricken out the words:

Upon a form to be prescribed by the Secretary of the Treasury, according to the nature of the case.

In subdivision C of this section a statement is required to be

made, and that is all that is required.

Mr. WILLIAMS. And that subdivision is the language of the existing law; and the regulations of the department require certain things to be in the statement, and they will continue to require them.

Mr. SMOOT. But the present law provides specifically what those declarations shall be, and they are set out in detail

Mr. ROOT. Section 5 of the existing tariff law provides Mr. SMOOT. And that corresponds to this paragraph.

Mr. ROOT. And section 5 is a continuance of what appears in tariff law after tariff law, going back for many years.

Mr. SMOOT. As far back as the act of March 1, 1823.

Mr. ROOT. Section 5 of the existing law provides:

That whenever merchandise imported into the United States is entered by invoice one of the following declarations, according to the nature of the case, shall be filed with the collector of the port at the time of entry.

And so forth. Then follow the series of declarations. It is by force of that statute that this kind and form of declaration has to be filed, and not by the force of any Treasury regula-I think it would be an unfortunate thing for administration to do away with that without giving express authority to the

Secretary of the Treasury to substitute something in its place.

Mr. SMOOT. I do not want the Senator from Mississippi to think that I am criticizing from any unfriendly point of view. I am simply calling attention to what seems to me a very serious omission. If those words were left in as the House provided, I believe, then there would perhaps be some little conflict, but very little, indeed, because then the Secretary of the Treasury would have the power to regulate the matter.

Mr. President, these declarations are of great importance, for they inform the customs authorities as to the precise interest

of the party making the declaration.

Mr. ROOT. May I make another suggestion before we pass from this matter? I should like the attention of the Senator from Mississippi. Our customs officers have to deal with an enormous number of papers, and in order that they may do so expeditiously, it is of the highest importance that the papers which perform the same service in all the vast number of cases shall be identical in form. Then the eye becomes accustomed to find figures and the really important and vital matters in such a place on such a page on each paper, and the officers can go over hundreds of thousands of them; but if the papers are dif-ferent in form it will enormously multiply the cost and labor of ordinary administration. I am very much afraid that if these statutory requirements as to form are eliminated and no authority is given to the Secretary of the Treasury, all the fellows who want to defraud the customs will choose their own

Mr. SMOOT. Mr. President, these forms were required by the act of March 1, 1823, which was reenacted in section 2841 of the Revised Statutes. The provision was amended and reenacted by section 8 of the tariff act of 1883, which, in turn, was superseded by section 5 of the act of June 10, 1890.

Mr. WILLIAMS. I want to save the time of the Senate and of the country so far as possible, and I am convinced by what has just been said that we have made an error. The subcommittee, of which I was chairman, struck out this new language

put in the bill by the House:

Upon a form to be prescribed by the Secretary of the Treasury, according to the nature of the case.

First, because we thought we had better leave the administration of the law, so far as possible, just as it already is. The House language was new, and we thought it was technical. tion 5 of the act of 1909 was overlooked by me. I neglected to notice the fact that the House in inserting this provision had put it in as a substitute for that section of the present law, and my object was to restore the administration feature just as it was, subject to the report of the joint committee which is to investigate the whole subject. I will take up that matter with the subcommittee and the committee, and I have no doubt, so far as my own opinion goes, that we will simply restore the language of the present law. The intention was not to change the present law. It is really a fault of my own, because it is a matter that was left to me to examine, and I failed to examine it as thoroughly as I ought to have done.

Mr. SMOOT. If the Senator will look at subsection 5 of the present law, he will notice that not only are those words used,

but the forms are given.

Mr. WILLIAMS. I understand that, and I want to restore the language of the existing law. I am speaking for myself now; I do not know what the committee or the caucus may do,

and I will have to submit it, of course, to them; but my own idea is to restore subsection 5 of the present law.

Mr. SIMMONS. Mr. President, if the Senator will permit me, I have no doubt the House struck out the forms prescribed in the old law and gave the Secretary of the Treasury the power to formulate and promulgate regulations, because the House had made certain very important changes in connection with purchases or agreements to purchase. We have stricken out

those provisions put in by the House, and therefore we can return to the language of the old law.

Mr. SMOOT. That will be satisfactory.

Mr. WILLIAMS. The House provision says "upon a form." That would have been one form for everything according to the nature of the case. The Secretary of the Treasury has been given very large discretion. For how many different cases he may find it necessary to prescribe, nobody can tell; so that the administration of the law would have been largely dependent upon whether there was a Secretary of the Treasury who was favorable to these provisions or who was unfavorable to them. I think there can be no doubt about the fact that we will restore the words of the present law. That is true so far as I am concerned, at any rate.

The VICE PRESIDENT. What is to become of the amend-

ment?

Mr. WILLIAMS. There is no amendment offered.
The VICE PRESIDENT. Yes; there is a committee amendment here.

Mr. WILLIAMS. Oh, the Chair refers to the committee amendment. I insist upon the adoption of the committee amendment, but I ask that the paragraph may go back to the committee to be remodeled.

Mr. SMOOT. Would it not satisfy the Senator to recommit

the paragraph to the subcommittee?

Mr. WILLIAMS. I think it would be better first to act upon this new language, and then we will be left to remodel it.

Mr. SMOOT. Would it not be better to remodel the whole

thing?

Mr. WILLIAMS. I do not see anything else in it that needs remodeling. I request that the Senate committee amendment be acted upon, and then that the paragraph go back to the com-

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The VICE PRESIDENT. The paragraph will be referred

back to the committee.

Mr. SMOOT. Mr. President, before that is done, will the Senator from Mississippi allow me to call his attention to one other thing that I believe the committee ought to take into con-The Senator will notice that the wording on line sideration? 11, page 219, is that this declaration shall be made "before a notary public or other officer duly authorized by law to administer oaths and take acknowledgments." The present law limits this authority to such notaries public and other officers as are

designated by the Secretary of the Treasury.

Mr. WILLIAMS. This does substantially the same thing, because it says "under regulations to be prescribed by the Secretary of the Treasury."

Mr. SMOOT. That refers to regulations as to the oath or affirmation; but the present law specifically requires that the notary public shall be designated by the Secretary of the Treas-I only wish to call it to the attention of the Senator

Mr. WILLIAMS. I really do not think there is any substantial difference there. It goes on to say "or before a notary public or other officer duly authorized by law to administer oaths and take acknowledgments, under regulations to be pre-scribed by the Secretary of the Treasury." The Secretary of the Treasury is authorized to make such regulations in regard to the matter as he thinks necessary.

Mr. SIMMONS. That is the language of the present law.

Mr. WILLIAMS. Yes; I thought it was the language of the esent law

Mr. SIMMONS. The present law is, "before a notary public or other officer duly authorized by law to administer eaths and take acknowledgments, who may be designated by the Secretary of the Treasury."

Mr. SMOOT. That is the difference. The present law requires that before a notary public can take a declaration he must be designated, and there is a good reason why that should be the case

Mr. SIMMONS. Docs not the Senator think that the Secretary, in his regulations, could designate the kind of notary before whom the acknowledgment should be taken."

Mr. SMOOT. No; because the bill says it is "before a notary

public or other officer duly authorized by law to administer

The reason for the language of the present law is that an importer might have a particular friend who was a notary public, and a declaration made before him might be worded in such a way that there would be a loophole of escape in case a question should arise. That is why the present law says that the Secretary of the Treasury shall designate the notary public.

I ask the Senator to take this into consideration with the

other matter.

Mr. WILLIAMS. I will take it into consideration, but I do not see any occasion for making any change. I think the two things are substantially the same.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph F, page 219, line 21, after the word "subsequently," to insert:

That the Secretary of the Treasury and the Secretary of Commerce are hereby authorized and directed to establish from time to time for statistical purposes a list or enumeration of articles in such detail as in their judgment may be necessary comprehending all goods, wares, and merchandise imported into the United States, and that as a part of the declaration herein provided there shall be either attached thereto or included therein an accurate statement specifying, in the terms of the said detailed list or enumeration, the kinds and quantities of all merchandise imported, and the value of the total quantity of each kind of article.

Mr. WILLIAMS. In that connection it might be well for me to state to the Senete the purpose of the supendment

to state to the Senate the purpose of the amendment.

We have a whole lot of paragraphs in the tariff laws which include a whole lot of different articles, and we are reduced to the necessity of finding an average from the report; and we want a report on each one as nearly as possible. This is a provision purely for statistical purposes, so that we may know better hereafter what the unit of value is in connection with each thing contained in the paragraph.

Mr. SMOOT. Mr. President, I approve most heartily of the provision; but I desire to call the Senator's attention to the fact that in paragraph C there is a provision practically identical

with this one. It reads:

That such invoices shall have appended, for the purpose of making statistical entry, an enumeration of articles contained therein, in form to be prescribed by the Secretary of the Treasury, with the total of each article, and it shall be the duty of the consular officer.

And so forth.

Why make a duplication, and, in this provision, add "the

Secretary of Commerce"?

Mr. WILLIAMS. The first provision refers to the invoice. Perhaps the words "the invoice shall contain" should be inserted there for the purpose of helping to get the information sought. Then the later amendment says:

That the Secretary of the Treasury and the Secretary of Commerce are hereby authorized and directed to establish from time to time * ° a list or enumeration of articles.

That would be a guide to the man who makes the invoice.

Mr. SMOOT. It seems to me the proper place is just where the committee placed it, in paragraph C. If it is on the invoice, every requirement is complied with, and all possible statistics are obtained.

Mr. WILLIAMS. If the Senator's view is correct, and his objection is that the two things are identical, it will not hurt to repeat the provision.

Mr. SMOOT. No; the objects are identical, but in one case it is the Secretary of the Treasury and in the other case it is the Secretary of the Treasury and the Secretary of Commerce.

Mr. WILLIAMS. We put in "the Secretary of Commerce" later on, because he is more of a statistical officer than the

Secretary of the Treasury, and we thought it would be well for him to have something to do with establishing this list or enumeration of articles.

Mr. SMOOT. The Senator does not want this information collected twice, does he?

Mr. WILLIAMS. No; I do not.

Mr. SMOOT. Under this language I think that would be the result.

Mr. WILLIAMS. One part of it refers to the invoice which the importer makes up and the other refers to the list or enumeration which the Secretary of the Treasury makes up.

Mr. SMOOT. That is collecting it twice. The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read paragraph G, on pages 220 and 221, as follows:

paragraph G, on pages 220 and 221, as follows:

G. That if any consignor, seller, owner, importer, consignee, agent, or other person or persons, shall enter or introduce, or attempt to enter or introduce, into the commerce of the United States any imported merchandise by means of any fraudulent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or shall make any false statement in the declarations provided for in paragraph F without reasonable cause to believe the truth of such statement, or shall aid or procure the making of any such false statement as to any matter material thereto without reasonable cause to believe the truth of such statement, or shall be guilty of any willful act or omission by means whereof the United States shall or may be deprived of the lawful duties, or any portion thereof, accruing upon the merchandise, or any portion thereof, embraced or referred to in such invoice, declaration, affidavit, letter, paper, or statement, or affected by such act or omission, such person or persons shall upon conviction be fined for each offense a sum not exceeding \$5,000, or be imprisoned for a time not exceeding two years, or both, in the discretion of the court: Provided, That nothing in this section shall be construed to relieve imported merchandise from forfeiture by reason of such false statement or for any cause elsewhere provided by law.

Mr. SMOOT. I' simply wish to say that as paragraph F stands at present this statutory definition of a crime means nothing, for, as already pointed out, paragraph F does not require any statements to be made in the declaration. As I say, this statutory definition of a crime, under those conditions, will amount to nothing unless a change is made in paragraph F.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph H, page 222, line 5, after the word "relates," to insert:

That the arrival within the territorial limits of the United States of any merchandise consigned for sale and remaining the property of the shipper or consignor, and the receipt of a false or fraudulent invoice thereof, or the existence of any other facts constituting an attempted fraud, shall be deemed to be an attempt to enter such merchandise, for the purposes of this paragraph, notwithstanding no actual entry has been made or offered.

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, on page 221, in line 9, I notice this language:

That if any consignor * * * rhall * * * attempt to enter or introduce into the commerce of the United States any imported merchandise by means of any * * * invoice * * * or by means of any false statement—

And so forth.

Why should he not be prohibited from entering it or punished for entering it into the United States at all, whether he puts it into commerce or not?

Mr. WILLIAMS. To what line is the Senator referring?

Mr. BRANDEGEE. I happened to notice this language, in passing, on page 221, line 9. It seems to me, without any knowledge of the subject except what is suggested by reading the paragraph, that the offense ought to consist in the fraudulent importation of the article into this country and not necessarily the fraudulent entry accompanied by an introduction into the commerce of the country. The mere evasion by fraud of the revenue law ought to be enough, it seems to me, without introducing the article into commerce.

I merely suggest that to the chairman of the committee.

Mr. WILLIAMS. That is the existing law, and it has been successfully administered. The House undertook, in a different part of the bill, to change the existing law along the line indicated by the Senator and to provide that the arrival of goods at a port, if I understand correctly, should be considered an introduction into the commerce of the country. We got to looking into the matter, and we found this situation: Here are men who receive goods as agents, let us say. Here are other men who receive goods as purchasers. Sometimes a man may receive an invoice of goods shipped to him that he does not want to accept at all. He finds out that those goods are sent to him under a fraudulent invoice, and he wants to amend the invoice. He wants an opportunity voluntarily to correct any injustice that has been done by the exporter abroad.

Mr. BRANDEGEE. The point I make, Mr. President, is that the bill provides, on page 221, at line 7:

That if any consignor, seller, owner, importer, consignee, agent, or other person or persons shall enter or introduce, or attempt to enter or introduce, into the commerce of the United States any imported merchandise by means of any fraudulent or false invoice—

And so forth.

If an importer or a consignor fraudulently enters a large cargo of goods and puts it in a bonded warehouse, for instance, I desire to know whether or not he has introduced it into the commerce of the United States.

Mr. WILLIAMS. Oh, undoubtedly.
Mr. BRANDEGEE. I am not so sure about it.
Mr. WILLIAMS. This is the language of the existing law, and under the existing law that has been construed to be the

Mr. BRANDEGEE. If the Senator is positive that the mere entering of the cargo through the customhouse is entering it into the commerce of the United States, I have nothing further to say.

Mr. WILLIAMS. That raises another point. The Senator a moment ago said, "if it went into a bonded warehouse."

Mr. BRANDEGEE. I said that for one instance. That is

not the entire case, however.

Mr. WILLIAMS. This sort of a case might happen, and it would not be entering it into commerce: The Senator might be in New York, for example, and I might be a German merchant who had been dealing with him, and I might undertake to ship him certain goods on trial, or trusting to him to take them, or otherwise, and he might refuse to take them. He might refuse to have anything to do with them. He might leave them there to be sent back or to be sold; or he might discover that the goods had been undervalued in a fraudulent manner, and he might not want to be connected with the transaction.

Mr. BRANDEGEE. Why, yes; but this paragraph provides that if the consignor shall fraudulently enter the goods into the commerce of the United States, a certain penalty shall apply. Suppose the consignor fraudulently enters the goods through the customhouse?

Mr. WILLIAMS. And suppose the consignee refuses to take them?

Mr. BRANDEGEE. Yes.

Mr. WILLIAMS. Then they are not entered into the commerce of the United States.

Mr. BRANDEGEE. Very well.

Mr. WILLIAMS. They are subject to forfeiture and sale, however.

Mr. BRANDEGEE. Ought not somebody to be punished for

the fraudulent entry?

Mr. WILLIAMS. You can not punish the consignor, because he is a foreigner, and you have no jurisdiction over him. You ought not to punish the consignee for a thing of which he is guiltless; but you do punish the consignor indirectly, because you forfeit and sell the goods.

Mr. BRANDEGEE. If the consigned agoods, it seems to me he ought to be punished. This refers to the Mr. BRANDEGEE. If the consignee fraudulently enters the

consignor, not to the consignee, however.

Mr. BRANDEGEE. This refers to both of them, Mr. Presi-It refers to either the consignor or the seller or the owner or the importer or the consignee or the agent-or either of them, I suppose-or other person or persons. It refers to

everybody who has anything to do with the fraud.

Mr. WILLIAMS. Yes; I understand that, if the Senator pleases; but it refers to them at different times. The consignor has committed a fraud with the shipment of the goods and their landing at the port. The consignee has not become particeps criminis until he accepts the goods-until he makes himself a party to the transaction by putting them into the commerce of the country—that is, by accepting them and paying the duty. Why should he be left free not to pay it and let

Mr. BRANDEGEE. Suppose the importer imports a large amount of goods for a large structure in this country for his own use and enters them without putting them into the commerce of the country at all; he ought to be punished for the fraud he commits whether he introduces them into the com-

merce of the country or not.

Mr. WILLIAMS. Oh, well, if a man imports a thing for his own use, it enters into the commerce of the country just as

much as if he sold it to somebody else who used it.

Mr. BRANDEGEE. I am not at all satisfied as to that.

Mr. WILLIAMS. 'That is the language of the existing law; it has been administered very successfully, and the importer has not had much more chance than a one-legged man at a kicking match.

Mr. BRANDEGEE. The importer is getting his chance pretty

well under this bill, I think.

Mr. WILLIAMS. He has not hitherto had it, and this is the

Mr. SUTHERLAND. Mr. President, I suggest to the Senator from Mississippi that for the sake of the grammatical integrity of the provision it would be better to transpose the phrase "for the purpose of this paragraph" to follow the word "deemed" in line 10 on page 222. It reads:

shall be deemed to be an attempt to enter such merchandise, for the purposes of this paragraph.

Of course the Senator does not mean that.

Mr. WILLIAMS. What is the suggestion of the Senator?

Mr. SUTHERLAND. My suggestion is that the phrase ought to follow the word "deemed," so as to read, "shall be deemed, for the purposes of this paragraph, to be an attempt to enter such merchandise."

Mr. WILLIAMS. I think that would do no harm, and it

would do some good.

The VICE PRESIDENT. The amendment to the amendment

The Secretary. In the committee amendment, line 9, transpose the words "for the purposes of this paragraph" so that they shall follow the word "deemed," in line 10.

The amendment to the amendment was agreed to

Mr. ROOT. Mr. President, I would like to inquire of the Senator from Mississippi somewhat as to the meaning of this proposed amendment. The provision which is here marked "H," I will say to the Senator from Connecticut [Mr. Brandegee], is a very old provision. It is in the terms of the existing law, and what has been the law for a great many years. It has been very frequently construed by the courts, and it covers not merely the entry of merchandise by means of fraudulent devices, but attempts to enter. Unquestionably, taking goods and put-

ting them into a bonded warehouse, having the entries liquidated, as they would have to be, would be an attempt at entry quite irrespective of whether they were ever taken out of the warehouse or not. It covers also the introduction of goods by any fraudulent device whatever. So I should think it would be wise to leave this language exactly as it is, because it has been so long the basis of judicial enforcement.

Mr. WILLIAMS. Of course, when an importer goes up and

settles and lets his goods go into the bonded warehouse, he has rendered himself a party to the transaction. If he accepts the goods in any way he is guilty either of fraud or an attempt to

Mr. ROOT. Now, as to the amendment, I doubt whether that has the precision which a new criminal provision ought to have.

That the arrival within the territorial limits of the United States of any merchandise consigned for sale and remaining the property of the shipper or consignor, and the receipt of a false or fraudulent invoice thereof, or the existence of any other facts—

And so forth, shall be deemed an attempt. The receipt by An attempt by whom?

Mr. WILLIAMS (reading)-

That the arrival within the territorial limits of the United States of any merchandise consigned for sale and remaining the property of the shipper or consignor, and the receipt of a false or fraudulent invoice

Mr. ROOT. A receipt by whom? Mr. WILLIAMS. That is a receipt by the agent, of course, who gets the goods.

Mr. ROOT. Necessarily. Mr. WILLIAMS (reading)-

or the existence of any other facts constituting an attempted fraud, shall be deemed to be an attempt to enter such merchandisc-

Mr. ROOT. Attempted fraud by whom?

Mr. WILLIAMS (reading)

notwithstanding no actual entry has been made or offered.

Mr. ROOT. Does the receipt by me of a paper sent from Europe constitute a fraud on my part, though I make no use of it, though I may not have known of it? I may repudiate it the moment I see the paper. I may see that it is a fraudulent paper and I may not make any use of it. Nevertheless, under this provision I suppose I would be guilty of a fraud. I think that ought to be revised.

Mr. SIMMONS. If the Senator from New York will pardon me, that means a receipt by the consignee or by an agent of the

consignor.

Mr. BRANDEGEE. Why not say so, then?

Mr. SIMMONS. I believe it would be better to make it more specific. I am inclined to think, although I am not quite sure of it, that the mere entrance of these goods into the territorial limits of the United States has been considered and held to be an attempt to introduce the goods into the commerce of the United States.

Mr. ROOT. I do not doubt that, Mr. President.

Mr. SIMMONS. It was to avoid that that we adopted this change of language.

Mr. WILLIAMS. I will state to the Senator from New York that this amendment was drawn up at the department. It seems to me that his criticism is just as to the mere bare receipt, without a voluntary acceptance of it. I think we ought to say there "the acceptance" instead of "the receipt," so as to read "the acceptance of a false or fraudulent invoice."

Mr. ROOT. Now, let me make a suggestion about that, The Treasury Department takes cognizance of the property, ownership, and values of things, and thus in their suggestions which led to this amendment they had in mind circumstances leading to forfeiture. It is all right to denounce certain acts as cause for forfeiture of the goods without any regard to who is responsible for the acts, but when you come to put a provision of that kind into a section which imposes personal liability for crime, then you have got to deal with the person who is responsible for the acts. You can not impute criminal responsibility because of an act unless you have some known participation in it. The trouble with this, I should say, is that it intended to do the two things in the same breath.

Mr. SMOOT. Mr. President, I asked for information in relation to this particular provision from one of the appraisers at New York, and I was informed that the amendment was undoubtedly prompted by the case of the United States v. Twenty-five Packages of Panama Hats (195 Fed. Rep., 438), in which the Government undertook to forfeit the hats. Notwithstanding the Government proved the arrival of the goods in the country and proved the existence of a false and fraudulent consular invoice, the libel of forfeiture was dismissed, because no actual entry or attempt at entry had been made, the court holding that under the terms of subsections 6 and 9 there was no criminal act, and there could be no forfeiture of the goods. That of course was a case under the present law. It is found at One hundred and ninety-fifth Federal Reporter, No. 438, Treasury Decisions 33737. This amendment was prompted no doubt to meet just such a case.

Mr. President, I believe it is proper that a provision of this kind should be in the law, and I have no doubt but that it was

placed there for that purpose.

Mr SIMMONS. I will say to the Senator that the amendment

was drawn by the department.

Mr. SMOOT. I am aware of that.

Mr. SIMMONS. I really think the Senator from New York is right in the suggestion that we ought to define more specifically the term "receipt," so as to show what is meant by that word.

Mr. WILLIAMS. Mr. President, I agree with the Senator from New York that this language is somewhat too indefinite for this sort of a statute. I move to strike out the word "receipt." in line 8, and substitute for it the word "acceptance," and then after the word "thereof" to insert the words "by the consignee or the agent of the consignor."
Mr. SIMMONS. That is right.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. In the committee amendment, page 222, line 8, it is proposed to strike out the word "receipt" and to insert in lieu the word "acceptance," and at the end of the same line, after the word "thereof," to insert "by the consignee or the agent of the consignor."

The amendment to the amendment was agreed to.

Mr. BRISTOW. Mr. President, I have here collected the tables which the junior Senator from North Dakota [Mr. GEONNA] presented during the discussion of the agricultural schedule, which I thought would be very valuable. The series, which he devoted a great deal of time to, I have here collected, and I ask that it may be made a public document.

Mr. SIMMONS. I can not hear the Senator.
Mr. WILLIAMS. What is it?
Mr. BRISTOW. The tables which the junior Senator from North Dakota [Mr. Gronna] prepared during the consideration of the agricultural schedule. I regard them as very valuable. He spent a great deal of time on them. I have had them collected from the RECORD as they appeared, and I ask that they be made a public document.

Mr. SMOOT. It is no part of the Senator's speech, but just

the tables?

Mr. BRISTOW. Just the tables, the statistical information. The VICE PRESIDENT. Is there objection?

Mr. WILLIAMS. I shall not object, but if we make public documents out of all the tables constructed there will be no

Mr. SIMMONS. Does the Senator from Kansas mean the tables the Senator from North Dakota gave in connection with the various and sundry speeches he made upon the agricultural schedule?

Mr. BRISTOW. Yes. Mr. SIMMONS. That would look very much like publishing

portions of the speech of the Senator as a public document.

Mr. BRISTOW. It is not the speech; it is simply the tables.

Mr. SIMMONS. I should have no objection if the Senator from Kansas desired to make a speech himself and present those tables; but it does not seem to me it is quite right to be collecting from the various and sundry speeches of a Senator ex-

tracts and publishing those extracts as a public document.

Mr. BRISTOW. This is not a speech, I will say, and it contains none of the comments of the Senator at all. It is simply statistical information which he collected and submitted at

various times.

Mr. WILLIAMS. Where were the tables collected from?

Mr. BRISTOW. It is stated here. I have written a statement here which I will read to the Senator.

Mr. WILLIAMS. They were collected from public documents already printed?

Mr. BRISTOW. Yes, of course they were; but it required a great deal of labor to collect them.

Mr. SIMMONS. But, Mr. President, I ask the Senator from Kansas, did not the Senator from North Dakota sometimes present a table from the Agricultural Yearbook; and did he not sometimes present tables that had been gotten up for him probably by some expert, and in presenting these various and sundry tables he each time explained to the Senate the source and

authority for his statements?
Mr. BRISTOW. Yes.
Mr. SIMMONS. Now, does the Senator do that in this proposed document?

Mr. BRISTOW. I will read exactly the preliminary comment I made on the tables:

The figures in the following tables, as to imports and exports, are taken from Commerce and Navigation of the United States, 1912. Those as to production in the United States are taken from the 1912 Agricultural Yearbook, except in the following cases:
Where the production figures are for 1909 they are taken from the Abstract of the Tenth Census. The production figures for cotton are from the 1912 Statistical Abstract. The figures as to production in other countries and as to international trade are from the 1912 Agricultural Yearbook.

That is the preliminary statement that is made, and then the tables follow. I think it will be a very valuable document.

Mr. SIMMONS. I should like, at least, to make a temporary objection and examine them. I may withdraw the objection later. Mr. BRISTOW. I am perfectly willing to send them to the

Senator's desk and let him examine them.

Mr. BORAH. Mr. President, just a moment of the Senate's time. Day before yesterday I made some statements with reference to personal property taxation, and those statements were challenged as to accuracy. I do not like to make statements which leave the impression upon my colleagues that I speak without authority or without regard to the accuracy of my statements.

While I am not going to take up the time of the Senate to

read, I want to ask permission to insert in the Record a very brief excerpt from the Massachusetts Commission on Taxation

report in 1897.

Also the New York Special Tax Commission report of 1907. Also a brief excerpt from the speech of ex-President Harrison upon this subject and an excerpt from an article in the Forum of 1897 upon the subject of the inheritance tax.

These are the sources from which I derived my information, and I desire to insert them in the Record, as they bear out

fully the statements which I made.

The VICE PRESIDENT. That may be done without objection. The matter referred to is as follows:

The total valuation of personal property assessed for taxation by the local assessors in 1896 was \$582,319,634. The amount of taxes assessed upon personal property was \$8,398,980.

The total property, real and personal, assessed by the local assessors in 1896 was \$2,622,520,278, of which \$2,040,200,644 was real estate and \$582,319,634 was personal estate. (Massachusetts Commission on Taxation report, 1897, pp. 13, 44.)

First. That the assessed value of all real estate in the State is approximately \$7,000,000,000.

Second. That the assessed value of all personal property is approximately \$800,000,000.

Third. That the market value of all real estate is but slightly in excess of its assessed valuation.

Fourth. That the value of all personal property owned by the citizens of this State is not less than \$25,000,000,000.

Fifth. That the income from investments made in real estate is of much lower percentage than that derived from personal property.

Sixth. That the richer a person grows the less he pays in relation to his property or income.

Seventh. That the owners of personal property have advocated and voted for local improvements without any substantial contribution on their part until the taxes on real estate has become a great burden.

Eighth. Experience has shown that under the present system personal property practically escapes taxation for either local or State purposes. As proof of this the following table showing the amount assessed against well-known multimillionaires for personal property is as follows for the year 1907 in the city of New York:

August Belmont.

\$100,000

ı	August Belmont	S	100, 0	000

п	George Entet		400,	700

(From the report of the special tax commission of the State of New York, 1907, pp. 58, 59.)

In 1870, in the State of New York, the personal property assessed amounted to 22 per cent of the total property assessed. In 1806 the proportion of personal property assessed had fallen to 12.4 per cent.

Comptroller Roberts of that State declares that as a rule this class of property escapes taxation. The taxable value of real estate in the State of New York increased betwen 1870 and 1895, 155 per cent, while the value of taxable personal property, as shown by the assessment, within the same time increased less than 6 per cent.

He states that from two and one-half to three billion dollars of personal property taxable by law in New York escapes taxation every year.

The tax commission of Massachusetts, which reported to the governor a few months ago, shows that the total valuation of real estate in that State for taxation was in 1896, \$2,040,200,644, and the total valuation of personal property assessed in the same year was \$582,319,634, about one-fourth. (From Views of an Ex-President, Benjamin Harrison, pp.

1 think it will be readily conceded that in personal property New York is preportionately the richest of all the States. And yet, in the percentage of its assessed personalty to its assessed realty, it is the lowest among the wealther States. The assessed value of real estate in New York is \$3,952,451,417, and of personal property, \$39,863,305, or 12.% per cent that of the realty. The following table shows that the same difference exists elsewhere, though not in so marked a degree.

State.	Real property.	Personal.	Per cent.
New Jersey Ohio Illinois Indiana Massachusetts Pennsylvania	\$640,188,332	\$134, 210, 000	17-03
	1,215,540,454	528, 977, 260	30
	687,510,306	143, 800, 000	17
	813,820,000	286, 000, 000	26
	1,964,834,106	577, 614, 889	22-73
	2,471,000,000	647, 000, 000	20-76

Some interesting facts may be gathered from a comparison by counties of New York's table of valuations. The proportion which the personalty bears to the realty in the various counties ranges from six-tenths of I per cent in Richmond County to 22½ per cent in New York. The counties which show the largest percentage of personalty in the rural districts are Washington County, with nearly 20 per cent; Livingston, with nearly 14 per cent; and Jefferson and Genesee, with 18 per cent. Kings County, containing the city of Brooklyn, has but 4½ per cent; Monroe County, with the city of Rochester, has but 5½ per cent; Eric County, with the city of Buffalo, has but 6½ per cent; Onondaga County, with the city of Syracuse, has but 6½ per cent. The counties in the first group are largely devoted to farming. Does anyone for a moment suppose that these farming counties have a larger percentage of personal property than the counties in which are located the flourishing cities named?

moment suppose that these farming counties have a larger percentage of personal property than the counties in which are located the flourishing cities named?

The amount of equalized personalty paying taxes to the State of New York in 1896 was \$459,859,526; and, by the report of the superintendent of the banking department, it appears that the capital, surplus, and undivided profits of the banks, trust companies, and safe-deposit companies of the State was \$311,386,372. Under the law these institutions could not escape taxation. They are required to pay on the value of their capital stock; and that includes the surplus and undivided profits. There was then only \$148,473,154 of personal property over and above the banking and trust-company capital which paid taxes in 1806. In 1857 Sanford E. Church, then compireler, felt called upon in his annual report to direct the attention of the legislature to the way in which personal property was escaping taxasion. He reported the amount of personality then paying taxes to the State to be \$319,897,155, of which \$110,000,000 was banking capital, leaving \$209,897,155 of other personal property then paying taxes to the State to be \$319,897,155, of which \$110,000,000 was banking capital, leaving \$209,897,155 of other personal property then paying taxes to the State to be \$319,000,000 more of such personal property paying taxes in 1857 than in 1896. Yet everybody knows that personal property in the State of New York has increased enormously in the last 40 years.

One hundred and seven estates were selected at random in the comp-

years.

One hundred and seven estates were selected at random in the comptroller's office, with the amount of appraised personal property found after death; and the amount of personal property on which the decedent in each case was assessed the year before death was ascertained. The estates were selected from various portions of the State. Of the one hundred and seven estates, 34, ranging from \$54,559 to \$3,319,500, were assessed the year before decedent's death absolutely nothing whatever. The following table gives the figures in the remaining 73 cases:

Amount of ap-	Amount assessed	Amount of appraised personal property after death.	Amount assessed
praised personal	to decedent year		to decedent year
property after death.	before death.		before death.

No names have been given in this table, because these cases are neither singular nor exceptional. The decedents were not sinners above all the men that dwelt in New York, but they simply did that which everybody in the community was doing. These 107 estates disclosed personalty to the appraiser aggregating \$215,132,366; and yet the decedents, the year before their respective deaths, had been assessed in the aggregate on personal property to the amount of \$3.813.412, or on You per cent of the actual value of the property. (From The Forum, 1894.)

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to. The Secretary continued the reading of the bill.

The next amendment of the Committee on Finance was, in subsection I, page 222, line 15, after the word "merchandise," to strike out "but not after either the invoice or the merchandise has come under the observation of the appraiser," so as to read:

That the owner, consignee, or agent of any imported merchandise may, at the time when he shall make entry of such merchandise, make such addition in the entry to or such deduction from the cost or value given in the invoice or pro forma invoice or statement in form of an invoice, which he shall produce with his entry, as in his opinion may raise or lower the same to the actual market value or wholesale price of such merchandise at the time of expertation to the United States in the principal markets of the country from which the same has been imported.

Mr. SMOOT. Mr. President, under the present law the person who makes entry of merchandise has the privilege at the time of entry, but not afterwards, of either adding to the invoice or deducting therefrom in order to make his entry value conform to the prevailing market value. The present law prohibits a change afterwards, and the law to-day uses the words "but not afterwards." The House struck out the phrase "but not afterwards" and substituted for it "but not after either the invoice or the merchandise has come under the observation of the appraiser." The Senate committee struck out this latter phrase but did not restore the former phrase of the present law. The reason for the action of the House in this amendment is given in a report accompanying H. R. 3321-that is, this billas follows:

We recommend substituting for the word "afterwards" the words "after either the invoice or the merchandise has come under the observation of the appraiser."
This is in accord with the present practice of the Treasury Department. It will give the importers a proper length of time within which to correct errors, without extending the privilege to such an extent as to permit them to be "tipped off" by appraising officers as to the values about to be set upon their merchandise.

I believe that if the Senator will reconsider this paragraph and use the words of the law, "but not afterwards," which were stricken out, then there would be no objection whatever to the wording of the paragraph.

I think it happened, Mr. President, in this way: The House struck out the words "but not afterwards" and inserted "but not after either the invoice or the merchandise has come under the observation of the appraiser"; and in striking out that language of the House bill the Senate committee failed to put in the words of the present law, "but not afterwards." I think

that they ought to be inserted.

Mr. WILLIAMS. Mr. President, the present practice has grown up regardless of the phrase to which the Senator refers. The phrase was a phrase of restriction, not a phrase of extension. Notwithstanding the phrase of restriction people have been permitted a reasonable time within which to make corrections in invoices. The language is this:

That the owner, consignee, or agent of any imported merchandise may, at the time when he shall make entry of such merchandise—

Then there follows the totally unnecessary words, "but not afterwards."

When you say that a man may at the time when he shall make entry of such merchandise do certain things, it means that that is the time at which he must do them. Then there were added, as if to strengthen the restriction to that particular time, the words "but not afterwards." Notwithstanding that, there has been given a leeway for honest men to make corrections in invoices where they themselves thought that they had perhaps bought the goods at a lower price than the market value in the foreign countries, which frequently happens. A man may buy bankruptcy merchandise or something of that sort, and it is invoiced to him at the price at which he bought. Then he wants the opportunity to correct it, and that opportunity he has been given under the practice of the department. Certainly adding the words "but not afterwards" will not increase his leeway; it would rather restrict it; and adding the language of the House bill is not permissible at all, for the language of the House bill is-

But not after either the invoice or the merchandise has come under the observation of the appraiser.

The appraiser may see it before the consignee sees it.

Mr. SMOOT. I am not defending the House provision.

Mr. WILLIAMS. I understand that.
Mr. SMOOT. But I do believe that the language of the present law is preferable.

Mr. WILLIAMS. I understand precisely. The Senator wants to restore the words "but not afterwards."

Mr. SMOOT. That is it.

Mr. WILLIAMS. Well, I do not want them there, first, because I think they are unnecessary; secondly, because, if they mean anything, they are still further restrictive of the right of an honest man to correct his invoice. I think this language is all sufficient:

That the owner, consignee, or agent of any imported merchandise may, at the time when he shall make entry of such merchandise, make such addition in the entry to or such deduction from the cost or value given in the invoice—

As he may choose.

Mr. SMOOT. Mr. President, I am not worried about a restriction of the honest importer; it is the dishonest importer that I want restricted; and, if those words are placed in the

law, the dishonest importer will be restricted.

If there is any collusion between an appraiser and a dishonest importer, without those words, it seems to me as the House provision stands, the appraiser could tip off the dishonest importer before the case is to be tried or passed upon. He could then change his invoice, and he would always be sure, through this collusion, of not being caught in trying to import goods at an undervaluation.

Mr. WILLIAMS. Mr. President, when the law prescribes the time at which a thing may be done it is totally unnecessary and superfluous to add the words "but not afterwards," and I think the committee was right.

The PRESIDING OFFICER (Mr. Pomerene in the chair).

The question is on the committee amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 223, line 8, after the word "entry," to insert "by more than 5 per cent," so as to read:

And if the appraised value of any article of imported merchandise subject to an ad valorem duty or to a duty based upon or regulated in any manner by the value thereof shall exceed the value declared in the entry by more than 5 per cent, there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, an additional duty of 1 per cent of the total appraised value thereof for each 1 per cent that such appraised value exceeds the value declared in the entry.

Mr. OLIVER. Mr. President, I should like the Senator from Mississippi to explain the reason for this amendment.

Mr. WILLIAMS. Mr. President, the Senator from Pennsylvania will observe, if he will read the remainder of the paragraph, that it is substantially an antidumping clause. It fixes a heavy penalty upon undervaluations—a penalty of "an additional duty of 1 per cent of the total appraised value thereof for each 1 per cent that such appraised value exceeds the value declared in the entry." It could run up to 70 per cent of the value of the goods in addition to the duty.

We will say, here is a man who is engaged in importing goods and he buys certain goods in Germany, he has an agent over there representing his house for the purpose of purchasing certain goods, or he has an agent in France representing his house, buying wines in one place and something else in another. The natural course is that whatever he pays for those goods is the price that is stated in the invoice. We have established a principle that, regardless of what a man pays for the goods he imports, the duty must be levied upon them in proportion to the market value of the country of export. He may buy his goods cheaply for very many reasons; he may be a very large dealer, or it may be, as I said a moment ago, that somebody over there has made an assignment and is selling the goods very cheaply. To say that a man whose invoice undervalues his goods one half of 1 per cent or one-fourth of 1 per cent is to be regarded as a criminal and visited with this punishment we thought was too much. We found that this leeway of 5 per cent was allowed in import-tax laws of other countries, and we thought it but fair and reasonable not to visit a man with this punishment when he had not varied from the market value of the goods more than 5 per cent, especially as the Government will lose nothing anyway, for it collects its import duties. The invoice is corrected in order that it may correspond with the wholesale market value in the country whence the goods were exported. To go further than that and to punish him with this penal tax, when he has not varied by more than a very small percentage from the wholesale price, which he himself perhaps had no method of ascertaining, struck us was wrong.

Mr. OLIVER. Mr. President, the Senator's explanation fur-

nishes, to my mind at least, a very strong argument against the !

adoption of this provision allowing 5 per cent leeway. In this legislation we are departing very largely from specific duties and turning to ad valorem duties as a basis of taxation on imports. The very men who best know the market value abroad of the commodities in which they deal are the men who, through their agents in foreign countries, ship the goods to themselves in this country, and it seems to me that this amendment is simply equivalent to extending to them an invitation toward undervaluation to the extent of 5 per cent. In adopting the ad valorem principle every safeguard should be thrown around it, so as to provide against undervaluation.

Mr. SIMMONS. Why does the Senator say it is an invitation to undervalue to the extent of 5 per cent? If they undervalue 4 per cent, they would, upon the reassessment by the appraiser, have to pay upon the additional valuation. We simply do not impose the penalty of the additional 1 per cent unless the under-

valuation is 5 per cent-

Mr. OLIVER. I understand all that.

Mr. SIMMONS. But for any undervaluation the importer would not be able to protect himself against the actual valuation as ascertained by the appraiser if that valuation did not

conform to his valuation.

Mr. OLIVER. He will take the chances of a reappraisement, because he understands more about the market value abroad than do the appraisers themselves. I think that, in order to hold these people who understand what they are doing to a rigid compliance with the law, a penalty should be imposed to the extent of any undervaluation, so that if there is any undervaluation to the extent of 1 per cent the importer will have to stand an additional 1 per cent, and if 2 per cent there shall be 2 per cent added, and so on. In that way the importer will be careful to see that if any error is made it is made upon the side of the Government and not upon the side of himself. think, Mr. President, that the provision in the House bill is exactly right and that this leeway should not be allowed.

The PRESIDING OFFICER. The question is on agreeing to

the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph "1," page 223, line 20, after the words "limited to," to strike out "75" and insert "70," so as to read:

to strike out "75" and insert "70," so as to read:

Provided, That the additional duties shall only apply to the particular article or articles in each invoice that are so undervalued and shall not be imposed upon any article upon which the amount of duty imposed by law on account of the appraised value does not exceed the amount of duty that would be imposed if the appraised value did not exceed the entered value, and shall be limited to 70 per cent of the appraised value of such article or articles. Such additional duties shall not be construed to be penal, and shall not be remitted nor payment thereof in any way avoided except in cases arising from a manifest clerical error, nor shall they be refunded in case of exportation of the merchandise, or on any other account, nor shall they be subject to the benefit of drawback.

The amendment was agreed to.

The next amendment was, on page 224, line 3, before the words "per cent," to strike out "75," and insert "70," so as to

Provided. That if the appraised value of any merchandise shall exceed the value declared in the entry by more than 70 per cent, except when arising from a manifest clerical error, such entry shall be held to be presumptively fraudulent, and the collector of customs shall seize such merchandise and proceed as in case of forfeiture for violation of the customs laws, and in any legal proceeding other than a criminal prosecution that may result from such seizure, the undervaluation as shown by the appraisal shall be presumptive evidence of fraud, and the burden of proof shall be on the claimant to rebut the same, and forfeiture shall be adjudged unless he shall rebut such presumption of fraudulent intent by sufficient evidence.

The amendment was agreed to.

The next amendment was, on page 224, line 15, after the word "apply," to insert "only," and in the same line after the words "to the," to strike out "whole of the merchandise or the value thereof in the case or package containing the,"-so as to read:

The forfeiture provided for in this section shall apply only to the particular article or articles in each invoice which are undervalued.

Mr. SMOOT. Mr. President, I do not know that I care in detail to go into what that amendment really means. effect will be that if a case of merchandise is imported into this country and the invoice recites the fact that the case contains a dozen and there should happen to be 15, under this provision the importer could be penalized for the undervaluation on the dozen, but not on the three extra. Of course, I do not know that that is sufficiently important to require a change in the bill. The present law reads in that way, but it has developed in many cases that through an error-not a willful error, but through a mistake-an additional amount has been inclosed in a case over and above what the invoice called for.

Mr. ROOT. Mr. President, I think the House provision is

right.

Mr. SMOOT. So do I. Mr. ROOT. Under the provision reported by the Senate committee I do not think the penalty is severe enough to check attempts at fraud. A man may get caught once in 40 times, and if he loses nothing but the particular article which he is attempting to bring in fraudulently, he will make money out

The provisions in this section of the bill are pretty liberal. There is allowed 5 per cent for an honest difference of opinion between the importers and the appraisers, with no penalty. Then, presumption of fraud does not attach to an undervalua-

tion until it reaches 70 per cent.

Mr. WILLIAMS. That is a conclusive presumption.

Mr. ROOT. No; that is only presumptively fraudulent. Here is the provision:

Provided, That if the appraised value of any merchandise shall exceed the value declared in the entry by more than 70 per cent, except when arising from a manifest cierical error, such entry shall be held to be presumptively frudulent, and the collector of customs shall seize such merchandise and proceed as in case of forfeiture for violation of the metrors layer. the customs laws.

That undervaluation is only presumptive, and the presumption can be rebutted. That is certainly pretty liberal. Five per cent without any penalty and 65 per cent more with only proportional penalties, and no presumption until you get to 70 per cent; and then that can be rebutted. I think that is exceedingly liberal for a revenue statute. I think that the penalty forfeiting only the particular article, instead of forfeiting the package, is too light to secure respect for the law. It will be perceived that the present law and the bill as passed by the House is an intermediate between the heaviest and the by the House is an intermediate between the heaviest and the lightest penalties. The heaviest penalty would be to forfeit the invoice; the lightest possible penalty would be to forfeit one of the articles; and the intermediate penalty would be to forfeit the package in which the article is contained, leaving the rest of the invoice to come through without penalty. I think, if this proposed law is to be respected, the House provision should be retained.

Mr. WILLIAMS. Mr. President, frequently the importer imports an invoice of goods, and the various packages and the various articles are distributed after they are received here. The provision of the House would punish one man for the undervaluation of goods by another. I think we have acted wisely in leaving the law as it is.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment on lines 15 and 16, page 224.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 225, line 1, after the word "value," to insert "unless by direction of the Secretary of the Treasury, after consideration of the particular case, and the Secretary of the Treasury shall accompany his direction with a statement of his conclusion and the reasons for it," so as to read:

The duty shall not, however, be assessed in any case upon an amount less than the entered value, unless by direction of the Secretary of the Treasury, after consideration of the particular case, and the Secretary of the Treasury shall accompany his direction with a statement of his conclusion and the reasons for it.

Mr. SMOOT. Mr. President, that is a new provision, not only to the House bill but to the present law. It gives authority to the Secretary of the Treasury to permit duty to be assessed upon less than the entered value. No administrative provision in any tariff bill before has ever given the Secretary of the Treasury that power. The law heretofore has always directed that in no case shall the duty be assessed at less than the entered value. This statutory direction was based upon the very reasonable assumption that the importer of merchandise knew what he paid for it and what its value was, and that having ascertained its value he was estopped from claiming an assessment of duty on a lower amount than that which he had previously said his goods were worth.

It may be that the law worked an occasional hardship, for example, where a man with more money than brains paid a large sum of money for a curious antique, or something of that kind, but such a case is the only class in which the question

would arise. If, however, this amendment is to be adopted, it should be amended so as to require that the statement of the conclusion and reasons of the Secretary of the Treasury, required by the amendment, shall be published weekly in connection with the other rulings of the Treasury Department and the Board of General Appraisers, provided for in paragraph Q, I believe, of the bill.

Mr. LODGE. Mr. President, may I ask the Senator a ques-

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. SMOOT. I yield.

Mr. LODGE. Assuming, of course, that you have a Secretary of the Treasury who takes proper views of the revenue laws, this provision would encourage importation, would it not?
Mr. SMOOT. Why, certainly. I think that is the object of

the amendment.

Mr. LODGE. Precisely; and the amendment the Senator suggests would hamper the Secretary. I think the Senator must see that the amendment he suggests would hamper the Secretary of the Treasury in enlarging the importations.

Mr. SMOOT. That is why I suggest it.

Mr. WILLIAMS. I have no objection, nor has anybody over here, to amending that language by adding that these statements of the Secretary's conclusions and the reasons for them shall be published. Of course nobody ought ever, in an official capacity, to make a decision and give a statement of his conclusions and reasons for it without being willing to have that statement published.

If the Senator will draw up an amendment to be inserted right after that language, we shall very willingly accept it. We

do not want anything done in the dark.

I should like to ask the Senator while he is on his feet, if he has no objection, why is this amendment offered? Why should the Secretary of the Treasury be allowed to assess a duty lower than the entered value?

Mr. WILLIAMS. Because it is perfectly possible, now and then, that the entered value may be too high. The man who receives the goods does not make the entered value, as the Senator seems to think. The value is made in the invoice by the shipper, the man in the other country.

Mr. SMOOT. That is true.

Mr. WILLIAMS. Frequently goods are sent to agents, and sometimes to people who receive them and afterwards try to

Mr. SMOOT. Has the Senator ever heard of a case in the history of the United States of a foreign manufacturer or a foreign exporter fixing an invoice on which was stated a price greater than the real value of the article?

Mr. WILLIAMS. I never have had any experience at the

customhouse, neither has the Senator.

Mr. SMOOT. My experience has been universally that the invoice price is under the value of the goods, if any difference at all is shown.

Mr. WILLIAMS. If such a case will never arise, then the clause will not operate. That is the answer to that objection. Mr. SMOOT. This is an invitation for it to arise.

Mr. CLARK of Wyoming. Mr. President, I desire to ask a

question for information.

I understand that when these invoices are to come here they are sworn to before the consul of the United States in the particular port from which they are sent. It occurs to me that a sworn invoice should at least bind the man who makes the invoice and sells the goods and the other party to the transaction, who purchases the goods.

I was going to ask the same question that has been asked by the Senator from Utah—why our Treasury should set a price for imports, particularly under an ad valorem system, that is less than the purchaser agreed to pay and the seller agreed to take, as shown by the particular invoice? I ask for

information.

Mr. WILLIAMS. The price never would be less than that, but it might be less than the entered value. It is possible to suppose even a clerical mistake in the entered value. possible to suppose a great many cases where the goods might be entered at a greater price or a different price from that at which they were bought and sold.

The Senator seems to think goods are entered at the prices at which they are bought and sold. They are not. They are entered on the theory which we built up about the market value in the country of export. If the man got the market value in the country of export too high, as he possibly might have done, why not allow the Government itself to correct the error? It is not allowing him to do it, but it is allowing the

Government to do it through the Secretary of the Treasury.

Mr. CLARK of Wyoming. But the Senator, of course, understands that it never would be done except on the application of the owner of the goods.

Mr. WILLIAMS. Oh, of course, I understand that. Mr. CLARK of Wyoming. It occurs to me that it would be an invitation to lower duties.

Mr. WILLIAMS. A man is never pardoned, either, except upon his own application; but that is no reason why he should not be pardoned.

Mr. ROOT. I think the radical vice in this amendment is that it authorizes the Secretary of the Treasury to admit goods upon the payment of a duty on a basis other than that fixed by

In the statute we prescribe with great care and particularity the basis upon which all imports shall be taxed. We say that the duties shall be assessed upon the foreign market value; we provide various ways for ascertaining the foreign market value; we require that the importer shall enter the goods at that foreign market value; and we require the collector to assess the duties upon that value.

This amendment would permit the Secretary of the Treasury to let in goods upon another value, so that instead of exacting duties from all importers on the same basis fixed by law you exact them from importers generally on the basis fixed by law, but you permit the Secretary of the Treasury to impose duties

upon a different basis, fixed by himself.

That opens the door to favoritism. It opens the door to partiality. It opens the door to importunity, to influence, to scan-dal. I do not think we ought to introduce any such element into our revenue laws.

Mr. WILLIAMS. Mr. President, this provision reads:

Provided further, That all additional duties, penalties, or forfeitures applicable to merchandise entered by a duly certified invoice shall be allke applicable to merchandise entered by a pro forma invoice or statement in the form of an invoice, and no forfeiture or disability of any kind incurred under the provisions of this section shall be remitted or mitigated by the Secretary of the Treasury.

The next clause is to be taken in connection with that:

The duty shall not, however, be assessed in any case upon an amount less than the entered value, unless by direction of the Secretary of the Treasury, after consideration of the particular case, and the Secretary of the Treasury shall accompany his direction with a statement of his conclusion and the reasons for it.

The Senator from New York talks about our changing the basis fixed by law. We are not changing it at all. There rests the power, wherever the entered value is less than the foreign wholesale market value, to raise it; and hitherto, wherever it was more, whether by mistake or otherwise, it could not be corrected.

If it shall be corrected in one direction, why shall it not be corrected in the other? The Secretary in correcting it in either event, or the appraiser in correcting it in the first event, corrects it back to the basis fixed by law, to wit, the market value in the country of export.

Senators say this will never happen. If it will never happen, the clause will never operate, so it can not hurt anything.

Mr. ROOT. I do not say it will never happen. I say it will

happen if you have this provision.

Mr. WILLIAMS. I was just challenged by the Senator from

Utah to cite a case.

Mr. SMOOT. I say we never have had—

Mr. WILLIAMS. The Senator—

The PRESIDING OFFICER. Does the Senator from New York yield, and to whom?

Mr. ROOT. I yield to everybody.
Mr. SMOOT. Mr. President, I did not say it would not happen. I said it had not happened, and of course it would happen under the present law.

WILLIAMS. If it shall happen that any goods imported into the United States by clerical error or mistake about the market quotations or otherwise have been entered at a price higher than the wholesale market price in the country of export, the error ought to be corrected, and the power ought to rest with the Government to correct it upon the application of the injured party if the Government chooses to do it. If it will never happen, then this provision will be inoperative. That is the answer to both alternatives,

Mr. ROOT. Mr. President, this provision is not one correlative to the power to raise an entry to make market value. It is not merely a provision to lower an entry to make market value. It is a provision under which the Secretary of the Treasury can depart altogether from the standards fixed by law

for the imposition of duties.

Mr. WILLIAMS. No, Mr. President; there the Senator is losing sight of the other provisions of the bill which fix the

manner in which valuations shall be made.

The other provisions of the bill, which must be taken with this in construing the bill, fix the basis, which is the market value in the country of export. So the Secretary of the Treasury will have no authority under this bill to raise or to lower a duty—that is, no rightful authority; of course if you presume that he is going to act fraudulently, that is a different proposition—except by direction of the bill itself with regard to the manner in which valuations shall be fixed.

Mr. ROOT. But there is no such limitation imposed upon him. The entry has to be the entry of foreign market value. the present statute.

This language authorizes the Secretary of the Treasury to impose the duty upon a lower value than the entered value; that is to say, the foreign market value.

Mr. WILLIAMS. That assertion assumes that the entered value is the foreign market value. That is precisely what we

are trying to cover.

Mr. ROOT. It has to be.

Mr. WILLIAMS. Why, frequently it is not. Sometimes it is below the foreign market value and sometimes it is above it. Suppose I import a pipe of wine from Burgundy or from the Loire country. I am perfectly ignorant of the foreign mar-ket value. All I know about it is what I paid for it. Then I get to the customhouse with it, and the customhouse, advised by the consular agent abroad, says that the foreign market value of this wine is so much, and it is fixed at that. Suppose, being perfectly ignorant, I should pay \$5 a gallon for wine that was worth \$3, and should ascertain the fact, am I to be cut off

from having the Government itself reduce the rate to the foreign market value? The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 225, lines 1 to 5, inclusive.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, on page 228, line 10, after the word "or," to insert "profits not to exceed 8 per cent and," so as to

The actual market value or wholesale price, as defined by law, of any imported merchandise which is consigned for sale in the United States, or which is sold for exportation to the United States, and which is not actually sold or freely offered for sale in usual wholesale quantities in the open market of the country of exportation to all purchasers, shall not in any case be appraised at less than the wholesale price at which such or similar imported merchandise is actually sold or freely offered for sale in usual wholesale quantities in the United States in the open market, due allowance by deduction being made for estimated duties thereon, cost of transportation, insurance and other necessary expenses from the place of shipment to the place of delivery, and a commission not exceeding 6 per cent, if any has been paid or contracted to be paid on consigned goods, or profits not to exceed 8 per cent and a reasonable allowance for general expenses and profits (not to exceed 8 per cent) on purchased goods.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, on page 228, line 11, after the word expenses," to strike out "and profits," so as to read:

A reasonable allowance for general expenses (not to exceed 8 per cent) on purchased goods.

The amendment was agreed to.

The next amendment was, on page 228, line 12, after the word "goods," to strike out "and with reference to the appraisement of all imported merchandise, whether purchased or consigned, the Secretary of the Treasury is authorized and empowered to determine the existence or nonexistence of a foreign market, and such determination shall be binding and conclusive upon all persons and interests."

The amendment was agreed to.

The next amendment was, on page 229, line 15, after the words "a fee of \$1," to strike out the words "with respect to each appraisement objected to," so as to read:

each appraisement objected to," so as to read:

If the collector shall deem the appraisement of any imported merchandise too low, he may, within 60 days thereafter, appeal to reappraisement, which shall be made by one of the general appraisers, or if the importer, owner, agent, or consignee of such merchandise shall deem the appraisement thereof too high, and shall have compiled with the requirements of law with respect to the entry and appraisement of merchandise, he may within 10 days thereafter appeal for reappraisement by giving notice thereof to the collector in writing. Such appeal shall be deemed to be finally abandoned and waived unless within two days from the date of filing thereof the person who filed such notice shall deposit with the collector of customs a fee of \$1.

Mr. ROOT. Mr. President, I wanted to call the attention of the Senator from Mississippi to a provision on this page. The Senator from Indiana [Mr. SHIVELY] is now in charge of the bill. I will ask him to look at the provision in line 7, on page 229.

That is a case, and there is one other very similar, in which the House undertook to change the language of the law and the Senate committee omitted to put it back in accordance with the general policy that was described to us by the Senator from Mississippi yesterday. I think, at all events until after the joint committee provided for has had an opportunity to make its revision and consider the subject, it would be unfortunate to change the law. I will state what the change is and the reason why I think it should not be made without further consideration.

The present law provides that when a general appraiser has fixed the value of goods his finding shall be conclusive against all parties interested unless the importer, owner, consignee, or agent of the merchandise shall be dissatisfied with such decision and shall within five days thereafter give notice, and so on, and seek to review it on appeal. That is contained in section 13 of

Then there is another provision in section 14 of the present statute which relates to the classification of goods by the collector; that is, that his decision is conclusive in fixing what class of goods comes under the statute, unless within 15 days persons interested, if dissatisfied with such decision, file a protest and seek a review.

That is the law as it is now. Anybody having an interest in the importation who is dissatisfied with the decison of the appraiser as to value or with the decision of the collector as to classification can have a review by following the formalities

The House changed the provision about the appraiser, on page 229, by making it read that the decision shall be conclusive unless the owner, agent, or consignee, and so forth, "shall deem the appraisement thereof too high," and, on page 232, there is a similar change in regard to the collector. Instead of giving a right of review from the collector's decision as to classification to anyone who is dissatisfied, the House limits the right of review to the person upon whom the decision imposes "a higher rate of duty or a greater charge, fee, or exaction than he shall claim to be legally payable."

I hope I make clear the precise change to which my remarks are directed. Under the existing law anyone interested in the importation who is dissatisfied with the decision of the appraiser as to value or with the decision of the collector as to classification can secure a review of that decision by the Board of General Appraisers or in proper cases by the courts upon filing his protest and taking the proper proceeding. The House has changed that provision so as to limit the right of review to the person from whom more money is exacted by reason of the decision, and it cuts off the right that now exists of any person interested in the importation to secure a review of an erroneous decision, even though it may not exact more money

from him on that particular importation.

There are two things which can be guarded against under the present law which could not be guarded against if this change were made which the House proposes. They are, first, the effect upon a class of importers of having some appraiser through whimsy or through prejudice or through favoritism or through corruption fix too low a value upon some one man's importations to the detriment of the remainder of the class. There is no way to review that under the present bill as the House has changed it. The Secretary of the Treasury can not control it; the law vests in him no power to control it; and very great injury may result from the uncontrolled exercise of discretion of a subordinate officer acting under prejudice or favoritism or worse. Very great prejudice may result without any power to control it unless it goes so far that you can make it the foundation of criminal proceedings or establish a basis on which to go to the President and ask him to remove an officer. Those are not very practical remedies for men who are

engaged in business and losing money.

The other thing which can be guarded against under the present law and could not be under the law as proposed is the equalization as between imports into different ports. I ask the committee to consider now what effect it would have upon importations if an appraiser and a collector at the port of Philadelphia, we will say, wishing to increase the trade of Philadelphia as against New York and Baltimore, were to put excessively low valuations or low classifications upon a certain kind of goods, while the appraisers and collectors in New York and Baltimore acted upon a different idea of their duty and put high values on or high classifications. Would not all the

trade go to Philadelphia immediately?

Mr. LODGE. Of course it would.

Of course it would. And how are you going to control it? There is no power to control it under the proposed law. It can not be brought before the general appraisers; it can not be brought before the courts; the Secretary of the Treasury can not do anything about it; and by the time a great hubbub is raised and the President is taken away from his proper duties to discipline an officer, that particular kind of business is past and something else has come into the field.

So I say until this joint committee, which I think is very wisely provided for, has had an opportunity to see whether there may be some way to meet this difficulty which is more suitable, the only existing way to meet it ought not to be cut off by a change. I think that the policy of the Senate committee In restoring the administrative provisions of the existing law pending that revision ought to be applied in this particular case, and that would call for an amendment in line 7, on page 229, striking out the word "deem" and inserting the words "be dissatisfied with."

Mr. WILLIAMS. Where is that line and page?
Mr. ROOT. On page 229, line 7, to strike out "deem" and finsert "be dissatisfied with"; and then at the last of that line

and the first of the next strike out the words "too high"; and a similar insertion of the words "of such dissatisfaction" after the word "writing," in line 11. Then a similar change should be made on page 230, line 1, by striking out the words "deem the reappraisement of the merchandise too high" and inserting the words "be dissatisfied with such decision"; and on page 232 strike out, in lines 11 and 12, the words "imposing a higher rate of duty, or a greater charge, fee, or exaction than he shall claim to be legally payable." That is simply restoring the words of the existing statute. I think there is nothing more.

The PRESIDING OFFICER. Does the Chair understand the

Senator from New York to be offering an amendment or simply

as making a suggestion to the committee?

Mr. ROOT. It is a suggestion which I hope the committee

will consider.

Mr. WILLIAMS. Mr. President, a part of the suggestions of the Senator from New York are purely clerical—the suggestion on page 229 to insert "be dissatisfied with" instead of "shall deem," and after the word "writing" the words "of such dissatisfaction." There is, however, a point of cardinal difference between us or between his viewpoint and mine. It has been the habit in this country for very many years of special interests which are protected by the tariff laws to come in and raise questions in connection with importations where they have no personal interest of any description, and with a view of prevailing upon the appraisers and Customs Court to fix a higher rate, not for the purpose of protecting the Treasury but for the purpose of protecting them.

Legislation by hypothesis is about the most dangerous thing that I know of, and the Senator this morning has made several hypotheses that he wants us to legislate upon. He has figured us that the Philadelphia appraiser who would want to make trade for Philadelphia by lowering the entered value, thereby lowering the import duties and thereby increasing the imports into Philadelphia, and somebody in New York, who was more patriotic and did not want to do that, and he has drawn a horrible picture of New York suffering in that way. The plain answer to that is that if that sort of thing ever happened the remedy is in the discharge of the employee who was dishonestly

engaged in doing something else besides his duty.

Mr. LODGE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. WILLIAMS. Yes.

Mr. LODGE. The Senator, with his large experience in cus-

toms matters, must certainly be aware—
Mr. WILLIAMS. I have the largest of any man in the country except the Senator from Utah [Mr. Smoot]

Mr. LODGE. The Senator must be aware that difference of

appraisal is constantly happening at different ports. Mr. WILLIAMS. Absolutely; all the time.

Mr. LODGE. It can not be helped, even if done perfectly honestly; and if there is no means by which you can check too low appraisements and check too high appraisements, you will have all the goods going to the low port.

Mr. WILLIAMS. In that the Senator is mistaken. Mr. LODGE. That has happened in many cases

Mr. WILLIAMS. In that the Senator is mistaken, when I take his observation parallel with the observation made by the Senator from New York in arguing a hypothesis.

Mr. LODGE. It is not a hypothesis; it is a thing that hap-

pens every day.

Mr. WILLIAMS. I understand the thing which the Senator from Massachusetts says happens does happen every day, but the thing which the Senator from New York says might happen has never happened yet, and that is that some appraiser at some particular port would become interested in the business of reducing the charge on imports so as to help the commerce of that port. Thus far that has never happened, and there is no par-ticular reason to assume that it will happen; and if it should happen, the proper remedy is the discharge of the scoundrel who is engaged in that sort of performance of public duty.

Mr. LODGE. That is rather a remote remedy.

Mr. MILLIAMS. Of course it is perfectly palpable that an entry of pineapples may be made at San Francisco to-day, another at New Orleans, and another in New York, and all of them at different entry values. That does happen, and it happens in a different entry values. spite of the fact that we have our consular officers whose business it is to tell us what the wholesale-market price is.

In pursuing this investigation I discovered That is not all. that five ships landed with pineapples in one port of the United States one day, and that the entry values of every one of them were different. It grew out of the fact that some of the pineapples were bought prior to the time of the ripening of the pineapples at a contract price; some of them were bought later at another price; and some still later at still another price.

All of them, as it happened, were delivered in the city of New York upon the same day. Now, it just happened that the appraiser went to work and fixed all those pineapples at a certain price.

Mr. LODGE. I thought pineapples have a specific rate.

Mr. SMOOT. Why should the appraiser do so?

Mr. WILLIAMS. I may be mistaken in saying it was pine-

Mr. LODGE. He may have to make allowance for injured or destroyed fruit, but the rate is specific; he could not have changed the valuation.

Mr. WILLIAMS. It may be I am wrong in saying they were pineapples, but I do remember that that fact occurred in con-

nection with some sort of tropical fruit.

Now, the answer to most of what the Senator from New York has said is that when the Senator from Massachusetts imports goods and they are fixed in their entered value by the appraiser, that does not have anything to do with an importation the Senator from New York makes the next day or that I make the week after. His argument seems to travel upon the ground that after an appraiser has fixed the value somewhere, that controls the question of entered values. It does not. Each case stands upon its own merit.

Now, Mr. President, to come to the point of difference, it is plainly this: The Senator from New York contends that somebody not interested in the lawsuit at all, either upon the side of the revenue or upon the side of the importer, ought to have a right to intervene in order to protect his domestic industry.

Mr. ROOT. No. Mr. President; I do not suggest anything of the kind. I do not want to have it extended to anyone who

is not interested in the importation.

Mr. WILLIAMS. What does the Senator mean by "interested in the importation"? A direct party to the importa-

Mr. ROOT. I meant to substitute a brief expression for the words of the statute. The statute provides that if the importer, owner, consignee, or agent of the merchandise shall be dissatisfied with such decision he shall have this right. No one else has any right, and I do not claim that anyone else should have any right.

Mr. WILLIAMS. But under the existing law, whether they had any right or not, they have been permitted to appear before the appraiser and before the Customs Court and to set up the fact that a different rate ought to prevail. In one case that the Senator, I think, will recall some of our domestic appraisers became alarmed about the sale of bullfrogs. The tariff law had not taken care of bullfrogs' legs and things of that sort. So they made a case and had them declared to be dressed

poultry, subject to a certain duty.

If the existing law is not amended, the existing practice will continue, and the existing practice under the existing law is that a man representing some special interest, who is not financially interested in the slightest degree in the transaction between the Government of the United States and John Smith upon importation No. 1 or 2 or 3 or 5, will appear before the appraisers and will appear in the department and will appear before the Customs Court to make claims that the goods were imported at too small a duty or at too small a value.

Mr. ROOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from New York?

Mr. WILLIAMS. I do.

Mr. ROOT. I do not know that an American appraiser, assuming the case stated by the Senator from Mississippi, has any more special interest than a foreign importer or that there is anything wrong in the court allowing an American who bears a part of the burdens of American taxation to be heard as to the equalization of burdens of taxation, just as under all civilized taxing systems the owners of property can be heard for the purpose of remedying inequalities in the taxation upon their property and upon their neighbors' properties. If my house is taxed more highly than all the other houses in the block, the law provides an opportunity for me to complain of the inequality.

What the Senator from Mississippi is complaining of is that

a practice has grown up under which the American producers who have to sell their goods in competition with imported arti-cles have an opportunity to complain of the inequalities of

taxation by which they are injured.

But that, Mr. President, is not what this provision of law authorizes, for the law as it stands now permits no one except a person with a legal interest in the importation to complain and have a review. The amendment which I suggest, putting back the language of the law, would give no right to anyone except the importer, the consignee, the owner, or an agent of theirs to call for a review.

But, Mr. President, I will waste no more time arguing this question. Nothing that can be said is in the nature of anything but an appeal to the judgment of the committee. If the judgment of the committee is against me there can be no other review but that which is left to the American producer under the amended law.

Mr. WILLIAMS. Mr. President, the phrase "an interest in

the importation" is a pretty broad one.

Mr. ROOT. I said "a legal interest i

a legal interest in the importation." Mr. WILLIAMS. Ah, hitherto it has been construed to mean that any man whose business might be interfered with by an importation at a rate which he thought was too low had a right to come in and question the rate, and they have been coming in and questioning it. This bill fixes it so that nobody shall have anything to do with the lawsuit between the importer and the Government except the importer or his agent or consignee or consignor or somebody directly interested in the particular lawsuit. There is nothing peculiar about it. That is the general law which applies to all lawsuits in the world, and which has always applied to all lawsuits except a lawsuit between the

importer and the Government of the United States.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment on page 229, in lines 15 and 16.

Mr. BRANDEGEE. Mr. President, before the vote is taken I should like to ask the Senator from Mississippi what he under-

should like to ask the Senator from Mississippi what he understands the amendment proposed by the Senator from New York [Mr. Root], on page 229, at line 7, to be.

Mr. WILLIAMS. The amendment was to strike out the word "deem" and to insert the words "be dissatisfied with," and also to strike out the word "too," in line 7, and the word "high," at the beginning of line 8. The first part of the amendment, to insert the words "be dissatisfied with" instead of "deem," is clerical.

Mr. ROOT. It is clerical only by striking out a word which

Mr. ROOT. It is clerical only by striking out a word which means one thing and putting in words which mean an entirely

different thing.

Mr. WILLIAMS. It will, provided the Senator's next amendment is agreed to, but if it is not, it is purely clerical. The second amendment, to strike out the words "too high," goes to

with" were inserted in place of the words "too high," goes to the very gist of the discussion that we have just had.

Mr. BRANDEGEE. Of course, if the words "be dissatisfied with" were inserted in place of the word "deem," and the words "too high" were left in, there would be no sense to the language of the provision, because it would then read:

Or consignee of such merchandise shall be dissatisfied with the appraisement thereof too high.

That would not make sense. Mr. WILLIAMS. We would have to make it read "as too high" in order to make it make sense, so that it would read:

Be dissatisfied with appraisement thereof as too high.

Mr. BRANDEGEE. Assuming that the amendment proposed by the Senator from New York were adopted and that the importer, owner, agent, or consignee of such merchandise could appeal for a reappraisement if he were dissatisfied with the appraisement thereof, how does somebody else get into that appeal of the importer?

Mr. WILLIAMS. I will tell the Senator, and it will be such a simple explanation that it may perhaps astonish him. Every now and then a protected manufacturer in this country himself imports some goods in order to get a test case to fix a rate, or he has some agent of his do it. Then he quarrels with the rate as between him and the Government, not because the Government has charged him too much, but because the Government has charged him too little upon his importation. Several cases of that sort have been tried out. By the way, the Steel Trust imported at one time-I have forgotten what it was they imported-but they did import something, and they made a point upon the rate of duty.

Mr. BRANDEGEE. Well, Mr. President, if an importation is being made at a rate which a review would show was in fact too low, it seems to me that the Government, at least, risks nothing by having a reappraisement of the goods made to see whether they are being brought into the country at too low a rate. I do not myself see how the public or the Government

would stand to lose anything.

Mr. WILLIAMS. The Treasury would stand to lose some-

Mr. BRANDEGEE. The appraisal at an alleged too low rate

could be at least tested or inquired into.

Mr. WILLIAMS. Now, let us suppose the Senator from Connecticut makes an importation. Of course his direct interest in the payment of the duty is to pay as little duty as is just and right; but suppose he makes an importation for the purpose of trying to get a higher rate. Then there comes about a fictitious suit between him and the Government, both of them on the same

side, the Government, of course, anxious to put all the money in the Treasury from the importations that it can, and the Senator, although nominally on the other side of the lawsuit, really is on the side of the Government. He represents a wealthy protected interest, he has good lawyers, and his lawyers and the Government lawyers try that alleged law case. There is no difference between them except that the Senator wants the duty a little bit higher even than that at which the Government is willing to put it if the Government is actuated by proper motives. In other words, this provision as we have worded it here just simply kills such fictitious lawsuits.

No man is allowed to complain in an ordinary court of justice unless he is hurt, unless he is injured, unless he is damaged. Under the practice now the man complains because he is not damaged, because he is not fined, because he is not tollgated, because he is not taxed; and this fictitious suit arises with all the lawyers on both sides really on the same side. We want to abolish that practice.

Mr. BRANDEGEE. Of course, I am perfectly aware that fic-titious suits can be made up and are made up continually, and until they are discovered to be such the influence of a decision

rendered therein may have some effect, but how—
Mr. WILLIAMS. The Senator will admit, if he will pardon
me just one moment, that in an ordinary law case a man is never permitted to come in and complain that he has been bene-

fited by the decision of the court below.

Mr. BRANDEGEE. Well, Mr. President, this seems to be a somewhat peculiar situation. There are two sides to this question. Fictitious suits may be brought by either party to a controversy, and while it might not be a commendable thing for an importer to claim that he had been assessed too low, still, supposing somebody induced some importer to import something which is in fact assessed too low, and that is used as a precedent for the assessment of large quantities of other goods, thereby facilitating large imports of goods at rates too low there is a situation where I think there would be very little remedy; and if the bill as it stands should prevail-

Mr. WILLIAMS. Oh, no; the Senator is mistaken about that. Mr. BRANDEGEE. I can see no objection whatever to the language of the law as it stands and as it is proposed to be restored by the Senator from New York. I should like the yeas and nays on this amendment, Mr. President, when the vote

Mr. WILLIAMS. If the valuation is too low, of course the ordinary law pertaining to undervaluations applies. I shall not make the point of there being no quorum, but let us have a yea and nay vote on this question, so as to get the Senate present.

Mr. SIMMONS. I want to ask the Senator from Connecticut [Mr. Brandegee] a question. Suppose an importer is dissatisfied with the valuation and insists that it is too high, it being to his interest to get the goods in as low as possible, and there is some protected industry which has a contrary interest in it, whose interest is that the merchandise should be valued higher, would the Senator contend that the representative of the protected industry should be permitted to intervene in that suit and set up his controversy as against the controversy of

Mr. BRANDEGEE. Not at all. I do not claim that anybody

should be allowed to intervene.

Mr. SIMMONS. Would the Senator insist that anyone should be permitted in any way whatever to come in and raise a different issue from that which the actual importer raises?

Mr. BRANDEGEE. Not at all.

Mr. SIMMONS. The importer is interested in the lowest possible rate, and his objection is based upon the ground that the rate is too high, but there is somebody else interested in a higher rate. Does the Senator insist that that somebody else, whoever he may be, should come in and set up the claim that the rate is too low, and thereby have a double issue in the same proceeding, one made by a party who was actually in interest and the other made by a party who has an indirect, collateral, and incidental interest?

Mr. BRANDEGEE. Mr. President, I have no objection to the Senator from North Carolina stating a case and then himself demolishing it; but the case he demolishes is not my case.

Mr. SIMMONS. I was simply making an inquiry

Mr. ROOT. That is not my case either. I proposed nothing of the sort.

Mr. SIMMONS. I did not say the Senator from New York

did, but I said the Senator from Connecticut did.

Mr. BRANDEGEE. The Senator from North Carolina entirely misunderstood me. What I say is that the amendment proposed by the Senator from New York [Mr. Root] does not open the door to any intervention by anybody else, except, under

the language of the bill as it stands, to the importer, the owner, the agent, or the consignee of the merchandise. The Senator from New York proposes to fix it so that the importer shall be allowed to have a reappraisement if he is dissatisfied with the appraisement, and I see no objection to having a legal trial about the merits of his dissatisfaction as to whether or not the rate is proper. I ask for the yeas and nays on the amendment if the amendment is to be now offered.

Mr. ROOT. Mr. President, then I will offer the amendment, so that we may have a vote on it. On page 229, line 7, I move to strike out the word "deem" and to insert in lieu thereof the words "be dissatisfied with"; and in lines 7 and 8 to strike out the words "too high." That is all one amendment.

Before the vote is taken let me say—the Senator from Mississippi [Mr. Williams] has spoken about a fictitious suit—that I think it would be fairer to contemplate the possibility of the bringing of a test suit in order to determine the fact, which may be of vital interest to a great number of business concerns, as to the true, market value of a particular line of goods.

Mr. WILLIAMS. Does not the Senator from New York

admit that the test suit brought by a party not really a party

in interest is a fictitious suit?

Mr. ROOT. No; the test suit would be by a party in interest, because it would be by the party who actually imports the

Mr. WILLIAMS. Ah! In that case, then, does not the Senator concede that a lawsuit brought for the purpose of making the Government make a man pay more money than he otherwise would have to pay is a fictitious suit?

Mr. ROOT. No; I do not.
Mr. WILLIAMS. Well, I do.
Mr. ROOT. I think a test suit, properly brought for the purpose of having the value of a particular line of goods in which the complainant proposed to trade properly established-

Mr. BRANDEGEE. Or their classification. Mr. ROOT. Or their classification-

Mr. WILLIAMS. I know of no court in Christendom where a man was ever permitted to come in and contend that he had been fined too little and ought to be fined more.

The PRESIDING OFFICER. The Chair is of the opinion that the question on the committee amendment should first be

put, it having been stated.

Mr. BRANDEGEE. Which is the committee amendment? The PRESIDING OFFICER. The committee amendment is to strike out a part of lines 15 and 16. The question is on agreeing to that amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the adoption of the amendment proposed by the Senator from New York [Mr. Root], which the Secretary will state.

The Secretary. On page 229, line 7, after the word "shall," it is proposed to strike out "deem" and insert the words "be dissatisfied with"; and in the same line, after the word "thereof," to strike out the words "too high."

Mr. BRANDEGEE. I have already asked for the yeas and

nays on that amendment.

Mr. ROOT. The yeas and nays have been demanded.

The PRESIDING OFFICER. The year and nays have been demanded. Is there a second?

The yeas and nays were ordered, and the Secretary pro-

ceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the Senator from West Virginia [Mr. Goff]. I transfer that pair to the Senator from Louisiana [Mr. Thornton] and will vote. I vote "nay." I ask that this announcement of the transfer of my pair stand for the day.

Mr. CHILTON (when his name was called). I have a pair

with the junior Senator from Maryland [Mr. Jackson]. In

his absence, I withhold my vote.

Mr. McCUMBER (when Mr. Gronna's name was called). I desire to announce that my colleague [Mr. Gronna] is necessarily absent. He is paired with the junior Senator from Illinois [Mr. Lewis]. I will allow this statement to stand for all votes that may be taken to-day.

Mr. LEWIS (when his name was called). I am paired with

the junior Senator from North Dakota [Mr. GRONNA].

Mr. LODGE (when his name was called). I am paired with the Senator from Georgia [Mr. SMITH]. I transfer that pair to the junior Senator from Illinois [Mr. SHERMAN] and will vote. I vote "vea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. Burton], which I transfer to the Senator from Oklahoma [Mr. Gore],

and vote "nay."

Mr. TILLMAN (when his name was called). I announce my pair with the junior Senator from Wisconsin [Mr. Stephenson] and withhold my vote. I will let this announcement stand for

Mr. JONES (when the name of Mr. Townsend was called) I desire to state that the junior Senator from Michigan [Mr. Townsend] is necessarily absent. He is paired with the Senator from Florida [Mr. BRYAN]. I ask that this announcement stand for the day

Mr. WILLIAMS (when his name was called). 'I wish to inquire if the Senator from Pennsylvania [Mr. Penrose] has

The PRESIDING OFFICER. The Chair is informed that he has not voted.

Mr. WILLIAMS. Then I withhold my vote, as I have a pair with that Senator.

The roll call was concluded.

Mr. GALLINGER.. I have a general pair with the junior Senator from New York [Mr. O'Gorman], which I transfer to the junior Senator from Maine [Mr. Burleigh], and vote "yea."

Mr. SUTHERLAND (after having voted in the affirmative). am informed that the Senator from Arkansas [Mr. Clarke] has not voted. As I have a pair with that Senator, I withdraw

Mr. SMOOT. I desire to announce that the junior Senator from Wisconsin [Mr. Stephenson] and the senior Senator from Delaware [Mr. DU PONT] are detained from the Senate on account of illness

Mr. TILLMAN. I transfer my pair with the Senator from Wisconsin [Mr. Stephenson] to the junior Senator from Mississippi [Mr. VARDAMAN] and vote "nay."

Mr. REED. I will transfer my pair with the Senator from Michigan [Mr. Smith] to the Senator from Nevada [Mr. Pitt-

MAN] and vote "nay."

Mr. BRYAN. I have a pair with the junior Senator from Michigan [Mr. Townsend], which I transfer to the senior Senator from Maryland [Mr. SMITH] and vote "nay."

Mr. REED (after having voted in the negative) ago I transferred my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Nevada [Mr. PITTMAN] under the impression that the Senator from Nevada was not here. I see he has entered the Chamber and voted, and therefore I withdraw my vote.

Mr. CHILTON. I transfer my pair, announced a moment ago with the Senator from Maryland [Mr. Jackson] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote nay."

Mr. GALLINGER. I am requested to announce the following pairs: The Senator from Delaware [Mr. DU PONT] with the Senator from Texas [Mr. CULBERSON]; the Senator from West Virginia [Mr. Goff] with the Senator from Alabama [Mr. BANKHEAD]; and the Senator from Rhode Island [Mr. LIPPITT] with the Senator from Tennessee [Mr. Lea].

The result was announced—yeas 28, nays 36, as follows:

YEAS-28. Kenyon Lodge McLean Nelson Norris Oliver Borah Bradley Brady Brandegee Clark, Wyo. Perkins Poindexter Root Smoot Colt Crawford Cummins Dillingham Warren Weeks Works Bristow Catron Gallinger Jones Page NAYS-36. Pittman Pomerene Ransdell James Johnson Ashurst Simmons Smith, Ariz. Myers Robinson Saulsbury Shafroth Stone Swanson Thomas Cletcher Sheppard Shields Thompson Hollis Overman Tillman Hughes Shively Walsh NOT VOTING-31. Newlands O'Gorman Penrose Reed Sherman Smith, Ga. Smith, Md. Smith, Mich. Stephenson Sterling Sutherland Thornton Townsend Gronna Hitchcock Jackson La Follette Burleigh Burton Clarke, Ark. Culberson du Pont Fall Goff Lewis Lippitt McCumber Vardaman Williams

So Mr. Root's amendment was rejected. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in section 4, subdivision M, page 230, line 13, after the word "merchandise," to strike out "and in so doing may exercise both judicial and inquisitorial functions. In such cases hearings may, in the discretion of the general appraiser or Board of General Appraisers before whom the case is pending, be open and in the

presence of the importer or his attorney and any duly authorized representative of the Government, who may in like discretion examine and cross-examine all witnesses produced" and insert "In such cases the general appraisers and the Board of General Appraisers shall give reasonable notice to the importer and the proper representative of the Government of the time and place of each and every hearing, at which the parties or their attorneys shall have opportunity to introduce evidence and to hear and cross-examine the witnesses for the other party, and to inspect all samples and all documentary evidence or other papers offered. Hearsay evidence and unsworn statements shall not be admitted, but affidavits of persons whose attendance can not be procured may be admitted in the discretion of the general appraiser or Board of General Appraisers"; and on page 231, line 20, after the word "same," to insert "where no party in interest had demanded the inspection of such merchandise or samples," so as to read:

In such case the general appraiser and Board of General Appraisers shall proceed by all reasonable ways and means in their power to ascertain, estimate, and determine the dutiable value of the imported merchandise. In such cases the general appraisers and the Board of General Appraisers shall give reasonable notice to the importer and the proper representative of the Government of the time and place of each and every hearing, at which the parties or their attorneys shall have opportunity to introduce evidence and to hear and cross-examine the witnesses for the other party, and to inspect all samples and all documentary evidence or other papers offered. Hearsay evidence and unsworn statements shall not be admitted, but affidavits of persons whose attendance can not be procured may be admitted in the discretion of the general appraiser or Board of General Appraisers. The decision of the appraiser, or the person acting as such (in case where no objection is made thereto, either by the collector or by the importer, owner, consignee, or agents), or the single general appraiser in case of no appeal, or of the board of three general appraisers, in all reappraisement cases, shall be final and conclusive against all parties and shall not be subject to review in any manner for any cause in any tribunal or court, and the collector or the person acting as such shall ascertain, fix, and liquidate the rate and amount of the duties to be paid on such merchandise, and the dutlable costs and charges thereon, according to law; and no reappraisement or re-reappraisement shall be considered invalid because of the absence of the merchandise or samples thereof before the officer or officers making the same where no party in interest had demanded the inspection of such merchandise or samples.

The amendment was agreed to.

The next amendment was, in subdivision N, page 232, line 18, after the word "thereon," to strike out "Each protest shall be limited to a single article or class of articles, and to a single entry or payment; and issues of classification shall not be joined with other issues in the same protest"; so as to read:

joined with other issues in the same protest"; so as to read:

N. That the decision of the collector as to the rate and amount of duties chargeable upon imported merchandise, or upon merchandise on which duty shall have been assessed, including all dutiable costs and charges, and as to all fees and exactions of whatever character (except duties on tonnage), shall be final and conclusive against all persons interested therein, unless the owner, importer, consignee, or agent of such merchandise, or the person paying such fees, charges, and exactions other than duties, shall, within 30 days after but not before such ascertainment and liquidation of duties, as well in cases of merchandise entered in bond as for consumption, or within 15 days after the payment of such fees, charges, and exactions, if dissatisfied with such decision imposing a higher rate of duty, or a greater charge, fee, or exaction, than he shall claim to be legally payable, file a protest or protests in writing with the collector, setting forth therein distinctly and specifically, and in respect to each entry or payment, the reasons for his objections thereto, and if the merchandise is entered for consumption shall pay the full amount of the duties and charges ascertained to be due thereon. Such protest shall be deemed to be finally abandoned and waived unless within 30 days from the date of filing thereof the person who filed such notice or protest shall have deposited with the collector of customs a fee of \$1 with respect to each protest. Such fee shall be deposited and accounted for as miscellaneous receipts, and in case the protest in connection with which such fee was deposited shall be finally sustained in whole or in part, such fee shall be refunded to the importer, with the duties found to be collected in excess, from the appropriation for the refund to importers of excess of deposits.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, on page 233, line 7, after the word "deposits," to insert: "No agreement for a contingent fee in respect to recovery or refund under protest shall be lawful. Compliance with this provision shall be a condition precedent to the validity of the protest and to any refund thereunder, and a violation of this provision shall be punishable by a fine not exceeding \$500, or imprisonment for not more than 1 year or both."

Mr. BRANDEGEE. Mr, President, does that mean that if anybody makes an agreement for a contingent fee, in the event of a successful protest he is liable to be sent to State's prison for it?

Mr. WILLIAMS.

Mr. WILLIAMS. Yes. Mr. BRANDEGEE. I should think that was a pretty serious

penalty for a mere agreement for a contingent fee.

Mr. WILLIAMS. We want to do away with all this contingent-fee business. It causes endless litigation and has become a sort of petty trade.

Mr. ROOT. I think the amendment is right.

The PRESIDING OFFICER. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 233, line 24, after the word "Appeals," to insert "or in a United States Circuit Court of Appeals," so as to make the paragraph read:

Appeals," so as to make the paragraph read:

Upon such payment of duties, protest, and deposit of protest fee, the collector shall transmit the invoice and all the papers and exhibits connected therewith to the board of nine general appraisers, for due assignment and determination as provided by law; such determination shall be final and conclusive upon all persons interested therein, and the record shall be transmitted to the proper collector or person acting as such, who shall liquidate the entry accordingly, except in cases where an appeal shall be filed in the United States Court of Customs Appeals or in a United States circuit court of appeals within the time and in the manner provided for by law.

WILLIAMS. Mr. President, this is a case where the committee has come to the conclusion that it has made a mistake. I desire to strike out "or in a United States circuit court of appeals"; and I should like to have the Secretary read some letters submitted to the committee on this subject. When we get to page 273 I wish to have a similar change made. I might as well attend to both matters now.

Mr. LODGE. As I understand, the Senator asks that this

amendment shall be disagreed to.

Mr. WILLIAMS. Yes.

The PRESIDING OFFICER. The Chair so understood it.

Mr. WILLIAMS. On page 273, lines 11 to 17, this language

That the circuit courts of appeal of the United States shall have concurrent jurisdiction with the Court of Customs Appeals in all matters within the jurisdiction of the last-named court, but no appeal to the circuit courts of appeal shall be allowed unless the amount in controversy, either in the case appealed or in pending cases involving the same issue, shall exceed \$100.

We put in this provision for concurrent jurisdiction on the part of the circuit court of appeals because the Customs Court, which has the right to meet anywhere, has persisted in meeting here in Washington all the time, and that has resulted in a good deal of discomfort to litigants; that is to say, we thought it had. We had that idea in our minds at the time. About 70 per cent of these cases arise in the port of New York. I never have seen any reason why this court should not hold its sessions in the port of New York, and in fact I thought it ought to do so. The law permits it to do so if it will; but it never has held but one session outside of the city of Washington. My own opinion is that the members of the court have been led to adopt that course by considerations of their own personal comfort, rather than by any consideration for the public interest.

In attempting to correct that condition we thought we would give concurrent jurisdiction to the circuit court of appeals. But after we got to looking into the matter we realized, of course, that this court is altogether an appellate court; and the litigants themselves are not dragged here, although their attorneys are. It is a badge of our tribe—the attorneys' tribe—that, of course, we charge the litigants every time we get a chance to do so for traveling expenses, and so the lawyers do charge

these people for their trips to Washington.

Now, as a matter of fact, very frequently these customs lawyers have to be here anyhow in connection with business before the Treasury Department, and I find upon investigation that the Customs Court has set its cases to suit the convenience of the attorneys. The main idea in our minds at first was that there would be matters over in San Francisco or down in New Orleans that had to come here, but there are very few cases of

In connection with the reconsideration of what we have done, I should like to have read by the Secretary the matter I send up to the desk, except the part I have struck out, which seemed to me to be a little personal toward another party. I should like to have the rest of it read.

I move to strike out-

Mr. GALLINGER. The question will be upon agreeing to the amendment.

Mr. WILLIAMS. I move, first, to strike out the language in lines 24 at d 25, reading "or in a United States circuit court of appeals." Then I move to strike out the language on page 273 which I read a moment ago.

The Senator means to move to disagree to the Mr. ROOT amendment, not to strike out. He can not strike out this part, because the Senate has not yet agreed to insert it.

Mr. GALLINGER. The motion would be upon agreeing to the amendment.

Mr. WILLIAMS. Yes; disagreeing to the Senate amendment. Mr. GALLINGER. If the Senator wishes to have it disagreed to, we will disagree to it on a vote.

Mr. WILLIAMS. The language I wish to disagree to on page

273 is all the language contained in lines 11 to 17, inclusive.

Rather than have the Secretary read the matter I have referred to, I ask that it may be inserted in the RECORD. It is

The PRESIDING OFFICER. In the absence of objection, it will be so ordered.

The matter referred to is as follows:

NOTES ON PROPOSED PROVISIONS OF THE CUSTOMS ADMINISTRATIVE LAW AFFECTING APPELLATE JURISDICTION IN CUSTOMS CASES.

These provisions are two in number; first, on page 233, lines 24 and 25, of the pending Senate act, the words, "or in a United States circuit court of appeals"; and, second, on page 273, the paragraph as follows:

These provisions are two in number; first, on page 233, lines 24 and 25, of the pending Senate act, the words, "or in a United States circuit court of appeals"; and, second, on page 273, the paragraph as follows:

"That the circuit courts of appeal of the United States shall have concurrent jurisdiction with the Court of Customs Appeals in all matters within the jurisdiction of the last-named court, but no appeal to the circuit courts of appeal shall be allowed unless the amount in controversy either in the case appealed or in pending cases involving the same issue shall exceed \$100."

It is further intinated that the court was created to decide questions according to prejudged partisan ideas. The falsity of that statement is demonstrated by an examination of the Congressional Record.

The idea of the Court of Customs Appeals first took form in 1904, when a bill for the same, drafted by Marion De Vries, a Democrat, then a member of the Board of General Appraisers at New York, was introduced in the House of Representatives by Representative Needham, of California, at the request of its author, a legal resident of Mr. Needham's district. It was subsequently introduced in the several Congresses until its final adoption in 1909. When the customs adminstrative features of the Payne-Aldrich tariff act were considered by the Finance Committee, and particularly the provisions creating the Court of Customs Appeals, the whole committee, including the Democrats, participated in the deliberations. These provisions were neither deemed nor treated as partisan legislation. Senator Simmons and Senator Bailey were both members of that committee active in the consideration of the provisions creating the Customs Court. The matter was the referred to a committee consisting of representatives from the Attorney General's office, a representative from the Treasury Department, and representatives from the Board of General Appraisers, whose printer ferred to a committee consisting of representatives from the thoractic and Republican su

precise detail and the necessities for a single tribunal of final authority and prompt decision in such cases. This report will be found printed in the volume of the Congressional Record above stated, pages 4202 to 4225, inclusive.

In brief, the controlling purposes were twofold:

1. The expedition of customs decisions. Under the old practice it was found that the average life of a customs appeal was four and one-half years. That ofttimes it required more than 10 or 12 years to secure ultimate decision in a customs case. For a long list of such eases by title see Congressional Record, page 4205, et seq. Of all classes of litigation in which early final decision is both desirable and necessary, customs cases are the most urgent. The decision not alone affects the particular importation, but definitely determines a disputed question as to the rate or amount of the particular duty on like importations for the entire remaining life of the tariff act. A doubtful provision of the tariff law is not complete nor the rate of duty settled until finally adjudicated by the court of last resort. The law is finally enacted when finally adjudicated. Since the creation of the Court of Customs Appeals the average life of a customs appeal has been reduced from four and one-half to less than one year.

2. Uniformity of decision. Under the old system, as set forth in the report stated, cases coming up from different ports of the country and being decided by different circuit courts and circuit courts of appeal resulted in numerous conflicting decisions between different circuit courts and circuit courts of appeal will be the same was enforced differently in different parts of the country. For a long list of such decisions by title see Congressional Record, page 4214, et seq. The report stated sets forth the title of the cases and numerous instances of this kind. This was and ever will be the result of coordinate final appellate authority in customs cases with judges of conscientious convictions for the districtions are more often

the country.

It is urged, however, and, I am informed, that it is a controlling argument, that litigants at different ports have a right to a hearing at their respective ports. This is true as to the trial of cases but not as to requirements in appellate courts such as is the Court of Customs

as to requirements in appellate courts such as is the Court of Customs Appeals.

Appended hereto, marked "Exhibit A," is a statement of the cases docketed to June, 1913, in the Court of Customs Appeals. It will be found that 80 per cent of these cases arose at the port of New York, and 50 per cent of the remainder at eastern ports. If there is any cogency in this argument it would result in the removal of the Court of Customs Appeals from Washington to New York, but there is no virtue in the argument. It excludes by quiescence the true facts of the situation. Of course every man is entitled to a trial of his case in his vicinage;

but that does not and has never been held to apply to the argument of cases upon appeal in State or Federal courts. The Court of Customs Appeals hears cases solely upon printed records and briefs sent up from the trial tribunal. Oral arguments are afforded by the court when desired. It makes no difference to the party whether he be in Boston or New York or Washington or San Francisco or New Orleans, he submits his evidence before a board of general appraisers at the port whereather resides, if he chooses. He can under the law be present at the trial with his counsel and witnesses. The case on appeal is made up on a printed record on appeal. He does not appear in court on appeal and his presence in court can not have any effect upon his case. I venture the suggestion that under the old system, as would be true under the proposed amendments, not one litigant in a hundred would be present at the argument of his case on appeal to a circuit court of appeals.

It is preposterous, for example, to suppose that an importer at Seattle would go to San Francisco to be present at the argument of his case on appeal. If it is vicinage trial that is desired he has it now, for the Board of General Appraisers affords it: if it is vicinage argument, as the proposed amendments provide, it would be all the proposed amendments provide, it would be all other supreme appellate courts.

The appeals to the Court of Customs Appeals are largely handled by New York City customs attorneys. The important cases throughout the country are usually handled by some of these attorneys. They are more particularly skilled in that line of work and introduce the testimony, prepare briefs, and argue the case before the court. These attorneys always have similar protests and it is to the advantage of the distant attorney that his case be decided upon a record made up in one of the larger cities. In proof of this the records show that from February, 1912, to June, 1913, there were actually argued in the Customs Court 188 appeals. The attorneys appearing

cases.

The requirement is the same as that of the Supreme Court of the United States in exactly the same class of cases, and there is absolutely no hardship worked upon the litigants by having their cases submitted on briefs or by having their cases argued orally in Washington. The reason that the court has not sat outside of the city of Washington is, first, because there is no demand for it; second, there is no reason for it; and thirdly, it means a needless public expense. If it were a nisl prius court taking testimony it would be different, but it is an appellate court and arguments before it might as well be submitted by brief or by attorneys without the presence of the litigant. It is a court of final Federal jurisdiction, and for this reason anything prompting a change in its procedure would for the same reason prompt a change in the proceedings of the Supreme Court of the United States.

States.

But does not the procedure proposed by these amendments lead to the same result? It is proposed to go to the circuit court of appeals and thence to the Supreme Court for final decision. Will the Supreme Court travel about the country when it takes up customs cases? If the argument is sound it should, or the moving purpose of the amend-

the argument is sound it should, or the moving purpose of the amendments be lost.

It is said that this amendment follows a provision relating to the Court of Claims. In part this is true, in part it is not. The provision relating to the Court of Claims affected cases of comparatively small moment. They were confined to cases under \$1,000 in district courts and cases under \$10,000 in circuit courts. (See sec. 2, act of Mar. 3, 1887.) The idea of that act was for the convenience of the litigants in introducing testimony. It affected a nist prius situation wherein parties having a claim must go before the court with their witnesses and prove their cases. It was expressly confined to mainmum cases, whereas this provision relates to cases above a maximum. It was essential to subserve the party litigant in presenting this testimony, but in this case no such purpose is subserved. There are no witnesses here, there is but an oral argument which may well be submitted by brief as orally or through many eminent customs attorneys near at hand.

mitted by brief as orally or through many eminent customs attorneys near at hand.

Indeed, the proposition ignores the essential character of customs cases. In most customs cases of any moment protests arise on the issue at all ports of the country. Whenever a point is made by an attorney at New York or some other port, immediately it is taken up by the attorneys and brokers at all other ports. Sometimes it is urged at one port and sometimes at another, but if the theory is to be carried out in this case the court would have to sit at every port for the hearing in the single issue. Otherwise, but one of several parties to the issue would be benefited. As a matter of fact, most of the evidence is had at New York or one of the larger eastern ports, and the more experienced customs attorneys are at New York; and while the issue arises at all ports the same issue is usually carried to completion at and from the port of New York.

It should be particularly noted that these provisions, while conferring jurisdiction in circuit courts of appeal in custom cases, provide no procedure whereby those appeals are to be taken into those courts and provide no procedure; nor is such otherwise provided by law, whereby they may be reviewed in the Supreme Court of the United States. The language proposed confers jurisdiction upon courts without providing any procedure whatever for the mode of exercise of that jurisdiction or a review of the decisions of the court in such cases. This condition would, therefore, result in constant litigation. When coordinate jurisdiction in claims cases was conferred upon district and circuit courts that act provided (sec. 4) for the procedure controlling in such appeals.

And so in the creation of the United States circuit courts of appeal. When such courts were created and their jurisdiction prescribed and vested in them the act vesting that jurisdiction also prescribed the procedure for the exercise thereof. (See act of Mar. 3, 1891.) So when the customs administrative law previously provided appeals to the circuit courts that act, prior to the creation of this court, prescribed how such appeals were to be taken and how they might be reviewed by circuit courts of appeal and the Supreme Court of the United States. Likewise does the organic act creating this court so provided for or how it should be exercised. If this jurisdiction is to be granted there should be further provision made as to its exercise; otherwise we simply provide a statute of confusion.

The inevitable effect, however, of these provisions would not be that there would be hearings at the different ports of the country, but that the United States Circuit Court of Appeals at New York will be constituted the customs court of appeals of the country. As stated, 80 percent of these appeals arise at that port. The procedure would be more desirable by customs attorneys and brokers for the reason that it would extend such litigation from an average of one year to an average of four and one-half years in each case, as was the case under the old system. The result would further be that more judges would of necessity have to be added to that court, and there would be great delay in final decision in these cases.

When the act of May 27, 1908, passed the House of Representatives it provided that all appeals from the Board of General Appraisers should be taken directly to the United States circuit courts. When it went before the Finance Committee of the Senate for consideration, the judges of that court, learning of this provision, wrote a protest to the Finance Committee against its passage, upon the ground that it would throw the vast bulk of customs cases into that court and would seriously retard if not render impossibl

Hon. Nelson W. Aldeich.

United States Senate, Washington, D. C.

Dear Sir: We have just learned that a bill has been passed by the House of Representatives and is now before the committee of which you are chairman, making certain changes in the procedure touching the review of assessments for duty on imported merchandise.

With one provision of the bill only is this court concerned. Had we known sooner that such legislation was in contemplation we should have furnished your committee and the Committee on Ways and Means of the House with the following information, which would seem to be entitled to consideration before making the particular change in the procedure which is referred to. The bill abolishes appeals from the Board of General Appraisers to the circuit court and from the circuit court to the circuit court of appeals, and substitutes therefor fit appeal direct from the Board of General Appraisers to the circuit court of appeals.

direct from the Board of General Appraisers to the circuit court of appeals.

It would seem that the immediate result of the passage of the bill as now framed would be very greatly to increase the amount of business to be disposed of by the circuit court of appeals. The consequence might very well be that this court would become so congested as to be unable to dispose of its calendar each year. This we consider a most serious matter, because circuit courts of appeal were originally constituted for the express purpose of disposing in each year of all the appeals which might be taken to them.

We offer for your consideration the following figures:

Appeals heard and disposed of.

OCTOBER

1898-1899	157
1899-1900	163
1900-1901	156
1901-1902 1902-1903	143 185
1902-1903	199
1904–1905	234
1905-1906	273
1906-1907	285

When the calendar did not present more than 160 cases to be disposed of the circuit judges were able to hold sessions of three weeks for the hearing thereof with recesses of two weeks each between for the disposition of the same. Since the great increase of the past three years the recesses between sessions, during which the opinions have to be written, have necessarily been reduced to one week each. What the result might be if the present calendar of 285 cases were suddenly increased by adding 200 additional appeals it would be difficult to forecast. we remain, Very respectfully, yours.

E. HENRY LACOMBE, ALFRED C. COXE, H. G. WARD. WALTER C. NOYES.

WALTER C. NOYES.

If the work, then, of that court was too much for additional labor, what would it now be with customs appeals added?

I therefore conclude that there is no sound reason in fact supporting the amendments. If it was desirable or necessary or at all practicable that local hearings be given the arguments, the court stands ready to afford them, but there has been no demand for such, and in the interests of the public revenue and justice to all litigants there is no necessity for them. That this was the view of the Appropriations Committee of the House appears from a letter addressed them on the subject, no sufficient appropriation having been made in the premises. I think their position was correct. See copy of letter, Exhibit B, hereto attached. attached

attached.

The adoption of these amendments will result in 10 courts of final jurisdiction in customs cases or in 2 courts of final jurisdiction in customs cases, to wit, the United States Supreme Court and the Court of Customs Appeals. The United States Supreme Court, of course, will not go to the ports to afford a hearing in customs cases and therefore there would be no betterment by these amendments.

Since the creation of the Court of Customs Appeals the accumulation of customs appeals has been disposed of in the three years of its existence. The court is up to date, and every case ready to be argued, has been argued and submitted and, with the exception of three, been decided. The calendars of all other Federal courts have been cleaned of

these cases. There is no court, either State or Federal, better up in its

these cases. There is no court, either State or Federal, better up in its work.

I am reliably informed that these amendments do not meet the approval of, but are opposed by the Treasury Department, the Attorney General, and the Assistant Attorney General in charge of customs cases. In view of the provision following that is in the Senate act creating a commission to consider and report a complete code of customs administrative laws it is respectfully urged that this most important and far-reaching amendment which will undoubtedly divert all customs appeals from the Court of Customs Appeals be eliminated.

# EXHIBIT B.

WASHINGTON, D. C., May 4, 1912.

Hon, John J. Fitzgerald,
Chairman Committee on Appropriations,
House of Representatives.

House of Representatives.

Dear Sir: In examining the bill making appropriations for legislative, executive, and judicial expenses, Union Calendar No. 216, H. R. 24023. I find on page 136 appropriations for the expenses for this court include the following item:

"For necessary traveling expenses of members of the court and clerk, \$330."

This provision is made in view of the provision of law authorizing the court to hold terms of court at places other than the city of Washington. In submitting the estimate for these provisions, I separated the traveling expenses from the expense for subsistence of members of the court and clerk, which are of course also provided for by law, and the expenses for subsistence appear to have been omitted in the bill as reported.

If we hold one or more terms of court, for instance, in New York, the amount for traveling expenses would clearly be inadequate for the subsistence of the members of the court during a term of any reasonable length.

subsistence of the members of the court during a term of any reasonable length.

I direct your attention to it, thinking perhaps that the omission may have been an oversight or have resulted from misunderstanding. As stated in my estimate furnished the committee, it is by no means certain that we shall have occasion to hold any terms outside of Washington, but as provision is made for it in the organic act, and as conditions might arise which would make it seem necessary, or at least proper, to do so, it was thought that provision for the expenses should be embodied in the appropriation bill.

This letter is not written with a view to any criticism of any decision the committee may have made under that question, but to direct attention to the fact that the item for traveling expenses would be inadequate to enable the court to hold such term or terms of court if in the view of the court it should be deemed wise.

Yours, very truly,

R. M. Montgomery,

Presiding Judge.

R. M. MONTGOMERY, Presiding Judge.

As to the Court of Customs Appeals, I wish to say that at the time the court was constituted there was a pretty full discussion in the Senate as to the place where its principal place of session should be. I think the impression was,

and I know my feeling was very strong, that it was better that the court should sit here than that it should sit in the city of New York. I would rather have the court in the free atmosphere of Washington, where there is no importation to speak of, than to have its members sitting as a subordinate tribunal in the city of New York, surrounded by the attorneys who are piling up these enormous masses of protests, and living and breathing in that atmosphere.

Mr. WILLIAMS. Oh, undoubtedly their sitting here is a sort of discouragement of litigation, because often a man does not care to pay his lawyer's traveling expenses when he may be willing to pay the lawyer himself. But the fatal defect in the amendment which we adopted in committee—and I do not say this in criticism of the committee, but in criticism of myself-consists in the fact that if the Customs Court made decisions and the circuit court of appeals at New York made some, and the circuit court of appeals at New Orleans made some, and the circuit court of appeals at San Francisco made some we would not have a homogeneous line of decisions in connection with customs appeals.

The PRESIDING OFFICER. The question is on disagree-

ing to the committee amendment

Mr. GALLINGER. The question is on agreeing to the committee amendment, Mr. President.

The PRESIDING OFFICER. The question is on agreeing

to the committee amendment on page 233, lines 24 and 25.

The amendment was rejected.

The PRESIDING OFFICER. Does the Chair understand it is desired to have the amendment put which is stated on page 273?

Mr. WILLIAMS. Yes. It is precisely the same subject matter, and I should like to have it considered now.

Mr. SMOOT. Let it come in its regular order.

Mr. ROOT. No; let us dispese of it now

The Secretary. On page 273, the committee proposes to in-

That the circuit courts of appeals of the United States shall have concurrent jurisdiction with the Court of Customs Appeals in all matters within the jurisdiction of the last-named court, but no appeal to the circuit courts of appeals shall be allowed unless the amount in controversy either in the case appealed or in pending cases involving the same issue shall exceed \$100.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. SIMMONS. I understood that the Senator from Mississippi moved to disagree to the amendment.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 234, line 7, after the word "thing," to strike out "which they, or either of them, may deem," so as to read:

O. That the general appraisers, or any-of them, are hereby authorized to administer oaths, and said general appraisers, the boards of general appraisers, the local appraisers, or the collectors, as the case may be, may cite to appear before them, and examine upon oath any owner, importer, agent, consignee, or other person touching any matter or thing material respecting any imported merchandise then under consideration, etc.

Mr. SMOOT. Mr. President, the striking out of the words "which they, or either of them, may deem," refers to the materiality of questions asked by the examining officers. amendment would seem to weaken very much the authority of these officers. Under the present law and the wording of the House bill, a question was material if the general appraiser or the collector or the local appraiser deemed it so. But apparently, under this amendment, the person being examined would have an equal voice with the examining officer in determining whether or not a given question was material.

I believe if you strike out those words, the question will arise hereafter as to what authority the appraiser or the collector or even the local appraiser had in deciding as to what may be a material question. In the event of a disagreement, who is to pass upon this point? I ask that question of the Senator from

Mississippi.

Mr. WILLIAMS. Of course in the first instance, where the appraiser is sitting as a judge, he must be and is the judge of the materiality of any questions presented to him. Therefore it was utterly absurd to say "which they, or either of them, may deem material," in so far as a trial before him was concerned. When the trial goes up from him to the three appraisers, or to the Customs Court, we want the question as to whether or not a thing is material determined as it is in all law cases-not by the lower court merely arbitrarily saying that it is material; but if it is appealed from there, of course whether or not a question that they considered material was really material becomes a question in the court above.

Mr. SMOOT. I should like to ask the Senator another question. Suppose there was an obstinate witness, who declined to answer a question upon the ground that it was immaterial?

Mr. WILLIAMS. And who took an appeal upon that point? Mr. SMOOT. No; he would not necessarily have to take an appeal.

Mr. WILLIAMS. Then he would be subject to be dealt with

summarily, unless he answered.

Mr. SMOOT. Not under this bill.

Mr. WILLIAMS. Oh, yes; there is not in any statute book in the world any language which says that that shall be material which the court in which the proceeding is initiated deems material. It is material before that court, of course, because that court makes all the decisions upon points of evidence.

Mr. SMOOT. That would be the case if it were specifically

stated.

Mr. WILLIAMS. But with this language there, when the case went up there would be no power to review the decision of the lower court as to what was or was not material. That would be material which the lower court had said was material, whether it was really material or not, even in the court above.

Mr. ROOT. Mr. President, this is not a court proceeding.

Mr. SMOOT. It is simply a hearing.

Mr. ROOT. This is not a proceeding inter partes. It is an inquisitorial proceeding. The provision authorizes these appraisers, whose duty it is to ascertain certain facts, to send for the people interested and get information from them. It is not a proceeding in court.

Mr. WILLIAMS. Oh, but still the Senator must admit that the appraiser does act in a judicial capacity when he makes a decision, and unless that decision is appealed from and carried

higher it is final.

Mr. SMOOT. Mr. President, from what the Senator has already said I can see now why the last words of this paragraph were inserted—that is, lines 19 and 20:

And such evidence shall be given consideration in all subsequent proceedings relating to such merchandise.

In other words, the Senator from Mississippi has taken the proceeding before the local appraiser as a court proceeding, whereas it is only a hearing. I quite agree with the Senator from New York that if it is only a hearing the law must specifically state whether or not they shall have the power to determine as to the materiality of a question.

Mr. WILLIAMS. Any hearing which results in mulcting me or any other citizen of a certain amount of money is nec-

essarily judicial as far as the victim is concerned.

SMOOT. The present law specifically gives them that authority, in these words:
Which they, or either of them, may deem.

Meaning the general appraiser or the collector or the local praiser. The House provision had those words in it, but the Senate committee have stricken them out.

Mr. BRISTOW. Mr. President, I should like to make an inquiry of the Senator from Mississippi. As the provision stood before those words were stricken out it gave the appraisers authority to examine into anything which they thought material, did it not?

Mr. WILLIAMS. In the first place, the language which we have stricken out was not in the old law.

Mr. SMOOT. Oh, yes, Mr. President, those very words are in the present law.

WILLIAMS. I do not think so. I may be mistaken about that.

Mr. SMOOT. They are in subsection 15 of the present law. The Senator will find those words in that subsection.

Mr. BRISTOW. Could not the question of materiality here be made a subject of litigation?

Mr. WILLIAMS. Yes; of course.

Mr. BRISTOW. Under the language as it came from the House it could not be?

Mr. WILLIAMS. It could not be,

Mr. BRISTOW. And now it can be? Mr. WILLIAMS. Now it can be, if our amendment striking out the House language is embodied in the bill.

Mr. BRISTOW. Does the Senator think the question as to whether the board of appraisers should inquire into a thing ought to be opened up and made a matter of litigation?

Mr. WILLIAMS. Why, absolutely. I do not know of any provision in any law in the world, on any statute book, that does not make the question of materiality the subject of litigation in the court above when it is appealed from. Of course, practi-cally, it is not a subject of litigation before the appraiser him-self, because, sitting as he does, he determines in the first instance that the thing about which he wants the information is material.

Mr. BRISTOW. Could he not be enjoined from making this inquiry on the ground that it was not material?

Mr. WILLIAMS. I think so. Mr. BRISTOW. Does not the Senator think that would be, or might be, a handicap upon the administration of the law?

Mr. WILLIAMS. Not to any unjust extent. If an appraiser wanted to go too far in the espionage business or the inquisitorial business, there ought to be some power to stop him.

Mr. SMOOT. Here is the present law, subsection 15.

Mr. WILLIAMS. It is not this language by any manner of means

Mr. SMOOT. It says:

Mr. SMOOT. It says:

That the general appraisers, or any of them, are hereby authorized to administer oaths, and said general appraisers, the boards of general appraisers, the local appraisers, or the collectors, as the case may be, may cite to appear before them, and examine upon oath any owner, importer, agent, consignee, or other person touching any matter or thing which they, or either of them, may deem material respecting any imported merchandise, in ascertaining the dutiable value or classification thereof; and they, or either of them, may require the production of any letters, accounts, or invoices relating to said merchandise, and may require such testimony to be reduced to writing, and when so taken it shall be filed in the office of the collector, and preserved for use or reference until the final decision of the collector or said board of appraisers shall be made respecting the valuation or classification of said merchandise, as the case may be.

That is, the language of the law to day.

That is the language of the law to-day.

Mr. WILLIAMS. I was mistaken about that. The Senator is right. I thought the language of the Payne-Aldrich bill differed somewhat from the language of the House. The intent of the two was the same, but I did not think the language was It seems, however, that the language is identical.

Mr. SMOOT. Referring again to what the Senator from Kansas says, I think he is perfectly right. Under the present law it is impossible to take even the testimony before the local appraiser before the board of appraisers; but they have tried under this provision to require that that testimony shall be taken before the board of appraisers by inserting these words:

And such evidence shall be given consideration in all subsequent proceedings relating to such merchandise.

In hearing a classification case, where the question at issue is the rate of duty, the board of appraisers is conducting a regular judicial proceeding, and it follows the rule of evidence; but the rule of evidence is never followed before the local appraisers. Here they are trying to change the law and change the procedure, and are requiring that whatever evidence a local appraiser may have found out in any way shall be taken before the Board of General Appraisers as evidence, and considered as such. The Senator knows that in the very preceding paragraph they have excluded hearsay evidence, which, before the local appraisers, has always been taken under consideration at least, if not received as evidence.

Mr. WILLIAMS. This language is, "such evidence shall be given consideration." That does not mean that it shall be ac-

Mr. BRISTOW. I think to make it possible for an investigating officer to be served with an injunction preventing him from undertaking to get evidence to satisfy himself in an inquiring way is a very serious handicap to put upon his official I think it is a very unfortunate thing to do.

Mr. WILLIAMS. It may be; but it ought to be done, Mr. SIMMONS. Mr. President—

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Does the Senator from Kansas yield to the Senator from North Carolina?

Mr. BRISTOW. I do.

Mr. SIMMONS. I think this change simply makes this provision conform to every known and settled principle of evidence of any court of judicature in this country.

Mr. BRISTOW. But this is not a court.

Mr. SIMMONS. There is no prohibition here upon the appraiser investigating and interrogating the witness as to any matter which is material to the controversy or the issue, whatever it may be. That is the case with every court in this country.

Mr. SMOOT. This is not a court, though.
Mr. SIMMONS. They are permitted to receive in evidence testimony which is material to the issue; but if the court shall receive testimony which it thinks is material, but which afterwards, in a court of appeal, is determined not to be material, it was in error in admitting that testimony.

Under this change the appraiser would have a right to ask any question which he thought material; but when this testimony was taken up for use by the collector, or the appraiser, or the board of appraisers, as the section provides it shall be, if that tribunal should hold that the interrogatory of the lower court was not material to the issue it would not be considered, as we have written it. But if we permit the words that are stricken out to remain in the statute, then the collector, the appraisers, or the board of appraisers for whom the testimony would be taken and who in a subsequent proceeding on appeal would have to consider it, would not be permitted freely to decide whether it was material testimony or not. The question before them would be simply the question of whether or not the appraiser considered it to be material.

We have not interfered here with any question which is material, but we have simply provided that a thing shall not become material when it is not material simply because the appraiser thinks it is material. That is all we have done.

Mr. BRISTOW. But if the Senator will just permit me a moment, I should like to invite the attention of the Senator from North Carolina to the paragraph in the bill we are considering. Let me read it:

That the general appraisers, or any of them, are hereby authorized to administer oaths, and said general appraisers, the boards of general appraisers, the local appraisers, or the collectors, as the case may be, may cite to appear before them, and examine upon oath any owner, importer, agent, consignee, or other person touching any matter or thing material respecting any imported merchandise then under consideration in ascertaining the classification or dutiable value thereof or the rate or amount of duty.

The purpose of the appraisers or collectors is to find out what is the value of these goods that are being imported if they question that a proper value has been placed upon them by the parties in interest. In order to ascertain what is the value, if they have cause to believe that the value is not a proper one, they are given authority under the present law to summon people before them on any point they think is material. Now you change the law by saying that they may summon them upon any material point. The question of materiality, therefore, is a question to be determined. Suppose the witness is called, and the question is asked him by the court, and he says, "That is not material; I decline to answer it," then it becomes a question of litigation at once, does it not?

Mr. SIMMONS. No; if the collector shall decide, notwithstanding the objection of the witness, that it is material, he would have to answer the question.

Mr. BRISTOW. But you take from him the very authority

which the present law gives him.

Mr. SIMMONS. No; we do not take from him that authority, but we provide that if this matter shall become the subject of litigation before any other tribunal, upon appeal or otherwise, if he has forced from the witness an answer on a matter which is not material, then it shall be eliminated.

Mr. WILLIAMS. I suppose the Senator from Kansas has pretty much the same system of courts in his State that we have in ours. There is a lower court and then an intermediate court and then a higher court, by whatever names they are known. Does the Senator know of any statute anywhere which ever said that any court could examine into anything which the court deemed to be material? Is it not always "any matter material to the controversy"?

As a matter of fact, the way it practically works, of course, in the lower courts whatever the court deems material is material until the case gets out of that court, because the court says so, and that determines it. Now, what the Senator wants to do is to keep the question of materiality itself from being litigated.

Mr. BRISTOW. Mr. SIMMONS. That is not so.

If the Senator will pardon me-

Mr. BRISTOW. Yes.

Let me take for an illustration a contro-Mr. SIMMONS. versy in the superior court of any State in the Union. question of the materiality of any testimony that may be offered is a question which the judge must in the first instance decide. If he decides the question of materiality erroneously and upon an appeal he is overruled, the case is considered when it comes back as if that immaterial testimony had not been admitted at That is what we seek to do in this case. Of course the appraiser before whom the witness is subpænaed must necessarily decide, in the first instance, whether a particular matter he wishes to inquire into is material or immaterial. If he decides that it is material, the witness must answer. But that does not conclude the matter, as the Senator will see if he will read further down in the section.

Mr. BRISTOW. If the Senator will pardon me a minute just there, it seems to me, as the Senator says, that the collector in this inquiry which he makes must necessarily decide whether the information he wants is material.

Mr. SIMMONS. Yes, but he must decide it according to legal

He must decide it correctly.

Mr. BRISTOW. But he decides under the present law— Mr. SIMMONS. If he decides it incorrectly, then he does it at his hazard. But if you leave in the words "which he or

either of them may deem material" it will not make any difference whether the question he asks is a material question or not.

Mr. WORKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from California?

Mr. BRISTOW. I do.

Mr. WORKS. It seems to me we are splitting hairs here.

Mr. SIMMONS. I think we are myself.

Mr. WORKS. And we are taking up the time on nonessentials. What difference does it make whether this language is here or not? What right would the examining officer have to ask for or to receive immaterial evidence, if there was no such limitation in the bill? It seems to me it is utterly immaterial whether it is in it or out of it.

Mr. SMOOT. It may be immaterial. Under the bill if this amendment prevails the witness need not answer the question

Mr. WORKS. He would have the same right if this limitation were not in the bill. He would not have to submit to an immaterial examination in any case.

Mr. SMOOT. That would be the case if it were a court, but

this is not a court.

Mr. WORKS. It does not make any difference whether it is court or not.

Mr. SMOOT. In order that the local appraiser may have that power, it must be conferred upon him by statute. The present law confers it on him by the words "which they, or either of them, may deem material." You strike out those words. This is what the law is to-day touching any matter; not whether it is a material question, but the thing itself must

Mr. WORKS. Mr. President, the language in the bill is simply equivalent to saying that they may receive material evidence. I take it that using the language "which seems to them material" does not alter the situation in the least.

Mr. SMOOT. It would not in the case of court.

no question about that.

Mr. WORKS. I do not think it makes any difference, I will say to the Senator from Utah, whether it is a court or some examining officer; the rule is precisely the same.

The PRESIDING OFFICER. The question is on agreeing

to the amendment of the committee.

The amendment was agreed to. The amendment was agreed to.

The next amendment was, on page 234, line 9, after the word "consideration," to strike out "or previously imported"; in line 10, before the word "classification," to strike out "dutiable value or"; in the same line, before the word "thereof," to insert "or dutiable value"; and in line 10, after the word "thereof," to insert "or the rate or amount of duty," so as to read:

O. That the general appraisers, or any of them, are hereby authorized to administer oaths, and said general appraisers, the hoards of general appraisers, the local appraisers, or the collectors, as the case may be, may cite to appear before them and examine upon oath any owner, importer, agent, consignee, or other person touching any matter or thing material respecting any imported merchandise then under consideration in ascertaining the classification or dutiable value thereof or the rate or amount of duty. or the rate or amount of duty.

The amendment was agreed to.

The next amendment was, on page 235, after line 2, to strike out the following:

To be summarily imposed by the collector or chief officer of customs in the customs collection district where the citation issued; and upon the report of such officer to the district court in the judicial district where such citation issued, the amount of such penalty shall be forthwith entered upon the docket of such court against the person so fined, and such entry shall have the full force and effect of a judgment of said court.

The amendment was agreed to.

The next amendment was, on page 236, paragraph Q, line 7, after the word "important," to strike out the words "and of the decisions of each of the general appraisers, and boards of general appraisers, which abstract shall contain" and to insert "to be published either in full, or if full publication shall not be requested by the Secretary or by the board, then by an abstract containing," so as to make the paragraph read:

stract containing," so as to make the paragraph read:

Q. That all decisions of the general appraisers and of the boards of general appraisers respecting values and rates of duty shall be preserved and filed, and shall be open to inspection under proper regulations to be prescribed by the Secretary of the Treasury. All decisions of the general appraisers shall be reported forthwith to the Secretary of the Treasury and to the Board of General Appraisers on duty at the port of New York, and the report to the board shall be accompanied, whenever practicable, by samples of the merchandise in question, and it shall be the duty of the said board, under the direction of the Secretary of the Treasury, to cause an abstract to be made and published of such decisions of the appraisers as they or he may deem important, to be published either in full, or if full publication shall not be requested by the Secretary or by the board, then by an abstract containing a general description of the merchandise in question, a state-

ment of the facts upon which the decision is based, and of the value and rate of duty fixed in each case, with reference, whenever practicable, by number or other designation, to samples deposited in the place of samples at New York, and such abstracts shall be issued from time to time, at least once in each week, for the information of customs officers and the public.

The amendment was agreed to.

The next amendment was, in paragraph T, page 238, line 13, after the word "claimant," to strike out the words "and in all actions or proceedings for the recovery of the value of merchandise imported contrary to any act providing for or regulating the collection of duties on imports or tonnage, the burden of proof shall be upon the defendant," so as to make the paragraph read:

T. That in all suits or informations brought, where any seizure has been made pursuant to any act providing for or regulating the collection of duties on imports or tonnage, if the property is claimed by any person, the burden of proof shall lie upon such claimant: Provided, That probable cause is shown for such prosecution, to be judged of by the court.

The amendment was agreed to.

The next amendment was, on page 238, after line 18, to strike out paragraph U in the following words:

U. That if any person, persons, corporations, or other bodies, selling, shipping, consigning, or manufacturing merchandise exported to the United States shall fail or refuse to submit to the inspection of a duly accredited investigating officer of the United States, when so requested to do, any or all of his books, records, or accounts pertaining to the value or classification of such merchandise, then the Secretary of the Treasury, in his discretion, is authorized while such failure or refusal continues to exclude from entry any and all merchandise sold, shipped, consigned, or manufactured by such person, persons, corporations, or other bodies and imported into the United States.

The amendment was agreed to.

The next amendment was, on page 239, to strike out paragraph V, in the following words:

V. That if any person, persons, corporations or other bodies, engaged in the importation of merchandise into the United States or engaged in dealing with such imported merchandise, shall fall or refuse to submit to the inspection of a duly accredited investigating officer of the United States, upon request so to do from the chief officer of customs at the port where such merchandise is entered, any or all of his books, records, or accounts pertaining to the value or classification of any such imported merchandise, then the Secretary of the Treasury, in his discretion, is authorized, while such failure or refusal continues, to exclude from entry any and all merchandise consigned or shipped, or intended for delivery, to such person, persons, corporations, or other bodies so failing or refusing.

The amendment was agreed to.

The next amendment was, on page 239, to strike out paragrap W, in the following words:

grap W, in the following words:

W. That there shall be established in each of the consulates of the United States a registry of commissionaires or purchasing agents; that no persons shall be permitted to register as such except upon some affirmative showing of his agency by affidavit indicating the scope of such agency, the parties thereto, the duration, the merchandise to which it relates, the terms and conditions of its exercise, and the commissions involved, the truth of each of which affidavits shall be verified by investigation of the consul before registration is permitted; no such registration shall be permitted unless the agency is operative in the open market exclusively and the commissions provided for are the usual and ordinary commissions prevalent in the trade. Each invoice in which an item of commission appears covering merchandise shipped from any consular district where such registry has been established shall have included in the certificate of the consul a statement that the party claiming in the invoice to be the agent of the purchaser appears on the registry of the consulate as such, and in the absence of such certificate no officer shall allow as nonduitable any item of commission appearing on such invoice or claimed on behalf of any importer.

No consular officer shall certify any invoice unless he is satisfied that the person making oath thereto is the person he represents himself to be and that he is a credible person and that the statements made under such oath are true, and he shall thereupon, by his certificate, state that the person is the person he represents himself to be, is a credible person, and he believes the statements made in his oath to be true. No consular officer shall certify to the truth of the values stated in any invoice.

The amendment was agreed to.

The next amendment was, in paragraph X, page 241, line 8, after the word "this," to strike out "Act" and insert "section."

The amendment was agreed to.

The next amendment was, in paragraph Y, page 242, line 3, after the words "per cent," to insert "of the value of the contents of any box, package, or other container, or if in bulk to 10 per cent," so as to read:

Nor shall any allowance be made for damage, but the importers may within 10 days after entry abandon to the United States all or any portion of goods, wares, or merchandise of every description included in any invoice and be relieved from the payment of duties on the portion so abandoned: Provided, That the portion so abandoned shall amount to 10 per cent of the value of the contents of any box, package, or other container, or if in bulk to 10 per cent or more of the total value or quantity of the invoice.

The amendment was agreed to.
The reading of the bill was continued.
The next amendment was, on page 247, after the subhead "Section," to strike out "IV" and insert "V."

The amendment was agreed to.

The next amendment was, in Section V, on page 247, line 10, after the word "rejection," to insert the following additional

The next amendment was, in Section V, on page 247, line 10, after the word "rejection," to insert the following additional proviso:

And provided further, That whenever the President shall ascertain as a fact that any county, dependency, colony, province, or other political subdivision of government imposes any restrictions, either in the way of tariff rates or provisions, trade or other regulations, charges or exactions, or in any other manner, directly or indirectly, upon the importations into or sale in such foreign country of any agricultural, manufactured, or other product of the United States which unduly or unfairly discriminates against the United States or the products thereor, or whenever he shall ascertain as a fact that any such country, or the product of the United States or the products thereor, or whenever he shall ascertain as a fact that any such country, dependency, colony, province, or other political subdivision of government does not accord to the products of the United States reciprocal and equivalent treatment, he shall have the power and it shall be his duty to suspend by proclamation the operation of the provisions of this act relative to the rates of duty to be assessed upon the importation of the following specified articles, or such of them as he may deem just, and to substitute therefor the rates of duty hereinafter prescribed upon such articles when imported directly or indirectly from such country, dependency, colony, province, or other political subdivision of government:

Fish, fresh, smoked, and dried, picled, or otherwise prepared; coffee; indices and articles made wholly or in part of the same; toys; jewelry, precious and semiprecious and imitation precious stones, suitable for use in the manufacture of jewelry; sugars, tank bottoms, sirup of cane julce and concentrated molasses, testing by the polariscope not above 75°; molasses; wool; vegetable oils.

On the issuance of such proclamation and until its revocation there shall be levied, collected, and paid upon all articles c

So as to read:

A. That for the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the President of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: Provided, however, That said trade agreements before becoming operative shall be submitted to the Congress of the United States for ratification or rejection: And provided further, That whenever the President shall ascertain as a fact that any country, dependency, colony, province, or other political subdivision of government imposes any restrictions, etc. restrictions, etc.

Mr. OLIVER. I move to amend the amendment by inserting, on page 248, at the beginning of the line 18, the words "me-

chanically ground wood pulp and paper produced therefrom."

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Pennsylvania to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. McCUMBER. I offer an amendment to the amendment, to be inserted after line 4, on page 250.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 250, after line 4, insert the following proviso:

Provided further, That when such Government, dependency, or sub-division thereof imposes such undue and unfair restrictions against any particular product of the United States, the President may impose a duty upon the same kind of product when imported from such coun-try, dependency, or subdivision equivalent to the duty imposed by such country, dependency, or subdivision upon the product of the United

Mr. McCUMBER. Mr. President, that will need a little explanation. Reducing the provision on pages 247, 248, and 249 to the simplest form of expression, you will find this:

And provided further, That whenever the President shall ascertain as a fact that any country, dependency, colony, province, or other political

subdivision of government imposes any restrictions, either in the way of tariff rates or provisions * * * upon the importations into or sale in such foreign country of any agricultural—

I call especial attention to that word-

Agricultural, manufactured, or other product of the United States which unduly or unfairly discriminates against the United States or the products thereof; or whenever he shall ascertain as a fact that any such country, dependency, colony, province, or other political subdivision of government imposes any restriction or prohibition upon the exportation of any article to the United States which unduly or unfairly discriminates against the United States; or whenever he shall ascertain as a fact that any such country, dependency, colony, province, or other political subdivision of government does not accord to the products of the United States reciprocal and equivalent treatment, he shall have the power and it shall be his duty to suspend by proclamation the operation of the provisions of this act relative to the rates of duty to be assessed upon the importation of the following specified articles, or such of them as he may deem just, and to substitute therefor the rates of duty hereinafter prescribed upon such articles when imported directly or indirectly from such country, dependency, colony, province, or other political subdivision of government.

The provision then proceeds to set out a few articles upon

The provision then proceeds to set out a few articles upon which the President may exercise his judgment in a discriminatory manner upon "fish, pickled or otherwise prepared; coffee; tea; earthen, stone, and china ware; lemons; cheese; wines of all kinds; malt liquors; knitted goods; silk dresses and silk goods; leather gloves; laces and embroideries, of whatever material composed, and articles made wholly or in part of the same; toys; jewelry, precious and semiprecious and imitation precious stones, suitable for use in the manufacture of jewelry; sugars, tank bottoms, sirup," and so forth.

Then the President is to issue a proclamation carrying into effect such provisions as he may make. It then proceeds to determine what the rates of duty shall be upon any one of these

particular articles which it has mentioned.

Mr. President, again I find that everywhere there is this eternal discrimination against agricultural products. specially provided in this bill, and I call the attention of the Senator from North Carolina [Mr. Simmons] to the provision, that if a discrimination is made in any country, either against our agricultural products or our manufactured products, you allow a retaliation in the shape of an increased duty on a few manufactured products. Why should not that include some of the agricultural products? For instance, if Canada discriminates against our meat, the only provision you have here is that we may turn around and discriminate against Canadian molasses.

Has the Senator made a computation of the amount of molasses that would probably be imported from Canada? And, again, if Canada discriminates against our grains, we will punish her by imposing an extra duty upon Canadian lemons, but nothing upon Canadian grain. And, again, if Canada discriminates against the importation of American cattle, we shall punish her by increasing the duties on Canadian coffee.

I should like to have the Senator point out one thing that Canada, for instance, produces and exports that we could levy a duty upon to compensate for any discrimination against any one of our agricultural products. The proposition seems to be everywhere in the bill that no matter how any country treats our agricultural products we shall make no objection, but we will allow their agricultural products in every instance to come

in absolutely free.

The provision which I have asked to be inserted in the bill provides that if Canada discriminates against our meats the President shall have authority to levy a tariff upon Canadian meats equivalent to the Canadian tariff upon our meats. there be any reasonable objection to a provision of that kind? If Canada passes some discriminatory law against the importation of American cattle and horses, this amendment to the amendment would allow the President of the United States to provide that the tariff on the product paid by the Canadian importer should be equivalent to the tariff charged by Canada

against the like import to the United States.

I think that that should apply to manufactures as well as to products of the farm. It is fair, it is equitable in all respects, and I can conceive of no reason why the Democratic Party should object to at least an equal trade between this country and Canada upon our agricultural products. It certainly will not be maintained that it costs more in Canada to produce any of these articles than it costs in the United States, and it must be admitted that, as a rule, it costs more in the United States. We would labor under a disadvantage, even though we had absolute reciprocal relations with Canada upon the products of the two countries; but certainly there can be no reason on earth for discriminating against the American agricultural product and in favor of the Canadian product. I should hope that the Senator would readily agree with this amendment, whereby we can place the American farmer nearer on an equality with the Canadian farmer.

Mr. WILLIAMS. Mr. President, one of the curious things developed by the discussion of this tariff bill is that, whenever the name "Canada" is mentioned it puts my friend, the Senator from North Dakota, into "a fine frenzy." As a matter of fact, this bill carries a countervailing duty upon wheat, flour, semolina, and the other products of wheat. The Senator has challenged somebody to mention anything that Canada produces that we have provided for. Among the provisions in the bill are some in relation to wool, sheep, and all that. Canada undoubtedly produces wool.

Then, the Senator has said that we have not given any of the agricultural implements a place in this bill. In a separate place, where a countervailing duty upon wheat appears, we have given wheat this punitive treatment, we have given sugar in this very clause the same treatment, and we have given wool

in the same clause the same treatment.

I do not suppose over here we care much about how many different things we put on this list. Some few of us, of whom I am one, are of the opinion that there is nothing more absurd than saying that just exactly in proportion as some foreign country is afraid of a so-called invasion of our products we ought to be afraid of an invasion of theirs, and that we ought to regulate our import duties by their import duties, upon the general principle, I suppose, that if they think we can undersell them we ought to think they can undersell us.

If the Senator has an amendment to offer to put some agricultural product upon this list, and will take his choice, I do not suppose there will be any very material objection over here to leaving the President to deal with that product in

this way.

What is the underlying gravamen of the Senator's complaint? It is that Canada can send to the United States cattle and wheat cheaper than we can furnish them, because, if they are to invade us at all they must invade us in that way. They do not come as an armed enemy, bringing these things and giving them to us to eat out of philanthropy; they do not come with arms in one hand and food in the other. We would have nothing to do with such a transaction. If they come with food which we purchase, it would be because we think the food is worth more to us than the money we pay for it. After alarming himself to death about that condition of affairs, that they may invade us with valuable products at a cheap price, the Senator then wants to make the measure of our protection against that invasion the standard that they have fixed against our products. Just in proportion as Canada gets scared to death for fear we can undersell her with our products in her market, the Senator wants us to get scared to death for fear Canada may undersell us with her products in our market.

So far as I am individually concerned, I have never seen much sense in a countervailing duty, unless in general language there was enacted a minimum tariff to be given as a reward to countries which gave our producers minimum taxes upon our exportations to their citizens but the general idea that, because Canada punishes her consumers by taxing valuable things that may come in cheaply to them, we are to turn around and say, "If you do not quit punishing your consumers by taxation, we are going to injure you by punishing our consumers by taxation" never peculiarly appealed to me.

Mr. McCUMBER. Mr. President, I think certainly the Senatory.

tor misunderstands the scope of the amendment when he clings to that argument. This is not a question of equalizing the tariff on each side; it does not apply to cases where Canada may have a higher or a lower tariff than ours; it is directed toward that particular amendment which deals with undue discrimination against any of our products. That is all the amendment is aimed at. If Canada's rate, which may be amendment is aimed at. If Canada's rate, which may be higher than ours, is not an undue discrimination or an improper discrimination against our articles, this would not apply at all. We have got, however, to have some measurement of countervailing duty on this side. Therefore, I thought it was better to take their own duty as the measurement of a countervailing duty rather than to take an ad valorem duty or some such other duty as has been given in the paragraph preceding the amendment.

Mr. WILLIAMS. Now, the Senator says that the object of

This is the way the his amendment is not to equalize duties.

amendment reads:

Provided further, That when such Government, dependency, or subdivision thereof imposes such undue and unfair restrictions against any particular product of the United States, the President may impose a duty upon the same kind of product when imported from such country, dependency, or subdivision equivalent to the duty imposed by such country, dependency, or subdivision upon the product of the United States.

The mere reading of the amendment answers the Senator's argument. Let us say that the United States and Canada are

engaged in raising wheat; that one of them can raise wheat cheaper than the other and sell it cheaper, which as a matter of fact it can. As a matter of fact, one part of the United States will raise wheat cheaper than any part of Canada, and a part of Canada will raise wheat cheaper than any part of the United States except that part. It depends upon the part of Canada and the part of the United States you are talking about. Let us say, however, for the sake of the argument, that Canada can raise wheat cheaper than the United States can raise it. If Canada puts a duty upon wheat, it is for the purpose of protecting, in accord with all the Republican precedents, our wheat producers: it is because she thinks that the United States can undersell her or overproduce her at the same cost. If the United States can undersell Canada as regards wheat, and Canada is right in the position she has taken, then what good would there be in imposing a duty on our side of the border against Canadian wheat? We can already undersell her, if she is right in framing her tariff law, or we can already overproduce her at the same cost of production-one or the other.

What sort of logical connection is there, even from a protectionist standpoint-a pretty hard standpoint for me to take, even for argument-but what sort of connection is there between the duty that Canada from a protective standpoint ought to levy on wheat coming from America and the duty which we ought to levy on wheat coming from Canada?

Mr. SMOOT. Canada may be levying her duty as against Argentina and not against the United States, the same as the United States may be levying a duty against Argentina and not against Canada.

Mr. WILLIAMS. That may be; but I am arguing that point now without regard to Argentina; I am arguing it as between Canada and the United States, for that is a favorite position of my friend, the Senator from North Dakota. Of course, these provisions placed here are intended to apply to the entire world. They do not apply alone to Canada and the United States.

The Senator's amendment is that we shall punish somebody, anybody, anywhere, who is afraid of our competition by levying a duty upon the thing that they are afraid that we will send to them at a lower price than they can sell it for in their own market. The Senator's amendment is that we shall fix an equivalent duty. If, for example, Germany to-morrow should fix a duty on cotton imported from the United States, if the Senator's amendment should be accepted, we would fix a duty on cotton, though we never get any cotton from Germany, because Germany does not raise any.

Mr. McCUMBER. That is wholly untrue. The Senator from Mississippi insists on misinterpreting this amendment.

Mr. WILLIAMS. I did not misinterpret it. I read it. Mr. McCUMBER. Well, Mr. President, let me explain, if the Senator will give me a little time. The amendment would not apply though Germany should levy ten times the duty upon her products that we would levy upon German products. It simply applies to the same cases to which the preceding portion of the section applies, where there is an undue discrimination—not undue in the shape of having a higher or a lower tariff. The other section will not apply to a case where one country has a higher tariff than the other.

Mr. WILLIAMS. That is not the question.
Mr. McCUMBER. Nor would this amendment apply. The only thing is that we shall have some measurement. If the Senator can conceive of a better standard of measurement than that which I have provided to meet a case where there is undue discrimination against our agricultural products, the same as in the case of our manufactured products. I would agree with him upon any specific duty, the same as is provided for in the case of sugar and molasses-that is, so much on sugar and so much on molasses-but I considered that the other standard was

Mr. WILLIAMS. Evidently the Senator must have drawn his amendment very hastily, because he has not considered what it means. So, of course, he must have done it hurriedly. The amendment reads:

Provided further, That when such Government, dependency, or sub-division thereof imposes such undue and unfair restrictions against any particular product of the United States the President may impose a duty upon the same kind of product when imported from such country, dependency, or subdivision equivalent to the duty imposed by such country, dependency, or subdivision upon the product of the United States.

The language speaks for itself. There can not be any dispute about what it means.

Mr. McCUMBER. Mr. President, I do not care to rediscuss the countervailing duty upon wheat and flour, mentioned by the Whenever the Canadian Government wishes to enter flour or wheat from that country into the United States all the Canadian Government has to do is to have a bill introduced in

Parliament fixing the duty at a lower rate. The bill when introduced by the Government takes effect until it is acted upon, so far as it relates to those duties-a method in the Canadian Parliament which certainly does not have any equivalent in any other legislative body, so far as I know. Whenever it would be to her advantage to drop her duty of 12 cents a bushel upon our wheat, as I understand, all she has to do is to have a bill intro-duced into Parliament for that purpose; and, without even passing it, the reductions will be made until that bill is finally acted upon in some way by the Parliament.

The Senator has taken perhaps the worst kind of a case he could have selected to show the trade relations between this Now, let us take a case that will be in country and Canada. point. Suppose that Canada should impose a 20 per cent duty upon cattle imported from any country outside of Great Britain. The fact that we only impose 10 per cent upon cattle would not make her tariff an undue discrimination, therefore my amendment would not apply in that event; but suppose Canada should impose against the importation of American cattle other restrictions that would be unreasonable and unjust, so that we could not export them at all. The Canadian duty might not be 5 per cent; but wholly irrespective of the duty, she might impose restrictions against this country-and that is what my amendment is aimed at-which would prevent the importation of cattle from this particular country. Then we would have the right to say that the duty upon Canadian cattle imported to this country should be equivalent to the duty imposed by Canada upon American cattle. That is all the amendment means.

If the Senator will notice where the amendment comes in, he will see that it relates only to impositions and restrictions outside of the tariff, although there might be a special rate against the United States which would be discriminatory in every

respect.

I mention Canada when I come to discuss the question of agricultural products probably because Canada is our chief competitor. Argentina might, under your free-trade bill, become a strong competitor in some products. She is already exporting an immense quantity of flax to the United States.

The State in which I live produces about one-half of the flax crop of the entire United States, so that every bushel that is imported from Argentina comes in competition with our product. Canada is also a heavy exporter of flaxseed to the United States. I do not suppose that, under any circumstances, the conditions would be such that it would be very profitable for us to export the same products to Canada which Canada sends to the United States. There might be conditions, if the Senator's contention is correct, that it costs just as much to produce in Canada as it does in the United States, under which we might desire to export cattle to some sections of Canada. Well, if we should do that, then we would have the Canadian tariff of, I think, 30 per cent ad valorem, or its equivalent at least, upon our meat products—I think 25 per cent upon cattle and 3 cents a pound upon meat products-and we would not be able to get into the Canadian market at all. If Canada should provide some other restrictions than those of tariff rates, we ought to be in such a position that we could treat the agricultural products the Canadians ship to us the same as we treat those countries which ship to us manufactured products.

It is provided in the amendment reported by the committee that in case any country discriminates against us as to any manufactured product, we may retaliate against her by adding to the tariff against certain articles from that country a given amount, which is specified; but that relates only to manufactured products. Why should it not relate to agricultural products as well? That is all that I am asking for in my amend-

I disagree with the Senator from Mississippi that cattle can be raised as cheaply in this country as in Canada. I know that it can not be done.

Mr. SIMMONS. Where does the Senator find authority in this bill for the statement that the amendment reported by the committee only relates to manufactured products?

How does the Senator arrive at the con-Mr. WILLIAMS. clusion that this provision is confined to manufactured products when the provision reads:

Upon the importations into or sale in such foreign country of any agricultural, manufactured, or other product of the United States.

Mr. McCUMBER. That is, if another country discriminates against our agricultural products we may add a duty to their manufactured products. You specify the things against which you can levy the additional duty.

Mr. WILLIAMS. Fish is not a manufactured product.

Mr. McCUMBER. There is not an agricultural product men-

tioned in the list, with the exception of something that would

not in all probability be exported to this country from any country likely to discriminate against us.

Mr. WILLIAMS. Wool is not a manufactured product; fish is not a manufactured product; the hair of the goat is not a manufactured product; cheese is not a manufactured product.

Mr. McCUMBER. I said there is not mentioned an agricultural product of any country that would be likely to discriminate against this country. You have included wool in the list, and I admit that you have included molasses, if you call that an agricultural product. I would call it a manufactured product after it is in the form of molasses.

Mr. WILLIAMS. We have included cheese.

Mr. McCUMBER. Why have you not included cattle in the Why have you not included poultry and all agricultural

Mr. WILLIAMS. I have just said to the Senator that he can offer to add anything he desires to this list of articles.

Mr. McCUMBER. I am going to do so if my amendment

shall be defeated.

Mr. WILLIAMS. We have no objection to that; but we have an objection to this kind of an amendment, because it goes upon the foolish theory that whatever duty we fix upon the product must be fixed regardless of the condition of the market and must be simply equivalent to the duty the other country levies against us.

Mr. McCUMBER. I think that is as reasonable as saying that if we are punished by any country by reason of a discrimination against our agricultural products we will charge them 2 cents a gallon on molasses, whether they produce molasses or not.

Mr. WILLIAMS. But the rate on molasses is fixed with

some regard to the condition of molasses in the market.

Mr. President-Mr. CLAPP.

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. CLAPP. I understood the Senator from North Dakota

Mr. McCUMBER. I yield the floor to the Senator.

Mr. CLAPP. That is what I understood. I want to say to the Senator from Mississippi [Mr. WILLIAMS] that I appreciate his generosity in offering the Senator from North Dakota [Mr. McCumber] the option of adding some particular item to the list of articles covered by the committee amendment. Will he extend that privilege to all other Senators, so that each one of us can pick out some item that he would like to have covered?

Mr. WILLIAMS. I do not think there would be the slightest objection to putting anything upon this list of things that you choose, provided you accompany it with a sensible instruction to the President as to the rate of duty to be fixed upon it. That rate of duty should be fixed in accordance with the market conditions of importation and exportation concerning the product itself, as well as the conditions of domestic consumption and production.

Mr. CLAPP. I was so much impressed with the generosity of the Senator from Mississippi in offering to allow the Senator from North Dakota the option of picking out one item to be inserted that I wondered if the same privilege would be

extended to other Senators.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota [Mr. McCumber] to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. SMOOT. Mr. President, there is one thing I should like to ask the Senator from Mississippi in connection with the committee amendment on page 248. I read the portion of the amendment to which I refer:

Or whenever he shall ascertain as a fact that any such country, dependency, colony, province, or other political subdivision of government does not accord to the products of the United States reciprocal and equivalent treatment, he shall have the power and it shall be his duty to suspend by proclamation the operation of the provisions of this act relative to the rates of duty to be assessed upon the importation of the following specified articles, or such of them as he may deem just.

Why are the words "or such of them as he may deem just" included? It seems to me that the President should not be given the right to decide as to whether or not a thing is just. If a discrimination against the United States exists, it is his duty to enforce the provision. It reads:

He shall have the power and it shall be his duty to suspend by proclamation—

And so forth. I do not see why the President should say that fresh fish should be dutiable and that smoked fish should be free.

Mr. WILLIAMS. I think I can answer that, and I think I will answer it to the Senator's full satisfaction. We put in the language "or such of them as he may deem just" merely wool coming in from Australia shall pay a duty, but wool

as a matter of comon sense. Suppose, for example, that Newfoundland, as a Province of Canada, was treating us unjustly. It would not do any good for the President to put a duty on sugar to punish Newfoundland. Suppose Cuba was treating us unjustly and discriminating against us. It would not do any good to put a duty on fish coming from Cuba. Suppose that Argentina was treating us unfairly. It would not do any good for us to punish her by putting a duty on fish or sugar. We would probably put it on wool. So, instead of having the President impose the additional duty on all the specified articles when a case of discrimination arises, we left him free to impose a duty on all or such of them as he might deem just.

Mr. SMOOT. What I want to learn is, why should not all of them be named by the President? Why should he be given the right to name one article specified in the amendment and not another? Let the whole list apply whether or not the particular Government exports such goods to this country.

Mr. WILLIAMS. Then, if you increase the list sufficiently,

you will restore the protective system.

Mr. SMOOT. Not at all; I am not asking to have the list increased; I am simply referring to the list that is already made. It seems to me if any country is unduly discriminating against this country that this provision ought to go into effect automatically as soon as the President ascertains that a discrimination exists. It does not apply to all articles, but only those enumerated here, but I believe that it ought to apply to all.

Mr. SIMMONS. I want to say to the Senator that the committee in adopting this provision had no such purpose in view as he seems to think we had. The committee had reference to a situation which often arises in relations between nations. One nation might discriminate unjustly against us in favor of other nations, and we wanted to provide a method by which the President of the United States, representing this Government, might make reprisals as to that nation in order to force it to do

justice to and to deal fairly with us.

We selected a great many articles and we tried to selectwe may not have succeeded-articles that were valuable exportations of various countries of the world; and we give the President authority, in case any one of these countries discriminates against us, to select any of the specified articles which that country might export to us, and, for the purpose of punishing her for her discrimination against us, raise the duty upon that specific article. Now, what good would it do to raise the duty on all of these articles where we were trying to meet the situation of discrimination on the part of a particular

Mr. SMOOT. Let us take a specific case, so that I may

bring it home to the Senator.

Suppose any country, we will say, that raises wool and hair from the Angora goat, such as Australia, should discriminate against us, and the President declared that it had unduly discriminated against the United States. Under this bill the President has the authority to say: "I will not impose the 15 per cent duty on Angora goat hair. That is used in some part of the United States which I do not think ought to be sub-

or the United States which I do not think ought to be subjected to that additional duty, but I will impose it upon the wool of the sheep." Under this bill he has that authority.

Why should he have it? Why should not those words be stricken out? When any country discriminates against the United States, why should it not be penalized by whatever rates are named in this part of the bill and upon all items so

named?

Mr. WILLIAMS. The Senator's illustration is peculiarly unfortunate, because, unless I am misinformed, in that particular case what the President would do if he was sensible would be to impose a duty so as to restrain the importation of the wool and not to impose a duty upon the hair of the Angora goat, because, if I am correctly informed, Australia does not send us any of the hair of the Angora goat, but she does send us wool.

Mr. SMOOT. Of course I used that only as an illustration. The Senator knows perfectly well that other items in this bill can be named-

Mr. SIMMONS. As a sensible thing, now, let us take wool from Australia, for instance.

Mr. SMOOT. There are goats in Australia.

Mr. SIMMONS. Suppose Australia is discriminating against us in an unjust way, and the President wants to bring her to terms, to force her to deal fairly with us. The President has authority to impose a duty on wool, not from all the world, but from Australia.

Mr. SMOOT. That is right.

Mr. SIMMONS. So by his proclamation he declares that

coming in from any other country in the world shall not pay a duty.
Mr. SMOOT. We all understand that.

Mr. SIMMONS. Suppose there is some other product that Australia exports to this country. The President might add that to wool if he wanted to; but, on the other hand, he might wait and see whether Australia would be brought to terms by the imposition of the duty on wool. If she was not brought to terms by that, he might add the duty upon the other exports from Australia to this country, leaving it in the discretion of the President.

Mr. SMOOT. It gives the President the power to pick out

any of the articles named that may in his judgment— Mr. SIMMONS. We are leaving the power in the hands of the President to impose these duties as in his discretion he may think will bring about fair treatment on the part of the discriminating countries. That is the purpose of it.

Mr. SMOOT. The present law and all other retaliatory measures in tariff laws have provided that wherever there has been a discrimination made by any country there was an addition to the rates imposed upon all of the items in the tariff bill.

Mr. SIMMONS. But the Senator loses sight of the fact that the President may impose these duties against the discriminating country-not against the world, but against the discriminating country.
Mr. SMOOT.

Everybody knows that.

Mr. SIMMONS. Let me ask the Senator, as a matter of common sense, what good it would do for him to impose these duties upon all of the things enumerated in this paragraph against Australia, for instance? What good would it do? What would it accomplish toward bringing about the result we have in view

Mr. SMOOT. It would bring about the result a great deal quicker if this duty were imposed upon all the articles named

in the bill.

Mr. SIMMONS. Suppose Australia produces and exports to this country only one of the things enumerated here. What good would it do to impose a retaliatory duty upon a product which Australia does not produce, and does not export, and does not sell to us, and has no interest at all in our duty upon, in bringing Australia to terms?

Mr. SMOOT. If Australia were prevented from exporting to this country all of the articles that are mentioned in the bill, she would very much more quickly yield and remove the dis-

crimination against this country.

Mr. WILLIAMS. Before the Senator takes his seat, I wish to ask him a question. Following up the instance of Australia, suppose Australia did discriminate. Suppose the President put the duty specified here upon the wool of Australia. Does the Senator imagine that putting the specified duty on sugar from Australia would help bring Australia to terms at all? In other words, if the imposition of the duty on wool had not done it, does he think the addition of the duty on sugar would do it?

Mr. SMOOT. No; but there may be other items named that

would.

Mr. WILLIAMS. It happens, however, that there are none in the case of Australia.

Mr. SMOOT. I think that in going through the bill it will be found that there are items that Australia could export to

this country

Mr. LODGE. Mr. President, as this power is to be given to the President under this amendment, I should like to ask the Senator from Mississippi if he does not think it would express the purpose of the amendment better to say "such as he may deem to be applicable "? This is not a question of justice; this is a question of selecting the article that is effective and ap-Mr. WILLIAMS. I should have no objection to putting in the word "applicable." plicable to the case.

Mr. SIMMONS. I think that is a better word.
Mr. WILLIAMS. I should have objection to taking out the word "just," because there are two things involved in it. The two ideas are, such duty as might be applicable to the situation, and also such duty as might be just to our own people. So I would rather have it "just and applicable." Mr. LODGE. "Just and applicable"—I think that would

improve it, if he is to be given the power of selection.

Mr. SIMMONS. I think that is a very valuable suggestion.
Mr. LODGE. I also want to ask the committee, Mr. President, to amend the words "reciprocal and equivalent," in

Mr. SIMMONS. If the Senator will permit me, before he goes on to the other matter, I should like to state that this amendment was drawn by the department.

Mr. SMOOT. That seems to be a universal excuse.

Mr. SIMMONS. Oh, no; I do not mean anything by that except to say that we are not absolutely responsible for the language. I do not think the word "just," by itself, is properly descriptive.

I think "applicable" improves it. Mr. LODGE.

Mr. SIMMONS. I think if our attention had been called to we would have used some other words.

Mr. LODGE. But these words, "reciprocal and equivalent,"

are very broad and somewhat indefinite.

Mr. ROOT. They are in the old law. Mr. LODGE. The Senator from New York suggests that they are taken from the old law, which may well be the case, but it struck me, in looking at them, that they might give rise to a good deal of question.

Mr. WILLIAMS. If the Senator will pardon me an interruption, I think the word "equivalent" there is pretty indefinite, and I do not see what "equivalent treatment" means. I supposed it meant "equal treatment."

Mr. LODGE. For example, take the first article here in the list, "fish": We are to admit fish free under this bill. Canada imposes a duty of 1 cent a pound upon fish and also gives a bounty to her fishermen. If we admit her fish free, and she puts a duty of a cent a pound on our fish, I should not think that was either reciprocal or equivalent. I should think clearly it would be neither reciprocal nor equivalent. I should think clearly it would be neither reciprocal nor equivalent. Yet I have a certain doubt about those words, as to their being rather broad and indefinite. I should think "equal" would be a better word than "equivalent,"

Mr. WILLIAMS. I am clearly of that opinion.

Mr. LODGE. I do not desire to delay the bill, and I merely

offer that as a suggestion. I offer no amendment.

Mr. WILLIAMS. I will offer an amendment in a minute. The word "equivalent," especially when used in connection with "reciprocal," might mean that they gave us a duty or an exemption equal to that which we gave them. What the bill is really seeking is that they shall treat us equally with other nations.

I therefore move, Mr. President, to strike out the word "equivalent," just before the word "treatment," and substitute the word "equal."

Mr. ROOT. Mr. President, I recall that the word "equivalent" was put into the law of 1909 because it was broader than "equal." The idea that was expressed in the discussion upon the framing of the section in the Finance Committee itself was that there might be some country which, though unable to give us equal treatment upon the particular article involved, because of some special relations that she had with some other country, might nevertheless make it up to us by treatment which was equivalent, by a benefit that was equivalent to the injury, so that there would be real reciprocity of treatment, and no reprisals justified. The word was used ex docet.

Mr. SIMMONS. I will ask the Senator why it would not

meet the situation, then, if we were to use the words "equal or

equivalent"?

Mr. ROOT. That would answer perfectly.

Mr. WILLIAMS. All right; let us do that.
Mr. CUMMINS. Mr. President, unlike my friend from Utah,
my objection to this provision is not because it gives the Presi-

dent too much power, but because it gives him too little power.

I think that in order to be effectual a retaliatory provision like this must be very considerably enlarged. You have said that if the President of the United States finds that any country unduly or unfairly discriminates against us, or if he finds that the treatment accorded to us by any country is not equivalent to our treatment of that country, the President may retaliate upon that country by increasing the duties upon certain commodities. The Senator from North Carolina very properly expressed the idea when he said that the President was given this power in order to compel fair treatment or even treatment. If that is true, you must give the President the power to increase the duty on something in which that country is interested.

Suppose the President should find that Canada does not treat our country fairly, or discriminates unfairly against our country: You ought to give him the power to increase the duty on something that Canada wants to export to the United States. That is true of every other country as well. You have so narrowly limited the articles upon which the additional duty may be imposed that many a country can discriminate against the United States and the President will have no power of retaliation. I think you ought to give him much more latitude than you have given here in the way of bringing about justice in our international dealings.

I hope the suggestions that have been made this afternoon will so impress the committee that you will clothe the Executive with the power to do what you really desire him to do, namely to increase the duties upon the commodities or the articles which the offending country desires to export to the United States.

Mr. SIMMONS. I wish to say to the Senator that it was the purpose of the committee to select articles which the various nations with which we have trade are interested in selling to our people. It may be that we have failed to enumerate certain articles that we ought to include in order to accomplish the main purpose that we have in view. As the Senator from Mississippi has indicated, we shall be glad to include additional articles if they are suggested and it appears that they are articles which are imported into this country and upon which we might with advantage place this discriminatory duty in car-

rying out our main purpose.

Mr. CUMMINS. But I do not think it would be necessary to name a specific duty for every article that could be brought into the scheme of retaliation. You can arrange it so that the duty will be increased upon a very large list of articles without

naming the specific duty upon each.

Mr. SIMMONS. The committee desired to avoid any possible constitutional question with regard to the delegation of legislative authority, and the committee felt that if they picked out the articles and specified the duties that might be imposed upon those articles by the President upon the finding of certain facts or the happening of certain contingencies, they would run no risk of complications from a constitutional standpoint.

Mr. CUMMINS. The point I make, however, does not in-

volve the constitutional question. That is already in the bill. It will not be rendered more doubtful by enlarging the list of articles which the President may use in a retaliatory course.

Mr. SIMMONS. I entirely agree with the Senator, if the bill also prescribes the rate of duty and authorizes the President to apply it upon the happening of certain contingencies.

Mr. CUMMINS. Precisely; and that could be very easily done by using a percentage. I agree with the Senator from North Carolina that the President ought not to be required to increase the duty upon every article in the tariff schedules or which might be imported from the offending country. You have already given him the discretion to select from a small class of articles. While there may be some doubt about that, I am not questioning it at this time. But the doubt certainly would not be made more serious if the list of articles were increased and the duties raised by a percentage rather than by

specifically naming them.

Mr. SIMMONS. The Senator will notice that we have prescribed specific rates as to only a few articles—for instance, fish, and so forth, 1 cent per pound; coffee, 3 cents per pound; tea, 10 cents per pound. Then we say:

On the following articles 1½ times the rate specified in section 1 of this act.

So under that we might add as many articles as we wish to

add, because that fixes a rate.

Mr. CUMMINS. That could be very easily increased by including every article in the tariff schedules, and then you would have clothed the President with the power to accomplish your purpose, whereas now he may find it utterly impossible to correct the injustice that may be inflicted upon us by other nations, because in the list of articles which you give there may be none in which the offending country is particularly concerned.

The VICE PRESIDENT. The Chair and the Secretary are in doubt as to whether the Senator from Mississippi offered an amendment or whether he did not offer it.

Mr. SIMMONS. As to what matter, Mr. President?
The VICE PRESIDENT. Page 248, line 9, with reference to the word "equivalent."

Mr. SIMMONS. Yes; his suggestion was that we add the words "equal or," so that it would read, "equal or equivalent." offer that amendment now.

The VICE PRESIDENT. The amendment to the amend-

ment will be stated.

The Secretary. On page 248, line 9, before the word "equiva-lent" it is proposed to insert the words "equal or," so that if amended it will read:

Reciprocal and equal or equivalent treatment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The amendment on line 13 will be stated.

The Secretary. After the word "just," on line 13, page 248, it is proposed to insert the words "and applicable."

Mr. SIMMONS. The Senator from Mississippi also offered that amendment, as I understood. If he did not, I offer it now.

The amendment to the amendment was agreed to.

Mr. JONES. Mr. President, I offer an amendment to the amendment of the committee, which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. In line 3, page 249, after the word "oils," it is proposed to insert the word "lime"; and in line 18, after the word "jewelry," it is proposed to insert the words "on lime, three and one-half times the rate provided in section 1 of this

Mr. JONES. Mr. President, the Senate will remember that when I offered an amendment to the preceding section of the bill I called attention to the fact that the tariff on lime in one of the countries adjoining the United States is  $17\frac{1}{2}$  per cent. The committee in this bill places the rate at 5 per cent. I called attention to the conditions in our section of the country especially, where the lime industry is developed slightly across the border, and they bring the lime into our markets and sell it cheaply and come to our people and say, "Here, now, unless you buy us out we are going to break down the market." In other words, they use the tariff wall that Canada has had against us to break down our own industry. This amendment is to make our rates equivalent to the rates that Canada imposes on lime coming from this country. I hope the chairman of the committee will accept it.

Mr. SIMMONS. Let me see if I understand the Senator. Where does the Senator propose to have his amendment

Mr. JONES. In line 3, page 249, I propose to put in the word "lime" after "oils," making that one of the articles named at the top of page 249.

Mr. SIMMONS. Then where does the Senator propose to in-

sert another amendment?

Mr. JONES. Down in line 18, after the word "jewelry," I propose to insert:

On lime, three and one-half times the rate provided in section 1 of this act.

That makes it 17½ per cent, the same as the Canadian rate. Mr. SIMMONS. Three and a half times what?

Mr. JONES. Three and a half times 5 per cent.

Mr. SIMMONS. Three and a half times the present rate?

Mr. JONES. Yes; three and a half times the rate provided in section 1.

Mr. SIMMONS. Mr. President, I do not feel like consenting to the rate. I have no objection to adding lime and fixing the rate; but I will ask the Senator if he will not offer the amendment and let it go to the committee.

Mr. JONES. That will be entirely satisfactory to me. Mr. SIMMONS. I do not object to including lime, but I do

not care to agree to a certain rate at this time.

Mr. JONES. Very well. I shall be very glad to have the amendment go to the committee.

The VICE PRESIDENT. The amendment offered by the Senator from Washington to the amendment of the committee will be referred to the committee.

The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

Mr. NORRIS. Mr. President, I should like to say to the Senator from North Carolina that at this point in the bill I desire to offer an amendment that covers the Coffee Trust situation. It will take me some time to discuss it. I understand the Senator from North Carolina is anxious to finish this part of the bill this evening. I myself would a little rather not take up the matter to-night. If it is agreeable to the Senator-if he wants to finish these provisions to-night-I should like to pass over that amendment.

Mr. SIMMONS. That is entirely satisfactory to me, and I shall be very glad to have the Senator pursue that course with

reference to it.

The VICE PRESIDENT. The Chair is compelled to announce again that the bill is open to amendment either in Committee of the Whole or after it comes into the Senate.

Mr. NORRIS. Then, I will formally offer the amendment now, so that it may be read. I should like to call the attention of the chairman and the members of the committee to it, and perhaps they can give it some consideration, because I expect to convince them before we get through that they ought to adopt either this amendment or something similar to it.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 250, after line 13, it is proposed to

That whenever the President shall ascertain as a fact that any country, dependency, state, colony, province, or other political subdivision of government is a party to any conspiracy or combination to monopolize and control the trade or commerce between the United States and such foreign country, dependency, state, colony, province, or other political subdivision of government of any of the products of such country, whereby the prices of such products are increased to the consumers of the United States, or has any law, rule, or regulation

legalizing any such combination or conspiracy, or has any law, rule, or regulation valorizing any of the products of such foreign country by purchasing any part of the same and holding the same out of the markets of the world, whereby the price of the same is increased to the consumers of the United States, he shall have the power, and it shall be his duty, to suspend, by proclamation, the operation of the provisions of this act relative to the rates of duty to be assessed upon the products of such country, dependency, state, colony, province, or other political subdivision of government when imported into the United States; and thereafter, in addition to whatever rate of duty is assessed against the products of such country by this act, all the products of such country, dependency, state, colony, province, or other political subdivision of government shall, when imported into the United States, pay a duty of 25 per cent ad valorem.

Mr. CUMMINS. I move to strike out paragraph B, on page 250.

The VICE PRESIDENT. The Secretary will read the para-

The Secretary read paragraph B, on page 250, as follows:

B. That nothing in this act contained shall be so construed as to abrogate or in any manner impair or affect the provisions of the treaty of commercial reciprocity concluded between the United States and the Republic of Cuba on the 11th day of December, 1902, or the provisions of the act of Congress heretofore passed for the execution of the same.

Mr. CUMMINS. Mr. President, I have already submitted to the Senate my argument upon this subject. I do not intend to

repeat it. I shall content myself with its restatement.

We have in the bill already impaired and affected the provisions of the treaty to which reference is made in the paragraph. The Senate in committee has decided that after March 1, 1916, all sugar from whatever part of the world it may come shall enter the ports of the United States free. In my opinion such a law will impair our treaty with Cuba.

The proposition I have just made was not controverted when the matter was under debate a few days ago. It is obvious that a provision for free sugar is in violation or at least impairs the provisions of a treaty by which we have undertaken to give Cuba a preference of 20 per cent upon sugar.

I am not now questioning the propriety of admitting sugar ee. The debate upon that subject has occurred. I take it it would be of no avail to repeat it. But let us not put ourselves in the position of saying that nothing in the act shall be construed to impair or affect any provision or any obligation in the treaty when we have already impaired or affected a provision in the trenty. It is a mockery. To me it would be and ought to be very offensive to Cuba for us to reassert the obligation to give her a preference upon sugar when we in the same act take away that preference.

Mr. BRANDEGEE. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Connecticut?

Mr. CUMMINS. I yield to the Senator from Connecticut.
Mr. BRANDEGEE. It seems to me that this provision would
be an effective one if it stated in the bill that it would prevent the reduction of the duty upon sugar.

Mr. SIMMONS. I did not catch what the Senator said.

Mr. CUMMINS. I suggested that the other day, and it may

Mr. SIMMONS. I want to say that the committee has an amendment to meet that suggestion, and the Senator from Mississippi intends to offer it and probably will do so before we adjourn this afternoon.

Mr. CUMMINS. To meet what situation? Mr. SIMMONS. The one just referred to by the Senator from Connecticut, as I understood him. I understood the Senator from Connecticut to say that it seemed to him there would be no duty at all upon sugar between now and the time when this provision becomes operative, which is next March. Did I understand the Senator correctly?

Mr. BRANDEGEE. Of course this purports upon its face to

be the official interpretation of the act, and it says that nothing in the act shall interfere with the provisions of the treaty.

Mr. SIMMONS. It may be that I misunderstood the Senator. Mr. BRANDEGEE. It is understood that it does infringe the

provisions of the treaty.

Mr. SIMMONS. I misunderstood the Senator. I thought he was talking about the point made by the Senator from Iowa the that as the bill now stands under the amendment made by the Senate there would be no duty on sugar at all between now and the 1st day of next March,

Mr. CUMMINS. Oh, no.

Mr. SIMMONS. I misunderstood the Senator.

Mr. CUMMINS. I am saying that after the 1st of March, 1916, under the bill there will be no duty on sugar, and after that time Cuba will have no preference upon the imports of sugar, and our treaty with her will have been impaired or our obligation to her will have been recalled or canceled.

Now, I am not suggesting that we have not the power to recall the obligation; I am not even arguing now that it is not wise to recall the obligation; but I do hope that the Congress of the United States will not put itself in the position in one paragraph of taking away the preference we have granted to Cuba and in another paragraph of the same bill asserting that Cuba shall continue to have the preference that we granted to her in 1902, I believe. One or the other of these legislative declarations ought to be eliminated from the bill.

I have assumed that there is no hope of preserving any duty Therefore let us treat Cuba fairly, as though she were, as she is, a friendly and responsible nation, and frankly refrain from reasserting the continuing obligation to extend to

her a preference upon this subject.

Mr. CLARK of Wyoming. Mr. President, I should like to ask the Senator from North Carolina whether this particular provision, in view of the general provision of the bill, is not an impossibility?

Mr. SIMMONS. You mean section B?

Mr. CLARK of Wyoming. Section B, to which the amendment is directed. Is not that an impossibility?

Mr. SIMMONS. What does the Senator mean by saying that

it is an impossibility?

Mr. CLARK of Wyoming. I mean, summing up what the Senator from Iowa has said, that you provide that sugar from all countries shall be free at a definite time.

Mr. SIMMONS. In three years from now.

Mr. CLARK of Wyoming. In three years from now?
Mr. SIMMONS. Yes. We do not provide that sugar shall be
free immediately. If we did, undoubtedly we would abrogate by an act of legislation the treaty. It is competent, of course, to do it. Any general statute passed after a treaty would be the law of the land and paramount to the treaty. provided for free sugar at once, I think the Senator is right about it, and it would be an abrogation of the treaty. But I take it that what this is intended to mean is that during the next three years, while there is a duty upon sugar, and while Cuba can have her preferential rate of 20 per cent, the provision that at some future day sugar is to be on the free list shall not be assumed and taken to mean an abrogation by statute of that treaty during that period of time.

Mr. CLARK of Wyoming. Then paragraph B, as I understand the Senator, is only intended to preserve the preferential rate

which Cuba now has from the present time to 1916?

Mr. SIMMONS. I take it that the meaning of it is that, so far as we are concerned, as for three years we are going to retain a duty upon sugar, Cuba will have 20 per cent preferential during that time, and we do not mean this on our part as an abrogation of the treaty. Of course the right would be given to Cuba by reason of this action, if she wanted to do so, to abrogate it herself.

Mr. LODGE. The treaty with Cuba reserves to both parties the right to modify or change their tariffs in any way they please. If either party to the treaty thinks that it is injured or the changes made by the other party are not to its advantage, it can then terminate the treaty on six months' notice. But the right to make any tariff changes is explicitly reserved in

Mr. CLARK of Wyoming. What I was trying to get at was the incomprehensible absurdity, as it occurred to me, of saying that the treaty should remain in force and then taking away the very thing that does keep it in force.

Mr. LODGE. And destroy it.
Mr. SIMMONS. We have not destroyed it.
Mr. WILLIAMS. The Senator from Wyoming, I think, happened not to be here some days ago when this question was brought up, and the Senator from Iowa [Mr. CUMMINS], the Senator from Massachusetts [Mr. Longe], and I discussed it quite fully. I think on examining into it he will find there is absolutely nothing in the theory that there is any discrepancy between this clause as it appears in the bill and the treaty.

Mr. CLARK of Wyoming. Undoubtedly if I had heard the discussion between the Senators I would have been convinced, but I am not convinced by the paragraph that is under con-

sideration

Mr. WILLIAMS. I merely meant to furnish an excuse for not saying the same thing over again that I said before.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa [Mr. CUMMINS].

The amendment was rejected.

The reading of the bill was continued.

The next amendment of the Committee on Finance was, on page 251, line 3, after the word "both," to strike out "or which do not contain foreign materials to the value of more than 50

per cent of their total value, or 20 per cent in case of manufactures of tobacco, upon which no drawback of customs duties has been allowed therein," so as to read:

C. That there shall be levied, collected, and paid upon all articles coming into the United States from the Philippine Islands the rates of duty which are required to be levied, collected, and paid upon like articles imported from foregin countries: Provided, That all articles, the growth or product of or manufactured in the Philippine Islands from materials the growth or product of the Philippine Islands or of the United States, or of both, coming into the United States from the Philippine Islands shall hereafter be admitted free of duty.

The amendment was agreed to.

Mr. LODGE. After the word "duty" I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated. The Secretary. At the end of line 8, page 251, insert:

Except cigars in excess of 150,000,000 cigars, which quantity shall be ascertained by the Secretary of the Treasury under such rules and regulations as he shall prescribe.

Mr. LODGE. That, Mr. President, is a repetition of the present law, putting a limitation on the number of cigars to be imported from the Philippines free of duty. The cigar makers of the country believe that the competition from the Philippine Islands in cheap cigars, which are what they chiefly make, will be extremely severe and detrimental to them, and they desire to have the limitation of the present law preserved. I do not know how many cigars were brought in, because the customs report gives only pounds, but under the existing law there came in from the Philippine Islands last year \$1,330,000 worth of cigars and cheroots, and their capacity I suppose is unlimited.

I know that the amendment will not be agreed to, but I desire to read the statement I have received in regard to it. The

letter is addressed to me.

BOSTON CENTRAL LABOR UNION, Boston, July 16, 1913.

Hon. Henry Cabot Lodge, United States Senator for Massachusetts.

HONDRABLE AND RESPECTED SIR: At a regular meeting of the Boston Central Labor Union the inclosed resolutions were adopted. Hoping you will take such action as the subject matter warrants,

I have the honor to be.

Very respectfully, yours,

HENEY ABRAHAMS, Secretary.

BOSTON, July 16, 1913.

Whereas at a meeting of Cigar Makers' Union No. 97, of Boston, a resolution protesting against a measure now pending in the Congress of the United States, which measure puts the cigar makers and other organized workers against Mongolian, Asiatic, and oriental hand labor of the Philippine Islands, was unanimously adopted, because of the following reasons:

One-half of the cigar factories in Manila, P. I., are owned by Chinese, whose employees work from 10 to 12 hours per day, while organized eigar makers here work 8 hours per day.

The Third Annual Report of the Bureau of Labor of the Philippine Islands shows that in 53 factories the annual wages averaged \$93.50, which is less than \$2 per week, or about 30 cents per day. The cigar trade is practically a hand industry; practically no machinery is used in the production of cigars.

Owing to the difference in the standard of living there and here, in the cost of living, in the wages and the hours of labor the hand labor of the Mongolian, Asiatic, oriental coolle handworker of the Philippine Islands and should not in justice be asked to do so. If the product of this oriental cheap labor comes into this country the result will be ruinous to the industry here and would in a measure impair and partly nullify the Chinese-exclusion act.

Resolved by the Boston Central Labor Union in regular session assembled, That we, the delegates, fully indoorse and concur in the position and protest of the affiliated organized cigar makers and cigar packers' union of Boston for the reasons stated, and instruct our secretary to immediately forward a copy of this resolution to the secretary of the Cigar Makers and Packers' Union of Boston.

Resolved, That nothing in the foregoing resolutions commits the Boston Central Labor Union, its officers, or members, individually or collectively, to a protective tariff, a low tariff, a tariff for revenue only, or any kind of a tariff, and that the resolution and our action thereon is solely an indorsement of the Mongolian, Asiatic, oriental, and c

They state their case. I have heard nothing from any of the manufacturers of cigars, but simply from the handworkers.

Mr. WORKS. Mr. President, I have received numerous communications from organizations of cigar makers in my State to the same effect. They evidently are thoroughly impressed with the idea that the coming of free cigars into this country will cripple or destroy their business or affect them very seriously. Therefore I join in what has been said by the Senator from Massachusetts on that subject.

Mr. SHERMAN. Mr. President, I wish very briefly to join with the Senator from California [Mr. Works] and for the same reason. It is a very large industry in the State I have the honor to represent in part, and from all the manufacturing centers there have come the same protests. The International Cigar Makers' Union, together with all the local unions in the principal manufacturing cities of Illinois, have sent in such protests.

I therefore wish to allude here to those protests and the reasons they have given. They are all summarized very shortly

in the wages paid in the colonial dependencies, and the standard of living and the conditions under which the manufacture takes place, all of which are greatly inferior to the conditions in this country. If these cigars are brought in as provided in this bill, it will create a competition that the petitioners say they can not withstand.

Mr. LODGE. Mr. President, I have learned that of the number of cigars which have been brought in during the last year 123,000,000 were imported from the Philippines, which is increase of 59,000,000 over the number imported during 1912, showing how rapidly the exportations of cigars from those islands to this country goes on under the present restrictions. They have nearly reached the limit, and, if this duty were taken off, the increase in the importation would be much faster.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Massachusetts [Mr. Lodge].

The amendment was rejected.

Mr. WILLIAMS. In behalf of the committee, I offer the amendment which I send to the desk. The amendment was drawn by the Senator from West Virginia [Mr. Chilton], and we have concluded that it ought to go into the bill.

The VICE PRESIDENT. The amendment proposed by the

Senator from Mississippi will be stated.

The SECRETARY. On page 248, line 20, before the word "cheese," it is proposed to insert the following:

Coal, bituminous, culm slack, and shale and compositions used for fuel in which coal and coal dust is the component material of chief value whether in briquets or other.

On page 250, line 4, after the words "ad valorem," to insert: On coal, bituminous, and shale, 45 cents per ton of 28 bushels, 80 pounds to the bushel; coal slack or culm, such as will pass through a half-inch screen, and briquets of which coal and coal dust is the component part of chief value, 15 cents per ton of 28 bushels, 80 pounds to the bushel.

And the President may provide for drawbacks for the refunding of the duty paid upon any such coal, culm or slack imported for the purpose of being used for fuel upon vessels propelled by steam and engaged in trade with foreign countries or between Atlantic and Pacific ports of the United States and which vessels are registered under the laws of the United States.

Mr. LODGE. May I inquire if that is an addition to the

articles on which retaliation is to be made?

Mr. WILLIAMS. Yes. I have looked into it and I think the duty is reasonable in comparison with the conditions of the trade.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Mississippi on behalf, of the committee.

The amendment was agreed to.

The reading of the bill was resumed, and continued to the end of the following proviso beginning in line 14, on page 251:

And provided further. That the free admission, herein provided, of such articles, the growth, product, or manufacture of the United States, into the Philippine Islands, or of the growth, product, or manufacture, as hereinbefore defined, of the Philippine Islands into the United States, shall be conditioned upon the direct shipment thereof, under a through bill of lading, from the country of origin to the country of destination.

Mr. LODGE. On page 251, in line 20, near the bottom of the I wish to call the committee's attention to the words which are proposed to be inserted in the present law which really relate to the article of hemp. The words are "that shall be conditioned upon the direct shipment thereof." Those words were put into the bill regulating the Philippine tariff, which was one of the bills reported from the Philippines Committee when I was its chairman a good many years ago. By the words "shall be conditioned upon the direct shipment thereof, under a through bill of lading, from the country of origin to the country of destination," the great hemp business was really transferred from London to New York. Somebody, I do not transferred from London to New York. Somebody, I do not know who, has inserted in the House bill the words "under a through bill of lading." That would enable hemp to go through London, and I am afraid would undo all that has been done in that direction.

Mr. WILLIAMS. Mr. President, for the purpose of having that matter considered in conference, I think it would be very well to strike out the words "under a through bill of lading," and then we shall take the matter up.

Mr. LODGE. I am very glad to hear that, although I think the Senator will find that is a rather risky sentence to put in. The VICE PRESIDENT. The amendment proposed by the

Senator from Mississippi will be stated.

The Secretary. On page 251, line 20, after the word "thereof," it is proposed to strike out "under a through bill of lading."

The amendment was agreed to.

Mr. WILLIAMS. Mr. President, on page 259, line 2, paragraph H, subsection 2, the word "section" should be stricken out and the word "subsection" inserted. I refer to the word following the word "preceding."

The VICE PRESIDENT. The amendment will be stated.

The Secretary. In paragraph II, subsection 2, page 259, line 2, after the word "preceding," it is proposed to strike out "section" and to insert "subsection," so as to read:

H. Subsection 2. That any person convicted of a wiliful violation of any of the provisions of the preceding subsection shall be fined not exceeding \$500, or imprisoned not exceeding one year, or both, in the discretion of the court.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 259, after line 4, to strike out:

I. That all goods, wares, articles, and merchandise manufactured wholly or in part in any foreign country by convict labor shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited, and the Secretary of the Treasury is authorized and directed to prescribe such regulations as may be necessary for the enforcement of this provision.

And to insert:

And to insert:

I. That no goods, wares, articles, and merchandise—except immediate products of agriculture, forests, and fisheries—manufactured wholly or in part in any foreign country by convict labor, or principally by children under 14 years of age in countries where there are no laws regulating child labor, shall be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited. Any shipment consigned for entry at any of the ports of the United States, and the importation thereof is hereby prohibited. Any shipment consigned for entry at any of the ports of the United States of goods, wares, articles, and merchandise—except immediate products of agriculture, forests, and fisheries—manufactured in any foreign country, province or dependency, where the industrial employment of convicts is not prohibited by law, or of children not regulated by law, shall be accempanted by an affidavit of the shipper of such merchandise, or his legal agent, to the effect that the merchandise covered by the invoice has not been manufactured wholly or in part by convict labor or principally by children under 14 years of age, the form of the affidavit to be prescribed by the Secretary of the Treasury, who is also authorized and directed to issue such further regulations and to collect all information pertinent thereto through cooperation with the Consular Service of the United States, as may be necessary for the enforcement of the provision.

Mr. ROOT. Mr. President, I do not want to let this amend-

Mr. ROOT. Mr. President, I do not want to let this amendment go without saying that, while I fully sympathize with the policy of the amendment as an American policy, and while I should like to see it enforced everywhere in America, and should like to see all countries in the world adopt and enforce the same policy, I do not think we have any right to attempt to enforce our policy upon the domestic affairs of a foreign country by refusing to receive their goods in the ordinary methods of commerce unless they conform to our ideas rather than to their own.

Mr. BORAH. Mr. President—
The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Idaho?

Mr. ROOT. I do.

Mr. BORAH. Have we not a right to say that we will not receive goods into our country except upon such conditions as suit us?

Mr. ROOT. Oh, yes; we have a right to stop all commercial

intercourse if we choose; there is no doubt about that.

Mr. BORAH. It seems to me if it is a wise policy not to have our goods manufactured in that way by reason of humane principles, we ought to be willing not to accept goods that are manufactured in that way.

The only regret that I have about the amendment, Mr.

President, is that it is not strong enough. I had submitted an amendment to the bill, and I presume the committee had it under consideration, or, at least, I understood it had, but that they preferred the amendment as they have emasculated it, and it would be useless, therefore, for me to urge the amend-ment. The amendment as it reads provides:

I. That no goods, wares, articles, and mcrchandise—except immediate products of agriculture, forests, and fisheries—manufactured wholly or in part in any foreign country by convict labor, or principally by children under 14 years of age.

Of course that would mean no exclusion at all, because it is scarcely ever a fact that goods are ever manufactured principally by child labor. Child labor may enter into an industry, but it is not the principal labor, and therefore the amendment really will have no effect at all in excluding that kind of goods. As I understand, the committee considered the amendment which was offered in lieu of it and thought that it was too drastic. Is that true?

Mr. WILLIAMS. What is that?
Mr. BORAH. The amendment which I submitted and which I intended to offer reads as follows:

Intellect to offer reads as follows:

That all goods, wares, articles, and merchandise manufactured wholly or in part in any foreign country by convict labor; or by children under 14 years of age; or by children under 16 years of age employed for more than 8 hours per day or 48 hours per week; or by boys under 18 years of age or women over 16 years of age employed for more than 9 hours per day or 54 hours per week, shall not be entitled to entry at any ports of the United States, and the importation thereof is hereby prohibited; and the Secretary of the Treasury is authorized and directed to provide such regulation as may be necessary for the enforcement of this provision.

Mr. WILLIAMS. I do not remember at whose instance we had it under consideration, but we had it under consideration.

Mr. BORAH. I understand the Senator to say that the committee had under consideration the amendment which I have read.

Mr. HUGHES. Mr. President, I will say to the Senator that I do not recollect the committee having that particular amendment under consideration, although I presume it had; but we had under consideration another amendment different in form from the amendment which now appears in the bill. I urged the amendment upon the committee in its original shape.

Mr. WILLIAMS. We had under consideration the amendment offered by the Senator from New Jersey [Mr. Hughes], and we had under consideration the amendment just read by the Senator from Idaho [Mr. Borah]. I do not remember whether we considered it as having been proposed by the Senator from Idaho or whether we had it in some different way; but substantially, and I think identically, the same amendment was under consideration.

Mr. BORAH. It is the substance of the amendment to which am referring rather than to the particular author of a par-

ticular amendment.

Mr. HUGHES. The question of the Senator, as I understand, was as to whether or not his amendment was abandoned because it was regarded as too drastic. I do not know that I have ever read the Senator's amendment. I prepared an amendment before I knew the Senator had submitted one, and in the shape in which it was prepared it was considered and, I think, was passed upon by the committee. There were some protests against it, which led me to make an investigation of the child-labor laws of foreign countries, and I was amazed to find that in nearly every foreign country whose goods it was expected would be affected by the amendment the laws restricting child labor were better than the laws on the subject prevailing in this country. I found that in countries from which it was predicted goods would be excluded there were regulations with reference to the age at which children should be allowed to work, the time when they should be permitted to go to school, and in very many other respects there were laws which were infinitely better than I had any idea of when I drew the amendment.

Mr. BORAH. Mr. President, I found it to be true, upon investigation, that foreign countries in many instances had better child-labor laws than we have; but as to those countries the

amendment would do no harm.

Mr. HUGHES. I will say to the Senator that even as affecting Calcutta protests were made against this amendment with considerable force and with considerable justice, I suppose, from the standpoint of those interested. A strong protest came from the men who import bagging from Calcutta. chinery and instrumentalities are not available in this country to supply the demand for bagging if the Calcutta supply were suddenly shut off, and we found that, even in Calcutta, child labor was regulated and restricted.

Mr. SMOOT. Then they do not enforce it in Calcutta; do

they?

Mr. HUGHES. Yes.

Mr. SMOOT. Mr. President, I have in my office photographs of employees in cotton-bagging mills and burlap mills showing children at work that I am positive are not over 10 years old.

Mr. HUGHES. Children under certain years of age are permitted to work for certain hours, provided they have done cer-tain other things—provided they have been to school a certain length of time, or there are special circumstances—showing that at any rate the Government is making an effort to meet this situation. It was a total surprise to me, I will say to the Senator, to find-

Mr. ROOT. That is to say, the Government of India has its own public policy.

Mr. HUGHES. Yes.

Mr. ROOT. And has framed and is applying certain regulations designed to preserve the health of its people; and we make the doing of business with us contingent or conditional upon their complying with our ideas of what the regulations ought to be.

Mr. HUGHES. Not so far as this amendment is concerned. This particular amendment is innocuous so far as that is con-

Mr. SMOOT. Yes; I think that is true, and so far as any other country is concerned, the way it is worded.

Mr. HUGHES. I do not claim there is much virility in the amendment.

Mr. ROOT. It is innocuous because there are no means by which we can sit in judgment on the processes by which merchandise can be produced in other countries; but it is a declaration of intention to compel other countries to comply with our public policies in the manufacture of their goods, by refusing to have commercial intercourse with them unless they do. Innocuous and impossible of application as it may be, I do not think we ought to put it in a statute.

Mr. BORAH. As I view the statute, it was not intended to enforce, and of course no one could enforce, upon a foreign country a policy that that country did not desire to adopt; but we have a right to say whether or not we shall avail ourselves of goods manufactured in establishments where children 5 and 6 years of age are worked from 10 to 12 hours a day.

If there is any humanity left in us on this question it should not be confined to State or national lines. I have never thought that such a thing as religion or humanity was subject to State or county or national lines. If we are not willing to see that sort of thing go on in our country, there is no reason why we should not say that we are not willing to avail ourselves of cheaper goods because they are made by children working under those conditions.

It is a perfectly humane policy; it is a perfectly just policy. We can not enforce it upon those countries, but we can say, so far as we are concerned, that we will not share in that kind

Mr. KENYON. Mr. President, this seems to be an effort to stop the shipment into this country of goods made by what is commonly called child labor. As long as we premit in this country the shipment in interstate commerce, from State to State, of goods that are made by child labor are we not rather in the position of giving better care to the children in foreign countries than we give to the children in our own country

Mr. BORAH. There is a constitutional inhibition with reference to the shipment of goods between State and State that does not embarrass us when we come to deal with the shipment of goods from another country into this country.

Mr. KENYON. As I understand, child-labor bills were introduced here some years ago; in fact, I introduced one myself at the beginning of this session which has slept in the committee ever since. It seems to me we are a little more concarned about the foreign children than about our own children. If we are going to permit in this country the shipment in interstate commerce of goods manufactured by children, I can not see very much reason why we should prevent it in the case of foreign children.

Mr. BORAH. I am sure I know the Senator from Iowa well enough to know that he is glad to do a humane thing in any part of the world.

Mr. KENYON. Yes; and I will vote for this amendment; and I hope it is an indication that Congress may adopt a national standard for this country prohibiting the shipment in interstate commerce of goods made by child labor in this

Mr. BORAH. If we can do that under the Constitution, I think it will shortly be done.

Mr. KENYON. Has the Senator any doubt about it? Mr. BORAH. Yes; I have very serious doubt about it, Mr. KENYON. I have not.

Mr. OLIVER. Mr. President, I wish to call the attention of the committee to the fact that this prohibition with regard to the products of child labor applies only to goods coming from countries where there are no laws regulating child labor. They may come from a country that has the weakest kind of laws relating to child labor or laws that are not enforced, and still they would not come under this prohibition at all. If we are going to prohibit them I think we should not prohibit them solely from countries having no laws relating to child labor.

This provision reads:

Or principally by children under 14 years of age in countries where there are no laws regulating child labor.

I would suggest that the words "in countries where there are no laws regulating child labor" be stricken out, or that something be done so that this language will apply as well to countries where the laws relating to child labor are either not

sufficiently severe or not sufficiently enforced.

Mr. WILLIAMS. Mr. President, the observations made by the Senator from Pennsylvania must go back of the tariff bill and establish themselves substantially upon the amendment offered by the Senator from Idaho, because if we undertake to say that the entry of these goods shall be prohibited when they come from countries where they have no regulations as to child labor we shall be compelled to go into the business of prescribing the sort of regulations they shall have for child

Mr. OLIVER. I know the Senator from Mississippi does not like to hear a hypothetical case; but let us suppose that some

country has a law that allows the labor of children down to 12 or even 10 years. There is a law relating to child labor, but still we admit those goods under this language.

Mr. WILLIAMS. I was coming right to that. times forget how big the earth is and how diverse are the conditions, climatic and otherwise, under which people live. A Hindu girl is a wife and a mother and a widow by the time she is 12 years of age. The consequence is that child-labor laws in India take into consideration much younger ages than they do in a temperate country. Even in our own great country a boy or a girl of 15 in Florida and a boy or a girl of 15 in Maine are totally different creatures.

Mr. OLIVER. I suppose that is the reason they work them

so young down in that part of the country.

Mr. WILLIAMS. Mr. President, it is true that man or woman, boy or girl reaches a certain stage of maturity much earlier in tropical countries than in temperate countries, and much earlier in temperate countries than in frozen countries. That has been the case since the world began. I did not originate that law at all. God originated it. The Senator must not think I am responsible for it.

For us to attempt, as the Senator from Idaho does in this amendment, to prescribe certain years as the years under which children shall not be permitted to work or else the products of those countries shall not come into the United States, is an illustration, just as I said in the beginning, of a total forget-fulness of the fact that a child in one country at 14 is more matured than a child in another country at 18, and a child of still another country is more matured at 12 than in either of the other countries.

Mr. BORAH. Strange as it may seem, I was familiar with

that piece of universal knowledge.

Mr. WILLIAMS. I am willing to admit that it is strange that the Senator should be familiar with the fact, because he has offered this amendment, which would tend to prove that the Senator was not familiar with the fact at all. His amendment reads:

That all goods, wares, articles, and merchandise manufactured * * * by children under 14 years of age; or by children under 16 years of age employed for more than eight hours per day * * * or women over 16 years of age employed for more than nine hours per day, and so forth.

In other words, the Senator is prescribing an age limit for child labor that shall apply to India and to Norway at the same

It may be true that it is strange, as the Senator said it was, that he was acquainted with that fact, but he evidently had lost sight of it temporarily when he drew up this amendment.

As I said a moment ago, if the Senator's amendment should be adopted it would absolutely cut off our entire commerce with Japan and nearly all of our commerce with Hindustan. We can not undertake to enter into the details of child-labor laws in other countries. The utmost we can do is what we have done here.

The adverb "principally," in line 15, has been criticized. We put it in on purpose. If you take our trade with Japan. for example, it would be difficult to find anything that is produced

in Japan that is not produced partially by child labor.

Mr. BORAH. Mr. President, the Senator criticizes the fact
that I put in the age at 14. I think I will show the Senator in a moment that this amendment of his, as it was drawn, was not designed to do anything, because you say, "children under 14 years of age.

Mr. WILLIAMS. Yes; but we use the word "principally."
Mr. BORAH. Exactly; and by its use you render the provision worthless

Mr. WILLIAMS. But if the Senator will notice, the difference between his amendment and ours is just this: We say, principally by children under 14 years of age in countries where there are no laws regulating child labor." Then we leave to the countries which have laws regulating child labor the business of fixing their own age limit.

Mr. BORAH. Exactly. Now, if you desired to have non-importation from countries where children are not permitted to labor under 14 years of age, you would not have said where it is regulated" by law, but you would have said where it is "proby law, because otherwise a country might pass a law saying that children should be permitted to labor under 14 years of age, and it would then come under this provision.

Mr. WILLIAMS. No. Mr. BORAH. Exactly.

Mr. WILLIAMS. The Senator misunderstands me.

Mr. BORAH. I do not misunderstand the proposed statute. Mr. WILLIAMS. The provision that the Senator has referred to applies to the countries which do not have any childlabor laws. Now, take a country like India, for example, which has a child-labor law. Unless my memory fails me, one of the ages for a certain sort of work is 9 years; another age is 12—and, in point of maturity, a 12-year-old girl in Calcutta is the equal of a 19-year-old girl in Idaho.

Mr. BORAH. She may be the equal in mere question of age. I desire to ask the Senator a question and to see if I am correct in regard to it. Suppose Japan or some other oriental country had a law providing that all children under 14 years of age should be permitted to labor, say, 8 or 10 hours a day down to the age of 6. Would this language have any effect at all? In such a case child labor would be regulated by law, but the law would not be prohibitory, but, rather, permissive.

Mr. WILLIAMS. If the Senator can really suppose that any country would be absurd enough to have that sort of regu-

Mr. BORAH. Mr. President, it is no absurdity at all, because it does exist.

Mr. WILLIAMS. That some countries have an age limit of 6 years

Mr. BORAH. No; not that; but much under 14. Mr. WILLIAMS. That is what the Senator stated. Mr. BORAH.

Mr. BORAH. But they have an age limit under 14 years

of age.

Mr. WILLIAMS. Oh, yes; and they ought to have. Mr. BORAH. Then, the Senator's amendment would have no effect whatever, because child labor is regulated by law; but it is not in any way prohibited.

Mr. WILLIAMS. The Senator is right in saying that wherever the country itself has a law regulating child labor, this provision does not apply.

Mr. BORAH. Mr. President, having been able to agree with

the Senator on one thing, I am willing to take the vote.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to. The reading of the bill was resumed.

The next amendment was, in section 5, paragraph J, subsection 4, page 262, line 2, after the word "thereof," to insert 'models of women's wearing apparel imported by manufacturers for use as models in their own establishments," and to strike out, before the word "samples," in line 4, the words "commercial travelers'," so as to make the subsection read:

"commercial travelers," so as to make the subsection read:

J. Subsection 4. That machinery or other articles to be altered or repaired, molders' patterns for use in the manufacture of castings intended to be and actually exported within six months from the date of importation thereof, models of women's wearing apparel imported by manufacturers for use as models in their own establishments, samples solely for use in taking orders for merchandise, articles intended solely for experimental purposes, and automobiles, motor cycles, bicycles, aeroplanes, airships, balloons, motor boats, racing shells, teams, and saddle horses, and similar vehicles and craft brought temporarily into the United States by nonresidents for touring purposes or for the purpose of taking part in races or other specific contests, may be admitted without the payment of duty under bond for their exportation within six months from the date of importation and under such regulations and subject to such conditions as the Secretary of the Treasury may prescribe: Provided, That no article shall be entitled to entry under this section that is intended for sale or which is imported for sale on approval.

The amendment was agreed to.

The next amendment was, in paragraph J, subsection 5, page 262, line 19, after the words "construction of," to insert "naval vessels of the United States," so as to read:

J. Subsection 5. That all materials of foreign production which may be necessary for the construction of naval vessels of the United States, vessels built in the United States for foreign account and ownership, or for the purpose of being employed in the foreign or domestic trade, and all such materials necessary for the building of their machinery, and all articles necessary for their outfit and equipment, may be imported in bond under such regulations as the Secretary of the Treasury may prescribe; and upon proof that such materials have been used for such purposes no auties shall be paid thereon.

Mr. GALLINGER. I ask that subsection 5 and subsection 6 may go over for the day. I did not expect that we would reach this part of the bill to-day. I promise that there will be no

delay about it at all.

Mr. WILLIAMS. We are perfectly willing to agree to that.

Mr. JONES. And also subsection 7, relating to the same mat-

ter; I ask that it may go over.

Mr. WILLIAMS. We have not reached that yet.

Mr. SIMMONS. The committee propose to strike out subsection 7

Mr. JONES. I ask that it may go over, in connection with subsections 5 and 6.

Mr. STONE. Let subsections 5 and 6 and 7 go over without

Mr. JONES. I want to have the question of adopting the amendment of the committee, striking out subsection 7, to go

Mr. WILLIAMS. Very well.
The VICE PRESIDENT. The subsections will go over.

The reading of the bill was continued.

The next amendment of the committee was, in paragraph M, on page 266, line 4, after the word "manufacture," to insert "including waste derived from cleaning rice in bonded warehouses under act of March 24, 1874," so as to make the proviso read:

Provided, That the waste material or by-products incident to the processes of manufacture, including waste derived from cleaning rice in bonded warehouses under act of March 24, 1874, in said bonded warehouses may be withdrawn for domestic consumption on the payment of duty equal to the duty which would be assessed and collected, by law, if such waste or by-products were imported from a foreign country. All labor performed and services rendered under these provisions shall be under the supervision of a duly designated officer of the customs and at the expense of the manufacturer.

The amendment was agreed to.

The next amendment was, on page 267, line 5, after the word "therefrom," to insert the following proviso:

Provided, That cigars manufactured in whole of tobacco imported from any one country, made and manufactured in such bonded manufacturing warehouses, may be withdrawn for home consumption upon the payment of the duties under such regulations as the Secretary of the Treasury may prescribe, and the payment of the internal-revenue tax accruing thereon in their condition as withdrawn, and such cigars shall be stamped to indicate their character, origin of tobacco from which made, and place of manufacture.

Mr. BRANDEGEE. I suppose it means that the packages containing the cigars shall be stamped.

Mr. WILLIAMS. Yes.

Mr. BRANDEGEE. It says the cigars shall be stamped.

They could not put all that statement on the cigars, I presume.

Mr. WILLIAMS. It means the packages containing the cigars. I move, after the word "and," in line 12, page 267, to insert "the boxes or packages containing," so as to read, "and the boxes or packages containing such cigars shall be stamped,'

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was continued to line 17, on page 267. Mr. WILLIAMS. I ask that paragraph N, beginning at line 18, on page 267, and ending on page 268 with line 16, be re-committed. We want to consider further the question about the metals, and all that, in bonded warehouses.

The VICE PRESIDENT. Without objection the paragraph

will be recommitted.

The reading of the bill was continued.

The next amendment was, on page 268, line 22, before the words "per centum," to strike out "1" and insert "3," so as to read:

O. That upon the exportation of articles manufactured or produced in the United States by the use of imported merchandise or materials upon which customs duties have been paid, the full amount of such duties paid upon the quantity of materials used in the manufacture or production of the exported product shall be refunded as drawback, less 3 per cent of such duties.

The amendment was agreed to.

The reading of the bill was continued to line 12, on page 269, Mr. WILLIAMS. On page 269, line 11, before the words "per cent," I move to strike out "1" and insert "3." By an omission the amendment made in line 22, of the previous page, was not inserted here.

The VICE PRESIDENT. The amendment will be stated. The Secretary. In line 11, page 269, before the words "per cent," strike out "1" and insert "3," so as to read:

Where no duty is accessible upon the importation of a corresponding by-product, no drawback shall be payable on such by-product produced from the imported material; if, however, the principal product is exported, then on the exportation thereof there shall be refunded as drawback the whole of the duty paid on the imported material used in the production of both the principal and the by-product, less 3 per cent, as hereinbefore provided.

The amendment was agreed to.

The reading of the bill was continued to line 23, on page 271, the last paragraph read being as follows:

Q. That on and after the day when this act shall go into effect all goods, wares, and merchandise previously imported, for which no entry has been made, and all goods, wares, and merchandise previously entered without payment of duty and under bond for warehousing, transportation, or any other purpose, for which no permit of delivery to the importer or his agent has been issued, shall be subjected to the duties imposed by this act and to no other duty, upon the entry or the withdrawal thereof: Provided, That when duties are based upon the weight of merchandise deposited in any public or private bonded warehouse, said duties shall be levied and collected upon the weight of such merchandise at the time of its entry.

Mr. WILLIAMS. The junior Senator from Utah [Mr. SUTH-ERLAND] has an amendment lying on the table to be offered at this stage of the bill. Would it be convenient for him to offer

Mr. SUTHERLAND. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be read. The Secretary. On page 271, strike out subdivision Q of section 5 and insert in lieu thereof the following:

Q. That all goods, wares, and merchandise imported prior to the day when this act shall go into effect for which no entry has been made, and all goods, wares, and merchandise previously entered without payment of duty and under bond for warehousing, transportation, or any other purpose, for which no permit of delivery to the importer or his agent has been issued shall be subjected, upon the entry or the withdrawal thereof, to the duties in force when such goods, wares, and merchandise were imported or previously entered, respectively.

Mr. SUTHERLAND. Mr. President, unless the committee is prepared to accept this amendment, of course, I realize that there is no hope of its being adopted. At the same time, I de-

sire to be heard very briefly with reference to it.

The first proposition to which I desire to direct the attention of the Senate is the effect which subdivision Q as now found in the proposed bill will have upon the revenues of the Government. The Secretary of the Treasury, in response to a resolution asking for the information, reports that the value of merchandise in the bonded warehouses of the United States on August 1, 1912, was seventy-one million and some odd thousand dollars, and that the value of merchandise in bonded warehouses for the corresponding period of 1913, one year later, was one hundred and four million and some odd thousand dollars, an increase of over \$30,000,000. The duties under the existing tariff law upon those goods would amount to over \$58,000.000. The estimated duties upon the same merchandise under the proposed bill would be something over \$48,000,000.

So if these goods are permitted to be withdrawn upon the payment of the duties proposed by the pending bill there will be a loss to the Government of the United States of approximately \$10,000,000. I think the estimate of the Treasury Department is under rather than over that amount, because I find from a report which is unofficial, but which I believe to be entirely accurate, that in the bonded warehouses of New York alone, which of course would carry the greater proportion of all these goods, there was during July, exactly what date I do not recall, \$80,000,000 worth of goods in bond, the duties upon which would have been between \$40,000,000 and \$50,000,000.

On the 30th day of April of the present year there were in the bonded warehouses of Boston over 40,000,000 pounds of wool alone. The duties upon that wool, being accurately computed appearance of 10,000,000 pounds of 10,000 p puted, amount to \$4,106,319.75. Under the proposed bill, of course, this wool will be admitted free, and that entire amount of revenue will be lost. On July 21 of the present year there was in New York in the bonded warehouses 21,000,000 pounds of wool, the duties upon which would have been over \$2,000,000. So upon that one item of wool in those two cities the loss of revenue under this bill would be over \$6,000,000.

It is perfectly apparent that the amount of wool on deposit has increased since those dates. There is certainly more in Boston to-day than there was April 30, and more in New York than there was July 1. So I think the estimate made by the Secretary of the Treasury respecting the loss is too little. At any rate, this was the estimate made for August 1. By the time this bill goes into operation it will be still more, probably reaching anywhere from \$12,000,000 to \$15,000,000.

Now, it seems to me to be worth while to save this amount

of revenue to the Government.

In the next place, if these goods are withdrawn and the duties paid under the proposed law, the Government will be compelled to reclassify, to reexamine, to a very large extent, these importations. The duties which have already been fixed and which could be paid automatically upon the withdrawal of these goods will all have to be reliquidated. It has been estimated that there are about 40,000 different entries in the New York warehouses alone. I undertake to say that in other ports of the country that would be swelled to 50,000. In other words, there are 50,000 separate entries of goods in these bonded warehouses. Each of these entries must be reex-

We have, for example, changed the method of estimating the duties upon cotton goods. Every one of the importations of cotton goods will have to be taken from the bonded warehouses, carried over to the appraiser's warehouses, and there reclassified, reexamined, and the duties reliquidated under the provisions of the new law. It means weeks, if not months, of additional labor upon the part of the customs officers of the United States, and that is to be done at Government expense. It means no one can estimate how much Government expense; it will undoubtedly run into the hundreds of thousands of dollars.

So by permitting these duties to be paid under the new law instead of under the old law there will not only be a direct loss to the Treasury of the United States of \$12,000,000 or \$15,000,000 but, in addition, a tremendous expense incurred in order to reliquidate the duties.

In addition to that, demands will be made for immediate delivery upon the part of many of the importers, which will result in hurry and confusion, in the clogging of the business of the customhouses, in great loss of revenue, and in great expense to the Government.

The third consideration that must be borne in mind is the effect which, upon the payment of these reduced duties, the dumping of an abnormal quantity of goods will have upon the American market. To the extent that we are producing in this country goods of like character, and to the extent that goods of a like character which have been imported are now held by merchants in this country, the disastrous effect upon their business can scarcely be overestimated. We dump within a few weeks upon the American market perhaps one-half or more of this great volume of \$104,000,000 worth of imported goods. It seems to me that the effect upon the American producer can not be other than demoralizing.

It is said that the importers have put their goods in bond upon the belief that they would be permitted to withdraw them upon paying the duties provided by the new law, and that the Government is under some sort of moral obligation to carry that understanding into operation. The effect of providing for the bonded-warehouse system was to extend credit to importers. Nobody knows precisely whether the bonded-warehouse system was adopted for that reason alone, but we do know that in the very early history of the Government there were no bonded warehouses and that the Government adopted a plan of extending credit directly; and it is probable, although it is not certain, that the Government, because of losses which it sustained in that way, devised the bonded-warehouse system.

One result of holding goods in bond is that they become security for the payment of the amount of the duty for which credit is extended. The Government is not benefited in any way whatever by the bonded-warehouse system. It would be far better, so far as the fiscal operations of the Government are concerned, if it required payment of these duties immediately upon the importation of the goods; but in order to allow the importing merchants credit, to enable them to defer the payment of duties pending the time when they may want to use their goods, the Government has generously extended this credit to them.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield

The VICE PRESIDENT. Does the Senator from Utan yield to the Senator from New Hampshire?

Mr. SUTHERLAND. I yield.

Mr. GALLINGER. The Senator from Utah says that the Government gets no benefit from this extension of the time of payment to the importer. I ask the Senator if the Government does not sustain a very considerable loss on that account?

Mr. SUTHERLAND. Oh, yes; the Government not only gets no benefit, but it carries on the bonded-warehouse system at a very great expense. It must keep books of account and it must

very great expense. It must keep books of account, and it must maintain a certain sort of supervision over the operations, all of which costs money.

Mr. GALLINGER. And pay the employees.
Mr. SUTHERLAND. Yes; and all as a pure matter of generosity to the importers. Instead of the moral argument being on the side of the importers, it is upon the Government's side. The importers take advantage of the generosity of the Government in extending credit to them to pile up abnormal quantities of goods for the sole purpose of taking advantage of the greatly reduced duties. In doing so they not only rob the Treasury of the United States, but they do injury to our own American producers. There is no reason in good morals why they should not be compelled to pay the duties which were assessed against those goods at the time they were imported.

Mr. President, I think I have said all I care to say about the question, and I ask for the yeas and nays upon the pro-

posed amendment.

Mr. WILLIAMS. Mr. President, when the Government deprives a man of his natural right to buy wherever he can buy cheapest and to bring his goods home, and taxes him and puts obstacles in his way, I do not see that there is so much generosity in allowing him a little delay in the payment of duties.

As the Senator from Utah says, the Government will lose a certain amount of money, whatever it is, but the Senator forgets that the people will gain identically that same amount of money by not being required to pay these duties. As a partial reply to the Senator from Utah, I ask that the letter which I send to the desk, which was addressed to the Senator from New Jersey [Mr. Hughes] by one of his constituents, be read.

The provision in this bill is identical with the provision that

was in the law of 1900. It has been in every other tariff law which we have ever enacted; so there is nothing new about it. There is no reason why a different provision should be in a law reducing taxes from that which has been in all the laws raising taxes.

The VICE PRESIDENT. Is there objection to the reading of the letter asked for by the Senator from Mississippi? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

DEMAREST, N. J., July 31, 1913.

Hon. William Hughes, United States Senate, Washington, D. C.

Chair heaves mone, and the Secretary will read.

The Secretary read as follows:

DEMAREST, N. J., July 31, 1913.

How, WILLIAM HIGGIES,

United States Senate, Washington, D. C.

Sil: We desire to address you with respect of unspecting the operation of the state of the state of your life. The state of the state of your life of your life of the state of the state of your life. State of the state of the state of your life of your life of the state of the state of your life of your lif

thus conferred upon many new concerns of no standing comparable

thus conterred upon many better to ours.

We therefore respectfully insist that the Sutherland amendment above mentioned should be rejected. We understand that this amendment will shortly come up for discussion in your committee, and we therefore pray that the points we have presented may have the benefit of your examination at this time.

Respectfully,

JACOB & JOSEF KOHN.

Per WALTER SCHMITS, Manager.

Mr. GALLINGER. I will ask if there is a business heading to that letter? In other words, in what line of business are the men who sign the letter engaged?

The VICE PRESIDENT. The Chair is informed by the Sec-

retary that there is no business heading on the letter.

Mr. WILLIAMS. I think they are importers; but they pre-

sent a very sound argument.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Utah [Mr. Suther-LAND], on which the yeas and nays have been demanded.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. CHILTON (when his name was called). I again announce my pair, as on the previous vote, with the Senator from Maryland [Mr. Jackson], and transfer it to the Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nay.

Mr. GALLINGER (when his name was called). I transfer my pair with the junior Senator from New York [Mr. O'Gor-MAN] to the junior Senator from Maine [Mr. Burleigh] and vote "yea."

Mr. LEWIS (when his name was called). I am paired with

the Senator from North Dakota [Mr. GRONNA].

Mr. SUTHERLAND (when his name was called). I inquire whether the Senator from Arkansas [Mr. Clarke] has voted?

The VICE PRESIDENT. The Chair is informed that he

Mr. SUTHERLAND. I am paired with that Senator, and therefore withhold my vote.

Mr. WILLIAMS (when his name was called). I am paired with the senior Senator from Pennsylvania [Mr. Penrose]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. THOMAS. I transfer my pair with the Senator from Ohio [Mr. Burron] to the junior Senator from Oklahoma [Mr.

Gore] and vote "nay."

Mr. BRYAN. I am paired with the junior Senator from Michigan [Mr. Townsend]. I transfer that pair to the senior

Senator from Oklahoma [Mr. Owen] and vote "nay."
Mr. SUTHERLAND. I transfer my pair with the Senator from Arkansas [Mr. Clarke] to the Senator from New Mexico [Mr. Fall] and will vote. I vote "yea."

Mr. JAMES. I have a general pair with the Senator from Massachusetts [Mr. Weeks]. I transfer that pair to the junior Senator from Tennessee [Mr. Shields] and vote "nay."

Mr. COLT (after having voted in the affirmative). I have a general pair with the junior Senator from Delaware [Mr. Saulsbury], who is absent, so I withdraw my vote.

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. Smith] to the Senator from Nevada [Mr. Pittman] and vote "nay."

Mr. PERKINS (after having voted in the affirmative). I inquire if the junior Senator from North Carolina [Mr. OVERMAN] has voted?

The VICE PRESIDENT. The Chair is informed that he has

Mr. PERKINS. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. WILLIAMS. I transfer my pair with the senior Senator

from Pennsylvania [Mr. Penbose] to the senior Senator from Virginia [Mr. Martin] and will vote. I vote "nay."

Mr. LEWIS. I transfer my pair with the Senator from North Dakota [Mr. Gronna] to the Senator from Arizona [Mr. ASHURST] and will vote. I vote "nay."

The result was announced-yeas 23, nays 35, as follows:

YEAS-23.

Bradley Brady Brandegee Bristow Catron Clark, Wyo.	Crawford Cummins Dillingham Gallinger Jones Kenyon	La Follette McLean Nelson Norris Oliver Page	Sherman Smoot Sterling Sutherland Warren

Bacon Bankhead Bryan Chamberlain Chilton Fletcher Hollis Hughes James	Johnson Kern Lane Lewis Martine, N. J. Myers Poindexter Pomerene Ransdell	Reed Robinson Shafroth Sheppard Shively Simmons Smith, Ariz. Smith, Ga. Smith, Md.	Smith, S. C. Stone Swanson Thomas Thompson Vardaman Walsh Williams		

du Pont Fall

NOT VOTING-37.

Ashurst Borah Burleigh Burton Goff Gore Gronna Hitchcock Jackson Lea Lippitt Lodge McCumber Martin, Va. Clapp Clarke, Ark, Colt Culberson

Newlands O'Gorman Overman Owen Penrose Perkins Pittman Root Saulsbury Shields Smith, Mich. Stephenson Thornton Tillman Townsend

So Mr. Sutherland's amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 271, after line 23, to strike out:

page 271, after line 23. to strike out:

R. That whenever articles are exported to the United States of a class or kind made or produced in the United States, if the export or actual selling price to an importer in the United States, or the price at which such goods are consigned is less than the fair market value of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to the United States at the time of its exportation to the United States, there shall, in addition to the duties otherwise established, be levied, collected, and paid on such article on its importation into the United States a special duty (or dumping duty) equal to the difference between the said export or actual selling price of the article for export or the price at which such goods are consigned, and the said fair market value thereof for home consumption, provided that the said special duty shall not exceed 15 per cent ad valorem in any case and that goods whereon the duties otherwise established are equal to 50 per cent ad valorem shall be exempt from such special duty.

"Export price" or "selling price" or "price at which such goods are consigned" in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to the United States.

The Secretary of the Treasury shall make such rules and regulations as are necessary for the carrying out of the provisions of this section and for the enforcement thereof.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, in paragraph S, page 273, line 9, after the word "message," to insert "if deemed important in the public interest," so as to read:

S. That the President shall cause to be ascertained each year the amount of imports and exports of the articles enumerated in the various paragraphs in section 1 of this act and cause an estimate to be made of the amount of the domestic production and consumption of said articles, and where it is ascertained that the imports under any paragraph amount to less than 5 per cent of the domestic consumption of the articles enumerated he shall advise the Congress as to the facts and his conclusions by special message, if deemed important in the public interest.

The amendment was agreed to.

The next amendment was, on page 273, after line 17, to insert:

The next amendment was, on page 273, after line 17, to insert:

A joint committee of the Senate and House of Representatives is hereby constituted, to consist of three members of the Finance Committee of the Senate, to be appointed by the President of the Senate, and of feur members of the Ways and Means Committee of the House, to be appointed by the Speaker of the House, whose duty it shall be to investigate and consider the revenue administration laws of the United States with the view of simplifying, harmonizing, revising, and codifying the same. The said committee is hereby given power to subprena and compel the attendance of witnesses, to administer oaths, to hear testimony, to record and print hearings, to employ an expert clerk at not exceeding \$250 per month, and a stenographer or stenegraphers, at a cest not to exceed the sum of \$1 per printed page, to make a final report, to print the same for the use of the Senate and House; and it is hereby made their duty to file said final report and their recommendations with the Committee on Ways and Means of the House of Representatives not later than February i, 1914. The sum of \$15,000, or so much thereof as is needed, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to carry out the provisions of this paragraph.

The amendment was agreed to.

The next amendment was in paragraph T, page 274, line 22, after the word "construed," to insert "to permit any oaths to be demanded or fees to be charged except as provided in this act nor," so as to read:

T. That, except as hereinafter provided, sections 1 to 42, both inclusive, of an act entitled "An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes," approved August 5, 1909, and all acts and parts of acts inconsistent with the provisions of this act, are hereby repealed: Provided, That nothing in this act shall be construed to permit any oaths to be demanded or fees to be charged except as provided in this act nor to repeal or in any manner affect the following numbered sections of the aforesaid act approved August 5, 1909, etc.

Mr. SMOOT I should like to ask the Secretor why those

Mr. SMOOT. I should like to ask the Senator why those words are included?

Mr. WILLIAMS. The Senator from Utah has anticipated me in connection with that very matter. I am afraid it might be claimed that this amendment, if enacted into law, would prohibit the Secretary of State from directing consuls to require oaths to consular certificates. I had therefore designed, and I now request, that this matter may go back to the committee to

be made clear. Mr. SMOOT. Mr. SMOOT. That was the reason I asked the question. I thought the Senator would give that as the reason.

Mr. WILLIAMS. I am a little afraid it might be subject to

that construction, although I am not convinced that it would be. I want to make it clear, anyway.

I ask that the proviso on page 21 be recommitted.

The VICE PRESIDENT. The proviso will be recommitted.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 275, line 21, after the word "effect," to insert:

page 275, line 21, after the word "effect," to insert:

And provided further, That an excise tax upon the doing of business, equivalent to 1 per cent upon their entire net income, shall be levied, assessed, and collected upon corporations, joint-stock companies or associations, and insurance companies, of the character described in section 38 of the act of August 5, 1909, for the period from January 1 to February 28, 1913, both dates inclusive, which said tax shall be computed upon one-sixth of the entire net income of said corporations, joint-stock companies or associations, and insurance companies, for said year, said net income to be ascertained in accordance with the provisions of subsection G of section 2 of this act: Provided further, That the provisions of said section 38 of the act of August 5, 1909, relative to the collection of the tax therein imposed shall remain in force for the collection of the excise tax herein provided, but for the year 1913 it shall not be necessary to make more than one return and assessment for all the taxes imposed herein upon said corporations, joint-stock companies or associations, and insurance companies, either by way of income or excise, which return and assessment shall be made at the times and in the manner provided in this act.

Mr BRISTOW I should like an explanation as to instruct.

Mr. BRISTOW. I should like an explanation as to just what effect that has on the income-tax provision.

Mr. GALLINGER. It is a corporation tax.

Mr. BRISTOW. I know it is a corporation tax; but it con-

nects up with the income tax, does it not?

Mr. WILLIAMS. I will state the object. When we tax the income of a preceding year in the present law, there are two months in which we had no constitutional power to tax incomes at all. We have attempted to continue the old excise law in existence for those two months, and to make the income-tax law operative for the other 10 months.

Mr. BRISTOW. I understand now. I had forgotten just

the reference.

Mr. BRANDEGEE. Mr. President, I should like to ask the Senator a question with relation to this amendment which provides that an excise tax-

upon the doing of business * * * shall be levied, assessed, and collected upon corporations.

My recollection is that the language of the present corporation tax, which I think was sustained by the Supreme Court of the United States, was that "an excise tax with respect to the transaction of business" was imposed upon the corporation. This language imposes an excise tax "upon the doing of business" upon the corporation.

While I do not know that it is at all material, I simply wish to suggest, if the committee cares to do so, that it consider whether it would be wise to preserve the language of the exist-

ing law.

Mr. WILLIAMS. Will the Senator read that language to me again, please?

Mr. BRANDEGEE. It is found at the bottom of page 275.

Mr. WILLIAMS. But I say, will the Senator read to me again the language of the existing law?

Mr. BRANDEGEE. I have stated it simply from my recollection of the present corporation-tax law, which levies the tax upon the corporation "with respect to the transaction" of its

Mr. WILLIAMS. I think it will be safer and better to keep up the language of the existing law, and not to run the risk of any new construction.

Mr. BRANDEGEE. I simply suggest it for the consideration

of the committee.

Mr. WILLIAMS. I thought we had the same language here. I think this language is used in part of the existing law. However, I will look into the matter.

Mr. BRANDEGEE. The Senator may be correct. It is simply my recollection of a year or two ago.

Mr. WILLIAMS. I think both phrases are used.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 277, after line 13, to insert:

U. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of said act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, this language on page
277 strikes me as somewhat peculiar. It is in the House bill. It provides:

All acts of limitation, whether applicable to civil causes and proceedings or to the prosecution of offenses, or for the recovery of penalties or forfeitures, embraced in, or modified, changed, or repealed by this act, shall not be affected thereby.

That seems to me to be a contradiction in terms. Of course if they are changed or repealed by this act, they certainly are affected by it.

Mr. WILLIAMS. What is the suggestion of the Senator

with regard to that?

Mr. BRANDEGEE. The suggestion is that I do not understand what it means when it says that these things that have been "modified, changed, or repealed by this act shall not be affected thereby.

Mr. WILLIAMS. No; it says all acts of limitation shall not be modified, changed, or repealed.

Mr. BRANDEGEE. Read the whole of it.

Mr. WILLIAMS. "All acts of limitation, whether applicable to civil causes and proceedings or to the prosecution of offenses, or for the recovery of penalties or forfeitures." Mr. BRANDEGEE. Yes.

Mr. WILLIAMS. That merely takes care of existing limita-

tions, so that they will not be barred by the statute.

Mr. BRANDEGEE. It says that acts of limitation that are affected by this act or repealed by it "shall not be affected thereby."

Mr. WILLIAMS. No; it says:

All acts of limitation, whether applicable to civil causes and proceedings or to the prosecution of offenses, or for the recovery of penalties or forfeitures, embraced in, or modified, changed, or repealed by this act, shall not be affected thereby.

Mr. BRANDEGEE. Is this the language of the existing law?

Mr. WILLIAMS. I do not remember.
Mr. BRANDEGEE. I think, at any rate, it could be improved
if it said "no act of limitation shall be affected thereby." All the acts may not be affected, but some of them may be.

Mr. WILLIAMS. I think the Senator is clearly right about

that, too.

Mr. BRANDEGEE. I have no suggestion to make about it. Mr. WILLIAMS. It ought to read "no act of limitation." Mr. BRANDEGEE. Let the committee look it over when it

meets.

Mr. WILLIAMS. Yes; we will do that. Mr. President, on page 275 there is a provision as to the sections and subsections of the previous law which are not in-tended to be repealed by this act. I ask that that go back to the committee, because I am afraid we have not taken sufficient pains with regard to tobacco or some of the internal-revenue schedules.

I therefore ask that the matter on page 275 may go back to

the committee.

The VICE PRESIDENT. Without objection, that order will be made.

The reading of the bill was resumed.

The next amendment was, on page 277, line 21, to strike out the letter "U" and insert "V."

The amendment was agreed to.

The reading of the bill was concluded.

Mr. POINDEXTER. I offer an amendment which I send to the desk, to be inserted at this point.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. It is proposed to add at the end of the bill a new section, as follows:

The Secretarry. It is proposed to add at the end of the bill a new section, as follows:

Sec. 6. First. There is hereby constituted and established a commission to be known and officially designated as the Tariff Commission. The Tariff Commission shall consist of five members, to be appointed by the President by and with the advice and consent of the Senate. The term of office of each member of the commission shall be 15 years, subject to removal at any time by a majority vote of the Congress of the United States; and the salary of each member of the commission shall be \$12,500 per annum: Provided, however, That the terms of the first members of the commission shall be as follows: One for 3 years, one for 6 years, one for 12 years, one for 15 years; it being the intention of this act that the term of one member shall expire and his successor be appointed each three years, and the President shall designate the term, in accordance with the foregoing, of each of the first members of the commission. Thereafter the term of each shall be 15 years as specified above.

Second. It shall be the duty of the Tariff Commission to ascertain as nearly as possible such facts and information concerning the production and manufacture of articles of trade and commerce in this country and foreign countries as will enable said commission to determine the comparative cost of production and manufacture of the same in this country and abroad; and shall also ascertain as nearly as possible all other facts, circumstances, and conditions of production and manufacture, including the amount consumed, the amount produced, and the amount imported into this country of the several articles under investigation as will enable said commission to decide approximately what rate of duty upon the several articles would place the domestic and foreign producer and manufacturer upon an equal and fair competitive basis in our home market: Provided, That the cost of transporting the several articles from the foreign country to the United States shall not

such changes the commission shall avoid such sudden and extensive changes as will, in the opinion of the commission, unsettle the general business of the country, it being the intention of this act that such changes shall be made by degrees if necessary, but at the same time as speedily as possible, so as to adjust tariff rates to the principle of just protection and fair competition stated above, and to keep the same so adjusted from time to time according to changing conditions of trade and indus ry. Every rate so adjusted by the commission shall at all times be subject to change or modification by Congress.

Fourth. In the performance of its duties as aforesaid the commission shall at all times consider the amount of revenue received by the Government from the tariff rates in force and shall estimate as nearly as possible and report in its annual reports both the revenue of the current year and the estimated revenue of the ensuing year from tariff duties upon each item. In adjusting rates as provided herein the commission shall segregate all purely revenue rates upon items where the element of protection is not involved, and as to such purely revenue rates the commission shall make no changes but shall leave the same as fixed by Congress. In adjusting protective rates as herein provided the commission shall deal only with items upon which rates of duty shall have been levied by Congress. As to such rates the commission shall have power to raise or lower the same within the rule stated above, item by item, in such manner as will best accomplish the purpose stated above and also in such manner as will avoid any unnecessary violent disturbance of business. The commission shall make and print an annual report to Congress, properly indexed, fully setting forth in clear and succinct form all of its doings under this act, with a tabulated statement in logical sequence of its decisions, conclusions, and orders together with any recommendations which it may see fit to make to Congress on the levy or administration of

approved in writing by the chairman or by a majority of the commission.

Seventh. The commission shall organize by the election of one of its members as chairman and by the appointment of a secretary at a salary and for such term as shall be determined by the commission. The commission shall fix the term of office and functions of its chairman, and shall adopt such rules for its conduct and method of transacting business as in its judgment shall promote efficiency, economy, and expedition in the performance of its duties. The commission shall have power to hold hearings, to summon and compel the attendance of witnesses, to examine the books and operations of producers or manufacturers, and to compel the production of papers and documents. Any person willfully refusing to obey a summons of said commission, or to exhibit books or operations, or to produce papers or documents upon the order of the commission shall be guilty of a misdemeanor, and on conviction in any court of competent jurisdiction shall be punished by a fine not exceeding \$1,000 or by imprisonment in jail not exceeding one year or by both such fine and imprisonment, in the discretion of the court.

Mr. WHALLAMS: Mr. President if the Separter from Wash

Mr. WILLIAMS. Mr. President, if the Senator from Washington will permit me, in order to get rid of a routine matter

Mr. POINDEXTER. Certainly.
Mr. WILLIAMS. I ask to go back to line 4, on page 277, so as to clarify the matter to which the Senator from New Jersey [Mr. Hughes] called attention. Beginning with line 4, on page 277, before the word "acts," I move to strike out "all" and insert "no"; in line 5, after the word "limitation," to insert "now in force"; in line 8, after the word "shall," to strike out the word "not" and after the word "thereby" to strike out the semicolon and the words "and all" and insert "so far as they affect"; and in line 11, after the word "act," to insert the word "which."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 277, line 4, strike out the word "all" and insert the word "no" before the word "acts"; in line 5, after the word "limitation," insert "now in force"; ine o, after the word "limitation," insert "now in force"; in line 8, after the word "shall," strike out the word "not," and after the word "thereby," in the same line, strike out the semicolon and the words "and all" and insert "so far as they affect"; and in line 11, after the word "act," insert the word "which," so as to read:

No acts of limitation, now in force, whether applicable to civil causes and proceedings or to the prosecution of offenses or for the recovery of penalties or forfeitures embraced in or modified, changed, or repealed by this act, shall be affected thereby, so far as they affect suits, proceedings, or prosecutions, whether civil or criminal, for causes arising or acts done or committed prior to the passage of this act, which may be commenced and prosecuted within the same time and with the same effect as if this act had not been passed.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. POINDEXTER. Mr. President— Mr. GALLINGER. Will the Senator from Washington per-

Mr. POINDEXTER. Certainly.

Mr. GALLINGER. I presume the Senator proposes to discuss his amendment.

Mr. POINDEXTER. Yes; but I do not desire to discuss it this evening. My purpose in addressing the Chair was to ask that it might go over to some other time.

Mr. GALLINGER. It will go over if no action is taken. I was about to suggest that we have put in a long day and it is Saturday. I presume the Senator from North Carolina is ready to lay the bill aside.

Mr. SIMMONS. I suppose the Senator from Washington

simply offered his amendment this afternoon for future discus-

Mr. POINDEXTER. Yes.

Mr. SIMMONS. The hour of 6 o'clock having arrived, I will ask that the bill be laid aside.

ALEXANDER HAMILTON'S REPORT ON MANUFACTURES (S. DOC. NO. 172).

Mr. SMOOT. Mr. President, if the bill is laid aside, I wish

to make a request.

ask unanimous consent that a communication to the House of Representatives on December 5, 1791, by Alexander Hamilton, Secretary of the Treasury, on the subject of manufactures, and particularly the means of promoting such as will tend to render the United States independent of foreign nations, and

Mr. SMOOT. Robert J. Walker's report was printed by the Senate as a document in the last Congress.

Mr. WILLIAMS. Have Gallatin's reports under Jefferson

and Madison ever been printed?

Mr. SMOOT. If the Senator wants to have those printed he

himself can ask to have it done. Does the Senator object?
Mr. WILLIAMS. Yes; if you challenge me to object, I do. [After a pause.] Mr. President, being assured that the Senator from Utah smiled when he addressed me in that tone of voice

a moment ago, I will withdraw my objection to his request.

The VICE PRESIDENT. The objection is withdrawn, and if there be no further objection, it is so ordered.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the con-

sideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until Monday, September 1, 1913, at 11 o'clock a. m.

# HOUSE OF REPRESENTATIVES.

Saturday, August 30, 1913.

The House met at 11 o'clock a. m., and was called to order by Mr. Hav as Speaker pro tempore. The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

O Thou great Jehovah, King of Kings and Lord of Lords, our Father, whose wisdom is attested in an infinite variety of ways and means, whose power is revealed in the stupendous worlds around us swayed by Thy will, whose love pours out upon us in a thousand blessings day by day, awaken in our hearts a holier reverence, a profounder faith, a larger hope, a love supreme, that we may conform our thoughts to Thy thoughts, our ways to Thy ways, as they have been revealed to us in the sublime life and character of Thy Son, Jesus Christ.

The Journal of the proceedings of yesterday was read and approved.

RESIGNATION OF A MEMBER.

The SPEAKER pro tempore laid before the House the following communication:

House of Representatives, Washington, August 29, 1913.

Hon. Champ Clark, Speaker of the House of Representatives.

SIR: I beg leave to inform you that I have this day transmitted to the governor of West Virginia my resignation as a Representative in the Congress of the United States from the first district of West Vir-

Respectfully,

JNO. W. DAVIS.

#### HETCH HETCHY.

Mr. FERRIS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Hetch Hetchy bill, H. R. 7207, and pending that I ask unanimous consent that the general debate be concluded at 1 o'clock. give us two hours, one hour to be controlled by gentlemen on the other side, either the gentleman from Illinois [Mr. MANN] or the gentleman from Wyoming [Mr. Mondell], as they prefer,

and one hour to be controlled by myself, in charge of the bill.

The SPEAKER pro tempore. The gentleman from Oklahoma asks unanimous consent that the general debate in Committee

of the Whole be concluded in two hours.

Mr. FERRIS. At 1 o'clock.

The SPEAKER pro tempore. One hour to be controlled by the gentleman from Oklahoma [Mr. Ferris] and one hour by the gentleman from Illinois [Mr. Mann]. Is there objection?

Mr. MANN. Reserving the right to object, the gentleman from Idaho. Mr. French, desires 30 minutes; my colleague from Illinois, Mr. Thomson, desires 30 minutes, both being in favor of the bill. The gentleman from Minnesota, Mr. Steenerson, desires 30 minutes in opposition to the bill. The gentleman from Minnesota, Mr. Steenerson, desires 30 minutes in opposition to the bill. The gentleman from Minnesota, Mr. Steenerson, desires 30 minutes in opposition to the bill. man from California, Mr. Kahn, desires 25 minutes, and the gentleman from California, Mr. Bell, yesterday desired not more than 10 minutes. The gentleman from California, Mr. Kent, desires some time.

Mr. FERRIS. I want all of these gentlemen to have time, just as the gentleman does.

Mr. MANN. And the gentleman from New Hampshire [Mr. Reed] desires some time.

Mr. FERRIS. As I understand, the gentleman from New Hampshire [Mr. Reed] does not desire a long time.

Mr. REED. Five or ten minutes.
Mr. MANN. Who else on that side desires time?

Mr. FERRIS. I do not know of anyone else. Mr. Kent is a member of the committee, Mr. Thomson is a member of the committee, Mr. French is a member of the committee.

Mr. MANN. I suggest to the gentleman from Oklahoma that he make his request, then, that in the general debate the gen-tleman from Illinois, Mr. Thomson, be given 30 minutes, the theman from 11111018, Mr. Thomson, be given 30 minutes, the gentleman from Idaho, Mr. French, 30 minutes, the gentleman from Minnesota, Mr. Steenerson, 30 minutes, the gentleman from California, Mr. Kahn, 25 minutes, the gentleman from California, Mr. Kent, 10 minutes, and the gentleman from New Hampshire, Mr. Reed, 10 minutes, and that the general debate be then closed.

Mr. FERRIS. How much time will that make?

Mr. MANN. Make the request in that way, and if anyone else wants to be heard, he can be heard under the five-minute

Mr. FERRIS. Perhaps we had better save 10 minutes for the committee. That will make 2 hours and 25 minutes in all. Mr. MANN. Do not limit it by fixing the time, but give the

time to the gentlemen named.

Mr. FERRIS. I think that is proper. Then, Mr. Speaker, I ask unanimous consent that at the end of the time which I will designate general debate be closed; that the gentleman from Idaho, Mr. FRENCH, have 30 minutes and the gentleman from Minnesota, Mr. Steenerson, 30 minutes, the gentleman from Illinois, Mr. Thomson, 30 minutes, the gentleman from California, Mr. Kahn, 25 minutes, the gentleman from California, Mr. Kent, 10 minutes, and the gentleman from New Hampshire, Mr. Reed, 10 minutes, and I will reserve 10 minutes for the committee in the event that some one may come in and want it.

The SPEAKER pro tempore. The gentleman from Oklahoma, Mr. Ferris, asks unanimous consent that the gentleman from Idaho, Mr. French, have 30 minutes, the gentleman from Illinois, Mr. Thomson, 30 minutes, the gentleman from Minnesota, Mr. Steenerson, 30 minutes, the gentleman from California, Mr. Kahn, 25 minutes, the gentleman from New Hampshire, Mr. Reed, 10 minutes, the gentleman from California, Mr. Kent, 10 minutes, and the gentleman from Oklahoma, Mr. Ferris, 10 minutes.

Mr. MANN. And the gentleman from California [Mr. Bell] was to have 10 minutes if he desired.

The SPEAKER pro tempore. After which the general debate

shall be closed. Is there objection?

Mr. STEENERSON. Reserving the right to object, I desire to inquire whether the order in which the speeches are to be delivered will necessarily be as indicated?

Mr. MANN. Oh, no.

Mr. STEENERSON. I should like to come in later. I want to hear all the arguments for the bill, or as many of them as I can.

Mr. FERRIS. The order of the speakers will not be fixed in that way.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MANN. And then at the end of that time the general

debate is to be closed?

The SPEAKER pro tempore. At the end of that time the general debate is to be closed. The gentleman from Oklahoma [Mr. Ferris] moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of H. R. 7207.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, with Mr. Foster in the chair.

Mr. KENT. Mr. Chairman, I am not going to postpone action on this bill by length of talk. I do not believe in much talk, anyway. I merely wish to say that for my part, having spent two months in hard work upon this bill in the Public Lands Committee, having attended all the hearings, heard all the objections, that I believe this bill represents a higher ideal of conservation than any bill that has come into this House. The ideal conservation is public social use of resources of our country without waste. When we reach the proposition of the use of water we are perfectly certain that the waste occurs by its nonuse. There has been a great outcry made about spoliation of the national parks. Anyone who will take the trouble to read the report and the hearings will find that this so-called spoliation does not exist; that the claim of spoliation has come in a most exaggerated and untruthful form.

Now, I shall not take up the task of answering the untruths and exaggerations at length, because the gentleman from Illinois [Mr. Thomson], a member of the committee, has taken that duty upon himself. My ideal of conservation would teach that if Niagara Falls could be totally used up in alleviating the burdens of the overworked in sweatshops of New York City I should be glad to sacrifice that scenic wonder for the welfare of humankind. Or if Niagara Falls could be turned in to slush out the greed, corruption, and misery of New York and others of our great cities, that, too, would be worth the sacrifice.

I can lay claim to being a nature lover myself. I think that is a matter of record. I am recognized as a conservationist. As a nature lover and a conservationist I certainly believe what I stated in the beginning, that this bill is the highest and best type of conservation. All public interests are protected. The people reap an untold benefit. [Applause.] Gentlemen of the House, I will detain you no longer. I yield back the balance of the transfer of the state of the s

Mr. REED. Mr. Chairman, it is with some reluctance that I engage in the debate in relation to this stupendous proposition of furnishing the cities of California—San Francisco and the bay cities—the privilege of invading the national park for the purpose of securing an adequate water supply. I have listened to the debates very closely upon both sides, and I want to say that I consider the debate of the committee in relation to this bill to be eminently fair, and their side of the proposition to have been ably set forth.

The gentleman from Wyoming [Mr. Mondell] yesterday in his speech made a masterly effort and set forth the proposition as I see it, and as I hope it will finally be adjusted. I have no desire, however, to vote against any proposition that will alleviate the condition of any city that is without an adequate water supply, and shall do so with some reluctance. In his remarks yesterday he proved to my satisfaction that there is an abundance of available sites, conveniently adjacent, which can be developed in the way of an adequate water supply for San Francisco and the bay cities without invading the reservation of Yosemite National Park, which has been acquired and is

now maintained at an enormous expense by the United States Government.

In the State which I have the honor to represent we have forest reserves that have been acquired by purchase, and the people of New Hampshire look upon the White Mountain Forest Reserve, no less beautiful than your own beautiful California park, with a great deal of pride; and I am sure that they would rise up in just indignation should either a private individual or a municipality attempt in any way to invade the White Mountain Forest Reservation. I am inspired to speak a word on this subject because of the fact that I have received over the signature of Philip W. Ayres, the chief forester in New Hampshire, representing 2,300 foresters in my State, a protest against the Hetch Hetchy bill being enacted into law.

Many things have been said here in all fairness that tend to prove to me that there is a better way proposed in which San Francisco and the bay cities may have an adequate supply of water, a better way than taking it from the park that is a source of pride to every patriotic American citizen, and I believe that when the bill which will be presented as a substitute measure to the House by the distinguished gentleman from Wyoming [Mr. Mondell] it will be in such language and contain such features as will be perfectly satisfactory to the framers of this bill and the Committee on Public Lands.

It is with some temerity that I oppose any proposition which has the indorsement of such a body of men as have been reported to be in favor of this bill, and I refer to Secretary Lane, to Mr. Johnson, to Mr. Pinchot, and to Mr. Graves, the Chief Expression of Apportus. I have passengely

Forester of America. I have personally— Mr. MANN. Will the gentleman yield?

Mr. REED. I will.

Mr. MANN. The gentleman does not mean Mr. Johnson is

in favor of this bill?

Mr. REED. I have understood him to be, although adverse comment has been made upon the proposition and it has been contended, I believe, he is in favor of the bill, although Mr. Mondell in his speech on yesterday emphasized the fact that he was not.

Mr. MANN. I am quite sure no member of the committee has ever pretended Robert Underwood Johnson was in favor of this bill.

Mr. REED. I know that Robert U. Johnson has sent out a circular in which he condemns in no uncertain language this proposition, but, unless I am mistaken, I think I understood one of the gentlemen representing the committee to say that his opposition had been withdrawn and that he was now in favor of the bill. If I am in error in regard to that, I am glad to be corrected, and I am very glad to know that his opposition—

Mr. MANN. I think the gentleman is in error; and if not,

the gentleman who made the statement was in error.

Mr. REED. I now yield to the gentleman from Minnesota. Mr. STEENERSON. I simply want to confirm what the gentleman from Illinois [Mr. Mann] has said, that this gentleman is opposed to this bill, and I shall elaborate upon that when

my time comes to address the committee. Mr. REED. I am very glad to know that. In my State just recently there have been several cities in the eastern section endeavoring to procure an adequate water supply, and it was suggested they might possibly desire the privilege from Congress of going into the White Mountain Forest Reservation for the purpose of installing a water system. Indignation of men prominent in reservation organization was rife at the very suggestion of the proposition, and I am sure there will be an uprise of opposition should invasion for that or any other purpose be attempted. The committee have made an exhaustive and painstaking effort, I am sure, and are absolutely honest in their convictions that no great harm can grow out of this thing. I desire, however, to say in conclusion, Mr. Chairman, that once our public parks or domain are trespassed upon we have established a very bad precedent, and other requests of like character will follow in rapid succession, and for one I do not care to support a proposition which in effect lets down the bars and invites other propositions of like character to be made to this House for our consideration.

Mr. FRENCH. Mr. Chairman and members of the committee, there is one thing especially that makes it seem to me that a member of the committee outside of the State that is interested should say something upon this question, and that is the report that has appeared in numerous papers that this is a matter that was considered by the committee at a time when it could not be expected that the committee would give serious attention to matters before the Congress; that it was a sort of recess period for all committees aside from those having consideration of the tariff and the currency questions, and that possibly this bill may have been reported without the consideration that

it ought to have had. I want to say with respect to that idea that the Committee on Public Lands has been most faithful in the examination of all the evidence brought before it and, indeed, have been to a great deal of pains to hunt up evidence, either favorable or unfavorable, looking to the merits of the proposition, and I can not fail at this time to pronounce my approval upon the chairman of the committee [Mr. Ferris] for his zeal and faithfulness in working to attain a right and just solution of the problem that has been pending in Congress for a number of years,

The subject matter of the present bill is not at all new to me as it is brought before Congress at this time. I was a member of the Public Lands Committee during the Fifty-ninth and Sixtieth Congresses, and at that time a bill somewhat similar to the present one, although not so carefully prepared,

in my judgment, was considered.

During the Sixtieth Congress the committee held extensive hearings upon the whole subject and received the testimony of many persons who favored the proposition, and as well the testimony of those who were opposed to the legislation. During the last Congress the matter was again carefully considered by the Public Lands Committee, and while I was not a member of the committee I was able to gather further information through the hearings that were held.

In the present Congress the proposition again has been brought to our attention, and the Committee on Public Lands has held extensive hearings and has had the benefit of the comprehensive reports made upon the subject by engineers of the city of San Francisco, the Advisory Board of Army Engineers of the United States, and the evidence of numerous witnesses who have appeared before the committee in support of

the proposition or in opposition thereto.

This is a measure that is deserving of the full inquiry and consideration that has been given to it by the Committee on Public Lands. It is a proposition that involves the granting to certain municipalities certain rights within the public domain that when once granted can not be withdrawn and that will entail an expense upon the grantees of something like

Not only this, but the measure is important because it raises the question of the extent to which the Federal Government may go in the control of the use of natural resources encompassed within a State, and is of further importance because it proposes the modification in an important way of a great national park set apart by act of Congress as a park on account of its natural beauty and the wonders contained within its

THE PROPOSITION.

Briefly stated, the proposition embraced within the bill is to grant to the city and county of San Francisco and such other municipalities as may, under the terms of the bill, join with the city and county of San Francisco, the right to construct a dam in the Hetch Hetchy Valley and to overflow a portion of the valley by converting it into a reservoir; to maintain suitable works for the diversion of the waters collected within the park and for the handling and control of the same, and the right to use as supplemental to the main purpose of the grant any power that might be generated as a result of the works so constructed.

The bill provides that in consideration of this grant certain responsibilities shall be placed upon the grantees toward the Government, and as a condition precedent to the grants contained in the bill the grantees recognize the rights of certain

irrigation districts in the State of California.

Probably I should say that as part of the proposition it is specifically set forth that nothing in the act shall interfere with the rights enjoyed by the citizens of the State under the laws of California. Further, in connection with the proposition of enacting this legislation, the Congress has been called upon to consider the question of necessity of an additional water supply for the city and county of San Francisco, the question of whether or not the proposed water supply is the one that should be granted, taking into consideration the economic conditions that have to do with other water sources and with the water source with which the proposed Hetch Hetchy Dam is related.

The details of the proposition I shall consider later.

NECESSITY FOR THE PASSAGE OF THE BILL.

The idea that has impressed me most deeply as one that should control in the consideration of this measure is the necessity of the city of San Francisco to acquire an additional water supply. I believe that it is the universally accepted doctrine that the highest use of water is its use for domestic purposes.

In the section of country that lies below the Hetch Hetchy Valley there is not a sufficient rainfall to make the country abundantly productive in the absence of irrigation. In fact, California, as the other States of the West, must consider care-

fully and well the question of husbanding the water that falls within its area. Forever, so far as we can now know, the State will need to consider the relative uses of water and determine the question of right of use of water upon the basis of that which may be accepted as the highest use and the relative rights to use when the more important uses have been taken care of.

San Francisco, including the county of San Francisco, contains a population at this time of about 417,000 people. This population is supplied with water by the Spring Valley Water Co., which receives its water in part from the San Francisco peninsular system and in part from the Alameda Creek system. This company furnishes something like 40,000,000 gallons daily to the people of San Francisco.

In addition to this a large part of the city is required to obtain its water from private or public wells. Something like 5,500,000 gallons daily are obtained in this way. The total amount of water used per capita is about 103 gallons. comparison of the total amount used per capita with the total amount used per capita in other cities I find that the city of

San Francisco uses far less than is usually required.

As further evidence of this same general statement, the city of San Francisco is at present required to exercise the utmost care in the use of her water. In some places spigots are re-quired to be turned on during the night so that a small amount of water will be collected for ordinary household uses the next day. In all parts of the city the citizens are limited or denied the right to use water upon their lawns. In addition to this the city of San Francisco has built at large expense an auxiliary water system by which it uses salt water from the bay in fighting fire, in flushing sewers, and upon the streets. More than this, in my judgment, it was very clearly demonstrated to the committee that the Spring Valley Water Co. has practically reached the limit of its possibilities for the supplying of water to the city of San Francisco from the sources upon which it is now drawing.

Not only are the city and county of San Francisco face to face with the necessity of an adequate water system, but sur-rounding San Francisco Bay are other municipalities which are also in vital need of water supply and without the ready means at hand to inaugurate or establish an adequate system.

I shall not enumerate all the municipalities that are included I said that the population of the city and county of San Fran-I said that the population of the city and county of San Fran-

cisco is about 417,000. The people of the additional bay cities that are approaching the time when adequate water systems will need to be installed is about 358,000, making a total population in the bay cities and communities of 773,000 people. At this time there is used by these people 133,000,000 gallons daily, of which amount approximately 54,000,000 gallons daily is used for irrigation, leaving a balance of 85,000,000 daily, or 110 gallons per capita.

No definite figure can be given as representative of the per capita consumption of water in the different cities of the United States. Different standards have been adopted in various places, and in some instances it is shown that the use is as low as 60 gallons per capita, while in others the per capita use is as high as 300 gallons. I believe, however, that it is fairly well established that 130 gallons per capita is not an unreasonable amount of water to be furnished for the consumption of the people of the city, and upon this basis not only the city of San Francisco but all the other bay cities as well are using less than should

be provided for them.

We can not look, however, to the immediate population of the city of San Francisco and to the population of the other bay cities and counties and upon the basis of their present population determine the question of reasonable water supply. Any water system that may be constructed, whether it will be upon the basis of sinking wells, upon the basis of diverting the waters of the Sacramento River, or upon the basis of collecting the water in the Sierra Mountains, conveying it by enormous pipes to the several cities, must be constructed at an immense cost, and ought to be constructed in such a manner as will permit the ultimate development of a system in the most economical way, adequate to meet the requirements of a greater future population.

If it shall develop in the consideration of the various proposed systems that by an act of Congress the people of San Francisco and the other municipalities interested may be provided with a water supply that at once will be adequate and at the same time economical of development, it is the duty of Congress to so provide.

We can not know what the future population of San Francisco and the other bay cities will be in 25 or 100 years from

now. We do know something of the development that has been made during the last 50 years, and upon the basis of that development and upon the basis of that which is believed to be reasonable growth during the coming years I have no doubt that the population at the end of the present century will be not 773,000 people, but nearly 4,000,000 people, or, as has been estimated by those who have made careful examination of the question and as is indicated in the report by the Board of Army Engineers, 3,632,000 people.

It is my judgment that the city of San Francisco and the other bay cities ought to consider the question of establishing such an adequate water system as will supply not only the population of the present but also the population that will be in these cities in years to come. If the supplying of a population with water were a matter of small expense, these municipalities would need to anticipate the future by only 10 or 15 years, and as the population shall increase continue to add to the

In some places water systems of this character may be developed. The examinations that have been made, however, of the water sources from which San Francisco and the other bay cities may draw, indicate that such condition does not prevail there, but that whatever system may be established will entail the expense of many millions of dollars, and hence it is important that the right system be selected now and in the interest of economy it is important that the works that may be established now shall be of use in supplying still greater populations of the various cities during the years to come.

POSSIBLE SOURCES OF WATER SUPPLY.

As might be expected, cities situated as are San Francisco, Oakland, Alameda, and the other bay cities, surrounded as they are in part by mountains and valleys and at the mouth of the river that drains with its tributaries a large section of the State of California, are not limited to any one particular water source. There are numerous water sources. Some of them would supply water for 25 years for a population that in all probability will be in the bay cities by that time. Other water sources would supply water for a period of 50 years. Other water sources, or a combination of water sources, would supply the population that will in all probability be in these municipalities at the end of the present century.

The development of some of these water systems would mean a tremendous expense, and the one question that the city of San Francisco has spent hundreds of thousands of dollars to determine, and I think wisely, is the system that in the great long run will be the most economical, will furnish the most satisfactory water, and will be, generally speaking, most accept-

able.

It is needless to say that the present water source will be utilized in connection with whatever system may be developed. It is true that a private company owns the system that supplies most of the water to the city of San Francisco. Plans are now being carried through by which the city of San Francisco is to take over the water system of the Spring Valley Water Co., and I have no doubt that this will be consummated within the next six or eight months.

It is estimated that by the end of the present century to supply the population of the bay cities with 130 gallons daily per capita a system would be required that would furnish daily a total of 441,000,000 gallons. The present system of San Francisco, including the system of the Spring Valley Water Co. and the private and public wells, furnishes approximately

43,000,000 gallons daily.

I said a little while ago that this amount could be regarded as available under whatever system might be adopted, and hence it is necessary to figure upon the basis of an additional water system that will ultimately supply some 400,000,000

gallons per day.

San Francisco has expended a vast amount of money in exploring the various possible water systems and finally, on May 18, 1910, there was appointed a board of Army officers from the Corps of Engineers, consisting of three members, for the purpose of acting in an advisory capacity to the Secretary of the Interior on the question of the use of the Hetch Hetchy Valley

for a reservoir for water as a part of the water system.

I need not go deeply into the question of the reason why the board was appointed. The Members of the Congress are doubtless familiar with the fact that under the general laws the Secretary of the Interior has the power to issue a permit to the city of San Francisco for the purpose contemplated in the pending bill. It was for the purpose of assisting the Secretary in arriving at a right conclusion that he asked that such a board be appointed. He finally determined that although his office had the power to issue a permit, the amount involved was so stupendous that it would be altogether advisable to

have the matter acted upon by Congress. More than that, the city of San Francisco would undoubtedly hesitate to expend a large amount of money in the development of a water system if the basis for the right of construction of parts of its system should rest upon a permit of revocable character of an officer of the Government.

So much for the reason why the board was appointed. board was made up of three eminent men, namely, Col. John Biddle, Lieut. Col. Harry Taylor, and Maj. Spencer Cosby. This board was assisted by Mr. H. H. Wadsworth, assistant engineer, Engineer Department, United States Army, who had been employed on work in connection with the California Débris Commission and with river work in California for about seven years and who was familiar with the general watersupply conditions in California.

A careful examination was made by him of all the sources of water supply and he personally inspected all the more important sources and surveyed many of the proposed reservoir

Col. Biddle was stationed in San Francisco from 1907 to 1911, and was in general charge of the rivers in California and became quite familiar with them and with the water situation in the State.

During one month in 1911 and during another month in 1912 the board met in San Francisco. It examined the reservoirs within the Yosemite Valley and several other proposed sites and made a very comprehensive inspection of the same.

In addition to this the Board of Engineers had the assistance of the data collected from other sources, including the data collected by the engineers of the city of San Francisco.

I am not an engineer, and I do not know that any member of the Committee on Public Lands is an engineer. The members of the committee and the Members of the Congress in matters such as this must depend upon the technical advice and information of those who are most competent to advise, and the conclusion of myself and the conclusion, I believe, of the members of the committee are based upon the facts brought before the committee by these eminent men who have made an examination of the question. In passing upon what is meant by an available source of water supply, the board assumed the following conditions:

First. The water yield shall be sufficient under the most severe conditions of run-off to meet the requirements of the communities and of good potable quality.

Second. The water can be collected and delivered with reasonable

conomy.

Third. No injury shall be caused without proper compensation to any industries or lands that have a just claim upon the water.

Measured by this standard, which I think the Members of this House will agree is reasonable, the board found the following sources of water available for supplying the bay cities:

Eel River, Putah Creek, Clear Lake and Cache Creek, McCloud River, acramento River, Feather River, Yuba River, American River, Lake ahoe, Mokelumne River, Stanislaus River, San Joaquin River, Tuol-Tahoe, Moke umne River.

I desire at this time to insert in my remarks the description of these various sources given by the Army board in their report of February 19, 1913:

(a) Eel River rises in Mendocino County and flows northwest to the Pacific. Investigations show it could be developed to supply from 170,000,000 to 200,000,000 gallons daily of suitable water. As this amount is not sufficient and as it would be unduly costly to develop this in connection with other supplies, it is not considered available and no estimate of cost has been made.

(b) Putah Creek, a small branch of the Sacramento River, rises in the Coast Range. Its discharge is inadequate and there is no available storage.

(b) Futan Creek, a small branch of the Sacramento River, rises in the Coast Range. Its discharge is inadequate and there is no available storage.

(c) Clear Lake and Cache Creek: Cache Creek rises in the Coast Range and is tributary to the Sacramento River. Clear Lake empties into Cache Creek. Their use would interfere with irrigation development and the water is not of the excellent quality of other sources.

(d) McCloud River rises on the south side of Mount Shasta and, uniting with the Pitt River, forms the principal tributary of the upper Sacramento. Its least flow is about 1,200 cubic feet per second, or about 770,000,000 gallons daily, amply sufficient for all possible needs. The water appears to be good and pure. No reservoir would be necessary as far as quantity is concerned. If desired to hold in reservoirs for sanitary reasons, suitable sites could doubtless be found in Contra Costa County if not in the McCloud River Basin. This source is considered a feasible one and it will be discussed in greater detail later in this report.

(e) Sacramento River: The plan in this case would be to pump water from near Rio Vista, the point nearest to San Francisco at which it is always free from sea water, and filtered before delivery. The cost of delivery would be relatively great on account of the filtering and pumping. The water, though harder than Slerra water, would be good in quality and ample in quantity. As population and Irrigation increase in the valley, the quality is liable to deteriorate. This is considered a perfectly practicable source, if no better is available. In cost for 400,000,000 gallons daily, and in quality it is inferior to the Tuolumne supply.

(f) Feather River: This is the principal tributary of the Sacra-

(f) Feather River: This is the principal tributary of the Sacramento River. The supply for city purposes can be made ample by storage. On Indian Creek, a branch of this river, Indian Valley affords an excellent and economical reservoir site. The city has made no surveys nor estimates as to the cost of the use of this valley. The elevation is about 3,500 feet.

From such data as are on band, based on a survey made in connection with the work of the California Debris Commission, the cost of a reservoir in Indian Valley is estimated at \$2,384,000. This estimate proposes a dam 120 feet high above low water of the creek, and the reservoir would have a capacity of 600,000 acre-feet, or 196,000,000,000 gallons. Indian Valley comprises about 13,600 acres of good agricultural land largely devoted to dairying, and three small towns, of which two would be flooded by the construction of the reservoir. The existing water rights are not known. From the Geological Survey map it would appear that the wateraked would give the needed supply of water. To protect the water a continuous aqueduct would have to be built from Indian Valley, and this, on account of the ruggedness of the country, would necessitate, probably, a more or less continuous tunnel for about 50 miles, which would necessarily be very costly. On account of existing water-power developments it is questionable if the amount of water could be taken out of the river above the power installation. If allowed to flow in the river, the water would doubtless need to be filtered. If filtration is undertaken, the lower Sacramento River offers the advantage of shorter aqueduct and more ample supply without storage; in other words, will be more economical. As there are other possible available sources superior to the Feather River, it has not been further considered by the board.

(g) Yuba River: The Yuba River is a branch of the Feather River. By a system of natural and artificial reservoirs on the Middle and South Forks a supply of 164,000,000 gallons daily of suitable water can be secured at a reasonable cost. While the quantity is not sufficient, the Yuba might be combined with other sources so as to give a satisfactory supply.

By taking the full flow of the Yuba River a sufficient quantity of

South Forks a supply of 164.000,000 gallons dally of suitable water can be secured at a reasonable cost. While the quantity is not sufficient, the Yuba might be combined with other sources so as to give a satisfactory supply.

By taking the full flow of the Yuba River a sufficient quantity of water for city purposes might be obtained. The point of diversion, however, would be necessarily so near the mouth and at such a low elevation that pumping would be required. As the storage reservoirs would have to be much higher up in the mountains, the purifying effect of storage would be lost and filtration be advisable. As compared with several other sources, the use of the full flow does not appear advantageous. Much of the flow has been taken for power and irrigation, and the cost of extinguishing these rights has not been determined.

(h) American River: This is a tributary of the Sacramento River, entering it at the city of Sacramento. Immediately south of the watershed of the American River lies the watershed of the Cosumes, a tributary of the Mokelumne. Owing to the topographical situation of the two watersheds they have usually been combined when considered as a source of supply for the bay cities. This apparently gives the most satisfactory results and has been the method considered. It is estimated that about 220,000,000 gallons daily of entirely suitable water can be obtained from these sources. By combination with other sources these could be made an available source of supply. A thorough discussion of this source is made in report of Mr. J. H. Dockweller.

A further possible development of water from the North Fork of the American River has been suggested, and is known as the Glant Gap supply. This has not been reported on by the city, for the apparent reason that it can not be combined economically with the rest of the North Fork supply.

(i) Lake Tahoe: This lake lies in part in California and in part in Nevada. The water is extensively used for power and irrigation purposes, especially in the latter Stat

up to 200,000,000 gallons daily, and even more. Most of these estimates appear too large, and probably only about 128,000,000 gallons daily could be counted on. It could be used in connection with other supplies.

(k) Stanislaus River: This is one of the tributaries of the San Joaquin. Its waters are quite fully utilized by power companies and for irrigation, and only about 57,000,000 gallons daily could be counted on as available for water supply. It could be used in connection with other supplies.

(l) San Joaquin River: The development of this source would be similar to that of the lower Sacramento River by filtration and pumping. As the water of the San Joaquin is inferior in quality and quantity to the Sacramento, with no advantage as to cost, it need not be further considered except for possible temporary use during construction of the aqueduct.

(m) Tuolumne River: This is one of the main branches of the San Joaquin. It is claimed that from this river the full 400,000.000 gallons daily can be obtained after making allowances for all existing rights. The quality of the water is excellent and the cost of delivery relatively small. It is the source of supply desired by San Francisco and the other bay communities. Lake Eleanor and Cherry Creek are a part of the Tuolumne system.

There are other rivers to the south, such as the Merced and the upper San Joaquin, which might, if it were necessary, be used. Their distance from San Francisco and their present use for irrigation render them, however, inferior as compared with other available sources.

It will be seen from the foregoing that the available sources

It will be seen from the foregoing that the available sources that may be considered as practicable are as follows:

Mill	
gallons	daily.
McCloud River	400 +
Sacramento River	400 +
Tuolumne River	400 +
Yuba River	164
American-Cosumnes	220
Mokelumne River	128
Stanislaus River	57

The first three of these alone meet the requirements of the bay cities for any considerable length of time so far as quantity of water may be concerned. These sources are the St. Cloud, the Sacramento, and the Tuolumne Rivers.

Of the following four sources at least three of them would need to be combined in order to produce the amount of water equal to the anticipated needs of the municipalities in question: Yuba River, American-Cosumnes, Mokelumne River, and Stanislaus River.

The report of the Board of Army Engineers goes into detail in indicating the comparative worth of the various systems that are deemed practicable. All of these systems contemplate the construction of vast aqueducts and the conveying of the water a distance of between 50 and 200 miles to the city of San Francisco. I am not competent to pass upon such engineering problems as the construction of dams, reservoirs, aqueducts, and the other parts of a comprehensive water system, and hence I shall give in a general way the conclusions of the Board of Army Engineers. Probably I should say at this place that a system that would be established in connection with the Sacramento River would require the establishment of an immense filtration and pumping plant, and I have no doubt that in spite of this the water would be of an inferior quality to the water that would be taken from the St. Cloud, the Tuolumne River, or the other systems that have been proposed. More than that, it is estimated by Col. Biddle that the use of water from the Sacramento River would be at a disadvantage to navigation of the Sacramento River, as this river is navigable well above tidal action.

It is estimated that the cost of establishing a water system with the Sacramento River as the basis would be \$107,000,000; the St. Cloud system could be developed at a cost of from \$71,000,000 to \$\$4.000,000. A combination of the Yuba, American-Cosumnes, Stanislaus, Mokelumne, or a combination of Lake Eleanor, Cherry, Stanislaus, and Mokelumne, could be made and an adequate system provided at a cost of from ninety-seven to ninety-nine millions of dollars.

The Hetch Hetchy system, which would include Lake Eleanor and the Tuolumne River, and which is the system that San Francisco desires, the Board of Army Engineers estimates could be developed at a cost of about \$77,000,000.

From this it will be seen that of the systems that are prac-

ticable the Hetch Hetchy system could be developed at the least cost to the city of San Francisco. More than that, the question of electric power that might be developed incidentally is a matter that should receive consideration. It is important from the standpoint of economy, and it is important from the stand-point of conservation, for it is desirable that the water that may be used may be made of the greatest use whether it be for domestic purposes, for irrigation, or for the generating of electric power.

The net value of a water-power development of the Yuba-American-Cosumnes-Mokelumne-Stanislaus Rivers is estimated at \$21,300,000, and it is estimated that 64,300 horsepower could be developed. The Lake Eleanor-Cherry-Stanislaus-Mokelumne system, it is estimated, is capable of a water development of 95,000 horsepower, valued at \$33,000.000. The Yuba-American-Cosumnes-Stanislaus-Mokelumne system, it is estimated, has power development of 62,000 horsepower, valued at \$24,300,000. The Hetch Hetchy project, which includes the use of Lake Eleanor and Tuolumne River, has a development estimated at 115,000 horsepower, valued at \$45,000,00. Again, it will readfly be seen that from the standpoint of conservation, the Hetch Hetchy project is by far most to be desired. From an examination of the facts as brought before the committee, which sustain in my opinion the brief outline that I have made, it is my judgment that the Hetch Hetchy system is the most feasible system, and I do not wonder that it meets with the approval of the engineers of the city of San Francisco, and that from an engineering standpoint it meets with the approval of the Board of Army Engineers.

## OTHER CONSIDERATIONS.

One of the other considerations that enter into the question is the use of the water of the various systems for other pur-There can be no higher use of water than its domestic At the same time I have no doubt that the question of feasibility of obtaining water from other sources beside the Hetch Hetchy deserves consideration, even though the city of San Francisco desires its water for domestic purposes. this idea in mind I made inquiry into the question of ultimate use of all the water from the various sources that might be considered as available for the water supply of San Francisco. Engineers did not hesitate to say, and it seems to be the universal testimony of those who have studied the question carefully, that the water of all the proposed systems will ultimately need to be used for domestic or other purposes. That being the case the committee can not say to San Francisco, "You shall take your water from the St. Cloud River because the waters of the Tuolumne and Lake Eleanor can be used for irrigation." We can not say that, because the waters of the St. Cloud River will ultimately be used for irrigation or for domestic purposes. We can not select any one of the systems proposed and say to San Francisco, "This is the system that will not need to be used for irrigation and consequently, although it will cost you more for the installation of your water system, it is required that you shall be to that expense in the interest of prime conservation which, in connection with water supply, is the best and complete use of all the water."

It may be that some years will pass before all the water in the various streams that have been considered as possible water sources for San Francisco will be utilized. A few years ago it did not pay to reclaim arid land unless the water could be diverted and turned upon the land at the cost of a few dollars per acre. To-day a higher standard is fixed and it is economical and profitable to reclaim land by irrigation at a cost of \$25, \$50, \$200, or more per acre, dependent upon the locality in which the land may be situated and whether or not the land shall be available for production of bulky commodities or for the production of commodities that require intensive cultivation and yield a vastly greater return per acre.

To-day, in the region that might be said to lie fairly under the Lake Eleanor and Tuolumne River Valleys, some 200,000 acres of land have been reclaimed. This land was naturally the land that could be reclaimed with the least amount of cost. Probably there is a vast amount of land in addition that could be reclaimed by the waters of the Tuolumne River, though it would not be economically wise at this time to use the waters

for that purpose.

### WHAT ARE THE TERMS OF THE BILL?

As has been stated in the report of the Committee on the Public Lands, the theory on which this bill is drawn is that the United States, having the sole jurisdiction over the Yosemite National Park, the Stanislaus National Forest, and the public lands that would be involved in the grant, has the right to refuse the grant and also has the right in making the grant to im-

pose certain conditions upon the grantees.

The bill grants to the city and county of San Francisco all necessary rights of way, not to exceed 250 feet in width, as in the judgment of the Secretary of the Interior may be required for the purposes of the act, through the public lands of the United States in the counties of Tuolumne, Stanislaus, San Joaquin, and Alameda, in the State of California, and in, over, and through the Yosemite National Park and the Stanislaus National Forest, or portions thereof lying within the said counties, for the purpose of constructing, operating, and maintaining aqueducts, canals, ditches, pipes, pipe lines, flumes, tunnels, and conduits for conveying water for domestic purposes and uses for the city and county of San Francisco and other municipalities; the right to construct, operate, and maintain proper equipment for the generation, sale, and distribution of electric energy; and, finally, such lands in the Hetch Hetchy Valley and Lake Eleanor Basin within the Yosemite National Park, and the Cherry Valley within the Stanislaus National Forest, as may be necessary for underground reservoirs, diverting and storage dams, and the uses incidental to the enjoyment of the grants.

In return for these grants the bill sets forth certain conditions. It is required that the grantees shall begin work under the grant within a certain definite time and that prior to beginning work shall file with the proper officers of the Government such maps and plats as may indicate the plan of work—rights of way desired—all of which must meet with the approval of the heads of the particular departments in charge of the Government property with which such documents have to do.

The grantee is required to build extensive roads and trails, and in its construction work shall cut only such timber as may be designated by the Secretary of the Interior or the Secretary of Agriculture where such timber is outside of the right of way; and, further, the grantee is required to construct and maintain bridges and crossings over right of way, construct and maintain fences, clear its right of way of débris and inflammable material, permit the free use by the Government of its trails, telegraph and telephone lines, railroad, and other utilities which may be constructed as adjuncts to the water-supply system. That the benefits of the grant shall attain to the highest use the grantee is prohibited in some respects and limited in others in its right to sell or let water or power that may be developed under the grants. The grantee is further required to compensate the Federal Government for the grant by paying \$15,000 annually for a period of 10 years, beginning 5 years after the passage of the act, \$20,000 annually for 10 years immediately thereafter and unless otherwise provided by Congress, \$30,000 annually for the remainder of the term of the grant. The moneys paid are to be kept in a separate fund by the United States and applied to park improvements, as designated by the

Secretary of the Interior. Congress retains the power to review the schedule referred to, and this the committee deemed wise because of the difficulty in arriving at a definite basis for making estimates.

While the city and county of San Francisco are the municipalities immediately interested in the passage of this bill, it is provided that such other municipalities or water districts may enjoy the benefits of the measure either through the consent of the city or in accordance with the laws. Finally, as an additional precedent, the bill recognizes existing water rights that have been acquired under the laws of California.

The maximum of 2,350 second-feet is recognized as embracing these priorities; and, further, the bill recognizes the rights of the irrigation districts to take 4,000 second-feet of water out of the natural flow of the Tuolumne River during the period of 60

days following and including April 15 of each year.

In connection with and in amplifying the grants that I have indicated, provision is made regarding sanitation, regarding the manner or use of water or of electric energy developed. In fact, the conditions precedent as they concern the city of San Francisco and the other cities that will be interested appear to meet with their approval. As they concern the Government they meet with the approval of the representative heads of the departments that chiefly have to do with the administration of the Government's properties. As they have to do with the rights of irrigators they meet with the very general approval of those most concerned. In addition to this, the city of San Francisco is required to deed to the Government all of its lands and properties in the Hetch Hetchy Valley or embraced in the region in question that it does not need for the purpose of developing the water system.

The city has already spent \$1,750,000 in the purchase of privately owned rights in the Hetch Hetchy Valley and the Yosemite Park. It owns two-thirds of the floor of the Hetch Hetchy Valley, and also owns a portion of the dam site. I do not hesitate to say that I would much prefer to have seen a grant made upon conditions somewhat differently indicated than they are in the pending measure. I would prefer to have seen the grantee and the irrigation districts interested enter into an agreement under the laws of California or adjust their differences through court decree, the same to be done precedent to the passage of this act. This seems to have been out of the question, however, and to require it to be done would mean to delay the pending measure for a length of time that probably is not warranted. I have been opposed to the principle of the Government attempting to adjudicate in any way water rights within the several States or to exercise control over water that, in my judgment, is under the control of the several States.

Upon a hasty reading of the pending bill there are some who

Upon a hasty reading of the pending bill there are some who may say that we are violating this very principle, and yet upon closer consideration and especially upon consideration of section 11 of the bill, which is the final section, I believe that one can not feel that such is the case. On the contrary, in the final section it is specifically set forth that nothing contained in the act shall be construed to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses or any vested right acquired thereunder. And the Secretary of the Interior in carrying out the provisions of the act is required to proceed in conformity with

the laws of the said State.

It is my opinion that the bill as originally drawn did not recognize the rights of the State to the control of waters with which this bill has to do. As a result, however, of earnest debate within the committee and careful consideration of the principles involved, the committee finally agreed upon language that could not be said to have the appearance even of adjusting water rights, but that recognizes certain rights and methods of handling water as a condition precedent and finally requires that the administration of the act, so far as it has to do with the waters that may be used, shall proceed in conformity with the laws of the State of California.

Assuming, then, that this particular water system is the one that is most feasible and the one that from an economic stand-point should be approved, it is my judgment that the bill fairly protects the rights of the Government and the public, as well as rights that to some extent will be articulated with the system when it shall be developed upon the one side, and upon the other

does justice by the grantees under the act.

### THE BARTELL REPORT.

It has been urged that the consideration of this bill should be deferred on account of the alleged suppression of what is called the Bartell report.

As a member of the Committee on the Public Lands, I was interested in the question of the Bartell report, as soon as the charge was made that there was such a report and that it had been suppressed. In view of the fact that the charge was made that the report contained evidence that was material and that had it been submitted to the Board of Army Engineers would have caused that board to have reached a different conclusion, I deemed it worth while to make an examination into the facts in the case. Now, what are the facts? Mr. Bartell was in the employ of the engineering department of the city of San Francisco. He was not the chief engineer, and the results of his examination and his conclusions can in no sense be regarded as the conclusions of the engineering department of the city of San Francisco.

It was brought out before the committee that there are in the employ of the city of San Francisco under the engineering department not less than 100 engineers occupying subordinate positions. The work performed by such engineers is of highest importance to the engineering department, yet to handle the work devolving upon the engineering force of a city like San Francisco there must be a responsible head, and this head must have the authority to accept, to reject, to be aided by, the reports and advice of the employees who may be under his direction. Mr. Bartell did make certain examinations under the direction of the city engineer of problems that have to do with the Hetch

Hetchy system.

The final report of the city engineer's office would necessarily not be in the name of Bartell, but would be in the name of the city engineer himself. The city engineer did not accept all of the findings of Mr. Bartell, but there was no mystery about his report, nor was there any reason for publishing his report any more than there would be reason for publishing all the various and multitudinous suggestions and temporary findings and reasonable deductions that were made from time to time by the numerous subordinates of the chief of the engineering department in the examination of the question of water supply for the city of San Francisco.

It happens that the report of Mr. Bartell is a little more favorable to a competing company that has water to sell, or claims that it has, and hence it has been seized upon as a document which, by its being alleged to have been suppressed. will thus be surrounded by mystery and create distrust in the minds of the Members of Congress and in the public mind as

well.

The fact is Mr. Bartell was consulted by Engineer Wadsworth, who was assisting the board of officers of the Corps of Engineers of the United States Army. Mr. Wadsworth was in the employ of the board. He had several conversations with Mr. Bartell, as is brought out in the hearings. He was generally familiar with considerable at least of the data obtained by Bartell and Bartell's deductions therefrom. not have seen the technical report that Mr. Bartell had made, and in all probability it did not occur to Wadsworth that Bartell had made a written report that it was desirable that he should see, and in all probability it did not occur to Bartell that the report that he had made a year ago should have been personally inspected by the Army board.

In the abundance of caution touching this report, one of the members of the Public Lands Committee, Hon. WILLIAM KENT, in the absence of the chairman of the committee, sent to the members of the Army board the transcript of the testimony that

was taken touching the Bartell report.

The chairman of the Board of Army Engineers, Col. John Biddle, replied under date July 31, 1913, in a letter that is published on pages 33 to 35, inclusive, of the report of the committee on the pending bill. In that letter the following statements occur:

NO SUPPRESSION OF DATA.

As to the Mokelumne River, it is stated in the testimony of Mr. Sullivan that Gen. G. H. Mendell, Corps of Engineers, reported favorably on the Mokelumne River as a source of supply. This report was dated about 1877, and provided for only 25,000,000 gallons daily, so that, of course, it has no bearing on the present investigation. Mr. Sullivan makes as his principal point the fact that a report by Mr. Bartell, assistant city engineer, in April, 1912, was never submitted to the Board of Army Engineers, and that if this report had been submitted to the conclusion of the board would have been very different. This report was not seen by the board. The board, however, attaches no importance to this fact. The assistant engineer in the employ of the board, Mr. H. H. Wadsworth, has written that he had several conversations with Mr. Bartell on the subject and was generally familiar with considerable, at least, of the data obtained by him and his deductions therefrom. The main point, however, is that the board itself had such independent examinations and investigations made of the Mokelumne, as well as other streams, as seemed necessary in order for the board to form its opinion on this source of supply. Mr. Bartell's report could not have changed the facts thus ascertained. The report of the chief engineer of the company was in the hands of the board.

ARMY BOARD GOT ITS OWN DATA.

To sum up, there is nothing in the testimony of Mr. Sullivan, and it is believed that there can be nothing in the report of Mr. Bartell, which would affect the conclusions of the board, for the reason, as stated

above, that the board obtained, as far as was considered desirable, its own data, excepting that which was of a public nature and therefore available to the board. As to the relative cost of the projects, the report indicates that the Tuolumne supply is much the more economical. The distance over which Mokelumne River water would have to be transported is about the same as for the Tuolumne and difficulties in construction of aqueduct are about the same, while the cost of the reservoirs is relatively very much greater. For the amount of water that is needed by the bay communities there can be no question but that the Tuolumne supply is more economical than any other and that the Mokelumne can be used only in connection with supplies from other sources, as it is not in itself sufficient.

FULL HEARING GIVEN COMPANY.

It might be added that the board gave to the Sierra Blue Lakes Water & Power Co., on July 5, 1911, a hearing, which was stenographically reported. At this hearing were present Messers. F. J. Sullivan, president; C. M. Burleson, chief engineer; James N. Gillett and W. H. H. Hart, attorneys for the company. Each opportunity was given them to thoroughly present the project, and in addition, a report on this source of supply, prepared by the chief engineer, Mr. C. M. Burleson, was submitted to the board.

Surely the facts brought out by Col. Biddle abundantly set at naught the question of the "suppressed report"; and, after all, suppose it had been suppressed, it was merely the judgment of one assistant engineer upon certain phases of the water supply problem and could in no way modify the facts that exist touching the merit of the Hetch Hetchy system or the other possible systems of water supply.

OPPOSITION TO THE MEASURE.

As the provisions of this bill have been considered for a good many years, opposition has constantly been manifest, and there

is opposition to-day to the pending measure.

There are some individuals within the Turlock-Modesto irrigation districts who are opposed to the measure, because they are quite satisfied with their present rights and fear that in some way the grant to the city of San Francisco under this bill will modify or jeopardize the same. It is my judgment that such will not be the case. Vested rights can not be disturbed by act of Congress, and more than that it is clearly apparent in the bill that its proponents are endeavoring to protect abundantly every vested right. Most of the irrigators within both districts have withdrawn their opposition.

There are those opposed to the bill who are interested in the reclamation of additional tracts of land and who desire to be recognized for water sufficient to reclaim their lands before any grant for dam site, rights of way, and so forth, as provided in this bill shall be made under which the waters that will be collected will be used for the city of San Francisco and the

other bay cities.

The committee has considered the claims of this character. It is the opinion, I believe, of most, if not all, of the members of the committee that the Congress can not adjudicate water rights within the States. Consequently, if there are any valid claims or rights that are prior to or superior to the rights of the city of San Francisco, those rights must be recognized and the grantees under this act will undoubtedly be required, if they obtain those rights, to pay for them either upon the basis of an agreement that may be made or a court decree after condemnation proceedings.

While it is not the province of Congress to adjust or attempt to adjust water rights, yet in making a grant such as that proposed in this bill it is my judgment that Congress can not be insensible to the reasonable economic use of the waters with which the grant has to do. It may be that there are some lands that could be economically reclaimed that lie under the valleys of Lake Eleanor, Cherry Creek, and Hetch Hetchy, but I can not but believe that these lands must be inconsiderable and that as a condition precedent to the passage of this act the grantees recognize the diversion of water sufficient to reclaim all lands that can be economically irrigated within any reasonable period

of time.

There are those opposed to this bill who believe that other sources of water supply are available. Some of them believe that the present system can be still further developed. Some of them have water sources of their own that they would like to sell to the city. Again doubtless, there are some who feel that the judgment of the engineers of the city of San Francisco is wrong; that the judgment of the board of Army engineers is not to be relied upon; that the judgment of Secretary Lane; Secretary Houston; Director Newell, of the Reclamation Service; Mr. Graves, the Chief Forester; Gifford Pinchot, and other men who have made a careful study of this whole matter is altogether wrong and that one of the other proposed systems should be adopted.

There is no way to meet the objection of those who urge the adoption of other water-supply systems aside from meeting it upon the basis of a close analysis of the merits of the respective systems. The Committee on Public Lands has given its earnest consideration to the merits of the systems proposed, and I believe undoubtedly feels that from an economic standpoint, both for the present and for the future, the system that will involve the construction of the Hetch Hetchy Dam is most desirable.

Another objection that from time to time has cropped out against the proposition embodied in the present bill is based upon the idea that the Government is not receiving an adequate consideration for the grant that it is proposed to make

If, as a matter of fact, the bill contemplated a straight gift to the people of San Francisco of water for domestic purposes, the measure would have abundant precedent in the acts of Congress where grants of somewhat similar nature, though probably of less magnitude, have been made for the benefit of the people of a community.

More than this, the Government is annually expending millions upon millions of dollars upon one project or another for the benefit, presumably, of the people, but as a matter of fact in such a way that the people of an immediate section interested receive the greatest benefit.

The Government has expended millions of dollars upon the harbors along the various coast lines of the United States. It is said that the people generally receive the benefit of these improvements. So they do, but the cities located upon the harbors receive a benefit of vastly greater character than the benefit that is received by the people generally living at some distance from the improvement that is made.

A similar illustration may be drawn from the millions of dollars that are expended annually for the improvement of the rivers of the United States. True, river improvement means great benefit to the people at large, but it is also true that the river improvement means vastly more for the people along the river that receives the attention of the Government than the people receive living at remote points from the water that is made available for navigation.

I could continue and draw similar lessons from a multitude of vast expenditures made by the Federal Government ostensibly in the interest of the great public, but where the people located near at hand to the improvements receive the greatest advantages therefrom.

I am in perfect accord with and shall support the policy of making these improvements, but at the same time no one can say that the expenses for the improvement of harbors, either in Boston or New York or elsewhere, or expenses incurred upon our navigable rivers do not help the local communities more than they help the people generally throughout the country, notwithstanding the fact that they are incurred ostensibly and really for the purpose of benefiting the whole country

Mr. TALCOTT of New York. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Idaho yield to the gentleman from New York?

Mr. FRENCH. I do.

Mr. TALCOTT of New York. Was it considered by the committee whether or not the Government should construct this

Mr. FRENCH. Oh, no. That is not a part of the proposition. I shall reach that presently. It has never been suggested that the Government should construct the work.

I was saying that even though the Government did not entail a responsibility upon the city of San Francisco, it would not be an unusual thing. But I am going to show pretty soon that we have placed a heavy responsibility upon the city in consid-

eration of the grant,
Mr. TALCOTT of New York. I referred not only to the construction of this work, but also work in connection with the other sources of supply which might be connected in one system.

Mr. FRENCH. As applied to this system it has never been suggested that the Government itself should be to any expense. But I say if we should make the grant, even without imposing conditions upon the city, it would not then be an unusual thing, and we would find an abundant parallel in the development of our country elsewhere with respect to like grants and benefits extended in other ways.

Mr. RAKER. If the gentleman will permit, the gentleman did not get the question of the gentleman from New York [Mr. TALCOTT]. He asked if the committee had considered the question of the Government building this dam.

Mr. FRENCH. I endeavored to answer that question. was not even proposed by the city of San Francisco. The city of San Francisco is willing to bear all of the expenses connected with the matter.

Mr. TALCOTT of New York. I was trying to ascertain from the gentleman whether in his opinion if the Government undertook this construction as one system of the work and the work in connection with other sources of supply, this legislation would not result in the development of a great deal larger water supply and a great deal larger supply of power without

proportionate increase in cost.

Mr. FRENCH. Well, I would oppose that proposition because I think the benefits to be derived here are so local in character that you can separate this from the question of river and harbor improvements, which improvements undoubt-edly have a larger bearing and confer a wider benefit upon the people of the country. But I would oppose that proposition. It has never been even suggested for the consideration of the committee. On the contrary, the city of San Francisco is called upon to do certain very important things in consideration of the grant that shall be made. In the first place the city will be permitted to spend its own money to the extent of \$77.000,000 for the development of the system.

That which is granted and which will enable the city to incur this great expenditure is a something that to-day has no great money value unless a vast amount of money is expended in developing it. The right of a city to build a dam and impound water for her people, the right of the city to utilize to the best economic advantage such power as may be generated incidentally with the development of the particular water source, this is the grant that is contemplated, and as I said, it is for the use of something that without the expenditure of vast money can have little claim to money value.

But it is not proposed in the bill to make this grant to the city of San Francisco without consideration. It is required that the city shall undertake to build a system of roadways and trails that otherwise the Government would need to build if the great park is to be made the people's playground that its establishment contemplated. The city is required to build bridges, to construct fences, to permit the use of its telephone lines and other property of similar character by the Government in the

protection of the Government's property.

The city is required to convey to the United States title in fee simple to all its properties located within the Yosemite National Park or that part of the national forest adjacent thereto not actually required for use under the provisions of this act.

The city is required to furnish to the Government for the use of the War Department such water as it may desire and in numerous other ways is required to assume responsibilities of important character.

In the next place, and to repeat, the city of San Francisco will be required to pay to the Government annually, after five years, the amount of \$15,000 per year for 10 years; after that period of 10 years \$20,000 per year; and after that perpetually the amount of \$30,000 per year, unless a different amount may be fixed by Congress.

More than that, it is required that the city pay an amount equal to that expended by the Government for the maintenance of the roads and trails built by the grantee in the development of the system. In my judgment that amount will be not less than the \$30,000 required to be paid annually to the Government in consideration of the grant that is made.

Mr. PETERSON. I should like to ask the gentleman upon what theory the city is required to pay this immense amount.

Why should it be required to pay it?

Mr. FRENCH. Upon the theory that a very valuable grant is being made. This is a proposition that is differentiated from a good many others, in this respect, that we are entering a national park.

Mr. PETERSON. Does it take from the Government any-

thing in particular that is of value?

Mr. FRENCH. As a matter of fact, the Government is placed in such a position that if the lands within the grant were to be retained by the Government, and if the Government could not acquire property that it does not now own, it would be of little value to the Government from the standpoint of revenue. The city of San Francisco to-day owns two-thirds of the floor of the Hetch Hetchy Valley. The Government owns one-third. The city has paid about three-quarters of a million dollars for the two-thirds that it owns, and if the other land is valued at the same relative amount it would leave it worth approximately \$300,000 or \$400,000. Besides that the very dam site itself is in part owned by the city of San Francisco and is not being used for the purpose of raising revenue, and could not be used by the Government for the purpose of making any considerable money. Consequently it has little or no value for the purposes for which it is used at this time.

Mr. WINGO. Will the gentleman yield for a question?

Mr. FRENCH. I am glad to yield.

Mr. WINGO. The gentleman has stated that the city of San

Francisco has paid a certain sum for two-thirds of the surface of the valley, which it now owns?

Mr. FRENCH. Yes.

Mr. WINGO. And that the Government owns one-third?

Mr. FRENCH. Yes. Mr. WINGO. Has there been any estimate made of the

value of the water rights?

Mr. FRENCH. I am coming to that point. The water-right value is something that it is very hard to estimate. This value will depend upon the quantity of water that will be impounded after the dam shall have been constructed, and the power that may be developed. Now we do not know and we can not estimate the value of the power that will be developed. It is for that reason that the committee have provided in the bill in a rather elastic way that Congress may modify the amounts required to be paid to the Government in consideration of the grant.

Mr. WINGO. Is not the gentleman in error when he says that there is no practical method of estimating the value of water rights? Are not water rights valued frequently all over this country by engineers for private companies by simply taking the estimated amount of the water that will be obtained, the use to which it may be put, and the sale price for which the water will be sold to the consumers or the public? Have not water corporations and concerns of that kind a very practical method of estimating and finding out the commercial

value of water rights?

Mr. FRENCH. In part, yes; but I do not think the Government would want to charge the city of San Francisco upon the basis of water actually used for domestic purposes, or would consent to charge upon the basis of water actually used for irrigation, assuming that a charge might be made upon this basis in consideration of the grant. I do think that the Government might properly want to charge for the grant upon the basis of water used for power purposes and sold by the city of San Francisco. This is a secondary use and we do not know how much power could be sold.

Mr. HAYES. Will the gentleman from Idaho yield?

Mr. FRENCH. I am glad to.
Mr. HAYES. I should like to ask the gentleman, is it not true that under the statute of 1866 and amendments thereto, all the water used or consumed by San Francisco, either for power or domestic use, is the property of the State of California and not the property of the National Government at all?

Mr. FRENCH. Of course that is my understanding, but I do not care to inject that question into the subject, because the bill is so drafted that we do not need to discuss that question neces-

sarily in considering the bill.

Mr. ELDER. Will the gentleman yield?
Mr. FRENCH. Certainly.
Mr. ELDER. In relation to these amounts which the Government is to receive, I see on the last sum the city is to pay \$30,000 annually. Then they put in the clause "unless otherwise provided by Congress." What is the reason for that clause?

Mr. FRENCH. The reason was suggested in the answer to the question a few moments ago, that the committee at this time and Congress are not able to accurately measure the amount of power development, the amount of power that it may be possible to sell; it may be a small amount, and it may be a The amount of charges is something for Conlarge amount. gress to fix at the end of a certain period, if it shall be found to be unjust either to the city or to the Government.

Mr. ELDER. In other words, it is not put in so that eventually they will be coming back here to get a remittance?

Mr. FRENCH. I think not. I have no doubt Congress will

Mr. ELDER. One further question. I see that the money is to be spent in the national park for roads, trails, and so forth. What right have these people to pay us for this thing and then tell the Government how it shall spend it? Does not the gentleman think it would be better to let the Government spend the money in the park in its own way and not be confined to the particular way in which it shall spend it? In other words, it seems unfair to force us to improve the park unless we want to with the money that they are paying us for this privilege.

Mr. FRENCH. It is estimated that it will cost as much as is provided in the bill to maintain the roads and trails necessary throughout the park, and for this reason it has been provided that the money shall be diverted to this particular purpose. However, this is a subject that may be modified by Congress at

any time.

Mr. OLDFIELD. Will the gentleman yield?

Mr. FRENCH. ' I will.

Mr. OLDFIELD. I notice in the bill there are annual sums to be paid to the Government ranging from \$10,000 up to \$30,000 annually. What is the method of enforcing these payments? Is there any penalty attached if the claims are not l

paid, or do you propose to take the right of way from them if they do not comply with the law?

Mr. FRENCH. I think that latter suggestion is the one that runs throughout the entire bill; the Government reserves the right to compel the city of San Francisco to comply with all the conditions the city has assumed under the grant.

Mr. OLDFIELD. Does the gentleman think that this is a wise provision? In other words, does not the gentleman think that after the law has been placed on the statute book it would be rather difficult to have the law repealed providing they did not comply with the provisions?

Mr. FRENCH. I think automatically the Government will be able to compel the city of San Francisco and the other grantees to comply with the conditions of the bill without any

special act of Congress.

Mr. OLDFIELD. And the gentleman thinks that this is well taken care of?

Mr. FRENCH. Abundantly taken care of Mr. KAHN. Will the gentleman yield? Abundantly taken care of.

Mr. FRENCH. Yes; although I have only a few moments and I hope to conclude soon.

Mr. KAHN. In regard to the water rights spoken of by the gentleman from Louisiana, the city of San Francisco has purchased all the water rights on this river, and they are now owned by the city, except those that are owned by the Tuolumne & Modesto Irrigation Co.

Mr. WINGO. I do not wish to appear in any controversial spirit, but I am at a loss to understand how the city of San Francisco has acquired water rights on the Government domain. I would like to know what procedure was adopted. I do not see how it could be done without appropriate legislation by

Mr. KAHN. My recollection is that this did not become a Government domain until 1906, when it was transferred by an

act of Congress.

Mr. RAKER. It was public domain, and being a part of the public domain it was acquired by individuals.

Mr. KAHN. I meant to say that it did not become a national

Mr. HAYES. These water rights were owned up to a few years ago by private individuals who had acquired them from the Government some time ago, and the city of San Francisco, in its efforts to secure this water, purchased these rights of private parties who many years ago had acquired them from the Government.

Mr. FRENCH. In that same connection I will say that the city was so solicitous that through its mayor some years ago the mayor filed, in his individual capacity, upon water rights and then turned them over to the city, because at the time he made the filing the city of San Francisco was not authorized

Mr. WINGO. There are some other things I desire to question the gentleman about; I believe he is a member of the com-

Mr. FRENCH. I am a member of the committee.

Mr. WINGO. I want to know whether or not the committee made any estimate of the value of the public property that would be taken under the clause that permits the city to take free of cost from the public land stone, gravel, and other material for construction of these railroads, telegraph lines, and so forth? Did you make any estimate of what the value of that

property would be?

Mr. FRENCH. Now, I will just say, it is provided in the bill that the roads, trails, telegraph and telephone lines, and all these improvements may be used by the Government, and if this grant were not made, in order that the park might be utilized fully, the Government would need to make similar improvements itself. For that reason it seems to me that the Government is making a good bargain when in addition to making this grant it can require the city of San Francisco to do that which it in itself would need to do in order to make the park accessible. Consequently I do not think we need to make inquiry into just what the cost or value of the gravel will be, or the stone or timber that will be used in building bridges, culverts, and roads.

Mr. RAKER. Permit me to say the bill provides that they shall pay for all the timber used.

Mr. FRENCH. I should not have said the timber; the bill

itself provides that with regard to timber.

WINGO. That language worried me. You have one provision that provides for the taking of construction materials free of cost under which, testing it by every rule of construction, they could get timber, and then you require them to pay for timber taken from the right of way.

Mr. RAKER. Where is that?

Mr. WINGO. That is the provision in line 14, page 3, "and other materials of like character," and under any rule of construction that would include timber for ties, and so forth.

Mr. FRENCH. I think, however, the language of the specific provision with respect to timber would control, and I think it would not be held to be included under that general statement.

Mr. WINGO. But you have a provision which permits them to take gravel and other material of like character necessary for construction from public lands adjacent to the right of way and this other provision permits timber to be taken from the right of way

Mr. FRENCH. If there is a weakness there we can correct it when we get to it under the five-minute rule. Just in conclusion on this subject I will say that under the present provisions of the bill the income that will be received by the Federal Government from this grant places a capitalization of some two millions of dollars at 3 per cent upon the dam site and the lands that will be required for the lake, not to speak of values to the extent of possibly another million of dollars that will be conveyed by San Francisco to the Government of the United States. Hence, I say, the objection that is made to the grant upon this basis is not well founded, while, on the other hand, the Government is doing the unusual thing in accepting the returns that San Francisco is ready to give for the grant that the bill proposes to make.

Finally, there are those opposed to this measure who believe that the construction of the dam at Hetch Hetchy will be ruinous to the national park, that it will destroy a great valley that might be available otherwise for hotels and camps for pleasure seekers, and that in short the bill is a serious assault upon the Yosemite Park, from the standpoint of its use as a park and the standpoint of its beauty.

I have profound respect for all who may oppose this bill for any honorable and honest reason, and I have profound respect for those who feel that from the standpoint of maintaining the beauty of the park and its usefulness the bill should not become a law

Among those who take this position are Dr. John Muir, with whose name we all are familiar; Dr. William Frederick Bade, president of the California Branch of the Society for the Preservation of National Parks; Mr. Robert Underwood Johnson, for many years the editor of the Century Magazine, and Hon. Edmund A. Whitman, of Cambridge, Mass., president of the Eastern Branch of the Society for the Preservation of National Parks. These and other men of equal candor and patriotism oppose the passage of this bill because they feel that the work proposed to be carried on under it will mean the desecration of one of the beauty spots of California.

think I need not say that just as I have profound respect for these men I also have deep sympathy with their idea as applied generally to the Yosemite National Park and to all other natural wonders and beauty spots either in California or This question alone would make me think earnestly and well before giving my approval to the proposition. However, there are numerous questions that must be considered from this standpoint. In the first place I can not think that the work that it is contemplated shall be done under this bill will mean the ruination of the park or the material modification of its scenic beauty. The park embraces something like 900 square The amount of land that will be subjugated by the construction of the Hetch Hetchy Dam is approximately 2 square miles, of which the city owns two-thirds. From the standpoint of area this amount is inconsiderable, but we are told that the canyon walls around Hetch Hetchy are in themselves wonderful and that much beauty will be destroyed by the construction of the dam. We are also told that this area that will be covered with water after the dam shall have been constructed should be left free for use for hotels and campers, that from this point they may visit other sections of interest within the park.

In this regard, however, the question is rather one of judgment than one that can be regarded as capable of only one point of view.

It was brought out in the committee hearings that one of the members of the Board of Army Engineers believed that the Hetch Hetchy Valley undisturbed would be more beautiful than a lake would be that would be maintained by the construction of the Hetch Hetchy Dam. Another member of the Board of Army Engineers, with the same facts at hand, came to exactly the opposite conclusion, and it was his judgment that a lake in the beautiful Hetch Hetchy Valley would be more beautiful than the canyon itself.

I have in mind some of the beautiful lakes in my home State of Idaho that are surrounded by mountain fastnesses and into

whose mirrored surfaces are reflected the pictures of almost changeless precipices and mountain peaks and hillsides covered with eternal green, and into which is still reflected the panorama of clouds and sun and moon and stars; and I think that such a lake, created though it might be by the construction of the great dam at Hetch Hetchy, would not be a mar upon the beauty of even the Yosemite National Park, but would rather in itself be something worth establishing and that would lend inspiration to those lovers of nature who are jealous lest the beauty of the parks may be forced to yield to some utilitarian purpose.

So I say, from the standpoint of whether or not the construction of the dam at Hetch Hetchy will injure or improve the park, it is my judgment that there is abundant opportunity for difference of opinion.

More than this, I understand that at no time has this section been visited by more than a few hundred people in a given year. I am not certain that my estimate may not be exaggerated, and it may be that such large numbers as I have indicated have in a single year visited this region at comparatively rare intervals. Under the terms of this bill, however, there will be constructed roads and trails at a cost of many hundreds of thousands of dollars. These roads will be bounded by fences of such type and character as will meet with the approval of the Government's executive officers. Bridges and culverts will be built that, too, will need to be of a character approved by the proper heads of departments, and altogether an avenue will be provided by which not a comparatively few but a large number of people may enjoy the beauties of the Yosemite Valley and the scenery surrounding the whole section of country with which the pending bill has to do.

The fact is, I believe that many times as many people will be accommodated through the construction of the works provided for in this bill as will be with the expense and care necessary to visit the Hetch Hetchy Valley, providing it shall remain in its natural state.

Let us assume for a moment, however, that the construction of the Hetch Hetchy Dam will mar the beauty of the park, a proposition to which I do not subscribe, are not the rights of three-fourths of a million people to-day and millions of people during the decades that will follow deserving of our profound consideration?

I have gone out of my way repeatedly to avoid injuring or to extend safety to some representative of nature's great animal kingdom and I have grieved at the loss of a beautiful tree. So now the question of protecting the beauty of the Hetch Hetchy Valley is one that appeals to me, but I recognize as paramount to whatever beauty there may be in the Hetch Hetchy Valley the welfare and indeed the life itself of the people who are asking that they may have water to use in their homes. More than this, I realize that in the construction of the works contemplated in this bill there is no unanimity of opinion that the beauty of the Hetch Hetchy Valley will be marred but rather that there are some who think that its beauty will be enhanced, and when I realize further that the park will be made available as a great national playground, not for a few hundred, but for thousands upon thousands of people, who with the facilities provided for in this bill will have the opportunity of visiting this pleasure ground, I can not feel that there is any other course left for me to pursue than to support the passage of the measure.

I can not believe that those who are opposed to the utilization of the waters that fall within the area of the Yosemite National Park and the Stanislaus Forest have a full realization of the facts that surround San Francisco and the other bay cities and the hardships with which the people of a country, whether within a municipality or in rural communities are required to undergo, who live in a region that is semiarid.

The papers of the last few days have told of the hardships that the drought in the Middle States has inflicted upon rural communities and upon cities themselves. One report speaks of numerous towns in Kansas, including Olathe, Lawrence, and Medicine Lodge, as having exhausted their water supply. Olathe was forced to purchase 60,000 gallons daily from Kansas City, and Lawrence was forced to turn the water of the Kansas River into the mains of the city as a protection against fire. Under such conditions can anyone doubt that much suffering will result? Can anyone doubt that typhoid and other diseases may be disseminated by the hasty improvising of water for a city's use without the opportunity of exercising the ordinary care of filtration?

The dispatches tell that in western Kansas the farmers were forced to sell one-third of their cattle, and that they were compelled to rush their poultry to market because of the water and feed situation. Yet the cities to which I have referred are in a region that in the ordinary years is capable of produc-

ing crops without irrigation.

California, on the other hand, is a State that contains large areas that will not produce profitable crops unless water be turned upon the lands by artificial means. I can not believe that those who are opposed to this measure have a full realization of the fact that all of the waters of the streams that are available as possible water sources for San Francisco will be utilized for the irrigation of lands, for the production of food for man, or for domestic purposes of people living in cities or in rural communities.

I can not believe that those who are opposed to this bill have thought of the responsibility that devolves upon the city of San Francisco and the other bay cities of protecting the health

and lives of their people.

It may be said that the city of San Francisco can not develop the Hetch Hetchy system within a period of five years. Granting that this is so, it is all the greater reason why action should be taken now. Already the city is in need of water; already the people are denied the use of water that the people of other cities enjoy. By passing this bill now, much of the pre-liminary work necessary to the development of the system can be accomplished during the present year, and maybe an entire year can be saved if action be taken at this time rather than next winter.

Looking at the question from that standpoint, I do not see how the most enthusiastic lovers of nature can oppose the measure. Even Mr. Whitman, to whom I have referred, in testifying before the committee, admitted that the use of water for domestic purposes is a superior use than to permit conditions to

prevail that would deny the use to mankind.

The question was raised by Mr. LA FOLLETTE, a member of the committee, as to whether or not the use of the valley for the storage of water for irrigation and municipal purposes is not higher than to use the valley for the accommodation of the people who might visit it and the accommodation of their horses for feeding purposes. Mr. Whitman said that he agreed with his questioner, and continued:

When the time comes that the use of this water is required by people outside for the raising of food products or for domestic purposes, that contention should prevail. It might be perfectly wise at some time to take steps which would flood that part of the valley.

So far, then, as Mr. Whitman is concerned—and I believe all lovers of nature must agree with him—the question is rather one of time and not one of principle. It is my judgment and it is the judgment, I believe, of the other members of the committee, that the time has come which Mr. Whitman Limself defines, and that the water that can be impounded within the Hetch Hetchy Valley is required by people outside for the raising of food products and for domestic purposes.

The CHAIRMAN. The gentleman from Minnesota [Mr. STEENERSON] is recognized for 30 minutes.

Mr. STEENERSON. Mr. Chairman, this is not a local question. If it were a local question, local to the State of California, I certainly would not for one moment put my judgment as against the judgment of the California delegation, a delegation that stands deservedly high—as high as any in this House, whether we refer to the Democratic or the Republican side. And is with a great deal of reluctance that I rise to oppose this bill, because of my personal regard for the members of that delegation, who have united in the advocacy of this measure.

But the conservation of the natural beauties of mountain scenery is in question, and is one of national importance. All the people of the United States have expressed themselves as in favor of the doctrine of conservation, and there seems here to be a dispute only about its application. Every political party, so far as I know, has pledged itself to the doctrine of conservation, and no one in this debate has declared himself as opposed

But it is argued that this measure is not a violation of that doctrine, for various reasons, and I shall allude to some of them. But whatever else I may say, I wish to say a word about what this bill is. It is a bill to grant the right of way to the city and county of San Francisco for the construction of waterworks, pipe lines, and reservoirs. The proposition as stated in the bill is to grant the city not to exceed 250 feet in width through the Yosemite National Park and the Stanislaus National Forest; also the right to construct a dam, to construct a lake in the Hetch Hetchy Valley for the purpose of constructing, operating, and maintaining aqueducts, canals, ditches, pipes, pipe lines, flumes, tunnels, and conduits for conveying water for domestic purposes and uses to the city and county of San Francisco, and for the purpose of constructing, operating, and maintaining power and electric plants, poles, and lines for generation and sale and dis-

tribution of electric energy; also for the purpose of constructing, operating, and maintaining telephone and telegraph lines, and for the purpose of constructing, operating, and maintaining roads, trails, bridges, tramways, railroads, and other means of locomotion, transportation, and communication such as may be necessary or proper in the construction, maintenance, and operation of the works constructed by the said city and county. It also provides for the construction of underground reservoirs, and so forth.

Now, it will not do to say that this is to simply supply San Francisco with a domestic water system. The argument has been made here in support of this bill that San Francisco is in need of a water supply so great that it creates an emergency, and that is an excuse for bringing up this bill at the extra session, when the general public was not aware that it was going to be considered. Emergency? What kind of emergency is it? It is an emergency that one of the gentlemen stated would occur in 1926. The estimate of nearly all the gentlemen who advocate this bill is that it will take 10 years to construct these waterworks, hence this is an emergency to occur in 1923 at the very earliest. Why, when the Democratic caucus convened and decided that nothing but tariff and currency legislation and emergency measures should be taken up at the extra session, I was unsophisticated enough to write to some of the poor settlers in my district who had settled on burned-over timberlands and cut-over timberlands, and who could not cultivate 20 acres on a quarter, as required by a recent act of Congress, and were in danger of losing their homes, and tell them it was not any use to bring that up at the extra session, because the emergency was not sufficiently pressing. But, lo and behold! San Francisco comes in here and says, "We are going to go dry in 1923, and hence we will get the matter up at the extra session, when nobody expects it." Emergency? Yes; no doubt there was an emergency. But, as pointed out in the communication of Dr. Johnson, the editor of the Century Magazine, a true friend of conservation, and Mr. John Muir, the great naturalist, the emergency was that they found out that there was a change of the party in power and they thought that perhaps they could get this measure through to destroy the beauties of Hetch Hetchy Valley, although it had been attempted four times in the last six years and defeated. That is the emergency.

Mr. RAKER. Does the gentleman yield right there?

The CHAIRMAN. Does the gentleman yield? Mr. STEENERSON. Yes.

Mr. RAKER. Does the gentleman know that in San Francisco within the last month nine buildings have been destroyed from a lack of water with which to extinguish fire, and that the city and county of San Francisco can not extend their water mains because the Spring Valley Water Co. owns them and will not do it, but that the moment that this bill is passed they can take part of the \$43,000,000 voted and extend the mains as part of the system, and thereby protect the city and protect life and the property of property owners there?

Mr. STEENERSON. I decline to yield further, Mr. Chair-

man. I know what the gentleman is talking about.

We can judge, I will say to the gentleman, by the hearings and by the undisputed evidence and by the arguments that he been brought forward here. Even the gentleman who spoke last, the gentleman from Idaho [Mr. FRENCH], said that it was not disputed, but that there were other sources of water supply for San Francisco than the Hetch Hetchy Valley. Why, Mr. Chairman, in the hearings before the Senate Committee on Public Lands, as quoted by Dr. Robert Underwood Johnson, it was said by the engineers of San Francisco themselves that there were other sources of water supply, but that it would cost money to get them. That was the only key to this situation. It would cost San Francisco more money to get the water supply from elsewhere. So that there is no emergency. There is no reason for bringing up this bill at the extra session.

I grant that the committee has given this bill careful con-deration. I grant that great skill and legal lore have been expended in trying to harmonize all the conflicting interests. I hold in my hand here a resolution or memorial from 2,000 settlers who live right in the San Joaquin Valley, and they, over the signature of their chairman, say that San Francisco has other sources of water supply than Hetch Hetchy. then opposed to this proposition, but since have been converted to it, as I understand, by some means known only to the representatives of San Francisco.

Mr. KAHN. Mr. Chairman, will the gentleman yield to me right there?

Mr. STEENERSON. Mr. John Muir, the naturalist-The CHAIRMAN. Does the gentleman yield?

Mr. STEENERSON. Not at present. I will yield after

Mr. KAHN. Well, the gentleman spoke of the representatives

Mr. STEENERSON. I did not mean the gentleman in Con-I meant lobbyists from San Francisco, representing the \$45,000,000 voted for waterworks, the men who have been here, as I understand, lobbying for this bill. They have succeeded in bringing all the conflicting interests together, so that there is no opposition to this bill any more from Representatives of

There are no lobbyists in favor of this bill.

Mr. STEENERSON. I do not know what else you would ll them. Nobody will admit that he is a lobbyist, you know. Mr. MONDELL. Mr. Chairman, will the gentleman yield for

The CHAIRMAN. Does the gentleman yield?

Mr. STEENERSON. Not now. Here is the letter from Dr.

Robert Underwood Johnson, which contains statements strong enough to convince me that instead of investigating the "insidious lobby" in regard to the sugar tariff, the President and the Congress ought to investigate the "insidious lobby" in regard to this bill.

Mr. KAHN. The only lobby that is operating is on the part of those who are fighting the bill, and I shall point that out to

Mr. STEENERSON. Mr. Chairman, I decline to yield.
The CHAIRMAN. The gentleman declines to yield.
Mr. STEENERSON. The only communications I have received in opposition to this bill are the letters of Mr. John Muir, the naturalist, from San Francisco; of E. E. Parsons, William F. Bade, and Mrs. R. V. Colby, who represent the Society for the Preservation of National Parks. I will print that letter in full in the Record, with the names of the members composing the association. If you want to call them "lobbyists," all right. They are lobbying by means of letters in opposition to this bill, and they give their reasons.

Dr. Robert Underwood Johnson, who one gentleman to-day said was in favor of the bill, writes this letter and dates it in ink, "August 22, 1913," at Mattapoisett, Mass., where he is

temporarily spending the summer.

Now, I think that the gentleman from Wyoming [Mr. Mox-DELL] in his argument settled, so far as argument can settle it, the question that this water supply is not the only water supply available for San Francisco. But that is the whole basis of the argument in favor of this bill. If it were not for that, nobody could say anything in favor of it. The gentleman from Illinois, a member of the Committee on Public Lands [Mr. Graham], said—and I agree with him—that the greatest object of conservation was human life, and that if it were absolutely necessary to destroy the Hetch Hetchy Valley for the purpose of giving pure water to the people of San Fran-cisco, he thought that the greater and more meritorious object should prevail over the scenic beauty argument. But since that necessity does not exist, his whole argument and all of the arguments based upon that theory fall away.

It is said by some that this improvement will not injure the park. Here is a national park, created by Congress, belonging

to the whole people.

It is, no doubt, a rare beauty spot. I have never had the good fortune to visit California and behold its beautiful scenery. I have stored up that pleasure for some future day, and I hope to be able to see the Hetch Hetchy Valley in its pristine glory and beauty before the destroying hand of greed and commerce shall have been laid upon it.

I can not speak from personal knowledge as to the scenic value of the land here in question, but I take it that no better authority on that subject could be found than Mr. John Muir, the naturalist. In a letter addressed to me, dated June 27, 1913,

he says:

The Yosemite National Park is not only the greatest and most wonderful national playground in California, but in many of its features it is without a rival in the whole world. It belongs to the American people, and in world-wide interest ranks with the Yellowstone and the Grand Canyon of Colorado. It embraces the headwaters of two rivers—the Merced and the Tuolumne. The Yosemite Valley is in the Merced Basin; the Hetch Hetchy Valley, the grand canyon of the Tuolumne, and the Tuolumne Meadows are in the Tuolumne Basin. Excepting only the Yosemite Valley, the Tuolumne Basin in its general features is the more wonderful and larger half of the park.

The Hetch Hetchy Valley is a wonderfully exact counterpart of the great Yosemite, not only in its cliffs and waterfalls and peaceful river, but in the gardens, groves, meadows, and camp grounds of its flowery, parklike floor.

Why, Dr. Johnson, the editor of the Century Magazine, says: The Hetch Hetchy is a veritable temple of the living God, and again the money changers are in the temple to desecrate it.

Mr. FERRIS. Will the gentleman yield?

Mr. STEENERSON. ! will yield to the gentleman.

Mr. FERRIS. These letters ought not to go unchallenged. Doubtless the gentleman knows that this park is 20 miles away from the main Yosemite National Park. There are 719,000 acres in the park. This will only flood 3,000 acres, and twothirds of the 3,000 acres are owned in fee simple by the city of San Francisco.

Mr. STEENERSON. That has been stated several times. Mr. FERRIS. Compared to the size of the whole park this

is no more than a pimple on your back.

Mr. STEENERSON. It has been stated several times that this is not the main part of the Yosemite Park, but it is a part of the park, and as Mr. Muir, the naturalist, who ought to be a good judge of such things, says, as I have read, that valley is the most wonderful part of the park. So I will put up Mr. Muir against the judgment of men who want to destroy the park.

As I have already remarked, this is not a local question. people of the whole United States are interested in it. If the entire New York delegation should come here unanimously demanding that Niagara Falls be destroyed for the purpose of creating power, would we from the other portions of the United States stand here indifferent? Could we recognize the claim that nobody except the State of New York is interested? This question is exactly analogous.

Although my State is a comparatively young member of this Union, the people of Minnesota believe in and practice the doctrine of conservation. They have conserved some of the most beautiful forest regions on this continent, and they are trying

to enlarge those reservations.

They have conserved the mineral and timber resources of the State, so that the school fund, which belongs to the children of future generations, has a probable value, running into the bundreds of millions of dollars. We are doing all we can to conserve our own resources, as we believe, and our own beautiful landscapes. I could not fairly represent the people of that State unless I raised at least one voice against this bill, and I understand I am the only one who has spoken or will speak in opposition to the bill.

Mr. FERRIS. How about the gentleman from Wyoming [Mr.

MONDELL 1?

Mr. MONDELL. Will the gentleman yield?
Mr. STEENERSON. No; I will not yield to the gentleman from Wyoming. I will qualify my statement by saying that the gentleman from Wyoming [Mr. Mondell] spoke against this bill; but at the same time he said he was willing to give the Hetch Hetchy Valley to the San Francisco waterworks, and that is the crux of the whole proposition. He is going to offer a substitute, and the substitute will provide for the destruction of the park just as much as this bill does.

Mr. REED. The gentleman will acknowledge that I have

spoken against this bill?

Mr. STEENERSON. I think the gentleman said Mr. Muir and Dr. Johnson were in favor of this bill. I think the gentleman favored the substitute of the gentleman from Wyoming?

I hope the gentleman will not misquote me.

Mr. STEENERSON. I will not.

Mr. REED. I said I hoped that the substitute to be presented by the distinguished gentleman from Wyoming would embody such features as would afford San Francisco or California the

privilege which they desired.

Mr. STEENERSON. I believe, as I have already stated, that my duty to my constituents and to the whole people of the United States requires me to oppose this bill. There is nothing in the argument that the flooding of this valley will improve One gentleman from California, who spoke in favor of the bill yesterday, had the temerity to make that argument, and he was indorsed by the gentleman from Idaho. might as well try to improve upon the lily of the field by hand painting it. The idea that a reservoir for water supply will make a beautiful lake is absurd. Of course, you understand that in a dry time when water is needed the reservoir will probably be empty, as all reservoirs are at those times, and you will have in place of the beautiful floor of the Hetch Hetchy Valley, as described by Mr. Muir, a dirty, muddy pond, with the water drained off to supply San Francisco, and probably some dead fish and frogs in it. [Laughter.] Will that be beautiful? And then there will be perhaps large generating works, with rolling wheels and buzzing machinery and transmission wires with a devilish, hissing noise echoing and reechoing sounds strange and cacophonous. [Laughter.] That is what you will offer us in place of the temple of the gods that has been made ready for our admiration.

The gentleman from California [Mr. Knowland] yesterday

pointed out the wonderful increase in population in the cities on San Francisco Bay, and he took great pride in it. He said

that the influx from the country to the city was very strong in that region, the same as it is elsewhere in the world. Instead of taking pride in that fact I deplore it. All the greatest statesmen of our time are deploring the fact of the influx to the city from the country. They are putting forth efforts for Government encouragement of rural life. We hear on every hand futile complaints against the rising cost of living. Some gentlemen have discovered that the way to cheapen the cost of living is to import beef and foodstuffs from abroad, but that is a vain remedy, because, when you discourage the farm and country life here in the United States, the foreign farmer will have you in his power and charge you even higher prices than you now pay.

I am opposed to the eternal drawing upon the Federal Government resources and of the people to make cities more attractive at the expense of the country. Rather would I encourage the people to go to the national parks, where they can admire nature in its pristine beauty and glory and become imbued with the love of nature-become second Burbanks in knowledge and practice and science of plant breeding and all the secrets of animal and vegetable life.

Do you think you can produce such men by building up large cities and raising your families in apartment houses, like the cliff dwellers? No. It is said this park is hard of access; that only a few hundred people reach it every year; that more will reach it when you have destroyed it. Then they can go in trolley cars and railroad cars; but I would rather have a few see it in its natural glory than in its desecrated form. Perhaps some lone, footsore, weary wanderer may find his way into the valley some day and by means of inspiration of these wonderful surroundings will produce something more valuable than money. Suppose he could write a poem like Burns's poem to a mountain daisy? Would you trade it for \$45,000.000 that the taxpayers of San Francisco have voted for this enterprise? Why, you could not estimate the value of such a contribution to human thought in its refining effects in dollars and cents. That poem I have read often, but it can never be read too often, and I will put part of it in the Record to remind you of it.

The fate of Hetch Hetchy Valley, this beautiful mountain gem, is touchingly like that of the mountain daisy, and when it is gone I do not believe I shall be the only mourner at its bier.

TO A MOUNTAIN DAISY.

Wee, modest, crimson-tipped flow'r,
Thou's met me in an evil hour;
For I maun crush amang the stoure
Thy slender stem;
To spare thee now is past my pow'r,
Thou bonie gem.

There, in thy scanty mantle clad,
Thy snawle bosom sun-ward spread,
Thou lifts thy unassuming head
In humble guise;
But now the share uptears thy bed,
And low thou lies!

Such is the fate of artless maid, Sweet flow'ret of the rural shade! By love's simplicity betray'd, And guileless trust: Till she, like thee, all soli'd, is laid, Low i' the dust.

Such is the fate of simple Bard, On Life's rough ocean luckless starr'd! Unskilful he to note the card Of prudent lore, Till billows rage, and gales blow hard, And whelm him o'er.

Now, you say that is all sentiment; that Mr. Muir and Dr. Johnson are sentimental. I grant it, and I am glad of it. You people in California, where woman suffrage prevails, will find out that you have got to pay some respect to sentiment hereafter. [Laughter.] One reason why I am opposing this bill is that the Woman's Club in Minnesota passed a resolution unanimously in favor of protecting this national park from vandalism and desecration. I have great respect for their sentiments. Such sentiments are the foundation of all noble and heroic deeds

Sentiment, if you please! It is a wise saying that the man who writes the songs of a people has more influence than he who I hope that upon reflection the House of Repwrites its laws. resentatives will not press this bill to final passage at this time, and I say to you now that if you try to do it you will have to muster a quorum when the time comes for action, because I will not stand here an idle spectator when this hand of greed is laid upon our national forests, and I want the Democratic Party to go on record, after this same proposition to destroy the Hetch Hetchy Valley has been defeated four times in the last six years-I want them to go on record as doing this as an

emergency measure; and I want to go home to Minnesota and tell the people on the stump that this is the kind of emergency. measures that the Democratic majority and the caucus are forcing through here at this time.

Mr. FERRIS. Will the gentleman yield?

Mr. STEENERSON. I speak for myself only as a member of the Republican Party and not the whole party.

Mr. FERRIS. Of course the gentleman is aware, he having mentioned some of the political phases of the question, that California is a Republican State; that San Francisco is a Republican city; that the Members who will be benefited by it locally, if any particular partisanship should be injected into it, are Republicans; and, furthermore, does the gentleman now set his own judgment up against the combined judgment of the California delegation, of 11 in number; and does he set his judgment up against the Secretary of the Interior, the Secretary of Agriculture; the Chief Forester, Gifford Pinchot; F. H. Newell, the head of the Reclamation Service; the head of the Geological Survey; the unanimous report of our Public Lands Every other arm of the Government that has anything to do with or knows anything about it has been con-They have appeared in person and by letter, and they are all earnestly for it.

Mr. STEENERSON. In answer to that, I will say I will set up my judgment with Secretary Hitchcock and Secretary Garfield and Secretary Fisher as against the present Secretary; and as to the judgment of the present Representatives from California, for whom I have great respect, you must admit they are interested parties, and they can not act as judges in a matter of this kind. As to the question of politics, I acquit the gentleman from Oklahoma from trying to work any political scheme in this bill. I acknowledge his generosity to the California delegation—and it is a very great generosity—but it is impossible for the majority of this House to escape the responsibility for this bill. You can not throw it on the Representatives from California, because, being in control, you are responsible. As to Gifford Pinchot, I will say that I go by his first stand, which I am advised was against taking Hetch Hetchy Valley.

Mr. FERRIS. He has always been for the bill.

Mr. STEENERSON. This bill? He was opposed to this idea

few years ago.

Mr. FERRIS. He has always been for the bill.

Mr. STEENERSON. Well, even if he now is for this bill, I do not take him as an authority. I can not follow blindly, but must know his reasons. Some four years ago he and other conservationists stated that they were in favor of free lumber, because by getting free lumber supplied from abroad we would save our own forests-a plain proposition, that could not be contradicted—yet only a few hours after conferring with a few lumber barons he changed about and wrote a letter to the Committee on Ways and Means and said that the way to con-serve the forests of the United States was to put on a duty and make lumber high priced to the farmers. A man who can make a somersault like that can not command my confidence either in economics or politics. [Laughter and applause.]

Mr. RAKER. The gentleman does not intend to state that

Secretary Garfield was not in favor of this grant, because Secretary Garfield gave a revocable permit to construct it.

Mr. STEENERSON. But it was revocable; to that extent I will stand corrected.

# EXHIBIT A.

SOCIETY FOR THE PRESERVATION OF NATIONAL PARKS, CALIFORNIA BRANCH, 302 MILLS BUILDING, San Francisco, June 27, 1913.

Hon. Halvor Steenerson,

House of Representatives, Washington, D. C.

Dear Sir: The Yosemite National Park is not only the greatest and most wonderful national playground in California, but in many of its features it is without a rival in the whole world. It belongs to the American people, and in world-wide interest ranks with the Yellowstone and the Grand Canyon of the Colorado. It embraces the headwaters of two rivers—the Merced and the Tuolumne. The Yosemite Valley is in the Merced Basin; the Hetch Hetchy Valley, the Grand Canyon of the Tuolumne, and the Tuolumne Basin in its general features is the more wonderful and larger half of the park.

The Hetch Hetchy Valley is a wonderfully exact counterpart of the great Yosemite, not only in its cliffs and waterfalls and peaceful river, but in the gardens, groves, meadows, and camp grounds of its flowery, park-like floor.

At a recent session of Congress a most determined attack was made by the city of San Francisco to get the right to use the Hetch Hetchy Valley as a reservoir site, thus depriving 90,000,000 people of one of their most priceless possessions for the sake of saving San Francisco dollars.

As soon as this scheme became manifest public-spirited citizens all

dollars.

As soon as this scheme became manifest public-spirited citizens all over the country entered their protests, and before the session was over the park invaders saw that they were defeated and permitted the bill to die without bringing it to a vote, so as to be able to try again.

Ever ready to take advantage of every political change, a bill having the same destructive purpose has been reintroduced at this session of Congress and is now pending before the Public Lands Committee, and

its supporters are speciously urging that it should be rushed through at this special session as an emergency measure, when in reality nothing like an emergency exists.

San Francisco may be in immediate need of an increased supply of water, but her own engineers admit that the present supply can be more than doubled by adding to present near-by sources, and that is the first and most economic plan of development before the city eventually goes to the Sierra for additional water.

The advisory board of Army engineers "Is of the opinion that there are several sources of water supply that could be obtained and used by the city of San Francisco and adjacent communities to supplement the near-by supplies as the necessity develops. From any one of these sources the water is sufficient in quantity and is or can be made suitable in quality."

We are preparing data based on the reports of the Army engineers which will demonstrate that San Francisco can obtain abundance of pure water from other sources than the Tuolumne Hetch Hetchy.

So important a bill should not be rushed through Congress without mature consideration and time allowed for its opponents to be heard. Anything less would be unjust to the American people; therefore, in behalf of all who appreciate our mountain parks and believe that they should be preserved we cail on you to aid us in postponing consideration of this destructive bill until the regular session of Congress, for we have not even seen a copy of the bill now being considered. Ever since the establishment of the Yosemite National Park by act of Congress—October 8, 1890—constant strife has been going on around its boundaries and is likely to go on as part of the universal battle between good and evil, however much its boundaries may be broken or wild beauty destroyed.

When this application was first made, over 10 years ago, the Secretary of the Interior then holding office emphatically denied the right, saying in part:

"Presumably the Yosemite National Park was created such by law

of the Interior then holding office emphatically denied the right, saying in part:

"Presumably the Yosemite National Park was created such by law because of the natural objects of varying degrees of scenic importance located within its boundaries, inclusive alike of its beautiful small lakes, like Eleanor, and its majestic wonders, like Hetch Hetchy and Yosemite Valleys. It is the aggregation of such natural scenic features that makes the Yosemite Park a wonderland which the Congress of the United States sought by law to preserve for all coming time as nearly as practicable in the condition fashioned by the hand of the Creator—a worthy object of national pride and a source of healthful pleasure and rest for the thousands of people who may annually sojourn there during the heated months."

In behalf of all of the people of the Nation we ask your aid in putting an end to these assaults on our great national parks and to prevent this measure from being rushed through before it can be brought to the attention of the 90,000,000 people who own this park.

Faithfully, yours,

JOHN MUIR.

JOHN MUIR. E. T. PARSONS. WM. F. BADE. R. V. COLBY.

### EXHIBIT B.

DEAR MR. STEENERSON: I hope you will insist on the objections here stated being met—they can not be refuted. Unless somebody stands up for the national interest in national parks they will go to the wolves by default through good-natured acquiescence and personal and political influence.

Sincerely, yours,

R. U. JOHNSON.

[For publication and comment in the press.]

THE HETCH SCHEME—WHY IT SHOULD NOT BE RUSHED THROUGH THE EXTRA SESSION—AN OPEN LETTER TO THE AMERICAN PEOPLE.

Fellow owners of the Yosemite National Park:

THE HETCH HETCHY SCHEME—WHY IT SHOULD NOT BE RUSHED THROUGH THE ENTRA SESSION—AN OPEN LETTER TO THE AMERICAN PEOPLE.

Follow concers of the Yosemite National Park:

For 12 years the city of San Francisco has been trying to obtain from the Government the gift of the wonderful Hetch Hetchy Valley, 18 miles from the Yosemite Valley and one of the chief attractions of the greatest of your national parks. The plea has been that the Hetch Hetchy is the only available source of water supply for the city, this being the only plausible reason for the scheme, which involves the destruction of the valley by flooding it as a reservoir and the exclusion of the public from two of the three chief camping places amid this phenomenally beautiful scenery and from access to 20 miles of the most remarkable cascades in the world. The language of hyperbole is the only appropriate medium to describe the features of your Yosemite National Park. Better that there had never been a Niagara than that the northern half of the park should thus be diverted from the use of the public. The Hetch Hetchy is a veritable temple of the living God, and again the money changers are in the temple!

For these 12 years a few public-spirited men in California and elsewhere, led by John Muir, "California's grand old man," and supported by 8 or 10 national organizations, have succeeded in thwarting this project. Their attitude is not quixotic. They say: "If San Francisco could nowhere else obtain an abundant supply of good water, supreme necessity would require that the valley should be placed at its disposal," But they claim that not until the city has demonstrated that the supply an not be obtained from any other source should any concession be made to its demands. And they further claim that the city is under obligations to prove this negative; that the Hetch Hetch Hotch is not merely desirable, but that it is absolutely necessary. The importance of the reasons for its creation. And they further claim that the city is under obligations to prove this neg

penses, are endeavoring to rush through a drastic measure that would turn over to the city 500 square miles—half your national park. The scandal consists in these facts: (1) That the appeal is made on ex parte evidence furnished by the city and not fully verified by the advisory board of Army engineers appointed by Secretary Fisher, and (2) that in presenting data to this board the city actually withheld a report showing that the Mokelumne River region will afford abundant resources

In presenting data to this board the city actually withheld a report showing that the Mokelumne River region will afford abundant resources at a smaller expense.

Before considering this other source of supply let me cite two damaging statements of a general nature. At the hearing before the Public Lands Committee of the Senate, Mr. NELSON, of Minnesota, in the chair, Mr. McCutcheon said to Mr. James D. Phelan, then and now the most conspicuous advocate of the scheme, substantially this:

"You know, Mr. Phelan, that you could go out overnight anywhere along the Sierra and get an abundant supply of pure water for the city."

"Yes, said Mr. Phelan, "by paying for it."

And Mr. Manson (another advocate) echeed, "Yes, by paying for it."

This is matter of record and has never been disputed. It shows that the object of the scheme is to get something for nothing—the simplest sort of a commercial "grab." The Nation is called upon to make sacrifice of its noblest pleasure ground, not to save the lives or the health of San Franciscans but their dollars; and, moreover, to supply water not merely for drinking but for power.

Again, the report of the Army board states the belief of its members that the city's reports on other sources besides the Sacramento and the Tuolumne (Hetchy Hetchy) are not thorough and complete, "due largely, it is thought, to the lack of importance and impracticability, from the point of view of the city authorities, of any source of supply other than the upper Tuolumne." This report was made on the order of the Interior Department that the city should investigate and report on all possible available sources. It has not done so in good faith. This report of the Army board, it is understood, was drawn up by H. H. Wadsworth, assistant engineer and secretary of the board, who on July 1, 1913, said he had not seen the elaborate report favorable to the Mokelumne River region, known as the Bartell report, and added: "I am very confident that no such report was submitted to the board." The source of suppl

to me.

The plain fact is that the Bartell report to the city of April, 1912, though it was made for the city, proved an obstacle to the theories and purposes of the supervisors, and therefore was withheld by them from the Army board, substitution being made of a report after a brief investigation by Engineer Grunsky (July, 1912) placing the resources of the Mokelumne at 60,000,000 instead of 432,000,000 gallons daily. This withholding constitutes an important suppression of the truth, and was a wrong to the board, to the city's expert (Mr. Freeman), to the Members of both Houses of Congress, and to every other American citizen.

citizen.

If the legislation is not railroaded through Congress, an even fuller report of the Mokelumne resources than that of the Engineer Bartell will be presented, along with an offer of rights and sites by the Sierra Blue Lakes & Water Power Co.

The advantages claimed for this source over that of Hetch Hetchy

(1) It would obviate the invasion of your national park.
(2) It would save 70 miles of tunneling, much of its through solid

rock.
(3) It would be a shorter route by 65 miles.
(4) It could be completed in 4 years, as against the 10 needed to make Hetch Hetchy available.
(5) Its owners will offer it to the city at a price to be arbitrated.
(6) Its watershed is virtually in a forest reserve, not a national park, and thus is more fully protected than a scenic resort like Hetch Hetchy.

(5) Its owners will offer it to the city at a price to be arbitrated.

(6) Its watershed is virtually in a forest reserve, not a national park, and thus is more fully protected than a scenic resort like Hetch Hetchy.

The fact is that with the \$45,000,000 at their command the city made a most elaborate investigation of the source desired and very inadequate investigation of all but one of the others. A congressional investigation may be necessary to reveal whether there was any sinister reason for this attitude.

The country ought to know that the grant to the city would do an immensurable wrong to the residents of California's greatest valley, the San Joaquin. Without water this valley is almost a desert; with water it is a paradise. This central valley of California should have prior claim on the water. I well know the purposes of Congress-in creating the Yosemite National Park, for I was the only person who advocated it before the Public Lands Committee of the House in 1890. These were primarily to preserve the great scenery for the use and recreation of the whole Nation, to defend the forests against destruction by herds of sheep—'hoofed locusts,' as Mr. Muir called them—and to conserve the waters of the region for purposes of irrigation in the San Joaquin Valley. The residents in that valley are overwhelmingly against this legislation, and although the city seems to have arranged with the Turlock and Modesto irrigation representatives the people are not satisfied. This is particularly true of the Waterford region and other large regions dependent for prosperity on the Yosemite Park sources. In order to silence the opposition of the irrigation interests the city's agents have agreed to divide with them the waters of the coveted valley. The spectacle of thus parceling out the resources of one of God's most beautiful creations has had no counterpart since the casting of lots for the raiment of Jesus.

In the face of these facts, where is the "emergency" requiring the passage of this piece of inexcusable folly

resources of the Hetch Hetchy 10 years from now would not incertain emergency.

I have said nothing here of the offer of the local company, the Spring Valley, to sell to the city all its vested interests and options, which it claims would solve the problem for a hundred years, nor of the desirability of establishing a great filtration scheme, such as London is about to do, abandoning the plan of piping from the Welch Mountains. These are pertinent considerations, and they are new to the present Congress, and time should be given to them. This piece of vandalism, so repugnant to the enlightened opinion of the country, can only be

rushed through by the deference of the judgment of Congress to the statements of interested parties. A complete investigation of other sources—which the Army board states that it has had neither time nor facilities to make—should be undertaken by an impartial commission.

Col. Hener, United States Engineer, said in 1898:

"Engineers who made surveys of Lake Eleanor and Hetch Hetchy inform me that there are other Sierra supplies which can be brought here at much less cost than the Hetch Hetchy. The latter by persistent advocates has been preached, almost forced, into acceptance by the people of San Francisco."

The simple issue is not "Shall San Francisco have a satisfactory water supply?" but "Shall the national park be dismembered and Hetch Hetchy destroyed unnecessarily?" The report of the Army board is quoted in favor of the scheme; but it includes the following significant, if not conclusive paragraph:

"The board is of the opinion that there are several sources of water supply that could be obtained and used by the city of San Francisco and adjacent communities to supplement the nearby supplies as the necessity develops. From any one of these sources the water is sufficient in quantity and is, or can be made, suitable in quality. While the engineering difficulties are not insurmountable, the determining factor is one of cost."

In other words, the American people are asked to subsidize the city's water supply to the extent of the money value of Hetch Hetchy and of 500 square miles of phenomenal scenery. Put up at auction what would this wonderland bring? "What am I bid." the auctioneer might say, "for one superb valley, 20 miles of unique cascades, half a dozen snow peaks, beautiful upland meadows, noble forests, etc., now owned by a gentleman named Uncle Sam, suspected of not being able to administer his own property? Do I hear \$20,000,000 to start the bidding? Remember that these natural features are priceless."

Will the reader of these lines also remember that fact?

Citizens, will you not belp prevent

Respectfully, yours,

Robert Underwood Johnson, 327 Lexington Avenue, New York.
Mattapoisett, Mass., August 23, 1913.

#### EXHIBIT C.

PROTEST AGAINST DIVERSION OF WATERS FROM LANDS REQUIRING IRRIGATION, ADOPTED AT LIVINGSTON, CAL., MAY 30, 1912.

Whereas a determined effort is being made by the city and county of San Francisco to secure the passage of a special act of Congress granting to said city and county of San Francisco certain rights and titles to certain waters of the Tuolumne River; and Whereas the said city and county of San Francisco has declared its intention of diverting such waters to points outside of the San Joaquin Valley for uses other than those of irrigation and reclamation, if such rights and titles are granted; and Whereas reports of United States Army engineers show decidedly that the entire run-off supply of the watershed to the San Joaquin Valley is necessary for the valley's proper agricultural and commercial development; and

velopment; and
Whereas it has been clearly shown and proven through the medium
of competent engineers that San Francisco can secure an adequate
supply of water for its own use from other sources, where such
water is not needed for the development of its contiguous Services.

water is not needed for the development of its contiguous ter-ritory; and hereas the question of conserving all of the waters of the San Josquin Valley watershed for use within said valley is one of paramount importance to the very life of every county and community within said valley: Therefore be it Whereas t

mount importance to the very life of every county and community within said valley: Therefore he it

Resolved, That the 2.000 citizens of Merced and Stanislaus Counties assembled at Livingston Bridge this 30th day of May. 1913, for the purpose of dedicating said bridge and the California State highway to the use of the public, hereby taken cognizance of this attempt on the part of San Francisco to divert certain waters of the Tuolumne River for other uses than those of trigation and reclamation, and that we herewith protest strongly against such proposed diversion, and cali upon the Senators and Representatives of the State of California in Congress, and all other Members of Congress having the interest of conservation and irrigation at heart, to unite to protect the agricultural and commercial interests of the San Josquin Valley, and thereby assure the proper development of the semiarid lands of said valley, as well as make permanent the development of the natural resources of the State:

Be it further

Resolved, That copies of these resolutions be sent to all Senators and Representatives of the State of California in Congress, and that they be urged to use every legitimate means to enlist support in a movement directed against the passage of the Raker Hetch Hetchy bill, or any other measure that may be introduced into Congress, having for its purpose the granting to San Francisco, or any other city located outside of the San Joaquin Valley, any rights or titles to any waters of the Tuolumne River, or the waters of any other stream which forms a part of the San Joaquin valley, any rights or titles to any waters of the Tuolumne River, or the waters of any other stream which forms a part of the San Joaquin valley where they would be lost to the trigation and commercial interests of said valley; be it further

Resolved, That this assemblage goes on record as favoring Federal add to the efforts of the citizens of the San Joaquin valley to reclaim their semiarid lands and make them fruitful, such add to be given th

E. S. ELLIS, President of the Day.

The CHAIRMAN. The time of the gentleman has expired. Mr. THOMSON of Illinois. Mr. Chairman, although I come from a great city, and I have always lived there-the city of

Chicago-I claim to be something of a lover of nature, and I have always believed in the principles of conservation. Feeling as I do generally on this question. I came to a consideration of this bill as a member of the Committee on Public Lands with quite a feeling of doubt as to its wisdom, as to the wisdom of the bill as a general proposition, and particularly as to the wisdom of certain of its provisions.

After having listened to the testimony which was submitted to the committee and the discussion of it in the committee I felt convinced that the request of San Francisco as embodied in this bill is a reasonable one and that the bill, in the form to which it has been worked by the committee, is a reasonable and proper bill. My friend from Minnesota [Mr. Sternerson] asks whether there are not other sources of supply, and that question has been asked frequently. There are "There is the Pacific Ocean, right at the door of San Francisco. Why not use that? That might be thought to be a rather extreme illustration or proposition, but it was not so extreme as to be disregarded by our friend, Robert Underwood Johnson, who has sent to all of us, I presume, this circular, which has been considerably discussed and a copy of which I hold in my hand. I have not the pleasure of Mr. Johnson's acquaintance, but I regret exceedingly that he has been led to circulate this statement about this bill and this proposition, which has so many allegations in it that are entirely contrary to fact and on which, for some reason or other, Mr. Johnson seems to have been grossly misinformed by somebody.

To go back to the Pacific Ocean for a moment. I hold in my hand a part of the testimony which was submitted to Secretary Fisher at the time this matter was before him. By the way, in passing may I say that this matter has not been up four times in the last six years and met defeat, as has been alleged here to-day. I suppose one of those four times referred to by the gentleman from Minnesota [Mr. Steenerson] was the time when it was up before Secretary Fisher. Mr. Fisher did not say that he was against this proposition. He did say that this matter had come up just before he was stepping out of office, and that for that reason he was unwilling to make a decision in the matter; and he said further that he felt the proposition was of sufficient importance to be laid before Congress, and that it contained some vital principles and propositions that in any event probably ought to have action by Congress, and it was for that reason that he declined to act in the matter.

Mr. Johnson, who circulates this letter, was before Mr. Fisher as a witness, and he stated, among other things, that he felt that if there was any possible source in existence which San Francisco could use as a basis for a water supply, without respect to the cost of using it, they ought to be compelled to use that source rather than resort to the Hetch Hetchy Valley. At that point Mr. Fisher said:

that point Mr. Fisher said:

Let us see if you mean just what you have stated. We could, of course, distill the water of the Pacific Ocean for a water supply. Now, that is obviously true. Would you say that that ought to settle this question?

Mr. JOHNSON. If, after you have exhausted the other sources of supply from the Sierras, you find that no one of those sources would be adequate, and you do know that by distilling water from the ocean you could supply that, I should say undoubtedly it was the duty of the authorities to do that.

Secretary Fisher. Rather than take the Hetch Hetchy water?

Mr. JOHNSON. Certainly.

Secretary Fisher. Even though it might cost—to make it sufficiently absurd—we will say \$190,000,000 a year?

Mr. Johnson. It would be well invested.

Mr. Johnson is sufficiently unreasonable about this proposi-

Mr. Johnson is sufficiently unreasonable about this proposition to go to the extent of saying that rather than take the Hetch Hetchy water supply, San Francisco ought to be compelled to distill the salt water of the ocean.

Now, it seems to me there is no question at all of the fact that San Francisco needs water. It has been at the mercy of a water monopoly for years, spending as high as 15 to 21 cents per thousand gallons for water. To my friend from Minnesota [Mr. Steenerson] I would say there is an emergency here, and it was demonstrated to the committee that there was reason for bringing this bill to the attention of Congress at this time. The people out there have voted unanimously for a bond issue, and, if this bill can pass, there will immediately be available certain proceeds from that bond issue which can be used by the people of the city for extending their piping system and doing certain things in the way of furnishing an emergency supply at once which will help them very materially.

I wish to call the attention of the committee to the fact that

this Hetch Hetchy site was selected by eminent engineers as the best source of supply for San Francisco as far back as 1891, and the decision of such engineers who gave that verdict at that time has been confirmed repeatedly by some of the most eminent engineers of this entire country.

Another fact has been referred to, and I think it should be emphasized, namely, that under this revocable permit that was issued by Secretary Hitchcock, and also to conform with certain requirements that Secretary Ballinger later laid down, the city of San Francisco, acting in good faith under that revocable permit and to conform to the conditions laid down by Secretary Ballinger, has expended about one and three-quarter million dollars in acquiring certain lands and water rights in connection with the Lake Eleanor proposition and with this Hetch Hetchy proposition; and, as has been pointed out, the city now owns some 780 acres on the floor of this very valley.

The testimony before the committee brought out the fact that

the city has 1,960½ acres in the national park. The further fact was brought out that the entire amount of Government land to be flooded and to be used under this proposition, as provided in this bill, is 2,173 acres. It will also use some portion of its own acreage of 1,960 acres, and the bill provides that such lands as are in the park and owned by the city now and are not used by the city are to be returned and conveyed by the city to the Government after the construction operations are completed.

Now, my friend from New Hampshire [Mr. Reed] and one other gentleman here this morning, just who I have forgotten, compared this plan of getting a water supply for this western city to conditions in their own States. That is an impossibility. You can not compare the conditions in California as to water with the conditions in New Hampshire or with the conditions in the State of New York. The facts as to annual rainfall and the possibilities of impounding water are so vitally and so vastly different that there is no basis of comparison between such Eastern States as those and the State of California,

It has been demonstrated many times by facts collected by engineers and otherwise that this Hetch Hetchy Valley must be used as a reservoir site in time, because conditions in California are such that all the water that it is possible to impound must be conserved. This dam is necessary because this Tuolumne River is a torrential stream. It comes down in certain seasons in great floods and in other seasons it is well-nigh dry, and it is therefore necessary to build this dam in a valley like this in order to get these flood waters and hold them for the dry seasons, when they can be used.

Now, let us look just a moment at the Hetch Hetchy Valley as it is at present. I confess not to have a great deal of patience with gentlemen who sit by their firesides in the East and discuss the plan of giving this valley to this use, without a bet-ter knowledge than they seem to have of the facts that surround that valley and of the physical conditions that are present there, which conditions were so clearly presented to the committee by the witnesses who appeared before it.

My friend from Minnesota [Mr. Steenerson], who addressed us last, said that he hoped to live to get into that valley. If he does, I would advise him to take a very generous amount of mosquito dope with him and any cooling apparatus he may have. I assume he is going in there in the summer time, which is

about the only time when one can get in there.

I would like to find out how many Members of this House have ever been in that valley. There are only two that I know of-one is Mr. Church and the other is Mr. Bell, both of Cali-I have heard them describe the conditions there, and if my friend from Minnesota [Mr. Steenerson] had carefully read the hearings showing all the evidence produced before the committee he would have found that in the early part of the summer this valley is almost impossible of occupancy because of the mosquitoes. They are so vicious that when my friend from California [Mr. Bell] went in there he was told that the mosquitoes were so bad that they had driven out the cattle and had even driven out the wild game. Yet in spite of that he went in there with some of his friends, and stayed there only just as long as it took them to turn around and run out again.

Those are the conditions in the first half of the summer, and, according to those who have been there and who appeared before the committee, the conditions in the latter part of the summer are that the heat is so great that it is impossible to stay in

that valley.

Now, a Mr. Denman appeared before the committeewho had been in this valley a number of times-and he told us of his experience there. I will not take the time to read his testimony to the committee. If any of you have any doubts of the physical conditions of that valley, you ought to read his testimony, found on pages 243, 244, and 245 of the hearings.

This man was a member of the Sierra Club, and he showed us how the sentiment of the members of that club was quite divided on the question of this bill and on the question of whether or not the things that would be done under the bill would impair or improve the scenery of that valley. He showed us, further, that the Hetch Hetchy Valley is not used as an objective point, as a point to which to go to spend a period of time in camping by people who go up into the Sierras. It is

merely used as a stepping-stone, as a temporary stopping place on the way from the lower levels up into some of the higher valleys of the Sierras.

Our friend from Minnesota [Mr. Steenerson] stated, further, that it was all nonsense to say that the flooding of this valley could possibly make this beautiful scenery even more beautiful, and I have no doubt it is beautiful to-day. I would prefer to take the testimony of such men as Mr. Lane, the Secretary of the Interior, who says that in his judgment it would be more beautiful with a lake. I would prefer to take the testimony of a number of men who were before the committee, who say that in their judgment it will be even more beautiful with a lake than it now is. For instance, there is a wonderful waterfall, which is very high, near the upper end of this valley. That waterfall would not be disturbed by the operations that would be undertaken by San Francisco. It has been pointed out to us that with this waterfall at the head and the cliffs on both sides that have been described by others better than I can describe them, the picture that would be presented would be similar to that at Mirror Lake, farther up in the mountains, which is said by lovers of nature to be one of the most beautiful sights in all the Sierras, one that is an objective point of travelers up there who go to see the wonderful sights pre-sented by Mirror Lake. A similar sight would be presented by this lake if the valley was flooded as contemplated in this bill.

The distinguished gentleman from Minnesota [Mr. Steen-ERSON] said he had not heard any reason given by Mr. Pinchot why this bill should pass. My distinguished friend from Wyoming [Mr. MONDELL] made considerable fun of the committee for calling before us and for the coming before us of a lot

of people, among whom he included the charwomen. Mr. MONDELL. Will the gentleman yield? Mr. THOMSON of Illinois. Yes,

Mr. MONDELL. The gentleman wants to quote me correctly?
Mr. THOMSON of Illinois. Certainly.

Mr. MONDELL. If the gentleman will recall, I made no reference whatever to anyone who was called before the committee.

Mr. THOMSON of Illinois. Gentlemen who appeared.

Mr. MONDELL. My reference was entirely to the genesis of the bill—long before the committee ever saw it or heard of it; when it was being incubated. My reference was to the gentlemen who had to do with the genesis and incubation of the measure; not those who were at the hearing after the measure had been drafted.

Mr. THOMSON of Illinois. The measure presented to the House is not the measure that was originally drafted. It has been changed a great many times. The committee studied it carefully with the help of these people and made a great many changes, and the remarks of the gentleman from Wyoming were in connection with the part which these people who came before the committee had to do with the accomplishment of those changes. One of them was Mr. Pinchot, another was Secretary Lane, another was the head of the Geological Survey, another was the head of the Reclamation Service, and so

on. It seems to me it was highly proper to have those people come before the committee, and I believe their ideas were good. Let me read just a few words from the testimony of Mr. Pinchot:

Mr. Pinchot:

We come now face to face with the perfectly clean question of what is the best use to which this water that flows out of the Sierras can be put. As we all know, there is no use of water that is higher than the domestic use. Then, if there is, as the engineers tell us, no other source of supply that is anything like so reasonably available as this one; if this is the best, and, within reasonable limits of cost, the only means of supplying San Francisco with water, we come straight to the question of whether the advantage of leaving this valley in a state of nature is greater than the advantage of using it for the benefit of the city of San Francisco.

reacter than the advantage of using it for the beneat of the city of can Francisco.

Now, the fundamental principle of the whole conservation policy is that of use, to take every part of the land and its resources and put it to that use in which it will best serve the most people, and I think there can be no question at all but that in this case we have an instance in which all weighty considerations demand the passage of the bill.

There are, of course, a very large number of incidental changes that will arise after the passage of the bill.

Mr. Pinchot's testimony was early in the hearings. Later he

I think that the men who assert that it is better to leave a piece of natural scenery in its natural condition have rather the better of the argument, and I believe if we had nothing else to consider than the delight of the few men and women who would yearly go into the Hetch Hetchy Valley, then it should be left in its natural condition. But the considerations on the other side of the question to my mind are simply overwhelming, and so much so that I have never been able to see that there was any reasonable argument against the use of this water sunply by the city of San Francisco, provided the bill was a reasonable bill.

My friend from Minnesota [Mr. Steenerson] stated that Mr. Pinchot's position was otherwise. Here we see Mr. Pinchot

San Francisco, provided the bill was a reasonable bill. Later on he states that, in his judgment, this bill, which he has examined carefully, is, with one exception, which he stated, and in connection with which the committee adopted an amendment, a reasonable bill, and should be passed, and in his judgment should be passed at this session, because he felt it was an

emergency proposition. A good deal has been said as to the effect of the passage of the bill on the inhabitants of the San Joaquin Valley. Gentlemen from the Eastern States have been very solicitous about the welfare of the people in that valley. I doubt not that they are ably represented here by the gentleman from California in whose district that valley lies, and who is a member of the committee, and who voted with the rest of us on the committee to report the bill favorably. He asserts and assured this House yesterday in the remarks he made that he was authorized to state that the people in that valley and his district are not opposed to this bill. There were times when they were opposed to it because of the fact that the bill then before Congress did not have the conditions which my friend from Wyoming finds fault with. His substitute bill is without these conditions, and such a bill would be strongly opposed by these very people he seeks to protect, the irrigationists in the San Joaquin Valley. They insist that if the bill is passed giving San Francisco the use of the valley as a water supply the Government shall impose such conditions as will properly and reasonably require the city to recognize the rights they have and which they claim.

It has been said that if this bill passes the valley will be forever arid. It may be in part, but only in part. It was called to the attention of the committee that there were other water sources which can be availed of for irrigation purposes in addition to the water which will come from this river. Under the rights which the Turlock and Modesto and other irrigation districts have in the State of California the waters can be impounded in dams farther down the valley and used for irrigation purposes. At any rate, if San Francisco should not have the use of this valley, the irrigationists could not avail themselves of the opportunity of using it, because the construction. tion that would be necessary to conserve the water for irrigation purposes, or for any purposes whatever, would entail such an expense that it would be prohibitive from the standpoint of irrigation. They could not finance the proposition.

Now, as to the comparison between Hetch Hetchy and certain other sources, like the McCloud and the Sacramento, I will read a word from the testimony of Col. Biddle:

There is no question in my mind that Hetch Hetchy is the best water supply for San Francisco, and the most economical that can be

And then, on another page, he enlarges on that. You will find it on page 65 of the hearings. Other speakers on this bill have shown the disadvantages of the McCloud River project and the Sacramento River project. May I call attention to another fact in connection with the McCloud River which has not been mentioned. It is a tributary to the Sacramento. Under the Federal lay there must be a certain water stage maintained in the Sacramento. If See Francisco took nearly maintained in the Sacramento. If San Francisco took nearly all the water out of the McCloud River, it would result in reducing the stage of the water in the lower Sacramento to a point below the stage beyond which the law says it must not go. This law provides that if the water gets down to that point it shall be unlawful to take any more water from the Sacramento or its tributaries, and this would interfere with the use of the McCloud River, because at the very time the water was most needed it would be the least available.

As to the Sacramento River, the proposition would involve filtration, and also pumping the entire supply; it would be taken out of the river below many cities the sewage from which flows into the river. It would necessitate filtration and would interfere with navigation, as has already been pointed out.

A great deal has been said about the Lake Mokelumne source

and about the suppression of the report on this source of supply. May I say this about that source of supply: It is claimed to be owned by what is known as the Sierra Blue Lakes Water Co., of which Mr. Sullivan is president. He appeared before the committee and testified.

I do not know whether they really own or have a title to that water or not. I do know this, that testimony was produced before the committee from two different sources which showed that bonds of that company out in the State of California are regarded by banks and financiers as worth nothing because of the prior rights on that river, and in fact it is believed by those who claim to know whether these people have title or not that they have not, and it was brought out on cross-examination of Mr. Sullivan by Mr. French that there were 476,425,000 gallons daily from the Mokelumne River on which filings had been

placed prior to the filings by this company. The report that is supposed to have been suppressed was a report by one of the assistant city engineers of San Francisco, as I remember it; a report in which the chief engineer under which this assistant worked could not agree as to the facts claimed and conclusions reached by this assistant engineer. Is it to be wondered at that the chief engineer, who did not agree with the conclusions of the gentleman who was working under him as an assistant, one of some 110 other assistants in the engineering force of San Francisco, is it to be wondered that the chief engineer did not advocate that report as being a sound one and one which he could approve when he felt that the facts which his subordinate reported as true were not true, and when he felt the conclusions which his subordinate reached were not sound? The report was never suppressed in the sense it was spirited away. It was always available if it was wanted. It was not presented to the Army board, true, nor was it requested by the Army board. Possibly they did not know about it, but it was available, and in the committee report on this bill you will find a letter from the chief of the Army board in which he states that report could not have changed their findings in any way, shape, or manner; that the board got their facts at their own instance at first hand and that their findings were based on those facts. And further it shows Mr. Wadsworth, who drafted the form of the report, had a number of conversations with the gentleman who made this report, Mr. Bartell, in which Mr. Bartell went into the theories of his report, so these theories were before this board even before they drafted their report.

Now, I want to take up in the few minutes which remain to me some of the statements included in this letter of Mr. Johnson. I have all respect for Mr. Johnson and I recognize that he has a right to his views and I do not quarrel with him because of his views nor do I wish to unduly criticize him, but I must take this opportunity to call attention to the fact that there are some statements in this letter that are absolutely conthere are some statements in this fetter that are some statements in this fetter that are the facts. All through this letter runs the idea that the passage of this bill will dismember the park. These words are used near the top of the first page: "Better that there had never been a Niagara than that the northern half of the park should thus be diverted from the use of the public." The northern half of the park diverted from the use of the public by this bill. The fact of the matter is that the northern half of the park, which is unavailable to the public now, will become available under this bill and the people can go in there if this bill passes who can not get in there now.

At another point Mr. Johnson intimates that the passage of this bill would amount to turning over 500 square miles—half of the National Park—to the city.

In one of his last paragraphs he intimates that the passage

of the bill will result in destroying 20 miles of unique cascades, half a dozen snow peaks, noble forests, etc. What is the truth about all this? It will turn a valley 1,100 acres in extent, 730 acres of which San Francisco now owns in fee and acquired at great cost at the direction of the former Secretaries of the Interior or to comply with conditions imposed by them, into a True the valley is beautiful, but so would the lake be beautiful, and whereas the beauty of the valley can be viewed and enjoyed by a very few because of the inaccessibility of this part of the park and because of the mosquitoes, it will, if this bill passes become available for many more people because of the roads and trails required to be built under the terms of this bill. It has been well said that there is no beauty unless there is an eye to view it.

The wonderful waterfall at the head of the valley will not be disturbed, and to say or intimate that snow peaks of the Sierras will be disturbed or lost to the people by the passage of this bill is too unreasonable and absurdly beyond the fact to call even for an attempt at a reply.

It seems to me that any doubt that may be entertained by anyone here as to the reasonableness of this bill should be dispelled by an examination of the long list of those who favor the bill. This list includes:

bill. This list includes:

Hon. Franklin K. Lane, Secretary of the Interior.

Hon. David F. Houston, Secretary of Agriculture.

Dr. George Otis Smith, Director United States Geological Survey.

Hon. F. H. Newell, chairman United States Reclamation Commission.

Hon. Henry S. Graves, Chief Forester. United States Forest Service.

The Board of Army Engineers: Col. John Biddle, Lieut, Col. Harry

Taylor, and Col. Spencer Cosby.

Hon. Glifford Pinchot, former Chief Forester.

Two Senators and 11 Representatives from the State of California.

The people of Oakland.

The people of Berkeley.

The people of Alameda.

The people of San Jose.

The people of Menio Park.

The people of Richmond.

The Legislature of the State of California.
The governor of the State of California.
The engineer of the State of California.
The conservation Commission of the State of California.
The people of San Francisco.
The Chamber of Commerce of San Francisco.
The labor unions of San Francisco.
The luprovement clubs of San Francisco.
The newspapers of San Francisco and cities about San Francisco Bay.
The landowners of the Turlock irrigation district.
The landowners of the Modesto irrigation district.
The Commonwealth Club of California district.
The Native Sons and Daughters of California.
The Native Sons and Daughters of California.
The Public Lands Committee of the House of Representatives.
On the other hand, who is opposing this bill? Mr. Sullivan.

On the other hand, who is opposing this bill? Mr. Sullivan, the president of a rival company, anxious to sell its source to the city of San Francisco; and Mr. Johnson, who, as I have pointed out, believes that if Hetch Hetchy was the only source available other than the Pacific Ocean, the city should be compelled to make use of the latter; and other well-meaning gentlemen of high character but similar extreme views, based, it would appear, on certain alleged facts as to this Hetch Hetchy Valley which are gressly incorrect.

It has been stated that this bill is for the benefit of San Francisco alone. That also is incorrect. It expressly is for the benefit of all the cities about San Francisco Bay and also for the very great benefit of the irrigationists, who by the terms of this bill are assured a greater and a more dependable water supply than they have at present or that they could afford by

themselves to procure.

Some have asked why this bill looks a century ahead in providing water for these coast cities. That question is ably and abundantly answered by Col. Biddle in his testimony before the committee. It appears on page 92 of the hearings. Col. Biddle said:

Biddle said:

Now, I would like to make this further statement: The reason we take the year 2000 in the case of San Francisco—and I do not think eastern cities need take such an advanced date—is on account of the general lack of water in California. Cities situated as San Francisco have to look a long time forward. Here at Washington, for instance, you have the Potomac River, and the chances are that the water situation, so far as Washington is concerned, 50 years hence will be the same as it is to-day. In the case of San Francisco, however, there would be the danger of so many water rights and water-use developments that it might be almost impossible 50 years from now to obtain water rights without great expense and even hardship to agricultural communities. That is the reason we take that advanced date.

I would also call your attention to a paragraph in the Army board report. I read from page 14:

board report. I read from page 14:

In one important respect the situation in California requires special consideration. In eastern cities, where there is little consumption of water except for municipal supply, it may be safely assumed that if at any future time additional water is needed the existing sources will usually be available as at present. In California all water has great value. Due to the large extent of arid and semiarid land that can be made fertile by the use of water, irrigation is assuming great importance; due to lack of coal and the opportunity for economical water-power development, the use for the latter purpose will surely be greatly extended. In a relatively few years practically all available water will doubtless be appropriated for one or the other purpose, and it will then be possible to obtain it for municipal use only at great cost and damage to existing communities and industries. It is, therefore, necessary to-day for the cities of California to look further ahead than in most other parts of the country, and to take such steps that in the future when they may need the water they shall have the right to it. For this reason it is believed that in making provision for the future supply of San Francisco and other bay cities a source should be selected if possible that is capable of supplying the needs of the communities for the balance of this century. Such a course would seem both wise and reasonable, provided it involves no sacrifice of economy.

One more word as to the conditions imposed by the Government in this bill. This is not so much a legislative act or grant as it is a contract between the Government and San Francisco and these other cities, in which we, representing the Government, not only may but should place proper and reasonable conditions. That Congress has the right to impose such conditions there can be no question.

Let me quote a few words from the testimony of Secretary

Lane before the committee:

The general principle of the bill is that these lands belong to the Federal Government and that we have control of them. The water originates in them, the water flows through them, and we have control over the dam site, and if we are to allow these lands to be submerged we have got the right to make certain conditions. Certainly no one can come in and use lands in a national park without our consent, and if you give consent, you have got the right to make conditions. Now, I have no doubt whatever but that is entirely within your power.

In Butte City Water Co. v. Baker (196 U. S., 119, 126) we find the following language:

The authority of Congress over the public lands is granted by section 3, Article IV, of the Constitution, which provides that "the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." In other words, Congress is the body to which is given the power to determine the conditions upon which the public lands shall be disposed of. The Nation is the owner and has made Congress the principal agent to dispose of its property.

In Gibson v. Chouteau (13 Wall., 92, 99) the Supreme Court said:

With respect to the public domain, the Constitution vests in Congress the power of disposition and of making all needful rules and regulations. That power is subject to no limitations. Congress has the absolute right to prescribe the times, the conditions, and the mode of transferring this property, or any part of it, and to designate the persons to whom the transfer shall be made. No State legislation can interfere with this right or embarrass its exercise.

And again, in United States v. Gratiot (14 Pet., 526, 527), we find the following language used by the court:

The Constitution of the United States (Art. IV, sec. 3) provides, "That Congress shall have the power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." The term "territory" as here used is merely descriptive of one kind of property and is equivalent to the word "lands." And Congress has the same power over it as over any other property belonging to the United States; and this power is vested in Congress without limitation, and has been considered the foundation upon which the Territorial governments rest.

What does it mean to conserve our natural resources? it mean to build a wall about our forests and prohibit the use of our power sites and mineral deposits until some time in the distant future? Does it mean that we must deny the use of these natural resources to the generation of to-day and seal

them up for the benefit solely of posterity?

Most certainly it does not. In the words of the platform of the Progressive Party, of which I am proud to be a member, "the natural resources of the Nation must be promptly developed and generously used to supply the people's needs." Long, the city attorney of San Francisco, has well put it in his very able brief submitted to the Committee on Public Lands in connection with this bill, conservation means so regulating the development of our natural resources that they may be put to the greatest beneficial use, may yield the maximum economic return for all the people of all generations, the present one as well as those which are to come after us.

There are three classes of people to be considered:

The people of San Francisco and the other bay cities.

2. The people of San Joaquin Valley who have irrigation interests.

3. The people of the Nation who want to enjoy the Hetch Hetchy Valley.

How can this valley be used or developed so as to bring about the greatest good to the greatest number now and in the future?

(a) If left as it is—
1. No good to San Francisco or bay cities.
2. No good to San Joaquin Valley beyond its present use.

3. It supplies a poor camping place and beautiful scenery for comparatively very, very few

(b) If developed as contemplated by this bill-

1. It supplies the hundreds of thousands in bay cities with abundant pure water, the highest possible use to which water can be put.

2. It insures irrigationists greater amount and more depend-

able supply than they now have.

3. It supplies better camping places near by and many think

even more beautiful scenery than is now there.

True, if this development of this canyon is permitted to proceed, as contemplated in this bill, it will result in some parts of the valley being deprived of water that might be used to irrigate the land, and therefore they will have to remain arid and unproductive. But this fact should not be permitted to stand in the way of the passage of this bill for two reasons:

First. The same objection could be raised to every available source to which these cities might turn for a municipal supply.

Second. The highest use to which water can be put, from the standpoint of true conservation, is domestic use, and if a domestic use and an irrigation use depend upon the same supply. which is insufficient to satisfy both uses, then, under the law of conservation, as well as the law of the land, where the courts have had occasion to declare it, the irrigation use should and must yield to the domestic use.

As has been well asked, shall the ever-increasing thousands of inhabitants of these California cities be deprived of the supply of pure water, which engineers agree is the most available for them, in order that a comparatively small area, which is not reasonably near the river, may some day receive intensive cultivation? And it might well have been added, in order that a few enthusiasts may go into this valley and be eaten up by mosquitoes while they are admiring some cliffs, admittedly beautiful, and which will be just as beautiful after the valley has been turned into a lake. Certainly true conservation can not and does not dictate such a policy.

Let me call your attention to a few of the provisions of this bill that I feel should be emphasized. At the risk of repetition may I again call your attention to the advantages the irrigationists will gain from this bill:

tionists will gain from this bill:

The city of San Francisco in the proposed bill has conceded to the Modesto-Turlock irrigation district the full amount of flow of the Tuolumne to which they are legally entitled, viz, 2,350 second-feet; has allowed them to take for storage purposes during the two months of the year when the water is highest up to 4,000 second-feet of the daily flow; has agreed to sell them stored water from the city's reservoirs at cost whenever they need it; and has allowed them to increase their maximum irrigable area from 257,000 acres to 300,000 acres, so as to permit of their sharing their supply with the newly organized Waterford district. In addition to all this it has agreed to furnish both districts with hydroelectric power at absolute cost. Could anything be more equitable than this proposition? The Army board characterizes, on page 45 of its report, the proposition made by San Francisco to Secretary Fisher for protection of the irrigation districts as a "reasonable one." The present proposition goes further than that one. It is more than reasonable. It is distinctly generous, and has been so recognized by the representatives of the Irrigationists, with the sole exception of those who believe San Francisco should never be allowed to use the Tuolumne watershed at all.

Under the provisions of section 1 of the bill the participation

Under the provisions of section 1 of the bill the participation of other cities in the benefits of this bill does not depend on the will of San Francisco; but any one of them that chooses to avail itself of this source of water supply may do so "in accordance with the laws of the State of California in force at the time application is made."

Under the provisions of section 6 the grantee can not assign its rights acquired under this bill to any private corporation and can not sell water or electric energy to any private corpora-

tion or individual for the purpose of resale.

The sanitary regulations imposed in section 9 on campers and others who may go into this region are no more than any camper who has any sense of consideration for others should observe anyhow. Under the provisions of paragraph O of section 9, the prices to be charged by the grantee for water or electric energy are under the control of the public utilities com-mission created by the laws of the State of California.

In paragraph P of the same section we find a requirement that the grantee shall build various roads and trails, which will make this part of the Yosemite National Park much more ac-

cassible than it is at present.

In its last section the bill expressly disclaims any attempt to interfere with or override the State laws of California in the matter of the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses.

I have heard of no reason why the passage of this bill should be delayed to the regular session. In testifying before the committee Mr. Lane, the Secretary of the Interior, said:

I think that there is not any argument that can be advanced against this proposition that you will not find in your records. They have already, as I understand it, presented before Secretary Fisher, and perhaps before your committee, the full line of their objections.

In reply to a question Mr. Pinchot said while before the committee:

I am thoroughly and heartily in favor of it (this bill). I am in over of passing the bill, now before the committee, and passing it at

The fact that the entire delegation in Congress from California, counting among their number men of every political faith represented in this body, is unanimously in favor of this bill should mean much to the others of us here. It certainly can not be believed by anybody that every Member from California in both Senate and House would so far fail to reflect the sentiment of the people of his State as to unite, without exception, on a bill that the people do not want. Nor can it be believed that these men, sent here by the people of their State, would come here and unanimously ask for the wanton destruction of some of her natural beauties, as some people would have us believe is the case.

They all unite in saying that in their judgment, and in the judgment of their people, this request of San Francisco and the other bay cities of California is a reasonable request; and they

all ask the passage of this bill.

And in this delegation in the House from California, all in favor of this bill, is the greatest conservationist in Congress, WILLIAM KENT, a man who is such a lover of nature that he purchased a forest of great trees out there, named it after Mr. Muir, and presented it to the Government, that these great trees

might receive proper care and be preserved.

Such is not the act of a nature fakir, but of a true lover of nature. Mr. Kent is known all over this continent as a stickler for conservation. I am sure I have much to learn of conservation and of its application, and I am not as familiar with the physical conditions surrounding the valley and the park involved in this bill as those who are from that far-distant State in which they are located. However, I do not hesitate to take my stand in favor of this bill, along with the solid delegation from California and with those noted conservationists, Mr. Kent and Mr. Pinchot, to whose views on this bill I have already referred.

Mr. KAHN. Mr. Chairman, at the outset I desire to thank the gentlemen of the Committee on the Public Lands for the splendid manner in which they have presented the facts con-cerning this legislation to this House. They have covered the ground so fully there is little left for me to say. The city of San Francisco, since 1898, has grown very rapidly, and from that period its growth has been constant. Notwithstanding our terrible disaster of 1906, the census of 1910 disclosed the fact that we had added about 100,000 to our population in the decade between 1900 and 1910. The cities around the Bay of San Francisco had also grown very largely in population during that period, the city of Oakland alone having increased more than 100 per cent. It was believed by the men who had the future welfare of the city of San Francisco at heart that it would be necessary to go to the Sierra Nevada Mountains for an adequate water supply, because in California the Coast Range, which lies along the shores of the Pacific, does not enjoy the precipitation that takes place in the high Sierras. We have, approximately, 25 inches of rain at San Francisco when we have a full seasonal rainfall.

The rainfall has been somewhat less than that in the last three years, and, notwithstanding the statements of one or two of the gentlemen on this floor who have spoken in opposition to this bill, that there is no emergency for water at San Francisco, the fact remains that there are many sections of that city that to-day are not supplied and can not be supplied by the local company which furnishes the water to that municipality. We have had, as the gentleman from California [Mr. RAKER] stated, a number of severe fires, where the engines went to the seat of the conflagration and could do nothing toward staying the flames because there was no water in the vicinity.

When the question of taking a Sierra supply was called to the attention of the people, no less than 14 different sources of supply were investigated. Some of them did not constitute an entire supply, but it was believed that they could be utilized in conjunction with other sources for the purpose of furnishing pure water to the cities around the Bay of San Francisco.

These 14 sources were fully investigated.

The Hetch Hetchy Valley was the one that was deemed most desirable for many reasons. In the first place, the water running through that gorge rises high up in the Sierras; there are no habitations in the vicinity, and probably there never will Therefore, the danger of contamination is exceedingly remote, and that is an all-important factor when you are looking for a source of pure water. Pure water is one of the greatest assets that any city in the world can have.

The letter of Robert Underwood Johnson, which has been alluded to here many times, states that 500 square miles of the Yosemite Valley will be destroyed if this bill shall be enacted into law. The statement is absolutely ridiculous and absurd. It is not true. There are 719,622 acres, or thereabout, in the Yosemite National Park, and all of the land that will be affected by this bill will be 3,300 acres. Of these 3,300 acres, San Francisco now owns in fee simple nearly 2,000 acres in that park. And so Mr. Johnson's statement all the way through is filled with similar absurdities and misstate-

I will not attempt in the short time that I have to go into details, but I deplore the fact that that gentleman has seen fit to print at the very top of his misleading circular the words "For publication and comment in the press." He wants the press of the country to carry his erroneous data to the citizens of our great country. I deeply regret that the distinguished publicist has found it necessary to so distort the facts.

Now, it was stated on the floor this morning that there is a lobby here from San Francisco advocating this bill. The only evidence of a lobby, of an insidious lobby, if you please, that I have seen is a letter from Mr. Edmund A. Whitman, of Boston, Mass., who appeared before the Committee on the Public Lands, not only in this Congress, but in previous Congresses. Mr. Whitman sends out a statement regarding this legislation over his own signature. I have a high regard for him. He is a great lover of nature, and that is the impelling motive that causes him to send out this statement. He is one of that class of enthusiasts who would sooner save a rock than human life. Fortunately they are not numerous in the United States. He is afraid that we are going to destroy some wonderful scenery, and accompanying his statement he sends out this letter:

SOCIETY FOR THE PRESERVATION OF NATIONAL PARKS, EASTERN BRANCH, Boston, Mass., August 11, 1913.

TO THE EDITOR:

You are earnestly requested to write an editorial of protest against he proposed high-handed invasion of a national park, and urge your eaders to write letters of protest to their Congressmen and Senators.

EDMUND A. WHITMAN, President.

He is president of the Society for the Preservation of National Parks. Probably the letters that my friend from Minnesota [Mr. Steenerson] received from some of the women's clubs in his district were inspired by Mr. Whitman's lucubration.
Mr. COLLIER. Will the gentleman yield right there?

Mr. KAHN. Certainly.

Mr. COLLIER. I do not know how much time the gentleman has

Mr. KAHN. Not very much.

Mr. COLLIER. I do not wish to encroach on it at all, but 1 would like to know how it is going to destroy the looks of the park by putting in a reservoir? Just give us a minute or two

Mr. KAHN. We contend that it will beautify the park; we contend that we will construct a beautiful mountain lake 6 miles long and 11 miles wide out of an area that to-day is al-

most entirely a mosquito swamp.

Let me call to the attention of the gentleman from Mississippi a parallel case: If the gentleman has ever traveled over the Pennsylvania Railroad and has come around Horseshoe Curve, he has noticed a series of three little lakes that supply the water for the city of Altoona, Pa. Those lakes have materially enhanced the beauty of that locality. It was an open gorge in the years gone by, which did not begin to compare in beauty with the aspect of the surrounding country to-day. In the Yosemite Valley itself, that marvelous wonderland which is visited by anywhere from 30,000 to 50,000 people a year-because that part of the Yosemite National Park has been made accessiblethere is a little sheet of water known as Mirror Lake.

The visitors to the Yosemite Valley, by the hundreds, get

up in the morning before sunrise and go up to Mirror Lake to see the wonderful reflection of the towering granite cliffs that surround it. They watch the reflection of the sun on the bosom of the lake as it comes up over these cliffs. The Half Dome, of the lake as it comes up over these cliffs. The Hair Dome, Mount Watkins, and other granite walls gain added beauties in these reflections. Within the last two or three years, by reason of freshets, Mirror Lake has become filled with sand to some extent and its beauty has been greatly impaired. The reflections have been partly destroyed. I was in the Yosemite Valley in the early part of October of last year, and many of the people there told me that they hoped something might be done to dredge Mirror Lake so that its great natural beauty could be restored. could be restored.

This lake which we propose to create in this narrow gorge of the Tuolumne River will reflect upon its placid bosom every cliff and the beautiful waterfall that has been referred to by one of the previous speakers. It will glass the soft blue skies, the trees, the granite walls, and all the natural wonders of the valley. There is nothing more beautiful than a clear, mountain lake. We in California, who have many of them, treasure them highly. We know that the scenery of the Hetch Hetchy Valley will be improved materially by the construction of a dam so that this mosquito-breeding swamp shall become a beautiful mountain lake.

Mr. LAZARO. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from California yield to the gentleman from Louisiana?

Mr. KAHN. Yes.

Mr. LAZARO. Does the gentleman think it is reasonable for anyone to believe that an entire delegation would come here and stand as a unit back of a measure that would destroy the beauty of anything in their State?

I do not think so.

Mr. LAZARO. Is it not a fact that all the members of your delegation are united on that-Republicans and Democrats?

Mr. KAHN. Absolutely. There is absolutely no politics in the thing. As a matter of fact, Hetch Hetchy Valley lies in the district represented by my colleague, Mr. RAKER. The people of that district know the mountains of California. They are They love their mountains, that rear their mountaineers. lofty peaks into the very blue of heaven, and yet there is not a man that I have ever heard of in that whole district that objects to the conversion of this mosquito-breeding swamp into a beautiful mountain lake, destined to give pure water for drinking purposes to the citizens of many large municipalities near the Golden Gate, 140 miles to the westward.

The gentleman from Wyoming [Mr. MONDELL] yesterday undertook to say that San Francisco conceived the idea of getting its water from the Hetch Hetchy Valley after Los Angeles had secured her legislation for Owens Lake.

Mr. MONDELL. No-

Mr. KAHN. I understood him to say so.
Mr. MONDELL. Well, the gentleman misunderstood me.
What I did say was that after her sister city, somewhat her
rival, had gone for a source of supply to Owens Lake there was

no use in talking to anybody from San Francisco about anything but Hetch Hetchy. They would have a finer supply than the people of Los Angeles.

Mr. KAHN. The people of San Francisco, I will say to the gentleman, discussed the project of Hetch Hetchy for about seven years before the people of Los Angeles ever dreamed of the Owens Lake project. We had been working on the Hetch

Hetchy project, I say, for about seven years before Los Angeles thought of going to the Sierras for her water supply. Mr. MONDELL. It must have been a state of mind, then,

on the part of San Francisco.

Well, the gentleman can put it that way, if he Mr. KAHN. San Francisco is desirous of getting the best water desires. supply that is available, and we believe that Hetch Hetchy is

Mr. MONDELL. I am inclined to agree with that. Mr. KAHN. I was sure that was the state of mind of my friend from Wyoming.

There are other sources of supply. There is no doubt about lat. But there is not one of them that can compare with this,

and all of them are infinitely more expensive.

After all, the taxing capacity of any municipality is limited. San Francisco, up to the time that she was overwhelmed by disaster in 1906, was practically free from debt, and that fact was a godsend to that city, for when the earthquake and con-flagration of that year came along and destroyed her streets, destroyed her sewers, burned down her schoolhouses, her fireengine houses, her city hall, her hall of justice, her jails, her police stations, and numerous other utilities, it became necessary, in the rehabilitation and the reconstruction of the city, to supply the municipal utilities that had been destroyed in the overwe have whelming disaster. Consequently bonded debt now.

It is presumed that this project will cost, when it is completed, \$77,000,000. It is a great sum for any municipality to expend. But we are limited in our possibilities for bond issues under our laws, and the addition of twenty or thirty or forty million dollars would practically make it impossible, or would tend to make it impossible, for the city to go to the mountains

for a source of pure water for domestic uses.

We do not think that this is too early to secure this legisla-tion. Some people have said, "Wait; develop the water sup-plies in the Coast Range before you ask for this." The supply from the Coast Range that we now get is furnished by a local privately owned corporation. They have developed something like 40,000,000 gallons per day for the use of San Francisco. They probably can develop at least half as much again; possibly as much again. This city of Washington, with not so many inhabitants by 100,000, has a supply that yields 66,000,000 gallons of water a day. There is that city, out by the Golden Gate, that receives only about 40,000,000 gallons a day from the local company. The city of Denver, which has about half the local company. The city of Denver, which has about half the population of San Francisco, has a supply from the mounthe population of San Francisco, has a supply tains that furnishes her 200,000,000 gallons a day. Yet we in 40,000 gallons a day. Why, most every one of the large municipalities of our country have been expending many millions of dollars on their water supplies in recent years.

We believe that after this bill is passed we may have litigation. I do not doubt that the owners of riparian rights will take us into the courts, and we will have to fight for everything we get. That litigation may take years. Every year's delay means additional cost to our taxpayers. We are preparing for the future; we are looking ahead a hundred years, which is none too far, because, in my judgment, after the opening of the Panama Canal those cities around the Bay of San Francisco

will increase in population by leaps and bounds.

Much has been said about the matter of irrigation. - We all believe in irrigation in the West. Irrigation is one of the most important factors in the upbuilding of California and the West. Millions of acres of our broad domain would be practically valueless if we were not able to put life-giving water upon the soil. There are two irrigation districts that will be supplied from this Hetch Hetchy source—the Turlock district and the Modesto district. Those irrigation districts filed their claims under the laws of the State of California some years prior to the time that San Francisco filed her claims for drinking water. Under the law of the State those irrigation districts are entitled to the full amount of water for which they filed before San Francisco can get a single drop for drinking purposes. Those claims of the irrigation districts are for 2,350 second-feet of water. Under the terms of this bill we have been more liberal than that. We give the irrigationists 4,000 second-feet, so that their tract will be increased to 300,000 acres that will be irrigated by this water.

True, there are some landholders in the San Joaquin Valley who live beyond this 300.000-acre area, who have claimed that the construction of this dam and the use of the water by San Francisco may deprive them of some of their rights. Not one of those irrigationists ever filed under the law of California for a single foot of the water prior to the filing of San Francisco; and the highest use to which water can be put is domestic use. The owners of that area, who claim their land will not be irrigated if this bill goes through, could never afford to build such a dam. They could not finance the expense. It is practically impossible for them to do it. The city of San Francisco and her sister cities around the bay are able, by reason of their resources and their taxing power, to raise this vast sum of money. The irrigationists would go bankrupt if they attempted such a thing.

There is nothing more that I desire to say about the matter. I feel satisfied that the proposition which San Francisco has placed before the House is a fair one to the people of the United States. There are some provisions of the bill that I do not like. There are some burdens placed upon my city that I do not believe ought to be in the bill, but we are willing to compromise and to accept the conditions, because we need the water. The growth of our city demands the enlargement of our supply, and for that reason we are willing to accept the bill, and we

do accept it, with all its burdens,

Mr. ELDER. Do you expect after the bill is passed to try at a later time to get these burdens removed?

Mr. KAHN. Oh, no, indeed. We are anxious to get to work on this supply; so anxious that we will take it with all its burdens, and the city will have to agree to live up to every proposition set forth in the bill, under the terms of the bill itself, before it can even begin operations in constructing the dam.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. KAHN. Certainly.

Mr. TAYLOR of Colorado. You may possibly remember that during the hearings I had some doubt as to whether the clause providing for a forfeiture back to the Government in case of failure to construct, or for any other reason, was sufficiently

Mr. KAHN. I remember that.

Mr. TAYLOR of Colorado. Do you believe that the language of this bill is sufficient so that in the event that if any untoward or unforeseen reason should arise the property could not revert to any private ownership?

I am satisfied that under the terms of the bill Mr. KAHN.

it could not.

Mr. TAYLOR of Colorado. Is there anything in the bill to prevent the city from mortgaging this plant and permitting it

to be foreclosed?

Mr. KAHN. I believe all of those matters are thoroughly cared for in the bill. I think the committee that considered the matter gave it very earnest attention and safeguarded the rights of the Government in a manner which I for one believe could not be bettered.

Mr. TAYLOR of Colorado. The only thing that occurs to us is that we want the assurance that the city of San Francisco is going to live up to the spirit as well as the letter of this bill in

granting them this right.

Mr. KAHN. There is no question but that San Francisco will live up to the spirit and letter of the bill. To give my friend an idea of what the sentiment is in San Francisco I want to say that when the question of the first issue of bonds was placed before the voters, on a proposition for the city to issue \$45,000,000 of bonds so as to begin this work, the election that was held developed the fact that 30,000 of our citizens voted in favor of it as against 1,200 against it.

Mr. TAYLOR of Colorado. But the gentleman understands that there are some burdensome conditions placed in the bill. I feel personally that there are more than is necessary-more

than the Government ought to exact.

Mr. KAHN. I think the gentleman from Colorado and I are

in thorough accord on that proposition.

Mr. TAYLOR of Colorado. There is some lingering doubt in the minds of some people as to whether or not San Francisco is in a position and will live up literally to all these conditions and will build the roads and the water power that they are getting by this act which will inure to the benefit of the people of the bay cities.

Mr. KAHN. Not only to the people of the bay cities, but to all the people of the United States. The roads which she will build will make that place accessible. The gentleman from Minnesota [Mr. Steenerson] this morning said that he wanted to go to Hetch Hetchy Valley and see it in all its pristine

splendor.

I will warrant that the gentleman from Minnesota can not get into the Hetch Hetchy Valley. It requires a mountain climber; it requires an agile, energetic man. There are trails in there so narrow that if you were to make a single misstep you might fall 1,000 feet to the bottom of the valley. As a matter of fact, the construction of these roads will make this valley very accessible. It will create opportunities for those tourists who desire to see it to do so with little or no discomfort. At the present time a trip into the Hetch Hetchy is all discomfort.

Mr. SUMNERS. Will the gentleman yield?

Mr. KAHN. Yes.

Mr. SUMNERS. At the beginning of section 9 there are three lines which undertake to make these conditions run with the grant. Is that the only provision in the bill with reference to this feature?

The CHAIRMAN. The time of the gentleman from Cali-

fornia has expired.

Mr. KAHN. My time having expired, I will try to answer the gentleman when we reach that section under the fiveminute rule. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is

there objection?

There was no objection.

Mr. FERRIS. Mr. Chairman, on yesterday I asked unanimous consent that the gentleman from California [Mr. J. I. NOLAN], who is sick in bed, might have the right to extend remarks in the RECORD. That was granted. I have a short manuscript of four or five pages which embraces what he would have said if he had been able to be here, and he desires that

the CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that the remarks of the gentleman from California [Mr. J. I. Nolan] be inserted in the debate at this

point. Is there objection? There was no objection. The remarks are as follows:

Mr. J. I. NOLAN. Mr. Chairman, in speaking on the bill now before the House it is not my intention to enter into an exhaustive analysis of the bill as presented by the Public Lands Committee, as I deem the unanimous vote of that committee and the report on the measure submitted by the Public Lands Committee, along with the report of the Board of Army Engineers appointed by a former President of the United States, fully sustains the position of San Francisco in asking Congress to grant to the city the right to use the Hetch Hetchy Basin

as a storage reservoir.

The conclusions of the committee, its accompanying report, and the report of the Board of Army Engineers are based upon exhaustive hearings covering every phase of this situation.

I want to lay before the Members of the House some facts

in connection with San Francisco's long-continued effort to secure the Hetch Hetchy Basin as a storage reservoir incident to a pure supply of mountain water for the people of San Francisco.

San Francisco has been making an effort for 12 years to secure this grant, involving an expenditure of \$1,750.000 in the purchase of lands, water rights, and conducting investigations; several hundred thousands of dollars of this amount being actually spent in conducting investigations ordered by the Government, and which necessitated the employment of some of the most expert engineers in the United States, this owing to the opposition of the various interests that were desirous of preventing the city from securing this grant, even though the water to be used and the power to be developed would be of great benefit to at least 1,000,000 people in the bay county districts and along the right of way.

An actual and increasing emergency confronts the city of San Francisco and correspondingly affects the neighboring cities about San Francisco Bay. This emergency is a real shortage of water, which absolutely checks the growth of the city and is feared will result in a distressing condition, which will injure the commercial and social interests of that com-

The rainfall for the past three years has been far below the normal, and the city, which is situated in a semiarid location,

Is drawing on its reserve water for the third consecutive year.

The Spring Valley Water Co., a corporation which supplies water to San Francisco, has up to this year been able to meet demands. The company now declares that it can go no further, and it is unsafe to continue under the extreme high draft on its storage.

San Francisco needs this grant to get pure water immediately. The people of that city are suffering greatly in the outlying residential districts from a shortage of water. This applies to domestic use as well, as in a number of sections people are absolutely without fire protection from lack of water. instance of this lack of fire protection occurred within the last month, when nine houses were burned to the ground in what is known as the Poterero district. All of these houses were occupied by workmen and their families. The fire department was unable to make connections with water over half a mile away in time to save any of the property.

A short time ago the Mount St. Joseph Orphan Asylum, con-

taining several hundred children, was destroyed by fire, one child being burned to death. These buildings could have been saved-at least a part of them-if there had been an adequate

amount of water for fire-protection purposes

These are only a few of many instances of this character. Insurance rates in the outlying districts of San Francisco are prohibitive; in some cases the insurance companies decline to take the risk on account of complete lack of fire protection, and when a small home owner loses his property by fire he loses his all.

These people in the outlying districts are unable to get water for domestic use, water carts being used to distribute water for household use in this great metropolitan city, and each week large delegations of home owners are continually waiting upon the board of supervisors of our city asking them to grant some relief. Under present conditions it is impossible for our city government to do anything in their behalf.

In this connection the statement might be made that the acquiring of this grant will not instantly relieve the urgent needs of these people, inasmuch as it will take three to five years to make the first installation of the Hetch Hetchy system. This is true. But I call your attention to this important phase of the situation: The \$45,000,000 bond issue voted upon by the people of San Francisco for the building of this system specifically provided that the money realized from the sale of the bonds was to be used for the purpose of acquiring rights, developing, and completing the Hetch Hetchy source of supply. Therefore it is necessary for the people of San Francisco to secure this Therefore grant before any of the money can be spent for development purposes in San Francisco, such as laying mains in the outlying districts and negotiating with the Spring Valley Water Co., which company now supplies the city with water, the purpose of which negotiations would be to use a part of this bond money in developing certain portions of the Spring Valley properties so that water could be supplied to the people of our city immediately.

The negotiations with this company would be in line with the agreement entered into by the city of San Francisco and the Spring Valley Water Co., whereby four judges of the superior court of the State of California have been agreed upon to determine the value of such parts of the company's property as the city will need for the municipal water supply, suits to that end being filed in the several counties of California recently, both parties to the agreement to abide by the decision of the court, without appeal. This means that the long-standing controversy between the people of San Francisco and the Spring Valley Water Co. over the price to be paid for their property will be amicably adjusted to the satisfaction of all parties; and arrangements can be made, if San Francisco secures this. grant, for the immediate development of certain portions of the company's properties that in a very short time will mean relief to the people of San Francisco, providing plenty of water for domestic use and for fire-protection purposes.

Investigation by the city engineer developed the fact that, in the laying of pipes and mains to immediately relieve the pressing needs of the outlying districts of San Francisco, it will require 400,000 feet of pipe and will cost the sum of \$1,250,000. This is only a small portion of the money to be spent immediately on securing this grant from Congress.

If any portion of this money were to be used for development purposes in San Francisco, or other arrangements made with the company in developing their properties, without first acquiring title to the Hetch Hetchy Basin as a storage reservoir, any taxpayer in San Francisco could immediately go into court and enjoin the city from proceeding with this development work, thereby depriving the city of any immediate relief from this water shortage.

The people to be benefited believe we should acquire this grant immediately, because the storage reservoir at Hetch Hetchy will be used to retain water that will be conserved for the use of human beings, the highest purpose for which water

can be used.

The people of California are almost unanimous in favor of this project.

The California delegation in the House are unanimous in their request that this bill pass as reported to the House by the Public Lands Committee

San Francisco has exhibited a fair spirit in dealing with every interest that had a legitimate claim to any portion of the land or water. This is particularly instanced in the case of the Turlock-Modesto irrigation district, where the demands of the irrigationists have been met satisfactorily, so much so that they are now enthusiastic supporters of this measure.

The city has also met every demand made upon it by the

officials of the United States Government.

Therefore, we feel that we are perfectly justified in asking Congress at this special session to consider this bill as an emergency measure and bring relief to thousands of our citizens who are handicapped by this shortage of water.

Mr. STEENERSON. Mr. Chairman, I ask unanimous con-

sent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Minnesota asks unanthe CHAIRMAN. Is there imous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Chairman, we all recognize the necessity of proceeding with the bill, and I ask now for the reading of the bill

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

ment.

The Clerk read as follows:

Be it enacted, etc., That there is hereby granted to the city and county of San Francisco, a municipal corporation in the State of California, all necessary rights of way along such locations and of such width, not to exceed 250 feet, as in the judgment of the Secretary of the Interior may be required for the purposes of this act, in, over, and through the public lands of the United States in the counties of Tuolumne, Stanislaus, San Joaquin, and Alameda, in the State of California, and in, over, and through the Yosemite National Park and the Stanislaus National Forest, or portions thereof, lying within the said counties, for the purpose of constructing, operating, and maintaining aqueducts, canals, ditches, nipes, plpe lines, flumes, tunnels, and conduits for conveying water for domestic purposes and uses to the city and county of San Francisco, or in accordance with the laws of the State of California in force at the time application is made, may hereafter participate in the beneficial use of the rights and privileges granted by this act; for the purpose of constructing, operating, and maintaining power and electric plants, poles, and lines for generation and sale and distribution of electric energy; also for the purpose of constructing, operating, and maintaining roads, trails, bridges, tramways, railroads, and other means of locomotion, transportation, and communication, such as may be necessary or proper in the construction, maintenance, and operation of the works constructed by the grantee herein; together with such lands in the Hetch Hetchy Valley and Lake Eleanor Basin within the Yosemite National Park, and the Cherry Valley within the Stanislaus National Forest, irrespective of the width or extent of said ands, as may be determined by the Secretary of the Interior may determine to be actually necessary for power houses, and all other structures or buildings necessary for powerly incident to the construction, operation, and telegraph lines, and such means of locomotion

Mr. MANN. Mr. Chairman, I offer the following amendment. The Clerk read as follows:

Page 4, lines 6 and 7, in each case after the word "location;" insert the words "or change of location."

Mr. MANN. Mr. Chairman, the bill provides for the approval of the map of location by the Secretary of the Interior, and then says that he can not approve it so far as the national forests are concerned except it is approved by the Secretary of Agriculture. But at the bottom of page 4, section 2, gentlemen will see that the bill provides as to change of location that it shall be approved by the Secretary of the Interior or the Secretary of Agriculture as his jurisdiction may appear.

If the amendment I offer prevails I shall move to strike out the words "or Secretary of Agriculture as his jurisdiction 12ay appear," so as to require both as to the location and the change

of location an approval by the Secretary of the Interior, and that he shall not approve in the national forests except with the approval of the Secretary of Agriculture.

Mr. FERRIS. Let me understand the gentleman. If the amendment suggested by the gentleman prevails then is it his intention to strike out the whole of the proviso beginning with line 18?

Mr. MANN. Oh, no; only the language commencing with the words "or the," line 25, at the bottom of the page. "Or the Secretary of Agriculture as his jurisdiction may appear." the bill now is it provides that the original location shall be approved by the Secretary of the Interior, but that the change of location may be approved by the Secretary of the Interior or the Secretary of Agriculture.

Mr. FERRIS. I think there can be no objection to the sug-

Mr. MANN. It simply makes the bill conform. Mr. FERRIS. We had intended to reach that point in the proviso beginning line 18, but I think the amendment of the gentleman is even superior to ours.

Mr. MANN. It makes it uniform, that is all.

Mr. MONDELL. Mr. Chairman— Mr. STAFFORD. Mr. Chairman, I rise in opposition to the

amendment

Mr. MONDELL. Mr. Chairman, I rose for another purpose, but as the matter is before the committee I want to say that the amendment suggested by the gentleman from Illinois is clearly a proper one. Under all of our right-of-way statutes the Secretary of the Interior must approve all rights of way that grant a permanent easement, which this does. The statute also provides that where the permanent easement is within a forest reserve the matter shall be referred to the Secretary of Agriculture for his approval; but the Secretary of the Interior, having charge of the maps and the plats of all the public do-main, reserved and unreserved, the law places upon him the duty and responsibility of approving all patents, all claims to title that are permanent in character, and the amendment offered by the gentleman from Illinois is therefore in harmony with the general spirit of the statutes.

The question was taken, and the amendment was agreed to. Mr. STEENERSON. Mr. Chairman, I move to strike out the last word. I want to call attention to the lines on page 2, which authorize the city of San Francisco to maintain roads, trails, bridges, tramways, railroads and other means of locomotion, and so forth. It seems to me that under this grant the city of San Francisco would have the power to sublet the right to operate a railroad or telegraph line or a trolley line to a private corporation for the purpose of exploiting the public, and it does not come within the purview of the act to supply the city with necessary water for domestic uses. It is entirely beyond and extraneous to the purposes, and I would like to have the gentleman in charge of the bill explain why these

things are granted.

Mr. TAYLOR of Colorado. Mr. Chairman, I am not in charge of the bill; but, as I understand, the question was as to why the city is given the right to construct and maintain a telephone and telegraph, railroads, and so forth.

Mr. STEENERSON. Yes.

Mr. TAYLOR of Colorado.' If the gentleman will read further, it says:

Such as may be necessary or proper in the construction, maintenance, and operation of the works constructed by the grantee.

That was found absolutely necessary, and the engineers said it was absolutely necessary in order to make this construction.

Mr. STEENERSON. Could not the city of San Francisco

under this grant sublet the right to run a railroad from San

Francisco to the Hetch Hetchy to a private corporation?

Mr. TAYLOR of Colorado. They are prohibited from that further on. This all reverts to the Government as soon as the plant is built.

Mr. STAFFORD. Where is the clause which says it reverts? I do not recall any such provision in reading the bill.

Mr. TAYLOR of Colorado. I have forgotten the line, but it is over here all right. It all reverts to the Government of the United States. This is only to take care of it during

construction.

Mr. STAFFORD. Can the gentleman from Colorado designate the exact clause limiting this power?

Mr. RAKER. Page 10, line 20, provides for and in considera-

tion of the grant by the United States as provided for in this act the said grantee shall assign, free of cost to the United States,

all roads and trails built under provisions hereof, and so forth.

Mr. STAFFORD. Does the word "roads" cover in this general language the railroad that may be built? I got the idea in reading this bill some weeks ago that the city of San Fran-cisco would have the right to operate a railroad to the reservoirs.

Mr. TAYLOR of Colorado. Clearly not. It is not contemplated or intended. This is solely for the purpose of allowing them to build a temporary railroad to be used in the construction of this work. That is the purpose of it.

Mr. MANN. I would like to know what objection there would be to the city of San Francisco operating a passenger road up to the Hetch Hetchy Valley so that people might get up there?

Mr. OLDFIELD. Mr. Chairman—

Mr. MANN. I might want to visit there sometime, and I do not want to walk.

Mr. STAFFORD. I was curious to find out whether that was one of the grants made to the city of San Francisco or not.

Mr. OLDFIELD. Mr. Chairman, I move to strike out the last two words for the purpose of asking the chairman of the committee a question. I notice in line 14, page 3, the language reads as follows:

Together with the right to take, free of cost, from the public lands, the Yosemite National Park and the Stanislaus National Forest adjacent to its right of way, stone, earth, gravel, sand, tufa, and other materials of like character actually necessary to be used in the construction, operation, and repair of its sald water-power and electric plant, its said telephone and telegraph lines—

And so forth.

I take it that the language there would permit the telegraph and telephone lines and the railroad line to use earth, stone, gravel, and timber?

Mr. FERRIS. Not timber.

Mr. OLDFIELD. Now, as to this word "adjacent," the first word in line 17, I would call the chairman's attention to the fact that that word has been construed by the Federal courts to mean anywhere within 25 miles on either side of the right of way of any railroad. Is it the purpose of the committee to permit them to go 25 miles on either side of the right of way and use stone, gravel, and all those things?

Mr. FERRIS. It is not. I am glad the gentleman has raised that question, because it is important, and one or two Members have spoken about it. It provides under such conditions and regulations as may be fixed by the Secretary of the Interior and

the Secretary of Agriculture.

Mr. OLDFIELD. At the same time, the word "adjacent" having been construed by the courts, they undoubtedly could not limit the distance unless the court would limit it.

Mr. FERRIS. I think they could, because it expressly says, under such conditions and regulations as they may prescribe. I think the gentleman will recognize how difficult it is to say that at one point in the right of way they shall use a right of way 10 feet wide, in another 20 feet wide, and in another 30 feet wide, for the reason that in places they have to cross canyons. It is the roughest country God Almighty ever made, up in the Sierra Nevada Mountains. We have pictures in the committee showing it. It has mountains which are sky high and ravines and gorges which they have to cross. They will have to get material up there and build a \$77,000,000 plant and have a temporary railroad. They have no right to operate a railroad, no right to use stone or tufa or gravel, or anything else, except under the regulations of the department.

I think the gentleman will understand it is difficult in a proposition of this kind to delineate in detail in legislation just what amount they will take. It must be apparent to him and to all of us that they ought to have a right to take from those great mountain quarries there, that never will be used for anything else in a million years, enough stone to build what they want to build. I think that would satisfy the gentleman.

Mr. STAFFORD. Would the gentleman, in that regard, have any objection to an amendment after the words "right of way," in line 17, page 3, carrying out the suggestion of the gentleman from Arkansas [Mr. Oldfield], as follows:

For such distances as in the opinion of the Secretary of the Interior and the Secretary of Agriculture may be deemed necessary.

Mr. FERRIS. Not at all. I know the gentleman does not want to do otherwise than perfect the legislation. If he will notice, in line 22, beginning with the word "under," after the comma, it says:

Under such conditions and regulations as may be fixed by the Secretary of the Interior and the Secretary of Agriculture.

Now, the gentleman will readily understand that the head of each department, Agriculture and the Interior, is included. The Secretary of Agriculture operates and has jurisdiction over the forest reserves, and the Secretary of the Interior has to do with the national parks. That makes a combined board, and they would have to have the combined judgment of the two

before they could take anything.

Mr. STAFFORD. But both of those members of the Cabinet might take this position: There being a full grant of power, as was pointed out by the gentleman from Arkansas [Mr. Old-

FIELD], that the grantee has the right to the use of these materials at any distance adjacent to this right of way, all they can do would be to provide the manner and method in which they could utilize this material or any part of it adjacent to the right of way. I think there is much merit in the position taken by the gentleman from Arkansas [Mr. OLDFIELD]

Mr. FERRIS. We have no pride of opinion in the matter. Mr. STAFFORD. There is a full grant of power here in that language, and the proposed amendment would limit the use of these materials in any part adjacent to the right of way. gentleman from Arkansas [Mr. Oldfield] has pointed out that adjacent means 25 miles. The gentleman in charge refers to the limiting clause, "under such regulations and conditions as may be fixed."

Mr. FERRIS. I will say to the gentleman that they can not move a wheel or turn over a rock or dig a ditch or lay a brick-bat or a stone until they have filed maps and charts showing exactly what they are going to do and obtained the approval of the Secretaries.

Mr. STAFFORD. But these Secretaries might well say, "Here we are following the directions of Congress. They have given power and authority to this grantee to go to this adjacent territory and use this material. There is no limitation here except that these Secretaries may provide the conditions and regulations under which it may be obtained."

Now, if you would insert after the words "right of way" at some other appropriate place in language something like this, "for such distance as the Secretary of the Interior and the Secretary of Agriculture may determine," that would place full discretion in the Secretaries to limit the distance.

Mr. FERRIS. Let me call the attention of the gentleman to this fact, that words of limitation and too many words sometimes serve to broaden in fact the provisions of general terms.

Mr. STAFFORD. But the limitation does not limit the extent of the adjacent district.

Mr. FERRIS. It would not hurt anything if it were put in,

but I do not think it is necessary.

Mr. OLDFIELD. The word "adjacent" has a fixed definition, as defined by the court of appeals. They say they can go 25 miles. That applies to timber. It is true they define the meaning of the word "adjacent" in regard to timber, but it would also apply to stone, because the court of appeals held that it meant that.

Mr. FERRIS. We do not think that is wise, and we do not think it would have that effect. Further along in the bill the gentleman will find that they can not even make a start to begin work until they have filed plats and have the Secretaries' approval.

The CHAIRMAN. The time of the gentleman from Wisconsin

has expired.

Mr. STAFFORD. I did not know, Mr. Chairman, that I had the floor. But I would like to be recognized to offer an amendment if the gentleman from Arkansas [Mr. Oldfield] does not see fit to offer an amendment.

Mr. OLDFIELD. The gentleman suggested an amendment, and I shall not offer one at this time.

Mr. STAFFORD. I rise, Mr. Chairman, for recognition, to offer an amendment such as was suggested a moment ago. I offer the following amendment: After the word "way," in line 17, page 3, insert the following language: "For such distance as the Secretary of the Interior and the Secretary of Agriculture may determine."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, line 17, after the word "way," insert the words "for such distance as the Secretary of the Interior and the Secretary of Agriculture may determine."

Mr. STAFFORD. It should be "within such distance" instead of "for such distance."

Mr. MANN. Mr. Chairman, may I ask the gentleman whether he has in contemplation the language on page 7 in reference to timber, which provides that no timber shall be cut or removed from land outside of the right of way until designated by the Secretary of the Interior or the Secretary of Agriculture, respectively? That covers it, does it?

Mr. TAYLOR of Colorado. Let me suggest that it is not reasonably to be expected that they would haul granite rock or anything of that kind for a great distance when it is right in the canyon there, where they could not get it out except in a balloon. It is right near them, and they can not get the timber there without specific permission.

Mr. STAFFORD. My attention has been called to the limita-tion pointed out by the gentleman from Illinois [Mr. Mann],

there are restrictions that make it absolutely in the discretion of the Secretaries to limit the cutting of timber.

Mr. TAYLOR of Colorado. I may suggest that both Secretaries have gone over this measure exhaustively, and they have had people investigate on the ground the conditions, and have had exhaustive reports from the Army engineers and other kinds of engineers, and we have put hundreds of limitations and restrictions in this bill, so much so that I fear the city of San Francisco may be hampered in its work by the limitations that have been imposed.

Mr. MANN. There can be no possible objection to this amend-

ment.

Mr. TAYLOR of Golorado. We do not object to it. Mr. STAFFORD. I think it will do no harm to have such a limitation here, to show that the Secretaries have that power, to limit the distance to which the grantees may resort for the use of this material.

Mr. RAKER. It will not make any difference, because that is the real purpose of the committee, to cover these very things. If the gentleman could see that country, or even see a map of it, he would recognize the fact that in going in there you must go into a very deep, rough canyon, and when you get in there you have a natural limit to the use of this material.

Mr. STAFFORD. What objection has the gentleman to plac-

ing this limitation in the bill?

Mr. RAKER. None whatever; but it is in here already, just as strong as language can make it. Let me call the gentleman's attention to it:

Together with the right to take-

Mr. STAFFORD. Where is the gentleman reading?

Mr. RAKER. In line 14, page 3:

Together with the right to take, free of cost, from the public lands, the Yosemite National Park, and the Stanislaus National Forest adjacent to its right of way, stone, earth, gravel, sand, tufa, and other materials of like character actually necessary to be used in the construction, operation, and repair of its said water-power and electric plants, its said telephone and telegraph lines, and its said means of locomotion, transportation, or communication, under such conditions and regulations as may be fixed by the Secretary of the Interior and the Secretary of Agriculture, within their respective jurisdictions.

Mr. STAFFORD. I decline to yield further. The gentleman is not advancing anything new. That has been gone over half a dozen times here by the gentleman himself, or the chairman of the committee, or some other member of the committee.

There is some need for this amendment. The gentleman from Colorado tries to ridicule it by endeavoring to create some imaginary case of hauling granite from a distance. But, Mr. Chairman, there may be something else besides granite necessary in this construction. There may be earth, there may be gravel, sand, tufa, and other material at a distance, but of superior quality, that these Secretaries might not see fit to grant them, and therefore I ask for a vote on the amendment.

Mr. RAKER. If the gentleman understood that I had for any reason attempted to ridicule anything he has said, he is mistaken, because I never attempted to do such a thing.

Mr. STAFFORD. I referred to the distinguished gentleman from Colorado [Mr. TAYLOR].

Mr. TAYLOR of Colorado. I did not know I was being

Mr. STAFFORD. I did not mean to cast any reflections on the distinguished gentleman from California [Mr. RAKER], who is so deeply interested in this bill.

Mr. RAKER. It is not a question of keeping the bill in its present form. That is not the purpose of it at all. But the committee did try to go over the bill and strike out superfluous words wherever they occurred. I believe what the gentleman is contending for is here already; but if the gentleman thinks it will afford additional protection we have no objection.

Mr. MANN. The language of the bill provides that the taking of these things shall be under conditions and regulations fixed by one of the proper Secretaries. What objection is there also to letting him say from where they shall be taken?
Mr. RAKER. There is no objection at all.

Mr. MANN. Fixing conditions and regulations would not fix the location. I do not think it is important, but I am sure the gentleman has no objection to it.

Mr. RAKER. No.

Mr. MONDELL. I do not know whether the gentleman from California [Mr. Raker] has ever engaged in construction in a mountainous country or not.

Mr. RAKER. I have seen some of it.

Mr. MONDELL. If this amendment is adopted, it will place this construction work in this position, that they can not take tion pointed out by the gentleman from Illinois [Mr. Mann], a spadeful of earth, or a cubic foot of rock, or a bunch of which shows that, so far as the removal of timber is concerned, tufa from the land adjacent to this right of way for any purpose whatever without referring the matter to the Secretary of Agriculture or the Secretary of the Interior. It will be necessary for these officials to say just where all the material shall come from. An earth pocket near by, necessary to make an embankment, can not be utilized until the honorable Secretary has been called upon and asked as to whether in his opinion it may properly be used. A small amount of rock 50 feet from the right of way can not be utilized until the honorable Secretary has been consulted with regard to it. Any man who has ever had anything to do with construction in a mountain canyon knows that this amendment will make the city of San Francisco a great deal of trouble, a great deal of difficulty in the construction of this work, and it will do absolutely no good at all.

Mr. FERRIS. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman from Wisconsin if he does not think section 2, page 4, offers sufficient safeguards. I have no objection to the gentleman's amendment, but I do not want to do the same thing over twice. The language I refer to is

SEC. 2. That within three years after the passage of this act said grantee shall file with the registers of the United States land offices, in the districts where said rights of way or lands are located, a map or maps showing the boundaries, locations, and extent of said proposed rights of way and lands required for the purposes stated in section 1 of this act; but no permanent construction work shall be commenced on said land until such map or maps shall have been filed as herein provided and approved by the Secretary of the Interior.

Now, the question I want to ask the gentleman is, Does not the gentleman think, when they come in with their maps showing what they want to do, the width they want to occupy, 50 feet here on account of the canyon and 100 feet there, that the Secretary of the Interior would scrutinize every line?

Mr. STAFFORD. I will be very frank with the gentleman. When I read the bill three or four weeks ago I scanned the phraseology pointed out by the gentleman, and I understood that the only interpretation to be given that just read was that the maps referred exclusively to the right of way; that the lan-guage does not cover and does not purpose to cover sand pits or places where they could get material which is covered in section 1 of this act. Responding, in the gentleman's time, to the highly fanciful conception of the gentleman who has had so much to do with construction work, the distinguished gentleman from Wyoming, so learned in all matters, I want to say that the an indment proposed can bear no such interpretation as he gives it, because it says such distance as the Secretary may determine. It is only in the fanciful conception of the gentleman from Wyoming that any such interpretation could be placed.

Mr. FERRIS. Mr. Chairman, I think, after conversation with members of the committee about me, that if the gentleman

from Wisconsin still thinks these words are important and ought to go in, we have no objection.

Mr. STAFFORD. I certainly think so.
The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was agreed to.

Mr. MONDELL. Mr. Chairman, I offer a substitute for the section and the remainder of the bill, and if the substitute is adopted I will move to strike out the remaining sections of the

Mr. FERRIS. Mr. Chairman, I do not think that is in order at this time. We have not finished the reading of the bill. Mr. MANN. It is proper always after the first section of a

bill is read to offer a substitute for the bill, giving notice that you will move to strike out the other sections. There is no other way of offering a substitute.

Mr. FERRIS. But the gentleman is offering a substitute for the entire bill, and we have not read the bill yet.

Mr. MANN. There is no other place he can offer it.
Mr. FERRIS. I withdraw the point of order.
The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

The Clerk read as follows:

A bill (H. R. 7297) granting a right of way over certain public lands and reservations to the city and county of San Francisco for the purposes of a water supply and power development.

Be it enacted, etc., That a right of way through the public lands of the United States, the Yosemite National Park, and the Stanislaus National Forest is hereby granted to the city and county of San Francisco, a municipal corporation in the State of California, for the purpose of enabling the said city and county to construct and maintain reservoirs, canals, works, and structures of every kind and character necessary or desirable in securing, establishing, and maintaining from the Tuolumne River and its tributaries in said State a water supply for the said grantee, the city and county of San Francisco, and such other municipalities and water districts as may, with the consent of the said grantee, or in accordance with the laws of the State of California, hereafter participate therein, and for the generation, transmission, and distribution of power which may be generated by the utilization of such water supply, to the extent of the ground occupied by the reservoirs, canals, and all other works or structures of every kind and character necessary or desirable for the purposes specified in this act, together with such

additional lands on the marginal limits of all reservoirs and canals or strongling or bordering on other works or structures as in the opinion of this act, but in no case exceeding 250 feet on the margin of or surrounding or bordering on such reservoirs, canals, works, or structures, the surrounding or bordering on such reservoirs, canals, works, or structures, the property of the control of the surrounding or bordering on such reservoirs, canals, works, or structures, but in the surrounding or bordering on such reservoirs, canals, works, or structures, but in the surrounding or bordering on such reservoirs, canals, works, or structures, the property of the control of the surrounding of t

mining, or other existing valid claims as it may require for the purposes herein above set forth, and caused proper evidence of such fact to be filed with the Commissioner of the General Land Office; and the right of such entrymen or claimants to sell, and of said grantee to purchase such portion or portions of such claims, are hereby granted: Provided, That this act shall not apply to any lands embraced in rights of way heretofore approved under any act of Congress for the benefit of any parties other than said grantee or its predecessors in interest.

Mr. MONDELL. Mr. Chairman, as this is a substitute for the entire bill. I should like to have more than the ordinary 5 minutes to discuss it. I would appreciate it very much if I can have 15 minutes for a discussion of this subject.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for 15 minutes. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, there is nothing in the substitute that is not in the original bill in some form. are a number of matters treated of in the original bill that are not referred to in the substitute. My thought in drawing the substitute was to make the grant clear and concise and readily understandable, and to follow it with certain terms and conditions clearly stated, and all of them beyond question or controversy enforceable. There has only been one objection offered to the substitute that has or should have, in my opinion, any force at all from the standpoint of the people of California-that is, that it made no provision as originally drawn and introduced for the settlement of the conflicting claims of the Turlock and Modesto irrigation district and other irrigationists in the San Joaquin Valley and of the city and county of San Francisco. I made no provision of that kind in the bill, because, while we have been granting rights of way under general laws and special bills for the last 50 years, it has never heretofore been considered necessary, wise, or proper to at-tempt, in providing for rights of way, to adjudicate the judicial question as to the respective rights of claimants in the waters that might be impounded or diverted.

Gentlemen all understand that as a matter of fact no words we can write into a statute can divide these waters, and that, so far as the provision intended to effect a division between the irrigationists and the city are concerned, if they shall have any binding force or effect, it can only be by reason of a con-tract which the bill contemplates shall be entered into between the city of San Francisco and the Secretary of the Interior whereby the city of San Francisco binds itself to recognize certain rights, or alleged rights, of the irrigation districts and to furnish the irrigation districts certain waters in excess of what is claimed to be the legal right of the irrigation districts, and to furnish the irrigation districts at cost power for the purpose of pumping water for irrigation. If the contract which the act contemplates was held by the courts to be binding and valid, then this legislation by that process and through that procedure will have effected a division of the waters of the Tuolumne between and among the various claimants. If it can be done at all by an act of Congress, it can only be done in I shall not further argue at this time the inadvisability of attempting to do that, but I say what I have said in order to explain why I did not make any provision with regard to a distribution of the water in the original bill. In order, however, that those who believe in having the grant and its conditions clear and explicit should have no excuse for voting against the substitute on the ground that it does not attempt to provide for an adjudication of the water rights, I have inserted an additional clause or condition to the effect that within three years, and in any event before any of the maps of rights of way are approved, there shall be filed with the Secretary of the Interior an agreement or adjudication binding on all parties in interest relative to their respective rights in these waters. That is what ought to have been done long ago. That is what the committee said to the officials of San Francisco when they were before us four years ago, and I have no question but what that could have been done if those gentlemen had been willing to get down to the plain hard work of securing such an agreement or adjudication rather than coming before Congress asking its committees to legislate in matters entirely beyond its jurisdiction.

Mr. KENT. Will the gentleman yield?

Mr. MONDELL. Certaily.

Mr. KENT. I would like to know whether this adjudication would bring in the possibility of claims of right not filed prior to the right obtained by the city of San Francisco and the Turlock-Modesto district? That is the thing we are afraid We do not want to let a lot of other claims come in here and stop this matter by a process of litigation. We want everybody recognized that is now recognized under the California law, but we do not want the whole business stopped by an in-

terminable litigation of people whose claims we do not now

Mr. MONDELL. No Californian should have asked me that question, because, of course, any adjudication would be made under the laws of the great and glorious State of California so ably represented in part by the gentleman who has just interrogated me, and therefore no one could secure any rights under that adjudication who was not entitled to those rights and confirmed in those rights under the laws of California, and it is

for the purpose of upholding California's sovereignty, for the purpose of giving California laws and California courts an opportunity to adjudicate that I propose that before this grant becomes effective there shall have been brought about in an orderly way, in a legal way under the laws of your State, an agreement, an adjudication as to the respective rights of your

citizens in these waters.

Mr. KENT. There seems to me to be a large difference between litigation and rights.

Mr. MONDELL. The gentleman knows my time is very brief, and that he will have time in which to discuss that difference later.

Now, Mr. Chairman, I explained yesterday that the bill before us is very verbose, consisting of 26 pages, conflicting and difficult to understand; that there are conditions running all through its many sections and that at best it is not a piece of legislation which clearly and concisely sets forth its purposes. In addition to that, it has those provisions running through a number of pages which I object to relative to respective rights of claimants to water. I do not think that the legislation before us is fair to San Francisco. It is not fair to San Francisco first with regard to the matter of sanitary regulation.

I said yesterday the sanitary regulations in the bill are ridiculous. I shall say nothing more now in regard to them, because the members of the committee will reach those regulations in a few moments and they will agree with me that they are not only ridiculous but inadequate and intended to be like the laws of the Medes and Persians, unamendable, for we solemnly provide that San Francisco shall not in the future ask, and we shall not in the future grant, any modification whatever of these lovely provisions with regard to sanitation. In that regard my bill simply provides that the officers having charge of these areas shall enforce such proper sanitary rules and regulations as will preserve to a reasonable extent the purity of the water; that those regulations shall not, however, be such as interfere with the reasonable use of this territory by the general public.

Both bills provide that the city shall pay for the enforcement of those regulations. The bill before us provides that the city of San Francisco shall pay a lump sum of \$15,000, \$20,000, and finally \$30,000 per annum for the grant. Now, that may be too much or it may be too little. It depends on how you look at it. But it has no logical basis. The committee has not enlightened us as to the process of reasoning whereby they arrive at the conclusion that this is exactly the sum San Francisco should pay, no more, no less. The committee has not enlightened us as to its estimate of the value of the grant or if the charge is based, not on the value to San Francisco, but on the loss to the general public, then as to the amount of that loss. In the opinion of the committee that must be great if it is measured by the sum of \$30,000 per annum.

My bill provides that the city shall pay for all the timber taken from its right of way; that it shall build certain roads, as the other bill provides, and that it shall forever maintain them; that it shall pay for the maintenance of reasonable sanitary regulations, and that in addition it shall pay such proportion of the cost of guarding and policing its watershed as shall measure its benefits from such policing and guardianship.

Now, in my opinion, that is a fair charge upon San Francisco. San Francisco could not reasonably ask to receive this grant unless she paid whatever expenses the grant might entail upon the Public Treasury. She ought not to be asked to pay in the years to come any sum whatever on the theory that in some way or other we are granting her something of value which she should pay for. If that be the theory of the committee, then we should fix the value, decide what it is, and have San Francisco pay us for it out of the \$46,000,000 that she has or is about to raise from the sale of bonds. Have the thing settled and the transaction complete. We are simply giving her the right to use as a storage reservoir that which is now quite an inaccessible though a quite beautiful valley. There is no loss to the Nation and no grant of value for which San Francisco should forever pay an arbitrary sum.

The CHAIRMAN. The time of the gentleman from Wyoming

[Mr. Mondell] has expired.

Mr. FERRIS. I want to be entirely fair with the gentleman. I know that he has more wisdom on land matters than all the rest of us put together. He may have a good bill, but it never has been presented here; it does not bear the approval of any departmental officers; no member of the committee has ever seen it unless he has seen it to-day as it is brought in here; and without speaking in disrespect of the gentleman or his bill, I hope no one but the author, who of course is bound to vote for it, will vote for the substitute.

Mr. Chairman, I ask for a vote. The CHAIRMAN. The question is on the substitute offered by the gentleman from Wyoming [Mr. MONDELL].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MONDELL. Division, Mr. Chairman.

The committee divided; and there were—ayes 6, noes 45.

So the amendment was rejected.

Mr. KINKEAD of New Jersey. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from New Jersey [Mr. Kinkead] moves to strike out the last two words.

Mr. KINKEAD of New Jersey. Mr. Chairman, I believe that the bill which has been presented by the committee is eminently fair, and it is my purpose to give to it my support.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman yield?
Mr. KINKEAD of New Jersey. I regret I can not yield at
the present time. The gentleman knows that my time is brief. Mr. MONDELL. The gentleman has read the bill that he has

so highly commended, has he not? Mr. KINKEAD of New Jersey. The gentleman from Wyoming knows that I have read the bill, because I have gone over it with him so many times that I begin to know it by heart.

[Laughter.] Mr. Chairman, I hope now that the few minutes that are allotted to me will be left to me in peace, because I want to say something that is of great importance to me and to the people of my district, and to the country. A few weeks ago the great Committee on Naval Affairs, on a visit to the navy yards of the Atlantic coast, did me and the people of my district a signal honor. They came to view for the first time a proposed naval base on the Jersey side of New York Bay.

That the gentlemen were well received in my district I need not say. Some of them are here, and at a more appropriate time I expect that they will speak for themselves as to the hospitality of the eighth district of New Jersey. That they realize that this was an ideal position for a naval base I need say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than that it is in the say no more than the say no more than the say of the say no more than the say of t say no more than that it is in my judgment one of the most in-

telligent of the many committees in this House. [Applause.]
Mr. Chairman, I believe that any base that is chosen by the Committee on Naval Affairs should have these three distinctive marks: First, that it should be adequate; second, that it should be economical; and, third, that it should be accessible. I propose to show in the few moments that have been allotted to me that the Brooklyn Navy Yard, as it is at present constructed, is inadequate, that it is uneconomical, and that it is inaccessible; and after having proved these three points I shall then demonstrate to this committee that the proposed base that is located in the district that I have the honor to represent is adequate, economical, and accessible.

First. The commandants of the Brooklyn Navy Yard have repeatedly requested that additional land be purchased in order that the yard might be enlarged, so that it might be suitable for the requirements of our increased Navy.

Second. It is uneconomical, because the supplies coming to the yard from the West and South—the steel from Pittsburgh, the lumber from Mississippi or the Carolinas, the paints from Michigan-all must be shipped from the mainland across the Hudson River in boats, and the handling and rehandling adds greatly to the cost of these supplies. While on our trip through the Brooklyn yard one of the officers stated to me that, as a result of the location of the yard, the pine which was used in ship construction was as costly as mahogany on account of the number of times it must be handled.

Third. It is inaccessible. On a stormy night or in fog it is almost impossible for a warship to reach the Brooklyn yard, and when it is clear but two of our vessels can dock there in

I would like every Member of Congress to read Capt. Van Duzer's report regarding the availability of the site which by chance is situated in my district. I need hardly say to my colleagues in this House that were the proposed site located in Maine or in Florida, and I were as familiar with its advantages, I would as strongly urge its purchase. This is not a question of congressional districts; this supersedes State lines. It is really

of national importance, and I want to see the Government purchase that site, which will be of greatest strategic and com-mercial value to the Nation.

We have miles of water front along the Jersey shore which can be purchased for a reasonable figure; therefore the site in question can be made large enough to suit our present and future needs.

It is the most economical location along the Atlantic seaboard, since in our county we have the eastern terminal of We can, therefore, lay down the every trunk line save one. paint required in the paint shop, the steel and lumber in that section of the yard where they are required, and by spurs and trackage the handling of supplies can be made simple and economical.

The Jersey site is accessible, since we are within 300 feet of the 50-foot channel of the Hudson River, and with the plan proposed by Capt. Van Duzer in effect the yard could take care of our entire Navy, and every ship carrying the Stars and Stripes could dock there within 24 hours.

Mr. Chairman, may I now call attention to the report in question? And permit me to add that Capt. L. S. Van Duzer, its author, is regarded as one of the most progressive and brainy men in the service.

Here is what he says regarding the site that I favor:

GENERAL CONSIDERATION OF NAVY-YARD DESIGN, LOCATION, CAPACITY, AND MAINTENANCE, WITH PLAN AND DESCRIPTION OF A LARGE, EFFICIENT YARD PROPERLY LOCATED.

# (By Capt. L. S. Van Duzer, United States Navy.)

(By Capt. L. S. Van Duzer, United States Navy.)

1. During somewhat more than three years continuous service as commandant of Olongapo and captain of the yard at New York the features of an ideal navy yard have been a matter of much thought and careful consideration. The following remarks are presented at this time in view of the reported plans for the removal of the New York Yard to some other site, one suggestion being Narragansett Bay. The writer has suggested in a letter to the department a site below Cummunipaw, which he believes, considering all modern requirements, to be the best navy-yard site in the world.

2. The present site of the New York Yard is not only unsuitable as regards capacity, economy, and accessibility, but it is incapable of satisfactory improvement at any cost. The shape of the water front precludes the possibility of suitably berthing more than a dozen battleships at any time. Occasionally, when the weather is foggy, no large vessels can be brought to the yard for several days, because the range, which must be seen in order to clear Diamond Reef, is obscured by the fog. As this range is not lighted, and can not well be, large vessels can not be brought to the yard after dark. Even in clear weather not more than two deep-draft vessels can safely come to or leave the yard in 24 hours. Improved conditions would extend this to not more than four. This situation is partly due to the short time of slack water in East River, partly to the lack of depth of water abreast Governors Island and the difficulty of increasing it, but most of all to the strong tidal currents and the difficulty of berthing at the yard during the strength of the tide. The depth of water can be increased at great expense, but the other elements of the problem can not be much changed.

3. The present arrangements at the yard—the layout of the docks, plers, wharves, shops, storehouses, power plant, streets, and equipment—is wasteful of both time and money. The cars of all railway shipments must be brought to the yard on f

the vicinity, etc.

5. Even a moderate study of the demands of the fleet point to certain definite conclusions.

(a) That the greatest navy yard in the country should be located as close as practicable to the greatest center of supply and transportation, therefore at New York.

(b) That it should be so placed as to be as near as possible to all the great railroads on one side and to deep water on the other. One available location only fulfills these requirements, the Jersey shore below Cummunipaw.

(c) That this great yard should have great capacity, sufficient to berth and repair the whole battleship fleet with all its adjuncts and its auxiliaries.

auxillaries.

(d) Since there is likely to be 20 years of peace to 1 of war, if we may judge the future by the past, economy of peace operation should receive due consideration as well as capacity and efficiency in time of war; for in time of peace we prepare for war, and the less money we waste in inefficiency the more we shall have for effective use.

6. In order to test the correctness of the foregoing conclusions it is necessary to investigate the requirements and desirable features of a yard of the highest class. These may be divided into:

I. Suitability of location.

II. Capacity.

II. Capacity.
III. Cost of construction, maintenance, and operation.

# T

# SUITABILITY OF LOCATION.

- This comprehends:

  (1) Strategical position as regards the probable operations and requirements of the fleet.

  (2) Strategical position as regards defense.

  (3) Accessibility under all conditions of tide, wind, and temperatures. This involves:

  (a) Depth of water and safety of approach.

  (b) Proximity to main channels and ease of approach.

  (4) Accessibility and proximity to the great highways of transportation.

  (5) Proximity to a great center of supply of materials.

  (6) Proximity to a great center of supply of labor.

  (7) Proximity to a very large city where liberty can be given to a large number of men while the ships are under repair at the yard.

### II. CAPACITY.

8. This includes:
(8) Capacity to keep the fleet in repair in time of war.
(9) Capacity to keep the fleet in repair in time of peace.
(10) Capacity to keep the fleet supplied in time of war.
(11) Capacity to keep the fleet supplied in time of war.
(12) Capacity to build ships of the largest size.
(13) Capacity to quickly repair ships under all conditions of injury and draft.
(14) Capacity to berth, repair, and supply at one time a very large number of ships of the largest size.

### TIT. COST OF CONSTRUCTION, MAINTENANCE, AND OPERATION.

OST OF CONSTRUCTION, MAINTENANCE, AND OPERATION.

9. This includes:
(15) Cost of yard and plant.
(16) Cost of maintenance.
(17) Cost of operation, which involves:
(a) Efficiency of operation as regards speed of doing work under varying conditions of weather and volume of work.
(b) Efficiency of operation as regards cost of varying conditions of weather and volume of work.

### SUITABILITY OF LOCATION.

SUITABILITY OF LOCATION.

10. Taking the various requirements in succession, we find with respect to (1) that the position of New York is superior to all ports on the coast as regards depth of water and ordinary ease of exit and entrance with the single exception of Narragansett Bay. It is the only port on our whole coast which has two entrances separated by a hundred miles. It is nearly in the industrial center of the coast. It is somewhat farther from Europe than Narrangsett Bay, but the difference is so small as to be immaterial, while it is a little nearer to the Panama Canal.

11. As regards (2), it is easy of defense against see attack as com-

difference is so small as to be immaterial, while it is a little nearer to the Panama Canal.

11. As regards (2), it is easy of defense against sea attack as compared with Narragansett Bay, and, furthermore, New York is always likely to be incomparably the best defended port on the coast, its great interests and the character of its entrance both contributing to this end. A navy yard located at the place indicated in the accompanying drawing is a mile or two farther away from possible sea attack than the present yard. And it is far more secure against a landing force than any location on Long Island, or almost any other practicable location in New York Harbor or elsewhere. As against a naval raid, its security is practically absolute, while any conceivable location in Narragansett Bay is peculiarly open to this form of attack.

12. As regards (3), the accessibility under all conditions of tide, wind, and temperature, the low-water depth in the entrance channels of New York have for 50 years been maintained at 10 feet greater than the deep-load draft of the heaviest battleships. This condition, based upon the draft of heavy freight vessels, is practically certain to be maintained. This margin of depth—to which tidal rise adds 4 to 5 feet—is sufficient to take care of any probable draft of a battleship due to injury. The depth at all points from the entrance channels to far above the suggested location of the yard is considerably greater than in the channels. The only dredging necessary would be in and near the yard wharves and plers. The suggested location of the yard and the arrangement of piers is such as to render access particularly easy.

The currents in this locality are very much less than above or below,

than in the channels. The only dredging necessary would be in and near the yard wharves and piers. The suggested location of the yard and the arrangement of piers is such as to render access particularly casy.

The currents in this locality are very much less than above or below, owing to the width of the bay in this vinicity and to the configuration of the shore. This part of the harbor is also quite free of drifting tee which gives much trouble in both the East and North Rivers. In fogsy weather New York Harbor is much casier and safer to enter than Narragansett Bay. The slowly shouling water gives to a careful navigator definite and ample grounding on and and and striking rocks. Moreover, New York fogs are less frequent and generally less dense and of shorter duration than those and and and not striking rocks. Moreover, New York fogs are less frequent a generally less dense and of shorter duration than those and and and that the same and of shorter duration than those and in the same and of shorter duration than those and in the form of the same and of shorter duration than those a long and rather tortuous passage between rocky shoats and includes a long and rather tortuous passage between rocky shoats and includes a long and rather tortuous passage between rocky shoats and includes a long and rather tortuous passage between rocky shoats and includes a long and rather tortuous passage between rocky shoats and includes a long and rather tortuous passage between rocky shoats and includes a variety of the country. While the water through the same and the state of the country while the water front would be accessible to every form of vessel or barge and only shortly distant only one case of the same and that rathay's steamers. Such a condition of affairs would be well-nigh intolerable aside from the accessible to every form of vessel or barge and only shortly distant of the white state of supply of materials that exists on the west of the same and the same and the same and the provision of the same and the provi

ment is wasteful of the time of both officers and men, and cuts down the time available for drill and training, and extends the intervals of inefficiency. No other place compares with New York for the purpose of liberty-giving, and a navy yard should exist there large enough to berth the whole fleet. An attempt to keep battleships at anchor in the North River and similar places in winter invariably results in the drowning of members of crews and loss of steam launches and other books.

# CAPACITY.

17. It seems perfectly clear that one navy yard should, if possible, be large enough to repair the whole organized fleet in time of war. The separation of the fleet into three or four parts for any reason whatsoever is strategically wrong. No vessels should be separated from the main body of the fleet except such as are so badly injured that they will be out of service for many weeks or months. True strategy points to the establishment of the largest kind of yard in the best possible location with the best possible defenses. Small yards are only excusable as distant bases.

18. The great central yard should be large enough to keep the whole active fleet in repairs during peace as well as war. A large establishment is much more efficient and economical than several small ones. If the smaller yards serve no useful purpose in war, they are equally inefficient in times of peace and should no longer be maintained.

19. As regards (10) and (11), the capacity for supplies in times of peace and war, it is perfectly apparent that if we put a navy yard in a place like Narragansett Bay we must run the risk of failing to provide supplies at critical moments or have enormous storehouses in the navy yard. In the latter case the losses from deterioration of stores will be very considerable. A navy yard located in New York Harbor need have comparatively small storage capacity, for the warehouses and storehouses of the whole city are so close as to render them an annex to the yard.

20. The capacity to build ships of the largest size is a necessary feature of a great navy yard and is not a very expensive addition to a great repair plant, unless the considerable area of ground necessary is costly owing to high value of land.

21. The capacity to berth, repair, and supply the whole fleet at one time and to repair the largest ships rapidly under all conditions of injury and draft implies large and well-equipped shops, ample wharfage capacity, and numerous large dry docks. It also implies very deep water in the approach to the dry

### TIT.

reac depth over the silf; and the storage, transportation, and similar facilities should correspond to the other equipment.

COST OF CONSTRUCTION, MAINTENANCE, AND OPERATION.

22. The cost of the yard and plant should be as low as consistent with economy and the achievement of the end in view—the care and upkeep of the fleet.

23. The design of the yard should be such that its maintenance should cost as little as practicable. The power plant should be located in a favorable position as regards fuel and water supply and be fitted with equipment of the best types, so that the power charges should be as low as practicable, while the character of the buildings and transportation facilities should render upkeep and transportation charges equally low a well-designed, well-equipped, and well-located yard, the efficiency of operation, as regards both cost and speed, depends upon suirable organization and methods of carrying on work.

25. The accompanying sketch shows only the main features of the design. Some details can not be shown except on a larger scale, and they are so numerous that many of them would require additional study. The general characteristics shown are planned to meet the requirements enumerated in the foregoing pages and are independent of the exact design of details.

26, Location: If will be noted that the proposed yard is placed where its luner end abuts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways was the time to a buts lands contiguous to all the great railways have the time to the great part of a but and the great part of the great part of the

buildings are connected by covered bridges and at the east and west ends a curved structure supports and covers a track connecting the north row of storehouses with the south row. This gives a continuous track. On this track it is intended to run trolley trains (always in one direction) for distributing stores and transportation of people, particularly of foremen and leading men who are inspecting stores desired for use, and of men sent to the storehouse for certain articles urgently needed. It will be noted that this continuous railway track (with two full-length sidings in each biulding) will reduce enormously the cost of handling, the time of delivery, and the convenience of examination. When desirable to do so, railway cars would be hoisted on the elevators in the receiving store of lumber store and run to the place where their contents would be stored. Stores for the inner rows of shops are low-ered through small elevators directly to the spot desired. Stores for the outer shops are lowered on cars which can be brought alongside or inside the outer shops.

32. The buildings of the central row are only 60 feet wide. On the ground floor there are miscellaneous storerooms, the electrical school, yard restaurant, etc. On the second floor are all the yard offices in the approximate center, and other offices grouped about these. The drafting rooms and certain office storerooms are on the third floor. The office buildings, as the central row may be styled, are the only ones which are three story, and so far as can be foreseen only part of them need be of that height.

33. Miscellaneous buildings: The provision and clothing storehouse is located outside of the shops area and is for the supply of shins and

that height.

33. Miscellaneous buildings: The provision and clothing storehouse is located outside of the shop area and is for the supply of ships and not of shops. The clothing factory is near it. The paint and oil storehouse is placed at some distance from the other stores on account of the inflammable character of the stores. The paint factory is equally isolated. The barracks and quarters for officers are not shown. They are easily arranged.

34. The power house is placed close to the water front, so that fuel can be delivered directly into the bunkers of the boller plant, while ashes can be ejected into the dump scows. It is planned to use oil, but the placing of the power house is such as to render the use of coal as economical as possible if such use should ever become necessary. The cost of power with oil fuel ought to be less than 0.4 cents per kilowath hour, this cost to include all expense except plant and to cover repairs and maintenance of plant and distributing systems.

35. The estimates of cost of the yard are as follows:

#### BUILDINGS.

Outer row of shops, 1 story, 4,400 by 120 feet=528,000 square feet, at \$3.50.  Inner row of shops, 2 story, 5,600 by 80 feet=448,000 square feet, at \$5.  Office buildings, etc., 2 and 3 stories, 2,000 by 60 feet=120.000 square feet, at \$6.  Miscellaneous buildings.  Total.	\$1, 848, 000 2, 240, 000 720, 000 890, 000 5, 698, 000

Total	26 521 000

Mr. Chairman, at another time I will ask the House to adopt this plan.

### MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. Underwood having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Pratt, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 767. An act granting permission to the city of Marshleld,

Oreg., to close Mill Slough, in said city.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the joint resolution (S. J. Res. 52) to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military Academy.

### SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 767. An act granting permission to the city of Marshfield, Oreg., to close Mill Slough, in said city; to the Committee on Interstate and Foreign Commerce.

### HETCH HETCHY.

The committee resumed its session. The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Sec. 2. That within three years after the passage of this act said grantee shall file with the registers of the United States land offices, in the districts where said rights of way or lands are located, a map or maps showing the boundaries, locations, and extent of said proposed rights of way and lands required for the purposes stated in section 1 of this act; but no permanent construction work shall be commenced on said land until such map or maps shall have been filed as herein provided and approved by the Secretary of the Interior: Provided, however, That any changes of location of any of said rights of way or lands may be made by said grantee before the final completion of any of said work permitted in section 1 hereof, by filing such additional map or maps as may be necessary to show such changes of location, said additional map or maps to be filed in the same manner as the original map or maps but no change of location shall become valid until approved by the Secretary of the Interior or the Secretary of Agriculture, as his jurisdiction may appear; and the approval by the Secretary of the Interior or lands shall operate as an abandonment by the city and county of San Francisco to the extent of such change or changes of any of the rights of way or lands indicated on the original maps: And provided further, That any rights inuring to the grantee under this act shall, on the approval of the map or maps referred to herein by the Secretary of the Interior, relate back to the date of the filing of said map or maps with the register of the United States Land Office as provided herein, or to the date of the filing of such maps as they may be copies of as provided for herein: And provided further. That with reference to any map or maps heretofore filed by said city and county of San Francisco or its grantor with any officer of the Department of Agriculture, and approved by said department, the provisions hereof will be considered complied with by the

Mr. MANN. Mr. Chairman, I move to strike out, commencing on line 25, page 4, the words "or the," and in line 1, page 5, the words "Secretary of Agriculture, as his jurisdiction may appear." That is to conform with the amendment already agreed upon.

Mr. RAKER. That is all right. Let us have a vote, Mr. Chairman

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

Amend by striking out in line 25, page 4, the words "or the," and in line 1, page 5, the words "Secretary of Agriculture, as his jurisdiction may appear."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.
The Clerk read as follows:

The Clerk read as follows:

SEC. 4. That the said grantee shall conform to all regulations adopted and prescribed by the Secretary of the Interior governing the Yosemite National Park and by the Secretary of Agriculture governing the Stanislaus National Forest, and shall not take, cut, or destroy any timber within the Yosemite National Park or the Stanislaus National Forest, except such as may be actually necessary in order to construct, repair, and operate its said reservoirs, dams, power plants, water-power and electric works, and other structures above mentioned, or is actually necessary in the construction, repair, and operation thereof, but no timber shall be cut or removed from lands outside of the right of way until designated by the Secretary of the Interior or the Secretary of Agriculture, respectively; and it shall pay to the United States the full value of all timber and wood cut, injured, or destroyed on or adjacent to any of the rights of way and lands, as required by the Secretary of the Interior or the Secretary of the Interi

as may be prescribed in writing by the Secretary of Agriculture, and elsewhere on public lands along the line of said works, and within the Yosemite National Park, and such as may be prescribed in writing by the Secretary of the Interior; and said grantee shall, as said waterworks are completed, if directed in writing by the Secretary of the Interior or the Secretary of Agriculture, construct and maintain along each side of said right of way a lawful fence of such character as may be prescribed by the proper Secretary, with such suitable lanes or crossiags as the aforesaid officers shall prescribe: And provided further, That the said grantee shall clear its rights of way within the Yosemite National Park and the Stanislaus National Forest and over any public land of any débris or inflammable material as directed by the Secretary of the Interior and the Secretary of Agriculture, respectively; and said grantee shall permit any road or trail which it may construct over the public lands, the Yosemite National Park, or the Stanislaus National Forest to be freely used by the officers of the Government and by the public, and shall permit officers of the Government, for official business only, the free use of any telephone or telegraph lines, or equipment, or railroads that it may construct and maintain within the Yosemite National Park and the Stanislaus National Forest, or on the public lands, together with the right to connect with any such telephone or telegraph lines private telephone wires for the exclusive use of said Government officers: And provided further, That all reservoirs, dams, conduits, power plants, water-power and electric works, bridges, fences, and other structures not of a temporary character shall be sightly and of suitable exterior design and finish so as to harmonize with the surrounding landscape and its use as a park; and for this purpose all plans and designs shall be submitted for approval to the Secretary of the Interior.

Mr. MANN. Mr. Chairman, on page 7, line 23, after the word

Mr. MANN. Mr. Chairman, on page 7, line 23, after the word "park," I move to strike out the comma and the words "and such."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 7, line 23, amend by striking out the comma after "park" and the words "and such."

Mr. MANN. They are clearly in there by inadvertence. In that connection, Mr. Chairman, may I ask the gentleman this question? On the top of page 7 is the language, "except such as may be actually necessary in order to construct, repair, and operate its said reservoirs," and so forth, and "or is actually necessary in the construction, repair, and operation thereof." Is there any distinction between what "may be actually necessary in order to construct, repair, and operate" and "what is actually necessary in the construction, repair, or operation thereof"?

Mr. FERRIS. I think the gentleman is right about it. Has he his amendment prepared?

Mr. MANN. Let us have a vote on the first amendment.

Mr. RAKER. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. Mann].

The amendment was agreed to.

Mr. MANN. On page 7, in lines 4 and 5, I move to strike out the words "or is actually necessary in the construction, repair, and operation thereof."

The CHAIRMAN. The Clerk will report the amendment

offered by the gentleman from Illinois. The Clerk read as follows:

' Amend, page 7, lines 4 and 5, by striking out the words "or is actually necessary in the construction, repair, and operation thereof."

The amendment was agreed to.

Mr. MANN. I move to strike out the last word. On page 8 there are several provisions intended to give to employees of the Government the right of free use for official business of the telephone and telegraph lines, and so forth. The word as used in three places is "officers" of the Government. I think the word "officers" ought to be changed to "officials," or else after the word "officers" the words "and employees" should be inserted. The word "officers" has always been held to apply to certain classes.

Mr. FERRIS. In those three places there will be no objection to the substitution of the word "officials," in lines 14, 15, and 22

Mr. MANN. Then, I move to strike out, in lines 14, 15, and 22, the word "officers" and insert in lieu thereof the word "officials" in each case.

• The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amend, on page 8, in lines 14, 15, and 22, by striking out the word "officers" and inserting in lieu thereof the word "officials."

The amendment was agreed to.

The Clerk read as follows:

Sec. 5. That all lands over which the rights of way mentioned in this act shall pass shall be disposed of only subject to such easements: Provided, however, That the construction of the aforesaid works shall be diligently prosecuted without cessation of such construction for a period of three consecutive years, and in the event that the Secretary of the Interior shall find and determine that there has not been diligent prosecution of the work or of some integral and essential part thereof, or that there has been a cessation of such construction for a period of three consecutive years, then he may declare forfeited all rights of the grantee herein as to that part of the works not constructed, and request the Attorney General, on behalf of the United

States, to commence suit in the United States District Court for the Northern District of California for the purpose of procuring a judgment declaring all such rights forfeited to the United States, and upon such request it shall be the duty of the said Attorney General to commence and prosecute to a final judgment such suit: Provided further, That the Secretary of the Interior shall make no such finding and take no such action if he shall find that the construction or progress of the works has been delayed or prevented by the act of God or the public enemy, or by engineering or other difficulties that could not have been reasonably foreseen and overcome, or by other special or peculiar difficulties beyond the control of the said grantee: Provided further, That, in the exercise of the rights granted by this act the grantee shall at all times comply with the regulations herein authorized, and in the event of any material departure therefrom the Secretary of the Interior or the Secretary of Agriculture, respectively, may take such action as may be necessary in the courts or otherwise to enforce such regulations.

Mr. GRAY. Mr. Chairman, my attention has been called to this bill by the gentleman from Minnesota [Mr. STEENERSON].

As I understand the bill, it provides for the furnishing of water, and also for power for commercial use. There are two questions here of serious, vital concern. One is the conservation of natural scenery, the conservation of natural beauty, the conservation of natural grandeur—the face of nature as God carved it in that far-away day of creation, and compared to which the works of man are dull and diminutive.

They tell us here this morning that all this is sentiment. And what is not sentiment? To wear clothes to cover the naked body is sentiment. To live in houses instead of in caves is sentiment. To cook and prepare food instead of eating raw and bloody meat is sentiment. The desire to live is only sentiment, for every cradle calls for a grave, for as surely as we are born we shall die. No matter whether we live long or for only a brief time, all earthly things shall alike come to naught. The desire to live for the fleeting time of life is sentiment. All is sentiment.

The other question involved here is the conservation of human welfare, the conservation of human health, the conservation of human life, the only substantial physical good, the greatest of all wealth to man, the most benign of all blessings that the human mind can conceive or the human body can enjoy.

Mr. Chairman, much as I admire the beauties of nature and deplore the desecration of God's creation, yet when these two considerations come in conflict the conservation of nature should yield to the conservation of human welfare, health, and life.

[Applause.]

Mr. Chairman, if these works which are proposed to be constructed here are for the conservation of human life and health, there is no desecration of this great valley, but it will only be a work of transformation of natural beauty in one form into the natural beauty of the human body in health and life in the very image of the Creator. But if these works here are to be constructed to serve the baseness of commercialism, it is the vilest of all vandalism. My suggestion here to you is to strike out of this bill all the commercial profit which is sought here to secure under the plea of humanity. You can pass this bill upon the high plane of humanity and reverence for the works of God.

the high plane of humanity and reverence for the works of God.

Mr. KENT. Mr. Chairman, I should like to suggest to the gentleman from Indiana [Mr. Gray] that this bill is strictly drawn in the public interest, that there is no possibility of selfish gain, and that no corporation or individual can obtain any benefit whatsoever from this bill. It is for the benefit of the people of California.

Mr. GRAY. Mr. Chairman, the test of that proposition will come on striking out the commercial profit to the grantees and

reserving the same for the use of all the people.

Mr. MANN. Mr. Chairman, I move to amend, page 9, line 22, by inserting, after the word "to" where it first occurs, the words "cause to be," and to add the letter "d" after the word "commence" and the word "prosecute," so that it will read:

Duty of the Attorney General to cause to be commenced and prosecuted to a final judgment.

The Clerk read as follows:

Amend, page 9, in line 22, by inserting, after the first word "to," the words "cause to be commenced and prosecuted." So that when amended it shall read: "It shall be the duty of the said Attorney General to cause to be commenced and prosecuted to a final judgment."

Mr. SUMNERS. Mr. Chairman, I move to strike out the last word in order to ask a question of the chairman of the committee. In this section you provide that the work shall be commenced and prosecuted for three years, and after that you seem to provide that there may be a cessation of the work for three years. May I inquire the purpose of that provision?

Mr. FERRIS. I hardly think the committee had in mind

Mr. FERRIS. I hardly think the committee had in mind the fact that the language would import what the gentleman states. Our idea was that if they had gone ahead diligently for three years it would be safe to leave it in the hands of the department, they having an interest to progress further. We thought it could be safely left in that way; after they have

spent the time and money we thought they would have sufficient

interest to proceed.

Mr. SUMNERS. The penalty for failure to proceed seems to be the right of the Government to compel a reversion to it of that part of the property occupied by construction. That would leave it in the situation that neither the Government nor the city could proceed if they intended the whole plant for any purpose.

Mr. FERRIS. The city is going to construct a great plant there and they will have to have a lot of material; they are going to expend \$77,000,000. They necessarily would have temperarily, during the construction period, to use an excess of The committee wanted to be sure that as soon as the construction was over the land not needed would go back to

the park and back to the Government.

Mr. SUMNERS. The gentleman did not quite understand my question. The section provides upon failure of the city to comply with the obligations a suit may be instituted, and as a result of that judgment would extend to a reversion to the Federal Government of that part of this property which has been occupied by some construction on the part of the city.

I am not sure that I get the gentleman's point. Mr. FERRIS.

Mr. SUMNERS. I will read the provision:

Mr. SUMNERS. I will read the provision:

Provided, however, That the construction of the aforesaid works
shall be diligently prosecuted without cessation of such construction
for a period of three consecutive years, and in the event that the
Secretary of the Interior shall find and determine that there has not
been diligent prosecution of the work or of some integral and essential
part thereof, or that there has been a cessation of such construction
for a period of three consecutive years, then he may declare forfeited
all rights of the grantee herein as to that part of the works not constructed, and request the Attorney General, on behalf of the United
States, to commence suit in the United States District Court for the
Northern District of California for the purpose of procuring a judgment declaring all such rights forfeited to the United States, and
upon such request it shall be the duty of the said Attorney General
to commence and prosecute to a final judgment such suit.

Now, the question that occurs to me and what I want to ask is, if that suit should be instituted-and you contemplate the possibility of the institution or you would not put it in-at the end of the suit you would have one end of this property belonging to the city and the other end of it belonging to the Government by reason of the forfeiture resulting from the suit. Does not the gentleman think that would be rather a complicated situation?

Mr. FERRIS. I hardly think it would result in that. In the event that the city failed I think it would be up to the Attorney General not only to bring suit for that part that was

under construction, but for the whole thing.

Mr. SUMNERS. Then why do you put in this provision? Because later on you have a provision which says that upon a failure to comply with the obligations imposed in the bill the grant herein shall be annulled.

Mr. FERRIS. That was during the construction period. gentleman understands that in the construction of such a gigantic work they must have some latitude, and we gave the Secretary of the Interior latitude so that if he desired at any time to proceed on the ground that they were not going on with the work it should be the duty of the Attorney General's office to proceed with the cancellation.

Mr. SUMNERS. In section 9, as contemplated by the failure on the part of the municipality to comply with the conditions in this act, it shall result in forfeiture to the Government. In section 5 you make only a qualified and partial forfeiture. This seems to be in conflict with section 9 and leaves the situation confused in the event of the Government having a necessity

to proceed for forfeiture.

Mr. FERRIS. We intended to avoid confusion. Does the gentleman have any suggestion which he thinks would clear it up? As I read it, it seems to provide for what the committee had in mind. Now, will the gentleman wait until we get to

Mr. MONDELL. Mr. Chairman, I move to strike out the last

two words.

Mr. MANN. I have an amendment pending.

Mr. MONDELL. Well, I will speak to the amendment. have no doubt but what the amendment is a proper one. section can be amended to a very much greater extent and still be in very much better form. I simply rose to call attention to the illustration that this section gives of the diffuse and proix character of the legislation. In one single section of the bill are two entirely separate and distinct provisions in regard to the enforcement of its conditions, separate and apart from each other, and there are half a dozen others in other parts of the bill. It will require a Philadelphia lawyer and a man learned in legal procedure as a Government official to know which one of these various provisions he shall adopt or follow in attempting to enforce the various provisions of the

statute. This could have been all provided for in one very brief section, in which provision could have been made for the enforcement of the conditions of the act. The legislation would then have been clear, readily understandable, and there would not have been any confusion in regard to the enforcement of its

Mr. ROGERS. Mr. Chairman, if I may have the attention of the committee for a moment, I wish to call attention to the first words of the proviso, which begins in line 7, page 9, and especially to the clause "for a period of three consecutive years." seems to me that that clause may grammatically limit either the word "prosecuted," in line 8, or the word "cessation," in line 9. I assume the meaning is that it shall limit the word "cessation," but it might as it now stands with equal propriety be under-stood as limiting the word "prosecuted." That ambiguity, it seems to me, might result in very considerable inconvenience, because it might mean that the grantee under this bill would be obliged to continue the work without cessation of any period of time whatever. A mere change in the order would perhaps accomplish the desired result.

Mr. MANN. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. MANN. The latter provision, "or that there has been a cessation of such construction for a period of three consecutive years this forfeiture may occur," is not that itself a construction of the former language so that it means without cessation for a period of three consecutive years in the former part?

Mr. ROGERS. I looked in the back part of the book. so to speak, in order to be helped to an answer here; but it seems to me it would be desirable to have a change in the phraseology

so as to achieve clarity at the outset.

Mr. MANN. I certainly am not criticizing any proposed change, because personally I doubt whether anybody can read

this section and tell what it means,

Mr. ROGERS. My idea would be that this clause in lines 9 and 10, "without cessation of such construction for a period of three consecutive years" should be placed after the word 'shall," in line 8; that would be grammatically clear, and would be entirely devoid of ambiguity.

Mr. FERRIS. I will say to the gentleman the committee has no pride of words. The gentleman knows how this thing works out; it is a question of give and take, and we accept suggestions offered in order to arrive at a just conclusion. any member of the committee has a suggestion that will help I am sure the committee will accept it.

Mr. ROGERS. What does the gentleman say as to the sug-

gestion I have just made?

Mr. FERRIS. I am not sure that will be necessary, but if the gentleman will offer it it possibly may help some.

The CHAIRMAN. The question first is on the amendment offered by the gentleman from Illinois [Mr. Mann].

The question was taken, and the amendment was agreed to. Mr. ROGERS. My suggestion would be to change the order of the clause in lines 9 and 10, "without cessation of such construction for a period of three consecutive years," so that that may follow the word "shall," in line 8.

Mr. FERRIS. Mr. Chairman, that will undoubtedly help the grammatical construction; I do not know whether that will

relieve the gentleman from Texas or not.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 9, by inserting after the word "shall" in lines 8 and 9 and the first two words in line 10, so that it will read: "Shall without cessation of such construction for a period of three consecutive years."

Mr. MANN. Mr. Chairman, as the gentleman from Massachusetts [Mr. Rogers] said, there are two possible construc-tions of the provision. One is that the work shall be diligently prosecuted for a period of three consecutive years, and the other is that the work shall be diligently prosecuted until it is completed, without a cessation at any time of three consecutive

Now, the gentleman from Massachusetts [Mr. Rogers] offers an amendment taking the first construction, which would only require a diligent prosecution for the first three consecutive years, when this work will require to be constructed many more years than that. The language of the section provides that when there has been a cessation—that is, lines 13 and 14, on the same page-for a period of three and one-half years, there may be a forfeiture, and clearly indicates that the purpose of the bill above is to require diligent prosecution of the work for the entire time during which it is constructed, but allowing a cessation for three consecutive years. And I am sure no one can tell what the section means if the gentleman's amendment prevails. It is involved now. There is no question about that.

Mr. CRAMTON. Mr. Chairman, could I suggest that I think the meaning could be made clear if the language were like this: Shall be prosecuted diligently and without cessation of such construction for a period of three consecutive years.

It seems to me that would answer the purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. Rogers].

The question was taken, and the amendment was rejected. Mr. CRAMTON. Mr. Chairman, I offer to amend so that it will read:

Shall be presecuted diligently and without cessation.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amend, page 9, line 8, by inserting, after the word "diligently," the words "without cessation of such construction for a period of three consecutive years."

Mr. CRAMTON. Mr. Chairman, that does not quite get it. You will have to change the order and put the word "prosecuted" before "diligently."

The Clerk read as follows:

Shall be prosecuted diligently and-

Mr. McKENZIE and Mr. DAVIS rose.

The gentleman from Minnesota [Mr. The CHAIRMAN.

Davis] is recognized.

Mr. DAVIS. Mr. Chairman, I do not care to criticize the phraseology of the bill, and I am almost willing to say in the beginning that probably my comprehension is dull as to certain provisions. There appears in line 14, after the words "consecutive years," the following language:

Then he may declare forfeited all rights of the grantee herein as to that part of the work not constructed.

That seems to be limited to the forfeiture of that part of the work not constructed. There is nothing said about forfeiting any other rights. Then it provides:

And request the Attorney General, on behalf of the United States, to commence suit in the United States District Court for the Northern District of California for the purpose of procuring a judgment declaring "all such rights forfeited to the United States."

What is the meaning of "all such rights forfeited"? Does it mean all the rights that the grantee has under the provisions of this bill, or only such parts of this grant as they have neglected to construct?

Mr. FERRIS. I do not know that my construction is right about it. I am apt to be mistaken about it, but the idea was to keep San Francisco constantly constructing the work, otherwise to cause the suit to be brought to cancel. The committee recognized the necessity of throwing every safeguard they could around the Government. I do not know that I heard the amendment aright, but it appears to say and appears to mean that the Government would not bring a suit until the three years' cessation had occurred. I think that would be the construction of it.

Mr. DAVIS. That, I think, is plain. But in one provision here you make it plain that the Secretary of the Interior shall declare the rights of the grantee as far as that part of the work not constructed is concerned forfeited. Then you provide that the Attorney General shall commence an action to put into judgment a forfeiture of "all such rights." It is not clear what is meant by "all such rights."

Mr. FERRIS. I am inclined to think that language in line

16 undoubtedly ought to be stricken out. If the Attorney General is going to cause any of it to revert, he ought to cause all

of it to revert.

Mr. DAVIS. I wanted to ascertain what the understanding of the committee was, whether everything was to be declared forfeited, or only that part of it which the Secretary of the Interior had declared forfeited and which the grantee had failed to construct.

Mr. MANN. If the gentleman will permit, suppose the city of San Francisco goes ahead and constructs a part of this work and finishes the construction of it, and finds it is impossible to construct other parts under the provisions of this law unless it comes to Congress and has the law changed. There is no desire, I suppose, on the part of the General Government to take away from San Francisco the work that it has constructed. It is like building a railroad anywhere under any grant that we have made. They file plans for a right of way and they forfeit their rights unless they construct the railroad, but they do not forfeit their right to that part of the railroad that is constructed. They forfeit only their rights on the part where it is not constructed. No one could ever build a railroad otherwise. Probably the city of San Francisco would never be able to

small amount, and then you will have to forfeit the entire construction, involving all the expense you have been put to.

Mr. DAVIS. I agree with the gentleman from Illinois [Mr. MANN] that that would be the only equitable proposition to submit to any Congress or to any people. But I was criticizing or questioning, you might say, the language of the bill. The language of the bill says that the Secretary of the Interior may forfeit only such portions as they have not constructed. Then you ask the Attorney General, in substance, to put into judgment a forfeiture of "all such rights" without any limitation as to the extent of "such rights." This might include all rights given under this act.

Mr. MANN. . No; that which the Secretary has declared for-

feited.

Mr. DAVIS. What benefit would that be to the city of San Francisco to have part of it forfeited and be left in that position? That is what I want to know.

Mr. MANN. That would not benefit the city of San Francisco. That would protect the Government without helping the

city of San Francisco.

Mr. DAVIS. What benefit would San Francisco obtain if she finished part of the work and had another part forfeited? The entire act, so far as San Francisco is concerned, would be utterly useless.

Mr. MANN. Very true; it would be entirely useless. But in coming again to Congress the city of San Francisco would be compelled to come here and say they owned certain work which

they had constructed, whereas if that work were all forfeited the city would own nothing.

Mr. DAVIS. My only point is this language, "A judgment declaring all such rights forfeited." What is the meaning of "such rights" when read with respect to the foregoing language?

Mr. MANN. I think it would mean the rights where the

work was not constructed.

Mr. DAVIS. If that is the construction of the committee I would not war with it; but I wanted to know whether that was the intention of the committee, or whether they wanted the whole grant forfeited.

Mr. RAKER. That is the construction of the committee, and

think it is very clear.

Mr. DAVIS. Then it is limited simply to what the Secretary of the Interior forfeits?

Mr. RAKER. To that which has not been completed. Mr. DAVIS. That is the intention of the committee, is it?

Mr. RAKER. Yes. Mr. DAVIS. You think the forfeiture would be limited to that only, or would it take in the whole thing?

Mr. RAKER. Only those works that are not complete.
Mr. DAVIS. I wanted to have it understood.
Mr. RAKER. That is the purpose. If they had completed most of it and saw with respect to one branch of it that they did not need to finish it right away-

Mr. DAVIS. It might be a branch that they needed absolutely, and still it would be forfeited, and then the whole thing

would be useless to the city of San Francisco.

Mr. RAKER. If they ceased work for three years on the whole plan, then that part of it that was not completed would be forfeited. Otherwise they could continue this indefinitely. They should start in under this bill and keep busy right along all the time. That is the law of the State of California in regard to water rights.

Mr. DAVIS. I think the city of San Francisco is entitled to this legislation, and I am in favor of the bill. But I think they are entitled also to know what their rights are. But if the ipse dixit of the Secretary of the Interior will forfeit one part of it and the Attorney General, starting under this provision, might forfeit the whole thing, then this ought not to be left so ambiguous. I want it made plain that the court would not forfeit all where the Congress intended that only a part should be forfeited.

Mr. RAKER. I do not think there is any question about it. Mr. McKENZIE. Mr. Chairman, I would like to ask the chairman of the committee, or some one else familiar with this question, whether or not the words "fully completed," following the word "cessation," in line 9, then striking out all the remainder of the section, would not be sufficient?

Mr. Chairman, I wish to suggest to the chairman of the committee [Mr. Ferris] that if all of the section after the word "cessation," in line 9, were stricken out and the words "until fully completed" inserted it would be better and fully cover the ground.

Mr. FERRIS. This bill has had a great deal of attention, finance this proposition if at the outset Congress should say, both from the departments and from the committee, from the "You have all your work constructed with the exception of a representatives of San Francisco, and of the irrigation people by their attorneys, and I would be a little fearful that by striking out these words we might sacrifice something that would be more important than the ambiguity referred to. The heads of the departments have all had their fingers on this, and I know that those words meant something to the committee. I do not mean to say that the Committee of the Whole must swallow this bill as it is or anything of that kind, because it is perfectly right and proper that every Member should have the privilege of picking it to pieces or improving it in any possible way; but I am rather of the opinion that we had better not strike that out, although at first glance I think myself that it would read better; but there will be many chances to look at this in the Senate and in conference, and unless the gentleman feels too deeply about it, I hope he will let it go.

Mr. McKENZIE. If this were a grant to a private individual or some private corporation, I could see the force of the language following in this section; but this is not a speculative proposition on the part of the city of San Francisco.

Mr. FERRIS. That is true.

Mr. McKENZIE. They want this water right, and they expect to construct this project, and I for one believe they will act in good faith and proceed to build it as speedily as possible. If they do not, then the Government of the United States has its remedy and its way of forfeiting this grant. Why tie it up with all the ambiguous language that follows in this section? Simply require them to proceed with diligence to construct it.

Mr. FERRIS. I understand full well the force of what the gentleman says. It is true this bill does limit them against selling to any corporation or anybody else. It is a grant to that municipality to help all those people. There is no selfishness about it; but at the same time the gentleman from Illinois [Mr. McKenzie] will realize that there are a great many good and patriotic people in the country who do not believe we ought to dam up this gorge at all, because it is on the property of the United States; and while I do not agree with them about it, and believe they are mistaken about it, and I believe if they had the same information that the committee had and that the department had, they would favor it, yet I believe we had better hesitate about removing these conditions, because in attempting to befriend the city of San Francisco we might hurt her.

Mr. McKENZIE. I have no purpose to embarrass the city of San Francisco. I would like to help her out. I am in favor of the proposition. I have no patience with the argument that some worthless chasm should be forever preserved, or that the top of some barren mountain should not be blown off because one man in a million might like to look at it some time, while hundreds of thousands of people in San Francisco and in the surrounding cities may be benefited by making use of God's plans in putting snow on the top of those mountains, by diverting the water therefrom to the city. [Applause.]

Mr. FERRIS. The remarks of the gentleman hit the spot

exactly.

Mr. COX. I want to call the attention of the gentleman from Oklahoma [Mr. Ferris] to the word "material" in line 8, page 10. It seems to me that if that word is left in there it may form the basis for a serious contention between the Government on one side and the city of San Francisco on the other, in the event of a suit being filed for the purpose of ousting this corporation. It strikes me when we are giving such an important grant as this—and it must be important, otherwise the city of San Francisco would not undertake to bond itself to the amount of \$70,000,000—some benefit is coming to somebody.

Now, again, I want to call your attention to that language, to see whether you think the word "material" ought to be left in,

or whether you think it ought to be taken out:

Provided further, That, in the exercise of the rights granted by this act, the grantee shall at all times comply with the regulations herein authorized, and in the event of any material departure therefrom the Secretary of the Interior or the Secretary of Agriculture, respectively, may take such action as may be necessary in the courts or otherwise to enforce such regulations.

Mr. FERRIS. I think the gentleman understands that the money is to be raised by the municipality of San Francisco by bond issues from time to time, and the city has to act through its officials. It is not like an individual. They can not always control their own purses as an individual would; and by giving the Secretary of Agriculture and the Secretary of the Interior full power to hold them up and not let them even scar a tree or turn over a rock until the maps and plats were approved, and then later on giving the Secretary of Agriculture and the Secretary of the Interior full power to promulgate regulations, with every possible safeguard, we thought those regulations would be rigorous enough.

If we said "any departure," the slightest little misstep, the slightest cessation, or the slightest little delay in the placing of years.'

a bond issue or something of that kind—although they have already voted \$45,000,000 of bonds—we thought we had better put that in so there would have to be a material departure. No one should desire to torture San Francisco because she craves at here

at her own expense an ample water supply.

Mr. COX. Ordinarily we are safe in relying on the presumption that every man does his duty, especially the heads of great departments. Ordinarily we are justified in arriving at that conclusion that they will do their duty; but in view of the fact that here is the Government of the United States ceding a grant practically free, because the United States will not reap the benefits even of this little \$30,000 a year, when we give them a charter, which this practically is, are we justified in allowing any latitude or discretion whatever on the part of the Secretary of the Interior or the Secretary of Agriculture to say whether or not they have materially departed therefrom? Or would we not better be justified in prescribing rules and regulations, and then saying to the city of San Francisco, "If you want to take it on these conditions, you may do so. And if you depart from the plans and specifications and profiles you have filed there shall be a forfeiture." I do not like the word "material."

Mr. FERRIS. I believe the gentleman will agree that the very next section specifically limits the possibility of its getting into the hands of a corporation or private parties. It is a grant for the city of San Francisco and the bay cities about her. They own two-thirds of the floor of the valley themselves, and they will build \$1,000.000 worth of roads and pay \$30,000 annually. This contract is an onerous one, and anyone who studies carefully the facts must wonder how San Francisco can bear the load.

Mr. COX. Yes; but that is going back to that section of the

country.

Mr. FERRIS. Yes; but it is our property that we are improving; it belongs to the Federal Government. I hope the gentleman will not insist.

Mr. COX. I do not want to be captious or put myself in the attitude of being captious, but who is coming here to say whether there has been a material diversion one way or the other from the plans and specifications? Suppose somebody says they have diverted from the plans and specifications as originally agreed upon and as originally filed. Somebody makes the charge. How are you going to get the Secretary of Agriculture or the Secretary of the Interior to move in that particular? Suppose they say that they have not diverged or diverted? Mr. FERRIS. The section we have just passed over or is

Mr. FERRIS. The section we have just passed over or is pending specifically provides that they must proceed to bring suit to final judgment. Before they begin the work they must file the plans and specifications of what they expect to do, and they can not start in until both Secretaries approve. That is not all. The two Secretaries have the right to prescribe the rules and regulations and put up all safeguards to regulate it. There have been few bills with such good indorsement; few bills so well safeguarded.

Mr. COX. That is the point. They have got to come up to certain rules and regulations, and suppose somebody says that they have wavered from the rules and regulations?

Mr. FERRIS. Then the Interior Department would be put in motion; but hardly any court would cancel such a grant to a municipality for any little diversion.

Mr. COX. I agree with you on that.

Mr. FERRIS. While I do not think it is extremely important, San Francisco is paying every cent of this expense, and the Government is just and could not but be benefited thereby.

Mr. COX. She evidently wants it, or she would not ask it. Now, I am not going to make a motion to strike it out; but, as I say, I do not like the word "material."

Mr. CRAMTON. Mr. Chairman, I should like to add to my amendment that the letter "a," in line 9, should be changed to the word "any."

The CHAIRMAN (Mr. CRISP). The Clerk will report the amendment.

The Clerk read as follows:

Amend, in line 8, by transposing the words "diligently prosecuted," and inserting in the beginning of line 9 the word "and," and striking out the word "a" in line 9 and inserting the word "any," so that it will read:

will read:
"That the construction of the aforesaid works shall be prosecuted diligently and without cessation of such construction for any period of three consecutive years."

Mr. MANN. I do not see how it helps any to strike out the word "a" and insert the word "any." It says "without cessation of such construction for a period of three consecutive years."

Mr. CRAMTON. My idea was that it should have reference

to any period of three consecutive years.

Mr. ROGERS. That might go with the verb.

Mr. CRAMTON. It might refer, as it stands now, to the first

three years. Mr. MANN. But one three years is enough. Cessation for one period of three years produces forfeiture. Once is enough. If you kill a man he is dead and it is not necessary to kill him again.

Mr. CRAMTON. But this does not say that the man is dead. Mr. MANN. This says that when construction ceases for a

period of three years there shall be a forfeiture.

Mr. CRAMTON. I want it so that it will apply not only to the first three years of the work, but to any three years. As it reads now, if you say "a" period of three years it might be the first three years, but none thereafter.

Mr. MANN. But you have changed it so as to cut that out. You say "without cessation of such construction for any period

of three consecutive years."

The CHAIRMAN. Does the gentleman from Illinois withdraw his amendment to the amendment offered or request for

a modification of the amendment?

Mr. ROGERS. I wish to ask the gentleman from Michigan if he will accept as a substitute this amendment: Strike out the words "without cessation of such construction for a period of three consecutive years" in lines 9 and 10 and substitute therefor the following: "no cessation of such construction to continue for a period of as long as three years." It seems to me that absolutely cuts out ambiguity and makes the language mean just what the committee presumably wants it to mean. I offer that, if it is in order, as an amendment or as a substitute to the amendment offered by the gentleman from Michigan.

Mr. McKENZIE. I withdraw my suggested amendment. The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out the words "without cessation of such construction for a period of three consecutive years" in lines 9 and 10 and substitute in place thereof the following: "no such cessation of such construction to continue for a period of as long as three consecutive years."

Mr. CRAMTON. I will accept that as far as I am concerned. The CHAIRMAN. The question is on the substitute offered by the gentleman from Massachusetts for the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment to the substi-

tute was agreed to.

The CHAIRMAN. The question now is on agreeing to the substitute.

The question was taken, and the substitute was agreed to. Mr. TAYLOR of Colorado. Mr. Chairman, a parliamentary

The CHAIRMAN. The gentleman will state it.

Mr. TAYLOR of Colorado. Was the amendment of the gentleman from Illinois to line 22 finally adopted?

The CHAIRMAN. It was adopted.
Mr. DAVIS. Mr. Chairman, I desire to offer an amendment to make more plain the point I tried to make a moment ago. In line 20, after the word "rights," insert the following: "to that part of the said work not constructed to be," so that the paragraph will read then, "procuring a judgment declaring all such rights to that part of the said work not constructed to be forfeited to the United States," and so forth.

Mr. RAKER. We think the word "such" means that; but

as this is intended to clarify it, we have no objection.

Mr. DAVIS. That is all I want, to make it absolutely cer-

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amend, line 20, page 9, by inserting after the word "rights" the following: "to that part of the said work not constructed to be."

The question was taken, and the amendment was agreed to. The Clerk read as follows:

The Clerk read as 1010ws:

SEC. 6. That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right for such corporation or individual to sell or sublet the water or the electric energy sold or given to it or him by the said grantee: Provided, That the rights hereby granted shall not be subject to sale, assignment, or transfer to any private person, corporation, or association.

Mr. TAYLOR of Arkansas. Mr. Chairman, on page 10, line 17, I think the bill should be amended so as to make the proviso read as follows:

Provided, That the rights hereby granted shall not be sold, alienated, assigned, or transferred to any private person, corporation, or association, and in case of any attempt to so sell, assign, transfer, or convey this grant it shall revert to the Government of the United States.

The CHAIRMAN. Does the gentleman from Arkansas offer that as an amendment?

Mr. TAYLOR of Arkansas. I do, and I want to say this: I am a member of the committee and I favor this bill in every respect, but I do not think that this grant should be given without that proviso in it. I think that it is safe to the Government and safe to the rights of the people of San Francisco and San Francisco County and to those people who are entitled to this water for irrigation purposes.

Mr. MURRAY of Oklahoma. Mr. Chairman, if the gentleman will yield, I desire to say I have run through this bill and I find no condition of forfeiture, and it occurred to me, on page 25, line 24, it says "that this act is a grant upon certain express conditions specifically set forth herein." Now, it occurred to me, right after the word "herein," in line 25, ought to be inserted the condition of forfeiture for failure to perform any part of the conditions of the grant. In other words, as a lawyer, if you write a contract for a client and you put conditions to it, you certainly as a lawyer write conditions of forfeiture, and it occurs to me what you have there ought to be here so as to cover every part of it.

Mr. TAYLOR of Arkansas. The gentleman may be correct in that, but, Mr. Chairman, I think that provision should be in-

serted in this bill.

Will the gentleman from Arkansas send The CHAIRMAN. his amendment to the Clerk's desk?

Mr. MURRAY of Oklahoma. I would not object to the gentleman placing it in every place where it is necessary to make it clear

Mr. TAYLOR of Colorado. Mr. Chairman, I want to suggest to the gentleman from Oklahoma this ought to go in here because this is a forfeiture section, but I am very insistent that the language of section 11 remain as it is. It is the identical language of section 8 of the reclamation act regarding the protection of State rights, and I would not like to have that phraseology encumbered by any forfeiture act.

And I would just as soon you would put this in as a separate

section there, but not inject it into section 11.

Mr. MURRAY of Oklahoma. Well, do you object to— Mr. TAYLOR of Colorado. I do not object to this going in at any other place, except that I do not want that language modified.

Mr. MURRAY of Oklahoma. Then turn back to section 9. Mr. RAKER. You might put it at the end of section 10 on the same page.

Mr. MURRAY of Oklahoma. In section 9, on page 11, there

is another one, as follows:

This grant is made to the said grantee subject to the observance on the part of the grantee of all the conditions hereinbefore and hereinafter enumerated.

Mr. FERRIS. That would be a better place for it.

Mr. TAYLOR of Arkansas. Now, Mr. Chairman, I desire to state to the committee again that I am in favor of this bill. I think it ought to pass. But the amendment printed in the committee bill was originally written, as I understand, at my suggestion, but not broad enough. I think in order to absolutely safeguard this bill so that nothing improper of a grafting nature shall ever happen hereafter, my amendment should go into it.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Page 10, line 18, after the word "be," strike out the remainder of the line and insert "sold, assigned, or transferred."

And at the end of line 19 insert the following:

And in case of any attempt to so sell, assign, transfer, or convey, this grant shall revert to the Government of the United States.

Mr. HELM. Mr. Chairman, I am in hearty accord with the position of the gentleman from Arkansas [Mr. Taylos], but I do not believe his amendment touches the spot or cures the defect that needs curing. If I grasp the meaning of this section of the bill, it is that this parent concern or franchise that is to be created or granted is prohibited from ever selling or subletting to any corporation or individual, except a municipality or a municipal water district or irrigation district, any of the rights, benefits, or powers granted the grantee. Now, the parent concern can sell to a municipality without limit, no matter how small that municipality may be. It may be a mere village, a spot on the map, so to speak. It may be a dummy that is created to come within the very scope of this exception. It could contract for a volume of power of any description. either of water or electric energy, far beyond its capacity to absorb. Being permitted under the terms of the bill to contract as a municipality with the parent concern, there is no limitation upon the volume of energy or power that it can contract for.

and having secured a valid contract as a municipality or as a municipal water district, or as an irrigation district, it can then sublet or peddle out that power that it has acquired under this contract from the parent concern; and it seems to me that the proper way to reach what the gentleman from Arkansas [Mr. TAYLOR] intends to reach by his amendment is to provide that the rights that may be granted to any municipality or any water district or irrigation district, solely for their respective use, shall not be subject to sale or assignment or transfer to any private person, corporation, or association, subject to the forfeitures provided for in this bill.

Mr. Chairman, this is a bill that carries with it enormous possibilities. There is no one who would not be fortunate by being in on this bill, and this Congress had better look well to it, if it wants to escape adverse criticism, that this power that it is proposed to grant by this bill to the city of San Francisco and to the county of San Francisco is properly safeguarded.

From what I have heard talked on the floor, you are going to create one of the biggest water-power propositions that was ever created in the United States. If my information is correct, this concern is one hundred and forty and some odd miles from the

city of San Francisco, up in the mountains. Is that correct?

Mr. RAKER. That is right.

Mr. HELM. You are going to create a river. It takes wellnigh a big-sized river to supply the city of San Francisco with water, outside of these irrigation projects and these other mu-nicipal water districts. You have a river 140 miles long, with an elevation of how much?

Mr. RAKER. Of about 4,000 feet.
Mr. HELM. You can put water-power plants along this river every few hundred yards.

Mr. KENT. Will the gentleman yield? Mr. HELM. Not just now. This water can be used over and over again and time and time again as a water-power proposition.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. Chairman. I ask unanimous consent to pro-Mr. HELM.

ceed for five minutes longer.

The CHAIRMAN. The gentleman from Kentucky [Mr. Helm] asks unanimous consent to proceed for five minutes. Is there

Mr. MANN. Reserving the right to object, Mr. Chairman, I would like to ask the gentleman from Oklahoma [Mr. Ferris] if we can not close debate on this section?

Mr. FERRIS. I would like to have five minutes.
Mr. BRYAN. I also would like to have five minutes. It is on this particular section.

Mr. HELM. Mr. Chairman, it strikes me that it is very strange that when we reach this particular subject gentlemen undertake to close debate in 5 or 10 minutes.

Mr. MANN. Yes; and it strikes me as very strange that the gentleman would make a remark of that kind when he is asking

unanimous consent to address the House.

Mr. HELM. I think the membership of this House and of this committee should have time in which to consider this proposition.

Mr. MANN. I was in favor of discussing it, so far as I am Discussion may kill it. However, I shall not object

to the gentleman talking.

The CHAIRMAN. Without objection, the gentleman from Kentucky [Mr. Helm] is recognized for five minutes.

There was no objection.

Mr. HELM. Mr. Chairman, there are two matters to be guarded in this section now under consideration and in the next section that follows. The first thing to do now is to fix this provision so that this parent concern can not, either by implication or by express terms, acquire a right to peddle out the proceeds that will arise from the utilization of this water power and the construction of this plant.

While I am no expert on this subject and never had any connection in the remotest degree with a proposition of this kind, I can see the greatest possible results arising from the methods here made possible of manipulating this enterprise so that a great deal of this money will get into pockets that you are not now thinking about. It is of prime importance to frame the language of this section of the bill so that these enormous powers and these enormous incomes that are going to result from the operation of this plant may go to the grantee.

And let me say, just in passing, that this paltry sum after 15 years of \$30,000 as a rental charge, if you please, is for what? For the grant of a right of way? No; for these water plants

derived from this proposition is going to be commensurate, when it is under full headway and under full operation, with the income of the Panama Canal.

Mr. TAYLOR of Arkansas. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HELM. Yes.

Mr. TAYLOR of Arkansas. The amendment that I suggested would prevent the very thing that the gentleman is speaking about.

Mr. HELM. I am in thorough sympathy with the gentleman from Arkansas, but the only criticism I have to make of his amendment is that it does not cure the defect.

Mr. THOMSON of Illinois. Mr. Chairman, will the gentle-

man yield?

Mr. HELM. Certainly.

Mr. THOMSON of Illinois. Is it not correct that this section, as it reads now, provides substantially that the grantee under this act can not sell to any individual or corporation other than a municipality the right to take any of this water and this power and resell it to somebody else? That is provided here now

Mr. HELM. I am not at all familiar with the location of this proposition out there. I assume that the gentleman is from California

Mr. THOMSON of Illinois. No; I am from Chicago. Mr. TAYLOR of Colorado. He is a member of the committee. Mr. THOMSON of Illinois. Let me suggest that if this language is read carefully I think it will be seen that it covers the gentleman's contention. These municipalities are prohibited from ever selling or letting to any corporation or individual except a municipality the right to take any of this water and this

power and resell it.

Mr. HELM. Let me ask the gentleman a question. I have the floor, I believe. We will assume that this plant is in full operation, and that there are a number of little municipalities

along the line or no matter where they are.

Mr. THOMSON of Illinois. Yes.

Mr. HELM. San Francisco in the grantee, is it not? Mr. THOMSON of Illinois. Yes; and the other cities.

Mr. HELM. And the county in which San Francisco is lo-The city and county of San Francisco are the grantees. Now, they can sell without any limitation whatever as to volume or quantity, we will say, what electricity might be required by a little place along this right of way, a place of 25 inhabitants, provided it is incorporated, can they not?

Mr. THOMSON of Illinois. Yes.

Mr. HELM. And that little place can buy enough electricity to light the city of Chicago, could it not, and then turn around

Mr. THOMSON of Illinois. Only to consumers. The gentle-

man's proposition would prevent it.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. HELM. That little municipality could resell it to any

corporation or individual for any purpose.

Mr. FERRIS. I know my good friend from Kentucky does not want to leave any false impression. I always have the greatest respect for his judgment. I am sure, however, that if he had given the consideration to the facts in this case that has been given to them by the committee he would not labor under his present impression. Every drop of water in the Tuolumne River is appropriated by irrigation people in the San Joaquin Valley below this proposed dam site. The city of San Francisco does not take a drop of the natural flow of the Tuolumne, but, on the contrary, this bill forces the people of San Francisco to agree to deliver every drop of Tuolumne water back into the

Mr. HELM rose.

Mr. FERRIS. I hope the gentleman will not interrupt me until I finish this statement. The committee, of which I am a member, have given months of consideration to this, and the gentleman, I am sure, has not given that time to it. The city of San Francisco must deliver every drop of the water of the Tuolumne River back into the channel for the irrigation people What does San Francisco spend \$77,000,000 of her own money for, without one penny of expense to the Federal Gov-ernment? It is to collect the melting snow and flood waters that fall on the Sierra Nevada Mountains and to use this valley as a catch basin.

Mr. HELM. Mr. Chairman— Mr. FERRIS. I hope the gentleman will not interrupt me for and water powers that are going to be constructed along this right of way, which is going to be used for lighting purposes, for electric-railway propositions, and so on. The income to be It is easy enough for anyone who has not given this matter the study and consideration that the committee have given it to make insinuations and erect scarecrows and monuments of fear in the minds of people by saying that this has great power possibilities and that it is going to get into the hands of corporations and monopolies, and so forth.

I call attention to the fact that every department head who knows anything about this particular matter, or knows anything about water power or knows anything about irrigation, or anything about waterworks or national parks or national forests, has been before the committee and has been quizzed carefully, and every one of them has O. K.'d this proposition. Gifford Pinchot has been before the committee and he has been quizzed, and he says this bill has every safeguard to prevent monopoly and to help conservation, to conserve the water that now flows idly into the sea, lost to the irrigationists, lost to the people of San Francisco, lost to every living man. Would the gentleman from Kentucky erect scarecrows to defeat the opportunity of the people of San Francisco to construct for themselves a waterworks system and to use the snow that now melts and runs wasted into the sea?

Mr. HELM. Will the gentleman yield now? Mr. FERRIS. I want to answer the gentleman. What is in the mind of the gentleman?

Mr. HELM. The gentleman has completely misunderstood me if he thinks I want to prevent San Francisco from getting the use of this water power. I want the people of San Francisco to have all the water they can drink and use for every possible purpose, but I want this franchise or grant that you are now giving to them to be safeguarded so that it will not become in the hands of the people who operate it a tremendous money-making proposition—which will go to people whom you are not trying to benefit.

Mr. FERRIS. I know the gentleman is entirely patriotic in his motives, and I appreciate his suggestions; but the gentleman must recall that 22 men on the committee sat for six or seven weeks and carefully considered this bill, line by line, with Secretary Lane before them, who has been the city attorney of San Francisco.

We had Secretary Houston before us-the head of the Department of Agriculture. The committee had before them Mr. Graves, who knows all about the provisions for safeguarding the forests. They had before them Mr. Newell, who knows about safeguarding reclamation and irrigation. George Otis Smith before them, who knows about preserving the stone quarries and other natural deposits out there

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. FERRIS. I ask unanimous consent for five minutes

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FERRIS. I am very much in earnest in my desire to accomplish a proper result in this matter, and so if I have appeared at all nettled, I hope the gentleman will excuse me. Our committee have given devoted attention to this matter. We have worked faithfully with wide-open doors, with an invitation to everybody to come in, and I hope the gentleman will not feel that there is any sinister motive in this.

Mr. HELM. Will the gentleman allow me?
Mr. FERRIS. I hope the gentleman will let me proceed for a moment longer. We are not granting a water system here. We are merely granting the right to build a dam between two The city of San Francisco owns the floor of this rugged hills. dam site. They have paid nearly three-quarters of a million dollars to get the title in fee simple. All they want to do is to spend \$77,000,000 of their own money to build a dam between two mountains. How preposterous it is, every time that anybody wants to construct an improvement in relation to water or water power or the use of water, that some one should discover in it some sinister purpose.

There is no sinister motive on the part of any one. Poor San Francisco is willing to do her part and submit to any reasonable amendment, but she should not be made a football of. I am heartily in favor of any amendment which the gentleman from Kentucky and the gentleman from Arkansas may offer that will improve the bill. I think I shall support the gentleman's amendment, but I want to call attention to the fact that you must no exclude the right to sell water to the irrigationists, otherwise we could not return to them the water they are entitled to under the law. You must not exclude the right to sell water to the cities around the coast, for they need water the same as San Francisco does.

Mr. HELM. While you say you must grant them the power, is there anything in this bill that prohibits them from dealing with a third party?

Mr. FERRIS. Oh, yes; they shall not assign, sublet, or dispose of. I think the amendment of the gentleman from Arkansas probably improves it, and if the gentleman can improve upon it I hope he will.

Mr. HELM. The gentleman understands the point I am trying to make is that these small municipalities lying on the right of way or elsewhere have the right to contract and may contract for a volume of power in excess of the necessities of the particular municipality. They may become sort of middle-men or factors in the peddling or dealing out excess power. Mr. FERRIS. Both this bill and the State law would prevent

They have in California a utilities commission which will

safeguard extortion or a misuse of water.

Mr. GRAY. Mr. Chairman, I move to strike out the last word for the purpose of returning to the amendment adopted on page 9, line 8. I do not know that I correctly understand the gentleman's amendment. It seems to me that it is not a good amendment, although it was adopted. I have no serious apprehension that there will be any cessation in this work or any liability to forfeiture, but there might be. From the earnest support given here, and from the long and persistent efforts covering a great period of time, during which the supporters of the bill have never tired-from one Congress repeatedly to another-it would appear there is no such danger. But the amendment provides that if the work shall fail to be diligently prosecuted for a period of three consecutive years, the cause for forfeiture would accrue to the United Under the amendment it seems to me that it might be that this property might be held only for the purpose of preventing other interests from coming in, and operation on the works might be stopped for 34 months and then proceed with the work for a month or a year to destroy the consecutive period, and then cease operations for another 34 months, and so continue until they had spread the work out over half a I do not know whether this provision is important or century. not, but if it is important, if it is worth while to safeguard the Government against a cessation of the work, then this word "consecutive" totally destroys such safeguard originally provided for in the bill. And yet the committee acquiesced in the amendment and was followed. If I understand the effect of the amendment, and if it is material that this work should be prosecuted diligently without cessation, then in that event the word "consecutive" should be stricken out, as this work could not only be made to cover a period of half a century but could spread out over a whole century to keep the others from this valley and to keep the Government itself from entering and making any improvements or prosecuting any undertaking there which might be necessary for the public good.

THOMSON of Illinois. Mr. Chairman, I did not quite get the point of the gentleman from Kentucky [Mr. Helm] feel that he has raised a point that is a good one, and I think it would be met by striking out the word "grantee" in the first line and inserting in lieu thereof the word "assign."

Mr. HELM. Would not that create an endless chain? assign to me and I assign to another and he assigns to another. The word "assign" provides that the person to whom it was assigned might reassign, and you would get an endless chain. What you want and what the purpose of the bill is is to let these municipalities contract with this parent concern for a sufficient power for its local consumption and no more. We do not want to create a sort of a dummy to make a contract with this system for the purpose of acquiring the rights, and after they are acquired then go on the market and peddle these rights out.

Mr. THOMSON of Illinois. I think if the grantee and assigns

were prohibited under this section from doing this thing, that that would preclude its being accomplished by any subsequent assignee. An assignee of the grantee could not sell a right that he did not have.

Mr. HELM. But the gentleman agrees with me that the lan-

guage of the section is vague and uncertain.

Mr. THOMSON of Illinois. I think it will be met by using the word "assigns." I would like to offer that amendment after

the pending amendment is disposed of.

Mr. BRYAN. Mr. Chairman, referring to the amendment pending, it seems to me that this amendment is not an amendment proposed by the committee; it has not been considered by the committee, but is proposed here on the floor of the House. I am thoroughly in accord with this bill to grant this right to

Mr. TAYLOR of Arkansas. Will the gentleman yield? am a member of the committee, and I offered the amendment.

Mr. BRYAN. I am aware of that.

Mr. TAYLOR of Arkansas. I suggested that amendment, and in writing it up it was not written exactly as I have it now.

Mr. BRYAN. I refer to the amendment of the gentleman from Arkansas which a little while ago he introduced on his own initiative as a Member of this House. As to the merits of that amendment, I am opposed to the last part, which provides a forfeiture of all of those rights in case of an attempt on the part, for instance, of the city council of the city of San Francisco to alienate those rights. I think it would be absurd for us to provide in this bill that if the city council of the city of San Francisco should pass an ordinance, some night when they desired to wreck the concern, selling the whole enterprise to some one else—and, perchance, even it be signed by the mayor—that then all of these rights belonging to the people of San Francisco would at once be forfeited; and I think if we make a provision of that kind in this bill it will unfavorably affect those securities that may be floated on the profits or on the revenues of the system; and I believe it would be injurious, and I certainly think that the gentleman who is a member of the committee should amend his amendment by eliminating this forfeiture of the bonds and let that come further on as involving the whole statute in a different way.

Will the gentleman yield? Mr. TAYLOR of Arkansas.

Mr. BRYAN. Certainly.

Mr. TAYLOR of Arkansas. When should it revert to the Government, after it had been sold or conveyed or when they

are attempting to do so?

Mr. BRYAN. The statute already provides that a sale is impossible. Then no such time will ever come as has been suggested by the gentleman from Arkansas. If we provide that a sale will be void, then we have accomplished everything; but if you provide that if the city council or any hostile force on the council should succeed in making an attempt to sell, it then be void, it provides the means for wrecking the whole thing and injecting into the statute a provision that makes the securities, it seems to me, uncertain and would make those who expect to put their money into the bonds very dubious.

Mr. RAKER. Mr. Chairman, so we may understand the amendment-I think there is some doubt in regard to it-I would like to ask the Clerk to read it for the benefit of the com-

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection. The Clerk read as follows:

Amend, page 10, line 18, after the word "the" strike out the remainder of the line and insert: "Provided, That the rights herein granted shall not be sold, assigned, or transferred, and in case of any attempt to so sell, assign, transfer, or convey this grant shall revert to the Government of the United States."

Mr. MANN. This is in lieu of the proviso in lines 17, 18, and 197

Mr. RAKER. Mr. Chairman, I am satisfied the gentleman from Arkansas does not intend to convey the idea that an attempt to sell forfeits the right. The point raised by the gentleman from Washington [Mr. Bryan] is clearly right. I understand an attempt to sell forfelts the right. Now, clearly, no one is going to invest any money in the bonds if at any time you can prove an attempt to sell thereby forfeits the right and de-

stroys the bonds. The gentleman clearly does not mean that.

Mr. TAYLOR of Arkansas. Mr. Chairman, I mean this, that it is too late after this franchise is sold, transferred, and alienated or conveyed to a private person or to a corpora-

tion

Mr. GRAY. Will the gentleman yield?

The CHAIRMAN. The gentleman from California has the

Mr. RAKER. In the first place, this proviso intends that there shall be no sale, no transfer, or assignment of this property. That is clear. A provision that any attempt to sell it proven in court would absolutely forfeit all the rights of the city and county of San Francisco, and in addition to that defeat the bonds that had been issued, and certainly this Congress would never put such a provision upon the act.

But beyond question-

Mr. GRAY. Will the gentleman yield?

Mr. RAKER. Not just at present. If you provided in the bill that they shall not sell, transfer, or assign, and then it is sold, transferred, or assigned, clearly it is then forfeited, if you so provide in the bill, and it is sold, and you have a right to do it.

Mr. TAYLOR of Arkansas. Is it not another question of vested rights in your proposition? Innocent persons have obtained a title to it, and where would the Government stand?

Mr. RAKER. No; it is on its face a part of the bill. Now, if I was going to offer an amendment to this, if you want to hedge it about so as to avoid any complications, I would offer an amendment that no sale, transfer, or assignment, either voluntary or involuntary, should be made, and that an assignment, transfer, or sale forfeits the rights.

Mr. HARDY. Will the gentleman yield for a suggestion as

to phraseology?

Mr. RAKER. I will in just a second. I want to complete the thought. If a man wants to violate the law in a sale of real estate, he can do it every day without any question by an involuntary sale in the way of giving a mortgage, permitting the mortgage to be foreclosed to-morrow, and the next day selling at public auction, and thereby defeating the very object in the bill.

Mr. MANN. Will the gentleman yield?

Mr. RAKER. Yes; I will yield to the gentleman from Illinois

Mr. MANN. This bill provides that property rights shall not

be sold. But suppose they are sold, what will happen?

Mr. RAKER. My conviction is that under the provision of the law they are forfeited.

Mr. MANN. Where is a provision in the bill that forfeits them?

Mr. RAKER. The law itself. The sale would be void.

Mr. MANN. I understand the sale would be void, but who could raise that question?

Mr. RAKER. The Government of the United States.

Mr. RAKER. The Government of the United States.
Mr. MANN. Where is the authority of the Government of the United States to raise it? The city of San Francisco sells the property

The CHAIRMAN. The time of the gentleman from Califor-

nia [Mr. Raker] has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from California [Mr. Ra-KER] asks unanimous consent to proceed for two minutes longer. Is there objection?

There was no objection.

Mr. RAKER. I want to say to the gentleman from Illinois [Mr. Mann] that I am in hearty accord with him in wanting to avoid all complications, and to put on an amendment so as to provide that there is a forfeiture if there is an actual sale.

Mr. MANN. This bill provides there can not be a valid sale. Now, the attempt to sell does not mean the passing of a resolution. An attempt to sell in this case would mean an actual conveyance, which this bill says is invalid. That is only an attempt to sell; it is not a sale. You provide you can not make a sale. I can not see any objection to the provision of the gentleman from Arkansas [Mr. TAYLOR], which is that if the city of San Francisco tries to make a sale of this property, which is invalid, then the rights will be forfeited. That is all it amounts to.

Mr. HARDY. Would it not be simply a proper provision to make it read: "Provided, That the right herein granted shall not be subject to assignment, sale, or transfer, and any such sale, assignment, or transfer, or attempted sale, assignment, or transfer, shall be void "?

Mr. BRYAN. I will support that amendment if the gentleman will offer it as an amendment to the amendment.

Mr. RAKER. So that there can be no misunderstanding let us have the Clerk again report the amendment as it was presented.

The CHAIRMAN. Without objection, the Clerk will report the amendment.

The Clerk read as follows:

After the word "be," in line 18, strike out the remainder of the line and insert the words:

"Sold, assigned, or transferred."

And at the end of line 19 add:

"And in case of any attempt to so sell, assign, transfer, or convey this grant shall revert to the Government of the United States."

Mr. MURRAY of Oklahoma. Put the word "to" on the other side of "so," in order to make it grammatical.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas [Mr. TAYLOR].

The question was taken, and the amendment was agreed to.
Mr. THOMSON of Illinois. Mr. Chairman, I move a further Mr. THOMSON of Illinois. Mr. Chairman, I move a further amendment to the one offered by the gentleman from Kentucky [Mr. Helm] to strike out the word "is" in the first line and insert in lieu thereof the words "and its assigns are."

Mr. MANN. The first line of what?

Mr. THOMSON of Illinois. The first line of section 6.

Mr. RAKER. On page 10, line 12.

Mr. MANN. In line 12, does the gentleman mean?

Mr. THOMSON of Illinois. Yes.

What was the gentleman's amendment? Mr. MANN.

Mr. THOMSON of Illinois. It was to strike out the word "is" in that line and insert in lieu thereof the words "and its assigns are."

Mr. MANN. It has not any assigns.

Mr. THOMSON of Illinois. It may have. It may have a municipal corporation as assignee.

Mr. ROGERS. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield? Mr. THOMSON of Illinois. Yes.

The CHAIRMAN. The Clerk will first report the amendment offered by the gentleman from Illinois [Mr. Thomson].

The Clerk read as follows:

In line 12, page 10, strike out the word "is" and insert the words "and its assigns are."

Mr. THOMSON of Illinois. Now I yield, Mr. Chairman, to

the gentleman from Massachusetts [Mr. Rogers]

Mr. ROGERS. Mr. Chairman, if I understand correctly the definition of the word "grantee," it is found in section 8 of page 11. It takes care of that point fully, without necessitating any such amendment as that which is now proposed. I do not see any objection to the amendment, but I think it is needless.

Mr. THOMSON of Illinois. There may be a municipality to

which the city of San Francisco may assign certain rights under this section, a municipality not included in the definition to which the gentleman refers as the "grantee," and this amendment would prevent that assignee or municipality, other than those named further on in the bill, from making any transfers of its rights to a private corporation.

Mr. SUMNERS. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield?

Mr. THOMSON of Illinois. Yes.
Mr. SUMNERS. Does not the word "assignee" in legal parlance bear the same relation to the grantee as the party to whom you convey as grantor bears to the Government? Now, the city of San Francisco can not have an assignee under this bill in that sense, as I understand it. San Francisco may be the grantee of certain rights that are given under the bill, but she can not transfer directly any rights arising from the Federal Government to another concern. Is not that so?

Mr. THOMSON of Illinois. Under the express provisions of

the bill the city of San Francisco can assign certain of its rights to other municipal corporations, and when it does that the contention of the gentleman from Kentucky [Mr. Helm] is that under this bill as it now stands there is nothing to prevent that corporation to which the city of San Francisco assigns its rights from turning around and reselling its power to Tom, Dick, and Harry, or to whomsoever might want to monopolize it. But if you cover the assigns, you would cure

Mr. TAYLOR of Colorado. Mr. Chairman, will the gentleman

The CHAIRMAN. Does the gentleman yield? Mr. THOMSON of Illinois. Yes.

Mr. TAYLOR of Colorado. It seems to me that under the amendment offered by the gentleman from Illinois [Mr. Thomson], making it read, "the grantee or its assigns are hereby prohibited forever from letting or reselling its rights," if San Francisco sold to the city of Alameda, for instance, so many kilowatts of electricity or such a quantity of power, the city of Alameda would not have any right to resell the same to its inhabitants

Mr. THOMSON of Illinois. It could sell to its inhabitants; the right to sell the water or the power; certainly.

Mr. TAYLOR of Colorado. We have got to let the municipality sell to individuals or consumers.

Mr. THOMSON of Illinois. Yes; but not the right to sell

some one else the power.

Mr. TAYLOR of Colorado. Supposing that San Francisco sells a certain block, you may say, of its power to Alameda. Has not Alameda got the right to resell that to its inhabitants?

Mr. THOMSON of Illinois. Mr. Chairman, in answering the question of the gentleman from Colorado, I would like to call his attention to the fact that the subject of sale as printed in this section is not the power or the water, but the right to sell the power or the water.

Mr. MANN. Mr. Chairman, I would like to inquire of the gentlemen over there if this is just a continuation of the discussions in the committee between the two gentlemen on the committee? [Laughter.] If so, go ahead with that and let us go ahead with the bill.

Mr. THOMSON of Illinois. Mr. Chairman, I ask for a vote

on my amendment.

The question being taken, the amendment was rejected.

Mr. MURRAY of Oklahoma, Mr. Chairman, I move to strike out the last word.

I want to call the attention of the committee to some language in this section that seems to leave its meaning in doubt:

SEC. 6. That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right for such corporation or individual to sell or sublet the water or the electric energy sold or given to it or him by the said grantee.

To my notion that is ambiguous, and we ought to strike out the words "for such corporation or individual," in line 15, so that it will read:

That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right to sell or sublet the water or the electric energy sold or given to it or him by the said grantee.

Mr. RAKER. That means exactly the same. Mr. MURRAY of Oklahoma. It makes it clearer to strike out those words. If you will analyze it, you will see the effect of it. Mr. RAKER. It is all right either way; but if you think it

clarifies it to leave out those words, we have no objection.

Mr. MURRAY of Oklahoma. I move to strike out, in line 15, after the word "right," the words "for such corporation or individual." individual.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Page 10, line 15, strike out the words "for such corporation or individual."

Mr. MANN. Mr. Chairman, in that connection I would like to inquire what is the meaning of the word "individual" in this section?

Mr. RAKER. That really is intended to cover any person ho might attempt to buy this electric power or right. I think who might attempt to buy this electric power or right. it would cover everybody outside of a corporation, the intention being to prevent anybody getting in and getting a right and subletting it.

Mr. MANN. Then plainly the amendment offered by the gen-

tleman from Oklahoma ought to prevail.

Mr. RAKER. Yes; we are for it. The amendment was agreed to.

Mr. HELM. Mr. Chairman, I offer an amendment, on page 10, line 15, after the word "district," to insert the words "for their respective use solely."

That holds it down, so that the section will then read:

That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district for their respective use solely.

Mr. FERRIS. What is the effect of that?
Mr. HELM. That simply prohibits these municipalities, water districts, or irrigation districts from acting as a dummy or go-between between the parent concern and any third party, to prevent any third party from acquiring right under this franchise, so that the corporation or municipality shall acquire the right for its own use solely.

Mr. FERRIS. What does the gentleman mean by that? Does the gentleman mean that he does not want the city of Alameda or the city of Oakland to sell water to its own citizens? Mr. HELM. Oh, no; simply so that the city of Oakland can not sell it to the city of Perryville or the city of Darktown.

Mr. FERRIS. I have no objection to that, if that is what it is; but I do not want any amendment to go into this section that will keep the water from being returned to the irrigationists or from being sold by the city of Oakland or the city of Alameda to their citizens.

Mr. HELM. This will permit the people of Oakland and Alameda to buy all the water they want for their sole use and benefit.

Mr. RAKER. Then the word "citizens" should be inserted there.

Mr. FERRIS. If this will prevent the city of Oakland and the city of Alameda from selling water to their residents it ought not to be done.

Mr. HELM. Oh, no. The grantee is prohibited from selling or letting to any corporation or individual, except a municipality or municipal water district or irrigation district, for their

respective use solely. Mr. FERRIS. Mr. Chairman, I am sure that the gentle-

man from Kentucky and I are absolutely in agreement. He has it in his mind that the cities of Oakland and Alameda that have the water returned to them under the water rights want to peddle the water to parties outside. I do not want that. What other purpose do they have than to sell the water to their own people?

Mr. HELM. This does not prohibit their selling the water

to their own people.

Mr. TAYLOR of Colorado. Suppose they wanted to sell it outside the corporation limits?

Mr. HELM. Do you want these people to sell to people to whom the parent concern could not sell?

Mr. TAYLOR of Colorado. No.

Mr. HELM. Then this is the thing in a nutshell: You do not want the concerns to whom the parent concern does sell to

have the right to sell to a third party.

Mr. TAYLOR of Colorado. We do not want to limit San Francisco, or any of the bay cities, from being able to sell power, to make the use of it, for the benefit of the municipality. Suppose there are truck gardeners around the outside who want to buy some water from the city.

Mr. HELM. Well, that is just what I wanted the gentleman to come to. The municipality makes a contract with the parent concern for water for the supply and use of its citizens. is what they buy the water for. Now, do you want these concerns to turn around and make a profit by going into the business of selling it to other municipalities?

Mr. TAYLOR of Colorado. No.

Mr. HELM. Then this amendment of mine holds it down.

TAYLOR of Colorado. The Public Utilities Commission of California will regulate the price and the rates.

Mr. HELM. This is not a question of price at all.

Mr. TAYLOR of Colorado. Where can there be any monopoly or anything wrong in selling it for legitimate use?

Mr. FERRIS. Let us vote on the amendment.

The CHAIRMAN. The Clerk has not been able to get the amendment offered by the gentleman from Kentucky.

Mr. HELM. My amendment is, on page 10, line 15, after the word "district," insert these words: "solely for their respective use."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "district," in line 15, page 10, insert the words "solely for their respective use."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kentucky.

The question was taken, and the amendment was lost.

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 7. That for and in consideration of the grant by the United States as provided for in this act the said grantee shall assign, free of cost to the United States, all roads and trails built under the provisions hereof; and further, after the expiration of five years from the passage of this act the grantee shall pay to the United States the sum of \$15,000 annually for a period of 10 years, beginning with the expiration of the five-year period before mentioned, and for the next 10 years following \$20,000 annually, and for the remainder of the term of the grant shall, unless otherwise provided by Congress, pay the sum of \$30.000 annually, said sums to be paid on the 1st day of July of each year. Said sums shall be kept in a separate fund by the United States to be applied to the building and maintenance of roads and trails and other improvements in the Yosemite National Park and other national parks in the State of California. The Secretary of the Interior shall designate the uses to be made of sums paid under the provisions of this section under the conditions specified herein.

Mr. Chairman, I offer the following amendment.

Mr. HELM. Mr. Chairman, I offer the following amendment. The Clerk read as follows:

Page 11, line 1, strike out all after the word "states" and all of lines 2, 3, 4, 5, 6, and all of line 7, down to and including the word "year" and insert in lieu thereof the following:
Annually on the 1st day of July each year 6 per cent of the gross amount received from leases, sales, or grants of water for irrigation from electric and other power plants operated by the grantee herein, from telephone and telegraph lines, railroads and other means of locomotion, transportation, and communication authorized by this act.

Mr. HELM. Mr. Chairman, it occurs to me that these rentals of \$15,000 after 5 years, \$20,000 annually after 10 years, and \$30,000 annually thereafter, are a very slight toll upon the income and earnings of this franchise.

The amendment I have offered is a better business proposition both from the viewpoint of the grantee and of the Government. If the income derived from the franchise from all its branches, its water power, its telephone, its telegraph, electric railroads. power plants of every description, anywise approximates the sum of money that I believe will be realized, then these sums are wholly inadequate. From the standpoint of the grantee, if these incomes do reach into larger figures or smaller figures, it occurs to me that a percentage of the income, be it large or be it small, is a safer business proposition than the one defined by the bill. We have had experience and observation enough to know that if the people behind this concern think that \$30,000 after a period of 10 years is a reasonable sum, the income from the operation of this enterprise is going to be an enormous one.

It strikes me as a more equitable arrangement to base the proceeds that the United States Government is to receive upon a percentage. The other feature of this section of the bill, while it is not covered by this amendment, I want you to bear this in mind, that whatever the Government does receive from this

enterprise is to be spent in the Yosemite National Park. The Government does not get anything out of it except incidentally in the upkeep of the parks, but it is practically spent in the territory adjacent to and a part of this enterprise. I submit this amendment for your thoughtful consideration.

Mr. TAYLOR of Colorado. Mr. Chairman, I feel we ought to say to the gentleman from Kentucky that we went into a careful consideration of this matter before the committee, and we had the regulations of the Interior Department, and we had those gentlemen there, and we decided that a percentage matter of this kind would involve bookkeeping and considerable detail matter, and we felt it was safer and better to fix some definite sum and then leave it subject to the right of Congress all the time to change it and also subject to the Secretary of the Interior to modify that right at any time.

Mr. HELM. Does the gentleman say that this amendment

involves some bookkeeping on the part of this concern?

Mr. TAYLOR of Colorado. On the part of the Government

to figure out the 6 per cent and-

Mr. HELM. Does the gentleman believe an enterprise of this kind is going to be run without some bookkeeping?

Mr. TAYLOR of Colorado. Well, it does not require very much bookkeeping to send a check for \$30,000 a year to the Government of the United States. That certainly does not require any at all.

Mr. HELM. This concern is going to have to keep books, else how will its business be run and how will they know what

their receipts are?

Mr. TAYLOR of Colorado. What does the gentleman mean y "this concern"?

Mr. HELM. This enterprise.

Mr. TAYLOR of Colorado. Of course the city is going to keep books of its own as well as sales to its own individual inhabitants. It ought not to have to keep a set of books to-

Mr. HELM. Are not they going to sell power to these other

municipalities?

Mr. TAYLOR of Colorado. Wait a minute—the city of San Francisco is going to divide this up among the other cities

around the bay.

Mr. HELM. They are going to charge something for it?

Mr. TAYLOR of Colorado. Surely they are going to charge

for it.

Mr. HELM. Does not that mean bookkeeping?

Mr. TAYLOR of Colorado. But why should the Government of the United States have some agent in all of these little towns to find out how much money they are going to get when the Government can get one lump sum of \$30,000 a year? 'We felt it was much more simple and on a sufficiently safe basis. On the gentleman's basis they would have to sell something like half a million dollars a year in order to get 6 per cent. We felt it was an unnecessary obligation, and the Government of the United States is satisfied with this sum, although we provided it could be changed, but it was looked upon as fair. The city of San Francisco is undertaking a great big proposition here. It is an enormous proposition to expend \$77,000,000, and we felt we ought not to ask them anything further. Government of the United States is not giving up anything, but the Government is getting a million dollars' worth of roads and getting \$30,000 a year. The Government is getting a good proposition by having 1,100 acres of swamp covered by a lake. That is all it amounts to, and the city of San Francisco and these enterprising people are doing the work and spending their money, and after paying this enormous royalty we figured it was better to fix it at this lump sum. I think it is much

Mr. HELM. May I interrupt the gentleman?

Mr. TAYLOR of Colorado. Yes. Mr. HELM. The people of San Francisco are going into this matter as a business proposition, and-

Mr. TAYLOR of Colorado. Oh, no. Mr. HELM. Then why do they pay the \$30,000?

Mr. TAYLOR of Colorado. It is a matter of necessity; they have got to get the water there to drink.

Mr. HELM. Is not the business going to be a profitable con-cern? If they did not anticipate an enormous profit from it, they would not pay the \$30,000 as a business proposition.

Mr. TAYLOR of Colorado. It is because this Congress takes them by the throat and makes them. That is the only reason on earth. Congress, as a matter of fact, has not got any right to impose these charges on the city of San Francisco.

San Francisco is trying to get water for its inhabitants to drink. There is not enough water in that city to-day to wash down the streets or irrigate the grass or even perform the washing of the city, and because they are in desperate circumstances and have to get water, we find these conservationists

here taking them by the throat and taking \$30,000 out of them to build roads, whereas they have allowed Seattle and other cities, without one dollar's expense, to go on the public domain and construct reservoirs and secure water. The city of Colorado Springs, in my own State, and of Boulder, in my own State, every city in the West, has constructed reservoirs on the public domain in order to get water, and sometimes some little incidental power, for the benefit of the inhabitants. Is not San Francisco, with the two and one-half millions of people there and around the bay, a part of this Government, and is that public domain any more sacred to you or to me than it is to Why have they not the right to get water without being handicapped and throttled here in this manner by imposing hardships upon them? I feel that we are compelling them to pay a very great royalty here, and I do object to its being more onerous and complicated with more bookkeeping and more supervision and more control over them all the time and making it more of a hardship for them to float their bonds and carry on this enterprise. Let us permit them to get their water, and even if they did not pay one dollar for it, the whole United States would be benefited. [Applause.]

Mr. HELM. After this is in operation, do you not provide

in this bill for the sale by this concern to irrigation projects?

Mr. TAYLOR of Colorado. No; they do not sell to irrigation projects. The irrigation projects own the flow of the stream now, and they have got to furnish on a silver platter, without a dollar practically, to those irrigation districts the water they

Mr. HELM. Is this provision in the bond for sale to munici-

palities an obligation that is now outstanding?

Mr. TAYLOR of Colorado. No; but this bill makes them assume that joint obligation, so San Francisco can not take this water and monopolize it and prevent Richmond, Alameda, and Oakland and those other bay cities from getting water.

Mr. HELM. And the income from that goes to whom?

Mr. TAYLOR of Colorado. To the people. Mr. HELM. To what people?

Mr. TAYLOR of Colorado. The inhabitants of the cities themselves

Mr. HELM. Who sells this water?

Mr. TAYLOR of Colorado. The cities sell it to their inhabitants.

Mr. HELM. To whom is this franchise given?

Mr. TAYLOR of Colorado. To the city of San Francisco in trust for the municipality and the bay municipalities.

Mr. HELM. Who makes these contracts for these other cities?

Mr. TAYLOR of Colorado. The city of San Francisco makes them with these other cities, and they make them under this law

Mr. HELM. Do you not anticipate that would be a source of

income to the city of San Francisco?

Mr. TAYLOR of Colorado. No; not one dollar of income, but actual cost. The other cities come right in. As a matter of fact, it says right here the grantee shall be considered to be those other cities as well as San Francisco. San Francisco does not make a dollar out of these other cities at all; and the gentleman from California [Mr. J. R. KNOWLAND], who represents Alameda and Oakland over there, is satisfied with this provision.

Mr. GRAY. Mr. Chairman, I desire to offer an amendment to the amendment. I want to read the amendment before I send

it up, and explain it.

The CHAIRMAN. The gentleman will please send his amendment to the Clerk's desk, and the Clerk will report the same.

The Clerk read as follows:

Strike out all of the amendment; striking out lines 1 to 7, inclusive, and inserting after the word "year," in line 7 of the bill, the following: "or the United States shall have the option of collecting," and add thereto all of the amendment.

Mr. GRAY. Now, Mr. Chairman, what I wanted to get up here was that we are granting very valuable rights for a long time.

Mr. TAYLOR of Colorado. We are not granting anything.

Mr. GRAY. I think that the Government ought not to be restricted to one remedy or right to share in the profits under this bill. It ought to have the option of either collecting the amount provided for in the bill as originally specified or of collecting the amount provided for in the gentleman's amendment. It might become material in the course of time should an effort be made to evade this law, and if it did become material the Government would have lost none of its remedies or rights to collect a share of these profits, but could pursue either to collect the rent. My amendment does not impair the provision of the bill as originally written, nor does it impair the

gentleman's amendment. It only adds to the bill an option for the benefit of the Government, so that it could pursue either

Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. GRAY. Yes; I will yield to the gentleman as a special

favor; not to anybody else, [Laughter.]
Mr. RAKER. That is very kind of the gentleman. gentleman is familiar with the fact that practically all the grants that have been made to cities and municipalities for water rights have been without any imposition of terms, so far as the cost is concerned. Is not that right?

Mr. GRAY. It might have been so in the past. I admit that very valuable grants have beeen given away-sometimes with

a bouquet or a bonus.

Mr. RAKER. I am talking now about a municipality. is a municipality. This is not a corporation or an individual. It is a grant to about 700,000 people, and within the next few years it will possibly be 3,000,000 people. It is for the purpose of controlling and conducting their own affairs.

The gentleman, I know, does not believe that the people of San Francisco, to whom this is granted, are going to fritter it away and not use it. Does not the gentleman think they ought to have the opportunity to get pure water and better

milk, because pure water makes better milk?

Mr. GRAY. Yes; I think so.

Mr. RAKER. And more water for washing, which makes for better health conditions, so that more people can have the benefit of a bath. That is a health condition, is it not?

Mr. GRAY. Yes; and I think it also improves the moral con-

dition to have a good bath. [Applause.]

The gentleman seems to be very candid about this matter, and yet, with a full knowledge of the people of San Francisco. knowing all their good qualities, he opposes the proposition of allowing the word "attempt" to go in the bill as a ground for forfeiture. I do not want to impugn the motives of the people of the city of San Francisco or the council of San Francisco, but there are some things which have come from San Francisco and its city council that so savor of graft and so many rumors of great prosecutions from there have scaled the Rockies eastward that I am particularly anxious to so safeguard this bill that it will never become the subject matter of such rumors. I grant for the purpose of argument that good water makes good milk. [Laughter.] You have my unqualified approval of that.

Mr. BARNHART. And it makes more milk, too. Mr. GRAY. Sure. I grant that, too. It would be very diffi-

cult to get milk from a famished cow.

Gentlemen, you see my time is going, and as I have no further suggestions myself, I will be glad to answer questions and will await your interrogatories until time is called on me. [Laughter.]

What is before the House? Mr. DIES.

The CHAIRMAN. An amendment offered by the gentleman from Kentucky [Mr. Helm] and a substitute therefor offered by the gentleman from Indiana [Mr. Gray].
Mr. DIES. I rose only, Mr. Chairman, for the purpose of

ascertaining what the parliamentary situation is.

The CHAIRMAN. An amendment was offered by the gentleman from Kentucky [Mr. Helm], and what the Chair understands is an amendment by way of a substitute was offered by the gentleman from Indiana [Mr. Gray].

Mr. FERRIS. Mr. Chairman, can we have a vote? Can we

not have a vote now?

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. GRAY] by way of substitute for the amendment offered by the gentleman from Kentucky [Mr. Helm].

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Kentucky [Mr. HELM].

The question was taken, and the amendment was rejected. Mr. MURRAY of Oklahoma. Mr. Chairman, I offer an amend-

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

The Clerk read as follows:

Amend, page 10, line 23, by inserting after the word "trails" the words "railroads, electric or interurban roads, and all telegraph and telephone lines."

Mr. MURRAY of Oklahoma. Then it will read;

The said grantees shall assign, free of cost to the United States, all roads and trails, railroads, electric or interurban roads, and all telegraph and telephone lines built under the provisions hereof.

Mr. FERRIS. Mr. Chairman, let us have a vote. The amendment was rejected.

Mr. MANN. I move to amend by striking out, on page 11, all after the word "year," in line 7, down to the end of the section, and I ask to have reported the language which I propose to have stricken out.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 11, by striking out after the word "year," in line 7, the words:

"Said sums shall be kept in a separate fund by the United States, to be applied to the building and maintenance of roads and trails and other improvements in the Yosemite National Park and other national parks in the State of California. The Secretary of the Interior shall designate the uses to be made of sums paid under the provisions of this section under the conditions specified herein."

Mr. MANN. Mr. Chairman, I do not intend to detain the committee long. I think this is the first time, except in the irrigation act, that I have ever heard of anyone proposing that uron the disposition of a part of the public domain at a special place the money received shall be reserved for other purposes within

the limits of the State.

The opposition to this bill is on the ground that it takes away from us a place of great natural beauty which ought to be pre-served for the benefit of the citizens of the United States. If we grant to the city of San Francisco and the adjoining municipalities the authority to destroy this place of scenic beauty and to utilize power which comes from the transportation of the water, why should we say that the money we exact shall all be spent in California? What rights has California in this matter over the rest of the country, so far as the grant that we make is concerned? We are granting a national right, a right owned by the people of the entire United States. If we exact some exchange for that right in the way of a yearly payment, why shall we say that this money shall all be spent in the State of California? Possibly the original provision was that this money should be spent in the Yosemite Park. I do not know. I would not be willing to agree to that fully. But what reason is there for expending any portion of this yearly receipt in other parks of California which reason does not apply to parks in Nevada, that are much nearer, or parks in other States that are probably nearer. It is an exceedingly bad precedent to make. If we grant the use of water power or the making of water power, as is proposed by this bill, any money that we exact for it ought to be paid into the National Treasury, subject to disposition by

Mr. DIES. I should like to know if my friend from Illinois

is in favor of or against this bill?

Mr. MANN. I am in favor of the bill. Does that help the

gentleman out any?

Mr. DIES. In view of the gentleman's suggestion, I make

the point of no quorum present.

Mr. FERRIS. I hope the gentleman will not do that. majority leader [Mr. UNDERWOOD] has explained to us that the deficiency bill will come in next week. think the gentlemen will recall that this bill has been a continuing order for a long time, and that we have deferred its consideration from day to day on account of the caucus and have yielded to the convenience of the caucus and of almost every one and have got out of the way for everything. I hope the gentleman will let us run a little longer.

Mr. STEENERSON. I think we ought not to work any

longer to-day. It is after 5 o'clock.

Mr. DIES. Let me ask the gentleman from Illinois about

how long does he expect to continue the debate?

Mr. MANN. Not very long, so far as I am concerned. I have finished what I have to say. I think we ought to finish the bill if we can.

Mr. FERRIS. I hope the gentleman from Texas will with-

Mr. DIES. I withdraw the point.

Mr. FERRIS. If I understood the amendment of the gentleman from Illinois [Mr. MANN], it was that the money received in this way shall be taken and put into the Federal Treasury rather than expended in the State of California. I think that is a fair statement of the case, is it not?

Mr. MANN. That would be the effect of it-to be spent

wherever Congress may direct.

Mr. FERRIS. The proposition is not a new one. The money from a State, gleaned as a royalty or a direct tax from the revenue produced there, ought to be expended for the Federal Government, but it ought to be expended out there. The Federal Government has not gone into the proposition of direct taxes yet, and it ought not to do it in this instance. We derive our national revenue at our ports of entry, from the collection of customs dues, and when the Federal Government goes out and begins to tax the State of California for the purposes of the

Treasury, for a nonnavigable stream, and for the collection of the snow and surplus waters that fall in the mountains, that is more than the gentleman from Illinois or anybody else ought to ask.

I do not think the money ought to be turned over to California, but I think it ought to be spent in the parks as provided in the bill. There is a great clamor for their improvement. It will help California, it will help the Nation to improve these playgrounds.

Mr. MANN. If we have no right to collect the money we ought not to collect it. If we have the right to collect it it

belongs to the people of the United States.

Mr. FERRIS. The gentleman knows that there is a close question connected with that that has been debated all over the country, and many good and strong lawyers and many good men are on both sides of the question. My idea is that if they improve the parks it improves the Nation and its resources.

Mr. COX. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. COX. If I remember correctly, under the forest reservation act, we take a certain per cent, I think originally 10 per cent but now 25 per cent, and pay it back into the State in which the reservation is situated to be used on highways and roads.

Mr. FERRIS. That is true, but we turn it over and appro-

priate out of the Treasury more than we ever collect.

Mr. COX. Why, then, does the gentleman propose to go so

much further in this case than what we do in the case of the forest reserves? Here you propose to pay it all back, not in this particular park but in other parks also.

Mr. FERRIS. I will say that the gentleman knows there are many people who want the parks improved; many nature lovers in the country want the parks built up. This would be a means to an end to satisfy them. It would help both State and Nation. It is a good solution of the question.

Mr. COX. The obligation is still on Congress to maintain

these parks.

Mr. FERRIS. But if they get revenue enough to do it it will lessen the burdens on Congress. There are many both within and without this House that deny the Federal Government has the right to collect direct taxes or royalties. I do not think it necessary to go into that question here in all its

ramifications. We have a solution of the question in this bill that suits all sides and all views.

Mr. KAHN. Mr. Chairman, I would like to call the attention of the committee to the fact that the Congress of the United States yearly appropriates for the maintenance of the Yosemite National Park, in California, not less than \$50,000. It appropriates annually for the maintenance of the General Grant National Park, in California, \$2,000 or \$3,000. It appropriates for the maintenance and care of Sequoia National Park, in the State of California, several thousand dollars a year. These parks are all playgrounds and pleasure resorts for the people of the United States. Now, under the terms of this bill the amount San Francisco will be called upon to pay per annum ranges from \$10,000 to \$30,000, that under the terms of this bill is to be expended in California on these parks. It will simply mean that the appropriations carried in the sundry civil bill will be lower to that extent. We have heard much to-day upon this floor about the desire of the people of the United States to visit these wonderful scenic resorts. It will take many years and large sums to build roads and trails through these mountain fastnesses. The amounts carried in the sundry civil bill for the maintenance and improvement of these parks is given grudgingly. The parks do not belong to the State of California. They belong to the United States and the people of the United States. The money San Francisco will have to pay will not be expended for the people of California, but for all the people of the United States. The Yosemite National Park alone covers an area of 1,124 square miles. Roads, trails, bridges, shelter, and safety stations ought to be built and improved, and all the money available under this bill ought to be used for that purpose.

Mr. COX. Mr. Chairman, I want to say a word in support of the amendment of the gentleman from Illinois. I regard it as a very important amendment. I can not subscribe to the doctrine that after voting this franchise to San Francisco, practically a million of people, for the mere nominal sum of \$30,000 a year, we should give them the whole of that amount. lieve as we are giving them a valuable franchise, giving away the franchise that belongs to all the people of this country, that whatever revenue is derived from that franchise the people ought to have back in return. The only way to get the money back is to have it put in the Treasury of the United States.

As the gentleman from Illinois has well said, let Congress I am not in favor of the provision in that bill. It did not strike me favorably when I first read it. I do believe it will give better satisfaction if the amendment obtains. I doubt whether the argument of the gentleman from California [Mr. KAHN] will ever come true. In other words, in my judgment, Congress will continue to go on year after year appropriating \$50,000 for the Yosemite Park, notwithstanding this measure proposes to give them \$30,000 a year revenue derived from this bill for the upkeep. There will be some reason presented to Congress to induce it to keep up the appropriation of \$50,000 a year, and we will never get credit for the \$30,000. It will always be an addition. Instead of being \$30,000 less, we will be asked, in effect, to appropriate \$80,000 to maintain it. The amendment of the gentleman from Illinois ought to carry, and I am going to vote for it.

Mr. MONDELL. Mr. Chairman, I rise to agree with the soundness and logic of the argument made by the gentleman from Illinois in support of his amendment, but to oppose the amend-

Mr. MANN. That is certainly logical.

Mr. MONDELL. The gentleman from Illinois is logical in his conclusion. There is no justification for the provision he seeks to strike out; none whatever. If the city of San Francisco is called upon to pay \$30,000 a year, that payment is on behalf of all the people of the United States by reason of the fact that all the people of the United States are granting to the city and county of San Francisco something said to be very valuable.

Why, putting it another way, reducing very largely the value of this property to the people of the United States. The trouble is that this entire charge is illogical and rests on no possible foundation. If it is proper to allow the city and county of San Francisco to impound the waters of the Tuolumne in the Hetch Hetchy Valley for the use of the people in the bay cities, there is no rhyme or reason in making any charge whatever for the beneficial use of that valley. It does not reduce its value to the balance of the people of the country at all, and if we were actually taking a thing of value we ought to call upon San Francisco to pay for it here and now and have the account settled. is a charge that San Francisco ought to be called upon to meet. and that is the cost of sanitation, the cost of superintendence, the cost of policing this watershed, and beyond that the people of this country have no claim whatever upon these good people because it so happens that the mountain tops on which their water supply falls happens to be within a forest reservation and within a national park. The rains of heaven will fall upon the high peaks and rugged cliffs just as plenteously after this grant is made as they do now and as they have in days past, and the valley of the Hetch Hetchy, instead of being a dry and barren and inaccessible chasm of the mountains, will be a beautiful lake accessible to all the world. And there is no logic in making the charge of \$30,000 a year for this useful purpose for this grant, not to an individual or a small aggregation of individuals, but to two and one-half millions of American people who are going to use these waters for the highest and best purposes for which water can be used. The trouble is that your charge does not rest on any logical or equitable basis. If it is to be made, then the payment should be to all of the people and it should go to the Treasury of the United States,

and not for the benefit of a part of the people.

Mr. RAKER. Mr. Chairman, I desire to say just a few words.

I know it is getting late, but I believe that the attention of members of the committee ought to be called to a feature of the bill with respect to this particular item. Now, you are well aware that there are many having different views as to what is beautiful and what is not, but you go down to the funda-mental basis upon which this bill is drafted and you find that it is a grant upon conditions. A grantee may fix the condition that he desires to that grant, just like a private individual. The books are full of conditions placed upon grants almost similar to this. In the Western States, where you grant a man the right of way across your land to bring a ditch or to divert water from a stream, which he could not do even under the right of eminent domain, you can say, "When you cross my land with your ditch I have no right to the water, but I have a right to the land, and when you cross my land I can put conditions upon you"--just like are placed upon the city and county of San Francisco in this grant. Now, that being the case, to go back to the question of a grant upon conditions by the Government, the United States has clearly and undoubtedly a right to place a condition as the absolute owner of the property and the right to dispose of it by its Congress, and Congress is the grantee here representing the National Government. Now, having invaded the park and taken from there in the neighborhood of

3,000 acres of land for the purpose of reservoirs and some right of way from the reservoir down through the foothills to the valley, it seems to me when you talk about giving the money that is to be paid by the city and county of San Francisco to all the people, that the very fact of placing this money, this \$15,000, \$20,000, and \$30,000, respectively, as provided in this bill, in a separate fund, you say that it must be appropriated and used. For what? For the remainder of the land that the Government owns. For the purpose of bettering its conditions; for the purpose of building more roads through that wonderland that the people may see. I desire to call to the attention of gentlemen that for years and years we have been struggling to get reasonable appropriations before the Congress for the purpose of going into the Yosemite Park. Do you know that after you allowed a railroad to come within 15 miles of the entrance of the park that there had to be built 41 miles of road at an expense of \$80,000?

And we are running over that road to-day. The Department of the Interior has been every year asking for two hundred thousand to three hundred thousand dollars of appropriation to build the road so that they could get into Yosemite Valley, and they have not been able to get it.

Mr. DIES. Did my friend from California vote for free lum-

ber in the interest of conservation?

Mr. RAKER. Surely, I did. It is all right. But this is con-servation of the highest character. There is a road that comes from the southern part into the Yosemite Valley that you can hardly get over with a wagon. On the road coming from Stock-ton you are not permitted to go in there with an automobile, because of the danger to life and property in going down over the hill. And therefore the people of this Government are prevented from going onto their own property, just as a man might be prevented from going into his own park because of a holdup. That is the position we are in. We say to the people of the United States, to the Members of Congress, if you desire to open this park so that everybody can get in, not the people of San Francisco

The CHAIRMAN. The time of the gentleman from California

[Mr. RAKER] has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent for two minutes more, and then I will be through.

Mr. DIES. Mr. Chairman

Mr. RAKER. I will yield now, so we can vote on the ques-

Mr. Chairman, I do not want to interfere with my friend's desire, but there is this I do want to say: I am awfully glad my friends from California and elsewhere are getting tired of this conservation hobby, because, Mr. Chairman, I think it is one of the delusions of the age in which we My friend here voted for free lumber, some of my other conservation friends voted for free lumber, and yet lumber is the one staple commodity in this country that has not advanced in value in the last 10 years. Oats, wheat, corn, cattle, all of the things that make life in our country, have advanced in value, while lumber has not. And yet, in the interests of con-

servation, they voted for free lumber.

Mr. DAVENPORT. Mr. Chairman—

The CHAIRMAN. Will the gentleman from Texas yield to the gentleman from Oklahoma?

Mr. DIES. For a question only, and that a very brief one.
Mr. DAVENPORT. I want to ask the gentleman whether or
not I understood him clearly when he said that lumber had not
advanced in price in the last 10 years?

My friend did understand me clearly. Mr. DIES. is one of the staple products in this country that has not advanced in the last decade, and every other article of commerce in this country has advanced. Oh, the gentleman may titter. I only speak of the report of the Department of Commerce and Labor. The fact is that all of this howl has been made by gentlemen from the West that the resources of our Republic were being devoured, and the fact is that wheat has advanced more than lumber. Who doubts that? Corn has advanced more than lumber. Who gainsays that? advanced more than lumber. And who doubts that? Pork has

Will the gentleman yield for a question? Mr. DONOVAN.

Mr. DIES. Yes.

Mr. DONOVAN. This is the question: How does that affect the price that these Californians will pay for this grant?

Mr. DIES. Oh, my friend is always more or less at a tangent. Sometimes he is at a right-angled triangle and sometimes a direct triangle, but he is always wrong.

Mr. Chairman, what I want to say is this. The whole Pinchot doctrine is wrong. [Applause.] The forests of this country, the reservations of this country, are as safe as all the mines and the resources of this country. You know we will have a

better chance to reproduce our pine and oak and elm trees than we will have to preserve our soil and its fertility in this country.

I only rise, Mr. Chairman, to call the attention of those gentlemen who were so vociferous for free lumber in the Sixtyfirst and Sixty-second Congresses to the fact that they had better conserve the resources of the country in the matter of wheat, oats, and corn, and mules, than in the matter of trees in this country. But I sympathize with my friends in California who want to take a part of the public domain now, notwithstanding all their declamations for conservation of resources. I am willing to let them have it. I am willing to let them have it when they take it in California and San Francisco for the public good.

That is what the great resources of this country are for. They are for the American people. I want them to open the coal mines in Alaska. I want them to open the reservations in this country. I am not for reservations and parks. I would have the great timber and mineral and coal resources of this country opened to the people, and I only want to say, Mr. Chairman, that your Pinchots and your conservationists generally are theorists who are not, in my humble judgment, making a propaganda in the interest of the American people.

Let California have it, and let Alaska open her coal mines.

God Almighty has located the resources of this country in such a form as that His children will not use them in disproportion. and your Pinchots will not be able to controvert and circumvent the laws of God Almighty. [Applause and cries of "Vote!"

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. MANN].

The question was taken, and the Chairman announced that the "noes" have it. have it.

Mr. MANN. Mr. Chairman, I ask for a division.

The committee divided; and there were-ayes 5, noes 34.

So the amendment was rejected.

Mr. DIES. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Texas [Mr. Dies] makes the point of order that there is no quorum present. The Chair will count.

Mr. RAKER. Mr. Chairman-

The CHAIRMAN. For what purpose does the gentleman

Mr. RAKER. I believe that after we have disposed of this section we can agree to adjourn.

The CHAIRMAN (after counting). Sixty-eight gentlemen are present-not a quorum.

Mr. FERRIS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker pro tempore [Mr. Hay] having resumed the chair, Mr. Foster, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, and had come to no resolution thereon.

# ADJOURNMENT UNTIL TUESDAY NEXT.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on

The SPEAKER pro tempore. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that when the House adjourns to-day it adjourn to meet on Tuesday next. Is there objection? [After a pause.] The Chair hears none, and it is so

### LEAVE OF ABSENCE.

Mr. Merritt, by unanimous consent, at the request of Mr. PAYNE, was granted leave of absence indefinitely, on account of illness.

# EXTENSION OF REMARKS.

Mr. HINDS. Mr. Speaker, may I ask leave to extend my remarks in the RECORD?

The SPEAKER pro tempore. The gentleman from Maine [Mr. Hinds] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection. Mr. JOHNSON of Washington: Mr. Speaker, I would like to make the same request.

The SPEAKER pro tempore. The gentleman from Washington [Mr. Johnson] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. AUSTIN. Mr. Speaker, I desire unanimous consent to extend my remarks in the Record by publishing an interesting and able editorial which appeared in the New York Times of August 11, 1913, the subject being "Combinations in restraint of trade.'

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee [Mr. Austin]? There was no objection.

### ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 37 minutes p. m.) the House adjourned, pursuant to the order previously made, until Tuesday, September 2, 1913, at 12 o'clock

# PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and me-

morials were introduced and severally referred as follows:

By Mr. MORGAN of Louisiana: A bill (H. R. 7873) to establish an agricultural experiment station, etc., at Donaldsonville, Ascension Parish, La.; to the Committee on Agriculture. By Mr. SPARKMAN: A bill (H. R. 7874) to provide for a

site and public building at Tarpon Springs, Fla.; to the Committee on Public Buildings and Grounds.

By Mr. HARDWICK: A bill (H. R. 7875) to increase the limit of cost of the public building at Augusta, Ga.; to the Committee on Public Buildings and Grounds.

By Mr. HINDS: A bill (H. R. 7876) to define the standing of officers of the Coast Survey during the late Civil War; to the Committee on Naval Affairs.

By Mr. ESCH: Joint resolution (H. J. Res. 125) authorizing the President to appoint delegates to attend the Seventh International Congress of the World's Purity Federation to be held in the city of Minneapolis, State of Minnesota, November 7 to 12, 1913; to the Committee on Foreign Affairs. By Mr. LINTHICUM: Resolution (H. Res. 239) requesting

the President to direct the Attorney General to furnish information respecting the intercorporate relations of certain railroad and transportation companies, and to advise whether or not proceedings have been begun under the act of July 2, 1890, to dissolve the relations of said companies; to the Committee on the Judiciary.

# PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DAVENPORT: A bill (H. R. 7877) granting a pension to William J. Harding; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7878) granting a pension to Downey Milburne; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 7879) granting a pension to Mille Gaines; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7880) granting an increase of pension to Reuben J. Harper; to the Committee on Invalid Pensions. Also, a bill (H. R. 7881) granting an increase of pension to

Jacob L. Detrich; to the Committee on Invalid Pensions. Also, a bill (H. R. 7882) granting an increase of pension to

Theresa L. Breese; to the Committee on Invalid Pensions. By Mr. HINDS: A bill (H. R. 7883) granting a pension to

Addison Buck; to the Committee on Invalid Pensions.

By Mr. J. R. KNOWLAND: A bill (H. R. 7884) for the relief of Edward R. Wilson, jr.; to the Committee on Claims. By Mr. LANGHAM: A bill (H. R. 7885) granting an increase

of pension to Isaac Beck; to the Committee on Invalid Pensions. Also, a bill (H. R. 7886) granting an increase of pension to W. P. Altman; to the Committee on Invalid Pensions

Also, a bill (H. R. 7887) granting an increase of pension to Harvey Haugh; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7888) granting an increase of pension to

John Travis Mathews; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 7889) granting an increase of pension to Rosalia Spohr; to the Committee on Pensions.
By Mr. RUBEY: A bill (H. R. 7890) granting a pension to

Frances W. Whitaker; to the Committee on Invalid Pensions.
Also, a bill (H. R. 7891) for the relief of Michael Feeler; to the Committee on Military Affairs.

By Mr. SPARKMAN: A bill (H. R. 7892) granting an increase of pension to James Robins; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 7893) for the relief of Francis H. Connelly; to the Committee on Military Affairs.

# PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ESCH: Petition of the Wisconsin State Federation of Labor, Milwaukee, Wis., protesting against the passage of the workmen's compensation bill (S. 959); to the Committee on

the Judiciary. Also, petition of Chamber of Commerce of the city of Milwaukee, Wis., favoring the passage of legislation for an immediate reform in the national banking system of the United States; to the Committee on Banking and Currency.

Also, petition of the Traffic Club of New York, New York, Y., favoring the passage of legislation making an appropriation for the maintenance of the Commerce Court; to the Committee on Interstate and Foreign Commerce.

By Mr. LINDQUIST: Petition of citizens of the eleventh congressional district of Michigan favoring the passage of House bill 5308, compelling concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. LOBECK: Petition of Overland Lodge, No. 5, Switchmen's Union of North America, Omaha, Nebr., protesting against the passage of the employees' compensation act (S. 959); to the Committee on the Judiciary.

Also, petition of the Democratic central committee of Cuming County, Nebr., protesting against the passage of the proposed legislation known as the Glass-Owen bill; to the Committee on Banking and Currency.

# SENATE.

# Monday, September 1, 1913.

The Senate met at 11 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Almighty God, we begin the labor of another day with the ancient and blessed custom of lifting our hearts to Thee for Thy blessing. Especially remember this day, recognized by our Government, the great army of workers in this country. We pray that Thy blessing may rest upon those men in field and mine and shop who by their skill and labor create the values of our great national wealth. We pray that they may feel the dignity of labor, not only because of the value that it brings to us in this life, but because it allies them with God and being country. this life, but because it allies them with God, and being coworkers together with God, may they work out the destiny for them-selves and for our great Nation. Grant that with a sympathetic regard for those who work in the discharge of the duties of this day in this honorable Senate they may receive the thanks of the people and the blessing of God. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of Saturday last, when, on request of Mr. Smoot and by unanimous consent, the further reading was dispensed with, and the Journal was approved.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRISTOW:

A bill (S. 3067) granting an increase of pension to Tillman H. Snyder; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 3068) to cause certain lands to revert to the State of Oregon; to the Committee on Public Lands.

# AFFAIRS IN MEXICO.

Mr. SHEPPARD. I present a communication addressed to me from Elizabeth Chandler Hendrix, being a report of her personal experiences and observations in Mexico. I ask that the communication may be printed in the RECORD and referred to the Committee on Foreign Relations.

Mr. SMOOT. I did not hear the request of the Senator from

Mr. SHEPPARD. I asked that a communication addressed to me may be printed in the RECORD.

Mr. SMOOT. Very well.

There being no objection, the paper was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Hon. Morris Sheppard, United States Senator from Texas.

the Record, as follows:

Hon, Morris Sheppard,

United States Senator from Texas.

Sir: According to your request, I, have the bonor to submit this report of my personal experiences and observations in Mexico. The only claim which can be advanced for its special consideration is the fact that it comes from one who does not own an acre of land or any other property in the Republic, and who is not now and never has been in the pay of any individual or organization remotely interested in the outcome. For that reason it may be expected to be fairly free from personal bias. For the same reason no one is responsible for any of these utterances except the person whose name is affixed hereto. Also by request, I offer the following personal introduction and explanation of my knowledge of Mexican affairs:

I am a native of Wytheville, Va., daughter of William J. Davis, deceased, and up to recent years my home was in that State. I have one brother, who is a practicing attorney at Bristol, Tenn, James L. Davis, of the firm of Davis & Warren, and another brother, Capt. W. R. Davis, of the firm of Davis & Warren, and another brother, Capt. W. R. Davis, of the firm of Davis & Warren, and another brother, I family connections. As further reference I mention the name of Mr., John D. Campbell, vice president of the Commercial National Bank of El Paso, Tex., whom I have known continuously since my residence in the West.

About seven years ago I went to El Paso and was employed on a local newspaper, doing some work at intervals for eastern magazines. In the meantime I invested the remannts of a small estate in Texns lands so advantageously that within a short time I was able to dispense with a salary and devote myself to whatever form of activity best suited me. Mexico having been to me always the most interesting country on earth, I have spent the past few years almost exclusively studying the history and resources of the nation and the character and life of the people.

Shortly after the publication of the sensational "Barbarous

novia, while the lower class is typified by a blanketed beggar who toils not, neither does he spin, but spends his entire lifetime crouched in the shadow of an adobe wall, with an unwashed hand outstretched for alms.

Now, the truth is there are a number of people in Mexico who habitually manicure their nails and wear dress clothes to dinner and who can converse intelligently in several languages. There are cultured homes, exclusive clubs, and the nucleus of a national life quite apart from that which is visible on the market place and in the streets. It is composed of people of as much ability, courage, pride, and patriotism as is to be found in any nation, and when the true story of their struggle for freedom shall be written it will be found that they are capable of as high acts of heroism as has ever been inscribed on the pages of any history.

The United States appears to have two means of securing information about Mexico, one is from consular representatives, and the other is from fleeing refugees. The consulates are located in cities or large towns, widely separated and covering large areas of country. There being practically no mail or telegraphic communication between the consular headquariers and the outlying portions of the district, and the Government maintaining no independent scout system whereby reliable information can be secured, the consular reports must of necessity consist of statements made by Mexican residents in that immediate vicinity, who are either indifferent to the accuracy of the information furnished or directly interested in making it misleading.

As to the information turnished by refugees, a man fleeing from real or imaginary danger is rarely in condition to give a clear and reliable report of what has happened to him, and owing to the absence of uniform, it is impossible to say with certainty whether the depredations reported were committed by soldiers or bandits.

In the beginning of the Diaz régime there were but two classes in Mexico a new generation of fairly intelligent m

constitutionalist forces, extending from the period of Mr. Madero's occupation of the city of Juarez down to date, I have never heard one man utter a disparaging remark about another, and have never seen or heard the slightest signs cf insubordination.

On the 3d day of June, this year, the constitutionalist army under Gen. Lucio Bianco defeated the Federals at Matamoros, in the State of Tamaulipas, and took possession of that city. Within a few days thereafter I returned and took up my residence at the mission house of the Presbyterian Church, located on the main plaza, where I remained until August 17. There were in the city at that time about 2,000 troops, undisciplined as we count military discipline; there were also numerous unguarded cantinas well stocked with tequila, and according to accepted ideas most any kind of outlawry might have been expected. I saw only one drunken man during my stay there, and never witnessed or heard reports of the slightest disorder. There was no evidence of the wanton destruction of property or the confiscation of anything except such supplies as were necessary for the maintenance of the army.

Shortly after the capture of Matamoros Gen. Blanco summoned the troops before him and delivered an impressive address. After congratulating them on their victory and commending them for bravery he concluded somewhat on this wise: "While we have accomplished this great victory we do not know what defeats may be before us. Undoubtedly there will be many hard-fought battles before we shall have won our freedom. There remains yet much hardship for all and death for some. Sometimes I shall have mone, If there is a man here who does not want to face it, he can take his horse and his side arms and cnough money to provide him with food for the journey and go back to his own people." It is needless to say that not a man left, and those men would go forth to death cheerfully for their idolized leader.

Birg, Gen. Lucio Blanco, Jefe de las Armas of Nuevo Leon and

go back to his own people. It is needless to say that not a man left, and those men would go forth to death cheerfully for their idolized leader.

Brig. Gen. Lucio Blanco, Jefe de las Armas of Nuevo Leon and Tamaulipas, is a fair type of the constitutionalist leader. He is young, not over 35 years old, dignified, yet withal affable, with the appearance and address of a soldier and a gentleman. Associated with him as staff officers is a coterie of the most remarkable young men I have ever met. They are all of wealthy families, for the most part educated in the United States, with a few years of foreign travel. They could betake themselves and their possessions, after the accepted method of many wealthy Mexicans, to some foreign country and live in ease and luxury. Instead of that they are spending their lives and their property in the service of their ignorant and oppressed countrymen, whom they are popularly supposed to despise. In mingling with them one hears no stories of hardship, no boasting of what they have done or expect to do, but one gets the impression that they consider the privilege of sacrifice a badge of honor, and like all badges of honor, to be borne modestly and silently.

A short time ago I endeavored to get some information from a young colonel fu Gen. Blanco's command about his experiences in an American prison from which he had been recently liberated after serving a 40-day sentence on charge of violation of the neutrality laws. He was wrethedly emaciated and had evidently suffered great hardship. This young man said to me with an apologetic smile: "The cause of the whole trouble is that your people do not know us. If they did, everything would be different. We have had a better chance to know the people of the United States than they have to know us. We have learned much from them, we owe much to them, and we believe them to be our best friends. In time they will understand us better and will respect us for wanting to achieve our liberty for ourselves. We are men. We have pride as other me

price."

These are the men who during the annual festival in honor of their patriot, Juarez, marched in a body to the American consulate and in the presence of this representative of the American Government, gave public expression to their gratitude for the example which the United States has set for the world, and for the inspiration which it furnishes in their own struggle for free government. They then marched—thousands strong—to the banks of the Rio Grande and with faces uplifted to the sky, so fair over free America, so pitless over enslaved Mexico, they sang the national hymns of the two Republics.

ELIZABETH CHANDLER HENDRIX.

## PROPOSED CURRENCY LEGISLATION.

Mr. OWEN. I ask unanimous consent to have printed in the RECORD a letter answering the suggestion printed in one of the New York papers to the effect that the Committee on Banking and Currency have not afforded any opportunity to the bankers of the country to be heard. I do not think it is worth while to have the letter read, but I should like to have it appear in the RECORD, if there is no objection.

The VICE PRESIDENT. In the absence of objection, it will

be so ordered.

The matter referred to is as follows:

UNITED STATES SENATE, COMMITTEE ON BANKING AND CURRENCY, September 1, 1913.

MARSHALL FIELD & CO., Mr. James Simpson, Vice President, Chicago, III.

DEAR SIR: My attention has been called to your telegram of August to a leading New York paper, in which you express the following

29 to a leading New York paper, in which you express the following opinion:

"We think fullest exchange of opinion between framers of currency bill and bankers absolutely necessary in order to avoid mistakes."

Your telegram was an answer to a telegram sent broadcast Sunday, Angust 24, by this New York paper, to the following effect:

"Cooperation appears to be lacking between the framers of the administration currency bill and the bankers of the country. Do you feel that the best interests of the business men of the country would be served by a free exchange of opinions between the framers of the bill and representative bankers? The New York —— would appreciate a short statement from you by telegraph upon a matter which is of vital interest to all."

[Four days previously to this publication the Committee on Banking and Currency had invited these bankers to be heard before the committee, and they had had four previous hearings by the framers of the bill.]

The replies to this dispatch are published from many prominent people from one end of the country to the other—Minnesota, Texas, Tennessee, Ohlo, Wisconsin, Colorado, Indiana, Utah, lowa, Nebraska, etc.—showing that this misleading inquiry was sent broadcast throughout the United States, and, whether intended to do so or not, conveyed the impression that the framers of the currency bill had denied a free exchange of opinions with the bankers of the country. This suggestion is utterly untrue, because, as stated, they had been heard four times and their views were printed for committee use. Such a suggestion, moreover, would excite hostility against the pending measure, on the ground that it was drawn without consultation and without knowledge. Those drawing this measure have had the most abundant means of knowledge. Congress discussed the question of currency reform very deliberately and at great length immediately after the disastrous panic of 1907 in passing the so-called Vreeland-Aldrich bill. The present chairman of the Senate Committee on Banking and Currency, who had previously to that time given the matter great attention, delivered a speech of three hours on the floor of the Senate discussing this question. This speech received the widespread approval of the press of the United States.

Congress, in passing the Vreeland-Aldrich bill, provided for the National Monetary Committee of the press of the press of the congress, in passing the Vreeland-Aldrich bill, provided for the National Monetary Committee of the press of th

previously to that time given the matter great attention, delivered a previously to that time given the matter great attention, delivered a low. This specifies, and the floor of the Senate discussing this question. This specifies have been decided to the press of the United States.

Congress, in passing the Vreeland-Aldrich bill, provided for the National Monetary Commission and appropriated a large amount of money to enable an exhaustive study to be made of this great problem, and hundreds of thousands of dollars were expended for the employment of experts and over 30 volumes of reports were printed, beginning in 1910 and extending up to 1912, giving an elaborate description of the banking system in the British Empire, in France, in Germany, in Belgium, in Sweden in Switzerland, in Scotland, in Canada, in Iraly, an Russia. It is a support of the control of the state of the st

After the preliminary draft was actually prepared for submission to Congress and before being submitted, the present chairman of the Committee on Banking and Currency of the United States Senate spent seven hours with Mr. Paul Warburg, regarded as one of the ablest representatives of those banking interests and their greatest expert on the question of bank currency. The present chairman also spent over 10 hours consecutively in conference with the representatives of the American Bankers' Association, discussing the details of this bill, and has been in constant communication with bankers from all over the country as well as with leading experts on banking.

After the bill was introduced in both Houses a further and third.

as well as with leading experts on banking.

After the bill was introduced in both Houses a further and third hearing was accorded to the representatives of the American Bankers' Association by the chairmen of the Committees on Banking and Currency of the House and Senate, also by the Secretary of the Treasury, and also by the President of the United States. In addition, the chairman of the Committee on Banking and Currency of the Senate called for the opinions of over 500 bankers on the pending bill and on the principles involved in it, and 50,000 copies of the bill were sent out for inspection and report. The Committee on Banking and Currency of the Senate has published for its use a volume of such opinions. They have at their disposal a special library on this question of over 2,000 volumes.

The propaganda now being carried on, led by the National City Bank of New York, which has circularized the country against the bill, is obviously intended to discredit the administration and to make it

appear that the bankers have not been consulted and that the committee is not well informed. This misrepresentation has the effect of poisoning the public mind and misleading public opinion. Such misrepresentation will thus promote a private interest against the public interest. It is an open secret that these great concerns, like Morgan & Co., have publicity agents, to whom they pay very large salaries and who are able to create fictitious and false public opinion unduly favorable to the contentions of these great financial companies.

The business men of the country need have no fear that their Representatives and Senators in Congress will act unadvisedly. The representatives and Senators in Congress will act unadvisedly. The representatives of the big banks of the country have been given the most abundant opportunity to be heard; and after they had their Chicago meeting and presented anew their old contentions and requested further hearings, this opportunity was immediately afforded them by telegraph, and the hearings set for 2 o'clock Tuesday, September 2.

I deem it my duty to advise you that you are being misled by an artificial propaganda conducted in behalf of private interests, which does not hesitate to convey to the country the false suggestion that the administration is proceeding without adequate knowledge or without giving a hearing to the bankers of the country.

The rank and file of the bankers of the country constitute one of the greatest, most important, and most valuable parts of our national commercial machinery. They have been of great value in promoting every kind of enterprise, and one of the most useful features of the proposed public-utility banks—the so-called Federal reserve banks—will be to give stability, peace of mind, and greater opportunity to the bankers of the country to render patriotic service.

It is not surprising that a few men, having an enormous control of credits of the country to render patriotic service.

It is not surprising that a few men, having an enormous control

# IMPORTATIONS IN AMERICAN VESSELS.

Mr. JONES. Mr. President, something over a week ago the Senate passed a resolution calling on the State Department for copies of protests or correspondence which may have been received from foreign countries with reference to the provision in the tariff bill proposing a discount of 5 per cent in duties on goods imported in American ships. I have endeavored to keep track of the matter so as to know whether any report has come in, but I have not learned of any report. I desire to inquire whether such a report has been made?

The VICE PRESIDENT. No report has come to the hands of

the Vice President.

The morning business is closed.

### THE TARIFF.

Mr. SIMMONS. I ask unanimous consent that the Senate

proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. CLARKE of Arkansas rose.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

	77-111-	0	Could's Co
Ashurst	Hollis	Overman	Smith, Ga.
Bankhead	Hughes	Owen	Smith, S. C.
Borah	James	Page	Smoot
Brady	Johnson	Perkins	Stephenson
Brandegee	Jones	Poindexter	Sterling
Bristow	Kenyon	Pomerene	Stone
Bryan	Kern	Ransdell	Sutherland
Catron	La Follette	Reed	Swanson
Chamberlain	Lane	Robinson	Thomas
Chilton	Lippitt	Root	Thompson
Clapp	Lodge	Shafroth	Thornton
Clarke, Ark.	McCumber	Sheppard	Tillman
Colt	Martin, Va.	Sherman	Vardaman
Crawford	Martine, N. J.	Shields	Warren
Cummins	Norris	Shively	Weeks
Dillingham	O'Gorman	Simmons	Williams
Gallinger	Oliver	Smith, Ariz.	Works

Mr. SHEPPARD. My colleague, the senior Senator from Texas [Mr. Culberson], is unavoidably absent. He is paired with the Senator from Delaware [Mr. Du Pont]. This an-

nouncement will stand for the day.

Mr. SHAFROTH. The senior Senator from Georgia [Mr. Bacon] asked me to state that he could not be here at the opening of the session, having been detained at the State Department on business

The VICE PRESIDENT. Sixty-eight Senators have an

swered to the roll call. There is a quorum present.

Mr. CLARKE of Arkansas. Mr. President, the amendment heretofore offered by me to be incorporated in the pending bill was deferred until to-day for the purpose of permitting me to submit certain observations in support of the propositions contained in it. The terms of the amendment are very well known in the Senate. It proposes to insert as an additional section the following:

CLARKE AMENDMENT.

SEC. —. That upon each sale, agreement of sale, or agreement to sell any cotton for future delivery at or on any cotton exchange, or board of trade, or other similar place, or by any person acting in substantial conformity to the rules and regulations or market quotations of any

such cotton exchange, board of trade, or other similar place, there is hereby levied a tax equal to one-tenth of 1 per cent per pound on the quantity of cotton mentioned and described in any such contract: Provided, That in all cases where the quantity and kind of cotton mentioned and described in such contract is actually delivered, in compliance in good faith therewith, by the seller to the buyer therein respectively named, the tax levied by this section shall be refunded to the party paying the same in such manner and under such regulations as the Secretary of the Treasury shall prescribe. Any sale, agreement of early paying the same in such manner and under such regulations as the Secretary of the Treasury shall prescribe. Any sale, agreement of contract of the transmitted promiting the contract of the rules and regulations. On any son acting in conformity to the rules and regulations, in any foreign country, where the order for such sale has been transmitted from the United States to such foreign country and either the buyer or the seller described in such contract of sale is at the time of the execution there of a resident of the United States, shall be deemed and considered in all respects a sale, agreement of sale, or agreement to sell, for future delivery, of the cotton described therein within the meaning of this section. A corporation organized under the laws of any State or country shall be deemed for all purposes a person within the meaning of the in within the parties thereto and signed by the party to be charged, principle of the sale as aforesaid of cotton for his agent. The said tax shall be paid by means of stamps affixed to such written contract and shall be paid by means of stamps affixed to such written contract and shall be paid by means of stamps affixed to such written contract and shall be paid by the party named as buyer therein.

That the Secretary of the Treasury is hereby authorized and empowers of the said tax shall be paid by means of stamps affixed to reliable to the said tax is

That the payment of the tax levied under authority of this section shall not exempt any person from any penalty or punishment now or hereafter provided by the laws of any State for entering into contracts for the future delivery of cotton; nor shall the payment of taxes imposed by this section be held to prohibit any State or municipality from imposing a tax on the same transaction.

## IMPORTANCE OF COTTON INDUSTRY.

The purpose of this amendment is to relieve one of the great primary industries of this country from an incubus that has rested upon it for the past 20 years. The inherent commercial potentialities of the industry involved are such that it has partially withstood a system of brigandage that would have destroyed any other in our country. The production of cotton constitutes the backbone industry of the United States. It is the foundation of the industrial existence and prosperity of 11 of our States. It constitutes the principal source of employment for their people, and contributes annually to the commerce of the country more than \$1,000,000,000 in value as a raw material. When manufactured, the possibilities and value of the industry are infinitely increased. It is now, and has been for years—more largely in the past than at the present time—the item export which has maintained the balance in our favor in our trade with foreign countries. For 1912 the following is a summary of our foreign trade:

Imports

Balance in our favor ____. In the amount of our exports there is included raw cotton, \$565,849,271; cotton manufactures, \$50,769,511; aggregating, \$616,618,782. The exports of raw cotton are 26.07 per cent and cotton manufactures 2.34 per cent, aggregating 28.41 per cent of our entire exports. This showing indicates that our cotton exports constitute nearly \$200,000,000 more than the entire belonger of trade in our force. tire balance of trade in our favor. What is contributed to our domestic commerce is a sum so fabulous that the necessities

of the present occasion do not require that it shall be estimated. It will be sufficient on this occasion to say that its value as a raw material is the basis, in a large degree, of the prosperity of nearly every manufacturing center in New England. Raw cotton is the product exclusively of what is known as the southern section of our country, and the census of 1900 shows that 65 per cent of the crop of that year was grown and marketed by white people, and 35 per cent by the colored popu-It is evident that the industry is one of the very first importance among the vital elements that go to make up the fabric of our commercial greatness. It ought to be treated fairly. In fact, if there is in the science of government room for extending benefits and conferring favors it ought to be favored. Those who engage in the production of cotton as a business have never enjoyed any of the benefits of the customary policies of favoritism, the existence of which is sought be justified by a purpose to stimulate the full development of the fundamental industries of the Republic. On the contrary, in the negative way of nonaction, the lawmaking powers of the land have inflicted upon that great industry an injury I refer to of the most grievous and demoralizing character. the business of gambling in the market prices of cotton, nominally contracts for the future delivery of cotton. This pernicious business has attained to proportions wholly beyond the knowledge of the average citizen outside the cotton-producing industry, and is understood very vaguely by many directly interested therein. This business is conducted by two organizations known as cotton exchanges, one of which is located in New York and known as the New York Cotton Exchange, and the other in New Orleans and known as the New Orleans Cotton Exchange. The chief offender is the New York Cotton Exchange. The exchange at New Orleans is a minor affair in its power to bring about the demoralizing results of which the cotton-growing industry complains to-day. In a report made by Senator George to the Fifty-third Congress for the Senate Committee on Agriculture, he said of the New Orleans Cotton Exchange:

The New Orleans Cotton Exchange, though located in the largest spotcotton market this side of the Atlantic, is a mere annex to and a subordinate of the New York Cotton Exchange, and so need not be described further than by saying if it had the will to do good it has not the power.

In a speech subsequently delivered in the United States Senate he justified this observation in his report by presenting the following communication from Latham, Alexander & Co., at that time one of the chief cotton-exchange operators in the United States:

There is always some controlling power or market for every commodity. London is the financial market of the world. New York is the financial market of the United States There is virtually one stock exchange in the United States—that is the New York Stock Exchange—and the price of every bond and stock that is sold here regulates the price everywhere else. The price of cotton in New York oftentimes controls the price of cotton in the whole world, because this city is presumed to know more about the supply and value of it than anywhere else, and our operators and dealers are oftentimes followed. No small market doing business in contracts—

That is, futures; they call that dealing in "contracts"—
could survive 24 hours unless their business was conducted on the basis
of the prices at controlling centers. If any market for contracts
smaller than ours should attempt to sell down prices, cotton dealers in
New York could—

They do not say they would; they could do it—
within a few hours buy all they had to sell. If they attempted to advance prices against quotations in New York, dealers here could within
24 hours offer to sell them more cotton than they could buy.

The conditions thus described probably represent conditions as they exist to-day. In the aspect in which I deal with the question now, I think I am justified in treating the New Orleans Cotton Exchange as a minor affair. It has some very able men connected with it, and its membership and officers have been exceedingly active in opposing pending legislation. Being situated in the cotton-growing section of the country, it should naturally have more or less interest in the man who produces the cotton. But the fact remains that, notwithstanding the frequent attempts to liberalize their plans and policies, they have been wholly unable to do anything in the way of effective correction of the evils that have borne down so heavily upon the cotton producers of the country.

### NEW YORK COTTON EXCHANGE THE REAL OFFENDER.

The New York Cotton Exchange is an organization created under the authority of the Legislature of New York. It is a close corporation, consisting of a membership limited to 450. It is located in New York City. The express object of its creation, among other things, is—

to adopt standards, classify, acquire, preserve, and assimilate useful information connected with the cotton interest throughout all markets, to decrease the local risks aftendant upon the business, and tend to promote the cotton trade of the city of New York.

As New York City is not a spot-cotton market, and never can become one, the significance of this enumeration of powers must be evident. The proposition to promote the cotton trade of the city of New York by so formidable an array of talent and power of initiative as there assembled can only mean the creation there by abnormal, arbitrary, and illegal methods of a place where phantom cotton is to be the normal business carried on. The business is a close corporation in the sense that no one save a member can either buy or sell upon its floor. Its rules provide for a liberal system of supplying to its members information relating to the acreage, state of growth, pests, drought, and weather in the cotton region. These trade secrets have been protected as the private and confidential property of its members by the two decisions of the Supreme Court of the United States, one of which is Hunt against New York Cotton Exchange (205 U. S., 115), and the other, Board of Trade against Christy (198 U. S., 251). The latter case is one in which an injunction was secured to restrain an outsider from making use of the market reports of the exchange. In deciding the case the court said:

The plaintiff's collection of quotations is entitled to the protection of the law. It stands like a trade secret. The plaintiff has the right to keep the work which it has done or paid for doing to itself. The fact that others might do similar work, if they might, does not authorize them to steal the plaintiff's.

The objection being made that the exchange was engaged in an illegal business, and therefore not in court with clean hands, the court added:

If, then, the plaintif's collection of information is otherwise entitled to protection, it does not cease to be so, even if it is information concerning illegal acts. The statistics of crime are property to the same extent as any other statistics, even if collected by a criminal who furnishes some of the data.

The reference to the statistics of crime in connection with this particular class of business is significant. It can not, therefore, be said that the exchanges serve a public purpose and are designed to promote the public interest. In the narrowest and most offensive sense it is an institution created to carry on in secret a wholly selfish and purely illegal business. For a long time this cotton exchange was the sole collector of statistical information concerning the extent and condition of the growing crop of cotton. This information, or perversions of it, is communicated to the outside world from time to time in such form as will best suit the purpose of the dominant clique in that institution, and it was habitually so used, and it is so used now, for all that it is worth. The participation of the Government in the matter of collecting and disseminating information along the same lines has somewhat curtailed the value of this private information of the exchanges, but it has not appreciably influenced the full effects that can be produced by the exchanges in the use of their information between the dates on which the Government makes its publications, which is the 10th of each month, I believe. But I shall refer to this again.

Then, the exchange has provided a system of dealing on its boards by which the seller who contracts for the future delivery of cotton is given the sole option to deliver during the month for which he makes the sale. All contracts purport to be made upon the basis of the middling grade of cotton, which is a first-class, merchantable cotton, capable of being devoted to the uses for which cotton is usually employed. There are several grades, the standard one being the medium, or middling, grade. The contracts are all made upon the basis of the middling grade, but with the right on the part of the seller to deliver any one of the 28 grades, varying from the very highest quality of cotton to the very lowest grade than can be rationally called cotton, allowance being made in favor of the higher grades above middling, with a reduction in those delivered below that grade. These differences are not the differences in price prevailing in the market as between the different grades on the date of delivery, but is a fictitious difference established by the cotton exchange itself. It is said by those who are familiar with the business that these are invariably fixed upon an erroneous and unfair basis.

The organization also has committees whose business it is to determine the quotation for futures, covering the months for which there were no transactions during the day, and also one to fix the price relation of the several grades of spot cotton to each other for purposes of delivery on contracts. Very little spot cotton is actually delivered in New York in performance of these future contracts, probably not one-half of 1 per cent of the amount represented by the so-called future sales.

Every contract executed by members of the exchange is required to stipulate that it is the intention of the parties thereto, the one to make the delivery and the other to accept the delivery of the actual cotton described therein. This is done to escape the condemnation of the common law, which would

otherwise attach if the real intention of the parties were to be expressed in the written instrument. At common law the purchase or sale for future delivery of a given product, with no intention to deliver or receive at the time the contract was made but to close the contract on the basis of the difference in price on the date of delivery, is gambling, and has been so invariably treated by the courts. To escape the condemnation of this rule and to give the business the appearance of regularity and legality, this fiction of a declared purpose to make delivery always a conspicuous feature in the transaction, although in ninety-seven cases out of a hundred both parties understand perfectly well that no such delivery is ever to take place. In fact, the cotton exchange could not do business if it were compelled to make delivery on every contract that was sold thereon. The institution does not purport to be a cotton-dealing proposition. In this connection, I call attention to the extract taken from the report of the Commissioner of Corporations, Mr. Herbert Knex Smith, on cetton exchanges, part 1, page 56, as follows:

It should be clearly understood that while most of these cotton exchanges are corporations, they are not engaged as such in the cotton business in any way. Instead, they are mere associations of individuals who in their financial operations are free to act as they like, subject to the general regulations of the exchange, Exchanges, as such, do not buy or sell cotton, and, except that occasionally some exchanges derive a small income from fees for the inspection or grading of cotton, they have no direct financial interest in the product itself. Their income is derived from membership dues, rents of buildings, investments, or similar sources. This characteristic of cotton exchanges should be clearly appreciated. The impression which appears to exist in some quarters that exchanges in their corporate capacity act as a unit in the cotton market is altogether erroneous. Market operations in cotton are wholly matters of individual concern.

### THE COTTON EXCHANGE A GAMBLING INSTITUTION.

In its final elements, and when its operations most nearly approximate the perfection of the scheme that lies at its foundation, it is a gambling institution, and so understood by everybody who goes there to trade. What its victims consider abuses and desire corrected the exchange regards as the most artistic features of the system and desires perpetuated. Its operation has evolved two distinct branches of the business. One is known as pure speculation, or more properly gambling, and the other is known as hedging, which is a qualified form of gambling. The first class is capable of subdivision into two sub-classes. The first is composed of members of cliques, organized from time to time among the leaders of the cotton exchange, to arbitrarily fix the price in accordance with the requirements of the particular corner or scheme at the time in hand. This may be either up or down, but is usually in the direction of lower quotations. The second class is what is known as "suckers" or "lambs," or, as Mr. Thompson, ex-president of the New Orleans Cotton Exchange, characterizes them, the "insane or cracked-brain operators" who will take all sorts of chances. This latter class is found most numerously in the South and in the larger cities. The feature of pure speculation, or gambling, in the future business constitutes 95 per cent of it, according to the best estimates that can be made. In the Christie case, above cited, the proof showed that the operations on the grain exchange were about 95 per cent gambling to about 5 per cent where deliveries were made or accepted. The so-called hedging business is in itself nothing but a process of gambling, it is said, forced upon a large class of persons engaged in the business of manufacturing cotton. There is no reason why cotton should be differentiated from any other product of the country in the matter of hedging. Persons who engage therein ought to be willing to run the risk of loss or gain as legitimately incident to the business.

The other group of the gambling class is composed of members of the exchange and their clients, whose object is to arbitrarily create a price quotation that they want to rule for a time. They exert the combined powers of the organization, including the edited reports of information about crop conditions, which they control and doubtless color to suit the demands of They are thus formidable beyond the hope of the occasion. being matched by the mere exercise of judgment of any dealer or manufacturer. This cotton exchange thus stands there with a perpetual declaration of war against this industry and all who are engaged in it, and the dealers and spinners assume that they must pay a ransom to protect themselves from its ravages. Buyers and spinners therefore go upon this exchange to hedge their transactions in actual cotton, not because they are not willing to take the natural risks that are involved in the business, but because they are afraid that while they are employed about other branches of their business this diligent and unscrupulous commercial enemy may fictitiously create such conditions as will adversely affect the product upon which their whole business is based. They therefore resort to the exchange for the purpose of hedging; that is to say, making a countersale

or purchase of what they have already sold or purchased in fact. For instance, a spinner who buys cotton will go upon the exchange and sell an equal amount, namely, he will agree to deliver to some unknown purchaser an amount of cotton equal to the amount that he has bought and is at that moment putting through process of manufacture. The last thing in the world he desires to do is to deliver cotton to anybody. He is engaged in the purchase of raw cotton and the manufacture of goods therefrom and not in selling cotton, although he is compelled to sign a contract in which he agrees to deliver a commodity which everyone else knows that he never will deliver. You have only to read the statement of Mr. Lewis W. Parker, of South Carolina, which is quite extensively quoted from in these remarks, to find out what he thinks about that. Bearing on the class of operators who resort to the exchange for the alleged purpose of hedging with reference to their intention to carry out that part of the contract which requires them to receive or deliver the cotton. I here append the following statement from the report of Herbert Knox Smith on cotton exchanges, page 155, and from several reputable cotton merchants and spinners:

155, and from several reputable cotton merchants and spinners:

Buyers ordinarily run from notices in this [New York] market and in any other market unless they want the cotton. Speculative buyers do not have money to take up the cotton, as a rule. They run from their contracts in New Orleans; not so much in Liverpool, because Liverpool is primarily more a spinner's market.

The absolute inability of the buyer at the time he enters into the contract to stipulate what grades he will take or to know what grades he will be compelled to take injects into the transaction under the periodic difference system an enormous element of uncertainty. This uncertainty may properly be said to give the contract much of a gambling character. So far as the buyer is concerned, the transaction comes very near being a lottery. The seller has not only the extremely valuable privilege of selecting but also the inducement to select from the wide range of grades which he can tender to best advantage to himself or, conversely, to the greatest disadvantage to the receiver. A contract which permits any such advantage to one party is obviously an inequitable contract; and the inequity is not overcome by merely stating that it is not concealed, but is known to both parties. (P. 271.)

### BEAL DELIVERY NEVER CONTEMPLATED

I quote an extract from the testimony of Mr. Lewis W. Parker, of Greenville, S. C., given on May 14, 1910, before the Select Committee to Investigate Wages and Cost of Commodities, Senate Document No. 847, Sixty-first Congress, third session, volume 2, page 938:

Mr. Parker. The seller has no option but that of delivering, if delivery is called for. I may, for certain reasons, as I will explain to you later—I may run away from delivery, and as a general proposition I do run away. I do not want to take it, and I run away from it; but if I stand pat and say, "Here, I want my cotton," I think I will get it.

Senator Crawword. You want to run away from the delivery, and he doesn't want you to run away from it, and in that case can he make you take it?

you take it?

Mr. Parker I can run so fast he can not catch me. I can sell the cetton so cheap to get away from the delivery that I simply play into his hands and give him an extra profit over what he counted upon.

Now, I am president, as I stated, of the American Cotton Manufacturers' Association, which has approximately 1,000 members, of which 500 are southern spinners, approximately, and 500 are northern; we are just about evenly divided. The American Cotton Manufacturers' Association, as far back as five years ago, began urging changes in the New York Cotton Exchange rules, because the rules of the New York Cotton Exchange rules, because the rules of the New York Cotton Exchange in fine or of the seller—give every option to the seller, give him every advantage than can possibly be given to him, and make it so that a man rather than take up cotton on the exchange runs away from it, and it is that fact that he does run away from it—that is why there is this constant disparity between cotten contracts on the exchange and absolute spot cotton.

That is to say, the prices quoted by the board for future cotton are very much lower than the price of actual cotton. That testimony is repeated by a number of cotton buyers and represents a standard method of treatment. The actual deliveries on the exchange hardly amount to one-half of 1 per cent of the

The following is an extract from the testimony of Mr. Julius Lesser, of St. Louis, then the principal cotton dealer west of the Mississippi River, taken by Senator George for the committee, at page 41 of the report:

mittee, at page 41 of the report:

Q. About how many contracts of that sort have you made in your business?—A. Several thousand baies of contracts.

Q. Were you ever required to deliver when you sold?—A. Never; because I did not allow the time of delivery to get near enough before I would close the trade.

Q. Did you close out before the time of delivery because you feared that delivery would be made?—A. I always closed trades of that kind as soon as we were fully protected in buying our spet cottons wanted to fill our orders. I can not say I feared the delivery of contract cotton in New York, but do say I did not want their delivery.

Q. Has delivery in these trades of yours ever been tendered?—A. As stated before, I never allowed the time to come near.

Q. Has delivery ever been demanded?—A. I never waited near enough to have it demanded.

Q. (p. 42). Are you willing to say that the general, if not the universal, expectation of those who deal in futures as indemnity is that no delivery of cotton will either be tendered or demanded under such contracts?—A. I have stated that before, that while we indemnify against loss and are able to move the crop from the South, buying daily without any restrictions, we do not intend to receive or tender any actual cotton on contracts in New York.

The following extracts are from the report of Herbert Knox Smith, Part IV, page 9:

The future market, aside from its major movements, is almost always in a state of oscillation. * * *

Under these circumstances the prices paid producers obviously will fluctuate—except to the small extent that limits might be departed from—directly with fluctuations in the future price thus used as a basis. While this means that some individual producers sell their crops on these minor depressions of the future price, this would not result in injustice to producers as a class, since others would sell at a corresponding advance.

Thus this comparison of actual prices confirms the conclusion reached from the study of limits. It is therefore clearly established that the influence of abnormal discounts of future prices is not fully offset by changes in limits, but that they exert a depressing effect upon the prices paid the producer; and that this effect, while less pronounced than the producers often assert, is nevertheless appreciable.

able. To a certain limited extent such abnormal discounts of future prices tend to depress the prices paid producers, not only intermittently, but constantly. The Anything which has a tendency to increase the risks of hedging merchants, as such abnormal discounts of future prices unquestionably do, has a tendency at least to force these merchants to demand a wider margin to cover their expenses and profit than they would require if they were properly protected. This means, of course, that the price which merchants are willing to pay the producer is thereby depressed. Furthermore, this influence, as just stated, operates almost constantly so long as the cause of such additional risk is not removed and not merely from time to time.

It is conceded that the deliveries of actual cotton on the New York Cotton Exchange in performance of future contracts are merely negligible, rarely amounting to 1 per cent of the amount of transactions there. The gamblers habitually employ the facilities of the exchange to manipulate the price for the purpose of making money in this improper and reprehensible way. The chaos that they are thus able to create in the calculations of any legitimate dealer or manufacturer is such as to make it to his interest to minimize its effect by hedging with the authors of this commercial disorder. It is said that they involuntarily resort to the exchange for this protection or insurance—but insurance against what? Insurance against the machinations of the very fellows whom they are paying to protect them. And the manner in which they protect them is quite well detailed in the extended quotation from the testimony of Mr. Lewis W. Parker, contained elsewhere in these remarks. I have drawn largely upon the statement of that gentleman, because his observations are very recent and represent an extensive and personal experience by an intelligent man, who is possessed of the capacity and independence to accurately relate the treatment accorded to him. He testifies in the main that he has no prejudice against cotton exchanges further than the actual facts in the case warrant him in entertaining.

It will serve my present purpose very well to read here somewhat at length the testimony given by Mr. Parker before the Committee on Agriculture in the House of Representatives on the 9th of February, 1910:

TESTIMONY OF MR. LEWIS W. PARKER, OF GREENVILLE, S. C.

Mr. PARKER. My name is Lewis W. Parker. My address is Greenville, S. C. My business is cotton manufacturing. I am the managing officer—president and treasurer, one or both—of eight mills, viz: The Olympia Cotton Mills, Columbia, S. C.; the Granby Cotton Mills, Columbia, S. C.; the Granby Cotton Mills, Columbia, S. C.; the Granby Cotton Mills, Columbia, S. C.; the Wononghan Mills, Greenville, S. C.; the Victor Manufacturing Co., Greers, S. C.; the Apalachee Mills, Arlington, S. C.; and the Beaver Dam Mills, Edgefield, S. C. Those are eight mills of which, as I say, I am either president or treasurer, or both, and I am director in quite a number of others. I am at this time president of the American Cotton Manufacturers' Association. Personally I represent and control about 350,000 spindles. * * *

I think I control more spindles in the South than any other person. I wish to have it understood, though, that I do not appear in my capacity as president of the American Cotton Manufacturers' Association. * * *

One of the Senators asked him how he protected himself. Mr.

One of the Schators asset him how he protected himself. Air. Parker replied:

I use 75,000 bales of cotton a year, and I have never yet been able to find a way. I study the subject every year, and think I have got something, and I have never yet been able to find a way. If I do it by buying futures on the exchange, before I get through I will find that the futures are away below a parity with spots; I have lost on my futures and have to pay a high price for the spots. If I do it the other way, by buying the spots and selling the futures against them, I am buying the spots before I have sold my goods. Then the futures are put up on me; I have a loss on my futures, and I have my spots at the high price. So I have never yet found a way of hedging the cotton.

Mr. Baooks. Could Congress regulate the rules of an exchange?

Mr. Parker. No, sir; I do not suppose Congress could regulate the rules of an exchange. And if the rules of the exchange are not regulated so as to be just to the producer and just to the manufacturer, and if their power of speculation is so reserved to them as to be an unreasonable and unfair speculation, to say the least of it, then I contend that Congress in its power must come to the relief of the producer and the consumer, and say to the exchange: "Under your present conditions you are doing an illegitimate and a gambling business, and therefore we must exclude you * * *"

To illustrate that, Mr. Chairman, in January, 1908, I bought 5,000 bales of cotton from a certain intermediate man—a thousand bales a month—for delivery in January and May, inclusive. At that time New York contracts were selling at 9.90 for May. I bought those 5,000 bales of cotton at 110 points on May. To begin with, that was an absurdity,

that I should be buying cotton in South Carolina and having to pay, where the cotton is raised, 110 points more than it was theoretically worth in New York. That was possible than it was theoretically worth in New York. The was possible than it was theoretically worth in New York. The was possible than the New York Exchange quotations then were way bed its dace. But the New York Exchange quotations then were way bed its dace. But the New York Exchange quotations then were way bed its dace. But the New York Exchange quotations then were way bed its dace. But the New York for those 5,000 bales. Futures were 9.90. That made the spot cotton cost me il cents.

What happened? Spot cotton advanced; and when my friend went to deliver the spot cotton to me he had to pay 123 cents for it in place of 11 cents. What became of futures? Although spot cotton advanced a cent and a half, futures went down a quarter of a cent. What was the result? The man broke. He could not stand the strain. He has a perfectly legitimate eale.

The CHAIRMAN. Do you know whether he had attempted to protect himself?

Mr. PARKER. Oh, yes; he bought futures. He had the futures. He bought futures at 9.90.

The CHAIRMAN. And he "went broke" because futures went down? Mr. PARKER. He lost on both sides?

Mr. PARKER. He lost on both sides?

Mr. PARKER. He lost on both sides?

Mr. PARKER. He lost on both sides of the market; and that is constantly happening. I say to you as a spinner to-day that I do not care how strong an intermediate man may be; I do not care whether it is entermediate man may be; I do not care whether it is away a serious guiden or not; I do not care how strong he is; it is always a serious guiden or not; I do not care how strong he is; it is always a serious guiden or not; I do not care how strong he is; it is always a serious guiden or not; I do not care how strong he is; it is always a serious guiden or not; I do not care how strong he is; it is always a serious guiden or not; I do not care how strong he is; it is always a serious

amount of speculation would be infinitesimal compared with what it is now.

Mr. Burleson. Right on that point, is it not a fact that the farmers' organizations throughout the South are now adopting means to warehouse their own cotton? Are they not building up a system of warehouses all through the cotton section?

Mr. Parker. I consider that the farmers' organizations in the South have been of the greatest assistance in the maintenance of prices; and I think the method you suggest is one of the means that they have adopted and have properly adopted.

Mr. Lever. What would be the ultimate effect on producer and spinner of the abolition of the exchanges in this country?

Mr. Parker It would revolutionize, of course, the character of the present business. I would not sell ahead, as I now do, covering on the exchange, without having made absolute purchases of my cotton—spot cotton. But it would not effect me in my sales ahead. I would have to readjust my business, and I would readjust it and buy the spot cotton, put it in my warehouse, and carry it.

Mr. Lever. There would be no difficulty, then, in readjusting your business so as to meet it?

Mr. Parker. I do not think so; no sir. I do not think so. I have regretted exceedingly to have a condition arise where I felt that the exchanges had to be abolished. But I do say that if the exchanges do not respond to this just demand, then there is nothing to do except to regulate them. I do say that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded, and, judging from the past, I can not hope that they have not responded.

I think that if the effect of doing away with the exchanges would be to have warehouses to take cure of all the cotton, it would be worth many, many times any possible harm that would come from the abolition of the exchanges. Unfortunately too many of our planters now let their cotton stay out in the weather right through the winter and do not warebouse it. If, by the abolition of the exchanges, we could force them to a condition where they would warehouse their cotton, it would be the best thing in the world for all of those interested in cotton.

Mr. Sims. But it is a fact that there are warehouses to take care of cotton now.

Mr. Sins. But it is a fact that there are warehouses to take care of cotton now.

Mr. Parker. There are; and the most intelligent farmers are now learning to avail themselves of them.

Q. Is it not a fact that during the last three years there have been about 2.000 of them built?

Mr. Parker. Yes; there are a great many small warehouses being built all around.

Mr. Parker. 16s; there are a great many small warehouses cempanies to receive the cotton and charge so much a month for warehousing it?

Mr. Parker. That is right.

The Chairman. Or do they advance a certain portion of its value?

Mr. Parker. There are different methods pursued. They all charge for the storage. Some make an advance upon it directly. The general method, though, is that they give a warehouse receipt to the farmer. Once we get capital assured of the safety of the warehouse receipt. and that the cotton will be kept there until it is needed, and the receipt can be hypothecated in the banks at a reasonable rate of interest, the effect has been (and I think Mr. Burleson will bear me out) that in the last three years the rates of interest on cotton collaterals have declined very greatly in the South. I have been able, myself, to help in placing loans for farmer friends this past season as low as 5 and 5½ per cent, and last season as low as 4½ per cent, whereas in the South, previously, our rates have been 7 and 8 per cent.

Mr. Parker, knows exactly what he is talking about. His

Mr. Parker knows exactly what he is talking about. His statements represent his actual experience, not only as the most extensive cotton spinner in the South but as president of a national organization that embraces in its membership a thousand spinners who are actively engaged in the business of manufacturing cotton. His statements are entirely in harmony with the information that anyone can derive from other perfectly authentic sources. In fact, what he says is common knowledge among those who are informed about the business. In addition to the testimony given by Mr. Parker before the House Committee on Agriculture, he testified before the Senate Committee to Investigate Wages and Cost of Commodities on the 14th of May, 1910, and I make further extract from his testimony then given, volume 2, page 947. The vice of the whole future-gam-bling system, as it exerts itself on the legitimate manufacturer of cotton, was uncovered by a single question propounded by the senior Senator from Utah [Mr. Smoot], noted everywhere for the hard, practical sense which characterizes his consideration of every commercial question. The following is the statement made by Mr. Parker in answer to the questions propounded by Senator Smoot and Senator CRAWFORD:

SYSTEM FORCES EVERYONE TO BECOME A SPECULATOR.

Senator Smoot. Then it resolves itself right down to this, that if you yourself are going to deal in futures in goods, you have got to deal in futures in cotton?

Mr. Parker. I agree with you on that.

Senator Crawford. You make the best money on your keenness in judgment in making contracts for the future sale and delivery of your goods; isn't that true?

Mr. Parker. I will tell you that I think speculating in cotton is doing more trouble than anything else. If the present conditions are to be continued, then I tell you I am not a legitimate business man or a manufacturer, but I am a speculator.

It is not a possibility for any cotton dealer nor for any manufacturer to maintain his distinct attitude as such in his business as long as the New York Cotton Exchange is permitted to carry on the business in which it is now engaged. Mr. Parker distinctly admits as much, and what he has admitted can be established by every other person engaged as he is in an effort to confine himself exclusively to the legitimate business of manu-The process by which this commercial outlaw facturing cotton. is practicing its impositions upon the great cotton industry is the result of growth and evolution. The wit of no one man was ever sufficiently perverted to invent any such scheme in a day. Every time something new in the line of vitiated ingenuity has been brought to the surface by an actual transaction it has been concreted to the laws of the New York Cotton Exchange. In addition to giving the seller the option, the laws of the exchange do not require him to deliver merchantable grades of cotton, but, to the contrary, encourages him to a course of virtual fraud upon his contract by giving to him the privilege of delivering cotton wholly unsuited to purposes and use by any spinner. The buyer is still further handicapped and penalized by being required to accept only certificated cotton; that is to say, cotton which has been arranged to serve the ultimate purpose of the exchange of deterring any deliveries at all. In support of my assertion that cotton intended to be delivered to those who subscribe to the rules of the gambling game sufficiently to manifest a willingness to accept deliveries are deliberately circumvented by what is permitted by the rules of the exchange, I submit the

following extracts from Herbert Knox Smith's report on cotton exchanges, on the pages indicated:

Herbert Knox Smith's report, parts 2 and 3, page 156:

Herbert Knox Smith's report, parts 2 and 3, page 156:

From various statements made to representatives of the bureau, however, it appears reasonably certain that the privilege of tendering a miscellaneous assortment of grades in the New York market has at times been abused by individual deliverers. Such abuses are not confined to the New York market, although they appear to have occurred with special frequency there. For instance, in the Liverpool market, where the deliverer is allowed to tender 4 marks on a single contract delivery, it is said to be a general practice of sellers to mix deliveries to this extent, even though they may be put to some trouble in doing so. In the same way, in the New Orleans market, where tenders are admittedly much more satisfactory than at New York, certain sellers who found that a mill was able to use the deliveries are said to have made a special point of tendering a grade of cotton not adapted to the requirements of the mill in question. * * *

As a matter of fact, no large amount of time was spent in investigating this charge as to the mere point of intent or motive, for the simple reason that, as a matter of fact, tenders are ordinarily so mixed as to be objectionable. The fact of this condition was considered of more importance than the personal motives which might have been responsible for it. The opportunity is clearly open for abuse of this privilege in either the New York or the New Orleans market.

The long and the short of the whole business is that the New York Cotton Exchange and its New Orleans parasite as well are engaged in a systematically organized raid upon the prosperity of those engaged in the cotton-producing business. The members of the New York Exchange exact a charge in the way of brokerage fees from its victims and its involuntary coconspirators, the spinners, of at least \$10,000,000 a year for transactions on its floors. Up to 1907 it was possible to get authentic information concerning the amount of phantom cotton bought and sold on that exchange. Since that time no reliable information can possibly be obtained. Instances have occurred where prominent members of the exchange were interrogated on oath as to the extent of these operations there, and they have invariably answered that they knew nothing about the matter, no record thereof being kept. By a process of comparison it has been indicated as a fairly justifiable estimate that the transactions there exceed the amount of the actual cotton crop produced from ten to twenty times. A conservative estimate would be that the transactions on that exchange amount to 100,000,000 bales of future cotton, where the crop of actual cotton will not exceed 15,000,000 bales, and that the fees paid to the brokers for these transactions will amount nominally to \$15,000,000 annually, but when we make deductions therefrom for that part of the business known as "wash sales," which are collusively made between the members of the exchange for the purpose of creating market quotations to serve some prearranged corner or raid, it can reasonably be assumed that the amount of money taken as brokerage fees from nonmembers who deal on that exchange easily amounts to \$10,000,000 annually. A "wash sale" is one made by one member to another who, either directly or indirectly, during the day sells back to the member from whom he bought an equal amount of cotton. It implies collusion, and many times is resorted to to circumvent some speculator or investor not a party to the deal. The amount taken from pure speculators or gamblers amounts to \$75,000,000 a year according to estimates. In connection with this matter of the extent to which future deals are made on the New York Cotton Exchange. I submit the following extract from Herbert Knox Smith's report in a table given at page 273, parts 4 and 5:

Year.	Cotton crop.	Sale of futures.
1893 1894 1895 1896 1897	Bales. 6,700,365 7,493,000 9,901,257 7,161,094 8,532,705	Bales. 53, 245, 400 37, 888, 460 39, 308, 500 56, 469, 000 36, 113, 600

As a possible explanation for this, and a justification for it, as nearly as it can be justified or explained, I submit the following extract from Mr. Smith's report, at the pages indicated:

extract from Mr. Smith's report, at the pages indicated:

The extent of hedging can only be estimated; opinions as to its volume vary widely. Estimates obtained by the bureau of the annual total of hedging transactions in the New York, New Orleans, and Liverpool markets combined range all the way from 20,000,000 kales or less to more than 125,000,000 bales. An exporter at New Orleans estimated that a 13,000,000-bale crop would easily furnish 26,000,000 bales of hedging transactions in the three markets combined. A New Orleans factor estimated that the combined hedging operations in these markets in the season of 1906-7, when the crop was about 13,500,000 bales, might easily have amounted to 50,000,000 bales. In his opinion the proportion of hedging transactions in the total of future dealing was largest in Liverpool and smallest in New York. Other merchants interviewed estimated that an ordinary crop of cotton is hedged all the way from one to five times. As each hedge eventually means both a sale and a purchase, every hedge counts twice in the total of future transac-

tions; that is, if 13,000,000 bales of cotton were hedged once this would ultimately contribute 26,000,000 bales to the total of future transac-

ultimately contribute 26,000,000 bales to the total of future transactions.

Whatever the volume of hedging transactions proper may be, there can be no doubt that future trading is largely made up of what are commonly regarded as purely speculative—though not necessarily gambling—transactions, and that without such operations on an extensive scale the future market would be impracticable. The best evidence of this is the repeated failure of attempts to establish organized future trading in cotton in markets where speculation was practically absent. Thus, in the season of 1906-7 an attempt was made to establish future trading in cotton at Memphis, but the movement fell flat from the start, chiefly owing to the fact that there was no speculative business. Similar attempts have been made on the Mobile, Savannah, and Galveston Cotton Exchanges, but in every case without success. In all of these markets there are merchants who employ buying and selling hedges extensively, so that this feature of the business was not lacking.

It is true that transactions in future contracts on either the New York or the New Orleans Cotton Exchange in any year ordinarily represent a volume of cotton vastly greater than the total crop. It is not unlikely that the combined transactions in futures on the two exchanges in some years represent 10 times the volume of the crop. The greater volume of transactions is due, in part of course, to the fact that contracts repeatedly change hands during the period from the time that they are entered into until the date of maturity (p. 268).

The cotton-exchange interests insist that if the pending amendment shall become law the business of dealing in cotton for future delivery on the exchanges of the country will cease. The logic of that statement is that, unless the so-called speculative, or gambling, element is allowed to make money illegiti-mately, the so-called hedging branch of the business will be discontinued. In Mr. Smith's report on cotton exchanges, at page 161, this observation occurs:

The chief reason for a future system is that it renders some service to the trade. If the future system consisted merely in the exchanging of contracts between speculators, without conferring some benefit upon trade as a whole, an exchange would have no right to exist. No matter how correctly such speculators might judge crop conditions and forecast prices, if their operations did not confer some advantage upon the trade and the community at large, an exchange under such conditions would be little more than a gambling place.

### GAMBLING NOT TO BE DEFENDED.

The indefensible doctrine is thus declared that a wholly vicious business must be permitted to continue if, by indirection, some good or profit shall result to a small number in the community. The rule is, you must so use your own that no harm to others do. It is not true that when the character of the work done on the cotton exchanges is wrong and oppressive to a class of persons, that this wrong should be allowed to continue because, in some remote way, some one has been at le to make such terms with those in control as will minimize his losses due to the commercial disorder produced by them. The fact of the business is, from the very first page to the very last of this very able and exhaustive report made by the Commissioner of Cor-porations, there is an arraignment of the cotton exchanges and their present methods of doing business. The admonition has been repeatedly given that they must change their methods or else they must expect to be dealt with as others are who habitually violate the laws by which society is maintained.

The report has now been before the public for more than five years and no changes have been made in their methods, and the New York exchange solemnly insists that no changes can be made and its essential purpose preserved. They contend that the exchanges are not places where cotton is bought and sold. They simply deal in the element of price, naturally or artificially The institution has nothing whatever to do with the handing of actual cotton or its manufacture. It is an interference with its plans to even talk about the actual delivery of cotton. They deal with it in its theoretical and not in its prac-They fix the price to suit themselves when they tical aspect. can create conditions by invoking the combined powers of the organization. Sometimes they operate in the interest of the spinners, and sometimes they will buy or sell for a well-organized and gigantic clique of cotton-exchange members and their allies in opposition to the spinners. The producers are never consulted. They never appear there. They have no voice in what is taking place and no notice that it will take place. The fluctuations are so rapid there that the local buyers with whom the actual producers deal, especially the small producers, are constantly perplexed by this artificial activity, and in order to be on the safe side the first-hand buyers from the small producers must give themselves the benefit of this uncertainty by a reduced offer. The larger dealers may keep themselves closely in touch with what is going on in the New York Cotton Exchange, but it is not true with the scattered and disorganized producers and small buyers at interior points, where probably the greater part of the cotton is marketed. The vice of the whole system is directed against the small producer and the small dealer, who have no cotton-exchange connections or means by which they can protect themselves even if they did. The whole trend of modern progressive action is to help the fellow at the bottom and to make it easier for the man who is willing

to work to do so in such a way as will bring to him a fair part of the value he produces. All of our modern legislation is characterized by this enlightened purpose and policy. The cotton growers of the South should not be the only victims whose wrongs shall pass unnoticed.

The representatives of the cotton exchanges in the discussion of this subject imply that they are the guardians of the cotton raisers of the South; that, in fact, if it were not for them there would be no market for cotton and that the whole business would fall into disuse and demoralization. Such a contention is grotesque and would excite mirth if it did not relate to a subject so serious. The South is about as independent in its commercial relations as any part of this country, and if it shall only have fair play in the framing of the laws of this country it will excel in commercial and industrial progress country it will excel in commercial and industrial progress. and power any other section of the land. Its industries and its activities are not dependent upon any measure of bounty doled out to it by 450 cotton gamblers in New York. There is a growing independence manifest in all linds of commercial employment all over the South. There is not a State in which cotton is grown that does not possess sufficient banking facilities to take care of every bale of cotton produced in that State. It is the foundation industry of them all, and its beneficent effect runs into every channel of trade and affects every calling. Everybody's business depends upon it, and everybody locally concerned is interested in seeing that the great staple is permitted to sell on its own merits and to bring into the section where it was produced its real value. The spot-cotton business is now carried on upon a perfectly satisfactory and independent basis, and this wholesome condition is increasing in strength and usefulness all the time. The last 10 years have been years of prosperity in the southern cotton-growing section. Even now there is a very large number of farmers who are sufficiently financially independent to be consulted in the negotiation before they part with their cotton. This is not only due to the bettered financial condition of the farmers, but because they understand better than they ever did before the conditions that surround them. They, therefore, are but slightly alarmed about the threat of the exchanges that they will permit the business to drop into hopeless demoralization if they are not permitted to rob the industry annually out of \$100,000,000. Many of these cotton-exchange impositions are such as to increase the price that the consumer pays without giving to the producer his proper share of what the consumer pays, produced by abnormal market arrangements. conditions show their evil effects in a course of dealing that requires that the price must be higher after the cotton has passed out of the hands of the producer into the hands of some middleman. I submit a table here which presents as strikingly as anything can the necessity for a more rational system of marketing:

Comparison of autumnal low price for cotton and subsequent high price for 12 seasons. (Cotton season commences Sept. 1.)

[As shown by quoted value middling cotton, New York.]

Season.	Price.	Date.	Variation.
		PER STATE	Cents.
1901-2	Autumnal low price, 7.80 cents    Subsequent high price, 9.80 cents	November, 1901 April, 1902	2,00
1902-3	Autumnal low price, 8.30 cents	November, 1902 July, 1903	5, 20
1903-4	Autumnal low price, 9.50 cents	October, 1903 February, 1904	} 7.78
1904–5	Autumnal low price, 6.85 cents	December, 1904 July, 1905	4.5
1905-6	Autumnal low price, 9.85 cents	October, 1905 December, 1905	2.75
1906-7	Autumnal low price, 9.60 cents	September, 1906 August, 1907	3,95
1907-8		November, 1907 June, 1908	1.60
1908-9	Autumnal low price, 9 cents	October, 1908 July, 1909	4.13
1909-10	Autumnal low price, 12.40 cents	September, 1909 August, 1910	7.33
1910-11	Autumnal low price, 13.60 cents	September, 1910 May, 1911	2.5
1911-12	Autumnal low price, 9.20 cents	December, 1911 July, 1912	4.20
1912-13	Autumnal low price, 10.75 cents Subsequent high price, 13.40 cents	October, 1912 January, 1913	2.65
			12)48, 70
Ave	rage variation between high and low extrem	es	4.05

The average variation between the autumnal low price and subsequent high price is 4.05 cents per pound, equal to \$20 per bale. Assuming that one-half of this could be saved by gradual marketing, the resulting gain to the cotton growers of the South would be \$10 per bale. On the present average crop of 15,000,000 bales this would be the equivalent of \$150,000,000 a year.

This would not be an added tax on the consumer, for, aside from the fact that two-thirds of the cotton crop is exported, it is probable that the consumer now pays the average price of the season, and the difference between it and the minimum low price is the profit exacted by the middleman for the theoretical risk of buying cotton when it must

The discussion incident to the pendency of this amendment has been valuable in more directions than one. It has at least established the fact that the so-called hedging business carried on by the exchanges is tolerated by them as a sort of investment in popularity. Every vicious and demoralizing business must have some way by which it can at least attempt to justify its existence and to protect itself against the force of an aroused public opinion. In this particular instance the hedgers and their friends perform this service for the room gamblers, who could not openly defend their part of the undertaking. So completely is this true that it is now openly declared that the source for funds to make hedges safely is the unprotected speculator or actual gambler. In other words, the exchange will not carry on the hedging business unless it is also permitted to carry on the fledging business almess it is also permitted to carry on the gambling business. In this connection I quote a statement from a very plausible and able paper on the general subject prepared by Mr. William B. Thompson, late president of the New Orleans Cotton Exchange, and dated July 21, 1913:

NO GAMBLING, NO HEDGING.

The source of the supply of hedge contracts is speculation (gambling). Traders with different views as to the future course of prices meet in the future market and either in person or through brokers offer to buy or sell. From this nucleus the broad hedging market develops. It is quite true, as has been alleged, that the hedging non-speculative contracts constitute the bulk of the trading in the future market, and that through the meeting of many such traders it often happens that by transfer and exchange both parties to the contract are nonspeculative hedge traders, but the fact remains that the basis of the underwriting function is the risk assumed by the speculative—

Gambling-

division. If therefore speculation-

Gambling-

be eliminated from the future market, the basis of the hedging market is destroyed. So if you prohibit speculation—

Gambling-

the hedge market will suffer likewise and there will be little or no revenue therefrom.

The purpose of this amendment is to differentiate the two The purpose of this amendment is to differentiate the two classes. It is as probable as anything depending upon a future contingency can be that the "sucker," "lamb," or purely speculative element will not pay 50 cents a bale for the privilege of gambling. The ideal "sucker" on the cotton exchange is the one-or-two-dollar-a-bale-margin dealer. It is easy to get rid of him by prearranged fluctuations, and thus get him out of the way so that he will no longer be any trouble and have his margin entered on the books as a real profit in the transaction gin entered on the books as a real profit in the transaction.

These fellows will not pay the tax and the commission when there is a certainty that just an ordinary daily fluctuation will leave them without an interest in the game. Without the possibility of this accumulation of small margin dealers it is said that the exchanges will not take upon themselves the risks incident to deals made by spinners and strong dealers.

These latter can easily keep their margins good until the maturity of their plans, at least until the accomplishment or failure of the purpose they have in view. The rules of the exchanges are so adjusted that they may be mulcted quite liberally, but not to the extent that the ordinary inexpert speculator is, this being the graceful term used to describe him after he has been separated from his cash. I think the New York Cotton Exchange is wholly bad and has no right to exist. There is not the slightest possibility of its being a real service to the cotton industry, and its longer continuance under present conditions is detrimental in the highest degree to the people in whose welfare it is both my duty and inclination to be interested.

The pernicious business has been assailed by so many people and from so many quarters that its defenders have evolved a highly technical and awe-inspiring phraseology with which they project their alleged excuse for its existence before legislative assemblies. They never attempt to justify their right to exist before the public, for with them it is a case of "the public be They ask nothing from the public except a crop of suckers" moderately well supplied with actual cash. To read one of their printed arguments-and they are sometimes able and very plausible-the average reader will get the same impression that a Digger Indian would on hearing a Greek poem The people understand the effects, but they can not instantly understand all of the plausible arguments advanced in support of this business by their interested and subsidized defenders. The fundamentals are not hard to understand by those who are the victims. The cotton producers know that before a single seed of the next cotton crop is planted that

scores of people who never saw the inside of a cotton field assume to fix the price at which they guarantee, in the form of contracts for future delivery, to deliver the whole of the next cotton crop; and not only that one, but ten times the number of bales that can possibly be produced and marketed. The farmer who is to make the cotton is never consulted about the arrangement and has no means of protecting himself against it. The cotton spinner may, in a measure, protect himself against it by paying tribute to the institution that has created this unwholesome condition. No matter what takes place, the farmer is at the mercy at every turn in this unholy negotiation and without any means of protecting himself. He is the only party interested in the transaction who is now clamoring for recognition of the legitimate law of demand and supply. He is the only real victim of the business. The spinners of the country are an organized body and can treat as a unit with the other organized bodies, namely, the cotton exchanges, who are on occasion their adversaries and at other times, to a greater or less degree, their confederates. The farmer is never represented in the affair, and the smaller farmers have no means whatever of knowing the influences that are at work against them. The existence of this condition has become all too well known. While there may be difference of opinion as to the best method of getting rid of it, there is no one engaged in the cotton-producing business that is ignorant of its effects. That part of the community is a unit against the continuation of the system. The time has arrived when this business must cease if justice is to be done to that great body of our toiling citizens who produce this great and all-important commodity.

These cotton exchanges have been warned to change their

methods so as to bring them somewhat into harmony with the enlightened sense of justice of the present day, and they have insolently disregarded all of these warnings, because the business, as they have planned it, can not be conducted on any principle which recognizes justice to the producer. This warning has been given to these exchanges by every legislature in the cotton-growing States except two; by the often repeated protests of the spinners organizations of the country; by the united and earnest protest of every farmers' organization in the country; by the repeated efforts that have been made in Congress from time to time to reform the business or put an end to it; by every chapter and every section in the elaborate and able report of Herbert Knox Smith, Commissioner of Corporations, on cotton exchanges; and, again, by the specific and definite obligation laid upon the members of the dominant party in the present Congress by the platform adopted at Baltimore last summer, in which that party pledged itself to be active in aid of agriculture, and as a means to this end urged Congress to pass laws that will effectually destroy gambling in agricultural products. I had the honor of offering this provision in the committee which incorporated it in the platform as reported and adopted. None of the admonitions have been heeded to the slightest extent. The fact of the business is, the exchanges have lost the power of self-correction of the evil. They have sinned away their day of grace. The hour for their destruction is at hand, and the only power that can deal effectively with them is the Congress of the United States in the exercise of the taxing power authorized by our Constitution. When the Hatch antioption bill came so near passing Congress in the Fifty-third Congress a widespread movement for reform was agitated among the cotton-exchange membership themselves. Quite a show of virtuous dissatisfaction with existing evils and a de-termination to reform them was then made, but when that bill met with defeat in the House of Representatives we heard no more about changes in the system. Conditions have been growing steadily worse instead of better. As an indication of the extent to which the New York Cotton Exchange was willing to go in modifying its .nethods rather than to take the chance of prohibitory legislation under the taxing power, I call attention to the following quotation from Report on Cotton Exchanges, to which I have made such frequent reference, on page 191:

which I have made such frequent reference, on page 191:

The adoption of such a clause has been advocated for many years. In 1892 and 1893, when the so-called Hatch antioption bill was before Congress, a determined effort was made by many cotton interests to secure the adoption of such a clause, its advocates taking advantage of the uncasiness in exchange circles over the Hatch bill to press their claims. On January 24, 1891, the St. Louis Cotton Exchange passed resolutions addressed to the New York Cotton Exchange urging the adoption of the low-middling clause. Nothing substantial appears to have resulted from this agitation. Opposition to the Hatch antioption bill became more and more vigorous, until the measure finally failed to pass; and with this danger out of the way the two cotton exchanges became more indifferent to this agitation for a modification of the contract.

This action presents a repetition of the situation described in the old saying:

When the devil was sick, the devil a saint would be; But when the devil got well, the devil a saint was he.

Why should this business continue longer? The spinners say they are opposed to it, and every representative authorized to speak for the organized farmers of the country say they are opposed to it. The farmers have presented their attitude in regard to it in the form of an authorized statement by a representative of theirs sent here for the purpose, as will be seen from the following extracts of the testimony of Hon. T. J. Brooks, of Atwood, Tenn., who is a prominent officer of the Farmers' Union of the United States. His testimony was given before the Committee on Agriculture in the Hous, of Representatives on the 9th of February, 1910. His statement on that occasion is comprehensive and able, and his arguments against the longer existence of these exchanges are as concise and forcible as can be found anywhere. A perusal of his statement in full will compensate the time required to do so. At this point I present somewhat extended extracts from that statement:

TESTIMONY OF MR. BROOKS.

Somewhat extended extracts from that statement:

TESTIMONY OF MR. BROOKS.

If the hedging business was confined to the actual number of bales of cotton raised and sold, I doubt if it would have attracted such wide-spread aftention. As only a certain part of each cotton crop is actually covered by hedges by those who handle the spot cotton, it follows that only that per cent of each year's crop can be legitimately hedged, and this would limit each year's crop can be legitimately hedged, and this would limit each year's crop can be legitimately hedged, and this would limit each year's options to something like 4,000,600 or 5,000,000 bales of perhaps 6,000,000 bales, and at the furthest extent it could not exceed the number of bales that were produced in a year, and it seems that the most reliable figures that we can obtain show that 100,000,000 bales are bought and sold on the exchanges of this country every year, so that they can scarcely be called actual cotton exchanges, but are more option exchanges than cotton exchanges.

All we would ask is to give the normal operation of the law of supply and demand full sway. Let that help who it will no be to the detriment of who it will, it is justice. That is honesty, that is equity, and we think to demand more is wrong, and we think to be satisfied with less is cowardice. We see no excuse for anyone, even though he be a farmer, wanting the hedging business to go on, if it puts money in his pocket at the expense of somebody else who gets no equivalent. We want nothing but equity, if we know ourselves, and we would not for one instant advocate the continuance of this system if we thought it put money in our pockets by robbing somebody else of that additional price that we might obtain. You can not make that too positive on our side. We are perfectly willing to take the results, the consequences, of abolishing these futures, and the vage solicitude that may be offered by our friends on the other side will not be appreciated. * *

I am not discussing this from the standpo

market until the bulls are frozen out and the margins are captured. * * *

We want to say that the local buyer does not furnish a market for the cotton farmer; the wholesale heavy cotton merchant and exporter does not furnish a market; the spinner does not furnish a market; the jobber that buys from the spinner does not furnish a market; the merchants of the world do not furnish a market. Then who does? There is but one answer, the 1,500,000,000 citizens of this earth who consume cotton goods furnish all the market that there is to it, and they will continue to wear cotton goods and buy cotton goods regardless of whether anybody deals in futures or not, and that market will be constant as long as the human race wants that article.

They are not going to sit down and quit business because somebody can not gamble in prices; they are going to go to the sources of supply and get their cotton, and the farmers are willing to take the consequences. We are willing to risk the results, and we want it.

The opposition to this business is world-wide. of this I call attention to two extracts, taken from authorized and reputable sources, which reflect the state of sentiment in England. England is not a grower of cotton to any extent comparable to our capacity as a producer of that staple. The Liverpool Cotton Exchange is a buyer's proposition. Its mechanism is adjusted to promote their interest, and its management is under their control. It does not encourage speculation, and this feature does not form a very considerable part of the business carried on there. The greater part of the speculative business carried on in the Liverpool Cotton Exchange, as will be observed from the testimony of Mr. Parker, to which I have heretofore referred, are transactions in which American speculators are interested. So it seems the gambling business even there is carried on by American speculators for the purpose of bringing the Liverpool market in futures to the American exchange level. The grades there deliverable on future contracts are limited to four, and the cost, in the way of brokerage and other fees, is about double what it is in this country. The German manufacturers carry on the business of manufacturing cotton without the aid of any future-contract dealing. German cotton merchants buy large quantities of actual cotton, which is placed in warehouses and sold to spinners as their wants demand it. I here call attention to the two extracts referred to. The first one is a paragraph from a very exhausive article on l

the subject of dealing in futures on the cotton exchange, prepared by Prof. S. J. Chapman, M. A., and read before the Royal Statistical Society in London on April 24, 1906, and may be found in the journal of that society in volume 69. He closes an extended and most scientific discussion of the subject with this observation:

Finally, the reader must be warned again that nothing in this paper can be taken to demonstrate that prices would be steadler if "futures" were not used, or that it would not be advantageous to employ "futures" to facilitate the shifting of risks even if they disturbed prices in some degree. But that everybody concerned would be benefited, if gambling by the inexpert public and all tampering with the market could be prevented, we feel no doubt.

I also call attention to the following extract taken from the article en cotton exchanges in the Encyclopædia Brittanica, eleventh edition, page 245. The article is a very exhaustive and able one, dealing with the subject in many of its aspects as the same relate to the cotton market in England. Its observations do not include what is taking place in our country. I present it simply for the purpose of showing what the cotton exchange, in its best aspect as an institution for the purpose of promoting the welfare of a cotton-consuming constituency, is an institution whose operations reveal a growing unsteadiness in the price quotations of cotton:

The outcome of the whole matter is that the investigator is still baffled in his attempt to discover what effect the use of "futures" is having on prices to-day. The sole piece of evidence from which reliable conclusions may be drawn is that through separate measurements of price fluctuations over some 40 years reveal a growing amsteadiness of late, whether they be expressed absolutely or as percentages of price. (Cotton—Encyclopædia Brittanica, 11th ed., p. 247.)

It is preper to say in concluding this feature of these remarks that the spinners of this country very rejuctantly engage in the buying and selling of futures for hedging purposes. Many of them condemn the business as strongly as do the body of producers. Mr. McCall, the former president of the National Association of Cotton Spinners, is reported in the statement of Mr. Brooks as saying that a very large percentage of spinners who are members of his organization do not deal in futures; and Mr. Coates, representative of one of the greatest spinning organizations in the country, said that 97 per cent of the business of dealing in futures is bad.

It is worth while to remark in passing from this feature of the discussion that dealers and manufacturers of commodities for the sale of which organized exchanges exist are the only ones who require for their proper protection the right to hedge the risks incident to the business. Even a superficial knowledge of the structure and operations of the exchange and its methods discloses unmistakably that if there were not any such there would be no apparent necessity for hedging. What the legitimate dealer intends to do when he hedges is to protect himself against the abnormal and fabricated risks of his business. The exchange produces the necessity for the hedging and is not called into existence in response to a demand for legitimate protection of this kind. The promoters of these exchanges contrive with an inspired ingenuity in selecting as the field for their best success the agricultural community. The scattered and unorganized producers of these products form but a feeble adversary in the commercial warfare which it is the function of these institutions to wage in the hope of reaping a profit from these who must pay to escape their ravages. No hedging is required in the case of wool, hay, iron, eggs, lumber, and a variety of other commodities of equal or nearly as great value as the cotton crop itself. The pending amendment is manifestly one where the object is to equalize the forces of society when unfairly or dishonestly deranged. I think a case is made where such relief should be extended.

I have attempted to do this by offering the pending amendment. The structural propositions of this amendment are not numerous nor hard to understand. In the first place, it employs the taxing power to accomplish the purpose designed. In my humble opinion the effect of the operation of it, if adopted, will be to at once so completely deter the purely speculative or gambling element as to exclude them from the exchanges. It will prevent many fictitious and fabricated quotations. That part of the patrons of the exchange who resort to its floor for so-called protection will find themselves relieved greatly by being exempted from the intrigues that are invented and applied primarily to entrap the "sucker" or "lamb" element of the speculators. If this does not entirely relieve the dealers and manufacturers from the necessity of seeking pro-tection by hedging, they will not be greatly oppressed by the payment of the comparatively small tax to secure financial commitments involved in their forward-delivery contracts. In the course of time the evolutionary forces of the newly created situation will demonstrate the fact that the exchanges can not exist without the profits derived from the purely gambling element, and will therefore leave with the dealers and spinners

the task of otherwise providing themselves with protection against the ordinary risks of their business. And the process of supervision will be a wholesome one and will give to the agencies of publicity a knowledge of that business and its methods that has heretofore been impossible of ascertainment. It is not an unwarranted prediction to say that the spinners and dealers may find that their business, once freed from the menace of this piratical organization, is no more uncertain than are the risks of commerce generally, and that, therefore, no

ledging or other form of protection is required.

If the force of habit has become so strong that this sort of collateral aid in conducting their business is required, some sort of mutual arrangement similar to the company organized by the cotton spinners of the country to protect their plants against fire may be the outcome. Some organization will take the natural risk of the business, divested of the power to manipulate the price, which is the vicious and destructive power of the exchange against which I am directing my efforts. Already the spinners of New England have been discussing the feasibility of establishing a cotton exchange in New England, especially for spot cotton, to bring the planters and the spinners nearer together, and to have fixed standards and grades and sworn classers. We learn this from a communication which Postmaster General Burleson when a Member of Congress brought to the attention of the Committee on Agriculture at the hearing before that committee which I have referred to copiously in this address.

The taxing power is the only power that can be exerted by the National Government to aid in destroying the power for evil of the cotton exchange, as I shall hereafter attempt to show. Many of the old-school statesmen are averse to using the taxing power for any purpose other than raising revenue to be paid into the Treasury. The taxing power is one of the most comprehensive and flexible powers of the Government. It is the best means of regulation or suppression at its command, and has been frequently exercised for both purposes. It has been employed to prevent State banks from issuing notes to circulate money, and has been wrongfully employed, as I think, to suppress the use of oleomargarine by the people. However, this objection is not seriously urged against this amendment, for the reason that it is among the probabilities that for a time some revenue will be derived from its opera-

The amendment is directed against transactions involving the purchase or sale of contracts for the future delivery of cotton executed on the organized exchanges of the country or in accordance with their rules. It has no relation whatever to contracts made by anyone outside of these exchanges and their rules. Every person has a right to act independently on his own behalf outside of such exchanges or their rules with any other person for the purchase or sale of cotton for future delivery. The prohibitions of the bill are directed against the contracts that obtain on the exchanges or are made in accordance with their rules and system. Even as to these, while the tax is laid on all transactions for future delivery, provision is made for refunding the tax where actual delivery of the cotton described in the contract is made in good faith.

It is said by those who are opposed to any interference with the present business of the cotton exchanges that this is an attempt to legalize gambling. This statement is either recklessly made or is a mere means of expressing dissatisfaction with the provision, for those who make it entirely overlook the last section of the bill, which authorizes the several States to penalize or tax the business in any way they may see proper

There is nothing original in the employment of the taxing power in the pending amendment to accomplish the purpose designed. It is a repetition of the effort made when the so-called Hatch bill came so near passing the Fifty-third Congress. That bill provided a tax on the sales of cotton for future delivery of 5 cents per pound, or \$25 a bale. It passed the House of Representatives by a majority of more than 50, and passed the Senate, after having been amended in several particulars calculated to make its operation more effective, by a vote of 40 to 29.

When the bill in its amended form went back to the House, it reached there at such a late day of the session that it was impossible to consider it without a suspension of the rules, which required a two-thirds vote. The vote to suspend the rules and to take the bill up was disposed of in the House March 1, 1893, by an affirmative vote of 172 to a negative vote of 124, lacking the necessary two-thirds. Thus the bill failed. I believe it will not be out of place to say that every Senator and Representative still in public life voted in favor of the passage of that bill with the exception of one. The bill was supported

in the Senate by the following-named Senators who still honor the Senate with their membership: Messys. Gallinger, Perkins, and Warren, and the following-named Senators who, as Members of the House of Representatives, supported the passage of the bill: Messys. Bankhead, Clark of Wyoming, and Shively. The present Secretary of State, Mr. Bryan, was also among the supporters of the measure. It was exhaustively discussed both as to its policy and the constitutional power of Congress to pass it by the ablest men that have ever been identified with congressional life in this country. I have, therefore, simply borrowed the principle of the amendment from the distinguished Missouri Congressman, Mr. Hatch, who devoted 10 years of his life in his efforts to bring relief to his fellow farmers from the outrages perpetrated upon them by these gambling exchanges.

It is next objected to by the more aggressive and unreasonable element who oppose the adoption of this amendment that the tax will be collected from the farmers who produce cotton. The statement would be quite as interesting, and far more instructive, if those who make use of it would indicate just how this is to happen. In the first place, if the amendment works as its operation is reasonably forecasted, there will be no tax to collect from the pure speculators and gamblers, and in the course of a short time none whatever will be collected from the spinners and dealers who are resorting to the exchange for protection. Besides, these learned analysts of economic forces admit too much in making this assertion, when they concede that the only function of Congress is merely to fix the amount of a tax, and that this action can be supplemented by the New York Cotton Exchange by selecting persons upon whom the tax is to rest, for they thus disclose a very dangerous condition of affairs and one that calls for very prompt and radical action by Congress if they are correct in their conclusion. If there is in existence a combination of individuals that can so pervert the taxing power of this great Government, that fact ought to be known. If it is true that this particular tax can, by some process known to the cotton exchange, be transferred to the producers of cotton, even if the tax is never paid, then it is proper to ask if they are not now imposing upon the cotton producers of the country more than \$10,000,000 that they annually collect for brokerage fees for transactions on the exchange. If these concerns can transfer the tax levied under national authority for revenue purposes, why can not they also transfer the tax levied by themselves on the commodity in the exercise of their gambling power? If the cotton-exchange gambling power is superior to the taxing power of the National Government, then this occasion is a fortunate one, for it will afford the means of making that fact known and demonstrating the result.

The statement is so broadly made as to be regarded as a protest rather than a serious statement of opinion. In the first place, out of a crop of 15,000,000 bales of cotton grown 10,000,000 are exported to be manufactured in foreign countries. I assume that spinners of this country are not concerned in hedging the part of the crop exported. The 5,000,000 bales that remain are manufactured to the extent of more than half by spinners whose financial strength renders them independent of any condition that can be created by the cotton exchange. am wholly unable to discover how the tax on the cotton is to be transferred to the farmers' bales from these fictitious or phantom bales that are now sold by the gamblers by the million bales, but will not be sold when this amendment becomes opera-The case is very largely like the tax levied on State bank circulation and oleomargarine, which is not collected at all, and is therefore not assessed against anyone. There is no revenue collected from the tax on State bank circulation nor on oleomargarine, and there will be none on these future gambling contracts in cotton and very little from those who hedge.

Assuming that the effect of the adoption of the amendment will be as forecasted, then what is to be our remedy for the market readjustment of that which must follow? In the first place, the cotton growers have been for several years engaged in preparing themselves to become independent of existing market conditions as largely as it is possible to do so. This purpose has expressed itself in the erection of cooperative warehouses and in the improvement of the local credits. A very large part of the white farmers who grow cotton are virtually independent at the present time, and through their organizations are constantly becoming more so. The cooperative idea has taken a firm hold on those engaged in that industry, and the definite indications are that the progress of the movement will continue. Then the banking facilities of the section are greater than ever before, and as cotton is about the only product that involves the exercise of the banking function to any great extent it necessarily results that the banks are quite willing to assume their new responsibilities created by any readjustment that may take place. The pending legislation relating to the currency question

will increase the efficiency of the banking forces so far as these are intended to serve the agricultural community. Any suggestion that demoralization will result overlooks the collective initiative of about one-third of the people of this Republic, whose history and performances show that they excel in every field of human effort in which they ever engaged. They know the value of the cotton business to them, and they have financial strength enough to protect and improve it when the law shall take away from them the handicap that it imposes upon them by the failure of the New York Legislature to do for them what the legislatures of their own States have so promptly and

Another important feature in the reform method of vending cotton will devolve increased activities upon the National Government. Already Congress has provided laws by which the grades of cotton have been rationally and honestly standardized. The weather service of the National Government is one of perfection as nearly as money and brains can make it, and this has been specialized in connection with the cotton crop. most reliable reports that are now obtained concerning the weather in this connection are obtained through national chan-There has recently been organized a Bureau of Marketing, whose activity and scope can be extended to impart in authentic form reliable information concerning the growing crops and the remnants of the former crops available to supply the world's demand. In fact, the National Government now substantially furnishes all the information that is legitimately required. Wherever improvements in this behalf can be supplied by science and money the past policy of the Government justifies the belief that these will be supplied in the fullest measure.

It has been one of the chief claims of the exchanges' right to exist that they have collected and disseminate just such information as this. No pretense was made that it would ever be done so thoroughly as is now being done by the Government, and it is proper to say that there never was a time when those who thought they knew what they were talking about believed that it would be honestly disseminated. These reports and the sources from which they were derived were the private property of an organization protected from the scrutiny of others by repeated judgments of the courts of the land. I have no fear about what is to happen to the cotton crop when the demand of the cotton farmers of the country is responded to and the incubus of these cotton exchanges removed from the industry. They are self-respecting and independent American citizens, and they are perfectly willing to abide by the consequences of any act of theirs deliberately taken. The assumed guardianship of the cotton exchanges over their affairs is most offensive to them, and they never permit an opportunity to pass without expressing their resentment thereat.

I have said that the taxing power was the only way under the Constitution of the United States to reach this evil. I spoke advisedly and repeat that statement. Many plans of suppression have been discussed from time to time which involved the exercise of the power of Congress to regulate interstate commerce. The belief was very general that this power was completely adequate for the purpose intended. Among other proposed bills relating to the subject, what is known as the Scott bill was introduced in the House of Representatives in the Sixty-first Congress. It took its name from Mr. Scott, who was chairman of the Committee on Agriculture in that body during that session. Mr. Scott was then a Republican Member of Congress from the State of Kansas. He placed the cotton growers of the South under deep and lasting obligations to him by the activity he displayed in his efforts to relieve them of the impositions that were being wrongfully imposed upon them, and it is a matter of some pleasure to me now to make that acknowledgment here. When the bill reached the Senate it was referred to the Committee on Interstate and Foreign Commerce, where it rested serenely for many months. Being interested in the subject to which it related then, as I am now, I brought it to the attention of the Democratic steering committee, and there being a vacancy on the committee having the matter in charge I was assigned to service there by the Democratic steering committee for the sole and exclusive purpose of urging a report by the committee on that bill. I undertook the service assigned to me, and, as a result, I was authorized to report the bill on behalf of the committee, which I did on the 17th of February, 1911. The supporters of the bill were not able to get a favorable report in its behalf, for there developed much opposition to it in the committee. The best that we could do at that time was to secure a report that would place the bill on the calendar, without recommendation of its passage, and leave for discussion and consideration in the open Senate the final terms of the bill. The time remaining after the bill reached the Senate was so short that it was impossible to get the necessary consent for its consideration, due largely to the

fact that the session was one known as the short session, and the constant consideration of appropriation bills made it easy for those who were interested in doing so to object to its consideration. A copy of that bill is here presented.

I ask permission at this point to insert a copy of the Scott bill. The VICE PRESIDENT. In the absence of objection, permission is granted.

The bill referred to is as follows:

I ask permission at this point to insert a copy of the Scott bill. The VICE PRESIDENT. In the absence of objection, permission is granted.

The bill referred to is as follows:

A bill (II. R. 24073) to prohibit interference with commerce among obstructions thereto, and to prohibit the mattions, and to remove the controlling of the prohibit controlling and the prohibit controlling and the message by telegraph, telephone, cable, or other means of communication between States and Territories and foreign nations. Seedings purely and the context, be construed as follows: The word "message" shall make any communication by telegraph, telephone, whreless telegraph, cable, or other the context, be construed as follows: The word "message" shall make any communication by telegraph, telephone, whreless telegraph, cable, or other the context, be construed as follows: The word "message" shall mean any person, partnership, country. The word "person" shall mean any person, partnership, country. The word "person" shall mean any person, partnership, agers and officers, and when used with reference brothon. their man participants in the required or forbidden state, and the agents and partnership and the shall mean any person, partnership, agers and officers, and when used with reference brothon. their man participants in the required or forbidden state, and the agents as a shall reconstitution of the shall be applied to or mean several persons or things.

See, 2. That it shall be unlawful for any person to send or cause to make a shall be applied to or mean several persons or things.

See, 2. That it shall be unlawful for any person to send or cause to purchase or sale for future delivery of cort of the purchase or sale for future delivery of cort of the purchase or sale for future delivery of cort of the purchase or sale for future delivery of cort of the partnership and the proposition of any message relating to any such transaction; and the transmission of any message relating to any such transaction; and the transmission of a

than one year, or both. Any person violating any of the provisions of this section may be proceeded against by information or indictment and tried and punished either in the district at which the unlawful publication was mailed or to which it is carried by mail for delivery according to the direction thereof, or at which it is caused to be delivered by mail to the person to whom it is addressed.

SEC 7. That the Postmaster General, upon evidence satisfactory to himself that any person is sending through the mails of the United States any matter declared by section 6 of this act to be nonmailable, may instruct the postmasters in the post offices at which such mail arrives to return all such mail to the postmaster in the post office at which it was originally mailed, with the word "unlawful" planly written or stamped upon the outside thereof, and all such mail, when returned to said postmaster, shall be returned to the sender or publisher thereof under such regulations as the Postmaster General may prescribe.

SEC 8. That in any proceeding under this act all persons may be required to testify and to produce books and papers, and the claim that such testimony or evidence may tend to criminate the persons giving such testimony or producing such evidence shall not excuse such person from testifying or producing such books and papers; but no person shall be prosecuted or subjected to any penalty or punishment whatever for or on account of any transaction, matter, or thing concerning which he may testify or produce evidence of any character whatever.

Mr. CLARKE of Arkansas. It will be observed that the plan

Mr. CLARKE of Arkansas. It will be observed that the plan of suppression contemplated by it was the denial of the right to use the mails and the telegraph for the interstate transmission of offers to enter into contracts for the future delivery of cotton. I was always apprehensive about the power of Congress to declare the contracts entered into on the New York Cotton Exchange to be interstate commerce, and therefore subject to be controlled by national legislation. I was, however, willing to give to the bill the benefit of every doubt. I was not at that time aware of the decision of the Supreme Court in the case of Ware & Leland against Mobile County (209 U. S., 411). purpose was then, as it is now, to be active and helpful to the extent of my humble capacity in aiding those whose purpose it is to suppress this business. I have no preference about the names of bills nor the methods that they employ, just so they are effective for the purpose. I have no sympathy with the business as conducted by the cotton exchanges, and I am the voluntary ally of anybody who will take upon himself the business of putting a stop to it. I have at all times been willing to vote for any bill championed by any Member of the Senate or House whose object is to accomplish what I so much desire in some effective and legal way. In this connection I call attention to the decision of the Supreme Court of the United States in the case of Ware & Leland against Mobile County (209 U. S., 411). The case is so applicable to the matter under consideration that I shall include in my remarks a complete statement of the facts and the material parts of the opinion of the court, in which it is declared that these cotton-exchange contracts are not interstate commerce and that they do not become so because orders are transmitted by telegraph from States other than New York, which orders result in the making of such contracts.

I have here an agreed statement of the facts, setting out in the most perfect detail the several step, that are necessary to consummate a contract transmitted from another State to New York. There is nothing omitted; the fact is that more is admitted than can be proven. The evident purpose was to make a test case, which would eternally and forever put at rest agitation as to the scope of national authority under the commerce clause of the Constitution. The court in disposing of that question rendered an opinion about half a page long, and I will tax

the patience of the Senate further to read it.

read from the decision of the Supreme Court of the United States in the case of Ware & Leland v. Mobile County (209 U. S., 405):

AGREED STATEMENT OF FACTS.

During the whole of the year 1903 defendant had an office in the city of Mobile, in the county of Mobile and State of Alabama; they also had offices in the city of New York, in the State of New York, and in the city of New Orleans, in the State of Louisiana, and in the city of Chicago, in the State of Illinois, each of which offices was connected by private telegraph wires with said Mobile office. Said Mobile (Ala.) office was in the charge of their agent, one Robbins, and was engaged in the business of buying and selling cotton for future delivery on commission for the public generally and for special customers, said business being conducted in the following way and in no other way: They would undertake, through their agent, to buy or sell a cotton-future contract for a customer in the Cotton Exchange in New York or in New Orleans, as he might select, he making at the time a deposit of money with them as a margin to protect them against loss in making such transaction for him. When the customer gave the order to Ware & Leland, either for a sale or purchase of a future contract, it was not usual for anything to be said between them about an actual delivery of the cotton, but when the transaction was commenced by a purchase or sale of the cotton Ware & Leland would immediately furnish to the customer a memorandum thereof, partly written and partly printed, upon which the following stipulations were printed: "On all marginal business we reserve the right to close transactions without further notice when margins are about exhausted, and to settle contracts in accordance with the rules and customs of the exchange on which the order is placed, it being understood and agreed in all trades that actual delivery is contemplated." and "All purchases and sales made by us for you are made in accordance with and subject to the rules, regulations, and requirements of the board of managers of said exchange, and all amendments that may be made thereto." Such agent

would thereupon transmit such order by their private telegraph line to the defendant's office in the city without the State of Alabama selected for such transaction; that such order would be thereupon executed by defendants by the purchase or sale, as directed, of a future cotton contract for such customer in the cotton exchange of the city to which such order was sent, and subject to the rules and regulations of such cotton exchange, which rules and regulations may be introduced in evidence by defendants in this cause; that said contract would be held by defendants for such customer until he ordered the same closed out, when they would sell or buy another cotton contract against it as might, be necessary to cover the same or close it out, or receive or deliver the cotton on said contract. If a profit was made on the transaction defendants remitted the same to its agent in Mobile, who paid it over to the customer; if a loss was made it was taken by the agent out of the customer's margin, or, if that was insufficient therefor, the customer was called upon for the balance. Said business was done on a commission paid defendants by the customers.

No actual delivery of cotton or grain was ever made on any such contracts, except in a few instances, when such deliveries were made where the contracts were executed, to wit, in New York, N. Y., or in New Orleans, La., or Chieago, Ill. When any such delivery of cotton was made to defendants for the customer on a purchase by him it was held by the defendants for account of the customer at the place of delivery, either in New York, N. Y., or in New Orleans, La., until ordered sold by the customer, and the proceeds accounted for y them to such customer. When they made delivery of cotton on a sale of futures made by them for a customer, the cotton was shipped by the customer for whom such sale was made from Alabama to the place of sale and there delivered through defendants to the buyer.

A similar future grain business was done by defendants at their sald office in Mobile,

OPINION OF THE COURT.

The sole question here presented is whether the statute in question is an attempt to regulate interstate commerce, for if the plaintiffs in error are shown by the foregoing agreed facts to be engaged in interstate commerce, then the statute is void, as an attempt by a State to regulate the commerce which the Constitution of the United States places within the exclusive control of Federal authority.

Interstate commerce must be such as takes place between States as differentiated from commerce wholly within a State, it must have reference to interstate trade or dealing, and if the regulation is not such, and comprehends only commerce which is internal, the State may legislate concerning it. In each case the recurring question is, on which side of the line does the commerce under investigation fall? * *

But how stands the present case upon the facts stipulated? The appellants are brokers who take orders and transmit them to other States for the purchase and sale of grain or cotton upon speculation. They are in no just sense common carriers of messages, as are telegraph companies. For that part of the transactions, merely speculative and followed by no actual delivery, it can not be fairly contended that such contracts are the subject of interstate commerce; and concerning such of the contracts for purchases for future delivery as result in actual delivery of the grain or cotton, the stipulated facts show that when the orders transmitted are received in the foreign State the property is bought in that State and there held for the purchaser.

All contracts made on the New York Cotton Exchange are to

All contracts made on the New York Cotton Exchange are to be satisfied by a delivery in the licensed warehouses in New York City of cotton that has been inspected and certificated prior to that time.

prior to that time.

The transaction was thus closed by a contract completed and executed in the foreign State, although the orders were received from another State. When the delivery was upon a contract of sale made by the broker, the seller was at liberty to acquire the cotton in the market where the delivery was required or elsewhere. He did not contract to ship it from one State to the place of delivery in another State. And though it is stipulated that shipments were made from Alabama to the foreign State in some instances, that was not because of any contractural obligation so to do. In neither class of contracts, for sale or purchase, was there necessarily any movement of commodities in interstate traffic, because of the contracts made by the brokers.

These contracts are not, therefore, the subjects of interstate commerce any more than in the insurance cases, where the policles are ordered and delivered in another State than that of the residence and office of the company. The delivery, when one was made, was not because of any contract obliging an interstate shipment, and the fact that the purchaser might thereafter transmit the subject mater of purchase by means of interstate carriage did not make the contracts as made and executed the subjects of interstate commerce.

It will be noticed that this decision is comprehensive and

It will be noticed that this decision is comprehensive and decisive of the question to the utmost point of conclusiveness. The statement of facts really admits more than ordinarily it is possible to prove against these exchanges. It is evident that the case was prepared with the view to its becoming a test case, in the decision of which every disputed question would be squarely presented and considered and finally and decisively disposed of. There is no room for attempting to distinguish the case from any other. Hereafter those interested in the question must accept it as a final disposition of the matter or seek its reversal. There is no ambiguity or hesitation about the text of the opinion. In view of this unanimous decision any attempt to direct legislation against these exchanges under the power contained in the commerce clause

of the Constitution of the United States is wholly useless. The taxing power is the only one that is left, being the only one that can be employed for the purpose, and in my opinion is the one that has always been best adapted to the service.

In making the observation that it will be hereafter impossible to pass legislation against these institutions under the com-merce clause of the Constitution I did not overlook the decision of the court in the so-called Lottery case nor the contention of those who insist that the business of transmitting messages over the telegraph systems of the country from one State to another is interstate commerce. The Lottery case was based upon the fact that the lottery ticket was a tangible thing that represented ownership of property and could be physically transported from one State to another. In the case of transactions on the cotton exchange there is no such article to be transported. The state of public opinion at the present time has not progressed to a point where these transactions are universally deemed immoral or declared illegal. In the Lottery case the law of every State made it a criminal offense to carry on the business. In the case of the cotton exchanges the Legislatures of Louisiana and New York have affirmatively authorized their business and existence by granting legal charters therefor. Besides that the Supreme Court of the United States, in the case of Bibb v. Allen (149 U. S., 490). has solemnly adjudged that the charter and rules of the New York Cotton Exchange constitute valid regulations and that a judgment will be entered and enforced against persons who deal thereon and incur liabilities in accordance with these rules. Thus the business of the cotton exchange is not locally nor by the United States Supreme Court deemed immoral nor

It appears from the statement of facts in the Ware case that the orders were transmitted from Alabama to the New York Cotton Exchange by means of a private wire, which the Supreme Court expressly holds is not a common carrier of messages as is an ordinary telegraph company in reference to general business. The decision in that case indicates that a private wire, over which the public has no right to transmit messages, is not an instrumentality of interstate commerce. the cotton-exchange business can not be conducted without the use of privately controlled telegraph wires. Its movements are so suddenly developed that it often becomes necessary to communicate instantly with their confederates at distant points and without subjecting their movements to

the scrutiny of the large number of persons employed in the receiving and delivery of ordinary messages.

In the recent case of Hunt v. New York Cotton Exchange (205 U. S., 322) one witness testified that there were a number of private wires running out of New York from its ex-changes to different parts of the country and that one of these had on its lines as many as 120 towns and cities. It will thus be seen that those who deal with the exchange have quite completely fortified themselves against any prohibitory congressional legislation based on the commerce clause.

Even if the exchanges did not have the right to construct a private line for the purpose of transmitting their own messages from State to State, as they are now declared to have under this decision of the Supreme Court, and thus place their business beyond national interference, there is no room for assuming that Congress is willing to pass a law excluding them from the right to use the ordinary telegraph company as a common carrier of messages-and therefore an instrumentality of interstate commerce-messages relating to a business which is recognized as legitimate in the State of its existence and one which is purely State commerce. The Supreme Court virtually said as much in the case of Board of Trade v. Christie (198 U. S., 248) when the contention was made that the grain exchange was not entitled to have its privately collected information and market quotations protected by injunction, since the proof showed that it permitted gambling in grain to take place on its floors. The court, said:

When the Chicago Board of Trade was incorporated we can not doubt that it was expected to afford a market for future as well as present sales, with the necessary incidents of such a market, and while the State of Illinois allows that charter to stand, we can not believe that the pits merely as places where future sales are made, are forbidden by law.

The proposition to ask Congress to exclude from the use of the telegraph as a common carrier, communications concerning a business which is strictly State commerce and locally recognized as legitimate is a step beyond any that has heretofore been taken. It is not even now done in the case of whisky legislation known as the Wilson bill, nor the bill subsequently passed and known as the Webb bill. These restrictions are always based upon the idea that the business is locally declared illegal. It would be adopting what might become a very dangerous precedent to pass any such legislation even if the power existed. We might thus turn loose a principle of constitutional law that will in time devour all State control over purely State commerce. I therefore feel entirely confident that the plan that we have adopted in the present case is the only undisputed and effective means of accomplishing the purpose that many of us have in view

Some days since I received a message from Mr. Mobley, president of the Farmers' Union in the State of Arkansas, in which he said:

The Scott bill, with which you are acquainted, will absolutely, and not probably, prevent dealing in futures. This is the bill this organization stands for.

I have very great respect for the judgment of the officials of this organization in my State, but on this occasion it is a question of opportunity of doing what all of us desire to do. The statements in this telegram indicate that the representatives of this great organization in our State do not believe that the pending amendment is sufficiently drastic in its terms in dealing with this pernicious business, and that in some way we are confronted with a choice between this method and the one provided in the so-called Scott bill. If there were such an alternative presented to me, and the Scott bill was the better one to adopt, would not hesitate for a single minute to vote for that, or any other bill that will accomplish the suppression of this business. What I want, and what the Farmers' Union in Arkansas wants. is to put a stop to this business. We are both committed to this most desirable end, and differences of opinion about mere methods must be subordinated to the accomplishment of the larger purpose. The Scott bill is not up for a vote in Congress now, and it may never be. The pending amendment is now under consideration, and within possible reach of enactment. It will accomplish everything that the Scott bill could accomplish, if valid, and will do so in a way that is absolutely free from any doubt as to its effectiveness or constitutionality.

I have interpreted the attitude of the officers of the Farmers' Union to mean that they want the business of dealing in futures in cotton abolished at the earliest possible date, and by the most drastic measure that can be framed for this purpose. I quite agree with them about that. If I had any choice between this measure and a more effective one, I should voluntarily join with them in their desire without any suggestion to do so. No such situation is presented. It is either the pending amendment or nothing at this session, and probably forever. This amendment will put an end to the business entirely in all probability, and

certainly to the most detrimental features of it.

Mr. SIMMONS. Mr. President, I should like to inquire of the Senator whether or not the Scott bill, to which he has just referred, sought to suppress this traffic by denying to those engaged in it the use of the mails, the telegraph, and the tele-

Mr. CLARKE of Arkansas. That was the principle on which

the bill was framed; yes.

Mr. SIMMONS. That was the method of suppression?

Mr. CLARKE of Arkansas. Yes.
Mr. SIMMONS. I understand the Senator to say that it is his opinion that the decision of the Supreme Court to which he has just referred holds that this is not interstate commerce, and that it is not competent for the Congress to prohibit the use of the mails and the telephones and the telegraphs for that purpose?

Mr. CLARKE of Arkansas. There is no reference to the

mails in the opinion. There is a reference to the telegraphs.

Mr. THOMPSON. Mr. President, I should like to ask the Senator from Arkansas, who has given such close study to this matter, and has furnished us this morning with such an exhaustive presentation of the subject, whether there is any reason why the other products of the farmer-wheat, corn, oats, barley, and rye-which are used as subjects of speculation and gambling on the board of trade the same as cotton, can not be included in this amendment in some form?

Mr. CLARKE of Arkansas. As a matter of principle there is not any distinction, and there is not any reason why relief should be granted to one class of agriculture and denied to others. It was a mere matter of policy. I understood the cotton business. I did not understand the grain business. I thought some one interested in that particular branch of agriculture would join us in this effort.

Mr. WILLIAMS. It is not carried on in the same way.
Mr. CLARKE of Arkansas. I stated as much. I am perfectly willing to vote, at any time or under any conditions, to extend the relief that I contemplate in this amendment to the cotton raisers and the grain raisers, or any other class of agriculture in the country.

Mr. THOMPSON. I have frequently talked about this matter with Congressman Scott, whom the Senator has mentioned, and who was a neighbor of mine at one time. Did not his bill contemplate also the inclusion of grain?

Mr. CLARKE of Arkansas. I am not prepared to say what it originally included, but when it reached the Senate it related

Mr. THOMPSON. Will the Senator present to the Finance Committee the idea of including the grains which I have men-

Mr. CLARKE of Arkansas. I should think that ought to proceed from the Senators from the grain-growing regions, would not assume to represent them in the matter.

Mr. THOMPSON. I think it is just as important that grain should be included as that cotton should be included.

Mr. SMITH of South Carolina. Mr. President, I wish to submit some remarks in reference to the amendment offered by the

Senator from Arkansas [Mr. Clarke].

I desire to say in the beginning that I am heartily in favor of the principle involved in his amendment. I wish to state to the Senate, however, in order that its Members may thoroughly understand this question, that the thing about which the cotton raisers of the South are complaining is the nature of the contracts on the exchange. The matter is a technical one, and therefore it will require some little explanation.

Under the terms of the New York contract there are 15 or They did have at one time, I believe, 37 grades. more grades. In the middle of those grades there is a grade known as "middling." They would sell a contract, basis middling, with a proviso in the contract that the seller of the contract might have the option of delivering on that contract anything from the lowest and most uncommercial to the highest and finest grade of cotton. The consequence was that the purchaser of the contract never would know what grade of cotton he was

going to get.

The practical working of the matter is that the grade comarbitrarily fix the difference between middling and the grades above and the grades below for 90 days. The result is that if an individual bid 10 cents, basis middling, and the committee had fixed the difference between that and ordinary at 1 cent, when the purchaser came to demand the specific fulfillment of his contract he would get ordinary delivered to him at 9 cents. He bid 10 cents for middling, and he would get ordinary, at the option of the seller.

The result was that if the general trade would not accept his ordinary at 9 cents, but would give him only 8, he lost \$5 The result was that the next time he bid on middling he bid without reference to the value of middling-without reference to the law of supply and demand for middling-but bid with reference to what he was probably going to get, which was ordinary, at a fixed, arbitrary difference between what he bid on middling and what he got ordinary for. Therefore he bid 9 cents for middling without regard to its real value.

I' can submit papers to the Senate to show that middling cotton on the board in New York for a long period of time was quoted, say, at 10 cents a pound, when the spot middling in the warehouses, where the buyer would have the right to go and sample each bale and select his 100 bales of middling, was from a cent to a cent and a half above the board price.

It is that demoralization from which the farmers of the South beg relief. I introduced a bill requiring that each and every contract for the future delivery of cotton should specify the particular grade contracted for and that such grades as were contracted for should be delivered. Upon investigation I found that what the Senator from Arkansas says is largely true-perhaps entirely so-that the courts have ruled that a contract originating in one State entered into by citizens of another State is not a subject of interstate commerce.

I then took occasion to write to the farmers of the different cotton-growing States and submitted to them the amendment

proposed by the Senator from Arkansas.

They claim that all they desire in the world is that if there is a contract for the future delivery of cotton the grade shall be specified in the contract, and, upon demand, shall be delivered. They say that if that were done, as the Government has standardized nine grades, each grade being a distinct commercial commodity, as much so as if it were a different article, no man would go short, and there would be no complaint of this manipulation of the market.

I wrote letters on the subject to a number of farmers' organizations, and in response I got a letter, which I will read, from the Farmers' Union. I just want to show their attitude in reference to the matter.

The Clarke amendment taxes all contracts. Therefore, no matter who sells a contract, whether basis or specific, if for any reason he can not fulfill the contract, no matter how honest he may be when he makes it, he has to pay this tax under the Clarke amendment. But we farmers-and that is my occupa--say, if you can, eliminate the bad contract from the good, so that if you do not conform to a specific grade in your contract you shall pay this tax. The reason is that it is unfair; it is gambling not to specify the grade; it is a pure case of collusion for the purpose of buying and selling at your own sweet will thousands and millions of bales of cotton that never were in existence. But you do not dare to sell a specific contract under those circumstances, because were you to sell it to me at a specified price, say 11 cents, and it specified middling according to Government standardization, I could take that and sell it to a miller, and under the law he could demand fulfillment of the contract.

Without explaining any of this, I wrote to these men and asked them their opinion. I believe that if the Clarke amendment were amended so that where the specific grades were named the seller must undertake to deliver as every spot purchaser does to-day, you would eliminate this confusion, and put trading in cotton upon a legitimate basis, upon which it is rightfully entitled to stand.

I wrote to the different farmers' organizations this letter:

I wrote to the different farmers' organizations this letter:

Dear Sir: I am sending you a copy of an amendment to the tariff bill proposed by Senator Clarke of Arkansas.

I want you to study the provisions therein and write me fully as to whether or not you think it would be beneficial to the cotton growers. It might be well that you discuss this with your neighbors.

I have been endeavoring to do all I could for the benefit of those who produce the cotton, and I do not desire that any legislation, however beneficial it may seem, to pass which in its practical operation would put another burden upon us.

Awaiting your early reply, I am,

Sincerely, yours,

E. D. SMITH.

I telegraphed on one occasion the exact purport of that letter to the Farmers' Union of South Carolina, in convention as-

sembled at Isle of Palms, Charleston, and received this reply: CHARLESTON, S. C., July 25, 1913.

E. D. SMITH.

Unit'd States Senator, Washington, D. C.:

Your wire received. South Carolina Farmers' Union unanimously indorse your bill requiring cotton to be delivered by grades specified in the contract. Rejected. Disapproved of the Clarke amendment. Letter will explain fully in a day or two.

E. W. Dabbs,

E. W. Dabbs, President South Carolina State Farmers' Union.

Here is another letter, and these I am going to ask to have put in the RECORD. Here is one from a farmer of Chester,

CHESTER, S. C., R. F. D. 2, August 4, 1913.

Hon. E. D. SMITH, Washington, D. C.

DEAR SENATOR: Yours of July 26 to hand, in reference to Senator Charke's proposed amendment to tariff bill. I am no expert on this matter, but think the tax will come off the producer. You know the exchange's cotton factors, mill men, and merchants, who buy contracts to protect themselves, will deduct the one-tenth of 1 per cent from price paid the producer. Hoping you will be successful in your next campaign, I am,
Yours, very truly,

C. A. McLurkin.

I have another here from a different part of the State: FORT LAWN, S. C., August 4, 1913.

Hon. E. D. SMITH,

United States Senate, Washington, D. C.

Dear Sir: Your communication of July 26 received; also, copy of amendment to tariff bill as proposed by Senator Clarke. I would have written you sooner, but wished to talk the matter over with some of the most prominent farmers and business men of the community and get their views before writing you. Without exception the people with whom I have talked over this matter are of the opinion that the amendment will do us as cotton growers more harm than good; in fact, as we see it, we are very doubtful about its doing any good at all, while we as farmers will in an indirect way have the tax to pay—as we do in the 30 pounds tare per bale. Should this amendment come before the Senate we trust you may see your way clear to vote against its passage and to do all you can to have the amendment killed.

Thanking you for writing me and for copy of amendment, I am,

Very truly, yours,

* W. C. McFadden.

That is practically the tenor of quite a number of letters which I shall ask to have put in the RECORD, along with these telegrams.

I want to say that the farmers do not believe any harm can be done to them if the contracts are so made as to specify the grade contracted for and the grade that is contracted for is made according to Government standardization. The Government has now for the first time in the history of cotton growing standardized the grades. I propose as an amendment to the amendment proposed by the Senator from Arkansas [Mr. Clarke] that the contracts hereafter shall specify the grade or grades contracted for and such grades as are contracted for

shall be according to the Government standardization. And such contracts as conform to this shall be exempt from taxation, If this is done it will guarantee an approximately honest It will give the man who produces cotton a market in which he can sell his cotton at any time if he wishes to do so. He can name the grade or grades and deliver these grades without having to pay a tax in case he is unable by any reason to make deliveries. Under the present system it is the latitude given the seller that has caused all the trouble and dissatisfac-Under the present form of contract on the exchanges the seller has the option of delivering anything on this contract from the lowest to the highest grade. The Senator from Arkansas has quoted Mr. Lewis W. Parker as saying he would not demand delivery on a New York contract, but would run from it. The reason for this is, as I have stated before, that the seller of that contract in New York would not be likely to deliver spinnable cotton, but would deliver some low-grade stuff overvalued, which Mr. Parker could not take at the price tendered and spin or sell without a loss. Under the amendment I propose the grade would be specified, and Mr. Parker or any other buyer in demanding deliveries would get what he bought and no harm would be done.

Mr. ROBINSON. If the Senator will find it convenient, I would be glad to have him discuss the proposition as to the power of Congress under the Constitution to prescribe the forms of contract which shall be entered into upon the exchange.

Mr. SMITH of South Carolina. I am under obligation to the Senator from Arkansas [Mr. Clarke] for having solved this problem. I give him all credit for suggesting to bring it under the taxing power of the Government.

By this means we can place a nominal tax on the legitimate contract and a heavy prohibitive tax on the present form of contract that has brought about all this deception and fraud.

Mr. CLARKE of Arkansas. Will the Senator permit me to ask him how you would distinguish and define the difference between him and myself. I agree that a specific contract is vastly better for the buyer, but I can not see that it has any influence whatever in preventing manipulation or preventing fluctuations that will affect the price. The price quotation now is based on one grade, and that is middling. In the Liverpool Exchange they are confined in making deliveries to four grades of good cotton, and fluctuation takes place there. In the grain business they are confined to four grades, and it is substantially similar. It was proved in the Christy case which I cited in my remarks that I submitted to-day that 95 per cent of the products dealt in there were purely speculative. The relief you propose is of great advantage to those who go to the New York Exchange and buy middling cotton. For instance, take a spinner hedging. He buys a lot of cotton in order to protect himself against the uncertainty of the market growing out of the manipulation of the exchanges. goes upon the exchange and sells an amount of cotton equal to the amount of cotton bought, not with a view of delivering the cotton, but simply to prevent the manufactured fluctuations in price from causing him loss on his actual cotton.

Mr. SMITH of South Carolina. If the Senator will allow me, the reason why they do not go to New York is because New York understands, by years of study from day to day, how to formulate a contract that would eliminate any spot transaction and drive the seller and buyer away who would put it upon a legitimate basis to do spot business.

Mr. BRANDEGEE. Mr. President—
The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Does the Senator from South Carolina yield to the Senator from Connecticut?

Mr. BRANDEGEE. I do not ask to have anyone yield. I rose to make a parliamentary inquiry. What is the regular

The PRESIDING OFFICER. The Chair thinks the amendment of the committee, which the Senator from Arkansas dis-

Mr. THOMAS and others addressed the Chair. -

Mr. SMITH of South Carolina. I yield to the Senator from

Colorado. He addressed me before others.

Mr. THOMAS. I merely wanted to ask the Senator why these contracts, so called, which have been the subject of discussion this morning, are called gambling contracts? My understanding of a gambling contract is that it has invariably some element of chance.

Mr. SMITH of South Carolina. There is no element of chance in this. It is heads I win and tails you lose.

Mr. THOMAS. Instead of being called a gambling contract it should be called a thimble-rigging contract or a bunko

Mr. SMITH of South Carolina. That is near it.

Mr. THOMAS. In which no one except the cotton-exchange man who makes the contract has any possible opportunity of getting out.

Mr. SMITH of South Carolina. That is true. The Senator from Arkansas referred to the matter of contracts which my friend Parker was speaking about. Here is an illustration to the point. I think Senators will see the pertinency of this illustration. Sparrows migrate to my section of the country in the winter. The grass seed are thrown down by the frosts. This is their food. Sometimes there comes a snow, which covers their food for days at a time. These little birds are unable to scratch the snow away and soon face starvation. Under these circumstances I used to go cut in the old vegetable garden at home, rake the snow away from a place, say 12 inches square, get a good heavy board, about the same size, place a stick as a prop under one end and tie a string to the stick, have the string long enough to lead to an old out house. I would then scatter grits or other food under this deadfall, get in the old house and hold the string and watch. At first one or two of the hungry birds would come and, forced by hunger, would hop under this deadfall and fill themselves with the food I had placed there. I did not attempt to catch these first ones. used them as decoys. They would fill themselves, and other hungry, starving ones, emboldened by what they saw these do, would then crowd under the deadfall, and when I thought as many were under as were coming, I would jerk the string and pull the prop from under the deadfall and get the whole crowd. This is what the exchanges do under the present system. allow a few to buy contracts and make some money. entices others to come, and when they think they have about as many as are likely to come with this bait they pull the prop from under the market and catch the suckers as I caught the

Mr. THOMAS. I should like also to inquire before the Senator takes his seat, because my memory is not entirely clear about it, whether some members of this exchange or the exchange itself were not two or three years ago detected in filching information from the Agricultural Department in reference to the prospect of the cotton crop, and using that also for the purpose of making their sure gain surer?

Mr. SMITH of South Carolina. We had information to that effect. I happened to be a member of the organization, a member of which detected it, and he said that there was a certain window-curtain telegram acting here in Washington where they got that information, and the information was sold.

But, Mr. President, I want to repeat that I am heartily in sympathy with the amendment proposed by the Senator from Arkansas, in so far as it will affect the unlimited contract; if he will just make a differentiation between the unlimited contract, as now sold on the New York exchange, and in a measure on the New Orleans exchange as well, and a specific contract, I think the legislation will be as near perfect as we can make it. If, as I have suggested, he will differentiate between the two. those that specify the grade, and the grades specified be according to Government standardization, be practically without a tax, and place the tax proposed upon those contracts that do not specify the grade to bear the tax that he proposes, then I am sure the farmer will be satisfied and will get what he is entitled to.

It has been suggested in this debate that the millman, the mill owner, desires the modification that I am advocating. The farmers do not want to be placed at the mercy of the mill owner, for the reason that he would be in a position to dictate prices in a measure as mercilessly as the exchanges do. I do not care who buys my cotton so long as he is willing to buy it fair and give me a price which is fair, which is according to the real value of the cotton. I and the other farmers in this country here and now protest against being put up against a bunco game if there can be any legislation to relieve us. do not want, however, to jump out of the frying pan into the fire and in getting rid of the gamblers on the exchange force ourselves into the hands of the millmen. All we ask is a fair, square deal, force the seller to deliver what he sells, and not allow him to sell basis middling and deliver dog tail.

Mr. RANSDELL. Before we get through this subject I should like to ask the Senator from Arkansas a question. Mr. SMITH of South Carolina. I should like to conclude my remarks, unless the Senator wishes to ask it in my time.

Mr. RANSDELL. No; I thought the Senator was through.
Mr. SMITH of South Carolina. Mr. President, I think the
Senate will see that I am heartly in accord with the Senator The only objection I have to the Clarke amendment is that it does not do like the Hatch bill, put \$25 a bale on unlimited contracts and put it out of existence at once. Why try to raise a revenue out of the gambling processes of the

New York Cotton Exchange without relieving the suffering, toiling American farmer? Why not come out with courage and say we will put a stop to this iniquitous practice, we will tax it out of existence, and not attempt to raise a revenue out of this iniquitous oppression of the people?

Mr. CLARKE of Arkansas. The Senator from South Carolina

seems to be addressing his remarks to me.

Mr. SMITH of South Carolina. No; I am not. But the question is whether you put a tax of \$25 on that form.

Mr. CLARKE of Arkansas. What form?

Mr. SMITH of South Carolina. The form of contract as it

Mr. CLARKE of Arkansas. It does not deal with it at all. I think it is a natural evolution of the business. I think these restrictions were intended to prevent persons from carrying on the business. They are not engaged in delivering cotton. They do not buy cotton. The contract you are insisting upon is to help the bulls in their fight with the bears. What I want to do is to prevent manipulation on the New York Cotton Exchange that will reach back to the producers. We are not now putting a tax of \$25 a bale. If there was any chance to have had it considered at this session, I would put \$25 or any other number of dollars that would stop the business.

Mr. SMITH of South Carolina. Mr. President, I merely wish to say, in reference to the insinuation about bulls and bears, as a matter of course every fair-minded man wants whatever commodity is put upon the market to be measured as near as possible by the law of supply and demand. For the last 60 years we have not got anything like a fair price for cotton. I believe that the cotton growers of the South to-day would be independent and have good homes and educated children if it had not been for that miserable iniquity in New York. I am trying to break up that iniquity, and in putting it out of business I

Mr. CLARKE of Arkansas. The Senator seems to be confident of his views. Permit me to ask him a question. I wish he would explain, so we can understand how it happens, if speculators are deterred from going to the cotton exchange how anybody is going to pay that tax.

Mr. SMITH of South Carolina. It is not deterred. A man goes in with an iniquitous proposition of hedging. What do we

want with hedging?

Mr. CLARKE of Arkansas. I am asking a question,

Mr. SMITH of South Carolina. I am answering the question.
Mr. CLARKE of Arkansas. I asked the Senator a question
which I suppose is proper. I hope the Senator will answer it or make some rational explanation that would be accepted by those who understand the matter. How are they going to transfer to the cotton producer of the South a tax that is never paid?

Mr. SMITH of South Carolina. I will answer the Senator, if he will allow me, categorically. Say, for instance, I am the manufacturer. I say to you I want a thousand bales delivered at current prices, say at 10 cents a pound. You say, "I will de-liver a thousand bales of middling in October." You go into the exchange to hedge. The exchange says you have got to pay a tax of \$50 for this lot and \$15 commission, making \$65, and the exchange will lower the Liverpool price from what it is down to cover that end-

Mr. CLARKE of Arkansas. Does the Senator concede, therefore, the exchanges can fix the price they pay for that cotton?
Mr. SMITH of South Carolina. I think that within reason-

able limits they are doing it now.

Mr. CLARKE of Arkansas. Then the Senator thinks there should be a specific contract made that would continue them in the business

Mr. SMITH of South Carolina. It ought not to continue

them in business unless the term is specific and without—
Mr. CLARKE of Arkansas. Why do we have the cotton exchanges at all then?

Mr. SMITH of South Carolina. I say if a man was in a legitimate business

Mr. CLARKE of Arkansas. I do not think there is any legitimate dealing because the person never expects that it can be legitimate.

Mr. SMITH of South Carolina. I am trying to eliminate the middleman, and if the exchange exists let it exist legitimately.

Mr. WILLIAMS. I should like to ask the Senator from South Carolina, if it be true that this 50 cents per bale can be shifted to the cotton producer, can he make that appear by any argument whatever which does not make it equally clear that all speculative expenses now incurred upon a man are shifted to the producers?

Mr. SMITH of South Carolina. I have claimed that all along,

and that is what I am trying to get rid of.

Mr. WILLIAMS. If that be true, does not the Senator admit that this bill will to some extent decrease the amount of speculation, and therefore decrease the amount of future business, and therefore decrease the amount of expense which could be shifted to the producer?

Mr. SMITH of South Carolina. That might be, but the amount decreased might be offset by the burden he bears in paying the 50 cents a bale on his hedge, whereas if you deliver

a specific contract, what is the use of hedging?

Mr. WILLIAMS. There is one more question I want to ask the Senator. It is if in his opinion this bill will not increase the number of actual deliveries of cotton purchased for future de-

Mr. SMITH of South Carolina. If you will amend it by putting in a contract that is legitimate and fair and square and

honest, I think you will eliminate the unlimited contracts.

Mr. WILLIAMS. I did not ask what would be done if amended. I asked the Senator if this bill as it is now will not have the tendency of increasing the number of deliveries actually made of cotton bought for future delivery, and will not the refunding of 50 cents tax upon the actual delivery have the effect of increasing the number of deliveries, and if it have the effect of increasing the number of deliveries, will it not have the effect of increasing the number of bales the cotton man makes, and if it increases the number of bales of cotton that must be actually purchased, does not that increase the demand and has not that a tendency to increase the price?

Mr. SMITH of South Carolina. The Senator from Mississippi is too familiar with the cotton market to ask me seriously that question, for the reason that with the unlimited contract as it is now what would hinder these individuals from specifically delivering, but delivering, as they do now, dog tail on the

middling contract?

Mr. WILLIAMS. Suppose they deliver dog tail; there would still be an increased number of actual sales of cotton of some sort delivered, and of course if your dog tail would be exhausted you would have to buy some other cotton.

Mr. SMITH of South Carolina. When a man receives this undesirable cotton and finds he can not dispose of it he will retender it, and if there are 50,000 bales of that kind of cotton

he can settle a million-bale contract.

Mr. CLARKE of Arkansas. Or an infinite number of bales. Mr. SMITH of South Carolina. Yes; he can take 50,000 bales of this unmerchantable cotton and settle a 50,000,000-bale contract against it, because a purchaser of one of these contracts when tendered this undesirable stuff can receive it and then retender it. The seller then says, "I have actually delivered your cotton, you have accepted delivery," and therefore he avoids the tax. And in this way I believe they could avoid in a large measure the operation of the law. What I want to do is to force them to sell a specific thing and deliver the thing

they sell.

Mr. CLARKE of Arkansas. Before the Senator leaves that point I wish to ask him a question. The Senator says there are

a great many grades that you find in a contract.

Mr. SMITH of South Carolina. I would define the grades.
Mr. CLARKE of Arkansas. You would put on a penalty of
50 cents a bale if they failed to carry out the contract.

Mr. SIMMONS. I wish to ask the Senator a question. do not know that I understand exactly the amendment that he proposes. Upon what conditions does he propose to tax the transaction?

Mr. SMITH of South Carolina. To tax the present form of contract, which is practically done by the amendment of the Senator from Arkansas, and to add a proviso to that amendment exempting from taxation those contracts which specify the grades according to Government standardization, thereby making the law constitutional.

Mr. SIMMONS. The Senator does not understand me. Suppose this contract is drawn according to the form you suggest, Must there be an actual delivery in order to escape the tax?

Mr. SMITH of South Carolina. Oh, no.

Mr. SIMMONS. Then, if I understand the Senator, if there is a contract in the form he has described here there would be no tax.

Mr. SMITH of South Carolina. Practically none. Mr. SIMMONS. There would be practically no tax. let me ask the Senator this question: What per cent of those

dealing in these futures actually demand a delivery?

Mr. SMITH of South Carolina. The Senator from North Carolina misapprehends the nature of the contract. Where the contract is made specific rather than basic, no millman would go to the expense of employing a broker to purchase for him when he could go on the exchange and purchase as specificallyas he does from the broker. Therefore you would have the exchange as the actual medium through which cotton was bought and sold, spot cotton.

Mr. SIMMONS. Yes; but I understand the Senator to say that his proposition is that if the contract specifies that there is to be a delivery within one or two grades-

Mr. SMITH of South Carolina. No; a specific grade. Mr. SIMMONS. Yes, within one or two. If there is a delivery made it must be made in accordance with the terms of the contract.

Mr. SMITH of South Carolina. It must be made of that

Mr. SIMMONS. My understanding is that about 10 per cent of those who buy these contracts probably ask for a delivery.

Mr. SMITH of South Carolina. Under the present contracts?

Mr. SIMMONS. Under the present contracts.

Mr. SMITH of South Carolina. Ninety per cent buy without

any view of delivery at all.

Mr. SIMMONS. If the Senator from South Carolina will allow me, the reason—

Mr. SMITH of South Carolina. Just one minute. They do not buy them with any purpose of ever asking for a delivery.

Mr. SIMMONS. Now, how will you stop this 90 per cent of speculative dealings by prescribing a more drastic form of contract?

Mr. SMITH of South Carolina. For the simple reason that anyone on the floor of the Senate knows that as long as the seller has the option of delivering anything within 27 grades regardless of the law of supply and demand, at a difference fixed by himself, he has got an open-and-shut game; but when he sells a specific commodity short he may get himself squeezed, and he takes no such option. Besides, the millman will not buy on the exchange to-day for this very reason, that he does not know what he is to get. Mr. Parker said they would do nothing of that kind because they can not buy middling and get middling.

Mr. SIMMONS. I can understand, I think, readily how this would be a relief to the miller, how it would enable him to require delivery according to the terms of the contract. It would be helpful to him, no doubt; but what I understand the Senator from South Carolina wants to do is not only to protect the miller, the man who wants to enter into a legitimate contract, who expects delivery and who wants delivery, but he wants to suppress this fictitious dealing on the part of those who buy without any purpose of ever demanding delivery.

Mr. SMITH of South Carolina. That is what I understand.

Mr. SIMMONS. There we have one man selling with no expectation of ever being called upon to deliver. We have another man buying with no expectation of ever intending to call for a delivery. Now, how are you going to stop it? How would it tend to stop that kind of dealing in cotton futures by simply saying if you prepare a contract with certain specifications in it there will be no tax on it and it will be a legitimate con-

Mr. SMITH of South Carolina. For the simple reason, Mr. President, that, as I take it now, if I buy a lot in the city of Washington and put up an option no law in this country can prohibit me from forfeiting my option and canceling the contract. But there is the lot specified. I know what I am doing. But what sort of a contract would it be if I might buy a lot in the city of Washington for a stipulated price, and the seller of that lot was to specify in the contract that he was to deliver me any other lot that he pleases and fix the difference between the one he sold me and the one that he was going to deliver. What kind of a contract would that be, unless I go into it as a speculative venture on a general rise of real estate in Washington?

Mr. SIMMONS. I ask the Senator if he does not think at present that 90 per cent of these contracts are of that nature. that both parties to the transaction understand it to be of that nature, that they will enter into that, and do not care what the form of the contract is, and you will not, by making a more specific contract than is now required or taking the sole option away from the seller and giving the buyer an option, stop that kind of a contract, because they will get out of it in time.

Mr. SMITH of South Carolina. Before I take my seat I wish to correct the Senator.

Mr. SIMMONS. I do not profess to understand it thoroughly. Mr. SMITH of South Carolina. The Senator is demonstrating that he does not.

Mr. SIMMONS. The Senator had experience and does know * a great deal about it, and I wish to get his view on the subject.

Mr. SMITH of South Carolina. Here are some of the letters that I have received from farmers on this subject:

OWINGS, S. C., R. F. D., August 1, 1913.

Hon, E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Yours in reference to Senator Clarke's tariff amendment received.

I have advocated a policy to not hamper capitalists in developing the resources of our country, but at the same time to protect the people against oppression of capitalists.

If the exchanges' future trading in cotton are made to deliver the cotton in grade, etc., I rather think they are a protection to the farmer.

otton in graue, farmer. Very truly, yours,

WM. P. HARRIS.

GAFFNEY, S. C., August 4, 1913.

Mr. E. D. SMITH, Washington, D. C.

DEAR SIR: Your letter of July 26 received, with Mr. CLARKE's amendment inclosed. Both have been carefully read, and, in reply, will say that we, the citizens of White Plains section, deem it best for the interest of the country to have free cotton.

We heartily indorse your stand in regard to this amendment.

Respectfully.

Respectfully, M. C. LIPSCOMB,

WINNSBORO, S. C., August 22, 1913.

Winnsbord, S. C., August 22, 1913.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: I notice that the Clarke amendment to the tariff bill will be up for consideration in a few days. To my mind this is a rather drastic measure, and is not the remedy for the evils of the cotton-exchange system.

I think its passage will so upset the whole cotton business that prices will be seriously affected. I do believe that the exchanges should he forced to adopt the Government standard of types or grades, having middling cotton as a basis, and not be allowed to deliver any cotton contracts below a certain grade, and that grade should always be of spinnable cotton. In this way a few thousand bales of unmerchantable cotton could not so seriously affect the price of the whole cotton production.

Very respectfully, R. Y. TURNER.

GAFFNEY, S. C., August 25, 1913.

Hon. E. D. SMITH, Washington, D. C.

Dear Sie: Your letter and amendment to the tariff bill received, and, after careful consideration, I am unable to see wherein the farmer would be materially benefited in the passage of said amendment, because if a tax was put on transaction of cotton in this manner the farmer would have to foot the bill after all, and the people who have the money usually carry things their way.

Yours, very truly,

T. H. LOCKHART.

SUMMERTON, S. C., August 9, 1913.

Summeron, S. C., August 9, 1913.

Hon. E. D. Smith,

United States Senate, Washington, D. C.

Dear Sir: I am in receipt of yours of some days ago in reference to license on cotton futures, together with a license on all sales of cotton. Now, I will frankly admit my inability to suggest a proper course to pursue; but it seems to me I see considerable red tape around getting the tax back on legitimate sales and delivery of the actual cotton; and I think we best go slow on all matters like this, and even if we tax cotton futures alone, we don't know what effect it would have on the great cotton markets of the world. Therefore, I don't look upon the bill with much favor. with much favor.

O. C. SCARBOBOGII. Yours, sincerely,

MONTGOMERY, ALA., July 24, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. SMITH, Washington, D. C.

Dear Friend: In reply to yours 18th July, I understand in case the Clarke amendment to tariff bill passes and goes into effect the cotton people propose to operate in Canada or Liverpool or both.

It seems to me, to make matters effective, both yours and the Clarke bill should pass. I like your bill excepting as to the delivery of grades, two above or below on any contract, say, above low middling, and only one below low middling; that is, one grade above or one below on low grades.

CHAS. L. GAY. Yours, truly,

CAMDEN, S. C., July 28, 1913.

CAMDEN, S. C., July 28, 1913.

Senator E. D. Smith, Washington, D. C.

Dear Sir: In reply to your favor of the 26th instant relative to the Clarke amendment to the tariff bill. I beg to say that in my opinion it will, if passed, work a hardship on the cotton grower. It will leave the price in the hands of powerful mill syndicates and strong spot men, which will naturally have a depressing influence.

Yours, truly,

W. L. DE PASS.

WISACKY, S. C., July 30, 1913.

Hon. E. D. SMITH, Washington, D. C.

DEAR MR. SMITH: As far as my limited judgment goes, I am of the opinion that the Clarke bill will be against the best interest of the

opinion that the Clarke bill will be against the South.

At our State union last week at the Isle of Palms we had an encouraging meeting. It was well attended.

The union placed itself on record as opposing the Clarke bill, but indorsed your bill regulating the cotton exchange on future contracts as regards grades, etc. The cotton belt needs for the Government to standardize grades and enforce its standardization.

Wishing you much success, I am,

Yours, very truly,

ROBE. M. COOPEN.

KEMPER, S. C., July 30, 1913.

Hon. E. D. SMITH, United States Senate, Washington, D. C.

Hon. E. D. SMITH,

United States Senate, Washington, D. C.

Dear Sir: Yours of 26th to hand. I don't think that I know enough about dealing in cotton futures to offer any suggestion as to Mr. Clarke's proposed amendment. I am not much in favor of selling cotton for future delivery. But, Mr. Smith, there is one thing in regard to the sale of cotton that I am anxious to see. That is a standard grade, so that every buyer and every farmer can tell what his cotton is. In other words, if a bale of cotton will grade middling in Wilmington, N. C., or Norfolk, Va., it ought to grade middling in Charleston, S. C., or New York or anywhere else. But this does not seem to be the case, and the local cotton buyer is at a loss how to grade the cotton to suit the different exporters. This is not only hard on the buyer, but the farmer, the man that tolis and produces the cotton, is not getting what justly and honestly belongs to him, and it seems to me that there ought to be a standard adopted by the National Government whereby every intelligent farmer could know just what his cotton was. I think this would also be an inducement to the producer, let him be landlord or tenant, to try to take better care of his cotton in gathering it. Let him know that his cotton would be sold on its merits, that he would get what it was actually worth at the time he made a sale.

Would be glad to hear from you on this subject. Let me know what you think about it.

Very respectfully,

C. P. Hayes.

BURTON, S. C., July 31, 1913.

Hon. E. D SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Your letter of 26th instant inclosing amendment to bill

H. R. 3321 was received and carefully considered. While we know that our
people lose a good deal by dealing in cotton futures, still it seems to
me that such restrictions as are proposed to be placed on even bona
fide sales for future delivery would have a decided tendency to reduce
the price of cotton. Having to pay the tax and have it refunded later
would prevent many sales. Anyway the whole thing would have a
depressing effect on the cotton market, in my opinion.

I think we owe more to the cotton growers than to the foolish
investors in cotton futures. Better let the speculators take care of
themselves.

Yours, yery truly.

Yours, very truly,

W R. EVE. ABBEVILLE, S. C., August 1, 1913.

Mr. E. D. SMITH.

DEAR SIR: Your letter received and, after thinking the matter over, I don't believe it would be of any benefit to the people, as not more than one-third of the people own land. It would be great to the land owners. Very truly, yours,

LAURENS, S. C., July 31, 1913.

Hon. E. D. Smith, Washington, D. C.

My Dear Sir: Your letter to several of your friends in regard to the Clarke amendment has been called to my attention, and the amendment is regarded by all well-informed business men and farmers among them as a direct tax of 50 cents per bale on every bale of cotton grown and sold from the fields of the South. My main source of income is from the farm; all that I have is practically invested in farm lands, and I would regret to see any legislation put into effect that would handicap the great underlying product of the southern farm. Of course, it would work all right for the large cotton corporation or large manufacturing corporation, who would be glad to bear cotton to the lowest possible price and buy in their supply without regard to even the cost of production. They would be able to command capital when the smaller cotton merchant and the conservative cotton man who is not "nervy" enough to take his chance without some kind of insurance such as is given by the Cotton Exchanges of New York and New Orleans, thus taking out of our market the element of competition, which is the life of all trade. The result would be the whole business would be transferred to Liverpool and other foreign markets of the world, with the discrimination against us of the above amount. I am satisfied that you appreciate the situation and will look after the interest of the farmer in the premises. With best wishes, I am, as ever,

Yours, truly,

W. T. Gray. Hon. E. D. SMITH, Washington, D. C.

Truly,

CHESTER, S. C., July 30, 1913.

Hon. E. D. SMITH,

Senate Chamber, Washington, D. C.

Dear Sir: Replying to your letter of July 26, requesting an opinion upon the amendment to the tariff bill proposed by Senator Clarke of Arkansas placing a tax on the buying and selling of cotton for future delivery, I beg to say that I have given the measure careful thought for some time since its introduction and as yet have falled to see any good reason brought forward to justify its passage. I suppose though that there is plenty of ground for a difference of opinion as to the exact results that would be brought about by this amendment, but I am unable to see why cotton alone should be singled out for the trial while all other commodities are left as they are. Living in the cotton belt as I do, I wish to see cotton bring as much as possible, and I am persuaded that any commodity is better off when not interfered with by the Government. For this reason I am opposed to the amendment.

Most sincerely. J. R. HAMILTON.

OLAR, S. C., August 1, 1913.

DEAR SIR: I am opposed to dealing in cotton futures at all. If people want to speculate on cotton, let them buy and sell actual, not imaginary, cotton.

I know you are trying to legislate to help the farmers, and I hope you will be able to do so.
Yours, very truly,

H. W. CHILTY.

BENNETTSVILLE, S. C., July 31, 1913.

Bennettsville, S. C., July 31, 1913.

Hon. E. D. Smith, Washington, D. C.

Dear Senator: Your copy of the Clarke amendment received, and in reply will say that several years ago it was the common custom to put on our cotion 9 yards of bagging, and there was nothing said or thought about it. Then the buyers decided that they only wanted 7 yards. If the cotion had more than that they deducted 50 cents per bale. Then, to remedy the matter, our legislature made it a misdemeanor to deduct the said 50 cents. What did the buyers do? They deducted it when they priced the cotion, and we still have to put on the 7 yards or pay that same old 50 cents.

Now, Senator, if the Clarke amendment becomes law, I know who will have to pay that one-tenth cent. It will be you and I. Frankly, I think that it would be rather premature to adopt that amendment just now. Were we able to name the price of our cotton it would be a good thing to adopt the proposed legislation; but such not being the case, I think we had better not wave the red flag in the face of the financial bull too much.

I and, I think, all intelligent people are aware of what you are doing and have done for the cotton farmer. Wish to thank you for it.

Here's hoping that you can defeat the Clarke amendment.

I beg to remain, as ever, yours.

Hon. E. D. SMITH, Washington, D. C. ABBEVILLE, S. C., July 29, 1913.

Yours, truly,

J. L. McMillan.

LAURENS, S. C., July 29, 1913.

Mr. E. D. SMITH, Washington, D. C.

Dear Sir: Your letter of the 26th to hand and noted.

I am not posted or not enough up on the matter to tell whether or not this amendment would be beneficial or not to the cotton grower's interest. All I can say that you look to our best interest and do what you think would be best for us, as I know that you are better posted to these affairs than we are. I know that you are wide awake and will do what you think best for our interest.

Yours, truly,

P. B. Bailey.

BISHOPVILLE, S. C., July 30, 1913.

Hon. E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Replying to your letter of the 26th, containing a copy of an amendment to the tariff bill proposed by Senator Clarks of Arkansas, beg to say that I have looked over the provisions contained therein, but owing to the fact that I have only a superficial knowledge of the operations of the future-contract business, I am not in a position to give you an intelligent opinion regarding the matter.

I would venture to say, however, that notwithstanding the fact that the cotton producer has to sustain a great loss by the operation of future contracts and the nondelivery of actual cotton on same, I think we had better go slow and be sure of our ground before taxing future contracts to provide revenue for the Government, else we might have to sustain a greater loss by the taxing of future contracts as called for in these provisions proposed by Senator Clarks.

Something should be done and done at the earliest possible moment to relieve us of this burden.

***

Very truly, yours,

E. H. Hearon.

MARTINS POINT, S. C., July 28, 1913.

Hon. E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Your letter and copy of Mr. Clarke's bill to hand and fully noted. I have read the bill with considerable disgust as a farmer. You must know that every duty placed on cotton must fall on the grower. I am satisfied that if this amendment was tested and thoroughly explained to the growers of cotton that it would not get one vote. I with my friends say kill this amendment if possible and you will have turned a good trick in favor of all cotton growers.

It seems to me that some of our Democrat friends want to monkey with the tariff till there will not be revenue enough, and then place a tax on our southern friends to make good.

This kind of Democracy is very thin skinned, to say the least of it. Do the best you can for us.

Yours, sincerely,

F. W. Towles.

DILLON, S. C., July 30, 1913.

Mr. E. D. Smith, Washington, D. C.

Dear Sir: I think the Clarke amendment to be inserted in the tariff law is a bad proposition for cotton farmers. I have talked with you personally, and you and myself were in full accord that the cotton exchange should be required to deliver specific grades of cotton on contract. I was talking with a prominent cotton manufacturer to-day who said that the cotton-future market at present was no safeguard to him as a manufacturer, and that he did not try to hedge. He said, however, that if he could make a contract and could call for spot cotton running three grades, one above and one below the grade mentioned, that it would be of some service to him. For instance, he spins strict middling, and middling on this contract, but no other grades.

I wish to emphasize what I wrote you some days ago, that whatever is done in this matter should be done very promptly. If this agitation is continued till new cotton goes on the market, I believe it is going to adversely affect prices this fall.

Hoping that Congress and the Senate will be able to dispose of this matter at a very early date, and with kind regards, I am,

Very truly, yours,

Wade Stackhouse.

WADE STACKHOUSE.

CHESTER, S. C., R. F. D. 2, July 30, 1913.

Hon. E. D. SMITH, Washington, D. C.

DEAR SIR: Yours to hand and noted, and in reply would say I'm opposed to the passage of any act that would put a tax on cotton in any shape or form, for the farmers would be the ones to suffer.

I think speculation is the only way to handle crops of any kind; the law of supply and demand is no good.

Yours, very truly,

W. S. Durham.

SENECA, S. C., July 28, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. Smith, Washington, D. C.

Dear Sir: Being interested in cotton, both as growers and buyers, we write you in reference to the Clarke amendment to the tariff bill. In our opinion this measure will be hurtful instead of helpful to the cotton growers of the South. Through the medium of this letter we can hardly give all our reasons for our opinion, but we believe the foreigners, big cotton merchants and cotton mills, will be the gainers, from the fact that small dealers will be badly handicapped or driven out of the business if this measure becomes law,

We do not lose sight of the evils of speculation in cotton or any other commodity as a gamble, pure and simple, and make no defense of this from a moral or any other standpoint; but we do believe there are legitimate uses for the purchase and sale of cotton contracts, and in this branch of the business we are interested. The laws of trade and common sense are conclusive to us that competition in any line of business is beneficial to the seller, and if this measure does not destroy competition we do not catch the meaning of the bill.

That there are evils and abuses of the present system in New York we fully recognize and would like to see corrected, but we do not believe the Clarke measure will give the relief needed.

In our opinion your bill requiring the naming of grades sold is the right solution of this matter. We would suggest one amendment to this bill stipulating that no grade below that recognized by the Government standard should be deliverable on contract. We believe if this is done all interests will be protected.

For some reasons we should be glad for the Clarke measure to be tried, mainly because a large number of farmers believe speculation in cotton is always against the grower, which opinion we do not share.

As constituents of yours we write you this letter and trust you may have one of this matter and use your influence to defeat the Clarke amendment.

amendment. Very truly, yours,

G. W. GIGNILLIAT. F. M. CARY.

ARBEVILLE, S. C., July 28, 1913.

Hon. E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Your letter inclosing proposed amendment of Senator Clarke to tariff bill came duly to hand. I am afraid that the result of the passage of that bill, or, rather, that amendment, will injure the cotton growers rather than help them. My observation has been that speculation keeps up the price of cotton. I am satisfied that if a tax is put on every cotton transaction for future delivery, that the cotton mills of the South will combine and will lower the price of cotton. In any town in this State having a cotton mill, only one buyer, the one for the local mill, is put in by any mill, and if it were not for the export buyers the cotton growers would suffer. My idea is that a tax should be put on the exchanges so as to insure only reliable people entering into the business, but I doubt very seriously the good of putting a tax on each sale. All of our southern mills buy largely for future delivery, and to hamper them with a tax will not only put the mills to great inconvenience but, in my judgment, will have a tendency to lower the price of cotton. Every bale of cotton sold would be bought by the buyers with the idea of a tax on it and the farmers would get just that much less for his cotton. I do not believe the amendment will have the effect that is thought by its author it will have, and is am afraid that it will have the opposite effect. With best wishes,

Yours, very truly,

Garryer S. C. July 28, 1918.

GAFFNEY, S. C., July 28, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. Smith, Washington, D. C.

Dear Senator: Yours of the 26th received and noted. I have read the Clarke amendment carefully and in my opinion as a farmer and a merchant, I believe that the amendment would be detrimental to both classes, especially so to the farmer, and of course the farmer's interest is the merchant's interest. If this amendment should become a law the cotton crop will be contracted for by a few strong cotton people and manufacturers, and I would consider such a very dangerous law. In my opinion it would be much better to abolish the cotton exchange altogether than to have this amendment become a law.

I think if the New York Cotton Exchange would be governed by the same rules and regulations as the New Orleans Cotton Exchange it would be better.

I think if the Clarke amendment becomes a law the supply and demand will have very little to do with prices.

J. A. Carroll.

COLUMBIA, S. C., August 1, 1913.

OCLUMBIA, S. C., August 1, 1913.

Dear Mr. Smith: Your letter of 26th to hand, relative to the proposed amendment to bill H. R. 3321. Will say that I have consulted some three or four neighbors, and after a careful study of said amendment it is the opinion of the others, as well as myself, that the amendment will be a burden rather than a beneficial amendment to the grower of cotton.

Yours, truly. J. E. POAG.

BENNETTSVILLE, S. C., August 15, 1913.

Hon. E. D. SMITH, Washington, D. C.

Dear Sir: * * * I do not believe the passing of the Clarke amendment to the tariff bill will be of any advantage to the cotton growers of the South, though a great many seem to hold to the contrary opinion. I am,

Yours, respectfully,

JOHN W. DRAKE.

CHESTER, S. C., August 13, 1913.

Hon, E. D. SMITH.

DEAR SIR:

As regards the amendment to the tariff bill as proposed by Senator CLARKE, I think it is of doubtful wisdom at the present time.

I think the Clarke amendment is inopportune. The marketing of the new crop is just opening and legislation should be avoided, as it tends to create uncertainty in the minds of dealers and consumers and to throw a damper over the movement of the crop. As much freedom in actual cotton transactions should be given the farmer and manufacturer as

possible, but speculators and cotton exchanges should be regulated in the future by some judicious legislation restraining them from their enormous transactions in order to control the market price of the staple.

Appreciating your efforts in behalf of the farmer, I am,
Yours, truly,

J. J. STRINGFELLOW.

Hon. E. D. SMITH, Washington, D. C. BURTON, S. C., August 11, 1913.

DEAR SIR: Replying to yours of the 26th ultime, I would say that I have grave doubts of H. R. 3321 amendment being to the advantage of the State of South Carolina.

We have 400,000 people working in our mills and many thousands of dollars invested in them, and anything that we do that will diminish the value of their product will reflect on the interests of those 400,000 neonle.

dollars invested in them, and anything that we do that will diminish the value of their product will reflect on the interests of those 400,000 people.

Now, it is a fact that the prosperity of our mills depends on the sagacity of the president or agent who buys the cotton used in the mill. Cut off his ability to use it and most of his value is gone, and much of the profit of the mill with it.

As you well know, the cotton market is not steady, therefore the effort of the agent is to buy for future delivery when cotton is low. As no man can foresee the market with absolute certainty, it becomes necessary that large buyers should have some means of protecting themselves against a great decline in the market or they can not take the risk of buying.

The buyer's protection is the sale of futures when he believes he has made a purchase of futures at a price that will be higher than the market will be at the date of that future delivery.

This bill, therefore, strikes at the prosperity of every mill that has a man smart enough to make it a prosperous institution, and through the mill at the 400,000 employees, at a time when the knife has been put into their profits by the revision of the tariff in the most radical manner. Can they stand it and live? This question, I believe, is of importance to the State.

Although I am only a farmer, I can see that an interest as great as that of the mills of this State carries with it the interest of the farmer who raises the cotton and the food for these workers who do not produce these things.

Very truly, yours,

S. C. Price.

PLEASANT LANE, S. C., August 4, 1913.

CAMDEN, S. C., August 9, 1913.

Hon. E. D. SMITH, United States Senator, Washington, D. C.

United States Senator, Washington, D. C.

DEAR FRIEND SMITH: Replying to yours of a few days since, aiking me to give my views on the Clarke amendment to House bill No. 3321, will say that, in my opinion, dealing in futures should be prohibited entirely. As to the amendment providing for a tax levy of so much per pound on each agreement to purchase or sell will result as did our tag tax on fertilizers, viz, figure in the price of the product; in other words, the price will be fixed with an eye single to the payment of the tax. Our prices being fixed, I am sorry to say, by the speculator and not by us, the producers, as it should be.

I have been reading very carefully the acts and doings of the present session of Congress, as every man who has the welfare of his country at heart should do, and we farmers should congratulate ourselves that we have succeeded at last in having a man to represent us in our National Government who is looking after our interest, and we should thank you for each and every one of your many able efforts in our behalf.

should thank you for each solur behalf.
Your fight against the approach on us of the boll weevil is grandsincerely bope that you will be crowned with success in this, as was in all of the many other good measures advocated by you.
With kind regards,
I am, your friend, truly,

W. A. Strom

W. A. STROM.

Hon. E. D. SMITH. Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: I received your letter of July 26, inclosing copy of Mr. Clarke's proposed amendment, and have read the amendment carefully. Just what effect a tax of 50 cents per bale, or \$50 per contract, would have on dealing in cotton futures is problematic, but I am of the opinion that the operators would simply take the additional risk and continue to do business. Of course many of the smaller operators would probably not take the risk and would not operate altogether as much as now. Whether or not this law would affect future trading in cotton to the extent that the exchanges would be put out of business is yet to be seen, and I doubt very much if it would have sufficient effect to do this. In regard to spot cotton would say that inasmuch as the exchange fixes the price they most assuredly would quote the price 10 points below its actual market value, and thereby put the burden of the fax upon the farmer to the extent of production. This much seems clear to me. Mr. Clarke evidently means to try to do something in the interest of the farmer, but I am unable to see where there is much benefit in this law for them. It seems to me that a law along the line I suggested some time ago covering future transactions of every kind is what we need.

We want legitimate business and plenty of it, and therefore do not want to hamper legitimate trading, but we do want to stop speculating and gambling as it is now carried on. In every business deal that has any future attached there is always more or less speculation, so we need a law to leave legitimate transactions open and unhampered. Briefly, a law such as I suggested requiring the actual delivery and receipt of everything sold for future delivery could be more successfully enforced if all of the important nations of the world had a similar law. Suppose you talk the matter over with Mr. Bryan and see what he thinks of making a suggestion along this line to all of the larger commercial nations. As I see it, the business as now allowed ca

CHESTER, S. C., August 9, 1913.

Hon. E. D. SMITH, Washington, D. C.

DEAR SIE: Hon. J. H. McDaniel, probate judge of this county, has kindly referred a communication of yours in regard to taxing dealings in cotton futures to me for expression of opinion by farmers and business men on the same. Now, my dear Senator, I have not the time or ability to go into a discussion of this measure, but from the fact

that everything that the southern farmer buys is left out of the bill and the only thing that he sells is enough to warn me of the old saw, "Beware of Trojans bearing gifts,"

Yours, truly,

W. O. Guy,

MARION, S. C., August 9, 1913.

Hon. E. D. SMITH,

United States Senate, Washington, D. C.

Dear Sir: Your letter of July 26 received, and should have had an earlier reply, but the writer has been away on a little vacation. You ask if I think the Clarke bill would be beneficial to the cotton grower. I most assuredly do not. In fact, I think the producer would be hurt more than anyone else.

If the Clarke bill becomes a law, who will pay this tax. Ultimately it will come out of the producer, and will simply mean the Government putting a tax of 50 cents per bale on the farmer's cotton—not directly, but indirectly. It will be figured in the price of his cotton. I know some people take the stand that the cotton exchange should be abolished altogether. As a producer I can not see it that way, for I believe the cotton exchange run properly is a good thing for the farmer. I am connected with the cotton mill here as superintendent, and I am also a farmer—cotton my principal crop.

For the past few years I have bought a good part of the cotton the mill uses and have kept up pretty closely with the spot and future market. From my experience I honestly believe the farmer derives more benefit from the cotton exchange than the manufacturer. To go into details to explain my position would make a letter too long. Please don't understand that I think the cotton exchange is all right in every particular, for I do not. But I do believe if some measure were passed to regulate the exchange and not tax or abolish it, it would be the best thing that could be done for the producer Yours, very truly,

BLACKVILLE, S. C., August 20, 1913.

Sepator E. D. SMITH, Washington, D. C.

Senator E. D. SMITH, Washington, D. C.

Dear Sur: I expect to gather this year 800 to 1,000 bales of cotton, and to-day sold through Messrs. R. H. Rountree & Co., of New York City, 200 bales for October delivery. They charge me 15 cents per bale. The Augusta factors charge me 85 cents to \$1\$ per bale. I do not expect to make delivery of this cotton to Messrs. Rountree & Co., but do expect to keep these 200 bales sold with them until I make delivery in October of the actual cotton to the mill or exporter paying the best price on day of delivery. Of course, I have the option of either covering these 200 bales on the exchange in New York or of shipping the cotton to Messrs, Rountree & Co. and making delivery to them. In the past it has proved more profitable to cover on the exchange and then sell the 200 bales to the local mill broker or exporter paying best prices on day of delivery. Should I sell these 200 bales through a factor or mill broker or exporter, they would charge me a premium of \$70 to \$85 more than Messrs, Rountree & Co. on each 100 bales. Besides, if I sell through a factor or broker, I have no option, but must make delivery, although some other buyer on day of delivery might be paying one-fourth cent higher basis. Besides losing this one-fourth cent, or \$125 on each 100 bales, I would also be paying the factor \$70 to \$85 more per 100 bales than I am now charged on the New York Cotton Exchange. In other words, a tax on cotton futures will be a distinct loss to the business men here. I hope you will kill the bill.

Yours, truly,

J. M. Faerelle.

LUGOFF, S. C., August 2, 1913.

Hon. E. D. SMITH.

My Dear Sir: I have studied this amendment and have shown it to some of my neighbors. If a tariff or tax is put on those cotton buyers or dealers, they will make us as farmers pay all tax put on them; and, on the other side of it, if that would have any effect or be the means of stopping so much gambling on cotton it may do some good. But we all know that you will do all you can for us, so we decided to leave it all to you and not make any proposal whatever as to that amendment, as we all know you are the right man in the right place and will do the right thing for us.

Yours, truly, JOHN S. HAMMOND.

CHESTERFIELD, S. C., R. No. 3, August 2, 1913.

Hon. E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

My Dear Sir: Replying to your inquiry of July 28 as to the wishes of cotton growers as to II. R. 3321, I had already noted same in daily papers, and probably have a unique opinion as to same, to wit:

I believe it a crime against the cotton growers and should be made so by law to allow cotton exchanges or others to sell futures, never intending to deliver the actual cotton or commodity sold.

Therefore I think same should be punished by fine or imprisonment, and not licensed nor allowed under any circumstances. On the other hand, where sales are made in good faith and deliveries only can be made, I feel that it is nontaxable, or should be.

I wish to personally thank you for the efforts you seem to be making for we cotton growers. We can feel that we have some one at headquarters to see that we get what is coming to us at last.

Yours, truly,

W. J. Odda.

SELMA, N. C., August 4, 1913.

Selma, N. C., August 4, 1913.

United States Scrate, Washington, D. C.

My Dear Mr. Smith: I received, just before leaving home for a visit to North Carolina, your valued communication, and thank you for the compliment you have paid me in sending it to me.

My rule in attending to my business is, if I have a good man to do it, to leave it to him to do and get at some other work myself. Now, I feel we have our best men in Congress, and that they have a hard row to hoe, and that they are doing it well; so we had better let them hoe it themselves, and let us hoe the cotton row at this end. So go ahead, boys; do the best you can; "angels can do no more."

Several months ago, at a meeting of our agricultural society on Edesto Island, one member thought we, through him, could instruct Congress on the tariff; but we thought you all knew best, so we sat

down upon him. I now do not think any of us have had cause to change our minds since then.

I am glad and feel proud of the prominent part you are taking in Congress. Now, do not say and do as one of our generals said and did not do, which made us lose the Battle of Gettysburg, "We have had honor enough for one day," and, like him, stop the fight. On the contrary, I want you, in good old Methodist style, to shout and sing:

"N'er think the victory won,
Nor once at ease sit down;
Our arduous work will n'er be done
"Til we have gained the crown."

Then, with President Wilson's Presbyterian doctrine, "The final triumph of the saint," the American Nation will resound in praise.
With my most sincere regards,
Yours,

Townsend Mikell.

MULLINS, S. C., August 2, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. SMITH, Washington, D. C.

MY DEAR Siz: Your letter duly received, and I would have complied with your request to write you fully concerning the Clarke amendment to the Underwood tariff bill, but I find that I am not equal to the occasion. I always naturally felt that gambling in cotton futures ought to be stopped, yet I can not give you any argument that will convince you that the passage of this amendment will in any way help prices of cotton. On the other hand, if its passage would destroy the functions of the New York and New Orleans Cotton Exchanges, as is claimed, and prevent hedging, etc., I am afraid it is not the right thing for the Democratic Party to do now. If the Underwood bill is passed, it will be glory enough for one time. I most heartly commend the measure you propose with reference to naming of grades in future contracts.

Sincerely, your friend,

N. A. MCMILLAN.

FORT MOTTE, S. C., August 4, 1913.

Hon. E. D. SMITH.

DEAR SIR: Yours of July 26 to hand and contents noted. If supply and demand is what we need, it looks to me that Mr. CLARKE's amendment is all right, but we will be fought there is no doubt. But I think that it will be best for the future. But you are at the seat of war, where you can see from both sides, and it may look different. I spoke to Mr. J. E. Wananake and Col. Banks, and they are of the same opinion; but we will have to depend on your good judgment.

Yours, truly,

JONESVILLE, S. C., August 4, 1913.

Hon. E. D. SMITH, United States Senate, Washington, D. C.

United States Senate, Washington, D. C.

Dear Sir: Yours of the 26th of July to hand and contents noted. As to Senator Clarke's proposed amendment, I wish to say that you have been on the firing line in behalf of our farmers so long that Senator Clarke should take lessons from you, much less I, as one of the farmers, to give you any information along this line. I am satisfied that you will do your whole duty. You have done more for the farmers of the South than any man among our great lawmaking body in Washington to-day. I will say to you what Stonewall Jackson said to Gen. Pender on one occasion. "Stand your ground."

Your friend,

J. W. Scott.

Hon. E. D. SMITH, Washington, D. C.

JOHNSTON, S. C., August 4, 1913.

DEAR SIB: Yours of July 62 DEAR SIR: Yours of July 26 to hand in reference to Senator CLARKE'S amendment to bill H. R. 3321, regulating the dealing in cotton

DEAR SIX: Totals of vary, amendment to bill H. R. 3321, regulating the dealing in cotton futures.

It has my hearty approval and that of all farmers to whom I have mentioned it. I haven't found anyone except bankers, merchants, and cotton buyers and speculators who disapprove this amendment. It does look like the producer should have the right to say what laws he preferred governing the sale of his cotton, and I fail to see why a non-producer should be so interested unless he has a fat thing in it somehow. They say if this law is passed it will ruin the country. I think if it requires a set of speculators and gamblers to create a market for cotton and cotton will not sell on its own merits, it would be a good thing for farmers to let alone, and I for one say if it ruins us, as they see it, let us have it. It can not hurt us much worse, for it is like swapping dollars to make it now. I appreciate your efforts in behalf of the farmers and read all you have to say through the papers, and congratulate you for your courage and wish you success in all your efforts.

With best wishes, I am,
Yours, sincerely,

A. B. Broadwater.

SAN ANTONIO, TEX., July 18, 1913. Senator SMITH, Washington, D. C. Dear Shiff, Washington, D. C.

Dear Sir: I would suggest that you introduce an amendment to the Clarke amendment providing that said amendment shall only apply to such future cotton contracts as do not specify the grade sold, and do not provide for delivery according to Government standardization.

Your bill should be passed, and this is all the legislation that should pass on this question.

Very truly, yours,

W. F. Miller,

811 Mason Street

W. F. MILLER, 821 Mason Street.

PENDLETON, S. C., July 15, 1913.

Senator SMITH, Washington, D. C.

Senator SMITH, Washington, D. C.

Dear Sir: I see that Senator Clarke has introduced a bill to tax contract cotton 50 cents on the bale. By all means use your influence to defeat this bill. If this bill passes, it will virtually put the cotton exchanges out of business. That means low-price cotton.

Your bill to regulate the exchange to deliver the grades they contract for is what we need.

I hear it favorably commented on by the best people all over the State.

Yours, truly,

B. Harris.

ASHEVILLE, N. C., July 31, 1913.

DEAR SENATOR: Your letter containing copy of CLARKE'S amendment received to-day, forwarded from Dillon. I have read it over; in fact,

had read it before, and I had talked with some of my friends about it, and I am yet of the opinion that we, the farmers of the country, can not be benefited by it at all. Of course, I may be wrong, but I believe I am right. We want a live market for what we have to sell, and the more people deal in it the more life there is about it; but I do not think the buyers of cotton should be any more handicapped than the seller. Whatever is done about it, any extra expense will be figured out of the producer. The trouble is and always has been our farmers are one to two years behind and can not hold a crop of cotton or even one-fourth of a crop, and are compelled to put it on the market early in the fall and take what they can get in order to pay bankers and merchants what they owe them. Now, last fall I bought one day for the cotton mills 400 bales of spot cotton from a New York firm, then they bought this cotton from another cotton dealer, and all of these people had to hedge against loss when they sold and when they bought. Had they have had to pay this tax it would have been an immense amount of trouble to go into all this thing of paying taxes and refunding, etc., and had we have had to do this I do not believe we could have traded at all.

I will hate to see the Clarke amendment go through. Yours, very truly,

MARION, S. C., August 8, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. SMITH, Washington, D. C.

DEAR SIR: Yours of recent date with copy of an amendment to tariff bill by Senator CLARKE received. I think the amendment is proper and should become law. I am in favor of any law that will do away with the New York Cotton Exchange, which is only another name for gambling. As you know, it has cost our people millions upon millions of dollars. I have no patience with the arguments which are used trying to defend the exchange, in that it is beneficial to the cotton growers, when the truth is that it has done more harm to the cotton growers than all the blight and boll weevils combined.

If this amendment can become law and the tariff and currency bills pass we southern people would begin to enjoy freedom from our heretofore masters.

I want to congratulate you and all who had anything to do with

I want to congratulate you and all who had anything to do with getting the Government to relieve the South and West of the money stringency and getting us out of the grasp of the money sharks of New York. Our people are delighted with what Congress is doing and attempting to do and have unlimited faith in our representatives in Congress and Woodrow Wilson and his Cabinet. The fact is we feel like a new era has dawned upon us and that our great country is still the home of the free and the brave.

With best wisnes for your future success, I am,
Yours, truly,

JONESVILLE, S. C., August 7, 1913.

Hon. E. D. SMITH, Washington, D. C.

Yours, very truly,

D. B. FREE, Jr.

MOUNTVILLE, S. C., August 7, 1913.

Hon. E. D. SMITH, United States Senate, Washington, D. C.

DEAR SIR: In regard to yours of the 26th of July * * neighbors and myself think that all such taxes will be obliged to be paid by the producers of cotton, so please don't allow any tax to be put on cotton.

Yours, truly,

D. R. CRAWFORD,

Mr. E. D. SMITH, Washington, D. C.

SIR: You send me a copy of amendment to the tariff bill proposed by Senator Clarke of Arkansas, and to write you whether or not I think it would be beneficial to the cotton growers. I fail to see where the cotton growers would be benefited in its practical operation.

NEWBERRY, S. C., August 6, 1913.

Hon. E. D. SMITH, United States Senate, Washington, D. C.

Dear Ed.: Your letter received. I have given the bill very careful study and have reached the conclusion that it will add another burden upon the farmers. You could never adjust the tax as it is intended in the bill, and there is no power Congress possesses that could adjust it. We would in the end pay that tax at such price as we would be force to accept for our cotton. * * * H. H. Evans.

LAKE-CITY, S. C., August 7, 1913.

Senator E. D. SMITH, Washington, D. C.

Dear Senator: I have examined your bill sent me some time ago and think it is a very good bill. I want to congratulate you on the fight you have been making and are making to-day in behalf of the farmers of the State.

Very sincerely,

J. A. Green.

Hon. E. D. SMITH, Washington, D. C.

DEAR SIR: In reply to your letter of July 26, in regard to amendment to tariff bill, as to taxing sales for future delivery, I find lots of people in favor of it. Personally, however, I do not agree with it. Farmers often sell futures to an advantage. However, I realize that my own personal ideas are of little value to you. I feel sure that you are doing your duty to us, as you see it, and I am perfectly willing to leave the balance to your care, feeling sure that you will secure every benefit possible for us.

JOHN A. BELL.

ISLANDTON, S. C., August 5, 1913.

Hon. E. D. SMITH, Washington, D. C.

Hon. E. D. Smith, Washington, D. C.

Dear Sir: Yours of the 26th ultimo received in due time, but I was very busy and could not give the intended Clarke amendment the proper consideration.

I have gone over it carefully and can not see where it will be any burden upon the cotton growers. I think it would be better to have a separate bill prohibiting the dealing in futures altogether. If I understand it aright this amendment puts a tax of one-tenth per cent per pound on those who buy and sell cotton for future delivery, but refunds the tax where the cotton is actually delivered according to the terms of the sale.

It is true the mills claim they have to buy ahead, and a great many farmers sell ahead, but they can do it without violating the law as proposed by this amendment or without being burdened by the law. However, I doubt the wisdom of even anyone under any circumstances selling for future delivery, unless the price could be so regulated as to preserve the proper equilibrium in the cotton trade.

Under the present laws a debt-ridden people, as our cotton growers are, living this year on next fall's crop, are entirely dependent on the gamblers of the country for the price of their cotton.

But we are told to organize. I grant the farmers are not sufficiently organized to protect themselves from many injustices, such as the present raise in jute bagging, but when we are told to organize to hold cotton which is sold a year ahead, without a price stipulated, it is all bosh. Establish a safe governmental system of warehouses where the farmer can deposit his produce, without the dread of being swamped by a set of rascals, and can draw on the Government for a safe per cent (safe to the Government) of the value of said produce, and you will see the prices of farm products properly adjusted, and the farmer rise from his impoverished condition.

Wishing you much success in your endeavors to help the farmers, I am,

I am, Yours, truly,

D. M. VARN.

WARSAW, N. C., August 5, 1913.

Hon. Ellison D. Smith, Washington, D. C.

Washington, D. C.

My Dear Senator: I have carefully read all that has been said with reference to your bill to regulate deliverles on future exchanges and all that has been said with regard to the effect of the Clarke amendment to the tariff bill, and to both propositions I have given much study and thought; in fact, I have been studying it for years, knowing that Congress would probably pass some regulatory measure in the course of time. And I desire to say that I approve of your bill and believe that it will have the effect intended; but I disapprove of the Clarke amendment and believe that its principal effect will be the establishing of Liverpool as the sole price-making machine. It will elminate hundreds of small cotton merchants; force a concentration of big buyers in England, making it well-nigh impossible for a native exporter to compete with foreign exporter; take from the market millions of speculative money and thousands of speculative buyers; destroy all nonfuture exchanges and many boards of trade in the South. In fact, it will cost the South from 3 to 5 cents per pound in the price of cotton and may bring about such financial disaster as we have not seen since the war. I know you make a specialty of cotton matters and are well informed on the subject, and I certainly hope you will use your knowledge and power to prevent the adoption of the Clarke amendment.

Respectfully, yours,

Jos. E. Johnson.

Jos. E. Johnson.

BENNETTSVILLE, S. C., August 5, 1913.

Senator E. D. SMITH, Washington D. C .:

Replying to yours of July 26 in regard to Senator CLARKE's amendment to H. R. 3321, will say that I do not know of any benefit that will accrue to the cotton planter from this bill. I have asked others, and they say that they are unable to see it. My own opinion is it is a direct tax on cotton indirectly collected. I do not deem it desirable to prohibit trading in actual cotton on cotton exchanges. I know of no good in cotton futures.

Yours, truly,

R. C. COXE.

VANCE, S. C., August 1, 1913.

Vance, S. C., August 1, 1913.

Senator E. D. Smith, Washington, D. C.

Dear Sir: Your letter of July 26 has been received and carefully noted. I am glad you wrote and thus gave me an opportunity to write you. I for one am opposed to the passage of any such law, because it looks to me that all or nearly all the efforts that are made to benefit the farmers of the South rebounds to their detriment. I am opposed to the doing of anything that will injure the price of cotton. I think all the tinkering with law as to futures and the prosecution of those who were trying to bull the market has already cost the farmers a good deal of money. If it is law to prosecute the bulls for trying to put the price up, it should be law to handle the fellows who are trying to put the price down. I believe the cotton exchanges are a benefit to the cotton planter, and to levy that tax will drive them out of existence.

Very truly, yours,

J. F. FELDER.

CORNWELL, S. C., R. F. D. 1, August 2, 1913.

DEAR SIR: In reply to your letter July 26, will say I think Mr. CLARKE'S amendment, if you can get it, will be a good thing. I believe in a square deal, but we don't get it. If a man buys cotton, it should be delivered. If he sells, he should deliver the goods. I would say work for the amendment.

Respectfully,

W. A. GLADDEN.

CAMDEN, S. C., August 2, 1913.

Your favor of July 26 received and the inclosed amendment, which I believe to be against the cotton grower and would help to lower rather than lift prices.

Yours, truly,

HENRY SAVAGE.

FARMERS' COMPRESS & WAREHOUSE Co., Montgomery, Ala., July 14, 1913.

Senator E. D. SMITH, Washington, D. C.

Senator E. D. SMITH, Washington, D. C.

Dear Friend Smith: The New York and New Orleans Cotton Exchanges have been flooding this country with literature and press articles begging help to kill the Clarke amendment to the tariff bill. Today our committee of three from the business men's league of this city reported in favor of the bill; also some of our leading cotton men, notably I. Weil, of Weil Bros., and William Marks, of Marks & Gayle, both large cotton buyers, are in favor of it. This pleases our farmers, who desire to see the New York Cotton Exchange taxed out of existence, also New Orleans put on a strict spot-cotton basis.

As you know and we believe our country has been pauperized by the New York Cotton Exchange. It is no spot-cotton market, and we see no reason for its existence except as a gambling outfit. Let the good work go on. Our country has been overrun this season by so-called traveling crop experts sent out by the New York Exchange. Most of them are voluminous liars and hardly know a stalk of cotton from a cocklebur stalk. They have succeeded only in allowing foreigners to buy up the cotton held for better prices at a low figure, which has been quite discouraging to all holders.

With regards, your friend,

Chas. L. Gax.

WATERLOO, LAURENS COUNTY, S. C., July 13, 1913.

Hon. E. D. SMITH, M. C., Scnate Chamber, Washington, D. C.

My Dear Senator: Your kind and encouraging letter I received in due time. I will watch the progress of the currency bill, and when fairly launched in Congress I will run on to Washington. I have several very nice letters to produce.

I am glad to see the Senate subcommittee favors your cotton-grade

bill. With my best respects, I am, Yours, truly,

CLARENCE CUNINGHAM.

CHARLESTON, S. C., July 7, 1913.

Senator E. D. SMITH, Washington, D. C.

I sincerely trust that you will make every effort to defeat the present amendment introduced by Senator Clarke of Arkansas placing tax on purchases and sales of cotton for future delivery, as same would prove most harmful to all handlers of cotton and would be at the expense of the planter, as he would not be able to find a ready market at all times on which he could dispose of his cotton at the full price, as there are times when shippers buy cotton without being able to pass it on to spinners, but are able to protect themselves by selling futures. The proposed amendment would prove ruinous as well as a restraint to trade.

W. Gordon McCare, Jr.

W. GORDON MCCABE, Jr.

Mr. LODGE. Mr. President, I do not propose to discuss this question at all, for I am free to confess the intricacies of this business I do not understand, and I understand it still less since I have heard the cotton manufacturer called a miller. But there are people who do not speculate in futures, but who buy and sell cotton, who believe that this will have a bad effect on the consumers to whom they sell and the producers from whom they buy, that you will not get rid of the abuse of gambling in futures, which is an admitted abuse of a gross kind, but only transfer it to delivery

I have three letters from a leading firm who do not speculate in futures and are among the largest firms in the country in dealing in cotton. I ask that they may be printed in the

The VICE PRESIDENT. Without objection, they will be printed.

The letters referred to are as follows:

BOSTON, MASS., July 1, 1913.

Hon. Henry Carot Lodge,
United States Senate, Washington, D. C.

Dear Sir: We feel very strongly that those advocating the amendment to the tariff bill placing a tax on transactions in future-delivery cotton are not familiar with legitimate cotton business as undertaken to-day by those not interested even remotely in speculatively buying or selling contracts, but as a protection against actual business done with spinners.

to-day by those not interested even remotely in speculatively buying or selling contracts, but as a protection against actual business done with spinners.

In our own case, we have no clientele who buy or sell through us speculatively for cotton. Our business is confined to actual sales to the various New England mills. As business is done nowadays, a great many of the mills at this time of the year and through the summer place contracts ahead for goods. In the sale of such goods they are forced to either sell their goods and speculate as to what the price of cotton will be when cotton is available during the next crop, or protect themselves by buying cotton for fall shipment through such dealers as they trade with.

As far as we are concerned, there are only three possible methods which we could pursue—either sell the mills speculatively short and risk buying in cotton next fall at a lower price, or buy contracts for mill account and turn them into cotton, as they advise us to next fall, or buy contracts for account of our correspondents which they would turn into cotton next fall. In none of these transactions would the actual delivery of future contracts be expected. The purchase of them would simply be to protect ourselves or the mills against an advance in the market when the actual cotton of the quality satisfactory to them was available during the next crop movement.

Very often the cases are reversed. In the fall of the year the mills know they must secure such qualities as they need when they are available. On the other hand, a mill which does not wish to speculate must either buy its year's stock and risk the market later—that is, that it might be a great deal lower in the late winter or spring if the crop is large or trade is poor—or hedge a certain amount of its purchase by the sale of contracts. As they sold their goods they would buy in these contracts fixing the price of their cotton.

We realize that speculation in cotton has been harmful, but it has been more harmful to the manufacturer than an

other hand, the purchase or sale of future contracts affords the manufacturer a protection on every lot of goods sold ahead or actual cotton purchased against which he does not care to fix his price on account of his inability to sell goods ahead. The same is true of the legitimate dealer who buys future contracts against sales to mills or sells contracts against actual cotton in hand which he is not desirous of being long of on the market, and risking a decline which would wipe out not only his profit but possibly cause him a severe loss, and in none of which cases the acceptance of purchase of futures or delivery on sales of futures would be contemplated. If the contemplated tax should pass, as business is done so close, it is needless to say it would simply be the means of climinating this protection and would not prevent this character of business from being done abroad, and would be driving business out of this country without in any way checking speculation. It would only eliminate the protection furnished the legitimate dealer in cotton or the mills who buy through him.

Yours, truly,

COOPER & BRUSH.

STEPHEN M. WELD & Co., Boston, July 1, 1913.

Hon. HENRY CABOT LODGE, United States Senate, Washington, D. C.

Hon. Henry Carot Lodge,

United States Senate, Washington, D. C.

My Dear Senator Lodge: It seems to me that this addition of one tenth of a cent a pound on futures where the cotton is not actually delivered is such a blow at the cotton business that the Senators can hardly realize what they are doing. In the first place, left me tell you how it works. We frequently find at the end of a day's business, in Houston, for example, that we have 5.000 beles on hand over and above our orders. As you know, we have to go out and buy every day, and at the end of the day the cotton that we have bought is set against what we have sold. If we have sold more than we have bought, we buy futures. If we have bought more than we have sold to the mills, we sell futures. In this way we are protected against any fluctuation of the market, and the business is made as free from speculation as is possible. We never mean to deliver or to accept deliveries on these futures. They are a hedge on spots that we have sold; when we buy cotton, we buy in futures on the cotton we have bought; when we have sold the cotton, we sell them again.

Now, this method of doing business enables thousands of small firms to do a business and to borrow money from the banks on this business and on the cotton, because the banks as a rule demand to know whether they have hedged. If they have hedged, they loan them the money; if they have not, they won't; and a firm that does not hedge with futures finds it very difficult to obtain credit.

What is going to be the result? The New York Cotton Exchange will go out of existence and the business will fall into the hands of Mcfadden and ourselves and three or four other big firms, and nine out of ten of the little firms will go to the wall. It is going to reduce our business to the same basis that the wool business is on, which is a most speculative business, where the profits are from 3 to 5 cents a pound and the losses correspondingly large and only big firms that can be perpetrated. It is no excuse to say that th

Hon. HENRY CABOT LODGE, Washington, D. C.

DEAR SIE: Regarding the amendment providing for a tax of one-tenth of a cent a pound on sales of cotton futures, we believe its adoption to be unfavorable to the best interests of the people of the United States.

doption to be unlavorable to the best interests of the people of the United States.

Our business is that of supplying actual cotton to New England mills. We are not dealers in futures. The mills are expected to take orders from their customers for goods to be delivered several months later and for frequently well into a later cotton crop. Therefore the mill expects us to sell them actual cotton, to be supplied to them at such later dates. In the event of our making sales for materially later delivery, we now protect ourselves by purchasing futures, thereby eliminating the element of speculation on the part of the mill and also on the part of the seller of the cotton, whether he be North or South. If the proposed tax should be adopted, we believe that the amount of the tax would have to be added to the cost of manufactured goods, or, in other words, advance the cost of cotton goods. And certainly cotton goods are to be used by a very large percentage of our people from the very fact that they are about the lowest cost wearing apparel. On the other hand, the only possible advantage to anyone is the revenue which the Government would receive; and we certainly doubt the advisability of this, considering that the revenue would certainly come from the mass of the people.

Therefore we sincerely hope that you can conscientiously do all that is possible to prevent the adoption of this amendment.

Yours, very truly,

BARRY, THAYER & Co.

BARRY, THAYER & CO.

BOSTON, July. 2, 1913.

Mr. RANSDELL. Mr. President, my very good friend the Senator from Arkansas [Mr. Clarke] has, inadvertently I am sure, a very incorrect idea about the New Orleans Cotton Exchange. He designated it as a parasite of the New York Exchange. I am quite certain he did not mean to hurt the feelings of the New Orleans and Louisiana people by that statement. I should like to ask the Senator just what he based that statement of his on, that the New Orleans Cotton Exchange is a para-

site of the New York Cotton Exchange.

Mr. CLARKE of Arkansas. Mr. President, of course I used that statement in a figurative sense. The New York Cotton Exchange fixes the rules and limitations of the business. have the organization, the membership, the position, connected with the business. They have special wires running every-where, and dominate. If the New Orleans Cotton Exchange were disposed to reform the business they could not reach the people who are interested in the subject of speculating in cotton in sufficient volume to cut the slightest figure in the final result. Senator George, who was the chairman of the Committee on Agriculture and Forestry of the Senate in the Fifty-third Congress, went into that quite extensively and took much proof to show the relative importance of the two exchanges. In preparing and presenting to the Senate the report from which I quoted he made the observation that I have included in my remarks, that the New Orleans Cotton Exchange was a parasite in the sense that it could not project and maintain a policy in antagonism to any policy that the New York Cotton Exchange saw proper to stand behind.

Mr. RANSDELL, Mr. President, I should like to ask the Senator if it is not a fact that the New Orleans Cotton Exchange has adopted the Government standards of grading cotton were advocated in substance by Mr. Herbert Smith in the very able report from which the Senator has so eloquently quoted, and if it is not also a fact that Mr. Smith in the highest terms complimented the New Orleans Cotton Exchange for adopting the method which he advocated; and, further, if it be not a fact that the business is conducted on the New Orleans Cotton Exchange in an entirely different manner from that on the New York Cotton Exchange in the very material particular of settling the deliveries on future contracts upon the commercial differences, or the value of the spot cotton as determined by actual sales on the New Orleans market, whereas in New York the settlement of deliveries is based upon the value placed upon the cotton of various grades by a com-

mittee-an arbitrary system of settling differences?

Mr. CLARKE of Arkansas. I am sure there must be some differences in detail in the rules that govern the respective exchanges; but I insist that the crowd who conduct the New Orleans Cotton Exchange do not possess sufficient elements of strength to influentially affect the price of cotton. Can the Senator tell me how many bales of future cotton are sold annually upon the New Orleans Cotton Exchange?

Mr. RANSDELL. No, sir; I can not; but it is a large

Mr. CLARKE of Arkansas. Nobody else can tell, because they have never let it be known; but in trade, in business, and in the discussions that define its operations and its effect no one ever gives serious attention to the New Orleans Cotton Exchange. There was a better exchange than either of those exchanges, at Galveston, and another one was sought to be established at Memphis, but they could not attract that large volume of speculative business that would enable them to give it the representative position in the trade that the New York Cotton Exchange maintains.

Mr. RANSDELL. Mr. President, I have given the Senator from Arkansas a fair chance to explain his statement, and I find that he really had no reason at all for saying that the New Orleans Cotton Exchange was a "parasite" of the New

York Exchange. As a matter of fact—
Mr. CLARKE of Arkansas. The Senator from Louisiana must let me explain that. By that I meant a parasite of the exchange in the sense-

Mr. RANSDELL. A parasite is something that lives on

another.

Mr. CLARKE of Arkansas. I should have said I meant a parasite in the form that it could not direct a policy with reference to the cotton market that the New York Exchange antagonized; that it was subordinate in that commercial sense to the

movements and policies of the New York Cotton Exchange.

Mr. RANSDELL. I am glad to have even that explanation, Mr. President, because a parasite, we know, is a small thing that lives on a larger one, and in no sense of the word can it be said that there is the slightest connection between the New Orleans Cotton Exchange and the New York Cotton Exchange. They have entirely different rules and regulations; they have no connection in the world with each other.

The great trouble in this whole cotton-future business is the unfairness with which, in the minds of a great many people, it is conducted on the New York Cotton Exchange. The very matter which the Senator from South Carolina [Mr. SMITH] described here is one which has caused a great deal of hard feeling; that is, the manner of dealing on the New York Cotton

Exchange. You have a contract there with "middling" as a basis. When you ask for delivery of that cotton the man who sells it can deliver to you any one of 28 grades, I believe, according to the Senator from Arkansas, and 34 or 36 grades according to the Senator from South Carolina, which is certainly a very wide margin of grades.

Mr. SMITH of South Carolina. Mr. President—
The PRESIDING OFFICER. Does the Senator from Louisi-

ana yield to the Senator from South Carolina?

Mr. RANSDELL. I yield merely for a correction.
Mr. SMITH of South Carolina. I want to get the record straight. I think that at one time there were 37 grades—I may not be accurate, but I know it was within the thirties. have gradually contracted them as they saw the storm gathering.

Mr. RANSDELL. It is a large number of grades, Mr. President, and there is now a private system of grading cotton in York; there is no Government standardization of cotton grading recognized in that great market; but it is a private

system adopted by themselves.

When they settle their future contracts they tender the purchaser of a "middling" basis contract cotton not of that grade. Say he has bought "middling" and they tender him "good ordinary," how is the price between "middling" and "good ordinary" determined in New York? Not by the market quotations of "middling" and "good ordinary" in that market or in any other cotton market, as is done in New Orleans, but by a committee of the exchange, which meets two or three times a year, and arbitrarily says that the difference in value between "middling" and "good ordinary" shall be a certain sum. You see how unfair that is. Perhaps "good ordinary" is very scarce in the market and the price has gone up as compared with "middling."

In New Orleans how is it arranged? In that city there was always a system very different from that in New York, even before it had the Government standards. New Orleans had its private grades then, because there were no Government grades, but the settlements on contracts were always made upon the commercial or "spot" market differences. If a man bought "middling cotton" in New Orleans and "good ordinary cotton" was delivered to him, he went into the New Orleans market, the spot-cotton market, and ascertained that the commercial difference in value between "middling" and "good ordinary" cotton was, we will say, one cent per pound, or one and a quarter cents per pound, or one and a half cents per pound. The settlement was made accordingly, and the purchaser was not injured, because, if he did not need "good ordinary his business, he sold it on the market at the actual market value, the same as he had paid for it; but in New York, if he were obliged to pay for "good ordinary" 9 cents a pound, let us say, and the "spot" difference or the market was 8½ cents a pound, then he was obliged to sell for 8½ cents a pound an article for which he was forced to pay 9 cents; in other words, he lost \$2.50 a bale, or \$250 on his transaction—something that could never happen in the case of New Orleans.

This is doubly true now, Mr. President and Senators, for since the New Orleans.

the New Orleans Cotton Exchange has adopted the Government's standards of cotton—that is, with a basis of "middling," with four grades higher than "middling" and four grades lower—the transactions there are just as fairly conducted as

they can be.

Let me repeat, there is not the slightest connection between those two markets. I am perfectly willing to admit that New Orleans is not the very powerful financial center which New York is, but it is an active spot-cotton market; it is a market where there is a great deal of spot cotton sold, whereas there is very little of it sold in New York. It is a very important market both for future dealings and for actual spot dealings in cotton.

I was very glad to hear the Senator from Arkansas say that the Government had "established rational, honest grades of cot-ton standardization." Those rational, honest grades were im-mediately accepted by the Cotton Exchange of New Orleans. They have not yet been adopted by the New York Cotton Exchange. The Cotton Exchange of New Orleans is doing its utmost to cooperate with the Government; the Cotton Exchange of New Orleans recognizes that there are some things that are bad in cotton speculation, or, as the Senator would call it, ton gambling," just as there are bad things in every kin just as there are bad things in every kind of speculation and in every kind of business, and the New Orleans Cotton Exchange stands behind the Congress in any kind of legislation looking to the correction of these evils, but it does not wish to see the system entirely broken up, because it believes it is a good one when properly regulated, corrected, and controlled.

The Senator alluded to the fact that in Germany they did not deal in cotton exchanges and yet used a great deal of cotton.

Is the Senator aware of the fact that on this very day in the city of Bremen a very large cotton exchange begins business? It is a fact, I will say to the Senator, that to-day a cotton exchange starts in the city of Bremen. The Germans have found that they can not do business without a cotton exchange, just as they found in 1896, after the bourse law was passed prohibiting grain dealings on exchanges, that it could not do business successfully in grain without an exchange; that the farmers were unable to get a proper price for their grain be-cause they had no means of ascertaining its value. The purcause they had no means of ascertaining its value. chasers of grain were in touch with the Chicago market and the Liverpool market and the exchanges of the world, but when the German grain exchange went out of existence there was no longer any way for the grain producers to find out what grain was worth. The farmers suffered, and grain in towns or communities 10 or 15 miles apart varied very much in price. It is necessary to have an exchange so as to inform the farmers what their products are worth.

Mr. President, I did not intend to occupy the time of the Senate so long. I rose merely for the purpose of making this

explanation.

Mr. BORAH. I desire to ask the Senator from Arkansas a question. I understand that the Senator from Arkansas drew this amendment.

Mr. CLARKE of Arkansas. Yes, sir. Mr. BORAH. I should like to ask the Senator what, in his opinion, will be the immediate effect of the amendment?

Mr. CLARKE of Arkansas. The immediate effect of it will

be that about 90 per cent of the business conducted on the New York Exchange will be discontinued if the law is faithfully and effectively enforced, because the gamblers who assemble there will not pay 50 cents a bale on cotton every time they record a quotation on that board. The best estimate which can be made is that the number of fictitious bales of cotton sold on that exchange in a year is more than a hundred million.

Mr. BORAH. In other words, the immediate and legitimate effect of the proposed amendment will be to prohibit dealing in futures under certain conditions, rather than to collect revenue?

Mr. CLARKE of Arkansas. Of course the revenue feature of it will probably be kept up for a little while by the so-called hedgers who have bought actual cotton and, fearing the depredations of the New York Cotton Exchange, must protect themselves for a time. I think that element will continue for a little while to pay the tax; but after awhile they will be forced to evolve some other system of protection that will be more legitimate and more completely under commercial control.

Mr. WILLIAMS. Mr. President, if the Senator will pardon me, perhaps his answer might be misunderstood. So far as dealing in pure "wind" cotton is concerned—mere speculation, mere gambling-this amendment will put an end to most of it; but where mills and buyers buy futures as an insurance it would not put an end to that. It would simply put a tax of 50 cents a bale upon that kind of business—not a very expensive insurance—which would bring in a considerable revenue to the Government.

Mr. CLARKE of Arkansas. I may also state to the Senator from Idaho that where there is an actual delivery in pursuance of a contract there is no tax levied.

Mr. BORAH. Exactly.

Mr. WILLIAMS. I can not understand for the life of me why it has been that there never has been any great company established in the United States to insure manufacturers against losses upon sales of stocks on 12 months' delivery to the Orient and elsewhere. I am informed that such insurance companies do exist in other countries. I suppose the reason they do not exist in this country is that our manufacturers for the most part do not sell on long time as do German and English manufacturers trading with the Orient and with South America. I have heard that that was the reason; but, so far as "futures" are an insurance to legitimate business, 50 cents a bale is not a very heavy insurance on a bale of cotton which is worth \$50.

BORAH. It combines, in other words, the proposition of a slight revenue with a proposition of prohibiting certain

kinds of transaction?

Mr. WILLIAMS. Well, it has a double effect; yes.

Mr. BACON. Mr. President, I merely want to say a word in regard to this matter. It is one in which my people are very deeply interested, both as cotton producers and as cotton manu-The State of Georgia is the second State in the production of cotton, Texas being the first; and the States of South Carolina, North Carolina, and Georgia manufacture very much the larger part of all the cotton annually manufactured in the South. So that both as mill owners and as cotton producers our people have a very deep, practical, and pecuniary interest in the correct solution of this question.

As I understand the proposition of the Senator from South Carolina-and I wish to say, by way of parenthesis, that I do not profess to have any expert knowledge as yet in regard to this question and am seeking light-as I understand, the proposition of the Senator from South Carolina is this: That, by reason of the failure of the cotton-exchange contracts to specify the particular grade which the contract will require the delivery of, if delivery is made, the quotations on the stock exchange do not reflect the real price of cotton and that, therefore, they injuriously affect the price of cotton in the hands of the producer. I understand that to be the proposition, although whether I am correct or not I do not know. I see the Senator from Arkansas [Mr. Clarke] shakes his head. I do not mean to say that it is correct. I do not know, but my understanding is that that is the proposition of the Senator from South Carolina.

I understand the Senator to base that proposition upon the fact that the contract, having this latitude in it, permits a seller to sell middling cotton, say, as a basic grade, with the privilege of complying with that contract, not by delivering middling cotton, but by delivering some other grade at a difference in price to be fixed by the cotton exchange, and that, by reason of that, opportunity is given to those dealing on the cotton exchange, those buying and selling cotton, to carry on this series of contracts in a way which will quote to the world a price for cotton which is not the real price of cotton, and that such quotation and publication of false prices affects injuriously the price of spot cotton in the hands of the cotton

On the other hand, the Senator says that if the contract were limited to a specific grade and the person who sold that contract would be compelled, if required, to deliver that particular grade, he could not quote anything else but the real price except at his own peril, and therefore he would have to quote the real with the grade fixed in the contract he would have price: that to sell at the real price, and so when he bought and sold, even if he did sell 100,000,000 bales of cotton, he would not affect injuriously the price of cotton in the hands of the producer. understand that to be the contention of the Senator from South Carolina

Mr. SMITH of South Carolina. That is correct.

Mr. BACON. Mr. President, however we may regard gambling in all of its forms, we have not a moral purpose in view in this legislation. While, of course, we are glad if the moral purpose at the same time can be advanced or effected, we have in this proposed legislation a practical purpose, and that practical purpose is that the dealing in futures on the cotton exchanges shall not, through a system of quoting false prices, injuriously affect the price of cotton in the hands of the producer. That, I understand, is the purpose; and in that we all sympathize and desire to contribute to it.

If it be true that by requiring the cotton seller to make a particular grade and limit him to that grade; if it be true, as contended by the Senator from South Carolina-I do not say it is, because I am not sufficiently familiar with the subject to undertake to say so-but if it be true, then, it would be well so to adjust this amendment as not to make it include contracts of that kind, where the real grade of the cotton is specified, because if that be true there is no harm in contracts of that kind, but there may be some good. Whether it be true as to the effect of having the grade of cotton specified I am not prepared now to definitely say, but the suggestion should be carefully considered.

Turning, now, from the interest of the cotton producer to that of the mill owner or the man who runs the mill, we all recognize the fact that it is beyond controversy that there is a legitimate use made by mill owners of the purchase of future contracts where there is no expectation of delivery. I would not be willing that that practice should be allowed to continue if it were at the expense of the cotton grower, the producer of cotton, even though it might result in advantage to the mill owner, because that would be aiding one industry at the expense of another industry, and that would be unjust; but if it is a legitimate interest of the mill owners which can be advanced without injury to the other industry, then we ought to try so to adjust it as to make this legislation of advantage to each and an injury to neither.

I do not know whether this is correct or not, but I understand that to be the issue, and I think it is worthy of very careful consideration. If it be true that the imposition of a tax simply upon contracts for cotton which do not specify the particular grades and the exemption of those which do specify the grades will relieve the cotton grower of the South of the evil under which he now suffers by reason of speculative contracts, it may be well to do so; and in view of the fact that there are interests as found in the business of the mill owner which have

legitimate purposes to subserve by contracts of this kind, it may be well to relieve them and so adjust this proposed legislation as not to injure them. I do not wish by anything that I have said to commit myself finally to the one or the other of these propositions, but I am deeply impressed with the fact that if this legislation can be so shaped as to prevent the fictitious influencing of the price of cotton by quoting as the price that which is in fact not the price, if we can shape this legislation to correct that evil and at the same time not embarrass the legitimate transactions of mill owners, I think it ought to be done. As I understand it, the system practiced by the mill owners is not a speculative system, but one by which they can practically insure the prices at which they will get the cotton to be manufactured to fill the contracts they make for manufactured goods.

Mr. SMITH of South Carolina. Mr. President, I should like to call the attention of the Senator from Georgia and of other Senators to the fact that if they will pick up any paper published in any city in America where the quotations of the cotton market are given they will find that the future market for the spot month—August is the spot month now—the quotations are on the basis of "middling," and then if they will look at the "spot" quotations they will find that in every instance there is in the same market a wide margin between the price of spot cotton and the future price, for the reason that the buyer of actual "spot" can go into the warehouse and select his "midactual "spot" can go into the warehouse and select his "middling," while in the other case he takes his chance whether he will get "middling" or something else. I merely invite Sena-

tors to take any newspaper and read the market quotations.
Mr. SIMMONS. Mr. President, I ask that the section be

passed over.

Mr. CUMMINS. Mr. President, before the section is passed over I have a substitute which I desire to offer for the committee amendment, and I should like an opportunity of saying something about it before the committee again considers the subject. I offer as a substitute for the amendment reported by

the committee the following.

The PRESIDING OFFICER. The Secretary will read.

The Secretary. It is proposed to substitute for section 3,

Mr. CUMMINS. If I may be permitted, I will state the substance of the substitute. I can do so, I think, in less time than would be required to read it.

Mr. SIMMONS. I was going to ask the Senator if he would

not do that rather than have it read by the Secretary.

Mr. CUMMINS. The substitute provides that there shall be levied upon all sales of capital stock, bonds, or other obligations of corporations, and upon all sales of products of the soil, meats, or provisions of any character made in, upon, through, or in connection with or under the regulations of any stock exchange, grain exchange, cotton exchange, board of trade, or the like, wherein the seller is not the owner of the thing sold at the time the transaction occurs, a tax of 10 per cent.

Mr. WILLIAMS. Does the Senator think that the amendment drawn by the Senator from Arkansas [Mr. Clarke] prohibits the owner of cotton from selling it for future delivery?

Mr. CUMMINS. I do not. I am about to compare my substitute with the one proposed by the Senator from Arkansas. I have already stated the substance of the substitute. I will restate it. It levies a tax of 10 per cent upon all sales made upon stock exchanges, boards of trade, and other institutions of like character, wherein the seller is not the owner of the thing sold at the time the transaction takes place. There are certain exceptions named in the substitute, which I need not now mention.

Allow me to say, Mr. President, that this amendment is not offered in hostility to the proposal of the committee, which I understand is the proposal of the Senator from Arkansas. The purpose of the amendment now in the bill is to prevent gambling in cotton. The purpose of my substitute is to prevent gambling in everything dealt in upon stock exchanges and boards of

I sympathize entirely with the general view of the Senator from Arkansas, and my only criticism of the object of his amendment is that he proposes to do for cotton alone what ought to be done for everything embraced within the activities of these institutions. There is a difference, however, in the method of accomplishing the purpose. In the amendment now found in the bill the object is sought to be reached by levying a duty of one-tenth of a cent a pound upon all sales of cotton for future delivery wherein delivery is not actually and in good faith made. In my substitute the result is accomplished by levying a duty of 10 per cent upon all sales wherein the man who sells is not the owner of the thing he is selling, but is simply speculating in the market.

Mr. SIMMONS. If the Senator will permit me, I suppose the Senator means 10 per cent upon the price at which the thing is sold.

Mr. CUMMINS. The amendment provides a tax of 10 per

cent upon the contract price of the thing sold.

The Senator from Arkansas [Mr. CLARKE] has described so completely and so impressively what is done upon the cotton exchange with regard to cotton that I need not enlarge upon that phase of the gambler's enterprise. I intend for a few minutes to take up the New York Stock Exchange, and to lay before the Senate the briefest outline of what is done there with regard to one of the great classes of property which so closely touches the welfare of the people of the United States.

I take, as an illustration, the year 1912. The dealings upon the exchange were less last year than the year before, and

therefore it is entirely fair to take the year 1912.

In that year there were sold upon the exchange in New York bonds-and I am giving the bonds simply for the purpose of instituting a comparison—amounting in the aggregate to \$653,-497,000. I want Senators to remember the small, meager amount of bonds sold upon the New York Stock Exchange when I come to state the amount of stock sold in the same market during the same time.

In the year 1912 there were sold on the exchange in New York 63,704,779 shares of railway stock alone. The par value of the stock so sold was \$5,052,823.900. Of industrial and miscellaneous stocks there were sold upon the exchange, in the year, 72.413.946 shares of the par value of \$6,150.899.600. Of all stocks there were sold 136,118,725 shares, with an aggregate

par value of \$11,203,723,500.

I pause here to point out the fact that the aggregate value of the railroad stocks sold or pretended to be sold during that year upon the exchange amounted to about four-fifths, or certainly more than three-fourths, of all the railroad stocks of the United States. All the railroad stocks are not listed upon the New York exchange; but the aggregate stocks, common as well as preferred, of all the railway companies of this country does greatly exceed \$7,500.000,000. I state it in round numbers. Of the stocks listed upon the New York Stock Exchange there were sold during that year \$5,052,823,900.

It goes without saying that 90 per cent of these sales were purely speculative. Certainly not more than 10 per cent of the stocks of the railroad companies of this country actually changed hands during the year 1912, and yet three-fourths of those stocks were nominally sold upon the New York exchange alone. I am not now taking into account the exchanges of Philadelphia, Boston, Chicago, and the other great cities of the country.

We might as well face the question whether we intend to enter upon a campaign against selling short in this country. I believe it is as serious a menace to industrial stability and financial strength as is now before the American people. Some time we must take up in earnest the problem of suppressing these gigantic gambling transactions, and I think this is the time to do it. My amendment demands that we do it now.

As I said the other day, I believe we ought to employ the taxing power, if we can not employ any other, in order to reach an evident and obvious evil. I am not suggesting that, legally speaking, the principal purpose of the substitute I have offered is not to produce a revenue. I do not know whether any such transactions could take place under the amendment I have proposed. I hope they could not. I have no hesitation in saying that I believe that if we impose the tax I have suggested the I hope they could not. I have no hesitation in saying next year will not witness a tithe of the gambling that has been flaunted in the face of the American people during each year of the last quarter of a century.

There are a great many good people who believe that the short sale—that is, the sale of a commodity or a product or a stock by a man who does not own it, but who expects to go into the market when the time for delivery comes and either settle upon the market price as it then is or buy at the market price the thing which he has sold, in order to make deliveryvaluable element in the business of the United States. It has been so argued for a long, long time. I do not think so. It is said that short sales are necessary in order to create a market for things that people actually want to sell, and in order to insure a condition which will enable a man to sell anything, the moment he wants to sell it, at the market price. I do not think so. When one has a thing that somebody else wants to buy, there will always be an opportunity for the seller and the buyer to meet.

The proposition I have made does not involve the abolition of the stock exchange. It does not involve the abolition of the board of trade. It does not touch the market places of the country. People will still be at perfect liberty to meet and country. People will still be at perfect liberty to meet and trade. Those who want to sell and those who want to buy will

come together and conduct their business according to legitimate and honest business methods. Indeed, I think the market places of the country will be rendered more secure, they will be made more available than they are now, if they are the scene

of actual transactions alone.

Then the man who has something to sell will enter the stock exchange and offer it fairly and legitimately, and the man who wants to buy will buy it with full knowledge of all the condi-tions which surround it. But as it is now, it is not a place for the transfer of actual shares. It is a place in which bold and experienced men balance their wits. It is a place in which men of great mental capacity and audacity as well fight for supremacy, employing, not alone the means which ought to influence the price of stocks, but every means which may tend to affect the market.

It is said-and this is one of the arguments most frequently used—that short sales ought to be permitted, because they tend to steady the market and tend to prevent extreme fluctuations in the price of commodities. I have read a great deal of argument submitted to sustain this contention. I can not at this time enter upon an analysis of the subject as I would like to do. I can only record my own opinion that instead of steadying the market short sales disturb the market. Instead of preventing extreme fluctuations they excite extreme fluctuations. Those who defend the practice always forget that when short sales are used to steady prices-and I admit there are times when they are so employed—they are employed to steady prices which the practice itself has disturbed.

If you will take away the temptation presented by the short sale—which is, viewed from my standpoint, gambling pure and simple—the consistent in which short sale. simple—the occasions in which short sales have been used for the benefit of the people will not arise. The range of prices will remain within the limit which is created by honest and legitimate considerations—the demand, the supply, the intrinsic

value of the article which is sold.

Allow me to go one step further with regard to what is done in New York; and I must confine myself to one phase of this matter in order to conclude within any reasonable time.

In 1912 the Atchison, Topeka & Santa Fe Railroad Co. had listed on the New York Stock Exchange its common stock. It amounted to \$168,430,500. At the end of the year, as we are assured by those who know something of the subject, practically the same persons owned the stock who owned it at the beginning of the year; and yet during the course of the year the stock of this company to the amount of \$129,319,700 was sold and bought upon the New York Stock Exchange alone.

The Chicago, Milwaukee & St. Paul Railroad Co. is one of the most stable railway companies of the country. Its future is assured. Its earning capacity is well known. slightly that its dividends are almost as uniform as the interest upon Government bonds. And yet this is what happened: Its entire common stock amounted to \$116,348,200; but during this year there were sold and bought on the New York Stock Exchange stock of this company to the amount of \$149,277,200. At the end of the year practically the same persons owned stock that owned it at the beginning of the year; and the fluctuations in the market price, steady and permanent as it ought to be, ran from 1175 to 993.

How many fortunes were wrecked in that fluctuation it is impossible for me to say. There was no material difference in the actual value of the stock during that year. It was just as certain to pay dividends at one time as at another. The future of the company remained the same. The country that it served remained the same. The business at its command continued without great change or variation. Yet during the course of the year, up and down, under the influence of these speculators who sought nothing else than their own advancement and their own profit, this stock varied from 1175 to 993.

Again, the Erie Railroad Co. had outstanding that year \$112,378,900 of stock, but there were sold on this exchange shares aggregating \$245,033,100—almost two and a half times in the one year the aggregate value of all the stock of the

company.

The Canadian Pacific, another company which is engaged in legitimate railroad business, whose earnings do not change very greatly, had listed upon this stock exchange stock of the aggregate value of \$180,000,000. During the year there were traded in shares of the value of \$159,693,800, and the market price of the stock ranged from 226, the low point, to 283, the high point, without any reason whatsoever for the fluctuation.

The Great Northern, another rather steady property when it escapes from the hands of those who desire to manipulate its fortunes for their private interest, had listed \$209,981,875 of stock; and there passed back and forth, in this fictitious and

unreal way which is known to no other business in the world except that which is done upon such an exchange, shares of the value of \$119,236,700.

The Lehigh Valley is a road that has seemed to be the favorite of these speculators in New York, although it is a railroad doing a most legitimate business and supplying a service that must continue without essential change. Its stock amounted to \$60,501,700, yet men pretended to buy and sell upon the exchange during this year \$175,625,000, and its market price ranged from 155% to 185%.

The Missouri Pacific had \$83,251,085 of stock. Somebody bought and sold on the exchange \$113,320,800 of it without any real change of ownership, and it fluctuated from 35, the low

point, to 47%, the high point.

Northern Pacific, with \$248,000,000 of stock, saw its

shares bought and sold to the extent of \$151,551,800.

The Reading, another of these great composite railroads, well established, doing a business which must continue so long as the people of this country do any business at allbeg, now, that Senators will especially remember this-had a common capital stock of \$70,000,000. Yet these people in New York, for themselves or for these blind and inexperienced men who seek to find a fortune where fortunes are not to be found, sold, and somebody bought, \$1,114,468,250 of its stock. In other words, all its capital stock was bought and sold more than fifteen times during the course of the year.

The Southern Pacific had stock to the amount of \$272,672,405, and of its stock there was sold during that year \$129,139,400.

Of the common stock of the Union Pacific there was outstanding \$216.627,800. There was bought and sold during that year \$1,062,600,600, and the range of market value was from 150% to 176%

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I do.

Mr. BRISTOW. I should like to ask the Senator how he accounts for the stock of some roads being so much more active than others-that is, the speculation being so much more extensive in the Reading and the Union Pacific, for instance, than in the Santa Fe and the Southern Pacific?

Mr. CUMMINS. I do not know, Mr. President. It would be easy to account for it in one way, although I am not sure that I can present the basis for believing that it was oc-casioned in that way. The speculators, of course, like stocks that are easily depressed and easily increased in price.

The fluctuation of stocks that they can influence in that way are more attractive, because the stake for which they play is larger. That will certainly account for some of these; it will not account for all of them. But at any rate I have given the

record as it has been made upon the exchange.

I now turn to other stocks. The railroad stocks ought to be the best, the steadlest in the country. I hope we will see a time when the railroad stocks of this country are as safe an investment as the Government securities themselves. lieve we will see a time when uniformity in value, uniformity in earnings, and freedom from manipulation will result in a

steady market price.

But I now turn to another kind of stock. I call them industrial or miscellaneous stocks. The first one that I mention is Amalgamated Copper, known to every man who has any interest in what takes place among the great speculators of the country. Its stock amounts to \$153,887,930. It was traded in during 1912 to the extent of \$812,869,500. I doubt exceedingly whether at the close of the year there was any substantial difference in the ownership of the stock as compared with the beginning of the year. The lowest price was 60, the highest price 92%, a range of 32% per cent, or one-third of the par value of the shares themselves.

The American Beet Sugar Co., of which we have heard a good deal in recent years, had a common capital stock to the value of \$15,000,000. There were sold and bought on this exchange during the year shares of this company of the aggregate value of \$108,612,400, more than seven times the entire

amount that had been issued by the company.

The American Can Co., another company out of which great fortunes have come, had stock of the par value of \$41,233,300, and yet there were sold on the exchange during the year shares amounting to \$379,658,300, quite nine times the value of all the stock then outstanding.

The stock of the American Smelting & Refining Co., another institution which has been utilized for winning great fortunes, was \$65,000,000, and of that \$15,000,000 had been withdrawn and deposited to secure certain bonds, and therefore really it had outstanding but \$50,000,000. Yet the trading in this stock amounted during the year to \$227,741,000. Its low point was

66½, its high point 91.

The General Electric Co. had \$77,325,200 of stock. ing amounted to \$50,551,000. The United States Steel Corporation, the greatest industrial organization of the time or of any other time in this or any other country, had outstanding common stock of the par value of \$508,302,500, and yet somebody sold and somebody bought during the course of the year shares of this stock amounting to \$2,462,622,400. The low point was 581, the high point 80%.

The man who urges that short sales are a steadying influence in the value of commodities in which we deal and of which the business of this country is made up has only to consult the table, a part of which I have read, in order to be assured that the experience of this country, at least, does not sustain the

contention.

I desire to print as a part of my remarks the two tables from which I have read.

The PRESIDING OFFICER. It will be so ordered, without objection.

The tables referred to are as follows:

Bonds were sold on the New York Exchange during the year 1912 as \$23, 656, 000 339, 816, 900 130, 762, 000 6, 786, 000 16, 640, 000 14, 856, 000 117, 700, 900 3, 281, 000 653, 497, 000

Stocks sold on the New York Stock Exchange during the year 1912.

Mr. CUMMINS. I desire to call the attention of the Senate to a few paragraphs in the report of the committee appointed pursuant to House resolutions 420 and 504, to investigate the concentration of control of money and credit. This investigation, as you all know, was carried on by the House of Representatives, and I think it may safely be said that there were more important and interesting and instructing facts developed in the course of the investigation than had ever before been submitted to the American people in the same length of time. I read very briefly from page 44 of the report:

But it is in respect of the extent and character of the speculation in securities for which it is the agency that the New York Stock Exchange touches most vitally the affairs of the people of the entire country. This subject was investigated in 1909 by a committee on speculation in securities and commodities appointed by Gov. Hughes, of New York, and its complete report is annexed to the record as Exhibit No. 27.

I mention the first paragraph in order to indicate the subject covered in that portion of the report. I read further a brief |

extract quoting from the report of the well-known New York

A real distinction exists between speculation which is carried on by persons of means and experience

And this is especially worthy of consideration-

And this is especially worthy of consideration—

A real distinction exists between speculation which is carried on by persons of means and experience, and based on an intelligent forecast, and that which is carried on by persons without these qualifications. The former is closely connected with regular business. While not unaccompanied by waste and loss, this speculation accomplishes an amount of good which offsets much of its cost. The latter does but a small amount of good and an almost incalculable amount of evil. In its nature it is in the same class with gambling upon the race track or at the roulette table, but is practiced on a vastly larger scale. Its ramifications extend to all parts of the country. It involves a practical certainty of loss to those who engage in it. A continuous stream of wealth, taken from the actual capital of innumerable persons of relatively small means, swells the income of brokers and operators dependent on this class of business; and in so far as it is consumed, like most income, it represents a waste of capital. The total amount of this waste is rudely indicated by the obvious cost of the vast mechanism of brokerage and by manipulators' gains, of both of which it is a large constituent element. But for a continuous influx of new customers, replacing those whose losses force them out of the Street, this costly mechanism of speculation could not be maintained on anything like its present scale.

The report then proceeds to consider a large number of cor-

The report then proceeds to consider a large number of corporations, pointing out the number of shares of stock dealt in during a certain period as compared with the number of shares of stock naturally transformed upon the books of the companies of stock actually transferred upon the books of the companies

during the same period of years.

I can not take the time to read this part of the report, but it is so conclusive with regard to the vice of this sort of specula-tion or gambling, as I prefer to call it, that I ask the consent of the Senate to print as a part of my remarks what I have just read, together with the remaining portions of pages 43, 44, and 45.

The PRESIDING OFFICER. Is there objection. If not, it

is so ordered.

The matter referred to is as follows:

SECTION 14. UNWHOLESOME SPECULATION.

SECTION 14. UNWHOLESOMS SEECULATION.

But it is in respect of the extent and character of the speculation in securities for which it is the agency that the New York Stock Exchange touches most vitally the affairs of the people of the entire country. This subject was investigated in 1909 by a committee on speculation in securities and commodities appointed by Gov. Hughes, of New York, and its complete report is annexed to the record as Exhibit No. 27. That committee had, however, no power to subpens witnesses or to send for books and papers. It was compelled to rely largely on statements formulated by the governors of the exchange in consultation with their counsel in answer to written questions. While opinions will differ as to the wisdom or adequacy of the recommendations of that committee, its distinguished personnel and exceptional qualifications are a guaranty of the thoroughness and accuracy of its findings of fact.

It found, among other things, that—

"It is unquestionable that only a small part of the transactions upon the exchange is of an investment character; a substantial part may be characterized as virtually gambling.

"The rules of all the exchanges forbid gambling * * but they make so easy a technical delivery of the property contracted for that the practical effect of such speculation, in point of form legitimate, is not greatly different from that of gambling. Contracts to buy may be privately offset by contracts to sell. The offsetting may be done in a systematic way by clearing houses or by "ring settlements." Where deliveries are actually made, property may be temporarily borrowed for the purpose. In these ways speculation which has the legal traits of legitimate dealing may go on almost as freely as mere wagering, and may have most of the pecuniary and immoral effects of gambling on a large scale.

"A real distinction exists between speculation which is carried on by

the purpose. In these ways speculation which has the legal traits of legitimate dealing may go on almost as freely as mere wagering, and may have most of the pecuniary and immoral effects of gambling on a large scale.

"A real distinction exists between speculation which is carried on by persons of means and experience, and based on an intelligent forecast, and that which is carried on by persons without these qualifications. The former is closely connected with regular business. While not unaccompanied by waste and loss, this speculation accomplishes an amount of good which offsets much of its cost. The latter does but a small amount of good and an almost incalculable amount of evil. In its nature it is in the same class with gambling upon the race track or at the roulette table, but is practiced on a vastly larger scale. Its ramifications extend to all parts of the country. It involves a practical certainty of loss to those who engage in it. A continuous stream of wealth, taken from the actual capital of innumerable persons of relatively small means, swells the income of brokers and operators dependent on this class of business; and in so far as it is consumed, like most income, it represents a waste of capital. The total amount of this waste is rudely indicated by the obvious cost of the vast mechanism of brokerage and by manipulators' gains, of both of which it is a large constituent element. But for a continuous influx of new customers replacing those whose losses force them out of the "street" this costly mechanism of speculation could not be maintained on anything like its present scale."

That in large measure transactions in shares on the New York Stock Exchange are purely speculative is also evidenced by the high ratio of the sales of a given stock during very short periods to the total amount isted, and further by the gross disproportion between the number of shares sold and the number transferred on the company's books within stated periods, such transfers measuring in at least a rough way the purch

tables showing the sales day by day during the most active months. (Exhibits 74 to 108, inc., R., 1120-1178.)

The corporations selected for the purpose are Reading Co., United States Steel Corporation, Amalgamated Copper Co., Union Pacific Raliroad Co., American Can Co., Rock Island Co., American Smelting & Refining Co., Columbus & Hocking Coal & Iron Co., Eric Raliroad Co., Consolidated Gas Co., Brooklyn Rapid Transit Co., Colorado Fuel & Iron Co., California Petroleum Co., and Mexican Petroleum Co.

The shares of the two last-named companies were only listed within the past year

These tables and charts are annexed to this report as Appendix D. No adequate descriptive analysis of them can be made.

Stating the results shown only in the most general way, it appears that there has not been a year since January I, 1906, when the Reading Co.'s entire common stock issue listed and subject to sale was not sold at least 20 times over and from that on up to 43 times; that in a single month of that period it was sold 6 times over and that in only 2 months of the entire period was it sold less than once over in a single month; and that although it is a dividend-paying stock the number of shares transferred on the company's books averaged for the period & per cent of the shares sold.

Summarily stated, it further appears that in each year since January 1, 1906, the entire listed common-stock issue of the United States Steel Corporation has been sold 5 times over each year on the average, while the number of shares transferred on the company's books has averaged 25 per cent of the number sold;

That in the same period the entire common-stock issue of the Amalgamated Copper Co. has been sold 8 times over each year on the average, while the number sold;

That in the same period the entire common-stock issue of the Union Pacific Raliroad Co. has been sold 11½ times over each year on the average, while the number sold;

That in the same period the entire listed common-stock issue of the Union Pacific Raliroad Co. has been s

age, while the number oil shares transferred has accessed severed to the number sold;

That since January 1, 1906, the entire listed common-stock issue of the number sold;

That in 1912 the number of shares transferred was only 16 per cent of the number sold;

That in 1912 the entire listed common stock of the American Can Co. was sold 8½ times over, while the number of shares transferred was 25 per cent of the number sold;

That since January 1, 1906, the entire listed common-stock issue of the Rock Island Co. has been sold twice over each year on the average, while the number sold;

That since January 1, 1906, the entire common-stock issue of the American Smelting & Refining Co. has been sold 12 times over each year on the average, while the number sold;

That since January 1, 1906, the entire listed common-stock issue of the Frie Railroad Co. has been sold more than twice over each year on the average, while the number sold;

That since January 1, 1906, the entire listed common-stock issue of the Consolidated Gas Co. has been sold more than once over each year on the average, while the number of shares transferred has averaged only about 40 per cent of the number sold;

That since January 1, 1906, the entire listed common-stock issue of the Brooklipur Rapid Transit Co. has been sold more than once over each year on the average, while the number sold;

That since January 1, 1906, the entire listed common-stock issue of the Consolidated Gas Co. has been sold of times over each year on the average while the number sold;

That ince January 1, 1905, the entire listed common-stock issue of the Brooklipur Rapid Transit Co. has been sold 5 times over each year on the average while the number sold;

That ince January 1, 1905, the entire listed common-stock issue of the Brooklipur Rapid Transit Co. has been sold 5 times over each year on the average when the sold;

That in October, 1904, the shift while the sold of the sold

Mr. WILLIAMS. I should like to ask the Senator from Iowa a question. He is discussing the question of speculation in stocks as being pertinent to a discussion of speculation in cotstocks as being perthent to a discussion of specialitism cou-ton. I want to call has attention to the fact that there is a perfectly distinct line of differentiation. When a man sells a hundred shares of Illinois Central stock for future delivery he sells one definite specific thing which he must deliver. When a man sells 100 bales of cotton upon a middling basis he sells both dealing in something which they do not expect to have.

something which he may deliver in twenty-odd different grades, with different values, with an artificial differential which is fixed by a private committee belonging to a stock exchange in New York.

A man can sell property for future delivery provided he sells the same property and delivers the property. Suppose I was carrying on a stock farm, raising hackney horses, and engaged to deliver two years from now 100 yearling colts at a certain price. I would not own the colts, but I think I am going to have that many colts on the place and that I know I would be willing to sell them at the agreed price. Would the Senator's substitute prohibit that?

Mr. CUMMINS. It would not, Mr. President. I would, however, prevent the sale upon stock exchanges and boards of trade and other like institutions of the property dealt with there, of which the seller was not the owner at the time the transac-

tion took place.

The Senator from Mississippi must remember that I have not attempted to interfere with sales save upon these exchanges, these boards of trade. If the Senator from Mississippi, being the owner of a cotton plantation, wanted to sell cotton to be delivered 50 years hence, however exaggerated that might be, there is nothing in this substitute that would prevent him from doing it. But it would prevent him from going upon the New York Cotton Exchange and, under its rules and regulations, there agreeing to sell a certain amount of cotton for future delivery if he was not the owner of the cotton at the time the transaction took place. This does not interfere at all with the ordinary dealings of the world. Nineteen-twentieths of all the commodities produced in America are sold without recourse to a board of trade or a stock exchange or any other organization of that kind. This amendment does not refer to those transactions in any manner.

Mr. WILLIAMS. If that last explanation be correct, then I have misunderstood the Senator when his amendment was read. or, rather, when he explained what was in it. If I remember correctly, the Senator stated he would not interfere with the owner of a product from selling it.

Mr. CUMMINS. I think I can best explain that by reading

the first paragraph in the substitute.

Mr. WILLIAMS. I want to make another illustration, if that be the case. Here is a man engaged in the business of buying and selling live stock—cattle and horses. He lives in Kentucky, and he goes through Kentucky and Missouri and Tennessee and buys mules and goes down to Mississippi and sells them to the cotton planters, and goes down to Louisiana and sells them to the sugar planters. He makes an agreement down there to sell somebody 100 head of mules, 16 hands high, at a certain price. He does not own them at the time he sells them, but he thinks he can buy them at a margin that will enable him to enter into the trade. That is a case where he did not own them and did not own anything out of which he could produce them.

Mr. CUMMINS. I do not say whether the transaction just mentioned by the Senator from Mississippi is a safe one or not; but I do say that it is not touched in any way by this amendment. Mules are not sold upon boards of trade and exchanges. You must have some commodity in which there is such simili-tude that 100 pounds of it or 100 shares of it can be delivered upon any contract calling for a hundred pounds or a like number of shares. This substitute does not reach any such thing. It touches exactly the same subject that is covered by the amend-

ment of the Senator from Arkansas.

Mr. BORAH. Mr. President-The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. CUMMINS. I do.

Mr. BORAH. What is the distinction to be drawn between the kind of a transaction which the Senator from Mississippi presents to the Senate and the transaction which takes place upon the board of trade or the exchange except as to the locality of the transaction?

Mr. CUMMINS. Mr. President, there is no difference be-tween the legal quality of the transactions. There is a very great difference between the moral quality of the transactions.

I have read a very few of the transactions of the New York Stock Exchange. I am sure that the Senator from Idaho will not find in them any similarity whatever to the case of an individual who goes about the country selling horses, expecting thereafter to buy horses of the kind agreed upon. I think the distinction must be perfectly clear.

Mr. BORAH. I must confess, Mr. President, that is not clear as far as the morale of the transaction is concerned. are both dealing in something which they have not; they are

Mr. CUMMINS. All that I can say, Mr. President, is that the history of this country does not sustain the suggestion of the Senator from Idaho. There has been a great deal of harm done by gambling upon the stock exchanges and boards of trade. I do not know of any harm that has been done by sales such as have been instanced by the Senator from Mississippi.

Mr. SMOOT. Mr. President

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Utah?

Mr. CUMMINS. I yield to the Senator.
Mr. SMOOT. I wanted to ask the Senator if a case like this would be affected by his amendment. Suppose I owned 100 shares of Southern Pacific stock and in my judgment I wanted to secure another 100 shares of that same stock, and in order to do so I went to a bank and gave as collateral security for a loan the 200 shares—the 100 shares that I wanted to purchase and the 100 shares that I was owner of. Something may happen that forces me to dispose of the stock or forces the bank to dispose of the stock while it is up for collateral security. Under the amendment offered by the Senator, could the bank itself sell that stock, not being the owner of the stock?

Mr. CUMMINS. Oh, yes, Mr. President, the amendment makes ample provision for that. It is confined to transactions upon the stock exchange. It does not interfere with any business that is carried on outside these peculiar and particular

organizations.

For instance, in New York if the bank was pro-Mr. SMOOT. hibited from selling a stock upon the stock exchange, then

they would be forced to look around for a customer.

Mr. CUMMINS. Yes; they would be forced to sell to somebody who wanted to buy the stock, and that is what the business of this country ought to accept.

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield

to the Senator from Kansas?

Mr. CUMMINS. Certainly. Mr. BRISTOW. Referring to the inquiry of the Senator from Idaho [Mr. Borahl], I got the impression that he believed that the 100 mules which the Senator from Mississippi referred to in his illustration were not to be delivered to the planter. I understand that when he contracts to deliver 100 mules to the planters he expects to buy them and deliver them. So it is entirely different from the stock exchange.

WILLIAMS. That is all I am claiming this Clarke amendment seeks to do. It seeks to confine these operations to exchanges and to things under similar regulations; that is, the bucket shops. Stocks sold on stock exchanges are delivered.

Mr. CUMMINS. My amendment is confined in the same

Mr. WILLIAMS. I dislike to take up the time, but I will

state the difference.

There has grown up a custom in cotton of buying upon the basis of middling delivery, and they can deliver any of the 28 different grades of cotton as they are classified upon the New York Cotton Exchange, with a differential of addition or subtraction in accordance with the stuff actually delivered as fixed by a committee. Now, we have a class of cotton which we call linters, referred to in the familiar style by the Senator from South Carolina as dog-tail cotton. A mill goes into the market to protect itself, indulging in business on insurance principles. buys so many bales of middling cotton. When the time to deliver comes they hunt around and through the agency of that committee they deliver to him linters, which is what is taken off cotton seed after it has once already been ginned. After it is ginned it goes through another process at the cottonoil mill, and what is taken off is linters. Suppose they deliver that to the cotton mill. No matter what the differential may be, the cotton mill has no use for that stuff. It is wearing sheetings, drillings, calicoes, and something else. He can not weave them out of linters. So that danger is held over the buyer for future delivery. As a consequence he never demands delivery: he takes his medicine. You understand now why he is afraid to demand delivery.

Now, not long ago we got tired of that and some of our people went up to New York. The South has passed by the time, thank God, when it can not finance itself. We knew from the annual production of cotton here and in Egypt, India, and elsewhere that cotton ought to be worth 3 cents or 4 cents more a pound than it had been hammered down to. These southerners determined to assert themselves. Some of them went to New York. They did not ask any New York bank for anything. They made their arrangements with New Orleans and Memphis banks and country banks beforehand, even in towns as small as Columbus, Miss. They believed the cotton was worth a certain price, and they ran the risk of meeting and

overcoming the "bear" movement even in that unfriendly atmosphere and saw it through. They bought all the cotton at the quotations these people gave. They then waited until the time came and made them deliver it.

They would not have undertaken that in an ordinary year. That happened to be a year when there were very few low grades of cotton. They always deliver the low grade trash that has to go through a picker until the fiber is torn to pieces. It happened that that was a year of remarkably good grades of cotton.

These men took the risk. Instead of turning this "dog-tail" cotton loose, as the Senator from South Carolina [Mr. SMITH] said this morning, they held it until the bears delivered to them everything of that sort they could raise and scrape. to go to work and find sure enough cotton to deliver. when they went out to find sure enough cotton, these men took every bale they could deliver. They insisted upon delivering the balance, and lo and behold, the Government comes in and indicts them for a combination in restraint of trade! The year before that the buyers and sellers had driven the market down from a margin very close to the cost of production. Nobody was ever We begged that the other fellows might be indicted for combining. Of course if one set of fellows go in and combine to buy and another set of fellows combine to sell they are

both combining. Are they not?

Mr. LIPPITT. I do not think that that is quite a fair statement of the situation. There was an actual combination in the case of the gentlemen who were indicted. There was no com-

bination in the case of the spinners buying.

Mr. WILLIAMS. The other combination exists all the

Mr. LIPPITT. I beg the Senator's pardon. I do not think he can point to a single instance.

Mr. CUMMINS. I hope the Senators will not pursue that line further.

Mr. LIPPITT. The Senator from Mississippi, I think, is in There is no tacit combination or any kind of combination in the purchase of cotton by different spinners. If there

is such a thing I never heard of it. Mr. WILLIAMS. That is true, but each spinner's motive each year is to bear down the future market in order that he may bear down the price of spots, and with absolutely one

accord that is what they do. Mr. LIPPITT. The Senator is entirely mistaken. The spinners in this country scarcely have anything to do with the fu-ture market. It is the rarest thing in the world for spinners manufacturing to go into the future market, except once in awhile for the purpose of hedging an actual purchase, and even

then it is very rarely done. Mr. WILLIAMS. The Senator from Arkansas [Mr. Clarke] proved this morning that some seventy-odd per cent of them never went into the future market at all. Of course, I am not talking about that percentage of them. The other 30 per cent

are enough to do the work.

Mr. LIPPITT. That is not an exaggerated statement of the

Mr. WILLIAMS. I think not.

Mr. CUMMINS. Of course, the substitute I have offered is not exactly like the amendment offered by the Senator from Arkansas, or rather the amendment that came from the committee, or I would not have offered it. The purpose of the amendment proposed by the committee, which the Senator from Arkansas has offered, as stated by him over and over again, was to prevent, suppress, and destroy gambling in cotton; that is to say, to prevent sales in cotton in which there was no delivery and where it was expected that the profits and the losses, as the case might be, would be determined by the state of the market at a particular time and upon a particular exchange. My substitute is intended to accomplish that very thing with regard to every commodity which is dealt with upon these exchanges. am not attempting to enter the general business of the United States any more than is the Senator from Arkansas [Mr. CLARKE ].

Allow me to reply a little further to the question of the Sena-Anow he to reply a little factor to the question of the control of a large part of the transactions upon these boards of trade and stock exchanges are fictitious transactions; they are not real; they take the form of sales of commodities, of sales of stocks, but it is not expected that any real transfer will take place. We have discovered that through this instrumentality thousands of men throughout the country have been wrecked in fortune. and not only so, but whose entire moral fiber has been stricken down. We have found these exchanges as the potent power in imposing upon the people of the country a great volume of

watered stock. Practically half of all the stock of the railroad companies of this country has no real foundation, or had none when it was issued. I suppose the unearned increment will gradually absorb it. We may have to pay for all time to come dividends upon stock that never should have been issued. More than half of all the stocks of the industrial companies, the large, the great industrial companies, have no foundation. They repthe great industrial companies, have no foundation. resent nothing but the criminal, or rather-I will withdraw that word—the avaricious disposition and the marvelous audacity of the men who are instrumental in putting them out; and yet neither this watered stock of the railroad companies nor the watered stock of the industrial companies would ever have been foisted upon the country had transactions upon stock exchanges been honest and real. This method of doing business on the stock exchanges has in that way corrupted not only the morals of the people but has imposed great and enduring burdens upon them which they will have to bear, I assume, for all time to come, because there are some mistakes which, once made, can not be rectified.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. CUMMINS. I do.

Mr. BORAH. The Senator from Iowa is discussing now the feature of the transaction in which I am most interested, and as to which I asked a question a little while ago, and that is that it is not yet apparent from the discussion how this transaction, for instance, in railroad stocks, in mining stocks, and in such stocks, affects anyone except these who actually participate in the transaction. Of course, I can realize, as to those men who hold the stocks or who deal in stocks, that as between themselves they may rob one another, but the question in which I was interested was, How does it reach out and permeate and affect society and the people generally? I ask this not in an unfriendly spirit to the amendment, but rather that it may more specifically appear what is the general effect upon the public.

Mr. CUMMINS. Mr. President, I am very glad that the Senator from Idaho has turned me in that direction, because it is the vital reason for the amendment. If no one were injured save brokers upon the stock exchanges or upon boards of trade, would not be very much concerned in their welfare. I shall, however, have no difficulty in pointing out how these stock

transactions do affect the whole country.

First let me give my reasons for believing that short sales on stock exchanges ought to be discouraged by taxing them. They ought to be prohibited, in my opinion, but we have no constitutional power to prohibit them. I suggest this illustration: If the Senator from Mississippi [Mr. Williams] is the owner of a hundred acres of land in his State and he sells it to me for a hundred dollars an acre, he is not concerned in depreciating the value of that property; rather, he is interested in maintaining its fair value under ordinary circumstances. It seems to me that every seller ought to be surrounded by the same influences and actuated by like motives. He has sold me property for a price upon which we have agreed, and his interest in it is at an end, save to secure the purchase price, if it be not paid at once. That allows all the normal influences to operate upon the value of the land. It may rise, it may fall, but it will neither rise nor fall on account of any interest that its seller has either to increase its value or to decrease its value.

Now, come to a transaction upon the stock exchange in New ork. The Senator from Mississippi being operating there, both of us operating there, sells me a hundred shares of Chicago, Milwaukee & St. Paul stock at \$100 a share. He is not the owner of the property, and in order to make any profit in the transaction the price of the stock must decline before the delivery is made in order that he shall make a profit from it. Therefore the instant the Senator from Mississippi sells me the hundred shares of stock for future delivery it becomes naturally and imperatively his interest to do everything he can to affect the value of the stock that he has sold, for in order to fulfill his contract he must buy in the market to make delivery or settle the difference. If you will couple up the single seller with the hundreds of sellers in stock exchanges in New York and elsewhere and the hundreds of buyers in the same organization. you will understand the constant struggle to affect the price or the value of commodities dealt in upon those exchanges and all with little or no regard to the intrinsic worth of the thing sold.

Mr. CRAWFORD. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from South Dakota?

Mr. CUMMINS. I yield to the Senator from South Dakota.

Mr. CRAWFORD. Is there not this difference between the New York Stock Exchange and the other exchanges, like the Cotton Exchange, the Produce Exchange, and the Corn change, in this, that in the New York Stock Exchange before the stock can be listed at all and have the standing and reputation which it gets by reason of its being listed, the managers of the stock exchange do undertake to make a thorough examination of the company or the institution issuing the stock and the securities, and the very fact that they are permitted to list them there does, in itself, establish the fact that they have actual and intrinsic value? So there is—and I am not a defender of the practices of the stock exchange; I think they are vicious, and that they do amount to gambling; yet I think it is only due to say that the very fact that stock is permitted to be listed there is, in a way, a guaranty to the country, and is accepted as such, that it has actual, substantial value, and the price at which it is listed is accepted everywhere as its price.

Mr. CUMMINS. Mr. President, stocks are not listed at any price.

Mr. CRAWFORD. I mean as the stock is quoted there.

Mr. CUMMINS. It is quite true that the stock exchange in New York and the stock exchanges everywhere undertake some kind of an examination into the regularity of the organization or the company or the corporation that issues the stock, but of course a moment's reflection will show that such an examination has little to do with the real value of the stock, because the stocks now listed upon the exchange in New York run all the way from practically nothing to quadruple par value. not say that some of these low-priced stocks were of so little value at the time they were listed, but that is the way they turn out. I repeat, lest it may be forgotten, that the great vice of short selling in and of itself is that it creates a motive on the part of the seller to depreciate the price of the thing sold until the delivery is made, for in no other way can the seller make any profit from the transaction.

I think values ought to be determined by a consideration of legitimate conditions. If it be the value of a share of stock in a railroad company, what are its present earnings, what are its earnings likely to be, what is money worth, what is the general financial condition of the country? and so on. are legitimate matters to be considered, but the war between the man who sells and the man who buys, the one to depreciate the stock and the other to lift it up, is demoralizing to the

honest business of the country.

Mr. WILLIAMS. Mr. President, I should like to ask the

Senator from Iowa a question.

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. CUMMINS. I yield.

Mr. WILLIAMS. Are stocks upon the stock exchange sold

upon margins without actual delivery?

Mr. CUMMINS. In the various stock exchanges the time of delivery is different. In the New York Stock Exchange stocks are sold upon a margin of 10 points, or 10 per cent, I believe, and the delivery is made within the day, generally, but not always, by what is known as borrowed stock. With respect to every corporation whose stock has been sold in this large way there are blocks of stock in the hands of men in New York who loan it to Tom, Dick, and Harry for the purpose of making the deliveries that are required by the rules of the New York Stock Exchange, and I think that, technically, all the sales of capital stock that are made in the New York Stock Exchange are delivered in that way, and not 20 per cent of them are transferred upon the books of the corporation which issues the stock, but the certificates themselves are delivered. They are delivered through the medium of borrowing, a practice under which a man who has a little stock loans it in order that the man to whom he loans it may make a delivery on a sale which was made without ownership at all. Out of that, of course, there comes some profit. Then there is a grand clearing house. As suggested a few moments ago in regard to cotton, these men get together at the close of the day's business, and they adjust the transactions just as they do in the clearing house of banks, and a very few certificates of stock, comparatively, are sufficient to make deliveries for the entire transactions of the day. lieve that kind of business is bad for the country and bad for the people who engage in it. If no one engaged in it but the members of the boards, we need be less concerned about it, but the great proportion of it is carried on by the members of the boards for men who are not members of the board or of the stock exchange, upon orders from all parts of the country. This country is simply full of men who have been ruined by selling or buying stocks on small margin, and selling grain, too, because we in the West are just as much endangered through transactions upon the Board of Trade in Chicago in our wheat, in our oats, and in our meat as is the South with respect to her

Mr. WILLIAMS. I should like to suggest to the Senator there, that one of the reasons why this amendment was confined to cotton was that, so far as I know, there has not been a complaint before the committee from a single grain grower in the United States, nor has any attempt been made, so far as I know, to procure for them legislation like this. So far as I know, when the Scott bill was up, the committee was forced by the western farmers—Mr. Scott himself being a Westerner, a Kansas man-to confine the operation of the bill entirely to cotton, because the other producers did not want their products included in it.

I want to tell the Senator why the difference occurs. are, I believe, three or four grades of wheat—I think there are four. Every grade of wheat is eatable; it is consumable; it is valuable, and when a man buys upon the basis of No. 2 wheat, if he has No. 1 delivered to him or No. 3, the differential is fixed by the spot wheat market sales on the day of delivery. That is perhaps the reason why this sort of difference exists in the two sections of the country.

The cotton producers have demanded this legislation; they have been asking for it for years. There was a time the wheat and corn producers were doing the same thing, as when the Hatch bill was being considered; but, for some reason or other, the western farmer has ceased to complain about options and futures in connection with his product. complaint from the West has come to the committee.

Mr. BRISTOW. Mr. President, if the Senator from Iowa

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. Certainly. Mr. BRISTOW. I desire to say that the Senator from Mississippi [Mr. Williams] is mistaken as to the sentiment of the farmers who produce wheat and cattle. Mr. Scott incurred the hostility of the farmers' organization of Kansas for yielding the point as to wheat, and it was one of the very potential reasons that resulted in his retirement from Congress

Mr. WILLIAMS. I do know that we had them all in the bill and they were all stricken out except cotton, and the reason given was that the producers of the other products were not demanding it and were not subject to the same conditions. Whether or not that reason was founded in fact, I do not know, but I do know that that happened.

Mr. BRISTOW. The real reason was the powerful influence of boards of trade in the western cities that speculated in the grain market. The organization of the Farmers' Union, which is a very powerful organization in some of the Western States, is just as anxious about legislation of this kind in regard to wheat as the cotton planters can be in regard to cotton in the South, but, having lost some years ago in their fight here, they feel discouraged, and they are not here because they do not think there is any use of being here.

Mr. CUMMINS. I recognize the difference between wheat and cotton in the respect mentioned by the Senator from Mississippi. The range is not so great, nor do I think there could be delivered one grade upon a contract made for another

Mr. WILLIAMS. It is not only a question of range, but every grade of wheat is useful for eating and consumption. There is no such thing as useless, unconsumable wheat.

Mr. CUMMINS. Mr. President, that is quite true, and it is also true, as I understand, that there is no such practice on the boards of trade in the West as will permit the delivery of one grade of grain upon a contract for the delivery of another grade of grain; but the Senator is entirely mistaken, as just stated by the Senator from Kansas [Mr. Bristow], in the attitude of the western grain growers, and he will look through the records of Congress in vain for any statement by any real grain grower to the effect that the proposed legislation of a few years ago would injuriously affect him. The men who opposed that legislation and the men who finally accomplished their purpose were the grain buyers throughout the West, closely affiliated, of course, with the Chicago Board of Trade. But I do think, speaking candidly, that the legislation which I have proposed is less needed to protect the farmers from speculation in grain than it is to protect the whole country from speculation in the stocks of corporations.

I come now to my final suggestion. I was asked why we should concern ourselves in this matter and how it affected the public welfare. Let me answer that question very briefly, but, as I think, very conclusively. I remarked a few moments ago that the practice of the last 15 or 20 years in the capitalization of corporations was now under condemnation.

No one now attempts to defend the overcapitalization of great organizations; we all deprecate what has happened in the last few years; but it does not require a moment's reflection to convince anyone familiar with the subject that the only way in which the watered securities of overcapitalized corporations can be put upon the market and distributed among the people is through the conspiracies which go with short selling, is through the speculative and vicious transactions daily witnessed upon stock exchanges. I challenge any Senator or any other man to point out how the common stock of the United States Steel Cor-poration could have been floated through the markets of this country save through the instrumentality I have mentioned. The whole process lends itself to overcapitalization, and if you once eliminate or exterminate short selling there will be no opportunity in the future to duplicate the wrongs which these men have committed against the business of the land in the last few years.

Moreover, this practice is intimately connected with the banking system of the United States. No one now questions the unwisdom of the use of money in New York and in other large centers of the country made up of the reserves of the banks throughout the land. When the investigation to which I referred a few moments ago was being carried on, I remember there were nearly \$800,000,000 then loaned in the city of New York alone upon transactions such as I have described. If you will eliminate short sales from the New York Stock Exchange, there will be no longer a profit in this great stream of money flowing from the West toward the East, but it will be employed where it belongs-in transactions which are fair, legitimate, and helpful to the people.

For these reasons, Mr. President, I have offered this substitute. I do not shrink from the charge, if it be made, that it is radical. It is a radical proposition—radical in the sense that it overturns a kind of business that has been carried on for years in the United States, the excesses of which, however, and the evils of which have been more manifest in recent years than ever before. If the proposition is right, it ought to be accepted; and if short selling ought to cease upon boards of trade and stock exchanges, then we ought not to hesitate in adopting the amendment which I have proposed. If, however, we desire to foster and stimulate the sales of stock, of grain, of cotton, by men who have neither produced them nor deal in them-I mean, deal in them in the sense of transferring them from one person to another—if we desire to shield what I believe to be the most vicious, the most pernicious, the most demoralizing influence in American business, then we will ignore the substitute which I have offered; but if we believe that the American people ought to go forward fairly and honestly selling what they have to sell and buying what they want to buy without the intervention of the men who sell what they do not have and the men who buy what they do not want, we will adopt the substitute. I submit it, hoping that the Committee on Finance will carefully consider the propriety of enlarging the scope of the amendment proposed by the Senator from Arkansas.

Mr. BRISTOW. Mr. President, I wish to inquire of the Senator from Iowa if he does not think more people have lost their savings and more men have been ruined in business by gambling on boards of trade than ever were injured by the Louisiana lottery when it was running in its full power?

Mr. CUMMINS. Oh, Mr. President, vastly more. The Louisiana lottery was a pink tea, with bridge whist as an accompaniment. The dealings on the stock exchange of the kind I have referred to are the roulette tables in the palace at Monte Carlo. I venture to say that there are scores and scores of people in my own city who habitually send all they can save, beg, or borrow into the vortex of the institution that we call the board of trade.

I know the board of trade does a great many honest things and performs a great many useful and legitimate functions. These I would see continued. Nevertheless, inasmuch as a man can buy a thousand bushels of wheat or sell a thousand bushels of wheat by telegraph, depositing only a very small margin, he either buys or sells a great deal more than he could possibly take or pay for if it were offered to him, and the moment the market turns a little against him his margin disappears and he has lost his deposit. In that way our State, and I think nearly every State of the country, is filled with men who vainly pursue this "will-o'-the-wisp," trying to make large gains out of small investments, an effort which in nearly every instance comes to naught and ends in hopeless disaster.

It transpired in some investigation-I can not now recall just which one it was-that 95 per cent of the outside men who invest their money in these short selling or buying transactions lose it. The people outside do not make money. few people who do-the great geniuses of the country, the great manipulators of markets, the men who have vast power and influence. They can accumulate fortunes, and often do, I believe.

But the average men, with a little money, scattered throughout the country, who send in their orders for a few thousand bushels of wheat or for a few shares of stock, all, or practically all, lose their money. They not only lose what they have invested, but their moral fiber is weakened and they become unfit to carry on legitimate and lawful business.

Mr. NELSON. Mr. President, there are two sides to this question. In order to illustrate what I mean I will give the

Senate a little bit of past history.

My predecessor in office in the Senate introduced or advocated a bill to do away with options in wheat. There was quite a controversy over it in the State of Minnesota. The millers, the men who bought wheat, were in favor of it. It was said at the time-I do not know whether it was true or not-that it was because some of the millers had been speculating in wheat and had gotten caught by the Chicago fellows. For awhile they had the farmers interested and made them believe that it would be a great help to the farmers to destroy this option business. But finally, after due consideration, most of the farmers in Minnesota lost interest in the proposed legislation and came to the conclusion that option dealing, while it might hurt the speculators who were engaged in it, was not, after all, such a bad thing for the farmers.

Without option dealing the only buyers the farmers would have for their grain would be the millers, and they would control the market. The millers could absolutely say what the farmers were to get for their grain; and what the millers did not buy, or what they could not sell here at home, would be controlled by the foreign purchasers, the importers in foreign

I recollect quite well what the farmers said at that time. was nothing but a plain farmer myself then. They said: "Here, it is to our advantage to have two sets of buyers-not only to have the millers, who want our wheat for grinding, but to have these option fellows in the market, too. They sometimes help to boom the price and we get a little more for our wheat. To be sure, some of these school-teachers, these young fellows who want to get rich quickly in the different towns, go to these bucket shops and speculate in wheat; but what do we care for that? This speculation, one way or another, makes a bigger market for us, and especially when they get up a corner. If we have wheat in our granary at a time when they get up a corner, and can load up our teams and rush it to market, we may be able to get 10 or 15 cents a bushel more than the millers would possibly pay us."
So the enthusiasm in favor of that legislation that first

appeared in our State among the farmers utterly died away. They began to think that while option dealing in itself intrinsically was not exactly according to the creed of the apostles, yet after all it was not such a dangerous thing for the farmers. It gave the farmers a more extensive and broader market, and once in a while it gave the farmers a chance to get a little more

than they otherwise would have gotton for their wheat.

I am interested in the welfare of the farmers. These people who are foolish enough to bet on baseball or gamble in wheat or cotton are a set of gamblers. I do not know why my heart should go out to them. I am with the cotton raisers and the wheat raisers, and I am for whatever will help to give them a bigger market and a better market and a bigger class of buyers. Even if a part of the buyers are nothing but gamblers I have no objection, from the standpoint of the farmer.

Mr. WEEKS. Mr. President, I understand the question which has been up for discussion part of the afternoon, on the question

of cotton futures, is to be referred back to the committee. Having that in mind, I desire to submit for printing some letters

and telegrams which I have received relating to the subject.

One of the letters is from the treasurer of a mill; the others one of the letters is from the treasurer of a limit, the others are from cotton buyers—not cotton speculators in any sense, but persons who buy cotton in the South to resell it to the mills, wherever they may be located. They have submitted some views which I hope the committee will take into account, because I think they have a material bearing on the subject.

I ask that these communications may be included in the

RECORD.

The VICE PRESIDENT. In the absence of objection, it will be so ordered.

The matter referred to is as follows:

Neild Manufacturing Corporation, New Bedford, Mass., July 10, 1913.

Hon. John W. Weeks.

Washington, D. C.

Dear Sir: Your favor of the 7th received. If the amendment providing a tax of one-tenth of a cent per pound on sales of cotton futures is adopted it will tend to drive away business from our cotton exchange to the European exchange, and in this way damage the southern farmer.

The present handling of the cotton from the South is very unsatisfactory to the consumer, and if this amendment is adopted will create

another hardship, in as much as we shall have to pay the tax in the price of cotton.

We now have to pay for all cotton shipped from the South on sight draft from date of shipment, they assuming no risks whatever from that time.

It averages from four to five weeks for the cotton to arrive, and if, as is often the case, it should be damaged in transit, we have to make claim on the carrier, and in many instances it takes months to effect a settlement. settlement.

settlement.

Then, again, the cotton is baled in such a manner that we are obliged to make claims aggregating 20 per cent annually for short weights, mixed packs, etc.

Our experience with the Egyptian cotton is exactly the opposite, there being almost no claims for this cotton,

We inclose a cutting from The Journal of Commerce, which to us seems a fair argument against the proposed amendment.

Thanking you for your interest and trusting that the within information may be of some help to you when the matter comes up for debate, we remain,

Yours, very truly,

Jos. H. Allen, Treasurer.

#### A TAX ON " COTTON FUTURES."

The ease with which "fool" proposals find favor among Congressmen from certain parts of the country is simply amazing. More than once the House of Representatives has passed a bill imposing what is intended to be a prohibitive tax upon contracts of sale for the future delivery of cotton where no delivery is made or necessarily intended. A similar bill has received large support in the Senate, and it is not certain that that body is not now crazy enough to pass it. The Democratic majority of its Finance Committee observed the last Sabbath by thrusting such a provision into the tariff bill as an expeditious and effective method of "putting it through."

We can hardly conceive of its being kept there when the bill is reported, but really it is getting to be doubtful how far lunacy may go in this Congress. Surely it can not stay to be enacted. It is proposed that all contracts for the future delivery of cotton shall be in writing, and that a stamp tax of one-tenth of a cent a pound be imposed. So far as delivery was actually made the tax would be refunded. All such sales of cotton are treated as "speculative transactions," and the effect would be to suppress them, so far as exchange operations are concerned, for these could not be successfully carried on under such tax.

All who have an intelligent idea of these "speculative transactions," which consist of selling for future delivery as a means of hedging against changes in price, know that the question of actual delivery can not be determined beforehand, and that in a large majority of cases there will be a settlement of differences without delivery. It all depends upon the course of prices as the law of supply and demand operates during the months when they are undergoing adjustment.

The intelligent person also knows that these transactions help constantly to determine legitimate prices, to minimize fluctuations, and to establish as staple a level as it is practicable to secure. They furnish trustworthy market quotations, which are of more value to the producer

COOPER & BRUSH, Boston, Mass., July 3, 1913.

COOPER & BRUSH,
Boston, Mass., July 3, 1913.

Hon. J. W. Weeks.

United States Senate, Washington, D. C.

Dear Sir: I am in receipt of your letter of the 1st instant acknowledging our wire protesting against the proposed tariff bill providing a tax of one-tenth of a cent a pound on cotton futures.

I am aware that apparently the tendency of the legislators generally is to condemn all large businesses, including such exchanges as the cotton exchange, and I am also aware that excessive speculation in cotton has been a very harmful factor to the business interests of the country.

However, I am very strongly of the opinion that the proposers of the tariff tax are not familiar with the legitimate use of cotton futures in the run of ordinary business. My firm has been for a number of years located in Boston, with branch offices in Fall River, Providence, and Montreal, and we cover pretty well the New England States in selling cotton to various mills in this territory. We have no speculative clients and no speculative interest in the market. As the bill now reads, if I understand it correctly, the tax as proposed provides for a payment of \$50 per contract in addition to the usual commission, such tax of \$50 to be affixed in stamps upon the contract note of sale, and provides in cases where cotton is actually delivered upon the contract that the amount is refunded.

In the use of futures for buying or selling, the legitimate dealer practically never contemplates ever receiving the contract bought or delivering the contract sold, for the reason that a contract, say, in the New York Exchange calls for 50,000 pounds of merchantable cotton of any grade recognized by the exchange; that is, grades running from good, ordinary white to fair, middling stain, and stained low middling tinge, excluding stained cotton below middling in grade and tinged cotton below low middling to cotton of cotton and would not care to or could not

excluding stained cotton below mindning in grade and tinged cotton below low middling.

It is needless to say that a spinner in buying must have for his work certain specific qualities of cotton and would not care to or could not use a contract covering as wide a range in grade as the New York contract allows. The New York contract is to a certain extent a merchant's contract for a given number of pounds, irrespective of grade. This is practically what an ordinary buyer South would be compelled to do; that is, buy all grades and qualities of cotton, irrespective of whether he had an outlet for them or not, in order to secure such qualities as he might have an outlet for. His low-grade stains and tinges at times would be unmerchantable, and if he could not sell them to spinners he might sell a contract against them and deliver to the New York, New Orleans, Memphis, or any such market as was available. If, on the other hand, after selling his contract in New York he found he could sell the cotton to better advantage to a spinner, or parts of it by giving different qualities to different spinners, there would certainly not be any profit in delivering against contracts cotton which he could sell to better advantage to a spinner, consequently he would buy in his contracts previously sold, and instead of delivering the cotton would ship it to whatever spinners he was able to sell it.

It seems presumptuous of me to attempt to explain this matter to a committee who supposedly know something about it, but I find a large

portion of the business community is not familiar with the ordinary methods of dealing in futures.

The legitimate dealers, South or North, may frequently have an order from a spinner who wished to sell some goods and consequently fix the price of his cotton. The dealer may not have in hand any of the quality the spinner wishes to buy, but by the purchase of contracts in New York would be warranted in selling a mill, provided he could get a price which in his judgment would enable him to buy the particular quality the spinner wanted when it is available and then sell the futures previously bought. In the meanwhile he would have ample protection in case of an advance in the market. In case of the reverse, if he was buying cotton daily against which for the time being, owing to the high price of cotton, poor trade conditions, or possibly the fact that the spinner could not afford to pay the price for cotton at which it was then selling in relation to what he could secure for goods, he would sell future contracts against it. In case of a sharp decline he would again be amply protected by the sale of his futures.

It was only a few years ago, before Mr. Hayne, of New Orleans, started his bull campaign, that the world was thoroughly convinced that cotton would not in the life of the present generation ever sell at 11 cents or over except on some temporary short crop, and there is no question in my mind but what the South obtained millions of dollars for their crops which they would not have done had it not been for speculation; that is, the world's demands would never have put cotton up where it has been the last few years. In the big crop last year without the balance wheel of the exchanges cotton, in my opinion, would have sold a great deal lower. Speculation, of course, has been a bane to the spinner and is to legitimate trade. On the other hand, the planter has certainly won by it. As far as the planter is concerned, anything that tends to broaden the market for a great commodity must in the long run be of advan

STEPHEN M. WELD & Co., Boston, July 3, 1913.

Hon, John W. Weeks, United States Senate, Washington, D. C.

Hon. John W. Weeks,

United States Senate, Washington, D. C.

My Dear Ma. Weeks: I have your letter of July 2, and while my letter to Senator Lodge, a copy of which I sent you, may be what you want I would like to add a few words more.

Personally, and looking at it from a selfish point of view, I hope this bill will pass. It will throw the cotton business of this country largely into a few hands, and if the Lord keeps me allve and well I mean to be one of those people into whose hands it comes. It will, though, wipe out a great many small cotton dealers; and I think it is contrary to the spirit of the times and contrary to the good of the people and the Nation that business of any kind should be in the hands of a few. I have long wondered whether the department stores were not, on the whole, an evil; whether there was not greater prosperity and greater happiness amongst the masses with a dozen people selling shoes than where one or two do, or any other articles besides shoes. The effect of this law is going to be that the big men will not do business on a profit of 10 or 20 cents a bale, which is all my firm gets now, where they have to run a big risk.

This whole thing is against the interest of the planter and against the interest of the community as a whole, and is reverting back to old-fashioned times, where business was largely a matter of speculation. As it is now, the cotton business is done on a smaller margin of profit, I think, than any other business in the world, largely because we can afford to do it because we can guarantee ourselves against losses by means of these futures.

If you will read my other letter, you will see that I say I buy in several places in the South every day all the cotton I can get. I sell in Europe and at home and in Canada all the cotton I can get. I sell in Europe and at home and in Canada all the cotton I can sell at a profit. At the end of each day we may have five or ten thousand bales more cotton than the we work than we have sold. This I at once sell against by selli

sale of futures.

I hope I have made this plain to you. If not, I should be very glad to write more fully. If this bill passes, I do not see why the New York and the New Orleans Cotton Exchanges will not pass out of existence. The Liverpool Cotton Exchange will still keep on and do the business of the world and at a greatly increased profit, and Bremen and Havre also, where they have future exchanges, will share in this. Germany has always legislated against cotton futures, and now they have had to give way and establish a future market in Bremen. It is sickening to have to fight for you life all the time as we have to in the cotton business when we are doing what is right and doing what is best for the country and the farmer and all concerned.

Yours, very truly.

P. S.—On all these future transactions as hedges for cotton we should have to pay this tax because we do not mean to actually deliver or receive the cotton. This would make the business absolutely pro-

BOSTON, MASS., July 1, 1913.

Senator John W. Weeks, Washington, D. C.

Proposed tax upon cotton futures means that cotton mills will have to pay 50 cents a bale more for a large portion of their raw product.

Contracts for shipments to mills during certain future periods necessitate purchase of future contracts as hedges, and conservative operations necessitate the use of the future market by manufacturers to hedge their surplus stock of raw material. The proposed tax will be a burden on the spinner and but a slight handicap to speculation.

INGERSCLL AMORY & CO.

John W. Weeks, Esq.,

United States Senate, Washington, D. C.

Dear Sir: We thank you for your letter of July I.

When a cotton mill selis goods for future delivery, which is the way the bulk of their goods is sold, the mill protects itself by buying future-delivery cotton from a cotton merchant, and the merchant, in turn, protects himself by buying cotton futures in one of the future markets. It would be impossible for the merchant to buy actual cotton and hold it until the time of delivery, as the carrying charges would be prohibitive. Also a large part of the year it would be impossible to procure the character of cotton required by the mill.

When the time comes for the merchant to ship the cotton to the mill, he buys in the actual cotton and sells out his futures, which he had used as a hedge against the sale to the mill.

If the future markets of this country were abolished, which this proposed law would mean, the cotton merchants would use the Liverpool and Bremen Cotton Exchanges, unless the law prevented this, which seems improbable. In this way a great deal of business would be taken away from this country and given to Bremen and Liverpool. If the law did prevent the cotton merchants of this country protecting their sales by buying futures in Liverpool and Bremen, it would mean that only the very strongest houses would be able to take the risk of selling future-delivery cotton to the mills. This would mean a concentration of the cotton business in the hands of a very few.

We also think that the bankers of this country would be very loath to loan money upon cotton that was not hedged. This also would have a tendency of turning over the cotton business to a few very rich houses.

Yours, very truly,

Yours, very truly,

INGERSOLL AMORY & Co.

Mr. SIMMONS. Mr. President, I now ask that section 3 may

be passed over.

I ask that we may now return to the paragraphs that have been passed over at the request of first one and then another Senator. I do not mean, of course, to include in that request the paragraphs that have been recommitted to the committee. but only those that have been passed over, beginning with Schedule A.

I believe the first paragraph passed over was paragraph 14. The Secretary. On page 4, paragraph 14 was passed over at

the instance of the Senator from Utah [Mr. Smoot].

Mr. SMOOT. Mr. President, I notice that in the pending bill caffein carries a rate of duty of \$1 per pound. In the present law it falls under the basket clause, at 25 per cent ad valorem. The Treasury reports show that the value of cassein runs from \$1.82 to \$3.12 a pound. I think \$3 is about the

quoted value to-day.

Mr. JOHNSON. Mr. President, if the Senator will pardon me, I think the figures are incorrect as given in the handbook. At the hearings before the Ways and Means Committee the Treasury Department submitted a statement showing that no

caffein had been imported at less than \$3 a pound.

Mr. SMOOT. Mr. President, I made the statement that the reports of the Treasury Department showed that the valuations of caffein run from \$1.82 to \$3.12. I think the Senator will not dispute that statement. I myself believe that caffein is worth more than \$1.82 a pound, and I stated that the price to-day was

a little above \$3 a pound.

I suppose the reason the increase has been made is that in the same paragraph we find that "impure tea, tea waste, tea siftings or sweepings, for manufacturing purposes in bond, pursuant to the provisions of the act of May 16, 1908," are dutiable at 1 cent per pound. Under the present law impure tea, tea waste and tea siftings come in free of duty. I do not know why the change has been made. Most of the tea siftings, tea waste, and impure tea used in this country is consumed by the Monsanto Chemical Works, of St. Louis, Mo. I take it for granted. however, that the answer as to the reason for imposing upon these articles the duty of 1 cent a pound will be "For revenue purposes."

I remember when Senator Cockrell first became interested in a bill permitting impure tea, tea waste, and tea siftings to come into this country free of duty. I take it that the bill was introduced in the House. I remember that the Senator from Misthought it was proper, and I think so still. It is impossible to produce those articles in this country. They never will be produced in this country, and they are imported for the purpose of

the manufacture of caffein.

In this bill the rate upon caffein has been increased and a duty of 1 cent per pound imposed upon impure tea, tea waste, and tea siftings. I am not going to take notice of the reports I have heard in relation to the immense amount of tea siftings the Monsant Chemical Works have on hand and will be benefited by the imposition of 1 cent duty. They may need all the advantages possible after the passage of this bill. I should like to encourage the company in every possible way.

During the last few days I have taken a little interest in looking up the particular items that this firm makes. I have also taken pains to learn the prices of some of those articles when we had to depend entirely upon Germany for them and the prices since they have been made in this country. After the passage of the present law the St. Louis firm began the manufacture of a great many chemical preparations and medicinal compounds that never were made before in this country. As to one or two of the products of that concern, the German manufacturer tried to drive them out of business by reducing the price below cost of manufacture. If it were necessary, I could name the great reductions to the American people that have been brought about by this one firm undertaking the manufacture of articles as to which in the past the German manufacturer had absolute control of this market.

I feel that it is an injustice to impose a duty upon impure tea, tea waste, and tea siftings, and I wish to ask the Senator having this part of the bill in charge if this is not one of the cases that should be reconsidered and no duty imposed.

In this connection I desire to say that I shall again refer to this firm when we reach paragraph 19, but I shall be glad if the Senator will now give the Senate his opinion in regard to this matter.

Mr. JOHNSON. Mr. President, the committee have fully considered the paragraph referred to and have made a further We find that the duty upon caffein, which is 25 investigation. per cent, has been increased to about 33 per cent by this specific duty of \$1 per pound. The price at which caffein is imported is about \$3 a pound, and the duty of \$1 per pound is therefore about 33 per cent.

In view of this increase upon the product of caffein a slight duty upon tea waste, which is the raw material used in making caffein, can be easily borne and will afford a revenue of some \$60,000 a year. The committee are of the opinion that no change should be made in the paragraph, but that it should stand as reported.

Mr. SMOOT. Mr. President, if the Senators having the bill in charge and the Democratic caucus have seen fit to impose a duty upon this article and do not mean to change it, I shall not make any further protest; but I do believe it is a mistake. It is the policy of this bill to impose duties upon articles not produced in this country that enter into manufactures. I shall content myself with simply protesting against it.

The Secretary. In paragraph 14, line 11, after the word "pound," the committee proposes to insert "compounds of caffein, 25 per cent ad valorem," so as to make the paragraph

14. Caffein, \$1 per pound; compounds of caffein, 25 per cent ad valorem; impure tea, tea waste, tea siftings or sweepings, for manufacturing purposes in bond, pursuant to the provisions of the act of May 16, 1908, 1 cent per pound.

The amendment was agreed to.

The Secretary. The next paragraph passed over is at the foot of page 5, where the committee proposes to strike out paragraph 19 as printed in the bill and to insert a new paragraph, as follows:

19. Chloral bydrate, salol, phenolphthalein, urea, terpin hydrate, acetanillid, acetphenetidin, antipyrine, glycerophosphoric acid and salts and compounds thereof, acetylsalicylic acid, aspirin, guiacol carbonate, and thymol, 25 per cent ad valorem.

Mr. SMOOT. That paragraph went over at my request. Most of the items in the paragraph under the present law carry a duty of 55 cents per pound under paragraph 65 of the present There are, however, two of the items that fall within the 25 per cent ad valorem duty under paragraph 65.

I simply wish to call attention to the fact that there is not a manufacturer in this country who under a rate of duty of 25 per cent produces chloral hydrate. The Senator having this bill in charge must know that. The price of chloral hydrate to the American people has been reduced over 50 per cent since it was first manufactured in St. Louis under the present rate of 55 cents per pound. Now a duty is imposed of 25 per cent ad valorem. I am as confident as that I am living that the Mon-santo Chemical Works, of St. Louis, can not make chloral hydrate in this country under that rate. The result will be that just as soon as they change from the manufacture of this article to some other in this bill, if they can find one, the price of chloral hydrate will advance.

I had a rather strange experience some years ago in relation to medicinal compounds and the purchase price of them in foreign countries.

Mr. HUGHES. Mr. President, getting back to the statement the Senator made, if it is the Senator's opinion that the lack of competition in this country is going to make the price return to its former level, why is it that this commodity is selling so

cheaply in England at present? Why does not Germany take charge of that market, as she is about to take charge of ours?

Mr. SMOOT. She does take charge of the market in Canada and in a good many other countries on a great many items.

Mr. HUGHES. I am speaking of free-trade markets-the English price.

Mr. SMOOT. The English price to-day is controlled by the

Mr. HUGHES. Why is it that they sell it so much lower than it can be sold in this country?

Mr. SMOOT. Because they can make it cheaper.

Mr. HUGHES. Why is it that the English price is 20 cents a pound when the product is made in Germany and controlled by a German trust and is sold here for a considerable advance over that-55 per cent?

Mr. SMOOT. But chloral hydrate is not sold in England to-day for 20 cents a pound.

Mr. HUGHES. That is my information.

Mr. SMOOT. The information which the Senator has, then, must be the price on a lower grade of chloral hydrate than is manufactured here or in Germany.

Mr. HUGHES. No. I will state to the Senator that he will find that condition to exist in a great many cases. The gentleman to whom the Senator is referring, Mr. Queeny, of St. Louis, admitted before our committee that there was that difference in the price for which it was sold in this country and the price for which it was sold in Germany, and that in Engiand, where there was no tax to pay, the article was sold at the price I have stated.

Mr. SMOOT. I have not before me the quotations from the largest drug house in the world, having a branch in England and also in New York, but I say to the Senator that the quotations given are not 20 cents a pound in either England, Germany, or any other country. This is the way Germany does in many cases where she controls this market. The German manufacturers control one particular acid I have in mind, and a company undertook to manufacture it in this country. it successful? No; because as soon as the company was successful in manufacturing it the price was cut in two and then cut to a price that closed the factory. As soon as it ceased the making of the acid the price was advanced. In many cases the German manufacturer sells medicinal preparations to Canada at a lower price than they sell to American buyers. I have a sample case before me, and I find upon the face of the label these words: "The resale and exportation of this article to the United States of America is prohibited." In other words, they will not even allow Canada or any other country to which they sell to reexport it into this country. For what reason? Because they control this market absolutely, and instead of selling this article in this country for 10 cents per ounce, the same as they do in Canada, they charge every purchaser in this country 43 cents an ounce for it.

Why on earth the Senate of the United States wants to pass a law lowering the duty on items for which Germany is making this country pay sometimes three or four hundred per cent more than any other country pays I can not understand. I am positive that if medicinal compounds carried a rate of duty of 35 or 40 per cent instead of 15 per cent, as this bill provides, there would be many articles that would be manufactured in this country, and the American people would buy such articles more cheaply.

Mr. NORRIS. I should like to ask the Senator from Utah in regard to these products. What he has said has interested me greatly. At what price were they sold when they were manufactured in the United States?

Mr. SMOOT. Every article in the paragraph, of course, is

quite different in price.

Mr. NORRIS. The particular one? Mr. NORRIS. The particular one? Mr. SMOOT. The one I referred to?

Mr. NORRIS. Yes.

Mr. SMOOT. At the time it was first undertaken to be manufactured in this country it was sold for \$1 an ounce.

Mr. NORRIS. At what price later on at the time Canada took our market?

Mr. SMOOT. Before they had destroyed the manufacture of the article in this country they had reduced the price to about 20 cents an ounce. That price closed our manufactories. Today they are charging 43 cents an ounce to every purchaser in the United States, and the excess of 33 cents per ounce on 2,000,000 ounces used in the United States amounts to \$660,000 on this one particular item.

Mr. NORRIS. What are they selling it for in Canada? Mr. SMOOT. The retail price?
Mr. NORRIS. Yes.

Mr. SMOOT. I do not know what the retail price is.

Mr. NORRIS. Was it not the American retail price the Sena-

tor just gave?

No; I am speaking of the difference between Mr. SMOOT. the wholesale price. They pay 10 cents an ounce. Germany sells it for 10 cents an ounce to Canada, and they sell it to the American merchants for 43 cents an ounce. There are used every year in the United States 2.000,000 ounces, and the difference of 33 cents an ounce between the German manufacturing charge and what Canada charges the people of this country amounts to \$660,000.

Mr. NORRIS. Is there a tariff on it in Canada?

Mr. SMOOT. A small tariff.
Mr. NORRIS. Can the Senator explain why it is that they make that great variation between our market and the Cana-

dian market?

Mr. SMOOT. No; I can not explain it, unless there is some That happens very greement between the manufacturers. often in medicinal compounds. I once had a list furnished me by one of the great manufacturing concerns in this country of all the items upon which there was such an agreement. Another experience I had was when we held hearings upon a bill to amend our patent laws and this same question came up. It is simply a disgrace that we do not in some way or other force the foreign manufacturer from continuing such outrageous discrimination against American commerce.

Mr. NORRIS. Let me ask the Senator further if the price we pay now in this country is not less than when we made it

ourselves

Mr. SMOOT. That is true only in part. I will say that it is lower than it was when we undertook to manufacture it.

Mr. NORRIS. What were the indications in regard to the chance of our being able to supply our own market and reduce the price when we were engaged in its manufacture?

Mr. SMOOT. I do not think there is any question that if

the American manufacturer had been given time-

Mr. NORRIS. How long were they engaged in this attempt? Mr. SMOOT. A number of years, but just as soon as the production became sufficient to anywhere near take care of the American market, then the German manufacturers made up their mind to crush it out of business, and they did it.

Mr. NORRIS. What is the raw material out of which it is

made?

Mr. SMOOT. I do not really know. It is only one of many cases, I will say to the Senator.

The VICE PRESIDENT. The question is on agreeing to the

amendment of the committee.

The amendment was agreed to.

The next amendment passed over is on The SECRETARY. page 8, paragraph 31. It was passed over at the instance of the senior Senator from Connecticut [Mr. Brandere]. The committee proposes to strike out paragraph 31 as printed in the bill and to insert a new paragraph, as follows:

31. Extracts and decoctions of nutgalls, Persian berries, sumac, logwood, and other dyewoods and all extracts of vegetable origin suitable for dyeing, coloring, or staining, not specially provided for in this section; all the foregoing not containing alcohol and not medicinal, three-eighths of 1 cent per pound.

Mr. BRANDEGEE. Mr. President, a radical change of course it is apparent has been made by the committee in this para-The paragraph stands reclassified and a large portion of it transferred to the free list, as will appear on page 152, para-

graph 626 of the bill.

This involves one of the leading industries of my State. There is a large factory located at Stamford, Conn., making one of these tanning extracts known as quebracho. I wish to read from the brief filed before the committee by a committee of manufacturers of these tanning extracts:

manufacturers of these tanning extracts used in the United States is that made from chestnut wood and quebracho wood. These extracts are manufactured in Virginia, West Virginia, North Carolina, Tennessee, Pennsylvania, New York, and Connecticut. The chestnut wood used grows in Pennsylvania, Virginia, West Virginia, North Carolina, and Tennessee, and the quebracho wood is imported from the Republics of Argentina and Paraguay.

As already stated, a sample of the quebracho wood and of the bark has been submitted. This wood holds the same position as dyewoods, according to paragraphs 20 and 559 of the present law, and the same statement made for dyewood applies to quebracho wood.

We would add that after a quebracho tree has been cut down and allowed to lie on the ground, which is always the case, it becomes necessary to remove the bark; otherwise the sap contained in this bark breeds a large quantity of worms which immediately attack the wood and injures its value for extract purposes.

The first mention of quebracho distinct from other tanning extracts.

The first mention of quebracho distinct from other tanning extracts, was made in the law of 1897. At that time only one grade was shipped into this country, as regards density or gravity, and that grade was a liquid article in barrels standing at about 28° Baumé and containing about 35 per cent of tannic acid, and the law of 1897 placed upon this grade one-half of 1 cent per pound.

Tanning extracts are sold by the pound, the price per pound based upon the percentage of tannic acid or tannin, as it is termed, contained in a pound; therefore according to the strength or the weakness of the percentage of tan is fixed the price per pound on the market.

Some time after 1897, and prior to 1909, great improvements were made in machinery and apparatus for the reducing of liquid extracts to solid extracts without injury to the article so reduced. Extracts from woods are very susceptible and can easily be ruined by excessive heat, nothing more so than tannic acid, and these new methods and improvements enabled the manufacturer of the liquid to reduce these extracts further; or, in other words, to take the liquid which was at 28° Baumé, representing one-half quebracho extract and one-half water, and containing 35 per cent of tannic acid, to a heavier density by driving off the half amount of water and producing what is known as solid extract.

By driving off this water, they of course made 1 pound of extract

off the half amount of water and producing what is known as solid extract.

By driving off this water, they of course made 1 pound of extract represent more quebracho and less water, the result showing that this solid article contained about 12 to 15 per cent of water only and 65 per cent of tannic acid. This decrease of water and increase percentage of tannic acid immediately increased the value per pound. Therefore in 1909 the manufacturers of this extract in the United States asked that an adjustment or equalization be made to meet these new conditions, and that the duty of one-half of 1 cent per pound on the liquid quebracho remain as in the law 1897, by adding the words "under 28" Baumé"—which is the universal standard in this country and all European countries to distinguish the difference between liquid and solid extracts—and that the solid extract, or that above 28° Baumé, be placed at seven-eighths of 1 cent per pound, which would equal the one-half cent per pound on the liquid, as the solid was 65 per cent tannic acid instead of 35 per cent, as in the liquid.

The Congress at that time, in 1909, saw fit to make the rate of duty on the solid three-fourths of a cent per pound, as per paragraph 21—

I think it means 29—

#### I think it means 22-

tannic acid instead of 35 per cent, as in the liquid.

The Congress at that time, in 1999, saw fit to make the rate of duty on the solid three-fourths of a cent per pound, as per paragraph 21—

I think it means 22—
in present law, instead of seven-eighths of a cent, which was asked for, which was a slight reduction, as it made the duty, based on the percentage of fannic acid—viz, 65 per cent—less than the old duty of one-half cent on the liquid—viz, 55 per cent—less than the old duty of one-half cent on the liquid—viz, 55 per cent—as in 1897. The foreign manufacturer, in addition to this decrease in duty on solid, gained a contract of the contrac

ing a profit of over £429,000 sterling. They also declared for 1911 dividends, the same as previous year, 1910, viz, 14 per cent on their preferred stock and 24 per cent on their ordinary or common stock.

Next to the Argentine the largest manufacturing interest of this extract is found in Germany, and was started some years ago in Hamburg by Mr. Herman Renner. This gentleman, as already shown, is a director in the Forestal Land, Timber & Railways Co., and we now quote from a Hamburg paper of October 28, 1912, as follows:

"Gerb und Farbstoffwerke H. Renner & Cle A. G. Hamburg.

"The principal object of the extraordinary stockholders' meeting held on October 28 was the proposition to accept an amalgamation of interests with the Forestal Land, Timber & Railways Co. (Ltd.), London. The presiding officer, Herr Geh. Kommerzieurat, Dr. Ing. Carl Delius opened the meeting with the statement that the executive committee felt sure that the amalgamation of interests would be beneficial to the shareholders. The principal points of the contract were as follows:

"We conclude on January 1, 1913, an amalgamation of interest with the Forestal Land, Timber & Railways Co. (Ltd.)"

I should think they ought to call it unlimited—

I should think they ought to call it unlimited-

I should think they ought to call it unlimited—

"by handling over our total profit, including the dividends, received from our ownership of Forestal shares and other participations in connection with the Forestal Co.

"The Renner Co. continues its present and absolutely independent organization; we in return are to receive a payment, which shall be governed by the dividend paid on the common and preferred shares of the Forestal. Calculating the dividend of 19 per cent, paid for the past two years on the fully paid-in capital, said payment would amount to 1,940,000 marks a year.

"Every reduction of 1 per cent would be equal to a decrease of 100,000 marks; every addition of 1 per cent would represent an increase of 80,000 marks; every addition of 1 per cent would represent an increase of 80,000 marks; but in no case shall the payment of the Forestal Co. exceed two and one-half millions yearly.

"We to receive 10 per cent of all special reserves, but said amounts shall be deducted whenever said reserves later on are paid out in the shape of dividends.

"We bind ourselves not to seil any of our 'participations' without the consent of the Forestal. Tais condition does not include the 11,669 preferred Forestal and 9,624 common shares, procured last year, with which we can act as we please.

"Any profit we may make by a sale of these shares does not belong to the Forestal Co., but to our stockholders; we have also reserved to ourselves the ownership of a special reserve fund of 600,000 marks set aside to be used for the purpose of a supplement to our dividends in special instances.

"This agreement has been made for a period of 10 years and can be mutually canceled by giving notice six months in advance—earliest per January 1, 1920, by the payment of £30,000 as a compensation."

In other words, a penalty for going out of the trust.

In other words, a penalty for going out of the trust.

"The compensation of a cancellation for 1921-

You can see how far these gentlemen are looking ahead-

You can see how far these gentlemen are looking ahead—
"is reduced to £25,000, and for 1922 to £20,000.

"The legal settlement of disputes shall be subject to the decision of the English anditors Deloitte, Plender, Griffiths & Co., and the Revision Treuhand A. G. Berlin.

"As a public indication of the amalgamation of interests, we propose the supplementary election of Mr. C. Hartneck, one of the directors of the Forestal Co., as a member of our executive committee.

"We, ourselves, are represented on the board of the Forestal Co. by our president, Herr Kommerzieurat and Herman Renner."

The stockholders accepted the agreement unanimously by acclamation; in the same way Mr. Hartneck was elected a member of the executive committee.

our president, Herr Kommerzieurat and Herman Renner."

The stockholders accepted the agreement unanimously by acclamation; in the same way Mr. Hartneck was elected a member of the executive committee.

In reply to the question of a stockholder, whether the possibility exists to receive for the current year a considerably higher dividend the presiding officer stated that, taking as a basis the result of the past nine months, it is believed that at least the same dividend as the one paid last year will be distributed.

But at the last moment be could not say whether a larger dividend could be paid, because it was impossible to foretell the result of the remaining three months, and, further, nobody could tell whether some complication in reference to the political situation may arise.

In regard to the future prospect of the Forestal Co., the president, Mr. Renner, stated that the present year was of less interest for said company than the years 1913 and 1914.

The outlook for the year 1913 could be called extraordinarily favorable, because there have been made such large sales of extract, that it is believed that the average dividend of 19 per ceut—paid for some years past—is safe. In the future also we may count upon receiving the same good dividends regularly.

In reply to a further question, the speaker gave the additional information that the stockholders' meeting of the Forestal Co. was taking place on October 28 at 3.30 p.m. in London, and in that way all formalities in reference to the amalgamation of interest were settled on the same day.

Again we quote from the Financial Times, of London, under date of September 25, 1912.

"The Financial Times, referring to the reported amalgamation of the Santa Fe Land Co, with the Forestal Land, Timber & Railways Co, remarks that this will enable them, if the project is realized, to keep up the present price of quebracho, the working of which is the principal object of the two companies."

"The sit seems that the control of this business is pretty well in the hands of

Please note that the price went to 2½ cents per pound in 1908, as stated by Mr. Klipstein, prior to their purchase of £130,000 of the Fusionados Co., a very natural result of prices below the cost of

stated by Mr. Kilpstein, prior to their purchase of £130,000 of the fusionados Co., a very natural result of prices below the cost of manufacture.

Mr. Kilpstein in 1909 furthermore stated before the Ways and Means Committee in a brief that the price used to be 4½ to 5 cents per pound and generally imported in the form of a liquid extract.

Bear in mind, if you please, that Mr. Kilpstein in this statement is referring back prior to the time of their making solid extract and before they realized the growth of the American competition, and this competition when realized caused a reduction from 4½ or 5 cents for liquid at 35 per cent tan to 4 cents for solid at 65 per cent tanworth in the market almost double the price of the liquid—or, in other words, they were selling liquid without the American competition at a price equal to 9.8 cents per pound for the solid that they are selling to-day for 4 cents per pound. Why should not prices advance again without competition?

If the Forestal Co., or their representatives in this country, undertake to claim that they are being frozen out and that the present rates of duty are so great they can not compete, then we would refer you to their statements already made in their reports to their stockholders at their annual meetings held in London, and their continuing to pay 24 per cent on their ordinary stock and 14 per cent on their preferred stock.

Such dividends have not been and can not be earned by the American manufacturers.

stock.

Such dividends have not been and can not be earned by the American manufacturers. A reduction in the present duty would tend to bring about one of two results; either the closing out by the American manufacturers at great loss or the temptation to get together advance prices and control the market.

We also have received a copy of the Daily Mail, of Paris, under date of November 14, 1912, with an advertisement of the Forestal Land, Timber & Railways Co., stating that the capitalization is £1,700,000, setting forth their great earning power, etc., and offering to sell £1,000,000 of 5 per cent first-mortgage bonds.

That imports have not been checked by the present tariff, we submit the following table:

Fiscal year ending June	Tons of wood received in the United States per Department Commerce and Labor. ¹	Represents in solid extract, pounds.1	Pounds o ! solid extract imported into United States, per Department Commerce and Labor.	Represents total tons wood used for same.	Per cept ex- cess.3
1906. 1907. 1908. 1909. 1910. 1911. 1912.	87, 838 67, 310 48, 871 66, 113 80, 210 64, 708 68, 174	49, 189, 280 37, 693, 600 27, 367, 760 37, 023, 280 44, 917, 600 36, 238, 720 38, 177, 400	43,989,707 76,479,846 62,593,671 99,108,284 90,483,576 77,606,700 74,239,715	78,553 126,572 111,774 176,979 161,578 138,584 132,571	102. 8 128. 7 167. 7 101. 4 114. 2 94. 4

1 Tons of wood received and amount of extract same represents each Government

fiscal year.

**Tons of solid extract imported into the United States and the tons of wood same represents each Government fiscal year.

Of extract imported and wood used for same above that used for manufacture in the United States.

Please note that in 1906 the United States manufacturers did a little more business in pounds of extract than did the importers. The Forestal Trust at that time, as already shown, was not fully in the saddle, but later the imports were considerably over 100 per cent, and in 1908-9 it was the largest, probably due to the low price of 2½ cents mentioned by Mr. Klipstein.

The year 1912 shows about double the quantity of extract imported as compared with the quantity manufactured in this country, but a decrease of about 20 per cent from the imports of 1911. This decrease can not be attributed to the increase of the home manufacture, as they only show about 5 per cent increase between the same years, which was 10 per cent less than they showed in 1910.

The present tariff can not be called excessive; otherwise the imports would not exceed the home manufacture by 100 per cent and maintain this position year after year.

We understand that the desideratum of tariff adjustment is to establish a rate that will produce the greatest revenue combined with greatest encouragement for both home and foreign competition; therefore as a tariff for revenue and competition the present rate should be retained.

	Total money received by present rates.1	Total money received at a rate of § cent per pound.2	Loss.1

Mr. GALLINGER. Mr. President— Mr. BRANDEGEE. I yield to the Senator from New Hamp-

Mr. GALLINGER. I regret that it was not my privilege to hear all of this interesting recital. From what I have heard I infer that this refers to a foreign trust.

Mr. BRANDEGEE. There is no doubt about that. Mr. GALLINGER. And it is not exciting the interest or antagonism of our Democratic friends, who are so strenuously opposed to American trusts?

Mr. BRANDEGEE. I have been requested not to read it. do not know what inference the Senator may draw from that. It continues:

It continues:

If the tanners of this country understood the actual conditions they would be more anxious than the extract manufacturers to have the duty on these extracts maintained.

We have seen of late articles in the leather-trade papers advocating reductions in the tariff, all written by importers or representatives of foreign manufacturers (or their employees)—the usual method they have adopted for years prior to tariff hearings.

On the 30th day of August last [1912] the Stamford Manufacturing Co. wrote to their agent in Buenos Aires, putting to him a few questions, wishing to have an answer in time to place before your committee, which we now submit:

Q. No. 1. What is the wage per day or month of the ordinary laborer at a quebracho factory in the Argentine?—A. The wage of the ordinary laborer in the Chaco is about \$20 per month.

Note.—In this country the ordinary laborer receives \$1.75 per day, about 127½ per cent higher.

Q. No. 2. What are the wages per day or month of a more intelligent man, such as bosses, etc.?—A. The wages of a more intelligent man, such as a foreman, is about \$40 per month, or perhaps \$50.

Note.—The wage of such men in this country is from \$2.75 to \$3 per day, or about 56 per cent higher.

Q. No. 3. What are the wages per day or month of still higher class of mechanics or engineers who have to be imported to that country?—A. About \$80 a month.

Note.—In this country from \$4 to \$4.50 a day, about 46 per cent higher.

Certain other questions as to cost, freights, etc., he states depends

Note.—In this country from \$4 to \$4.50 a day, about 46 per cent higher.

Certain other questions as to cost, freights, etc., he states depends upon distance, freight, etc., making the cost of the solid extract on board vessel ready for shipment to the United States at from \$59 to \$62 gold per thousand kilos.

Note.—This represents 2.6 to 2.7 cents per pound. To this must be added the freight from the Argentine and the present duty to give the cost price here.

Assuming an equal division of the various grades of labor (although the ordinary labor of \$1.75 per day would be the largest), the average shows 76 per cent higher in this country than in the Argentine Republic. The difference in wages, taking the cost of the extract in this country and as shown to be in the Argentine, estimated on the average higher wage of 76 per cent, shows about nine-tenths of 1 cent per pound.

Chestnut extracts are largely used in connection with quebracho

pound.

Chestnat extracts are largely used in connection with quebracho extracts, a combination of the two extracts used quite extensively by the tanners.

Chestnat extracts are made abroad and could easily become a part of the business of quebracho manufacturers, a natural result of a reduction in the present tariff. Such a result would be injurious to the American chestnut manufacturers, probably causing many of them to quit business, thus throwing on the market many plants at low prices, the purchase of which might result in the absolute control of the two most important and largely used extracts by the tanners in the United States.

The attached pamphlet is submitted as part of this brief, it being a compilation of the tariff hearings in 1909 and since, and which we believe in this form will be of aid to your honorable committee.

Mr. President, the industry in my State employs in this or existence, and this entire business will be turned over to the consolidated British-German trust; there can be no doubt about that. I wanted to make this protest for what it may be worth, and to call to the attention of the Senate certain patriotic words that were uttered here when this tariff provision was framed in the manner in which it now stands in the existing law. In 1909, when this clause was under consideration, the then distinguished Senator from Virginia, Mr. Daniel, one of the most eminent men the Democratic Party has ever sent to the Senate, said:

Mr. President, in the view which I shall advocate the proposition of the pending act—that is, seven-eighths of 1 cent per pound—is a correct, scientific, and useful rate of duty for the tariff on the solid tanning extract known as "quebracho."

And he gave four reasons for the duty proposed. He said:

And he gave four reasons for the duty proposed. He said:

It is not for an increase of the tariff that I am asking. It is for an equalization of tariff or its approximate. If the proposition as the Payne committee had it is effected, there will be a reduction of the Dingley tariff by 6½ per cent and the better service, as I think, of all American interests involved.

In the second place, instead of destroying or mutilating our American industries, those who are making chestnut-oak extracts will preserve a competitive relation between foreign and domestic manufacturers, a situation evidently in the interest of the people and greatly commended by political economists.

In the next place, Mr. President, I think it will preserve the existing revenue from foreign importations and in likelihood increase it, for the need of the quebracho extract is growing daily, and at a reasonable rate, which does not prohibit it, I think. It is sure to find a constantly enlarging market in this country.

And, in the next place, which can not be an indifferent consideration, it will steady and assure the employment of many American

laborers, instead of scattering them away from broken-down American establishments.

It will give to the American manufacturers what they have not now on account of the Dingley Act—a fighting chance. Such, it is believed, will be the result of the proposed amendment of the law.

I think that the question of labor is extravagantly stated in some cases, but neither the Democratic Party nor the Republican Party have ever been indifferent to it. I feel careless of the criticism made upon me that I said in a recent address we must respect labor and put the difference in labor cost in favor of our American laborers. It has been so long that not only the platform declaration of the Democratic Party, but also those advocated by its leaders, with whose utterances I am familiar, that I think it useless and trite to pause to defend it. But I will insert here the Democratic platform of 1888, and refer to the utterances of President Cleveland in his messages. The Democratic platform of 1888 says: "Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation. On the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, most promote and encourage every branch of such industries and enterprises by giving them assurance of an extended market and steady and continued operations. In the interests of American labor, which should in no event be neglected, the revision of our tax laws contemplated by the Democratic Party should promote the advantage of such labor by cheapening the cost of necessaries of life in the home of every workingman and at the same time securing to him steady and remunerative employment. Upon this question of tariff reform, so closely concerning every phase of our national life, and upon every question involved in the problem of good government, the Democratic Party submits its principles and professions to the intelligent suffrages of

And he proceeds to state:

The American manufacturers of extract are in the old colonial States of New York, Connecticut, Virginia, North Carolina, and Pennsylvania, and also Tennessee and West Virginia.

He gives the location of the 23 tanning-extract factories in the United States. He says:

Labor required at full capacity, over 7,000 men.

The proposed reduction is not a sweeping or a destructive reduction, but one that will conserve every American interest and leave full play to the competitive forces, both foreign and American, without assuring final success to either.

He discusses the doctrines and principles of competitive tariffs, and says:

iffs, and says:

Whenever there is a fair fight between an American and a foreigner for the control of American things, not involving oppressive or monopolistic charges on the people, I stand with the American.

It is only when American enthusiasts overstep the line which seems to me that of wisdom and fair play that I would seek to restrain them by abating excesses, so that the disproportionate burdens may be removed from our fellow-Americans.

The experience of history, from generation to generation, has denoted that if we allow the reins of control to slip from our hands and pass to those of allens, they will immediately increase the cost of whatever we get from them.

In the course I am pursuing I have Thomas Jefferson as one of the sponsors for it, and it is sound Democracy of an old and well-attested brand.

sponsors for it, and it is sound Democracy of an old and well-attested brand.

Jefferson advocated a metallic circulation that will take its proper level with the like circulation in other countries, and then he says:

"Our manufacturers may work in fair competition with those of other countries, and the import duties which the Government may lay for the purpose of revenue will so far place them above equal competition."

In another place he states:

In another place he states:

This means greater destruction to many American industries which manufacture tanning extracts and puts the foreign quebracho rival in possession of our markets.

It is my hope that both this amendment and the committee amendments will be voted down, and that the proposition of the Payne bill of seven-eighths of 1 per cent per pound on the foreign extracts will be confirmed and become the law.

Having thus stated this case in its simple legal relation, we have those who ask a much higher tariff or a somewhat higher tariff, and we have the foreign competitors, who have already succeeded in their form of manufacturing in getting the tariff reduced half and now deliberately ask that that half be again halved, with intimations that they desire its abolition. But a medium course was pursued.

And he proceeds:

Not only is it the fact, Mr. President, that the American tanning-extract makers arose to their position without the domination of an American trust, but within the menace and manifested purpose of an inchoate, if not completed, foreign trust. We have it in the advertisements and in the papers of those who are trying to get the American tariff obliterated or so decreased as to leave scarce any chance for the American manufacturer that they formed a trust in 1907, which was broken down by the hard times which flooded the whole country.

He says:

I stand in all things on the side of the American.

He states:

Mr. President, I am confronted here with a case that is broadly American in all of its aspects. It is not sectional; it is peculiar in the fact that my own State of Virgina has more of these chestnut-extract establishments than any other State; but they have gone along

so quietly in their business that they have never been challenged by anybody as doing anying lilegal to advance it. They are not associated with any trust that I have ever heard intimated, and they have grown up under the laws which you created, not making them the favorites of Congress, but giving them, as matters stood, a living chance. But for that leak in the Dingley law—I do not blame them, its authors, for it, or the foreigners; but it was on account of the miscarriage of a moderate tariff that this leak occurred and that this question arises. Otherwise they would have been all right and been able to maintain their competition.

In another place he states:

I wish to avoid in every way we can collisions and just grounds of complaint from other nations; but we know their wary methods; we know the great capital they have behind them; we know the studious, scientific industry of scholarship which they apply to them; and under these conditions, with strifes ahead of us, I should be slow to crush out any sort of well-doing and honest American industry which was not backed by an oppressive tariff.

He says:

So, Mr. President, without going further at this time, I submit these propositions: First, that seven-eighths of a cent per pound is a reasonable and, in large measure, an habitual tariff on extracts; second, that it is necessary to equalize the difference between the solid and the liquid extract by putting on that tariff; third, that it is desirable to do so to give a fair fighting chance for success to 23 American establishments which are now organized, with capital invested, and labor at hand, and which must inevitably diminish and wither if this equalization is not made.

Mr. President, the Senator from Virginia is no longer with us, but he spoke like a true American when he uttered those words. I now come to the remarks made at the same time, on May 1909, by the distinguished chairman of the Committee on

Finance [Mr. SIMMONS]. He says:

The duty proposed is a pure revenue duty, because the quebracho tree does not grow in this country, and no quebracho extract is manufactured here except from a few logs imported from the Argentine Republic. So that every cent that is collected under this duty will be revenue and go into the Treasury.

Mr. President, it is manifest—and I do not think the committee will disagree with me about this—that there ought to be a differential between the liquid extract of quebracho and the solid extract.

He proceeds:

Mr. President, there is no one asking that the duty upon quebracho be reduced or removed except the tanners of leather. They are demanding not only free quebracho but free hides, while they resist any reduction in the duty on their product.

I submit that the cattle raiser is entitled to as much consideration as the maker of leather, and I submit that the 23 manufacturers of chest-nut extract—6 of which are located in North Carolina and 9 in Virginia—are also entitled to equal consideration, and if there is any way by which we can save this industry from demolition by this foreign trust I believe it is our duty to do it.

On page 2211 the Senator from North Carolina [Mr. Sim-MONS] says:

I should like to ask who is asking for the reduction of the duty on this article. Is anybody doing it except the leather manufacturers?

And he states:

They want free hides and free quebracho and everything else free, but they do not want anything taken off of their products.

Mr. President, there are just two manufacturers of quebracho in this country. It is stated that one of them has recently transferred his establishment to Argentina because it is an economic folly to attempt to build up the business of manufacturing quebracho extract here. For many years these two institutions struggled along trying to do it. They imported the wood from Argentina.

The Senator from North Carolina [Mr. Simmons], upon the roll call, announced that if his colleague were here he would vote to maintain this duty, and then upon the roll call he voted to maintain it himself.

He states:

He states:

Now, we have quite a number of tanners in my State, and nearly every one of them, through a representative, has been here to see me and try to get me to agree to vote for free hides. The largest one came the other day. When I told him that I would not vote for free hides under any circumstances unless leather and shoes were also put on the free list, he said: "We tanners do not care about the duty on leather. If we can get free hides it will be perfectly satisfactory." I said, "Go and put that in writing, sign it, and send it to me." He said he would do it. In about two or three hours after that I got a letter from him inclosing a very lengthy argument in favor of putting hides on the free list and retaining the duty on leather, and not saying a word about the conversation he had had with me.

Mr. President, that represents a typical feature of these propagandas. Everybody wants to get his raw material free and keep up the duty on what he makes. I do not think a tariff bill can be framed upon that theory which will suit the American people.

The other Senator from Virginia [Mr. MARTIN] states (p. 2215):

I respectfully submit to the Senate that, independent of any question of protection, independent of any question of free trade, and independent of any party question, the duty as fixed by the committee should not be lowered.

And he voted to maintain the duty upon this article. The then Senator from Virginia, Mr. Daniel, says, again:

I beg leave to call the attention of the Senator from Massachusetts and my colleague to the fact, which has not been mentioned, but which appears conspicuously all through these papers and hearings; that is

to say, the tanners, in their petitions here, have been actuated by the foreign quebracho-extract men to appeal to Congress to do what the quebracho men want. It was not upon the initiative of the tanners, but they are being used by other people respecting a collateral tariff.

Mr. President, that is the situation here. It has always seemed to me that the protective policy was a wise policy to be pursued in this country, but it has also always seemed to me that it must be a policy, and not a series of sporadic events and favoritisms and discriminations. I heartily agree with what was stated by the distinguished Senators from Virginia and North Carolina at the time this debate was going on-that it is in the highest degree inconsistent for one party, in the enjoyment of a protective tariff upon its products, to come here and try to get the affected product of another party put on the free list so that he may have his raw material cheaper, and still play the dog in the manger by keeping his manufactured product protected.

I move that the provision of the law of 1909 which is shown on page 54 of the Tariff Handbook, which is long, and which I will not read at length, known as paragraph 22 of the law of 1909, be substituted for the provision of the pending bill.

The matter referred to is as follows:

Extracts and decoctions of logwood and other dyewoods, and extracts of bark such as are commonly used for dyeing or tanning, not specially provided for in this section, seven-eighths of 1 cent per pound; extract of nutgalls, aqueous, one-fourth of 1 cent per pound and 10 per cent ad valorem; extract of Persian berries, 20 per cent ad valorem; chlorophyll, 20 per cent ad valorem; extracts of quebracho, not exceeding in density 28° Baumé, one-half of 1 cent per pound; exceeding in density 28° Baumé, three-fourths of 1 cent per pound; extracts of hemlock bark, one-half of 1 cent per pound; extracts of sumae and of woods other than dyewoods, not specially provided for in this section, five-eighths of 1 cent per pound; all extracts of vegetable origin suitable for dyeing, coloring, staining, or tanning, not containing alcohol and not-medicinal, and not specially provided for in this section, 15 per cent ad valorem.

Mr. JOHNSON. Mr. President, I wish to call the attention of the Senate, although it is hardly necessary to do so, to the changed conditions now from those of 1909, when the tariff bill which is the present law was under consideration, and to which the Senator from Connecticut has alluded.

Under the pending kill boots and shoes are placed upon the free list. So is leather placed upon the free list, while under the present law it bears a duty of from 15 to 30 per cent. Because of that fact the materials used in tanning leather have

been placed upon the free list.

Extract of quebracho is used most extensively of all the tanning extracts in the tanning of leather, and it seemed but fair and just that if leathers were to be placed upon the free list, the extract used by the tanners for tanning the leather should also be placed upon the free list. That is the reason why in this bill it is placed upon the free list.

I might add that the manufacturers in this country have been handicapped by the fact that they have been compelled to import the quebracho into this country in logs, and then after chipping to make the extract, so that the consumer has been compelled to pay the freight upon the waste material contained in the logs when they are imported, not only in the way of vegetable fiber, but in the way of water. That has seemed an unnecessary burden.

The VICE PRESIDENT. The question is upon the amendment proposed by the Senator from Connecticut [Mr. Brande-

GEET.

The amendment was rejected.
The VICE PRESIDENT, The question now is upon the amendment proposed by the committee.

The amendment was agreed to.

The SECRETARY. The next amendment passed over is, on page 14, paragraph 52, passed over at the instance of the Senator from Utah [Mr. SMOOT].

Mr. SMOOT. I believe paragraph 33 was passed over at the request of the junior Senator from North Dakota [Mr. GRONNA]. That refers to formaldehyde solution. I may be mistaken, but I have my copy marked "passed over" as to paragraph 33.

Mr. JOHNSON. I think that was not passed over, but was passed upon when the bill was read.

Mr. SMOOT. I may be wrong.

The VICE PRESIDENT. The Secretary has no record of it. The Secretary. Paragraph 52 reads as follows:

52. Baryta, sulphate of, or barytes, including barytes earth, unmanufactured, 15 per cent ad valorem; manufactured, 20 per cent ad valorem; blanc-fixe, br artificial sulphate of barytes, and satin white, or artificial sulphate of lime, 20 per cent ad valorem.

Mr. LIPPITT. Mr. President, I wish to ask the Senators in charge of this part of the bill if they have taken under consideration the proposed duty on blanc-fixe. I had rather hoped they would give that some consideration and think of either restoring the duty under the present law or at least

approximating it.

Mr. President, the subcommittee having it Mr. JOHNSON. in charge have taken under consideration the matter to which the Senator refers and see no reason to make any change in the bill as reported. It is true that witherite is imported into the country, from which a superior quality of blanc-fixe is manufactured; but we are informed that that sells at a very high price and that blanc-fixe can be produced in this country without being made from witherite as a by-product in the manufacture of peroxide of hydrogen and other barium compounds. When produced in that way the high rate of duty which has been carried heretofore is not at all necessary.

Mr. LIPPITT, I should like to say to the Senator that of course it is true that dioxygen, which is an antiseptic and is made in large quantities, produces as a by-product blanc fixe; but that quality of blanc fixe is not adapted to the limited uses to which witherite blanc fixe is adapted. Blanc fixe is an article which is used by paper manufacturers in whitening paper. The lower grade of it leaves spots and is not suitable for the very

high grade of paper for which the other is used.

The situation in regard to that particular article is rather peculiar. It is a very limited manufacture. Only about \$200. 000 worth is used in the country, of which practically one-half is imported and one-half is made by three small manufactories, the total product being something under \$100,000, and most of it is made in Rhode Island. It is one of those little things which are of great importance to those engaged in it, and from a revenue standpoint it has this peculiarity. The duty at present is about 40 per cent. About \$100,000 worth is imported. The duty proposed is 20 per cent, and the manufacturers say that 20 per cent will prevent them from continuing the manufacture of it at all. So by cutting the duty in half you will get exactly the same revenue that you get to-day, but it will all be imported instead of half of it being made here.

All the manufacture of the article abroad is controlled by about three parties, principally in England, and there will be no possible reason why they should at all reduce the price of it from the prices fixed to-day by domestic competition here. The effect of cutting the duty in half, as I have studied this question out, and I think it is correct, will simply be to produce exactly the same revenue, probably, that you do to-day, not changing the price of the article of the consumer in this country at all. but simply to eliminate the two or three American manufac-

turers of it.

Under those circumstances I was rather in hopes that the committee would give that such serious consideration that they would decide, if not to leave the duty as it is, to perhaps make the duty 30 per cent instead of 20 per cent. It is certainly not an important matter. From a revenue standpoint it can have no effect, and the argument in favor of helping our domestic people, inasmuch as by so doing there is no probability that the consumers will be charged any more than they will if the duty is reduced, seemed to present a rather strong case to me.

I did not know whether the committee, if they were firm in

their resolution to make some change, would accept an amend-

ment of 30 per cent instead of 20 per cent.

Mr. JOHNSON. We have thoroughly considered the matter. We have taken the added fact into consideration that on the high-priced surfaced paper and the manufacture of blanc fixe the duties have been largely reduced. For that reason we felt that this reduction was one that ought to be made in view of the fact that it can be so easily and cheaply made in this country without being made from the witherite, which brings such a

high price, according to my information.

Mr. LIPPITT. This article I am talking about merely because it happens to have the same name, blanc fixe, and the inferior quality is not going to be put out of consumption. It is still going to be used for the particular purpose it is used for now, the lower quality, and is not going to be used for the particular purpose the higher quality is used for. It is simply a question whether the proportion of that inferior quality shall be made in this country or be imported. If it is imported there is no reasonable presumption that there will be any change in the price unless it is increased under the operation of the present law of domestic competition and under which domestic competition the price has been reduced from something like \$58 to \$38 a ton. Under the proposition where the control is left entirely in the hands of the foreigner we might as well put it at 45 per cent or 50 per cent as leave it as it is. Certainly there is no reason to suppose that they would reduce the price.

Mr. OLIVER. Mr. President—

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Pennsylvania?

Mr. LIPPITT. I yield to the Senator.

Mr. OLIVER. I think the Senator from Rhode Island is attaching rather undue importance to this particular item because it is something that is used in paper manufacture, since under the legislation that is now proposed the seat of paper manufacture will inevitably ultimately be transferred to Canada. I do not think there is any necessity of considering a small article like this which is used in that manufacture.

Mr. LIPPITT. I think my constituents would rather take the chance of having some of the paper industry at least left here, even if the situation described by the Senator from Pennsylvania should eventuate. I was rather in hopes that the committee would take that matter under consideration or, at

least, leave the duty perhaps at 30 per cent.

Mr. LIPPITT. I move, in paragraph 52, page 14, line 10, before the words "per cent," to strike out "20" and insert "30." The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Rhode Island.

The amendment was rejected.

The Secretary. The next paragraph passed over is, on page 15, paragraphs 57 and 58, relating to lead pigments and lead, acetate of.

Mr. SMOOT. I asked that those paragraphs be passed over until the Senate had passed upon the question of lead. That has already been done. Therefore I have not anything to say in relation to these two paragraphs.

The VICE PRESIDENT. If there be no amendment, the paragraphs will be agreed to as in Committee of the Whole. The Secretary. On page 17, paragraph 67—soaps—was passed

Mr. JOHNSON. I ask that that be passed over for the present.

The VICE PRESIDENT. The paragraph again goes over by agreement.

The Secretary. On page 19, paragraph 74, "Roman, Portland, and other hydraulic cement, 5 per cent ad valorem," was passed over.

The committee proposed to strike out this paragraph.

Mr. SMOOT. I asked that the paragraph go over with the understanding that I would submit to the chairman of the subcommittee having in charge this schedule an amendment to take care of white nonstaining Portland cement.

Mr. THOMAS. I will say to the Senator that when we reach paragraph 76 I shall offer an amendment inserting that com-

modity.

Mr. SMOOT. Paragraph 76 was not passed over. If the Senator will do that, then I will say no more.

Mr. THOMAS. I will offer the amendment for the committee.

Mr. LA FOLLETTE. Will the Senator yield to me for a

Mr. THOMAS. Certainly.

Mr. LA FOLLETTE. Mr. President, out of order somewhat, should like to call the attention of the chairman of the subcommittee having charge of Schedule A to a suggestion which I wish to make, first, with reference to a rearrangement of the paragraphs of that schedule. I make this suggestion for the consideration of the subcommittee. I am not going to follow it with any motion, but will be content to leave it to the committee to accept it if it commends itself to them, and otherwise to reject it. The paragraphs of Schedule A on drugs and chemicals, soap, perfumery, paints, and pigments are all jumbled together in utter disregard of their relation to one an-I think a very great improvement can be made in that schedule by rearranging it in groups somewhat as follows:

First, bring together in consecutive order all of the paragraphs relating to chemicals and drugs. This will embrace paragraphs 1 to 4, inclusive; paragraphs 7 to 16, inclusive; paragraphs 19 to 24, inclusive; paragraphs 26 to 44, inclusive; and paragraphs 48, 51, 65, 66, 68, 70, and 71.

Then follow that with the paragraphs constituting the basket provisions for chemicals and drugs, embracing paragraphs 5. 17, and 18.

Second, follow this with all of the paragraphs relating to oils. These paragraphs are 45, 46, and 47.

Third, assemble the paragraphs relating to perfumery, soap, and so forth. These paragraphs are 47, 50, and 67.

Fourth, form a final group covering paints, pigments, and varnishes by bringing together paragraphs 25 and 52 to 64,

I make the further suggestion for the consideration of the subcommittee that paragraph 69, which covers sporges, should be transferred to Schedule N, to follow paragraph 392. It is out of place in the chemical schedule.

While I am on my feet, if I may be indulged for just a moment more by the subcommittee in charge of the next schedule, I wish to suggest that duties upon at least two articles in the chemical schedule are excessive and should be reduced. One of them is the duty on dextrine made from potato starch. examination of all the data which bears upon the question of the cost of production or competitive tariff, call it what you please, will show very conclusively that a duty of 11 cents per pound is all that is required. I offer that as a suggestion for the subcommittee. Judging from the fate of other efforts to amend the bill ', motion, I think I will not propose it as an

Then, Mr. President, I wish to call attention to one other duty

which I think is grossly excessive.

Mr. JOHNSON. In view of what the Senator from Wisconsin said in regard to the duty on not all the dextrine but on the dextrine made from potato starch, the committee will accept

Mr. LA FOLLETTE. It is dextrine made from potato starch to which I refer. Perhaps I neglected to specify it as definitely

Now I call attention to one other duty which I think should

Mr. SIMMONS. I suggest to the chairman of the subcommittee that he accept the amendment and that we act upon it

Mr. LA FOLLETTE. Very well. The VICE PRESIDENT. What paragraph is that?

Mr. LA FOLLETTE. It is paragraph 37-dextrine made of potato starch.

Mr. JOHNSON. On page 10, line 3, I move to amend. The VICE PRESIDENT. There will have to be a motion made to reconsider the vote by which the an endment was agreed to as in Committee of the Whole.

Mr. LA FOLLETTE. If in order, I will move to reconsider the amendment made as in Committee of the Whole, or I will

defer to the chairman to make the motion.

Mr. JOHNSON. As the Senator sees fit; it is immaterial.
The VICE PRESIDENT. It is moved to reconsider the vote whereby the committee amendment to paragraph 37 was agreed

The motion to reconsider was agreed to.

The VICE PRESIDENT. The amendment of the Senator from Wisconsin will be stated.

The Secretary. In line 3, before the word "cents," strike out "1\frac{1}{2}" and insert "1\frac{1}{4}."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. LA FOLLETTE. I now direct the attention of the subcommittee to paragraph 65, and in that paragraph particularly to chlorate of potash made dutiable at a cent a pound. I feel warranted in saying that a quarter of a cent a pound on chlorate of potash is not only a very liberal competitive duty, but it is a protective duty. There are just three factories in the United States producing that article. They do not sell in competition with each other. Their product is all sold by the Rikers, of 46 Cedar Street, New York. The cost of producing chlorate of potash in this country is 3\frac{3}{4} cents per pound. The cost of producing it on the Continent is 3.6 cents per pound, and the cost of producing it in Norway and Sweden is 3.5 cents per pound. sells abroad for from 5 to 5½ cents a pound and in this country for 9½ cents a pound. The combination in this country has entered into an agreement with the producers of chlorate of potash abroad, by the terms of which it is not to be sold to the Government of the United States.

The Rikers people, who control the price in this country, control one of the powder companies which was a defendant with the Du Pont Powder Co. in the case which the Government

brought against the Powder Trust.

I think perhaps the suggestion of the Senator from Utah that it be put on the free list might be worth while, but there is a difference of a quarter of a cent a pound in the cost of manufacturing this article between this and the competing countries abroad, and the rate of a quarter of a cent would cover that difference. The rate should certainly be no more than a quarter of a cent per pound.

Mr. O'GORMAN. Mr. President, may I ask the Senator from Wisconsin his authority-and I assume he has authority-for the statement that the corporations engaged in this enterprise have entered into an agreement not to sell this product to the

United States Governmen?

Mr. LA FOLLETTE. My authority is the testimony given before the Ways and Means Committee of the House of Representatives, and not denied.

Mr. O'GORMAN. That being conceded-

Mr. LA FOLLETTE. And the witness who gave that testimony was the president of an independent powder company that is competing with the Du Pont Powder Co. He is the president of a powder company located at Peoria, Ill., and

his testimony before the committee was not denied.

Mr. O'GORMAN. That being the conceded fact, I join in the suggestion of the Senator from Wisconsin that this article ought to go on the free list, because I think a corporation or an individual entering into an arrangement little short of a conspiracy to prevent the United States from procuring a particular article is surely entitled to very little consideration when it comes to the adjustment of tariff rates.

Mr. LA FOLLETTE. And when you take into account the fact that that particular article is an important constituent of

explosives

Mr. JOHNSON. Mr. President, if the Senator will pardon me moment.

Mr. LA FOLLETTE. Certainly.
Mr. JOHNSON. I will make the motion, in view of what the
Senator has said, to reconsider the vote by which this duty was

fixed and ask that the paragraph be recommitted.

The VICE PRESIDENT. The Chair will state that there is no amendment in the paragraph, but the committee has the right to have it recommitted with a view of considering it further.

Mr. JOHNSON. I ask that the paragraph be recommitted to the committee

The VICE PRESIDENT. Without objection, paragraph 65, on page 16, will be recommitted to the Committee on Finance.

Mr. LA FOLLETTE. Mr. President, I am going to venture to make one more suggestion, and will make it very briefly, because the Senate has already considered the matter and I do not anticipate that I can say anything that will cause the Senate to change its attitude on that question; but I want to suggest to the subcommittee in charge of this schedule that the duty on peanut oil be changed from 6 cents a gallon to 1 cent a gallon. That duty will be a competitive duty, while 6 cents gallon will prove a prohibitory duty and will subject the committee and the Senate to criticism for prohibiting its import in order to protect a competing product produced exclusively in one section of the country.

Mr. SMOOT. Mr. President, I also suggest to the Senator having the bill in charge that it seems to me palm nuts and palm kernels ought to be upon the free list; you have put palm-kernel oil on the free list. I merely offer that as a sug-

gestion for the consideration of the committee.

Mr. STONE. I wish to say that we have already gone over this bill very carefully, and any Senator who had any objection to any paragraph in it had only to say that he desired it passed over or to make any representations he pleased with regard to it. I have no objection to having these paragraphs passed over again, except that, if we pass them over, then go back to the beginning of the bill, start in afresh, and Senators get up and say they want something else passed over, we never will get through with the bill.

Mr. SMOOT. I did not ask that any paragraph or any item be passed over. I simply suggested that, so long as palm-kernel oil is made free, it seemed to me that the nuts from which it is made should be free.

The VICE PRESIDENT. The question is on agreeing to the committee amendment to strike out paragraph 74, on page 19.

The amendment was agreed to.

The VICE PRESIDENT. The Senator from Colorado [Mr. THOMAS] has offered an amendment, which will now be stated.

The Secretary. In paragraph 76, page 19, line 8, after the word "use," it is proposed to insert the words "white non-staining Portland cement."

The amendment was agreed to.

The VICE PRESIDENT. The next amendment passed over will be stated.

The Secretary. Paragraph 78, on the same page, was passed over at the instance of the Senator from Kentucky [Mr. Brad-LEY] and the Senator from Wisconsin [Mr. LA FOLLETTE]. It relates to clays or earths, and was read on July 26.

Mr. LA FOLLETTE. Mr. President, my reason for asking to have that paragraph passed over was to make the suggestion to the subcommittee to put china clay or knolin on the free list instead of imposing upon it a duty of \$1.25 per ton. I will either submit to the Senate now some observations upon the subject, or, if it is agreeable to the chairman of the subcommittee, will present the matter to the subcommittee at its convenience.

Mr. STONE. Mr. President, I will say to the Senator from Wisconsin that if he cares to submit some notes to us we will be very glad to consider them; but I do not know for what purpose the Senator asked that this paragraph be passed over.

Mr. LA FOLLETTE. I asked to have it passed over, because I believed that china clay and kaolin should go upon the free list instead of being made dutiable at \$1.25 a ton.

Mr. STONE. I understand now for what purpose the Senator asked to have the paragraph passed over, but I did not know that at the time he asked to have it passed over and hence we have not had the benefit of the suggestions which he I am sorry cares to make.

Mr. LA FOLLETTE. I would have submitted them at the time, I will say to the Senator, had I concluded the investigation which I was then making. I have since completed it and

feel that I

Mr. STONE. If the Senator cares to submit the result of his investigation to the committee, we will be very glad to receive it. Mr. LA FOLLETTE. I shall be very glad to save time by doing that instead of making a motion and submitting the matter here in the Senate.

Mr. STONE. That is satisfactory to the committee.

Mr. LA FOLLETTE. I will say, Mr. President, that such a course will shorten the proceedings in the Senate this afternoon, because it was upon my request that a number of the paragraphs of this schedule were passed over, and it would be quite as satisfactory to me to discuss the several paragraphs with the subcommittee if they would be willing to listen to them, instead of taking up the time of the Senate to make them here for the RECORD.

Mr. STONE. The committee will be glad to listen to the suggestions, as I have said to the Senator. I repeat what I said a moment ago in regard to the unfortunate attitude in which the committee is placed if we do not dispose of the passed-over

paragraphs as we come to them.
Mr. LA FOLLETTE. Well—

Mr. STONE. Just a moment, if the Senator will pardon me. I will say that the committee will be glad to examine with every proper care any data which the Senator from Wisconsin may care to submit; but if it should so happen that the committee does not agree with the Senator from Wisconsin and if that were to lead to the same debate-

Mr. LA FOLLETTE. Not at all. I make the suggestion that I will withdraw now the request as to these paragraphs. I will present what I have to offer to the subcommittee, if agreeable to them, and if we do not agree as to the changes that should be made I can later submit anything that I have to say regarding these paragraphs when the bill is reported to the Senate.

Mr. STONE. That will be agreeable. Mr. SIMMONS. Would it suit the Senator to let the paragraph be adopted now, with the understanding that after the subcommittee and the committee have examined his data, if they change their minds about it they will bring in an amendment?
Mr. LA FOLLETTE. That is entirely satisfactory to me.

The Secretary. Paragraph 78, page 19, is one such paragraph; also paragraph 80, page 20; paragraph 81, on pages 20 and 21; and paragraph 82, on page 21.

Mr. THOMAS. Mr. President, paragraphs 81 and 82 were

passed over at the instance of the Senator from Washington [Mr. Poindexter]. We have made no change, and will probably recommend none; but I think it is due the Senator to say that he was in conference on Saturday with one of the experts from the customhouse and was to have heard from him to-day, but the letter came to myself instead of to him. I have not had an opportunity to hand it to him yet, and I dislike to take up these paragraphs and consider them in his absence; so we are perforce asking to have them go over. Paragraph 80 must also have been connected with his request, which, I think, included paragraphs 80, 81, and 82. I think that is correct.

Mr. SIMMONS. Mr. President, I suggest that we pursue the same course with reference to those paragraphs—that they be acted upon now, with the understanding that when the Senator from Washington comes in if he desires to offer an amendment

he may do so.

The Secretary. The committee amendment in paragraph 80 has already been agreed to. There is no amendment to paragraph 81. In paragraph 82 the committee amendment is graph 81. In paragraph 82 the committee amendment is unacted upon. It is in paragraph 82, on page 21, line 15. After the word "China" it is proposed to strike out "and"; in the same line, after the word "porcelain," to insert "and other"; and in line 16, after the word "body," to strike out "having a vitrified or semivitrified" and insert "which when broken shows a vitrified or vitreous, or semivitrified or semivitreous," so as to make the paragraph read:

82. China, porcelain, and other wares composed of a vitrified non-absorbent body which when broken shows a vitrified or vitreous, or

semivitrified or semivitreous fracture, and all bisque and parlan wares, including clock cases with or without movements, plaques, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins, lamps, and all other articles composed wholly or in chief value of such ware, if plain white, or plain brown, not painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner; and manufactures in chief value of such ware not specially provided for in this section, 50 per cent ad valorem; if painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner and manufactures in chief value of such ware not specially provided for in this section, 55 per cent ad valorem.

The amendment was agreed to.

The Secretary. Paragraph 83 was passed over. The committee amendment in that paragraph has already been agreed to. Mr. BRANDEGEE. Mr. President, I understand paragraphs

81 and 82 have both been passed over.

Mr. SIMMONS. No; paragraphs 81 and 82 were agreed to, with the understanding that if the Senator from Washington [Mr. POINDEXTER], when he returns, wishes to offer any amendments to them, he may do so.

Mr. BRANDEGEE. I thought what was being agreed to was

the committee amendment in those paragraphs, to which I have no objection, and I have no objection to this tentative action upon them, if I may have permission to submit an amendment at the same time the Senator from Washington does.

Mr. SIMMONS. The Senator has that right according to the rules under which we are operating.

Mr. BRANDEGEE. I did not know when that right expired; I did not know how many times we could go back.

The Secretary. Paragraph 84, on page 22, was passed over. with the committee amendments agreed to.

Paragraph 86, on page 23, was passed over at the instance of the Senator from Pennsylvania [Mr. OLIVER] and the Senator

from Wisconsin [Mr. LA FOLLETTE].

Mr. OLIVER. Mr. President, I have submitted an amendment to that paragraph which does not in any way change the rates of duty or the real meaning, but is only intended to perfect the paragraph. I understood the Senator from Missouri and the Senator from Colorado at the time the amendment was proposed, said that the committee would consider the propriety of adopting my amendment. I ask them if the amendment has been considered? The first part of my amendment is on page 23, line 25, after the word "glassware," to insert the words "goblets and other glass stem ware"; so as to be certain that it comprises those articles which otherwise might be considered doubtful. The second part of my amendment is to strike out the words "chief value," and insert the word "part." The most important of the three, however, is that on "part." The most important of the three, however, is that on page 23, line 25, after the word "blown," to insert a comma,

Mr. STONE. Mr. President, in order to abbreviate the proceedings, if satisfactory to the Senator, I will state that the

committee is willing to accept the amendment.

Mr. OLIVER. I send the amendment to the Secretary's

Mr. THOMAS. Did the Senator have more than one amendment?

Mr. OLIVER. There are three parts to the amendment. I

Mr. OLIVER. There are three parts to the amendment. I ask the Secretary to read it.

The Secretary. In paragraph 86, page 23, line 25, after the word "glassware," it is proposed to insert "goblets and other glass stem ware"; in the same line, after the word "in," to strike out "chief value" and insert "part"; and at the end of the same line, after the word "blown," to insert "cast or pressed," so as to read.

Glassware, goblets, and other glass stem ware, composed wholly or in part of glass blown, cast, or pressed.

The VICE PRESIDENT. In the absence of objection, the amendment will be agreed to.

Mr. STONE. I do not know about that part of it striking out the words "chief value" and inserting the word "part." Would not the Senator be satisfied to insert the first part of the amend-

Mr. OLIVER. I do not think that is of great importance, and I would be satisfied to have the words "chief value" remain as they are.

Mr. STONE. Then the amendment agreed to is that which

comes after the word "glassware," in line 25.

The Secretary. After the word "glassware," in line 25, it is proposed to insert "goblets" and other glass stem ware.

Mr. STONE. That is, the committee will offer no objection

to that.

The amendment was agreed to.

The Secretary. After the word "blown," at the end of line 25, insert a comma and the words "cast or pressed."

Mr. STONE. I understand the Senator withdraws that?
Mr. OLIVER. No; I withdrew the amendment striking out
the words "chief value" and inserting the word "part." I will

not object to the words "chief value" remaining instead of the word "part." The words "cast or pressed" are, however, very important, because this kind of glassware is not blown at all. The process of manufacture

Mr. STONE. What is it the Senator wishes to withdraw?
Mr. OLIVER. The part to which the Senator from Missouri referred, inserting the word "part" instead of the words "chief value," allowing the words "chief value" to remain.
Mr. STONE. Very well. That is the entire amendment, is

it not?

Mr. THOMAS. Where do the words "cast or pressed" come in—after the word "blown" at the end of the line?
Mr. OLIVER. After the word "blown."
Mr. THOMAS. "Blown or cast?"

"Blown, cast, or pressed."

Mr. OLIVER. "Blown, cast, or pressed."
Mr. STONE. Mr. President, let that be submitted. The Senator withdraws the part of the amendment he has indi-

Mr. OLIVER. I withdraw the amendment striking out the words "chief value" and inserting the word "part."

Mr. STONE. That is withdrawn. To the remainder of the amendment the committee has no objection.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Pennsylvania as modified. The amendment was agreed to.

The Secretary. The next amendment passed over is on page

24, paragraph 87, at the instance of the Senator from Missouri [Mr. STONE]. Mr. THOMAS. The committee offers an amendment to the

Senate amendment in paragraph 87, which I send to the desk. The VICE PRESIDENT. The amendment will be stated.
The Secretary. The first amendment, striking out the

comma, has already been agreed to.

The second amendment is as follows:

In lines 8 and 9, page 24, the committee propose to strike out "not exceeding 150 square inches, seven-eighths of 1 cent per pound; above that, and."

Mr. STONE. With a semicolon.

The Secretary. The proposition now is to disagree to the amendment striking out those words.

The VICE PRESIDENT. The question is on agreeing to the

The amendment was rejected.

Mr. SIMMONS. Mr. President, I understand that the amendment simply restores the House language.

The VICE PRESIDENT. It restores the House language.

Mr. STONE. And the punctuation. Mr. SIMMONS. I ask the Chair to put the question again. The Chair held, as I understood, that the amendment was rejected.

The VICE PRESIDENT. In order to restore the House text, as the Chair understands, it is necessary to disagree to the Senate amendment.

The Chair is right.

Mr. SIMMONS. The Chair is right.
Mr. GALLINGER. And that is what happened.
The Secretary. There is one other amendment in the paragraph, in line 16, after the word "unpolished," to strike out the comma.

The amendment was agreed to.

The Secretary. The next amendment passed over is on page 25, paragraph 89, at the request of the Senator from Wisconsin [Mr. La Follette]; also paragraph 90, at the instance of the same Senator; also paragraph 91, at the instance of the Senator from Michigan [Mr. SMITH].

Mr. SMOOT. The Senator from Michigan [Mr. SMITH]

asked that this paragraph be passed over; but he is not in the city nor has he requested me to ask that it go over again. I

know, however, that he is quite deeply interested in these items.

The VICE PRESIDENT. May the Chair inquire, with the rules of the Senate as they are, and with the power and ability to amend the bill, where there is not a single amendment in the paragraph, why it should go over and over?

Mr. SMOOT. I did not ask that it should go over.
Mr. THOMAS. The committee offers an amendment to para-

graph 90, which I will send up to the desk.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. In paragraph 90, page 25, line 20, the committee proposes to substitute a colon for the period, and to add:

Provided, That any of the foregoing exceeding three-eighths of an inch in thickness shall pay a duty of 30 per cent ad valorem,

The amendment was agreed to.

The VICE PRESIDENT. Paragraph 91 will now be read.

draw any request of that sort, and would submit what I have to offer to the subcommittee.

The Secretary. Paragraph 99, beginning at the foot of page

27, was passed over-

Mr. SIMMONS. I understood that that paragraph had not been acted on. I understood that we were to act on it now, subject, of course, to the action of the committee when the Senator presents his views to the committee.

The VICE PRESIDENT. Paragraph 97 has been read here-

tofore. Paragraph 99 has not been read.

Mr. SIMMONS. Very well.
Mr. LA FOLLETTE. I do not ask to have action deferred at this time, because I can offer my amendment in the Senate if I should desire.

Mr. SIMMONS. I understood that, but I thought the para-

graph had not been read.

The Secretary. Paragraph 99 was passed over at the request of the Senator from Kansas [Mr. Bristow]. It reads as follows:

99. Marble, breccia, and onyx, in block, rough or squared only, 50 cents per cubic foot; marble, breccia, and onyx, sawed or dressed, over 2 inches in thickness, 75 cents per cubic foot; slabs or paving tiles of marble or onyx, containing not less than 4 superficial inches, if not more than 1 inch in thickness, 6 cents per superficial foot; if more than 1 inch and not more than 1½ inches in thickness, 8 cents per superficial foot; if more than 1½ inches and not more than 2 inches in thickness, 10 cents per superficial foot; if rubbed in whole or in part, 2 cents per superficial foot in addition; mosaic cubes of marble or onyx, not exceeding 2 cubic inches in size, if loose, 20 per cent ad valorem; if attached to paper or other material, 35 per cent ad valorem.

Mr. BRISTOW. Mr. President, I have not yet received the information I was expecting on that paragraph, and I will let it go. If the information comes in before we reach the consideration of the bill in the Senate, I will take it up and discuss it. I will not take up the time of the Senate now.

The Secretary. Paragraph 102, on page 29, was passed over at the request of the junior Senator from North Dakota [Mr. Gronna]. It reads as follows:

102. Grindstones, finished or unfinished, \$1.50 per ton.

Mr. LA FOLLETTE. Mr. President, the junior Senator from North Dakota is unavoidably detained from the Senate at this time. While he left no suggestion with me, and I do not know that he did with any other Senator, regarding his request as to this paragraph, I will take the responsibility-I think I may-of saying that if he has anything to offer on that paragraph he will offer it when it is reached in the Senate.

I think perhaps I ought to give notice now, if notice is required, of a reservation as to that paragraph in his behalf when

the bill goes into the Senate.

The Secretary. On page 30, paragraph 106 was passed over at the request of the Senator from Michigan [Mr. Townsend] and the Senator from Missouri [Mr. STONE]. The committee amendment has not been acted upon.

Mr. THOMAS. Just pass that. The Secretary. Paragraph 106 reads as follows:

106. Beams, girders, joists, angles, channels, car-truck channels, T T, columns and posts or parts or sections of columns and posts, deck and bulb beams, sashes, frames, and building forms, together with all other structural shapes of iron or steel, whether plain, punched, or fitted for use, or whether assembled or manufactured, 12 per cent ad

On line 8, after the word "manufactured" and the comma, the committee proposes to strike out "12" and to insert "10."

The amendment was agreed to.

Mr. THOMAS. Now, I ask to have that paragraph passed. The request was made before it was read.

The VICE PRESIDENT. The Chair does not understand the request of the Senator from Colorado.

Mr. THOMAS. The request is to have paragraph 106 passed for the present. The committee is not ready to report it out.

The VICE PRESIDENT. Does the Senator wish to have it passed over again?

Mr. THOMAS. If it has been passed once, pass it again; but understood that it had not been passed.

Mr. STONE. The committee is not ready to make a report on that paragraph, and we would like to have it passed.

The Secretary. On page 33, paragraph 116 was passed over at the request of the Senator from Missouri [Mr. Stone].

Mr. THOMAS. Just pass that. The committee is not ready to report.

Mr. WEEKS. Do I understand that paragraph 116 is to be considered again so that an amendment may be offered?

Mr. THOMAS. Oh, yes.

The VICE PRESIDENT. Paragraph 91 will now be read.

The Secretary read paragraph 91, on page 25.

Mr. LA FOLLETTE. I think I made it clear that as to the paragraphs passed over upon my suggestion I would with
Massachusetts [Mr. Lodge], and the junior Senator from Massachusetts [Mr. Lodge], and the junior Senator from Massachusetts [Mr. Lodge].

chusetts [Mr. Weeks]. The committee amendment has not been

The VICE PRESIDENT. The amendment will be stated.

The Secretary. In paragraph 126, page 37, line 3, after the word "importation," the committee proposes to strike out "40 per cent ad valorem" and insert "when manufactured with round iron or untempered round steel wire, 10 per cent ad valorem; when manufactured with tempered round steel wire, or with plated wire or other than round iron or steel wire, or with felt face, or wool face, or rubber face cloth containing wool, 30 per cent ad valorem," so as to make the paragraph

126. Card clothing not actually and permanently fitted to and attached to carding machines or to parts thereof at the time of importation, when manufactured with round iron or untempered round steel wire, 10 per cent ad valorem; when manufactured with tempered round steel wire, or with plated wire or other than round iron or steel wire, or with felt face, or wool face, or rubber face cloth containing wool, 30 per cent ad valorem.

Mr. BRANDEGEE. I should like to ask if paragraph 121, on page 36, was not passed over? I have it so marked.

The VICE PRESIDENT. The committee amendment was

agreed to.

Mr. BRANDEGEE. I remember that at the time I called the attention of the Senator from Colorado to a suggestion, at least, and he informed me that the committee would take it under consideration.

Mr. THOMAS. Yes; the committee reconsidered that paragraph, but it has no change to recommend. I refer to para-

graph 121.

Mr. WEEKS. Mr. President, in line 8, page 37, I move that the figures "40" be substituted for "30," so that it will read 40 per cent ad valorem."

The VICE PRESIDENT. The amendment to the amend-

ment will be stated.

The SECRETARY. In the committee amendment, on page 37, paragraph 126, line 8, it is proposed to strike out "30" and insert "40."

Mr. WEEKS. Mr. President, the rate which I propose is the House rate, which is a reduction of 331 per cent from the rate which is now prevailing, and which seems to be a competitive We are producing in this country about twice as much card clothing as we are importing, but there are large importations. In the year 1910 the importations were nearly as large as the production in the United States. The same thing is true of the rates of wages paid in this country in relation to the rates paid in others as in the case of other industries. They are substantially twice as large as the rates paid where card clothing is manufactured in other countries. There is no trust connected with the business, and from every standpoint it seems to me the industry is entitled to the rates agreed to in

I submit the matter on that statement.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Massachusetts to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on the amendment of the committee.

The amendment was agreed to.

The Secretary. The next amendment passed over is on page 40, paragraph 136.

Mr. THOMAS. The committee offers a substitute for paragraph 136, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. The committee proposes to strike out all of paragraph 136 and to insert in lieu thereof the following:

Table, kitchen, and hospital utensils or other similar hollow ware composed of iron or steel, enameled or glazed with vitreous glasses but not ornamented or decorated with lithographic or other printing; table, kitchen, and hospital utensils or other similar hollow ware composed wholly or in chief value of aluminum; all the foregoing not especially provided for in this section, 25 per cent ad valorem.

Mr. SMOOT. Mr. President, that removes the objection that

I had to the paragraph and is perfectly satisfactory to me.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The Secretary. On page 42, paragraph 145 was passed over at the instance of the Senator from Iowa [Mr. Kenyon].

Mr. SMOOT. Mr. President, there was one paragraph passed over before that—paragraph 138. That is the feather provision, The VICE PRESIDENT. The Secretary informs the Chair that the matter was cleared up. The Chair has no recollection

It was returned to and agreed to.

Mr. SMOOT. Does the Chair say that paragraph 138 was not passed over?

The VICE PRESIDENT. It was passed over and was sub-

sequently taken up and agreed to.

Mr. THOMAS. I do not recall that. It was passed over, to

be considered in connection with paragraph 357.

Mr. STONE. What, in fact, was done, as shown by the notes on my book here, is that it was passed over at the request of the Senator from Utah [Mr. SMoor] until the feather paragraph should be disposed of.

The VICE PRESIDENT. The RECORD referring to the matter

will be here in a minute.

Mr. SMOOT. I will state, however, as I remember now, that the Senator from Missouri [Mr. STONE] after that did ask for a vote upon it and said that if the feather paragraph should be changed he would then revert to this paragraph. I think that is the way the record stands.

The VICE PRESIDENT. The amendment was agreed to.

There is not any doubt about it.

The Secretary. Page 42, paragraph 145, "Aluminum, aluminum scrap "

Mr. OLIVER. The Senator from Iowa has offered an amend-

ment to strike out-

Mr. SIMMONS. It is about 6 o'clock and the committee want to have a meeting to-night. I understand it is the desire to have a short executive session. I ask that the bill be laid aside for the day.

Mr. OLIVER. If the Senator will withhold for a moment— Mr. SIMMONS. Yes. Mr. OLIVER. I have some remarks to make which will take some little time with regard to the amendment offered by the Senator from Iowa to this paragraph. Unfortunately, I have already made an engagement which I simply can not recall which will prevent my presence here to-morrow. I should like to ask the committee if they will not indulge me to the extent of al-lowing this paragraph to go over until Wednesday, at which time I will be prepared to discuss it. Mr. THOMAS. That is all right.

The VICE PRESIDENT. The paragraph goes over until Wednesday

Mr. KERN. I move that when the Senate adjourns to-day it adjourn to meet to-morrow morning at 10 o'clock. I will state in this connection that the purpose is to adjourn to-morrow evening at 5 o'clock.

Mr. GALLINGER. Mr. President, up to the present time everything has been done by unanimous consent. Would the Senator be willing to put that as a request for unanimous con-

Mr. KERN. I will ask that it be done by unanimous con-

The VICE PRESIDENT. The Senator from Indiana asks unanimous consent that when the Senate adjourns to-day it be to meet to-morrow at 10 o'clock. Is there objection? The Chair hears none, and it is so ordered.

#### EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, September 2, 1913, at 10 o'clock a. m.

#### CONFIRMATIONS.

## SENATE.

# Tuesday, September 2, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Martine, N. J.	Simmons
Bacon	Fletcher	Myers	Smith, Ga.
Bankhead	Gallinger	Nelson	Smith, S. C.
Borah	Hollis	Norris	Smoot
Bradley	Hughes	O'Gorman	Sterling
Brady	James	Overman	Stone
Brandegee	Johnson	Owen	Sutherland
Bristow	Jones	Page	Thomas
Bryan	Kenyon	Penrose	Thompson
Catron	Kern	Perkins	Thornton
Chamberlain	La Follette	Pomerene	Vardaman
Chilton	Lane	Robinson	Walsh
Clapp	Lewis	Root	Warren
Clarke, Ark.	. Lodge	Saulsbury	Weeks
Colt	McCumber	Shafroth	Williams
Crawford	McLean	Sheppard	Works
Cummins	Martin, Va.	Sherman	11/20/11/2

Mr. THORNTON. I wish to announce that my colleague [Mr. RANSDELL] is at this time absent from the Chamber on public business.

Mr. JONES. I desire to announce that the junior Senator from Michigan [Mr. Townsend] is necessarily absent from the I desire to announce that the junior Senator Chamber and will be absent for the remainder of the day. He has a general pair with the Senator from Florida [Mr. BRYAN].

Mr. SHEPPARD. My colleague [Mr. CULBERSON] is necessarily absent. He is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.
Mr. SMOOT. I desire to announce that the senior Senator

from Delaware [Mr. DU PONT] is detained from the Senate on account of illnes

Mr. GALLINGER. I wish to announce that the junior Senator from Maine [Mr. BURLEIGH] is detained from his duties here on account of a protracted illness. Information received from him yesterday indicates that he will not be here at any time during the present secsion. I make this announcement now so that it may not be necessary to repeat it on subsequent roll

The VICE PRESIDENT. Sixty-seven Senators have answered to the roll call. There is a quorum present.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled joint resolution (S. J. Res. 52) to authorize the appointment of Thomas Green Peyton as a cadet in the

United States Military Academy, and it was thereupon signed by the Vice President.

## PETITIONS AND MEMORIALS.

Mr. PERKINS presented a petition of the Chamber of Commerce of Oroville, Cal., praying for the enactment of legisla-tion providing for the enlargement of the naval forces of the country, which was referred to the Committee on Naval Affairs.

Country, which was referred to the Committee on Naval Affairs.

He also presented a petition of the Chamber of Commerce of Oroville, Cal., praying for the establishment of a naval reserve, which was referred to the Committee on Naval Affairs.

Mr. POINDEXTER presented a resolution adopted at the annual meeting of the Congregational Association of Eastern Washington and Northern Idaho, held at Medical Lake, Wash, extending thanks to Congregational Association of the Vash, extending thanks to Congress for the enactment of the Kenyon-Webb interstate liquor law, which was referred to the Committee on the District of Columbia.

He also presented resolutions adopted at the annual meeting of the Congregational Association of Eastern Washington and Northern Idaho, held at Medical Lake, Wash., favoring the ratification of international arbitration treaties, which were referred to the Committee on Foreign Relations.

#### DR. JOHN T. NAGLE.

Mr. O'GORMAN, from the Committee on Foreign Relations, to which was referred the bill (S. 2907) to authorize the President to award a medal of honor to Dr. John T. Nagle for conspicuous bravery at the battle of Kernstown, Va., on July 24, 1864, while serving as an acting assistant surgeon of the United States Army, asked to be discharged from its further consideration, and that it be referred to the Committee on Military Affairs, which was agreed to.

#### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CRAWFORD: A bill (S. 3069) granting a pension to Catherine E. Brown; to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 3070) granting an increase of pension to Andrew T. Machesney: and

A bill (S. 3071) granting an increase of pension to Celina Little; to the Committee on Pensions.

## THE CURRENCY.

Mr. THOMAS. I submit an amendment intended to be proposed to the bill (H. R. 6454) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision over banking in the United States, and for other purposes, which I ask may be printed and referred to the Committee on Banking and Currency.

The VICE PRESIDENT. The amendment will be printed and referred to the Committee on Banking and Currency.

Mr. THOMAS. In this connection I ask unanimous consent to publish in the RECORD a short article explanatory of the amendment from its author, and which I think is not only of importance but of great interest and value, due to the fact that we shall take up for determination the currency measure. I ask that the article be referred to the Committee on Banking and Currency to accompany the amendment just submitted.

There being no objection, the article was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

#### PREFACE.

In order that the people's interest might be properly conserved, the administration at Washington expressed a desire to receive suggestions from persons not pecuniarily interested in matters which are the subject of legislation.

In response to this general invitation, I published in May of this year a pamphiet entitled "Outline of a Plan for Funding the National Debt and for Maintaining an Elastic Reserve Currency." The "plan" attracted some attention because of its novel treatment of the subject and for the advantages insured by its adoption, among which are the following:

The saving of millions of dollars annually in interest.

The means of determining at regular intervals a proper interest rate on bonds.

An equivalent to the Government of the profit on the distributions.

on bonds.

An equivalent to the Government of the profit on the circulation privilege in the form of a low interest rate on its bonds.

Taking the Government out of the banking business.
Independence of syndicates in the flotation of its bonds.

An "automatic 'sinking fund.

The maintenance of the gold standard.

The simplicity of the system.

The freedom of competition in regard to Government bond issues.

The ultimate increase, within certain limits, of available money.

Its adaptability to expansion in the event of war.

The means of accelerating or retarding the process of funding to the best advantage. best advantage.

And, above all, the introduction of a short-term gold bond, bearing a low competitive rate of interest, which is made available for money reserves for banks because exchangeable in an emergency for correlated legal-tender "bond certificates" at any subtreasury on demand.

I have recently been requested by a distinguished United States Senator to draw up, in harmony with the proposed plan, an amendment to section 20 of the Federal reserve act, commonly known as the Glass-Owen currency bill, which section provides for the gradual retirement during 20 years of the 2 per cent bonds now used as a basis for national-bank-note circulation and the Issue in place thereof of 3 per cent bonds having no circulation privilege.

In the drawing up of this amendment I am greatly indebted to Hon. Hugh H. Hanna, of Indianapolis. Ind., who served as chairman of the monetary conference of 1900. The amendment as drawn, though requiring expression in legal parlance, is the result of many interviews and much thoughtful consideration on the part of the gentleman named and myself, and in the substance thereof we are in perfect accord.

While written as an amendment, I would respectfully suggest that it be considered as outlining a separate bill, because it is complete in tiself as such. It would eliminate from the pending currency bill all discussion regarding our present issues of bonds and currency other than gold and silver certificates, which are not affected, and, finally, because it would give more time for the consideration of a currency bill free from any "entangling alliance," thus rendering it clearer and more readily understood. These are practical considerations for the reason that the plan as formulated in a bill would soon provide a reasonable increase to our present available circulation.

It is therefore presented under two titles—one as an amendment to the currency bill and the other as a bill complete in itself. In the argument I refer to it as a "bill."

WILLIAM A. Amberg.

CHICAGO, August 9, 1913.

WILLIAM A. AMBERG.

# INTERCHANGEABLE BONDS AND BOND CERTIFICATES.

THE NEW BONDS

Authorize the funding of the public debt and the issue of short term, e. g., 10-year renewable term bonds, in an amount to fully cover the principal of the entire debt and the premium on outstanding bonds. There should be, say, 20 issues of equal amount maturing six months

Let us assume that the total amount authorized is \$1,500,000,000; this would make each issue \$75,000,000.

The interest rate on the bonds, which may vary with each issue, will be discussed later; for the present, let it suffice to state that the interest rate is to be determined for each issue when made.

With the complete funding of the debt there will mature \$75,000,000 of bonds every six months, and the interest rate should be fixed on each renewal issue.

TIME REQUIRED FOR FUNDING AND ULTIMATE ROTATION OF MATURITIES.

It will not necessarily take 10 years to refund the debt. Funding can proceed as rapidly as desired or as may be found economical. The first issue would necessarily be for 10 years, other issues after the lapse of every 6 months would also be for 10 years, but accelerating issues can be made for shorter periods, each timed to mature 6 months earlier than the earliest maturity of bonds previously issued, as 9½ years, 9½ years, etc., from the date of the first issue.

The renewal of the serial issues begins with the earliest maturity, and renewals will come regularly every 6 months thereafter, provided all the 20 serial issues are out. If the debt be not entirely funded by the time the earliest maturity arrives there will be other "open" maturity dates besides the two provided for emergencies. If the time required for funding could be predetermined the earliest maturity date could be fixed for the first serial issue, all subsequent issues expiring six months later than the preceding one. The object of all this will appear later when we come to apply an interest rate.

# INTEREST TABLE ON BONDS.

On the back of each bond should be printed a table showing the accrued interest (according to the interest rate it bears) for each given day in the year between coupon maturity dates.

We then have a bond representing a specific amount and showing the amount of accrued interest on any given day.

### THE BOND CERTIFICATES.

The "bond certificates," as stated in the bill, are practically the same as our present United States notes and need only an added clause to the effect that they are exchangeable for the new interest-bearing bonds at par upon payment of the accrued interest on the day the exchange is made. These certificates alone are exchangeable for the bonds. This is an absolute requirement and suggests the desirability of exchanging all the various kinds of certificates now issued, in kind only, as gold for gold certificates and silver for silver certificates only.

At first glance, it would seem that we double the debt because the certificates are prepared to an equal amount with the bonds. This, however, is not the case any more than that our gold certificates double the amount of money, which, of course, they do not.

## THE CUSTODIAN.

Each issue of bonds, when ready, is to be delivered to an official of the Treasury Department whom I will designate the "custodian," whose duties are practically the same as those of the officer who now exchanges gold for gold certificates and vice versa, the only difference being that he is provided with an interest fund.

He gives out the bonds for bond certificates only, collecting the accrued interest shown on the back of the bonds, and when the operation is reversed and bonds are presented for certificates, he pays the accrued interest.

He is not to part with bonds for any other form of money, not even for gold. There will always be the same amount of certificates in his possession as there are bonds outstanding.

The interest-bearing debt, Mar. 1, 1913, exclusive of postal savings bonds, is	\$963, 317, 490 1, 677, 650 376, 460, 242
Total debt to which the plan is applicable	1, 341, 455, 382 2, 389, 120

Aggregate of interest and noninterest bearing

BOND CERTIFICATES A LEGAL TENDER

I assume that the legal-tender character now attaching to greenbacks will apply to bond certificates which replace them.

As a currency it is bettered because secured by interest-bearing United States bonds.

They are never to be paid out by the Treasury before the new bonds are in the hands of the custodian, nor in excess of the amount of bonds so placed.

No additional certificates are required for renewals of bond issues; they are paid out only for the principal of the debt and premium on certain bonds now outstanding, and for other items recognized as a part of the national debt, which includes greenbacks.

#### THE NEW BONDS AS BANK RESERVES.

THE NEW BONDS AS BANK RESERVES.

The bonds being instantly convertible into legal-tender bond certificates are especially adapted for bank reserves, not only for national banks but all other banks, trust companies, and all classes of investors who have idle money awaiting investment. The sum of all these combined is so large that the demand for bonds can be met only in part, which will enable the Treasury to secure a very low interest rate on bonds, virtually a Government "call-loan" rate. Banks could keep a large part of their money reserve in these bonds, because they could be converted any day into bond certificates at any subtreasury, and conservative bankers could therefore increase their present reserves without loss.

servative bankers could therefore the sound to be conjectured.

There is no way of determining what the money reserve of all the banks and trust companies aggregates. It can only be conjectured.

For this purpose let us consider our

The Treasury's estimate of the stock of money in the United States on March 1, 1913, excluding \$174,897,996 subsidiary silver, was \$3.533.297,528; deducting cash in the Treasury held as assets, \$342,-286,969, leaves \$3.191,010,559 as the amount of money in circulation. Assuming that \$2,500,000,000 of this is reserve money, the total issue of the new bonds—which would be less than 60 per cent of this sum—could be held by banks alone as a part of their reserves, because instantly convertible into currency.

#### THE RATE OF INTEREST ON BONDS.

The recent circular of a firm making a specialty of Government bonds gives a table showing high and low prices during certain years of bonds available as security for national-bank notes. This shows a mean average interest yield on 2 per cent bonds ranging from 1.68 in 1901 to 1.96 per cent in 1912.

per cent in 1912.

This low rate arises from the competition of national banks alone. How much lower the interest rate might be if they were sought in universal competition, coupled with facilities for instant conversion into currency, may be imagined.

#### INCOME YIELD TO BANKS.

Regarding the rate of interest which the Government may secure on the new bonds, it is my firm belief that as low as 1.2 or 1.4 per cent may suffice under this plan. These conclusions rest on the fact that as national banks investing capital in the present bonds to secure circulation—which capital might be fully loaned at 5 per cent—have a net income derived from circulation—over and above 5 per cent—after paying taxes on circulation, etc., of only 1.25 to 1.4 per cent, whereas, under this plan they could invest a part of the idle money they are required to keep on hand as a reserve in convertible interest-earning bonds.

When the funding is practically completed and we reach the renewal stage, our experience will have been such that there will be but slight changes in the interest rate. Just now we can not estimate positively how low an interest rate will still command a slight premium for the bonds.

#### DETERMINING THE INTEREST RATE.

To be absolutely on the safe side, let us assume that the first issue of \$75,000,000 10-year bonds bear interest at the rate of 2 per cent. If that proves too high, considering their desirability, it will manifest itself by the bonds commanding a premium in the open market, which will be a gold market when our present United States notes are exchanged, and will remain so unless subsequent legislation should change the character of our currency, which is not likely.

With open market quotations at hand it is easy to determine what lower rate of interest will suffice to keep them at a little above parity with gold.

## FIXED SCALE OF INTEREST RATES.

I suggest that interest rates be always fixed at a multiple of 1.5 (0.2) of 1 per cent, as 1.6, 1.8, 2, 2.2, 2.4, etc., per cent, because even if bonds should be issued in denominations as small as \$50 there will be no fractional cents in the semiannual coupons; the coupons then will be multiples of 5 cents on a \$50 bond, 10 cents on a \$100 bond, 50 cents on a \$500 bond, and \$1 on all the larger denominations.

NO PREMIUM OR DISCOUNT ON BONDS RECOGNIZED BY THE GOVERNMENT IN MAKING EXCHANGES.

So far as the Treasury is concerned, it recognizes no premium or discount in making exchanges of bonds and certificates, regardless of whatever the "open market" may be; but in order that parity with gold may be maintained and also that the certificates may be a real reserve currency ordinarily withheld from circulation, the interest rate on each series of bonds when issued or renewed should be such as to command a very slight premium for the bonds.

Bond certificates immediately exchangeable for bonds bearing even a very low interest rate will be withheld from general circulation by banks, and gold and silver and their certificates will be paid out instead.

NO DISCOINT

## NO DISCOUNT,

The above ideas being followed, it is evident that these bonds will never be at a discount. Temporary "aberrations" in the money market will correct themselves, and the system will have a steadying influence on the "value of gold," just as an "idler pulley" has a steadying effect on a leather belt transmitting power.

## DENOMINATION OF THE BONDS.

The question as to what the denominations of the bonds should be can be determined by experience gained from the first issue. However, to insure perfect equality and no special privilege to any class, it seems desirable that some bonds as small as \$50 should be issued.

# DUTIES OF THE CUSTODIAN.

The custodian's duties are substantially these:
He must give out bonds for bond certificates only and bond certificates for bonds only. The interest either way is to be paid in gold or

its equivalent; hence if he be given a certain amount of the new bonds he will, whatever the exchanges may be, have always the same total amount in bonds and bond certificates.

EXTENSION OF FACILITIES FOR EXCHANGE.

Custodianships may be established in other than subtreasury cities to give the benefit of quick exchange to smaller geographical divisions. SAVING IN INTEREST.

An economical feature of the plan is that it saves interest on the bonds while the certificates are outstanding and even while the Treasury has possession of them.

If the Treasury receives bond certificates as currency in the regular course of business, it will naturally retain them as banks would and thus save interest.

"AUTOMATIC" SINKING FUND.

A permanent holding of bond certificates by the Government is, automatically, the equivalent of a sinking fund to the extent to which they are so held. They are simply an "offset" to the bonds which are held by the custodian,

PREMIUM ON BONDS.

As the Government maintains parity with gold on the new bonds by fixing the interest rate on one serial issue every six months, it does not concern itself with premium on bonds, as it never sells them, unless necessary to replenish the gold-reserve fund, as stated in the bill, an unlikely occurrence. It holds them merely for the purpose of exchange for the only thing which will command them, viz, bond certificates. The reason for exchanging bonds for bond certificates only is to prevent contraction of the currency and to make the certificates more valuable than any other circulating medium.

WHEN THE INTEREST RATE SHOULD BE FIXED.

When the interest rate should be fixed.

It is possible to delay the determination of the interest rate on each of the serial issues to within 30 days of their several dates. While the bonds are printed by hand from steel plates (a slow process) the date, interest rate, and interest table can be quickly printed from type or ordinary printing presses.

I would suggest a smaller bond with larger coupons than usual; 8½ by 14 inches should be the limit.

DURABILITY OF BOND CERTIFICATES.

While the bonds would have to be printed for each particular issue the certificates, which may be of any denomination desired, are general, and command any bond issue, or any particular issue designated by the Secretary of the Treasury if deemed advisable. They will last indefinitely, not being subject to the wear and tear of ordinary currency.

A FINANCIAL BAROMETER.

The daily summarized reports of "Custodians" showing the relative amounts of bonds and bond certificates on hand would be a better barometer of local and general currency conditions than are now the clearing-house reports of business conditions.

DENOMINATION OF BOND CERTIFICATES.

Bond certificates can be issued of any denomination. Even one, two, and five dollar bills may be provided. Their issue and use would be more general than those of the larger denominations, because they are more needed in panicky times, and also because a creditor for large amounts would prefer to take bonds, plus interest, to certificates.

CUSTOM DUES. The clause relating to customs dues in the proposed bill is the same as that which now appears on the backs of United States notes. It will never be necessary to make it operative except in the event of a prolonged and costly war.

will never be necessary to make it operative except in the event of a prolonged and costly war.

Gold certificates have a 100 per cent gold reserve.

Bond certificates will have a 100 per cent serial gold bond reserve, which bonds have a seventy-five million gold reserve to meet an entire serial issue as it falls due, with ample provision for replenishing said gold reserve if drawn upon to meet the next serial issue at its maturity six months later.

Silver certificates have a 100 per cent reserve in silver dollars. By congressional act the Government must maintain parity. The bill directs the Secretary of the Treasury to issue one, two, and five dollar silver certificates in lieu of those of the denominations of \$10 or more, which amount to about twenty-two millions. When the funding is completed over \$320.000.000 of gold certificates of the denomination of \$5 must be provided to meet the requirements of trade for this denomination. Bond certificates will not ordinarily serve the purpose, as they will be withdrawn from circulation to command bonds and create a scarcity of small bills which are absolutely required. My conclusion is that as these smaller silver certificates are needed they will never be presented for redemption in gold to any extent, so that a gold reserve of twenty-five millions is ample, making one hundred millions in all, thus releasing fifty millions of the present reserve.

I realize fully that some will question the necessity of maintaining any gold reserve. I look upon it as a possible necessity. It gives assurance to the world of the character of our money. From the standpoint of economy alone it is a good investment. The loss of interest on \$100.000.000 will be more than offset by the lower interest rate our bonds will command because of the maintannee of the fund. A borrower at a bank soon realizes the fact that the average balance he maintains with it has a very decided influence on the interest rate demanded.

LIMIT OF BOND CERTIFICATES.

demanded.

LIMIT OF BOND CEETIFICATES.

The plan as outlined limits the bond certificates to the amount of the national debt, in round numbers about \$1,350,000.000, while the full cycle of 20 seventy-five-million-dollar issues of bonds, maturing six months apart, would amount to fifteen hundred millions. This leaves two issues, and consequently two maturity dates, free for emergencies, which I deem a very necessary precaution, not only for preliminary war preparations, but also many other purposes. It may be necessary to provide for Panama bonds not yet issued to reimburse the general fund. It might be profitable to have an open maturity date for a shorter time bond when the interest rate manifests an upward tendency.

INCREASE OF AVAILABLE PAPER CURRENCY.

Total_

250, 000, 000

ANOTHER FORM OF PRESENTING THE INCREASE.

The national debt as of March 1, 1913, was as follows: \$965, 706, 610 1, 677, 650 376, 460, 242

As a considerable amount of the national debt included in above will never be presented, having been lost or destroyed (e. g., fractional currency \$6,854,865), the final limit of bond certificate issues, after adding premium on bonds now outstanding, can not exceed the sum of \$1,350,000,000.

The currency in circulation which would be retired was, on March 1, 1913, as follows:

Treasury notes of 1890______ United States notes______ National-bank notes_____ \$2,742,000 346,681,016 751,117,794

So that the available increase in the circulating medium will be about \$250,000,000 independent of the release of fifty millions of the gold reserve, and if the Government deposits its money in the national banks on security other than these convertible bonds, another one hundred millions can be fairly relied upon, thus making a total of \$400,000,000. \$400,000,000.

THE STEADYING EFFECT OF AN ADJUSTABLE INCREASE RATE.

THE STEADYING EFFECT OF AN ADJUSTABLE INCREASE RATE.

When the premium on bonds goes up in the open market the interest rate will go down, and when the bonds command no premium the interest rate will go up. This idea, which is economically sound, is applied every six months to \$75,000,000 of bonds. It will have a steadying effect on the value of bonds as a whole, and the temporary "aberrations" of the money market will affect them but little. This is another argument for limiting the term of the bonds to 10 years.

BANK RESERVE REQUIREMENTS.

BANK RESERVE REQUIREMENTS.

The money reserve requirements of all banks, trust, and other companies (though no data are available) I estimate at nearly double the amount of serial bonds. Would not a big bank having ten or twenty millions of gold certificates locked up in its vaults which must be kept there idle and earn absolutely nothing, gladly substitute all the bonds they could get that would earn even as low a rate as their investment of bonds for circulation has yielded them, say 1.2 or 1.4 per cent, especially when they could exchange them for legal-tender currency (on a gold basis) on an hour's notice?

Think of the enormous expense of all the engraved plates, the printing, the signing of bills, the red tape and the delay, to say nothing of the capital they have to put into bonds and the trouble of getting circulation money under the present system.

Under this system their capital is not touched. Their money reserve is a fixed per cent of their depositors' money which they are obliged by law to keep for their protection in times of emergency. What better emergency money can you provide than bond certificates?

Consider also the enormous expense the Government will save by dispensing with the present system and adopting one so absolutely simple.

WAR BONDS.

WAR BONDS.

In case of war the serial issues could be increased, and so long as the bonds do not approach the full requirements for bank reserves the rate of interest will be low. It is well to recognize the fact that the nearer the amount of bonds approaches the total bank reserve requirements, the interest rates will rise, on account of decreasing competition for them in the open market.

ADDITIONAL CURRENCY REQUIREMENTS.

ADDITIONAL CURRENCY REQUIREMENTS.

I disclaim any purpose to limit the paper money of the country to gold, silver, and bond certificates. These appeal to me because they will all be operated on the same principle—that of immediate interchange; the last to the mutual benefit of the banks and the people. The bond-certificate idea is exceedingly simple once we divest ourselves of our "habit of thought" regarding paper money.

Fortunately we have had a long experience with national-bank issues and can estimate very closely what a currency-issuing privilege is worth to the people. We are perfectly willing to give them an equivalent in different form, because we impose on them the arbitrary requirement of a money reserve for our deposits. In doing this, as herein outlined, the people will get a low interest rate on the debt and the banks and others who want a like interest on money necessarily idle can invest it in convertible bonds.

NO SUDDEN INSPIRATION.

This plan is no sudden inspiration. Its development has been the result of study and observation off and on ever since 1893, when it was impossible to borrow money at a bank on Government bonds. The time for its presentation and advocacy seems propitious. No economic principle of finance is abrogated; the point of view only, to which we have so long been accustomed, is changed; the Government becomes the "syndicate," and the banks, as the custodians of the people's deposits, are the principal investors. It is the depositors' money they are privileged—not compelled—to invest in the people's bonds, not their own capital as now. Their interests are made mutual. This is "the new finance." WILLIAM A. AMBERG.

CHICAGO, August 9, 1913.

WASHINGTON & GEORGETOWN GAS LIGHT COS.

Mr. JONES submitted the following resolution (S. Res. 178), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Commissioners of the District of Columbia be, and they are hereby, directed to report to the Senate as soon as practicable what steps, if any, have been taken by them to enforce section 11 of the act of Congress entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes," approved March 4, 1913, so far as the same may affect the Washington Gas Light Co. and the Georgetown Gas Light Co., both of the District of Columbia.

BETTERMENT OF RURAL CONDITIONS (S. DOC. NO. 177).

Mr. SHAFROTH. Mr. President, at the conference of governors held last week at Colorado Springs, Colo., there was an address delivered by Hon. DUNCAN U. FLETCHER, a Member of this body, relative to the work of the American commission respecting agricultural finance, organization, cooperation, and betterment of rural conditions. I have read the address, and it is a most admirable one. It deals with subjects which are going to be of great interest to the American people in the coming Congress. I ask unanimous consent that it be printed as a public document.

Mr. SMOOT. Did I understand the Senator to say that it

is a speech delivered by the Senator from Florida in this

Chamber?

Mr. SHAFROTH. No; it is not. He delivered a speech somewhat upon this subject, but he did not deal with the work of the commission upon which-

Mr. SMOOT. The speech was delivered outside of the Senate? Mr. SHAFROTH. It was delivered at the conference of governors which met at Colorado Springs last week. The papers made considerable comment upon it, all of it favorable.

Mr. SMOOT. I have not any objection.

Mr. SHAFROTH. I ask unanimous consent that the address may be printed as a document,

The VICE PRESIDENT. If there be no objection, it will be printed as a public document. The Chair hears none.

The morning business is closed.

#### THE TARIFF.

Mr. STONE. I ask unanimous consent that House bill 3321

be now laid before the Senate and proceeded with.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes. Mr. GALLINGER. Mr. President, during the somewhat protracted debate on the measure now under consideration I have frequently asserted that, in my judgment, the enactment of this bill will work irreparable injury to the industrial North, as well as to some other sections of the country, and I see no reason to change that opinion. The senior Senator from Kentucky [Mr. Bradley], in his very able speech of a few days ago, proposed an amendment to the title of the bill, which corresponds closely to a draft I had already prepared. My suggestion is that in-stead of the title being, as it now stands, "A bill to reduce tariff duties and to provide revenue for the Government," it should read "A bill to reduce tariff duties, to destroy American industries, and to provide employment for the laboring men and women of foreign countries." That, in my opinion, correctly de-scribes what the proposed law will inevitably bring about, notwithstanding the proponents of the bill hold to the contrary.

#### AN EXTREME BILL.

This bill, upon which we shall soon vote, represents in an extreme form the economic principle which found its chief strength in this country in the agricultural, slave-holding South before the Civil War. Historically the main support of the tariff-for-revenue-only policy in America, from the first im-portant development of that policy in the South Carolina struggle over nullification in 1832-33, has been in the southern cotton-growing States, and also in New York City and its neighborhood, where the influence of importers representing European manufacturers is powerful.

At no time in this generation has any great producing State of the industrial North stood long for the tariff-for-revenue-only system. New England, New York, New Jersey, Pennsylvania, Ohio, and the manufacturing States of the Middle West have since 1870, as a rule, upheld the protective policy, and if in some gust of passion they have rejected it, they have quickly and signally repented of their mistake.

It is no disparagement of the intelligence or patriotism of the South to hold that the great industrial North, where manufac-turing and agriculture have long gone hand in hand, is in a better position to understand and determine what is the wisest economic policy for our Government than the Southern States, where agriculture, until a relatively few years ago, was the dominant and indeed almost the exclusive and only industry, and where manufacturing, though now of swift and splendid growth, is still, as it were, on the threshold of its development.

### A VERY RADICAL PROPOSAL,

The distinguished chairman of the Committee on Ways and Means of the House of Representatives, at the last session of the Sixty-second Congress, in a report upon one of the schedules which in a still further reduced form is a part of the proposed majority tariff bill, described it—and the description holds true of the whole measure—"as providing a much lower margin, and hence a much more competitive rate, than has been passed by the House of Representatives or enacted in any other Democratic tariff measure since the tariff acts of 1846 and 1857." To the older industrial regions of our coun-

try this statement of Chairman Underwood brings not gratification but alarm, for that era between 1846 and 1861 covered the longest definite abandonment of the protective principle of tariff making in the whole history of the country. and marked in its culmination a period of grave industrial distress, due directly to a departure from the wise teachings of the fathers of our country.

It is a profoundly significant fact that the founders of this Nation, as well the leaders of what is now the Democratic as of the then Federal Party, were convinced and frank protectionists. This is true not only of Washington and Hamilton, but of Jefferson and Madison. The views of Hamilton, as set forth in his famous report on manufactures, are so well known that they need not be repeated here. Washington, in his last annual message to Congress, said:

Congress has repeatedly, and not without success, directed its attention to the encouragement of manufactures. The object is of too much consequence not to insure a continuation of the efforts in every way which shalf appear eligible.

Jefferson as President approved three successive tariff acts increasing protection to manufactures. In his message to Congress on December 15, 1802, he said:

To cultivate peace, maintain commerce and navigation, and protect manufactures adapted to our circumstances, etc., are the landmarks by which to guide ourselves in all our relations.

In 1809 Jefferson wrote to a friend:

I have lately inculcated the encouragement of manufactures to the tent of our own consumption, at least, in all the articles of which we raise the raw material.

Indeed, Jefferson, who is frequently spoken of in these days as the patron saint of the Democratic Party, carried his devotion to American industry so far as to express a wish that the Atlantic Ocean might be a lake of fire to exclude absolutely foreign goods. So positive were Jefferson's views upon the subject that Gen. Francis A. Walker, in "The Making of the Nation" series, declares that-

The fact is Mr. Jefferson was the most extravagant protectionist ever placed in a position importantly to influence trade and industry of a civilized nation.

#### THE FATHERS ALL PROTECTIONISTS.

Washington, Jefferson, and Madison all concurred and aided in the enactment of the first tariff law of the American Republic, the celebrated law approved July 4, 1789, the preamble to which declares that "Whereas it is necessary for the support of the Government, for the discharge of the debts of the United States, and for the encouragement and protection of manufac-tures, that duties be laid," and so forth. That law of 1789 protected not only American manufactures but American ocean shipping. There was at that time no free-trade party in the United States, no party advocating a tariff for revenue only, no dogma such as is to be found in the Democratic national plat-form now that a tariff for revenue and protection is "uncon-stitutional." The men who made the Constitution knew best what the Constitution meant, and Washington knew what it meant when he signed the tariff act of 1789.

# JACKSON A PROTECTIONIST.

Andrew Jackson knew the views and teachings of the men who laid broad and deep the foundations of our Government. Like his great predecessors, Jackson was an outspoken protectionist. He declared in his message of May 27, 1830:

The power to impose duties upon imports originally belonged to the several States. The right to adjust these duties with a view to the encouragement of domestic branches of industry is so completely identical with that power that it is difficult to suppose the existence of the one without the other. * * In this conclusion I am confirmed as well by the opinions of Presidents Washington, Jefferson, Madison, and Monroe, who have each repeatedly recommended the exercise of the right under the Constitution, as by the uniform practice of Congress, the continued acquiescence of the States, and the general understanding of the people.

It was that same great Democrat who, as President, threatened to hang as high as Haman the men who in South Carolina sought to nullify a United States tariff law on the newly asserted idea, exploited for the first time in our national history, that protection to American industry was "unconstitutional." This was not originally the view of even John C. Calhoun himself, for Calhoun in his earlier career, like most of the other public men of his State, was a declared protectionist. It was not until the deplorable struggle over human slavery began to check the national spirit and arouse misunderstanding and enmity between the States that the dogma was held and avowed by any appreciable number of American citizens that the encouragement to manufactures, one of the specific purposes of our very first tariff law, was in violation of the fundamental law of the Republic.

It is interesting to note in this connection that Henry Clay, the great Whig leader, in a speech on American Industry, delivered in the House of Representatives March 30 and 31, 1824, said:

And what is this tariff? It seems to have been regarded as a sort of monster, huge and deformed; a wild beast endowed with tremendous powers of destruction about to be let loose among our people, if not to devour them, at least to consume their substance. But let us calm our passions and deliberately survey this alarming, this terrific thing.

How natural that sounds, notwithstanding the utterance was made 89 years ago. The similarity of the language used by the opponents of the 1824 bill, as quoted by Mr. Clay, and the utterances of Democratic Senators in this debate is significant and illuminating. Mr. Clay continued:

The sole object of the tariff is to tax the produce of foreign industry, with the view of promoting American industry. The tax is exclusively leveled at foreign industry. That is the avowed and the direct purpose of the tariff. If it subjects any part of American industry to burdens, that is an effect not intended, but is altogether incidental and perfectly required.

That is good Republican doctrine from one of the ablest statesmen of his time.

#### SECTIONAL AGITATION.

Students of history well know that the persistent and costly agitation against the protective system, and in favor of a tariff for revenue only, is one of the heritages which the political contest over slavery has left to us. When raw cotton, raised by slave labor, first became the great southern staple, its principal market was in Great Britain, whose manufacturers believed in the first years of the last century that they had an inalienable right to the monopoly of the American market for manufactured articles—a right as inalienable, in their opinion, as the divine right of kings. It so happened that the great manufacturing States of the North—New England, New York, New Jersey, and Pennsylvania—were the principal seats of the

antislavery agitation.

In the bitterness of sectional strife in Congress, southern sentiment turned more and more against the protective tariff legislation, which was steadily developing the resources of the manufacturing States through their abundance of free labor, the slave labor of the South being totally unfitted for employment in manufacturing. This sinister sectional division over the tariff question found its expression particularly through the Hon. George McDuffie, of South Carolina, who said:

I will now tell the gentleman from Massachusetts, if he will pardon the liberty, what is the natural price of the manufacturing labor of the Northern States estimated in money. It is precisely the same as the manufacturing labor of England and not a cent more. (Congressional Debates, vol. 8, p. 3827.)

Mr. Lewis, of Alabama, said on the same subject:

But for the operation of the tariff laws in enhancing the price of northern labor, the state of things would have been completely the reverse of what it now is, and a day's labor in the cotton field would have commanded two days of the northern manufacturing labor. (Congressional Debates, vol. 8, p. 3583.)

In other words, the animating motive of those who wished to abandon the protective-tariff policy of Washington, Jefferson, Madison, and Jackson and to force the country to a tarifffor-revenue-only basis was resentment of the fact that the protective tariff developed the North and greatly benefited its free labor. This historic truth is frankly stated by a southern scholar, E. N. Elliott, LL. D., in the publication entitled "Cotton is King," published in Atlanta, Ga., in 1860. Dr. Elliott said:

If they

The southern cotton planters and the Democratic Partycould establish free trade, it would insure the American market to foreign manufacturers; secure the foreign market for their leading staple; repress home manufacturers; force a large number of the northern men into agriculture; multiply the growth and diminish the price of provisions; feed and clothe their slaves at lower rates; produce their cotton for a third or fourth of former prices; rival all other countries in its cultivation; monopolize the trade in the article throughout the whole of Europe.

This is an easily understood program, the carrying out of which would forever have ended the manufacturing industries of the country. Think of it! Dr. Elliott declared that the policy he advocated would "insure the American market to foreign manufacturers." Unfortunately, the bill now under considera-Unfortunately, the bill now under consideration strongly tends in that direction, and for that reason it ought to be unceremoniously rejected.

#### TARIFF-FOR-REVENUE-ONLY IN PRACTICE.

This unfortunate spirit of sectional jealousy actually triumphed in the tariff-for-revenue-only legislation of 1846, so earnestly advocated by Robert J. Walker, of Mississippi, Secretary of the Treasury, and so warmly praised by the Democratic Party. From this tariff of 1846 and its successor of 1857 all thought of protection was eliminated so far as possible. In some instances, for the more successful strangling of northern manufactures, the duty on the crude materials was set as high or actually higher than on the finished articles themselves, and

the same absurd fixing of rates is found in many instances in this bill. Of course, heavily increased importations of manu-factured goods from Europe were the immediate result; and yet, an extraordinary series of fortuitous events deferred for a considerable time the sure and inevitable consequences of this illstarred legislation.

First came the war with Mexico, which led to the expenditure in two years of \$150,000,000 among the people of the United States in various war disbursements. Then followed the famine in Ireland, with its extraordinary demand for our breadstuffs; the European revolutions of 1848 followed, which seriously disturbed continental industries; then in our own country the California gold discoveries came along; and subsequently, in Europe, the great Crimean War worked advantage to our country. Never was a time more propitious for the success of tariff-for-revenue-only legislation in America. But when conditions became normal this is what happened, as described by William McKinley in the publication entitled "The Tariff in the Days of

Henry Clay and Since," pages 23-24:

Within a year after the close of the Crimean War the country was distressed and humiliated by the only financial panic it had experienced for 20 years since the adoption of a somewhat similar tariff policy to that it was then pursuing. The immediate effect was an increase in importations and a heavy drain upon the specie of the country, while there was a marked reduction in the exportation of our agricultural products. The panic soon swept over the entire Union, prostrating alike our agricultural, commercial, mining, and manufacturing interests.

#### PRESIDENT BUCHANAN'S LAMENT.

In his first annual message to Congress President Buchanan, on December 8, 1857, said:

In the midst of unsurpassed plenty in all the productions and elements of national wealth we find our manufactures suspended, our pullic works retarded, our private enterprises of different kinds abandoned, and thousands of useful laborers thrown out of employment and reduced

That was the vivid picture drawn by a Democratic President of the final results of that earlier tariff-for-revenue-only experiment. President Buchanan, alarmed at the situation, appealed to Congress to adopt a new revenue measure "to increase the confidence of the manufacturing interests and give a new impulse to business," as the President tersely expressed it.

But President Buchanan's plea was in vain, for Congress was still controlled by men who had been taught that protection was against the interests of the South and slavery and beneficial to the free labor of the Northern States. They did not abandon their cherished policy, although it had plunged the country into ruin, and the immediate repeal of the low-tariff law was demanded by the Executive whom they themselves had elected to the Presidency.

In the 15 years from 1847 to 1861, inclusive-

Wrote William McKinley-

during which the economic theories of Mr. Walker prevailed, the total receipts from customs were \$708,107,973, while the outlays of the Government were \$807,133,078. Consequently the expenditures exceeded the receipts by \$99,025,105. Thus, as strictly revenue measures, the laws of 1846 and 1857 were both unsatisfactory. (The Tariff in the Days of Henry Clay and Since, p. 26.)

The result of these nonprotective-tariff laws was all the more significant because they had been tried under most favorable conditions. President McKinley, in the historical work already quoted (pp. 27-28), said on this point:

Never was there a period in our history in which the free-trade policy had so excellent an opportunity to demonstrate its usefulness and adequacy to our industrial and governmental conditions. But, instead of insuring prosperity it produced universal distress and want; instead of raising money to support the Government, even during a period of peace and wonderful development, the system of duties it provided was utterly insufficient and produced results exactly the opposite of those claimed for it. As soon as the foreign wars ceased the revenue began to diminish and the expenditures to exceed it, thus creating deficiencies and forcing loans and increasing our national debt from \$15,500,000 in 1846 to \$90,580,000 on March 4, 1861.

#### THE RETURN TO PROTECTION.

This was the handiwork of men who, after most of those who had framed the Constitution were dead, had invented the idea that a tariff which combined revenue and protection was unconstitutional. Those men had broken faith with the fathers of the Nation and had tried to foist upon the country a dogma of State sovereignty and the doctrine of a tariff-for-revenue-only, which the earlier statesmen abhorred. A radical change and a return to the historic policy of tariff for both revenue and protection waited only for the breaking of the power of the southern Democracy in Congress. By 1860 the House of Representatives came into the control of men who were either Republicans outright or were in sympathy with the Republican faith upon the tariff.

On May 10, 1860, nearly a year before the Civil War began, the first Morrill protective tariff act increasing the duties and also increasing the revenue was passed by the House as an economic and financial measure, a frank repudiation of the

tariff-for-revenue-only policy. This was not in any proper sense a war measure. It can not be affirmed too strongly or too constantly that the abandonment of the southern Democratic policy as we now know it was due not to any anticipation of the Civil War or to any consequences of the Civil War, but to the bankruptcy to which free trade had brought the Nation, and the ruin and distress into which it had plunged our manufacturers and farmers in its culminating years from 1857 to 1860. Nothing is more manifest from all the records of history than that the country would have returned to the protective system of Washington, Hamilton, Madison, Monroe, and Jack-son in 1860, even if there had been no Civil War.

The tariff-for-revenue-only scheme had utterly failed by 1860, and had confounded and discredited its authors quite as signally and even more quickly than that later experiment of the same kind in the years between 1894 and 1897.

It was absolutely inevitable that when the great industrial North, with its free labor, wrested from the South, with its slave labor, the control of the National Government the overwhelming protectionist sentiment of the North should write its convictions upon the national statute books. So long as the Senate remained Democratic the first Morrill protective tariff bill, which had passed the House of Representatives on May 10, 1860, could not be enacted, notwithstanding President Buchanan had implored Congress to grant our distressed people this prompt and merciful relief. But in the session of 1860-61 so many Southern Senators had withdrawn from Congress to "go with their States" that control of the Senate was secured by the Republicans, and on February 20, 1861, the Morrill protective tariff bill was passed and soon after signed by President Buchanan, who thus made conspicuous reparation for the terrible wrong which his party and its mistaken policy of tarifffor-revenue-only had done to the American people.

#### LINCOLN A PROTECTIONIST.

On March 4, 1861, there was inaugurated as President a firm protectionist, Abraham Lincoln, all his life a believer in and advocate of the protective-tariff policy. Lincoln had summed up his economic faith in these simple words, which have been often quoted:

I do not know much about the tariff, but I know this much: When we buy manufactured goods abroad we get the goods and the foreigner gets the money. When we buy the manufactured goods at home we get both the goods and the money.

And this is the platform on which Lincoln stood in 1860 when he was elected President:

While providing revenue for the support of the General Government by duties upon imports, sound policy requires such an adjustment of these imposts as to encourage the development of the industrial interests of the whole country. We commend therefore that policy of national exchanges which secures to the workingman liberal wages, to agriculture remunerative prices, to mechanics and manufacturers adequate reward for their skill, labor, and enterprise, and to the Nation commercial prosperity and independence.

In these significant words was embodied the national spirit, as Washington, Hamilton, Jefferson, Madison, Monroe, and Jackson knew, taught, and enforced it. The great industrial States, whose multitudes of free laborers had again become the dominant force under Lincoln in the National Government, would have nothing of the sectional dogma that national protection to labor and industry was "unconstitutional."

## THE REAL AMERICAN SPIRIT.

This renewed national spirit found immediate expression everywhere in the policy of the Lincoln administration. On January 29, 1862, a most important War Department order was

That no further contracts be made by this department or any bureau thereof for any article of foreign manufacture that can be produced in the United States.

All outstanding orders, agencies, authorities, or licenses for the purchase of arms, clothing, or anything else, in foreign countries or of foreign manufacture for the department are hereby revoked and annulled.

This great measure of protection, self-reliance, and selfdefense was a logical, thoroughly characteristic part of the new national policy of Lincoln. It was just what Washington or Jefferson would have done under similar circumstances. connection with the protective-tariff policy to strengthen our national industries once more thoroughly established, the results were like a new declaration of independence on land and sea. Hon. William D. Kelley, one of the ablest and most eloquent of the leaders in Congress, on January 31, 1866, thus described the change that had come over the country as a consequence of the fiscal policy of the Republican Party:

When the war began we could not have made the iron for the gun barrels; we can now export better gun barrels than we can import. We then made no steel, and had to rely on foreign countries for material for steel cannon and those steel-pointed shot by which alone we can pierce the ironclads with which we must contend in future warfare. Many of our regiments that came first to the Capital came in rags,

though every garment on their backs was new and many of them of freshly imported cloth.

But no army in the world was ever so substantially clothed and armed as that which for two days passed in review before the President of the United States and the Lieutenant General after having conquered the rebellion—an army which, when disbanded, was clad in the product of American spindles and looms and armed with weapons of American materials and construction.

That is exactly what the protective-tariff system in the time of Washington and Jefferson, and also in the time of Lincoln accomplished, and what it inevitably will accomplish whenever given an opportunity. It makes everywhere and always for national independence. To one conspicuous national industry in our time-our ocean shipping industryof protection has not been applied, and the result is that we are absolutely dependent for the carrying of more than 90 per cent of our own imports and exports on ships of foreign flags, owned and controlled by the subjects of foreign Governments, our rivals in trade and possible enemies in war. To these foreign shipowners, now organized into arrogant trusts and combinations, as investigations by Congress and the Federal courts have lately proved, we are paying every year a vast tribute of between \$200.000,000 and \$300,000.000. Without protection to this once great national industry, which was thoroughly protected under Washington and Jefferson, we are so destitute of ships sailing away from our own coasts that the American people still recall with smarting humiliation how their battleship fleet in its recent voyage around the world was enabled to make that voyage only by the help of an uncertain fleet of Dutch, Italian, Scandinavian, and British colliers.

#### A REVIVAL OF ERBOR.

Passing from history to the present, I cheerfully acknowledge that the authors of the present Democratic tariff proposal are able, sincere, and patriotic men-as able, sincere, and patriotic as their predecessors, the authors of the unfortunate tariffs of 1846 and 1857, who proved to be so terribly mistaken. statesmen of that era before the Civil War, who framed the Walker tariff and its immediate successor, did not and could not, in their agricultural environment, understand the complex financial and industrial needs of the American Nation so well as the public men from the great States between New England and Illinois who, with Lincoln, succeeded to the control of the Government in 1861.

The authors of the bill now proposed, reestablishing the policy of tariff-for-revenue only, are more fortunate than their predecessors in that the industrial North is to-day prosperous under Republican laws, and the smoke of factory chimneys is no longer almost unknown in the South. Their honesty of purpose and love of country no man will impeach. Patriotism in our time, in our Nation-thank God !-- knows no North or South or East or West. But with full acknowledgment of the sincere motives of those who have framed and are upholding this bill we can not but believe on this side of the Chamber that events will swiftly and conclusively prove them to be as mistaken as their predecessors were.

There is far less justification now for a tariff-for-revenue-only policy in this country than there was in 1846 and 1857. A protective-tariff policy can no longer be accused of being narrowly sectional in its benefits. Manufactures are rapidly spreading all over the United States, including the South. There is no more slave labor, but free labor everywhere. Among the most earnest remonstrants against this present radical tariff bill are the farmers of the Mississippi Valley and the great Northwest, who see their staple products sharply reduced or bodily transferred to the free list, and that at a time when domestic consumption is rapidly overtaking domestic production. The recent fight of the West and Northwest against the so-called Canadian reciprocity agreement was one of the most significant demonstrations of the strength of the protectionist sentiment in America of which history has any record. Those western and northwestern farmers who justly opposed that unfortu-nate, one-sided "reciprocity" proposal were unwilling to accept practical free trade even with our Canadian neigh-bors, who of all the people in the world, in their wages and general standards of living, are most nearly equal to our own. When those far western farmers so unitedly opposed free trade with Canada, our neighbor to the north, they gave an emphatic vote of instruction to their Senators and Representatives in Congress never to subject either American agriculture or American manufactures to free trade with all the world.

### TARIFF-FOR-REVENUE-ONLY A MINORITY POLICY.

It has already been clearly pointed out by other Senators in the course of this debate that a very large majority of the American people in the recent national election declared in favor of a combined tariff-for-revenue-and-protection principle as against a tariff-for-revenue only. The united vote of the Republican and Progressive Parties, both of whose national platforms affirmed a belief in a tariff for protection of American labor as well as for national revenue, commanded more than one million majority over the Democratic vote, which, only because of a deplorable break in the protectionist ranks, was enabled to make Mr. Wilson President. Moreover, there can be no question that in nearly all the Northern States many voters cast a Wilson ballot for other reasons than approval of a tarifffor-revenue-only policy or of the candidate himself. All over the North—and the same thing is doubtless true of the South there are thousands of business men who, though acting with the Democratic Party, are in principle protectionists, like the Democratic governor of Massachusetts, who has pronounced severe condemnation on the pending bill.

#### THE SOUTHERN VIEW.

Disclaiming all purpose of raising the sectional issue in what I have already said I will, nevertheless, take occasion to further suggest that the condition to-day clearly illustrates the determination of the South so to reduce import duties as to do away altogether with protection to the industries of the United It is not a new question. From the days of Democratic nullification in South Carolina, more than 80 years ago, to the present time the South has clamored for practical free trade, and has never failed to denounce protection when opportunity presented itself. It will be recalled that the Confederate constitution contained the following free-trade provision:

Sec. 8. The Congress shall have power—

1. To lay and collect taxes, duties, imposts, and excises for revenue necessary to pay the debts, provide for the common defense, and carry on the Government of the Confederate States; but no bounties shall be granted from the treasury; nor shall any duties or taxes on importations from foreign nations be laid to promote or foster any branch of industry; and all duties, imposts, and excises shall be uniform throughout the Confederate States.

That was the declaration of the Confederate States on the question of the tariff-a declaration in favor of absolute and unrestricted free trade between the Confederacy and all the nations of the earth. The laws enacted by the Confederate Congress were along the same line, committing the Confederacy absolutely and without qualification to the free-trade theories that had dominated the South up to that time, and which unfortunately find expression in the bill now before the Senate.

## WOODROW WILSON AND THE TARIFF.

In this connection it is significant that in 1882 Mr. Woodrow Wilson, a southern man, appeared before the Tariff Commission at Atlanta, Ga., to give testimony on tariff matters, on which occasion he used the following words:

occasion he used the following words:

It is not my purpose to represent or advocate any particular interest, but only to say a few words upon the general issues before you on the subject of protection or free trade. This question of the tariff is one which has been under consideration in Congress for ninety-odd years. Early in the century protection was introduced for the purpose of fostering new manufactures in this country. That system was continued down to the time of the war; but since the war it has been upheld professedly for the purpose of raising revenue and to enable the Government to recover from the indebtedness caused by the war. Free trade therefore has been a slumbering question, but it will soon become one of the leading questions in all political discussions, because, now that peace has come, the people of the South will insist upon having the fruits of peace and not being kept down under the burdens of war.

It is an interesting fact that Mr. Wilson, at that time a comparatively young man, declared that free trade was a slumbering question, and that the people of the South would insist upon getting rid of protection. He is now President of the United States, and it is not to be wondered at that the declaration then made is still in his mind. Declaring that no man with his senses about him would recommend perfect freedom of trade in the sense that there should be no duties whatever laid on imports, Mr. Wilson added:

The only thing that free traders contend for is that there shall be only so much duty laid as shall be necessary to defray the expenses of the Government, reduce the public debt, and leave a small surplus for accumulation—

which manifestly meant that no duties whatever should be laid for the purpose of equalizing the cost of production at home and abroad so as to protect American manufactures and labor against the cheap labor of foreign countries. He further maintained that-

Manufacturers are made better manufacturers whenever they are thrown upon their own resources and left to the natural competition of

In answer to the question from Commissioner Garland, "Are you advocating the repeal of all tariff laws?" Mr. Wilson made the following astonishing reply:

Of all protective tariff laws; of establishing a tariff for revenue merely. It seems to me very absurd to maintain that we shall have free trade between different portions of this country and at the same time shut ourselves out from free communication with other producing countries of the world. If it is necessary to impose restrictive duties on goods brought from abroad, it would seem to me, as a matter of logic, neces-

sary to impose similar restrictions on goods taken from one State of the Union to another. That follows as a necessary consequence; there is no escape from it.

Equally astonishing was the following declaration:

Protection also hinders commerce immensely. The English people do not send as many goods to this country as they would if the duties were not so much, and in that way there is a restriction of commerce, and we are building up manufactories here at the expense of commerce. We are holding ourselves aloof from foreign countries in effect and saying, "We are sufficient to ourselves; we wish to trade not with England, but with each other." I maintain that it is not only a pernicious system, but a corrupt system.

Passing over the remarkable suggestion that if we have tariff laws between this country and other countries, we ought equally to have them between the several States, where industrial conditions and wages are similar, it goes without the saying that if we enter into free and open competition with the nations of the world England will send more goods to this country than she will if import duties are exacted from her. Indeed, it does not require any stretch of the imagination to conclude that under such conditions England, France, and Germany will supply us with everything that we consume. Why not? And yet this economist, who is now President of the United States, openly declared that the hindrance that protection offers to commerce should be removed so that the English people could send more goods to this country, supplanting American manufactures, thus depriving American workingmen of a livelihood.

I hope President Wilson is now ready to repudiate the utterances of Prof. Wilson, but I fear that Ephraim is wedded to his idols, and that the same views are held in 1913 as were expressed in 1882.

Turning to Prof. Wilson's History of the American People, a most readable book, it is interesting to note what he had to say about the panic of 1893, during the period of the Wilson-Gorman low-tariff law. These are his words:

low-tariff law. These are his words:

The business of the country had fallen dull and inactive because of the financial disquietude of the time. A great poverty and depression had come upon the western mining regions and upon the agricultural regions of the West and South. * * Men of the poorer sort were idle everywhere, and filled with a sort of despair. All the large cities and manufacturing towns teemed with unemployed workingmen who were with the utmost difficulty kept from starvation by the systematic efforts of organized charity. In many cities public works were undertaken upon an extensive scale to give them employment. In the spring of 1894 armies of the unemployed began to gather in the western country for the purpose of marching upon Washington, like mendicant hosts, to make known to the Government itself, face to face, the wants of the people. * * * Countrysides experienced a sort of panic at their approach. It began to seem as if there were no law or order in the land. Society itself seemed demoralized, upset. * * *

#### Prof. Wilson continues:

Prof. Wilson continues:

The elections of 1896 had shown, in a fashion the country was not likely to forget, the volcanic forces which had been kept just beneath the surface while he (Cleveland) was President. The issue which had dominated all the rest was the question of the coinage. But that question did not stand alone. It seemed, indeed, but a single item in the agitated thought of the time. Opinion everywhere seemed to have broken from its old moorings. There had been real distress in the country, long continued, hopeless, as if the springs of wealth and prosperity were dried up. The distress was most marked and apparently most hopeless in the great agricultural areas of the South and West. The prices of agricultural products had fallen so low that universal bankrupter seemed to the farmers to be but a little way off. There was a marked depression in all kinds of business, as if enterprise were out of heart and money nowhere to be had except among a few great capitalists in Wall Street. * * *

* * No one could deny that the country had fallen upon evil times, that the poor man found it harder than ever to live, and that many a law needed to be looked into which put the poor at a disadvantage. The country teemed with men who found themselves handicapped in all they tried to do; they could but conjecture why.

After describing the election of President McKinley, Prof.

After describing the election of President McKinley, Prof. Wilson further says:

Wilson further says:

Obviously the business world, the whole world of industry, was in process of revolution. America in particular had come to the crisis and turning point of her development. Until now she had been struggling to release and organize her resources, to win her true economic place in the world. Hitherto she had been always a debtor nation, her instruments of industry making and to be made, her means of transportation, the vast systems of steel highways which were to connect her fields and factories with the markets of the world, as yet only in course of construction.

* * Except what her fields produced, the country had as yet but little with which to pay the interest and the capital of her debts; her fields were in some sense the granary of the world. As agricultural prices fell it required more and more foodstuffs to pay her balances. In those fatal years of depression, 1803–1896, when business threatened to stand still, because of the state of the currency, and the crops fetched little more than would pay for their carriage, it was necessary to pay huge foreign balances in coin, and \$87,000,000 in gold had to be shipped over sea to the country's creditors in a single twelvement (1893). * * *

Now listen to this remarkable statement by Prof. Wilson:

Not until the very year 1897, when the new Republican administra-tion came in, did the crisis seem to be past. The country had at last built its rallway and manufacturing systems up, had at last got ready to come out of its debts, command foreign markets with something more than its foodstuffs, and make for itself a place of mastery.

It is proper for me to observe that Prof. Wilson claimed that the condition of things existing during the last Cleveland administration was largely due to the agitation of the silver question and to a partial failure of crops in the agricultural regions of the West and South, but that contention is not sustained by facts. He might well have added that the change in 1897 for the better, which he so graphically described, came because McKinley's election assured the country that a protective-tariff law would be passed to take the place of the Wilson-Gorman tariff law then on the statute books. It was that fact that gave heart to the industries of the country, rescuing them from the sad plight that had overtaken them during the Cleveland administration.

#### A HARD BLOW TO NEW ENGLAND.

Mr. President, this bill strikes a hard blow to the industries of the New England States, which produce more than one-half the boots and shoes of the Nation and more than one-half the cotton, worsted, woolen, and felt goods output. New England also leads the Nation in the fishing industry and in the production of watches and clocks, hardware, cutlery, and tools; has the largest woolen mills, shoe, watch, and confectionery factories in the world; has 42.1 per cent of the manufacturing establishments of the country which employ 500 or more employees each, and has nearly four times the density of population that is an average for the rest of the United States.

The Boston Globe, a Democratic newspaper, has collected the following interesting statistics, as shown by the United States census for 1910, covering the six New England States:

Maine's industrial showing

	N	Number or amount.				
Manufactures.	1909	1904	1899	1904- 1909	1899- 1904	
Number of establishments .	3,546	3,145	2,878	12.8	9.3	
Persons engaged in manu- factures	88, 476	82,109	(1)	7.8

Population in 1910, 742,371, an increase of 47,905 in the last decade. Increase from 1904 to 1909 in number of spindles in textiles 154,594, er 14.7 per cent. Increase in looms 2,473, or 8.8 per cent.

In 1899 Maine produced 217,281 tons of paper: in 1904 the product was 385,999 tons, and in 1909 it was 574,215 tons. The value of this paper product in 1904 was \$17,480,168, an increase over 1899 of 86.1 per cent, and in 1909 the value of the paper product was \$27,637,697, an increase over 1904 of 58.1 per cent.

In the lumber industry there was a gain of 41.7 per cent in the decade in the rough lumber sawed, a gain of 55.1 per cent in the production of lath, and a gain of 28.4 per cent in the production of shingles, Maine's canning industry shows an increase from 1904 to 1909 of 90.4 per cent.

The value of farm property increased 62.8 per cent.

The value of New Hampshire's manufacturing products show a sixfold increase from 1849 to 1900. For the last decade the industries
show a net increase of 10.7 per cent in number of establishments, 16.3 per
cent increase in the number of wage earners, 53 per cent increase in value
of products, and 40.1 per cent increase in value added by manufacture.

There were only 571 wage earners in the tobacco industry of New
Hampshire in 1909; but to-day there is double that number, and the
business has increased in like proportion.

In the last decade the value of the live stock on farms increased 12.8 per cent, value of poultry increased 39 per cent, value of crops increased 30.2 per cent.

From 1849 to 1900 the value of manufactured products of Vermont increased nearly eightfold, and from a per capita rate of \$27 to \$192.

In the last decade the value of the butter, cheese, and condensed milk industry products increased 43.4 per cent.

In the last decade the number of spindles in the woolen and worsted mills grew from 37,460 to 51,404; the number of looms increased from 775 to 1,297.

From 1904 to 1909 the gas illuminating and heating industry showed a growth of 115.5 per cent in value of products, and an increase of 95.6 per cent in value added by manufacture.

Vermont leads the country in the products of her marble and her granite industries.

Of the land area of the State 79.9 per cent is in farms. In the decade to 1910 the value of all farm property increased \$38,948,301, or 34.1 per cent.

1 Figures not available.

In 1904 Rhode Island had 41 manufacturing establishments, turning out products of \$1,000,000 or over. In 1909 there were 69 establishments doing that amount of business.

While the smallest State in the country, Rhode Island in 1909 ranked third in the production of woolen and worsted goods, fourth in the production of cotton goods, sixth in the production of silk goods, and eleventh in the production of hoslery and knit goods.

From 1904 to 1909 the number of spindles in operation increased 347,022, or 18.9 per cent; the number of looms increased 17,263, or 27 per cent; the number of knitting machines increased 499, or 42.6 per cent; the number of combing machines increased 499, or 42.6 per cent; the number of combing machines increased 167, or 56.8 per cent.

In 1910 the population was 542,610, a gain of 26.6 per cent.

It will be seen from the above tables that in New England the number of manufacturing establishments is 25.351; the capital invested is \$2,503,855,000; the total number of persons engaged in manufacturing is 1,212,158; the total number of wage earners is 1,100,886; the amount of wages paid annually to employees is \$557,630,000; the amount of other salaries is \$112,284,000, making the total for salaries and wages \$669,914,000; the value of materials is \$1,476,297,000; the value of product is \$2,670,065,000, and the value added by manufacture is \$1,193,768,000.

## A REMARKABLE RECORD.

That is certainly a most remarkable record, and it indicates the disaster that will overtake New England if the rates of duty in this bill are not sufficient to equalize the difference in cost of production at home and abroad, which I contend is not the fact. Among other things, it will be observed that the annual average wage paid in all the industries of New England, men, women, and children included, is \$506, an infinitely higher wage than is paid in any European country and at least 30 per cent higher than is paid in the States of the South.

# AN UNWARBANTED ATTACK.

Mr. President, it has been a matter of much regret to me that a New England Senator, my colleague from New Hampshire [Mr. Hollis], felt called upon to make a violent attack upon the industrial conditions of New England, and especially upon the textile industry. In a speech delivered in the Senate on the 11th day of August he, among other things, said:

My constituents as a whole have no sympathy with the provincial doctrine that New England must be coddled or "protected" at the expense of the South and West. When her public men in years past have begged for special tariff privileges at the Nation's Capital she has been misrepresented. She bids me say, Mr. President, that what is best for the country at large is best for her.

If the election of 1912 meant anything beyond a shifting of public officials, it meant that the Democratic tariff policy was indorsed.

* * I pledged my best efforts to securing for New England fair treatment in that revision and an equitable adjustment among New-England industries

* * Let these Senators remember that we are now taking.

* * Let these Senators remember that we are now taking merely a first step toward a revenue tariff. After we have seen the result of this first step we shall be in position to take a second. I very much fear that if we should make that first step so long that the cotton industry should receive a severe blow we might not be in a position politically to take the second step at an early date.

But even as a first step we have made a reduction on the whole cotton schedule * * * of 35 per cent. Two more steps like the first would leave the cotton industry of America entirely without protection.

Protected manufacturers * * * interfere with legislation * * * secure favors from railroads * * * control local boards of assessors * * control local officials * * control local courts * * interfere in senatorial contests * * oppose labor laws * * pay high dividends.

* * * While these mills pay enormous dividends to their stock-holders they pay starvation wages to their operatives.

When mill workers of a New England city hired a hall during the Lawrence strike to consider whether they should themselves go out on strike, the local police prevented the use of the hall, and when the operatives tried to hold meetings in the street some of them were

arrested. This was accomplished by the mill owners through the chief of police, who was controlled by the police commissioners, who were appointed by the governor at the direction of the mill owners.

Taking up these declarations in order, I beg to say that my colleague is laboring under a misapprehension when he asserts that New England bids him to speak for her industrial interests. New England believes in a protective tariff, and no man who supports the bill now under consideration, or who defends men like Ettor, Haywood, and others of their ilk, represents in any way her views. It is, furthermore, an unwarranted assumption to say that New England has been "coddled" or "protected" at the expense of the South and West. While the tariff has undoubtedly been of much value to New England industries, New England has reciprocated by helping to consume the agricultural products of the great West, and through her representatives in Congress by giving warm support to legislation in behalf of the West, such as the irrigation laws and the effort to retain duties on agricultural products. We also reciprocate with the South by consuming enormous quantities of her raw cotton, lumber, sugar, and rice. My colleague's solicitude for the West was not in evidence when he voted to put wheat and other agricultural products on the free list.

Equally mistaken is my colleague in declaring that the Democratic tariff policy was indorsed at the last election. How on earth anyone can believe that a policy that was repudiated by a majority of over a million voters of the country was 'indorsed" surpasses my comprehension. Had not the Republican Party been divided, and had the issue of protection or a tariff-for-revenue-only been squarely presented to the voters of the country protection would have been overwhelmingly indorsed

My colleague called attention to the fact that he pledged his best efforts to give New England fair treatment in the revision of the tariff, but it will be found when this bill becomes a law that New England has not been fairly treated, and that hundreds of her industries will be greatly harmed, if not entirely destroyed, because of the radical and unwarranted reductions that have been made in the rates of duty. My colleague's votes in favor of either largely reducing or placing on the free list granite, cutlery, latch needles, paper and pulp, manufactures of cotton and wool, boots, shoes, and leather, hay, eggs, butter, potatoes, maple sugar and sirup, and other New England products, is a poor fulfillment of his promise.

But the most startling declaration that my colleague made is

found in the statement that this bill is merely the first step toward a revenue tariff, and his assurance that after the Democratic Party has seen the result of this first step they will be in a position to take a second. He further says that he fears that if they should make that first step so long that the cotton industry should receive a severe blow they might not be in a position, politically, to take the second step at an early date. Evidently this means that the second step is to be taken and that it is expected to deal a "severe blow" to the cotton industry. It would be more correct to say that, instead of administering a severe blow, it nay be a deathblow to that great industry.

He further suggests that the first step that his party has taken reduces the rates of duty on the cotton schedule 35 per cent, and significantly adds that "two more steps like the first would leave the cotton industry of America entirely without protection." This program is doubtless the justification for my colleague's suggestion that "it is a subject for anxious thought whether a State is better off for possessing many cities of this character"; that is to say, cities like Manchester, Nashua, Dover, Lowell, Lawrence, New Bedford, Fall River, and other industrial cities scattered throughout the New England States. Let us for a moment imagine what the condition of New England would be if the cities where textile manufacturing is carried on were forced to abandon that industry and the operatives be compelled to seek for employment in other avenues of trade and industry. What would become of New Hampshire under such circumstances? It is a spectacle not to be contemplated calmly by those of us who believe that the present prosperity and the future greatness of New England largely depend upon her manufacturing strength and development. One New Hampshire Senator may contemplate with equanimity the possible destruction of the textile industry in New England, but any man who advocates such a contingency has no right to pretend that he represents New England sentiment.

My colleague's declaration that protected manufacturers interfere with legislation, secure favors from railroads, control local boards of assessors, control local officials, control local courts, interfere with senatorial contests, oppose labor laws, pay enormous dividends to their stockholders and starvation wages to their employees, might well do for a stump speech in the heat of a political campaign, but it is so utterly preposterous that it ought never to have been uttered in the Senate of the United States. So far as I know, the men who control our great manufacturing industries are as honorable, patriotic, and law-abiding citizens as can be found among any class of our people, and it is not the part of fairness or justice to denominate them as men who are engaged in questionable and unlawful conduct. The charge made against them can not be sustained and ought to be promptly withdrawn.

My colleague's statement that the local police of a New England city prevented the mill workers from using a hall in which to hold meetings during the Lawrence strike, due to the fact that the owners of the mills controlled the governor and police commissioners, who in turn controlled the police, is on a par with many other statements to be found throughout this re-markable speech. The simple fact is that the operatives of no New England city were forbidden to hold meetings, but the Industrial Workers of the World, men like Ettor, Giovanitti, and the notorious Haywood, who were haranguing and inciting to violence the foreign element in the mills of Lawrence and other New England cities, were taken care of, very properly, by the police force, as they have been in other parts of the country. It seems to me that it is about time for this talk about the Lawrence strike to come to an end. It was organized and conducted by socialists and anarchists, men who openly declared that they had no respect for either the flag or the laws of our Government, and who advised violence in all its forms. The result of that agitation is that the laboring people, through the advice of those men, lost hundreds of thousands of dollars. For the time being peace reigns in Lawrence, and it will continue to reign unless those same revolutionary agitators appear on the scene and incite to further violence and disorder.

#### HOURS OF LABOR,

My colleague also called special attention to the hours of labor that are required in the mills of New England, citing the fact that New Hampshire has a law fixing the maximum at 55 hours a week and, evidently for the purpose of showing that that is an excessive requirement, cited the fact that the Commit-tee on the District of Columbia has reported a bill establishing the eight-hour law for women and children in the District. He might have added that that bill was reported under protest from a great many women in the city of Washington, who prefer to work a longer number of hours in cases of emergency for the purpose of adding to their scanty income. And when my colleague pictured the conditions of the working people in the textile cities of the country as being in some respects deplorable he might well have carried his comparison between New England and the District of Columbia to the alley conditions which exist in the city of Washington, and which he himself recently investigated. If it is the duty of the manufacturers of New England to see that the operatives have sanitary surroundings whether they want them or not, it would seem to be equally incumbent upon the General Government and the government of the District of Columbia to get rid of the slum conditions in Washington, which my colleague in a recent interview so severely and properly condemned. Personally I diligently labored for many years, with a certain degree of success, to accomplish that result, and I trust that my colleague will continue the good work.

# THE DEATH RATE.

It is of interest in this connection to note the fact that in the calendar year 1912 the death rate in the District of Columbia was 14.18 per 1,000 for whites and 26.88 per 1,000 for the colored population. The general death rate in the District of Columbia for the year 1912 was 17.73, as against 16 in the much advertised textile city of Lawrence, Mass. The abnormal death rate for the colored people of the District, doubtless largely due to insanitary and other similar conditions, might well engage the attention of the committee of which my colleague is a member, with a view to further correcting conditions at the Capital of the Nation, which would seem to be as imperative as to correct conditions in the textile cities of the country. Efforts have been made along this line from time to time, but notwithstanding much progress has been made through legislation and otherwise, there still remains a great deal to be done to bring about ideal conditions. Again, why was not the fact stated that in southern textile mills, where goods are made in competition with the mills of New England, the hours of labor are much longer and children are employed at a less age than is permitted by law in the New England States? Why not be fair?

My colleague complains of the wages paid in the textile industries. Those men are mostly foreign born, mostly unskilled,

and they come to this country with a full knowledge of the wages they will receive, which are more than twice what they received in the countries from whence they came. I may be permitted to suggest that if they are not satisfied with the wage they receive here there is no law compelling them to remain in this country. It will require a wise man to figure out how our manufacturers can pay twice the wages that are paid abroad and sell their product in competition with foreign manufacturers without protection, but possibly the Democratic Party can solve that problem. The probabilities are, however, that when the bill under consideration becomes a law and American manufacturers are compelled to either reduce wages or go out of business there will be an awakening as to the folly of the proposed legislation.

Mr. President, I hold no brief for the textile industry of New England. I never asked for or received a favor from any manufacturing or other corporation, but at the same time I know of no reason why the textile industry should be singled out and assailed by any New England man, or placed in a false attitude before the people of the country. Enterprising and excellent men are engaged in the business, and the present prosperity of the New England States is largely dependent upon their energy and business sagacity. They certainly deserve fair treatment at the hands of their representatives in Congress, and more than that they do not ask or expect. Beyond a doubt mill conditions can be and are being improved from year to year, for it is a well-established fact that well-paid and contented laborers are more profitable to their employers than underpaid and discontented men and women.

Concerning the hygienic conditions of the modern factory, it is interesting to quote from an article entitled "The factory as an element in civilization" the following statement from the late Hon. Carroll D. Wright, at one time United States Commissioner of Labor. Dr. Wright said:

sioner of Labor. Dr. Wright said:

The regular order maintained in the factory cures this evil of the old system and enables the operative to know with reasonable certainty the wages he is to receive the next pay day. His life and habits become more orderly; and he finds, too, that, as he has left the closeness of his home shop for the usual clean and well-lighted factory, he imbibes more freely of the health-giving tonic of the atmosphere. It is commonly supposed that cotton factories are crowded with operatives. From the nature of things, the spinning and weaving room can not be crowded. The spinning mules, in their advancing and retreating locomotion, must have five or six times the space to work in that the actual bulk of the mechanism requires; and where the machinery stands, the operative can not. In the weaving rooms there can be no crowding of persons. During the agitation for factory legislation in the early part of the last century it was remarked before a committee of the House of Commons with a moderate attendance of a cotton mill is one-tenth as crowded, or the air in it one-tenth part as impure, as the House of Commons with a moderate attendance of members." This is true to-day. The poorest factory in this country is as good a place to breathe in as Representatives' Hall during sessions or the ordinary schoolroom. In this respect the new system of labor far surpasses the old.

In the above statement Dr. Wright told the exact truth. A careful investigation of the subject will disclose the remarkable fact that the laws of Massachusetts, which are, in many respects, the most advanced in the country, require in the public schools 300 cubic feet of air space per pupil, and ventilation furnishing 30 cubic feet of air per minute per pupil. On the other hand, the latest spinning mill built by the Arlington Mills gives 3,000 cubic feet of air space per operative, and the ventilating system furnishes 50 cubic feet of fresh air per minute per operative, the air being cooled in summer and warmed in winter. It will be observed that this mill furnishes 10 times the space and nearly double the amount of fresh air required by law for the public-school children of the State. A recent report of a State medical inspector of Massachusetts declared that it was a fact beyond question that the hygienic conditions in many Massachusetts mills are better than those in any schoolhouse in the State, and I venture the statement. without qualification, that the average cotton mill in New England furnishes more fresh air per individual, and of a better quality, than is supplied to the Senate Chamber of the United States It is fashionable for the claim to be made that a textile mill is an unhealthy place for men and women to work in, while the fact is that many mills are more hygienic than the homes of some men who are indulging in criticism and denunciation of the textile situation in New England. A well-informed Massachusetts man recently said to me that there is no doubt in his mind that the healthiest place that the mill operatives are ever in are the mills themselves, and he ventured the suggestion that it would be well if the agitators took up the subject of improving the conditions outside of the mills, endeavoring to bring them somewhere near to the quality of those in the mills.

I assert, without fear of successful contradiction, that the hygienic conditions which prevail in the textile mills of New England are in marked and gratifying contrast with those

which prevail in the Bureau of Engraving and Printing, the Bureau of Pensions, the Census Office, and other places which might be cited in the city of Washington.

EXCESSIVE DEATH RATE OF CHILDREN.

My colleague also called attention to the fact that there is a very large death rate of children under 5 years of age in textile cities. That is undoubtedly true in some cases, but I can not see how the manufacturers can be held responsible for it. It is barely possible that the sanitation and water supply of these cities may have something to do with the high death rate; and, again, it is an undeniable fact that in these communities some of the working people themselves are largely responsible for the condition of health which prevails among the children. They are largely foreigners, coming recently from southern Europe, and bringing with them the insanitary and careless conditions that prevail in those countries. they receive wages that would enable them to live comfortably, in some cases they herd together, eat poor food, and neglect all the laws of health, their sole purpose being to accumulate enough money to enable them to return to their own country and live in comparative luxury. Thousands of them accomplish this.

When the Balkan War broke out hundreds of Greeks in New England had no difficulty in drawing from the savings banks a sufficient amount of money to enable them to return to their native land and fight for their Government. The extent to which the laws of life and health are violated by some of these people is appalling, and certainly their employers ought not to be held responsible for that condition, the fact being that in many cases the mill owners are doing everything possible to mitigate such conditions. For instance, according to statistics furnished by the Manchester (N. H.) Daily Mirror, in that city, containing a population of about 75,000, a single corporation, the Amoskeag Manufacturing Co., a mill where strikes are unknown, employing 15,000 men and women, with a weekly pay roll of approximately \$150,000, has established a playground for the children, supplies free physicians, dentists, and visiting nurses, has established lecture courses, is teaching them domestic science, and is giving free house lots for homes for operatives. In addition, it is in contemplation to build a clubhouse for the workers in that textile mill. The corporation has built many houses for which operatives pay a comparatively small rental, which houses are sanitary in every respect, many of them containing bathrooms and other modern improvements. The "reeking tenements" that my colleague talked about are not to be found in that city, certainly not unless the workingmen themselves choose to live in violation of the well-known laws of health, and I have found nothing to warrant the suggestion of my colleague that possibly New England would be better off if these industrial cities did not exist.

The charge that the women are sickly is equally wide of the mark, for no healthier or more robust women can be found anywhere than those that are employed in the textile mills of Man-

Mr. President, I am fortunate in having corroborative evidence of what I have said concerning the great textile city of The Hon. EUGENE E. REED, Democratic Repre-Manchester. sentative in Congress from the first New Hampshire district, and mayor of the city of Manchester for eight successive years, in an interview a few days ago, gave testimony as to the condi-tions in that city. Mr. Reed, after disclaiming any purpose of entering into a personal controversy with my colleague, said:

entering into a personal controversy with my colleague, said:

The queen city of Manchester is not a blot on the map, but is absolutely the reverse. It is the finest city of its class and character on the American Continent. There is no other manufacturing city with so many good homes as can be found in Manchester. Slum districts there are unknown. It is a home-owning and a home-loving city. There is not a manufacturing city in the country where the people are so well cared for and so contented as in Manchester, and where so much is done by their employers and the city itself to protect the health and prosperity of the employees. I do not know nor care what Senator Hollis may have said. I am speaking from my personal experience. I am a Manchester man, and am interested in every phase of its welfare, and shall give it my honest and conscientious service at all times. The conditions there in no way bear out the statements as quoted from the speech of Senator Hollis.

## A STRIKING ILLUSTRATION.

As an illustration of the prosperous condition of the textile workers in Manchester may be cited the fact that the deposits in the savings banks of that city are \$33,714,000, of which amount a careful estimate credits \$9,873,450 to the working people. Those employed in the mills have also a large amount invested in building and loan associations, and according to the records in the office of the board of assessors, 773 employees of the Amoskeag Manufacturing Co. own real estate in the city assessed at more than \$2,000,000. To illustrate the amicable relations existing between the corporation and their employees

it is interesting to know that there has been organized among the workers in that great mill a textile club, which has for its general object the improvement of the relations between the operatives and the management. This club now has a membership of about 1,200 men and 400 women. It endeavors to promote in every legitimate way clean and healthy outdoor sports, and during the summer months has established a camp for boys. children's gardens, and has constructed the finest baseball park in any city of New England outside of Boston. supervision of the children's playgrounds. It is intended that during the winter months stereopticon lectures and other instructive amusements will be provided for its members. It may be that my colleague wants to see that great mill put out of commission, but my impression is that sober second thought will lead him to a different conclusion.

## MORTALITY IN NEW HAMPSHIRE CITIES.

It is especially interesting to note the fact that the general mortality for New Hampshire cities, which includes the mortality of children under 5 years of age, is favorable to the textile communities. As an illustration, Concord, the capital of the State, where my colleague and I both reside, a residence city with practically no manufacturing industries, had in 1910 a death rate of 21.6; and in 1911, 20.1; while Manchester, Nashua, Dover, and Laconia, all of which are textile cities, had Nashua, Dover, and Laconia, an of which are textue cities, had death rates as follows: Manchester, 1910, 16.5; 1911, 18.2; Nashua, 1910, 17.7; 1911, 16.3; Dover, 1910, 17.8; 1911, 18.7; and Laconia, 1910, 18.3; 1911, 14.7; all considerably below the death rate of Concord. It will be observed that in some of these cities the average death rate has fallen, while in others it has risen; but no one of them shows as large a death rate as Concord, where manufacturing is almost entirely unknown. It is proper that I should say that the death rate of Concord is somewhat augmented by the abnormal death rate in one of the State institutions located in that city.

#### MORTALITY STATISTICS FOR MASSACHUSETTS.

Turning to the State of Massachusetts, which is the most distinctively textile State of New England or the Union, leading in both cotton and woolen manufactures, the following facts appear: The four chief textile manufacturing centers of this State are Fall River, Lowell, New Bedford, and Lawrence. These are all populous communities in which, as in other industrial centers of New England and the country, a large proportion of the people are of foreign birth.

It is true, of course, that the rate of mortality is greater in these densely inhabited cities than it is in most of the country towns and somewhat larger than the rate of mortality in the State at large, which was 15.42 per 1,000 in 1911. In that same year the death rate in the textile city of Fall River was 17.5 per 1,000, in the textile city of Lowell 17.7 per 1,000, in the textile city of New Bedford 17 per 1,000, and in the textile city of Lawrence, which has been pictured as a horrible example of destitution and suffering, the death rate was 16 per 1,000, only a fraction above the average death rate in the State. in that same year, 1911, the death rate in the nontextile seaport of Boston was 17.1 per 1,000, and in the seaport of Salem 16.7 per 1,000. In Chelsea, a commercial city on the shore of Boston Harbor, the death rate was 19.3 in the same year, being 3.3 higher than the death rate in Lawrence. These figures compare densely populated textile communities with densely populated nontextile communities, and they go far to disprove the assertion that any particularly high mortality attaches to textile manufacturing. These are the records of the Forty-third Annual Report of the State Board of Health of Massachusetts, published in 1912.

#### TUBERCULOSIS.

If there is any malady that might be assumed to be peculiar to textile communities it is tuberculosis. But the mortality from this disease in the four chief textile centers of Massachusetts, taken as a whole, is lower than in the State at large. The sixty-first annual report of births, marriages, and deaths in Massachusetts states that the mortality from tuberculosis in the whole Commonwealth in the year 1910 was 1.3 per thousand, this figure including, of course, a very large number of agricultural, thinly populated towns. But in the same year the same authority states that the death rate from tuberculosis in Fall authority states that the death rate from the roulosis in Fall River, a textile city, was 1.3 per thousand, the same rate as in the State at large, while the tuberculosis death rate in New Bedford, Lowell, and Lawrence, all textile cities, was only 1.1 per thousand. In these textile centers a great majority of the working population are employed in the cotton and woolen mills, and it is a most remarkable fact, as shown by these official figures, that textile workers as a whole suffer less from tuberculosis than do the people of Massachusetts in general. PNEUMONIA.

In an article from Collier's Weekly, which the Senator from South Carolina [Mr. SMITH] had read into the Congressional RECORD on Monday, August 25, the statement was made that in view of the conditions existing in the textile cities a high death rate resulted, especially in diseases such as pneumonia. It has been shown that the death rate from tuberculosis in the textile cities of Massachusetts is even less than the general death rate for the State. It will now be interesting to observe that the report of the Bureau of the Census for 1911 shows that the death rate from pneumonia in Massachusetts was 1.6 per thousand, while in Fall River the rate was 1.9, New Bedford 1.8, Lowell 1.4, Lawrence 1.9, Manchester 1.8, and Boston 2. From this it will be seen that in Lowell the death rate was lower than in the State at large, while all the textile cities mentioned had death rates from pneumonia below that of the nontextile city of Boston and but slightly above the rate for the This illustrates the loose and unwarranted methods that are being employed to bring opprobrium upon the textile cities and utterly refutes the statement in Collier's Weekly, quoted with such gusto by the Senator from South

Since the city of Lawrence has been held up to particular opprobrium because of a recent violent strike there, inaugurated and fomented by those anarchistic agitators, the Industrial Workers of the World, it may be well to note that the death rate in Lawrence has steadily receded from 19.6 in 1905 to 17.7 in 1910 and to 16 in 1911. The records of vital statistics in Massachusetts are known to be kept with scrupulous care and go far more closely into detail than do the records even of neighboring New England States. These exact official facts, furnished year after year, utterly refute the contention of the political foes of New England textile manufacturing so far as the question of health is concentration. tion of health is concerned.

In refutation of the doleful picture that my colleague painted of the conditions existing in the industrial cities of New England it is only necessary to quote a few figures. As has been said, the city of Lawrence is particularly held up to criticism and denunciation and the effort is made to prove that the laboring people of that city are oppressed beyond the point of endurance. To a question addressed to Hon. Michael A. Scanlon, Democratic mayor of Lawrence, under date of August 14, the following reply was received:

following reply was received:

The population of Lawrence, according to the 1910 census, was \$5,892.

There is about \$22,000,000 deposited in three savings banks and in the savings departments of three trust companies. Nearly all of this amount is the property of working people in Lawrence and its suburbs, Very few people other than working people in Lawrence or its suburbs deposit in savings banks, because the amount of a deposit is limited to \$1,600 and its accumulations up to \$1,600. Those having larger return, the savings banks paying 4 per cent, and consequently nearly all the money in savings banks in Lawrence is the property of working people.

people.

Lawrence has a valuation of \$78,755,253. Of this amount \$37,524,900 is real estate owned by residents. The remainder represents the holdings of large mill corporations, nonresidents, etc., with the exception of \$10,025,325 in personal property owned by residents, The greater part of this \$47,000,000 real and personal property is owned by working people.

Now, let us look at certain other Massachusetts cities. city of New Bedford, long one of the great industrial cities of Massachusetts, with a population of 96,000, has \$28,382,945 deposited in savings banks, almost wholly the accumulation of the people who work in the mills and factories of that city.

One of the most striking illustrations of the prosperity of a New England industrial city is furnished in the case of Worcester, Mass., a city of 146,000. The deposits in the savings banks within that city amount to \$70,000,000, and outside of the city there are deposited \$40,000,000 by the people of Worcester, making a total of \$110,000,000. In cooperative banks and loan associations \$4,600,000 are deposited. I am reliably informed that most of this money belongs to the working people of Worcester. Under the laws of Massachusetts no one person can deposit in the savings banks more than \$1,000, which can not be increased above \$1,000 by the addition of dividends. It is also estimated that the working people have invested in real estate and first mortgages, in and out of the city, approximately \$90,000,000, which, so far as can be ascertained, makes the working people of Worcester the richest working people per capita on the face of the earth, amounting to \$1,400 for every man, woman, and child. All of this money, with the exception of some \$40,000,000, has been accumulated within the last 20 years. Worcester is a city of varying industries, almost every possible species of manufacturing being found there, including textiles to a large extent. It does not require any stretch of the imagination to conclude that if under the operations of the pending bill these industries

are halted the working people will suffer a tremendous loss, and beyond a doubt will be compelled to withdraw more or less of their deposits from the savings banks and use them to secure the necessaries of life. Does any man in public life seriously want to halt the prosperity of these textile cities? Time will

A COMPARISON.

Mr. President, Robert Burns was a philosopher as well as a poet. It will be remembered that on a certain memorable occasion he was moved to write the stanza:

Oh, wad some power the giftie gie us To see oursel's as ithers see us! It wad frae monle a blunder free us An' foolish notion.

If our Democratic friends had only had the gift to see themselves as the country is now seeing them and the wisdom to appreciate the fact that the legislation they are engaged in will of necessity do harm to all classes of our people, the bill now under consideration would never have been prepared.

It will be recalled that Gen. Grant is credited with the wise remark that "You can always trust the Democratic Party to make a mistake at the right time," and what is occurring today is a fresh illustration of the correctness of Gen. Grant's observation. It is a monumental blunder, the magnitude of which can not be overestimated.

It can well be imagined how, when the crash comes and the people of the country have risen in their might to overthrow the Democratic Party because of this legislation, the Senator from North Carolina [Mr. Simmons], the Senator from Mississippi [Mr. Williams], the Senator from Missouri [Mr. Stone], the Senator from New Hampshire [Mr. Hollis], and their associates on the Democratic side of this Chamber will see the unwisdom of what they are now doing; but in view of the circumstance that they will be responsible for the destruction of American industries and the lessening of the demand for American labor, they will find little comfort in contemplating the fact that the result was due to their party's political blindness and

Mr. President, it is a matter of regret to me that I have felt compelled to detain the Senate for so long a time in the discussion of this question, but it has seemed necessary for a proper understanding of the situation that certain facts should be frankly and fairly placed before the American Congress and the American people. I am not an alarmist in any sense of the word, but I can not bring my mind to any other conclusion than that the contemplated legislation will inevitably bring disaster to the industries of the entire country, and especially to those of New England, with suffering and sorrow as a necessary result, and I would be doing myself an injustice did I not sound a warning note. But, Mr. President, the die is cast. A Democratic President, a Democratic Congress, and a Democratic caucus have ordained that the bill shall become a law, and while it does not represent the honest convictions of a majority of the American people, it is to be forced upon the country by the representatives of a political party that has always stood in opposition to the protective doctrines of the Republican The triumph will be complete, but it will be short lived, and those of us who contemplate with solicitude the result of the legislation can find satisfaction and comfort in the belief that the Government will soon again be placed in the hands of the party of protection, and that this statute will in due time be superseded by a law that will adequately protect our people from the cheap labor of European and Asiatic countries.

Mr. HOLLIS. Mr. President, I confess that I have always Mr. HOLLIS. Mr. President, I confess that I have always admired the speech that my colleague [Mr. Gallinger] has favored us with to-day. It has the flavor of childhood associations, the taste of "the old oaken bucket," and the fragrance of "the last rose of summer." One thing only is lacking, and that is the waving of "the bloody shirt." When I first heard that speech I was a small boy in knickerbockers, and "the bloody shirt" was the most important thing in it, but it then, as now, bristled with figures, sayings banks deposits, statistics of nonubristled with figures, savings-banks deposits, statistics of population, and all sorts of things that sounded good. It had the smell of the flesh pots about it and the glitter of coin and benevolence and prosperity, and the poor workingman who sat there and heard it, thinking of the 10 children he had to support on a dollar a day, went home to wind up his alarm clock and think how happy he was to live under such a Government.

This has all been thrashed out, Mr. President, in the State of New Hampshire. My distinguished colleague has not been there on the stump very much of recent years. Perhaps he did not represent exactly what the managers of the Republican Party have represented in the last few years, for Mr. Winston Churchill and Gov. Robert Bass have managed the Republican

Party for some time now. And if this speech was heard at all on the stump when they controlled the reins of the Re-publican Party it was heard in some populous center like Swanzey, Crawfords Notch, or Harts Location. But if it was made, Mr. President, I assure you it rang with all the benevolence, patriotism, and protection that it has rung with here to-day.

I said nothing in my speech the other day about the city I did not mention it, but immediately my of Manchester. friends, the Republicans, get up and say, "Hollis is abusing Manchester again." I do not dare to abuse Manchester very much because I have to go through it when I go to my own home, and during my last campaign I was notified by telephone that if I made another speech in Manchester I should be arrested. I do not know whether my prerogative as a Sena-tor would save me from that, but I am afraid I might be arrested just as they arrested the workingmen who were not permitted to hold a meeting to see whether or not they would

My distinguished colleague and his friends are very glad to say on all occasions that I am the defender of Mr. Ettor and Mr. Haywood. Mr. President, I have never defended them for one single moment in all my life. I have merely said that their opponents, the cotton-mill managers, were just as bad as they were, and sometimes even worse.

The Senator, I But this Manchester issue has come up. am sure, does not expect to be returned to the Senate. In what he said to-day I can read his conviction that he can not be, because he is beginning to abuse his own home city and say that they have there a higher death rate than they have in the mill towns of Massachusetts. No man can afford to do A man must stand by his home town, and I am going to

stand by mine.

The figures furnished the distinguished Senator came from a man named Topping, who is a newspaper correspondent, and who wrote the article in the Mirror from which the Senator read. The article was sent to the Senator, and I was notified I have investigated the death rate of the city of Concord, and I find that in our insane asylum, where they bring practically all of the insane in the State, there are 140 deaths a year, and Mr. Topping made up his death rate by including all those insane persons. The latest available report of the city of Concord gives the death rate, excluding the insane patients who came from elsewhere, at only 15.45 per thousand-away below the death rate of Manchester and the other mill cities.

I did not suggest that Manchester or Lawrence or any other city had a large death rate, Mr. President. I merely called attention to the undoubted fact that the death rate among children 5 years old and under is greater in the mill cities of New England than anywhere else in the country, and that, too, in a most salubrious climate. My distinguished colleague does not deny that; he can not deny it; the figures show it. I threw that much out for what it was worth; but I see I am obliged to fol-

low it up in order to maintain myself.

For some reason the attention of the Government has been called to the mill cities of New England, and they have had for several years a man up there investigating. That man is a graduate of Harvard College and of the Harvard Medical School, and he is an expert. He has made a report in which he

Cotton-mill work was selected for special investigation because it employs a larger number of women and children than any other industry, because it exhibits a deplorably high female death rate, and because it, more frequently perhaps than any other large industry, subjects its workers to inhalation of irritant vegetable dust, which in the underfed and overworked is especially conducive to bronchitic, asthmatic, and tuberculously infectious pulmonary diseases.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from New Hampshire yield to his colleague?

Mr. HOLLIS. I yield. Mr. GALLINGER. I do not wish to disturb my colleague. He always interests me. But my colleague will note the fact that the general death rate includes the death rate of children under 5 years of age; yet the textile city of Lawrence, Mass., so much berated, has a death rate of only 16, including children under 5 years of age, while the city of Concord, the home town of my colleague and myself, where people go to educate their children, excluding the institution to which both my colleague and I called attention, has a death rate of 15 and a fraction, almost as much as Lawrence, and applying the average death rate to the State institution the rate will be greater than

Mr. HOLLIS. I shall not argue on what I may have to think up on the spur of the moment, but I shall continue to read from this Government report, which no one will attack as being in-

correct.

Dr. Perry says:

Dr. Perry says:

II. In the age groups within which operatives and nonoperatives are fairly comparable, female operatives have a decidedly higher death rate than nonoperatives. This is most marked in respect to tuberculosis, the death rate of female operatives from this cause being, in general, more than twice that of nonoperatives, and in some of the race and age groups running up to many times as high. Thus, in the age groups 15 to 24 years, 25 to 34 years, and 35 to 44 years the death rates from tuberculosis per 1,000 were, respectively, two and one-fourth times, two and one-half times, and five times those among women of the same age groups outside the cotton industry.

III. An examination of different factors which might affect the death rate, especially from tuberculosis, such as native or foreign birth, tuberculous kindred or intimates, overcrowding, sanitary condition of homes, etc., fails to show any such massing of unfortunate conditions among the female operatives as would explain their unvaryingly higher death rate.

among the female operatives as would explain their unvaryingly logated death rate.

Hence it seems impossible to escape the conclusion that operative work is prejudicial to the health of females, that the combination of operative work with matrimony is especially harmful, and that, while the general hazard of the female operative is greater than that of the nonoperative, she is in most danger from tuberculosis. Whether the harmful effects of operative work are greater than those of other industrial employments, and whether they inhere in cotton textile work as a whole or are due to certain occupations carried on within the mills, are questions for further investigations to answer. This has established the fact of the high mortality among female cotton operatives and of their special susceptibility to tuberculosis.

Mr. President, the Amoskeag Manufacturing Co. has been injected into this debate, but not by me; and I wish to say a

little more about that delightful institution.

In the first place, it_seems that they have established a school to teach cooking; and I think it is very necessary when they pay, on the average, only seven or eight dollars a week. If I had to support a family on that wage, I should certainly want

to know all that science could teach me.

The Amoskeag Manufacturing Co. is very clever. large dividends, it pays low wages, and it is a good advertiser. The playground that my benevolent colleague speaks so carefully about is stuck right down beside the Boston & Maine Railroad, where everyone can see it, with a big sign upon it, saying "Amoskeag Manufacturing Company Playground." I have been past the playground hundreds of times, and I have never seen more than 10 little children in there at a time. They have bought a baseball park, and they advertise in other ways. They have a hospital, but instead of having it in a healthy spot, they have put it right beside the railroad, with a sign upon it, so that people can see it. And so they spend a small fraction of 1 per cent to advertise their benevolence to the State of New Eampshire, while the Government of the United States has spent over \$150,000 to educate my distinguished colleague in the Senate so that he can get up and promote that gospel.

Now, coming to the Amoskeag Manufacturing Co. and its sanitary adjuncts, about which the Senator has told us, this article appeared in the Manchester Mirror, the one from which my colleague has read, and it aroused the ire of certain good people in Manchester. One of them, Dr. Noel E. Guillet, a very prominent physician in Manchester, wrote a letter, which was printed, in reply. He speaks of his own knowledge. He

The Mirror does not criticize Senator Hollis's speech from a tariff point of view, but tries, for political capital, to show, by all kinds of misrepresentations, that Senator Hollis has insuited the working people, and when the Mirror attempts to do that it is losing its pains and its ink, because all classes of working people know well, by long years of experience, that Senator Hollis is among the best champions of their cause.

Now, how utterly silly it would be for me to take the attitude of insulting the working people of Manchester, when they are the very people who have always supported me and who have always voted for me and on whose support I depend. Far from insulting them, I should like to see them get the wages that the rest of the people of the United States turn over in the price of cotton cloth, so that they may go to these workingmen.

Dr. Guillet continues:

Now, Mr. Editor, I wish the Mirror would send the reporter-

That is our friend Topping, who was the private secretary of Congressman Sulloway until Congressman Sulloway was defeated in the last campaign—

feated in the last campaign—

Now, Mr. Editor, I wish the Mirrer would send the reporter who visited that boarding house, so immaculately kept, with a menu that would do honor to the Copley Square, of Boston, and all that for \$3 per week, a little farther north to those corporation buildings owned by the Amoskeag, right next to Elm Street, between Bridge and Dean. There he would find not one but a bundred tenements, one and a half story, old wooden shantles, with plumbing unknown to them, no modern service, but common, old-time vaults.

If the gentleman from the Mirror would take a trip around those vaults on a hot summer day with his olfactory appendage wide open, he would see and his nose would tell him that he himself has insulted the common people by his sarcastic article, and that the articles printed in the Mirror July 21 and 22, 1900, during the house-to-house inspection would be more appropriate.

There are one or two hundred more Amoskeag tenements connected with water-closets in unheated sheds. In cold days the water freezes, thereby becoming a nuisance a great part of the winter. That such a

condition should exist in the thickest portion of our city for over 40 years is doubtless because the owner, a powerful corporation, has a strong hold on our local board of health as well as on other boards.

I believe, Mr. Editor, that to find the real condition that exists among our laboring people one should not go only to the corporation counting room and the banking counter, but take the pains to visit the county commissioner, the overseer of the poor, the hospital wards, look into the grocer's and doctor's books, and perhaps also into the books of some of these prosperous merchants.

For experience years, the even complexed by the State of Nave

For several years I have been employed by the State of New Hampshire, under a Republican administration, to prosecute these mills for violating the law. Why they came to me, a Democrat, I do not care to state. It may not be because they could not find a Republican lawyer who dared to attack these great corporations, but it has been my business to do the work. I have had detectives in the mills. I have had hundreds of pictures of little children at work in the mills, doing a man's work, below the legal age. I have prosecuted them in the courts, and I have had the various experiences that I described in my speech the other day. I repeat that I do not want any harm to come to these corporations; but I still say that there is no reason why they should have any special favors at the hands of the Democratic Party.

Mr. President, in this speech, which I have always admired, as I admit, which has so much that it is pleasant to hear, my genial colleague always goes back to the time of Washington and Madison. He then comes down, and wherever there are hard times he shows that either before or after them we have had a Democratic tariff bill. I am glad to say that the Democratic Party has been in power so much in this country that it is very difficult to get far away from the time-when it was in power. But Washington, Madison, and Monroe would look with amazement at a bill such as this, which carries as high an average rate as 26.67 per cent. That is a high rate—higher than those gentlemen ever saw or ever contemplated.

My colleague says that under the Walker tariff they did not

raise enough revenue, and therefore they could not pay their bills. That is no reflection on the theory of the revenue tariff. If you do not get your rates high enough, you can not raise enough revenue; and the Democratic administration, even before President Buchanan left his seat, had corrected that error in the computation.

President Wilson's words, so eloquent and so true, and read with so much gusto by my distinguished friend, were uttered of the period in 1893, one year before the Wilson tariff bill was passed. My colleague knows that well, but he always forgets to state it.

My colleague finds fault with me because I say that New Hampshire bids me speak for her. This matter has all been thrashed out on the stump in New Hampshire. True, we have not heard my genial colleague as many times lately as we should have liked to hear him, but we know just what he would say if he were talking. If he had been on the stump, he would have known that I have been for the last four campaigns denouncing the protective tariff as a fraud and a delusion; that I have been denouncing the manufacturers who steal the wages that are contributed for the workingmen in the mills, and it is on that issue that I was elected.

I was not elected by any combination of Democrats with Bull Moosers. Not a single Bull Mooser voted for me. I was elected by some 204 Democrats plus about 8 Republicans, and they voted for me because they believed in the principles for which I stood.

The good Senator, so far as I know, has never gone to the people in New Hampshire since he was elected to Congress, away back before I left school. I hope he will run again during the next campaign; and if so, we can find out whether his premises are true and whether mine are wrong.

But I wish to call the attention of the Senator, when he says we are a minority party, to the fact that it was this very high protective tariff that divided the Senators who sit on the other side. That was where the great debate was, in 1909, between men like Senator Dolliver, Senator LA FOLLETTE, and Senator Bristow on the other side and the standpatters on the same side. It was the high protective tariff that they say they stand for to-day that split their party hopelessly so recently in the

In making his speech my colleague has always referred in glowing terms to the savings-banks deposits, thereby arguing that American wages are high. To-day he cites Manchester, with its 70,000 people, with deposits in the savings banks belonging to the working people of \$13,000,000. Our little city of Concord has only 20,000 people. It has practically no manufacturing. Yet in a single savings bank we have assets of almost \$12,000,000-almost as much as the working people have in all the banks of a city three and a half times as large.

I shall not take up the time of the Senate further on this part of the debate. It has been gone over and over and over. The people of New Hampshire knew the fight was pending. They knew what the issue was. I did not sneak into the Senate by stealth. I did not come in on a midnight assault. I came in in broad daylight, at high noon, on the arm of my distinguished colleague, at the end of a long and bitter senatorial fight, with flags flying and drums beating. I had declared my ideas of the tariff to the people of New Hampshire, and I was constantly I had declared my ideas of the misrepresented by the papers.

My colleague has claimed that I stated that I believed the Amoskeag Manufacturing Co. should be demolished-"Amoskeaga est delenda." Mr. President, I have never made any such I would be foolish to make the statement. statement. hoped and prayed over the poor sinner, hoping that it might reform and give to the working people some of the benevolence which it arrogates to itself.

No, Mr. President; the issue was squarely drawn, and the best answer to the speech delivered here to-day by my honorable colleague is my very presence in the Senate of the United States.

Mr. GALLINGER. Mr. President, I have been charmed while listening to this "impromptu" speech that my colleague, to my knowledge, has been working over for four or five days

I need not even refer to the suggestion that my colleague has made, of a rather offensive nature, concerning my future participation in the political campaigns in New Hampshire. attitude on public questions has been well known at home and is well known here. I never have had occasion to apologize for what I have believed or for what I have said, and I do not propose to do so now.

My colleague's suggestion that I have put myself in an attitude where, of course, I will not dare to run for another term in the Senate is gratuitous. He has no authority whatever for in the Senate is gratuitous. He has no authority whatever for saying that. As I said the other day, I will go out of the Senate voluntarily, if I conclude to go in that way, or my people may put me out if they think it wise to do so; but I will not go out because of any suggestion from any Democrat in the State. On the contrary, I shall be in the hands of my political friends, with whom I have labored, for good or for bad, lo! these many years.

Mr. President, I am not going to continue this debate, because I know we ought to take up the items not yet agreed upon in the tariff bill. The figures I have given in reference to the death rate can be verified by an examination of the census reports on mortality statistics. My colleague repeats the assertion that there is an unusually high death rate from tuberculosis among the women in the mills. Yet that is not reflected in the general death rate as we find it recorded in the official figures to which I have called the attention of the Senate. If there is an abnormally high death rate among the women, there must be an unusually low death rate among the men and children; so we will let that go for what it is worth.

I do not care to enter into a discussion as to how my colleague got into the Senate. He is a good fighter. He was a Democrat—and an aggressive, militant Democrat—when the Democratic Party was hopelessly in the minority in New Hampshire. He carried the banner down to defeat time after time, and finally he achieved victory by the aid of some Republicans in the legislature-men elected on the Republican ticket. do not know whether they have all had their reward as yet, know some of them have had their reward.

Mr. President, we will let this matter go as it is. If what I have said is not worthy the attention of the Senate or the country, the Senate and the country will judge of it. If it is ancient history, I will merely suggest that it is wise for us sometimes to turn back the pages and glean lessons from the past. What I have said I have said from the book, and it can not be gainsaid. It will stand in the records of the Government as a contribution to this discussion, which will be helpful or harmful according as the people look at it.

Mr. President, my future, so far as politics is concerned, is of very little account. I am concerned for my State more than for myself, and I now give notice to my amiable and militant Democratic colleague that in the next political campaign, if I am alive, we will fight this out before the people of New Hampshire, whether I am a candidate for reelection or not, and the result will determine whether I speak wisely and truthfully to-day or whether my colleague speaks words of truth and wisdom.

Mr. THOMPSON. Mr. President, as I proceed with my remarks I prefer not to be interrupted. When I have concluded, if any Senator desires to ask any question I will take pleasure in answering it.

It is not my purpose, Mr. President, to discuss in detail the various schedules of the tariff bill or any one schedule in particular. I simply desire to discuss in a general way the tariff question as presented by the bill under consideration in order

that my vote may be fully understood.

My views on this question have, perhaps, been more often misrepresented by the opposition press of my State than those of any other Senator. The Republican and Progressive papers, without the slightest foundation or authority, were quick to assume and boldly announce to the public that because I reside at Garden City, where we have the only sugar refinery in the State, I would vote against the clause in the bill providing for free sugar after three years, and would eventually vote against the entire bill if it included this provision. The Republican press seem unable to get over the idea that every Senator must be guided only by local conditions.

These misrepresentations were so general that my constituents became somewhat alarmed as to my position and, contrary to my usual custom, I felt it necessary to give the following state-

ment to the press:

False statements, having no foundation whatever, are being published to the effect that I expect to vote against the Underwood bill because of the sugar schedule.

I have never intimated to anyone that I would vote against the bill, and have never had any such intention. There is no substantial difference between President Wilson and myself on the tariff, and certainly not enough difference on any schedule to justify any person in the belief that I would vote against the bill. The questions presented are national—not local—and will be so regarded by me.

There is so much good and so little bad in the bill that I do not believe any Democrat would be justified in voting against it, simply because it may not meet his personal views or the wishes of his immediate constituency in a few schedules.

I have always stood for a material reduction of the tariff, on sugar as well as all other necessaries of life, and I favor free sugar when it can be obtained without serious injury to the industry and the price of sugar to the consumer can be lowered thereby.

I am not influenced simply by what is best for the people and the industry at my home city and county, but by what is best for the industry and the people generally throughout the United States. The only difference between President Wilson and myself on this question arose simply over the consideration of the length of time a satisfactory condition can be brought about considering the welfare of the industry as well as the benefits to the people as a whole to be derived from ultimate free sugar.

To meet my views I introduced in the Democratic conference an amendment to the sugar clause proposing to adopt the sliding scale of the pending bill up to 1916, and thereafter to reduce the duty 25 per cent each year until free trade in

sugar was reached.

The reason for the misrepresentations on the part of the press and the erroneous impression received therefrom by the public was, no doubt, because of the way tariff bills have heretofore been drafted. The tariff question has formerly been regarded by most people as merely a "local issue" and not of national character or importance. While all of the property I have in the world, and the best friends I have on earth are located in the sugar section of my State, and many of my close personal friends are engaged or interested in this particular business, yet I must, in the performance of my official duty, consider the question from a State-wide and Nation-wide standpoint. I must, as a Senator, disregard my personal interest and the wishes of my personal friends where they conflict with the public interest. The question is, Will free sugar eventually be of benefit or of injury to the majority of the people of my State and of the Nation? It is admitted by the opposition that free sugar will necessarily lower the price of sugar to the consumer.

There are not more than 1,000 people in Kansas directly interested in the raising of sugar beets or interested in the refining of sugar, while, on the other hand, there are about 1,700,000 people who have no interest whatever in the business

and who must purchase sugar.

The present tariff rate on sugar is about 33 per cent of its value, or practically one-fourth of the retail cost is made up by the tariff. It is estimated that every person in the United States consumes about 80 pounds of sugar per year. The average price of sugar is about 5 cents per pound, making the total cost to each person about \$4 a year. The people of Kansas pay out about \$6,800,000 for sugar under the present tariff and prices each year. Free sugar would therefore result in a saving to the people of my State in one year of about one-fourth of this amount, or \$1,700,000, which would be a saving of more than the entire cost of the Garden City factory to the whole people of the State each and every year.

This is the first tariff bill drafted since the Civil War which bas disregarded the local-interest proposition. While it has been charged that the bill has been drafted in the interest of the southern people and of the eastern manufacturer, yet a close inspection of the bill, with full information as to how bills of this character must necessarily be drawn, will convince any reasonable person that there is no truth in this charge. The main idea throughout the bill has been to place the necessaries of life on the free list, regardless of where they are raised or produced, in order to secure the greatest benefits for all the people and to reduce the high cost of living, which has reached the highest point ever known in the history of this country.

Too often heretofore in the framing of tariff bills those favoring a tariff on wool traded their influence and votes to those favoring a tariff on cotton or some other article, and those favoring a tariff on sugar traded their influence and votes to those favoring a tariff on agricultural products or some other article. In other words, it was simply a case of "you scratch

my back and will scratch yours."

There was no real principle involved. All had the idea of protection, with a selfish motive on the part of each individual and the thought that everything was all right if each contending party received his share. We have now drawn a tariff bill where there has been no swapping of votes or interests and where no particular person or section sought to secure any advantage over any other. The Democratic Party has at last become great enough so that it can declare to the world that the tariff question is no longer merely a local issue, but that it is national in character and is simply a means to assist in raising revenue and is only tolerated for that necessary purpose.

We are fast discarding the idea that the Government must engage in commercialism or there will be no business in the country. It is no longer the business of the Government to undertake to see that certain classes of people are successful in business enterprises. It is no concern of the Government if these classes can not make a profit by the merits of their own goods and the economy in their production. Commercialism is

no longer a legitimate governmental function.

The only legitimate function of government is to insure equal privileges and opportunities for all in the business world and

to preserve peace and happiness to all its citizens.

There was a time when it was generally understood that the tariff tax was absolutely necessary in order for business enter-prise to succeed. But the sentiment and information of the people have changed in this respect. For 50 years the Democrats have advocated that the tariff is a tax which the consumers have advocated that the tarm is a tax which the constraint pay and that the schedules are outrageously high. The Republicans all these years denied this doctrine. They now frankly admit that they were wrong, but insist on making the revision of the tariff themselves.

This is like a man pleading guilty to a crime and then asking

pass sentence upon himself.

Knowing the kind of a tariff law PAYNE and Aldrich gave the country, it would certainly be a dangerous and expensive ex-periment to permit the Republicans to revise it. Ex-President Taft pronounced the Payne-Aldrich bill the best tariff bill ever enacted, although he at first expressed dissatisfaction with the measure. Speaker Clark pronounced it the worst tariff bill ever passed, because it is the highest. In his speeches, to illustrate this point, he told the following story:

This is exactly the trouble with the Payne-Aldrich tariff. While the pending bill may not fully meet the views of the progressive Republicans—if I may so refer to that branch of the Republican Party which believes in the reduction of the tariff-yet, as between the rates of the pending bill and the Payne-Aldrich bill, it seems to me they will have a hard time explaining to the people of the country if they fail to vote to put into law the pending bill in preference to continuing in force the iniquitous Payne-Aldrich law. It would seem that anyone honestly desiring and advocating a downward revision of the tariff would certainly be in favor of voting for a bill which everyone admits greatly reduces the rates. It would seem that they would gladly accept the pending bill, although not perfect, rather than to tolerate the evils of the present law and inflict the burdens thereof upon the people of this country for any

longer period than absolutely necessary.

It would seem also that the income-tax feature of the bill, which most progressive Republicans claim to favor, would especially appeal to them. A vote against this bill will be a vote

against the income tax. For more than 20 years the Democratic Party has advocated the income tax. About 20 years ago a Democratic Congress passed an income-tax law, which, after much litigation and various changing and shifting of views. was finally declared unconstitutional by the Supreme Court of the United States. It is certainly fitting that after so long a time the Democrats are again offered the opportunity of presenting to the country an income-tax law which is now fully fortified by the Constitution against judicial destruction. has taken all these years since that time to secure a constitutional amendment which would permit the levying of an income tax under the views expressed by the Supreme Court. certainly demonstrates the need of a shorter method and manner for changing the Constitution. This was one of the reasons why I introduced at this session a resolution providing for the amendment of the Constitution whenever a majority of both Houses deem it necessary and when ratified by a majority of the several States.

No better way for raising revenue for the Government can be devised than from the income of the citizens who by enjoying the protection of the laws of the country are enabled to acquire sufficient property, above a living, on which to make a levy. The greatest trouble with taxation has been in the fact that men of small property often pay the highest taxes in proportion to what they possess. By the present system of taxation the man with a large amount of property has been enabled to cover up much of his taxable property, while the man of limited means is unable to do so. No citizen should object to paying this kind of a tax. Every citizen should be happy to have an

income sufficient to require him to pay it.

This new system of taxation will shift the burden from the financially weak to the financially strong. Taxation in this manner upon those who are able to pay it ceases to be a burden. They can carry it so easily that it is not felt. A pound is a burden for a sick man to carry. A dollar is a burden for the poor to pay. But what is a dollar to the rich or a pound to the physically strong?

When the income tax is firmly established as a permanent law of this country it should be greatly improved and the amounts collected thereunder increased until most of the revenues of the country may be derived from this source. This

will in itself solve all tariff difficulties.

The Nation's greatest need, summed up in the language of Secretary Bryan, is:

The protection of the people from exploitation at the hands of predatory corporations.

This he explains to mean:

It touches the average man, it touches the public in three ways:
The tariff, the trusts, and the railroad question.
High tariff laws are a burden to the masses of the people for the benefit of the protected industries. Through high tariff rates enormous sums are extracted from the pockets of the producers of wealth and turned over to the beneficiaries of the protective system.

The trust question is the natural outgrowth of the tariff. Corporations combine and take advantage of the protection given by high tariff laws.

The Democratic Party offers a solution of these questions in the interest of the people as against the trusts and monopolies which have grown up under Republican rule, fast reducing the people to poverty, and threatening the very life of the Nation

The homes, the farms, the workshops, and the free public schools are the great pillars in the temple of American liberty and progress, and labor is the corner stone of the entire struc-A system of what might be called legalized robbery, through the iniquitous tariff and special-privilege legislation, has gradually grown up under continuous Republican rule, until many of the necessaries of life have gone beyond the financial reach of the man with average means. It has reached the point where many laboring men are unable to pay either the groceryman, the clothier, or his landlord without living half starved, half clothed, and half housed. The Republicans have always pretended to be the special friends of the laboring man, especially just before an election. Their wild effort to make the laboring man imagine that he has money in his pocket and diamonds in his shirt front, when he is compelled to wear overalls and go without a shirt, is ridiculous.

If the laboring men had been protected as the Republicans have promised, they would all be millionaires and need no pro-

We are also asked by Republicans to favor their high-protection scheme in order to promote "prosperity," forgetting and wanting others to forget that during President Roosevelt's administration, in 1907, we suffered one of the worst financial panies in the history of the country, when we could not even draw the little savings we had in the banks and were compelled to pay our debts with wrapping paper, shoestrings, chips, and whetstones. This panic occurred under the hight-tariff sys-The effects of this panic are still felt in the business But the Republicans are long on howling prosperity and giving us poverty. They have won more campaigns on this false issue than anything else in the last 25 years. They are still continuing to howl it in every speech they make upon the tariff. They are using every possible effort to keep alive this old, dead issue.

The people have ceased to be disturbed by calamity howlers. They have emphatically expressed a desire to be relieved from the burdens heaped upon them by Republican rule. They have tried the Republican ideas of the tariff for half a century and are glad to have the opportunity for a change.

A great political revolution has swept over the country in the last few years. The first change was in the election of 1910, when the Republican majority of 47 in the House of Representatives was turned into a Democratic majority of 66. It was the record that the Democrats made in the Sixty-first Congress that elected the Democratic House. It was their record which also elected at that time 7 Democratic United States Senators to take the place of Republicans and 6 Democratic governors to take the place of Republican governors.

The Democrats got together and stayed together, and their example at that time has been extended to Democracy every-where, and through this united effort great things have been accomplished. The Democrats are together now on the passage of this tariff bill and expect to remain so until it is a law upon the statute books. They have not been coerced by the President, as has been so frequently charged, by the use of patronage or by any other means. The question of patronage has never been mentioned by the President in connection with the vote of any Member of Congress on the tariff bill. No patronage has ever been given or withheld by the President because of the position of any Congressman upon any public question. charges by the opposition have not the slightest foundation and can not be substantiated. Such expressions come from the wildest imagination of the opposition and without the slightest No President has ever been freer from such abuse of power. The President's purposes are too lofty and pure for him to even waste thought on such paltry motives. It is true that the President, like every other patriotic citizen-and especially when charged with this specific duty-has insisted on the passage of this bill. A large majority of the people of the Nation are insisting upon the same thing. The sentiment is universal throughout the land. It has become crystallized. The people as a whole want the bill passed, and passed as speedily as possible. The Democratic Party having been intrusted by the people to perform this service for them are united in a patriotic effort to accomplish this purpose. This is the secret of the united Democracy. We know if we fail to carry out this obligation to the people, as the Republican Party failed to carry out its obligation to them four years ago, we will receive the same rebuke from the people at the polls as the Republican Party received at the last election.

What were the causes of this great political revolution? They are not difficult to discover. They can be expressed in

a few words.

The Republicans promised to revise the tariff downward, and when they got into power on that simple promise they revised it upward.

For this the people of the United States punished them at the polls in 1910, and more than doubled the dose again in 1912. Men running for office should say what they mean and mean what they say, and when they have been successful they ought punctually and scrupulously to carry out their promises. The people deserve to be treated fairly and honestly. This is exactly what the Democrats propose to do now. This is why they are a united body in the Senate and House to-day.

While the Republicans in 1908 did not specifically say that they would revise the tariff downward, they did say that they would "revise" the tariff, and it was understood by everyone that this of course meant downward. Those in charge of writing the platform did not want to say that they would revise it downward, because they did not intend to do so. They intended to revise it upward, but the people understood it to mean downward, and a great many Republicans understood it the same way; and before the end of the campaign the Republicans on the stump were everywhere so declaring. So I am justified in saying that they made that promise, and that on that promise they got into power, and that without the promise they could not have won the election. Being drunk with victory, they revised the tariff upward; and now, knowing what hap-pened to them for this betrayal of the people, they are trying

to compel the Democrats to do the same thing. Anybody can easily understand why they want us to make the same mis-

They had about a dozen mathematicians or experts to figure the rates of the Aldrich bill, and who actually claimed that there was the enormous reduction of one-tenth of 1 per cent. But the Democratic mathematicians or experts figured that there was an increase of 1.07 per cent, and the Treasury Department accepted the Democratic figures, and the people of the country did also. The people have grown tired of broken pledges and promises, and will punish by defeat that political party which tolerates it. The time has passed when any political party can promise one thing and then do another.

Some of our Republican friends charge that the Democrats want to destroy business. This is a preposterous proposition and a thing incredible. This is a Democratic country as well as a Republican country. The Democrats are engaged in business as well as the Republicans, and want to succeed financially the same as the Republicans. It is to better business conditions and not to injure them which the Democrats hope and expect from this tariff legislation. It is the purpose of the Democratic Party to pass such laws as will give every man engaged in a legitimate business an equal chance with every other man. We believe with Thomas Jefferson in equal and exact justice to all men, and in equal rights to all and special privileges to none; and we are not going to be driven from this position.

Under the present tariff system almost every manufactured article made in the United States is sold in a foreign country cheaper than it is sold to us at home. This is un-Democratic and un-American. The Republicans formerly denied this proposition, but finally their leaders were compelled to admit it.

Kansas is one of the leading wheat-producing States in the Union. We produced last year 91,450,000 bushels; and, regardless of the drought this year and the exaggerated statements of the eastern newspapers, the crop report of the United States, issued August 8, gave the winter-wheat crop of Kansas this year at 86,515,000 bushels. This is about 50 per cent more winter wheat than was raised in any other State shown by this report, although from the reports in the eastern newspapers it would seem that in Kansas "the sky was brass and the earth iron" and that there is no Kansas crop this year.

This year's crop of wheat grades at 92 per cent, showing

that the entire eighty-six and one-half million bushels of wheat raised in Kansas this year lacks only 8 per cent of being perfect in quality. Wheat is worth on an average of 80 cents a which brings to the Kansas farmer more bushel.

But the American binder that our farmers pay \$135 for after being shipped by the manufacturer 17,000 miles across the sea to Australia and away over to Russia and other far eastern countries sells at about \$80.

The price of every bushel of wheat on earth is practically fixed in Liverpool. So when the Kansas wheat raisers ship their wheat to Liverpool it is offered in competition with the Australian wheat raisers, the South American wheat raisers, the East Indian wheat raisers, and the Russian wheat raisers, who get their American-made farming implements one-third cheaper than the farmers of Kansas.

FARMER BENEFITED; NOT INJURED.

Great effort has been exerted on the part of the Republicans in an attempt to establish that the farmer has been specially singled out in this bill and discriminated against. Scarcely a Republican speaker has omitted to make this charge. It seems to have been agreed upon as the Republican method for attacking the bill. They seem to think that because they have fooled the farmer for so many years in the belief that he was being benefited by the tariff, which was simply given him in order that they might tax the things which he must necessarily use upon the farm, that they can continue to fool him and regain his confidence by trying to prejudice his mind against this tariff bill. They know that the large vote of the country comes from the farmer.

The facts will not warrant any such accusation, and the effects of the bill will soon prove to the farmer the untruthfulness of the charge. Having been fooled by the cry of "wolf" so many times before by the Republican Party, simply in order to get his vote, the farmer will be somewhat reluctant in giving serious thought to the cry this time.

The truth is he will receive greater benefits from this bill than any other class of citizens, and he will soon find it out. In short, he will get everything he eats and everything he wears and everything he uses upon his farm cheaper than before, and will receive as much for his products as he ever did.

Some of the many articles which he is ordinarily required to buy and will receive free of duty under this bill are as follows:

FARMERS' FREE LIST-THINGS THE FARMER BUYS.

Agricultural implements: Plows, tooth and disk harrows, headers, harvesters, reapers, agricultural drills and planters, mowers, horserakes, cultivators, thrashing machinery, wagons and carts, and all other agricultural implements of any kind and description, whether specifically mentioned herein or not, whether in whole or in parts, including repair parts.

Bagging and gunny cloth, Binding twine.

Bone-meal fertilizer,
Blankets

Blankets. Cream separators. Cement. Coal. Coal tar.

Coffee and tea,

Cocoa. Fruit trees for purposes of propagation.

Gloves,
Guano and manures,
Hones and whetstones.
Harness and saddles and saddlery.
Lumber: Poles, fence posts, handle bolts, shingle bolts, hubs, posts,
staves, wagon blocks, heading blocks, poards, planks, deals, laths, pickets, palings, shingles, broom handles, logs sawed, sided, or squared,
sawed boards, clapboards, and other lumber.
Nails: Cut nails and spikes, horseshoe nails, hobnails, wire staples,
wire nails, spikes; horse, mule, and ox shoes; tacks, brads, and sprigs.
Needles,
Oil cake.
Oils for lubrication.
Petroleum, including kerosene, benzine, naphtha, gasoline, paraffin.

Olis for lubrication.
Petroleum, including kerosene, benzine, naphtha, gasoline, paraffin, and paraffin oil.
Salt.
Seeds.
Seeds.
Sewing machines.
Sheep dip.
Tanning material.
Turpentine.
Tin.
Wax.
Wire: Barbed and galvanized wire for all passes of the formal paraffic.

Wire: Barbed and galvanized wire for all uses; wire for use in baling

The claim is still made that we should vote for a protective tariff to support the infant industries. There are no infant industries in this country any more. Some of these industries for which they claim protection are more than a hundred years old. A man becomes of age at 21 and a woman at 18, on the theory, no doubt, that a woman knows more at 18 than a man at 21. These industries have certainly become of age and able to stand alone. When a child has grown up until it has reached a size and age to be able to whip the old man, it is certainly time to wean it.

Who collects the tariff?

Did anyone ever see an officer around collecting it?

We know who collects our State and county taxes. We also know just how much we pay.

The merchants of the country collect the tariff. They do not want to do it, but are compelled to under the tariff system. It reduces their profits, depresses their business, and requires them to keep much more invested than they otherwise would. But the Government has fixed up a scheme which compels the merchant to collect the tariff, and he does not receive a cent for doing it, either. I have often thought that if we were to go into a store and buy a bill of goods and pay the merchant what the goods were worth without any tariff and then have a revenue collector call upon us to collect the tariff, the system would not last very long; and surely, when the people discovered that most of the tariff money collected went to the manufacturer instead of the Government, it would not be paid.

The Earl of Chatham-one of the best friends this country had during the Revolutionary period—once said that if the British administration were to add one shilling to the pound in direct taxes, it would create a revolution; but that there was a way by which you could tax the bread out of a man's mouth, the coat off his back, the bed from under him, and the roof from over his head if you would only do it in a way that he did not know it.

This is a fair illustration of the operation of the high protective tariff system, which the Democratic Party by this bill hopes and expects to destroy.

The Democratic Party has simply said to the tariff barons, "Thou shalt not steal!

These words were written on Mount Sinai by the hand of God on tablets of stone amidst a cloud of smoke and flashing lightnings, accompanied by roaring thunders, when the whole earth quaked.

These words are as sacred and vital to-day as when first written centuries ago. They form the principal ethos of modern political thought.

No political party can long endure without scrupulously following this injunction in all its official conduct.

Fletcher

Mr. ROOT obtained the floor.

Mr. O'GORMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from New York yield to his colleague?

Mr. ROOT. I do. Mr. O'GORMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Smith, Ga. Smith, Md. Smith, S. C. Ashurst Bacon Gallinger Norris O'Gorman Hollis Hughes Page Borah Brady Brandegee Bristow Penrose James Johnson Smoot Stephenson Perkins Jones Kenyon Pittman Poindexter Sterling Stone Sutherland Bryan Catron Kern La Follette Pomerene Ransdell Swanson La Follette
Lane
Lewis
Lippitt
Lodge
McCumber
McLean
Martin, Va.
Martine, N. J. Thomas Thompson Thornton Tillman Vardaman Clapp Clark, Wyo. Clarke, Ark. Robinson Root Saulsbury Shafroth Colt Crawford Cummins Dillingham Sheppard Shields Warren Williams Shively Simmons Smith, Ariz.

Mr. McCUMBER. My colleague [Mr. Gronna] is unavoidably absent from the Senate.

Mr. LEWIS. I desire to announce the absence of the Senator from Tennessee [Mr. Lea], a pressing matter making it necessary for him to be absent, and he requested that I make such announcement for the RECORD.

The PRESIDING OFFICER. Seventy Senators have re-

sponded to their names. A quorum is present.

Nelson

Mr. ROOT. Mr. President, I understand that the subject of the gradation and scope of the income-tax provisions of the pending bill will be considered in the Democratic caucus to be held this evening, and I wish to suggest a view of the duty of Senators upon that subject before my Democratic colleagues reach their own conclusion, a conclusion which may not be open either to argument or persuasion after another report has been made to the Senate.

It goes without saying, sir, that what I have in mind is not controversial matter; it is not matter which I wish to present as a Republican against Democrats, but is matter which seems to me to appeal to every sincere legislator quite independently of any party affiliation or any views upon the questions of finance that have hitherto divided parties. Underlying the whole idea that I have in mind is this consideration: We are not at liberty to regard the imposition of an income tax by the Congress of the United States solely with reference to the direct relation between the Government and its individual citizens, but we must also consider the relations between the Government and the several States and between each State and its repre-

sentatives and every other State.

The provision of the Constitution which requires direct taxes to be imposed according to the rule of apportionment was a shield provided for each State to protect it against oppression by any combination of other States. In entering into the Constitution every State was surrendering its own several powers to impose taxes upon its citizens and to enjoy the proceeds of taxation; it was surrendering that power to a body in which it was manifest there might easily arise a combination or a com-munity of interest and opinion which would lead to taxation injurious to the State which was surrendering its power. In order to guard against that surrender ever being used to the vital injury of any State, this shield was set up before every State—the requirement that direct taxes should be levied in accordance with the rule of apportionment.

Sir, under the income-tax law which was passed and permitted under the stress and necessities of the Civil War, the limit of exemption was \$2,000, and there was no gradation of the tax beyond \$2,000. The larger incomes paid the same percentage as the smaller incomes subject to the tax; yet under that act the States of Massachusetts, New York, New Jersey, and Pennsylvania paid more than two-thirds of the entire tax. The report of the Commissioner of Internal Revenue for the year ending June 30, 1871, shows a total net receipt from the income tax of \$18,077,511, and of that the four States which I have named, contiguous to each other, including great industrial -Massachusetts, New York, New Jersey, and Pennsylvania—paid \$12,145,128. They did not complain then, sir; they do not complain now; but in the face of that fact they deliberately, I think all of them-I know my State of New York, which alone paid over \$7,000,000 of the \$18,000,000, which alone paid more than one-third of the entire tax-my own State voluntarily abandoned the protection which the Constitution gave through the rule of apportionment, and said to the

people of the United States, "We will maintain no safeguard against the fairness, the moderation, and the national sentiment of the people of the entire country."

I triged the Legislature of New York to do this in the face of

the objection that the people of the West and South would tax New York to death if the protection of the rule of apportionment were abandoned. I am speaking now because I said then to my friends in New York, "No nation can live unless its people can depend upon the fairness and reasonableness of the whole people; and let us cease to depend upon an artificial protection and take our chance with the American people." did so by approving the constitutional amendment permitting the imposition of an income tax without regard to the rule of apportionment.

Mr. President, it is certainly true that the voluntary surrender of this protection, which was a part of the terms of union, imposes a very high responsibility upon the representatives of the country at large in whose hands this vast and now uncontrolled power is vested. Remember that the protection of the rule of apportionment was a part of those compromises in the Constitution which gave to the smaller States the same representation in this body that the greatest State has; remember that when the States of New York and Pennsylvania and New Jersey and Massachusetts gave their consent to having the smaller and least populous States represented by as many votes in this body as any State was represented by, they did it with this protection.

You Senators-and I speak to every Senator now except my colleague from New York-are not responsible to the electors of New York; there is no sanction governing your action toward the people of New York except that sanction which rests in the approval of your own judgment and your own conscience and the sense of justice of the people of your own States. You are held to no responsibility in dealing with us now except the responsibility that you owe to your own people to be just to others.

So the State of Nevada, with \$4,000 people, has as many votes in this body as has the State of New York, with 10,000,000 people, and the State of New York has voluntarily relinquished its constitutional protection against unfair taxation without asking any increase of its representation to correspond to its responsibility and to the possibilities of the contributions which may be required of it. So the assent of the great industrial communities, mainly in the East, to the imposition of an income tax without regard to the rule of apportionment and without any increase of their representation in this body, casts upon you, the representatives of other States, the highest obligation of consideration, moderation, and fairness toward those great States that trust in you to be fair and not to the protection of the old constitutional provision.

Now, what has been done? What is the situation?

The House passed an income-tax provision with an exemption up to an income of \$4,000 and with a tax graded up to a point where, I think, the largest incomes pay 4 per cent-the smallest 1 per cent, and then on up to 2 per cent, 3 per cent, and 4 per cent, the tax of 4 per cent being levied on incomes above \$100,000.

I beg that no one will misunderstand me as criticizing the principle. I am in favor of an income tax. I believe it is fair. I always have been in favor of it. I voted for the constitutional amendment. I urged it upon my people. I maintained it, and am ready to maintain it anywhere and everywhere. I want the people of my State to pay their fair share of the burdens of the country as part of one country. I am not quarreling either with the income tax or with a graded tax. But, sir, you must remember first, when you proceed to grade a tax, the proposition with which I started; that is, that you are not to have in mind only the relations between this Congress and the individuals, but you are to have in mind also the relations between this Congress and the States,

If you impose too great a burden upon the same people who paid two-thirds of the old income tax-that is, the people of the few States with the great industrial communities in themyou are diminishing the taxable resources of the States. taxation with which we are now concerning ourselves is but a very small part of the burdens that are imposed upon the people of the United States. The State of New York-and I speak of that merely because I am more familiar with it than I am with other States-while it has great wealth has great The requirements of the tremendously congested population that gather about that great gateway to this great country require enormous expenditures, and the State of New York has to look to its taxable resources to raise the money to render its service to the whole country.

Why, the expenditures of the city of New York for the year

1911 were over \$412,000,000. Where did we get that? Part of

it was borrowed, and we shall have to pay it in the future. But in the same year the direct taxes imposed and collected in the State of New York upon real and personal property amounted to over \$234,000,000. Besides that we tax inheritances, and we take more by the inheritance tax than is estimated to be taken in any of these grades—some \$13,000,000. We tax franchises, and we raised over \$10,000,000 from that source. A great variety of taxes is imposed besides the \$234,000,000 of direct taxes.

The result is that the people of the State of New York, and mainly the people whom you strike with this income tax, are the source of supply upon which the State of New York has to draw to pay these enormous expenses. It draws every year from them far more, double, nearly treble what you are expecting to raise from the entire people of the United States by the income tax. So you ought to remember that in imposing an income tax you should not be unfair as between the taxable resources of the State of New York and the taxable resources of

all other States.

Of course this bill as it now stands is going greatly to increase the relative proportion that will be paid in these particular Eastern States. It is going to increase it, first, because of the gradation of incomes. The gradations as reported from the House are going to make an immensely greater draft on the taxable resources of the State of New York and reduce far more the moneys which that State will have available for its own purposes than the old income-tax law would have done.

If you go on putting up the rates, with no consideration in your minds except the fact that it is all right to put it to a rich man and take away from him as much as you can get, you are still more and more and more depleting the taxable resources of this State which has voluntarily put itself in your hands, trusting to your fairness as between State and State. The same result, sir, will follow from the change in the rate of

exemption.

I suppose the great bulk, the vast majority of the people of this country, have incomes under \$10,000 a year-yes, under \$5,000 a year, under \$4,000, under \$3,000. The higher you put the exemption the more you are relieving the great mass of the people of the country, and relieving the people of the agricultural States, while concentrating the burden of the tax upon the States in which the men of large fortunes are mainly collected.

Something has been said, and very well said, in the debates in this Chamber about the desirableness of having a low limit The Senator from Michigan [Mr. of exemption. TOWNSEND]. supported by the Senator from Minnesota [Mr. Clapp], said the other day that it was desirable-and I wish to give my adherence to his proposition-that everybody in the country, so far as possible, should feel that he contributed something toward the support of the Government. I do not think that is met by the proposition of my friend from Idaho [Mr. Borah] that the poor man pays because of the indirect tax. That is rather figurative. He does not really pay anything. He may be subjected to difficulties or hardships, it may cost him more to live, because of the indirect tax, although I do not think there is any substance in that; and certainly there will not be any to speak of under this bill, because you are putting almost everything he uses on the free list. But it does not meet the important case that we do not want a government that is something different from the people. We do not want one set of people who are governing and paying the expenses and another set of people who feel as if they had no part in it, and are therefore against it.

A sense of participation on the part of every American citizen in the operations of government, a feeling of some sacrifice on his part to keep it going and to maintain it, is of the highest importance for the perpetuation of a spirit of patriotism and loyalty to the Government, as well as the maintenance of a vigilant oversight upon the expenditure of money, and sensi-

tiveness to extravagance.

But there is another thing which ought to be kept in mind in dealing with the limit of exemption. I have already said that the great mass of the people of the country are the people of small incomes. That is especially true of the great agricultural The men with large incomes tend toward the large Somehow they find more agreeable ways of spending their incomes there for their own pleasure. When you put the limit of exemption up to \$4,000, or even to \$3,000, you are producing a tax to which the people of Mississippi, my friend; of Arkansas, my friend; of South Dakota, my friend; of Kansas, of North Dakota, and all the other great agricultural States, will contribute hardly anything. Why, the estimate of the whole amount that will be received upon incomes under \$10,000 is only \$6,000,000-less than a tenth of the whole-and when mittee on August 12, 1913.

you consider that the great bulk of the incomes under \$10,000 are incomes under \$3,000, what you are doing in this bill is to levy a tax upon others, not upon your own constituents. I say, when you put the exemption at \$3,000 you are in substance exempting your constituents and concentrating the entire burden of this tax upon my constituents and the constituents of a fev: other Senators who represent the great industrial communities and who have deprived themselves of their constitutional protection and have thrown themselves upon your fairness and justice.

Sir, anyone of any nobility of character is ready to go under burdens for his country to those who say, "Come!" But how long will a comparatively small part of the country be willing to bear practically the entire burden at the behest of those who

You are not inviting the people of the great industrial communities to share in the burdens of American citizenship in proportion to their means. You are inviting them to take the whole burden, and to take it off your shoulders. You are doing that by the power of the vastly disproportionate and superior representation given to you because you represent sovereign States; because the people of the great industrial communities, having reliance upon the moderation and reasonableness of their sister States, voluntarily abandoned the protection given them by the original provisions of the Constitution.

Mr. President, whatever bill is passed here, I shall not regret that we have voluntarily laid aside the protection of the rule of apportionment. I think that great, great moderation and care should be exercised in fixing the graded income tax with reference to depleting the treasuries and the taxable resources of other States. I think the exemption ought to be put not at \$3,000 but at \$1,000, to the end that all the people of the country may share in the maintenance of government, and to the end that no section of the country may feel that it is being required to bear a burden in which all are not ready to share according to their means.

But whatever the bill is I still shall not regret that the people of my State have voluntarily abandoned the protection of the original provision of the Constitution, because I am sure the American Union can not endure nor can free government be maintained unless the representatives of our people have that self-control over passion and prejudice, whether it be of class or of section, that wisdom and moderation, which will lead them to be just toward all their fellow citizens and toward every section of our great and beloved land.

Mr. SIMMONS. Mr. President, I ask that the Secretary read

the next paragraph.

The PRESIDING OFFICER. The Secretary will continue the reading of the bill.

The Secretary. On page 47, paragraph 163 was recommitted to the committee on August 12.

Mr. THOMAS. I ask unanimous consent for the reconsideration of paragraph 155, to the end that a necessary amendment may be made at the end of it.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. On page 46, paragraph 155, line 2, after the words "ad valorem" and before the period, it is proposed to insert a comma and the words "on the lead contained therein."

Mr. SMOOT. That is at least just, whether it will operate or not. Of course, from a protective standpoint, I should like to see it stand as it is.

Mr. SIMMONS. We are delighted to have the Senator from Utah to something in the bill. We are delighted to have the approval of

Mr. SMOOT. The Senator from Utah is trying to make the bill as good as it can be. Mr. THOMAS. Yes; the Senator has made several very good

suggestions. The PRESIDING OFFICER (Mr. CHILTON in the chair).

The question is on agreeing to the amendment as reported. The amendment was agreed to.
Mr. SUTHERLAND. Mr. President, let the amendment be

restated.

The PRESIDING OFFICER. The Secretary will restate the amendment.

The Secretary. In paragraph 155, page 46, line 2, after the words "ad valorem" and before the period, it is proposed to insert a comma and the words "on the lead contained therein." so that, if amended, it will read:

All the foregoing, 25 per cent ad valorem on the lead contained

The PRESIDING OFFICER. The amendment has already been agreed to.

The Secretary. Paragraph 163 was recommitted to the com-

Mr. THOMAS. Mr. President, the committee proposes an amendment to paragraph 163, and, in necessary connection with

it, another amendment to paragraph 167. It is the transposition of an item from one of the paragraphs to the other.

The PRESIDING OFFICER. The amendment will be stated.
The Secretary. On page 47, paragraph 163, in lines 9 and 10, it is proposed to strike out the words "including time detectors, whether imported in cases or not."

Mr. SMOOT. Do I understand the Senator to ask that the

words on line 10, "whether imported in cases or not," be stricken

Mr. THOMAS. That is to be transposed to another section.
Mr. LODGE. Let us hear the whole amendment.
Mr. HUGHES. "Including time detectors."
The Secretary. It is proposed to strike out the words "including time detectors, whether imported in cases or not," and the comma.

Mr. LODGE. Is that all?

The Secretary. On page 47, line 9, it is proposed to strike out the words "including time detectors" and the comma.

The amendment was agreed to.

Mr. LODGE. Is that all?

The Secretary. On page 49, in paragraph 167, line 18, after the word "presses," it is proposed to insert "including time detectors."

Mr. SMOOT. The word "including" should not be in that amendment. It should be just the words "time detectors."

Mr. LODGE. Printing presses do not include time detectors under any construction.

The PRESIDING OFFICER. The question is on agreeing

to the amendment as reported.

Mr. LODGE. One moment, Mr. President, before the amendment is agreed to. It seems to me that does not meet the difficulty about time detectors at all. The difficulty about the duty on time detectors is that you can not get the proper rate unless you impose a specific duty and base it on the number of jewels. If you make it an ad valorem duty and make it 25 per cent instead of 30, you still give them a great deal more than they

Mr. HUGHES. We make it 15 per cent, I will say to the

Senator, and it figures out-

Mr. LODGE. Oh, I thought it was 25 per cent. Mr. HUGHES. No; it figures out just about-

Mr. LODGE. Yes; that figures it out. Twenty-five per cent was too much.

Mr. THOMAS. The change was made in accordance with the brief that was filed with the committee by the manufacturers of time detectors.

Mr. LODGE. Certainly; that brings it out right. I just glanced at it and saw "25 per cent." It caught my eye, and I did not see the "15 per cent." That is correct,

It is an improvement on the paragraph, of course, in taking that out, but the objection to watch movements seems to me to remain just the same. I have made that statement, and I will not go on any further about it.

The amendment was agreed to.

Mr. BRANDEGEE. I understand we are now on paragraph

Mr. THOMAS. Paragraphs 163 and 167. There is a transposition.

Mr. BRANDEGEE. I wish to offer an amendment to paragraph 163. Is the paragraph open to further amendment at this time?

Mr. THOMAS. I will say, if the Senator will permit me, that the committee reports back paragraph 163 with the amendment which has just been considered, and in that connection an amendment to paragraph 167. We did that for the purpose of getting the RECORD straight.

Mr. BRANDEGEE. I will say to the Senator the amendment I desire to offer is one in relation to clocks, which I called to the attention of the Senate and the committee at the time this paragraph was under consideration before, and also in connec-Paragraphs 81 and 82 and tion with paragraphs 81 and 82. paragraph 163 deal with different kinds of clocks. In paragraph 81, on page 21, the language is:

Including clock cases, with or without movements.

The same language is repeated in paragraph 82, line 19, on

I suppose including clocks with movements means a complete clock. In paragraph 163, on page 47, the language is:

All other clocks and parts thereof, not otherwise provided for in this section, * * * not composed wholly or in chief value of china, porcelain—

And so forth-30 per cent ad valorem.

It is immaterial to me whether I present the amendment to this paragraph now or wait until some other time. I simply call attention to it because the Senator from Colorado presented an amendment to the paragraph.

Mr. THOMAS. Paragraphs 81 and 82 were passed yesterday with the understanding that the Senator from Washington as well as the Senator from Connecticut could afterwards return

to them.

Mr. BRANDEGEE. I remember. I am talking about paragraph 163.

Mr. THOMAS. I understand.
Mr. BRANDEGEE. I want to conform to the wish of the committee as to whether to offer my amendment now to para-

graph 163 or wait until we reach it at some other time.

Mr. THOMAS. The Senator can do as he likes about it.

Mr. BRANDEGEE. Very well. Then I offer an amendment to come in on page 47.

Mr. LODGE. It is a passed-over paragraph. It is open to

Mr. BRANDEGEE. Yes. Therefore I offer the amendment. I move, on page 47, in line 16, to strike out the numerals " near the end of the line, before the words "per cent," and insert in lieu thereof the numerals "40."

I will state in this connection, Mr. President, the reason why I am offering the amendment. I stated at the time the paragraph was previously before the Senate that the clock business in this country is one of the oldest manufacturing processes known. There are in my State quite a number of manufacturers making various kinds of clocks.

I put into the RECORD a letter which I had received from the president of the clock company located in the city of New Haven, Conn., giving the argument, accompanied by statistics, and all the matters relative thereto which he had presented to one of the committees either of the House or the Senate, and some correspondence I think which he had had with the chairman of the Senate Committee on Finance in relation to the subject.

Without imposing upon the time of the Senate except very briefly I will simply rehearse the salient features of the situa-tion. This New Haven factory makes principally the cheap alarm clocks. They involve passing through some 200 different operations before one of the little round nickel-plated alarm clocks, which retails for about a dollar I think, becomes perfected.

The cost of making these clocks was given in detail item by item by the president of the company, and it appears in the RECORD. The situation is this: There is the closest kind of competition not only in this country but between this country and foreign countries in these articles, particularly between us and the Germans. The facts that I put into the RECORD at the time the paragraph was previously passed upon show that this clock, which it costs 45 cents to make in this country, can be laid down here, duty paid, by the German competitor for 35

This New Haven factory employs 2,000 skilled mechanics. They can not conduct this business in competition with the German competitor under the rate of 30 per cent proposed by the committee, which is reduced from 40 per cent, equivalent to a reduction of 25 per cent. It is simply a question whether that industry, and I have given simply one type of it in this New Haven company, shall be continued in this country or not.

Mr. McLEAN. Mr. President—

Mr. BRANDEGEE. I yield to my colleague.

Mr. McLEAN. I will state to my colleague that the clock retails for \$1.50.

Mr. BRANDEGEE. I am glad to know that. I had stated the price at \$1.

Mr. McLEAN. If the Senator will pardon me, I have in my room a clock made in Germany, and it sold in New York for 53 cents. That same clock can be purchased in Washington for \$1.56, which shows how the ultimate consumer is affected by the tariff.

Mr. BRANDEGEE. The fact is the clock costs the factory something like 45 cents, and their selling price is very little above that; and yet it retails, as my colleague says, at \$1.50. The information I put in the RECORD at the time shows that the factory makes but about 6 per cent. I think it makes just that at present, and the factory can not compete, even on the theory that we want to put our industries upon the most severe competitive plane with their foreign competitors. There is no escape from the instance which I present, and they will either go out of the business in this country or cut the wages of the employees in this industry. As it is now, I remember the president of the company stated the life of one of these clocks is over two years, and the factory cost is 45 cents. Anyone can figure out

himself, if he has time to take a lead pencil, what the cost to the purchaser would be of a dollar-and-a-half clock that lasts two years. It is 75 cents a year, a little over a penny a week. How much of that cost to the ultimate purchaser of a penny a week would be saved by the substitution of the German clock laid down here at 33 cents instead of the American-made clock at 45 cents anyone who can go into the refinement of decimals to a sufficient limit can figure for himself.

But the fact at home that hurts and pinches is that 2,000 skilled American mechanics are now employed in this one concern, who depend for their living and that of their families upon this industry, and all the money that they make and spend in other ways contributes to other productive enterprises in this country. The fact remains that that concern is to be put out of business and those men are to be discharged owing to what the ordinary person would think was not a very serious matter, a mere hasty reduction of a tariff duty from 40 per cent to 30 per cent ad valorem. That is the effect of it in its ultimate analysis.

These clocks are at any rate an industry important enough to have a separate classification, in my judgment, and to have I will not say more careful consideration than the question has had, because I do not know how much care has been given to it. It may be that in the tremendous amount of work that has been dumped upon the Finance Committee in the preparation of this bill, involving 4,000 or 5,000 items, they have not had time to consider carefully enough this particular feature of it, although the facts and the statistics were presented by the president of the company in the form of a brief. But I do not know and can not state whether all the members of the committee had time to pursue all the briefs that were dumped upon them. I suppose they did not.

I can not do more than I have done in offering the amendment, which I submit to the consideration of the Senate.

Mr. THOMAS. I simply wish to say that the subcommittee

gave as close attention to the consideration of this paragraph as was possible; perhaps not an exhaustive consideration, but as much as possible, and they determined to make no change in the rate fixed by the House, largely because the exports of this particular commodity are three times the amount of the imports, showing that it is an independent industry.

Mr. BRANDEGEE. I stated at the time, bearing upon the observation of the Senator from Colorado, that the exports of this commodity are principally to Canada and to Mexico, and the clocks are exported there because they get them so much quicker than they would by importing them from abroad. They are not exported to the competing countries at all; and the reason why they can be exported to these countries in competition, in addition to the time in their favor, is because of the preferential trade agreements that exist between our country and the countries to which they are exported.

Mr. THOMAS. There is a preferential agreement between Great Britain and Canada that is 33.3 per cent to the disadvantage of this country.

Mr. BRANDEGEE. I am informed the other way. The matter I put in the RECORD I think was reliable. The president of the company had examined it very carefully.

Mr. SMOOT. Mr. President, I am not going to offer an amendment, nor detain the Senate more than a minute. simply want to call the attention of the Senator from Colorado to the working out of paragraphs 163 and 81 and 82. Paragraph 163, on page 47, provides that-

All other clocks and parts thereof, not otherwise provided for in this section, whether separately packed or otherwise, not composed wholly or in chief value of china, porcelain, parian, bisque, or earthenware, 30 per cent ad valorem.

Paragraph 81, on page 21, line 2, provides a rate of duty of 35 per cent ad valorem on certain items including clock cases with or without movements. In other words, if an importer desires hereafter to import a clock with a china, porcelain, or bisque case, he will of course import the case without movements, and will import the movements under paragraph 163, at a rate of 30 per cent instead of 35 per cent for the case. That will be the result of the working out of the bill.

The PRESIDING OFFICER. The Senator from Connecticut offers an amendment, which will be stated.

The Secretary. On page 147, paragraph 163, line 16, before the words "per cent," strike out '30" and insert "40."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Connecticut [Mr. BRANDEGEE 1.

The amendment was rejected.

Mr. THOMAS. I ask unanimous consent to reconsider paragraph 164 for the purpose of adding an amendment in line 13. a letter some time ago from one of the factories in my State.

The PRESIDING OFFICER. Without objection, the paragraph will be reconsidered. The amendment will be stated.

The Secretary. In paragraph 164, page 148, line 13, after the words "ad valorem" add the words "upon the zinc contained therein."

Mr. SMOOT. Mr. President, just one question. I have not looked up that amendment, but I want to ask the Senator, Suppose they import zinc-bearing ores into this country, and they have not noticed anything in the bill that would provide for that. I ask the Senator if it should not be provided for?

Mr. THOMAS. I should think that the lead content would

be dutiable under paragraph 154 and the zinc content under paragraph 164.

Mr. SMOOT. The trouble is that one provides for a lead ore and the other provides for a zinc ore.

Mr. THOMAS. But upon the lead and zinc contained therein, Mr. SMOOT. That is true. If the ore is shipped as zinc ore, there is a greater value, of course, of zinc. Words ought to be added to the amendment of the Senator-

Mr. THOMAS. What would the Senator suggest?
Mr. SMOOT. This is what I am thinking of: There are zinc ores imported into this country containing lead.

Mr. THOMAS. And vice versa.

Yes; and vice versa. In the old law there is Mr. SMOOT. a provision to take care of that, but I have not noticed whether there is such a provision in this bill or not. That, of course, can be looked up afterwards, if the Senator has not had his attention called to it.

Mr. THOMAS. The words just offered are not in the old law at all.

Mr. SMOOT. No; because there is a provision in the old law which takes care of that. I will not take the time of the Senate further than to call attention to it.

Mr. THOMAS. Very good. If anything needs rectification, can be easily returned to.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Secretary. The next paragraph passed over is paragraph 151, on page 50 of the bill, passed over at the request of the Senator from Michigan [Mr. Townsend].

Mr. SMOOT. There is one paragraph that I should like to call the attention of the Senator from Colorado to before we reach that paragraph that was passed over, and that is paragraph 168. The Senator will remember I asked that there be an amendment made to that paragraph.

Mr. THOMAS. Yes; that was considered and the full committee objected to the amendment. It was presented along the line of the Senator's suggestion to the full committee, but was not approved. The Senator is referring to surgical and dental instruments?

Mr. SMOOT. I suggested to include in that amendment "surgical or dental instruments or parts thereof:"

Mr. THOMAS. The committee did not approve of that amendment.

Mr. SMOOT. The committee refused to accept the amendment?

Mr. THOMAS. Yes.
Mr. SMOOT. Mr. President, so that the record will be straight, I desire at this time to offer an amendment to paragraph 168. After the word "nippers" I move to insert a comma and the words "and surgical and dental instruments and parts thereof."

The PRESIDING OFFICER. The amendment will be stated.

The Secretary. In paragraph 168, page 49, line 24, after the word "nippers" insert a comma and the words "surgical and dental instruments or parts thereof."

The amendment was rejected.

Mr. BRANDEGEE. To paragraph 167, on page 49, I submit an amendment in line 21.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. Paragraph 167, page 49, line 21, after the words "ad valorem," insert "engraved rollers, mills, or dies used for printing or embossing, 45 per cent ad valorem."

The amendment was rejected.

Mr. THOMAS. My recollection is that paragraph 169 was also passed over to accommodate the junior Senator from Massachusetts [Mr. Weeks].

Mr. SMOOT. It was passed over, but was afterwards con-

sidered and agreed to.

The PRESIDING OFFICER. It is the recollection of the

Chair that it was agreed to.

Mr. BRANDEGEE. In regard to paragraph 169, I received

They think that there is a doubt whether brass would be comprehended in that paragraph. Inasmuch as it takes in lead, copper, nickel, and pewter I would like to have brass substantially mentioned, if there be no objection to it. It says, "or

other metal, but not plated with gold or silver."

Mr. THOMAS. Do not the words "or other metal" cover it?

Mr. BRANDEGEE. I think to insert the word "brass," unless there is some objection to it, would put the matter beyond question. If the Senate is not ready to act upon it now, I will just offer the amendment.

Mr. THOMAS. I do not see any objection to it.

Mr. BRANDEGEE. Then, after the word "copper," line 6, page 50, I move to insert the word "brass."

The PRESIDING OFFICER. The amendment will be stated. The Secretary. On page 60, after the word "copper" and the comma, insert the word "brass" and a comma.

The amendment was agreed to.
The PRESIDING OFFICER. The next paragraph passed

The SECRETARY. The committee proposes to strike out paragraph 171 as printed in the bill and to insert a new paragraph,

171. Cedar commercially known as Spanish cedar, lignum-vitæ, lance-wood, ebony, box, granadilla, mahogany, rosewood, and satinwood; all the foregoing when sawed into boards, planks, deals, or other forms, and not specially provided for in this section, and all cabinet woods not further manufactured than sawed, 10 per cent ad valorem; veneers of wood, 15 per cent ad valorem; and wood unmanufactured, not specially provided for in this section, 10 per cent ad valorem.

Mr. HUGHES. I move to strike out the semicolon on page

51, line 1, and insert a period.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. On page 51, in the committee amendment, line 2, after the words "ad valorem," strike out the semicolon and insert a period.

The amendment to the amendment was agreed to.

Mr. HUGHES. Now I move to strike out the language fol-

lowing the period to the end of the paragraph.

The PRESIDING OFFICER. The amendment will be stated.

The Secretary. Strike out lines 2, 3, and 4 in the committee amendment, in the following words:

And wood unmanufactured, not specially provided for in this section, 10 per cent ad valorem.

The amendment to the amendment was agreed to.
The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The Secretary. The next paragraph passed over is on page 51, paragraph 174, boxes, barrels, or other articles, and so

The first amendment of the committee has been agreed to. The second committee amendment is, in line 13, after the ord "pomelos" and the comma, to insert "or other fruits."

The amendment was agreed to.

The Secretary. In line 16 the committee report to strike out the words "orange and lemon" before "boxes" and in lieu to insert "fruit."

The amendment was agreed to.
The Secretary. In lines 17 and 18 the committee report before "box" and insert to strike out "orange and lemon"

The amendment was agreed to.

The Secretary. In line 19 the committee report to strike out, after the words "filled with," the words "oranges and lemons" and insert the word "fruit."

The amendment was agreed to.

Mr. HUGHES. I ask that the paragraph in its amended form be passed over for the present. It is my recollection that the Senator from Maine [Mr. Johnson] has an amendment to offer to the paragraph. I do not see him present at this time. I ask unanimous consent that the paragraph be passed over temporarily until the Senator from Maine comes in.

The PRESIDING OFFICER. Without objection, the para-

graph will be temporarily passed over.

The Secretary. On page 52, paragraph 176 was passed over at the suggestion of the Senator from Washington [Mr. Jones].

Mr. JONES. I desire to offer an amendment. matter of very great importance to our State. While I do not like to delay the Senate, I do feel that there ought to be more Senators present to hear the discussion with reference to this question. I think it will appeal to their sense of justice and So I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Washington suggests the absence of a quorum. The Secretary will call

the roll.

The Secretary called the roll, and the following Senators answered to their names:

Norris O'Gorman Overman Page Perkins Pittman Poindexter Reed Robinson Ashurst Bacon Bankhead Fletcher Gallinger Smith, S. C. Smoot Stephenson Sterling Hollis Hughes Bradley Bradley Brady Brandegee Bristow Bryan Catron Chamberlain Stone Sutherland Swanson Thomas James Johnson Johnson Jones Kenyon Kern La Follette Lane Lippitt Thompson Root Saulsbury Shafroth Thornton Tillman Vardaman Walsh Chilton Clapp Clark, Wyo. Clarke, Ark. Sheppard Lodge McCumber McLean Martin, Va. Martine, N. J. Myers Nelson Sherman Shields Shively Simmons Warren Williams Colt Crawford Works Cummins Dillingham Fall Smith, Ariz. Smith, Md.

The PRESIDING OFFICER. Seventy-three Senators have answered to their names. There is a quorum present.

Mr. JONES. Mr. President, I desire to offer the amendment which I send to the desk.
The VICE PRESIDENT.

The amendment proposed by the Senator from Washington will be stated.

The Secretary. In paragraph 176, page 52, line 7, after the word "thousand," it is proposed to insert "shingles, 40 cents per thousand"; and in the free list, on page 157, line 3, to strike out the word "shingles."

Mr. JONES. Mr. President, in this bill shingles are placed on the free list. They now bear a duty of 50 cents per thousand. The effect of my amendment is to strike shingles from the free list and put them on the dutiable list at 40 cents a thousand, or

a reduction of 20 per cent.

I can hardly believe that the question with reference to placing shingles on the free list or the dutiable list was given any very careful consideration by the committee. I can not understand why shingles should be placed on the free list upon any theory of tariff revision. To place shingles on the free list can not be in accordance with the theory of tariff for revenue, because that releases all the revenue, while with a small duty of 40 or 50 cents a thousand shingles would bring into the revenues of the Government two or three hundred thousand dollars per

Then, to place shingles upon the free list is contrary to one of the declarations of the Democratic platform, and that is that they do not propose in tariff measures to reduce revenues in such a way as to injure any legitimate industry, because the shingle industry is certainly a legitimate industry, and that placing them on the free list will do a great injury to the industry I think I shall be able to show.

We have often been told in the consideration of the pending bill when a proposition was made to put an article on the free list that the committee thought the Government needed a duty on that article for revenue purposes. The tariff on shingles can not be counted as anything more than a tariff for revenue. The duty is now only a little over 20 per cent ad valorem-50 cents a thousand.

I am willing and our people are willing, without special protest, to accept the provisions in this bill with reference to the lumber industry and lumber products generally. Our people have recognized that the people of the country generally demand that lumber and lumber products, as a general rule, should be put on the free list, and that it will be useless for us to object. So we are not making objection to those provisions of the bill, though we think that they are very unjust and that they will work great injury to a great industry in our State. The shingle industry, however, while a part of the lumber business, is a distinct industry in itself and should be considered separately.

I want to call the attention of the Senate to the fact that when the lumber schedule in the Payne-Aldrich law was under consideration, while it was generally conceded that there should be a material reduction in the duty on lumber, yet, after extensive hearings and a careful consideration, it was determined that the shingle industry, or the shingle part of the lumber in-dustry, required an increase of the tariff, and so shingles were one of the articles in the Payne-Aldrich law on which the duty was increased from 30 cents a thousand to 50 cents a thousand. Our Democratic friends, without considering the interests that are dependent upon this tariff, take all this duty off; there is not a gradual reduction; the conditions are not taken into account and the tariff revised so as not to threaten any injury to this industry, but the tariff is entirely taken off and shingles are placed upon the free list.

What does this industry mean to our State? It is not a small matter, but it is one of our greatest industries. The value of the production of shingles in this country is \$30,000,000; the production in number of shingles is from twelve to fourteen billions; and of that amount the State of Washington produces two-thirds, or about 8,000,000,000 shingles, of the value of nearly \$20,000,000.

We have in our State about 500 shingle mills. They are small establishments; they are independent of each other. can not say that you ought to put shingles on the free list because they are controlled by a trust, for they are not. There is probably no industry of a similar size in the country where the different units of it are so independent of each other as in the shingle industry. So I say in my State we have nearly 500 independent, separate mills producing shingles, whose interests are entirely disregarded by the terms of this bill. We employ about 15,000 men in this industry, and, reckoning two or three to the family, we have thirty or forty thousand people dependent upon those 15,000 men, or about 60,000 people in our State dependent upon this industry for employment, wages, support, education, and a comfortable living.

The annual pay roll for the laborers employed in connection with the shingle industry in my State amounts to about \$7.500,000; the product, as I have said, is valued at about \$20,000,000; the property invested in this industry is about \$4,500,000 in the mills, about \$1,500,000 in the logging camps, and about \$10,000,000 in timber; so that there is a capital invested of about \$20,000,000 in my State alone in the shingle industry. This will give you some idea as to the importance of

Mr. SMITH of Arizona. Mr. President, will the Senator from Washington permit me to ask him what was the amount of the labor cost on those shingles? Was it seven and a half million

Mr. JONES. No; that is not the labor cost. That is what was paid to labor as wages to the employees and the mills.

Mr. SMITH of Arizona. That is what I meant—the labor. There was an annual production in dollars of how much?

Mr. JONES. The production is estimated at from seventeen to twenty million dollars.

Mr. SMITH of Arizona, Seven and a half million dollars in actual labor and twenty million dollars in actual production. That would leave nearly \$13,000,000 received every year. How much capital is invested, according to the Senator's figures?

Mr. JONES. Twenty million dollars.

Mr. SMITH of Arizona. Making an investment, including the amount paid for labor, of, say, \$27,000,000 and a gross income every year of \$20,000,000, leaving a net income of \$13,000,000 to the owners. The reason I am asking this question is that in my particular part of the country, under the present law restricting our right to use the timber growing at our doors, it is just as cheap to build with stone and to cover with steel as to attempt to get shingles from the Senator's part of the country into ours. In this burden of a tax of 50 cents, or any other figure, raises the price of shingles any higher, when you are showing such a profit in that industry, it ought not to be imposed, and I think the Senator ought to concede that we have a right to purchase shingles at some reasonable price.

Mr. JONES. But the Senator does not understand that the difference between seven and a half millions and twenty million dollars is all profit, does he?

Mr. SMITH of Arizona. Of course not. In that your invested capital has to be figured.

Mr. JONES. Certainly; and there is machinery

Mr. SMITH of Arizona. I say the invested capital, which includes the machinery, and your timber must be considered.

Mr. JONES. No; the estimate does not include machinery.

I do not know how much there is allowed for that.

Mr. SMITH of Arizona. I was including that in capital. The Senator has said that \$20,000,000 is the income in one year. Seven and a half million dollars, as the Senator says, is paid for labor, which leaves nearly \$13,000,000 profit, excluding the machinery and lumber and the other investments necessary to carry on the business. It seemed to me from that, without being critical with my friend, that the profits are large enough to the owners to permit us to buy shingles a little cheaper, provided the Senator contends that the tax raises the price to us.

Mr. JONES. I will not contend that the tax raises the price to you; in fact, I think I will show before I am through that the increase of the tariff rate under the Payne-Aldrich law did not increase the price of shingles one penny or one cent per thousand of shingles.

Mr. SMITH of Arizona. Then why did they need it? What was the purpose of it?

Mr. JONES. I will show that, if the Senator will merely give

whole tariff proposition; I did not intend to discuss all the principles of a protective tariff. I thought I would merely present the facts here to the Senate and not take the time of the Senate in the discussion of these controversies, about which we might argue from now until Christmas and still my friend from Arizona would have his views about the tariff and I should have mine.

Mr. SMITH of Arizona. If the Senator will permit me, I have not said a word since this debate on the tariff began.

Mr. JONES. I have not said many words,

Mr. SMITH of Arizona. I do not intend to say many until it is ended; but if the Senator will feel as sorry for the remainder of us as I have felt for myself when hearing the editorials and endless talk of the candidates for office on this bill, he will understand that I would not say a word to him that would induce him to utter a single solitary additional word in the matter. I was asking the questions largely for my own information.

Mr. JONES. Of course, I do not know what the Senator means by referring to candidates for office. I am presenting a matter which I consider of vital importance to the people I in part represent, and will take no more time in doing so than I deem absolutely necessary. I have not said that the difference between \$7,500,000 and \$20,000,000 is profit. It is not. large amount is paid by some mills for shingle timber-mills that do not own their own timber. There are various other items of expense, and, as a matter of fact, not much profit has been made during the last few years, and some of the owners of mills have made no profit at all, as I will show. Shingles are not high between the manufacturer and his purchaser, no matter what the price may be when they reach the country of my friend from Arizona.

Mr. MARTINE of New Jersey. Mr. President, will the Sena-

tor yield to me a moment?

Mr. JONES. Certainly. Mr. MARTINE of New Jersey. I want to ask why especially protect shingles in contradistinction to clapboards used on the side of a house? Why should shingles be especially favored over clapboards? The Senator says he deems the manufacture of shingles a very special industry. Now, why should they have any better treatment than the clapboards which are used to

protect the side of the house from the east wind?
Mr. JONES. Well, Mr. President, from my standpoint of protection, if the clapboard industry needs protection, it ought

to have it. I have not given any special consideration to the clapboard industry. I do not know just what—

Mr. MARTINE of New Jersey. But I ask why in all reason should a shingle have any better protection than a clapboard? Mr. JONES. I should like to ask the Senator why should there be a 25 per cent duty on toothpicks, as provided in this

section, and none on shingles?

Mr. MARTINE of New Jersey. Well, there is a good deal of difference between the manufacture of an infinitesimally small article such as a toothpick and the manufacture of a shingle; but for my own purposes I would have toothpicks as free as I would have shingles, and I would have shingles as free as I would have toothpicks.

Mr. JONES. Yes; but I find a 25 per cent duty on tooth-

picks and you will vote for it.

Mr. MARTINE of New Jersey. The Senator says there are hundreds of little shingle mills scattered through the length and breadth of his State, and that anybody can engage in the buslness. I can not see why an article so absolutely necessary for the well-being of the hearthstone and the home as a shingle should not be made free of tariff tax.

Mr. JONES. I would not oppose a reasonable tariff. The tariff rate on shingles now is only 20 per cent ad valorem; and I am offering an amendment that cuts it down lower than that. I am offering an amendment making the duty only 40 cents a

thousand.

Mr. MARTINE of New Jersey. The reason I interposed, not unduly to interrupt the Senator, was that I could not understand why shingles should be especially favored over clapboards.

Mr. JONES. I am not framing this bill, I am sorry to say, and I am not opposing a duty on clapboards. If those interested in clapboards show that they need protection I will be glad to favor such a proposition. I think the needs of each industry should control and not whether or not a duty is placed on some other product

Mr. MARTINE of New Jersey. The Senator is presenting

the shingle question?

Mr. JONES. Yes. Mr. MARTINE of New Jersey. And the Senator has said me an opportunity, although I did not intend to discuss the that the constituency in his State, in deference to public opinion, have opened their eyes to the solemn truth that the people were surfeited with tariff protection—he did not say that, but he meant that they had enough of it.

Mr. JONES. No, no; I did not mean that. The Senator

misunderstood me.

Mr. MARTINE of New Jersey. The Senator said that they realized that the country demanded a reduction of duties; and, as an intelligent constituency, of course they knew what that meant. They felt that the protected industries had been tapping the people long enough, and now they were willing to let up, simply because the people said, "We will not give you this

Mr. JONES. I did not intimate anything of that sort. simply suggested that our people recognized the inevitable; that they simply accepted free lumber because they had to; and that they are going to accept it, with reference to the lumber

industry generally, without any particular kicking. That is all.

Mr. President, I simply wanted to present the facts with reference to the shingle industry and not discuss the whole tariff question. It seems to me that if I were a Democrat I could justify a small tariff duty on shingles from a revenue standpoint. As I said awhile ago, when we ask to have some article placed on the free list you have answered us many times that you want revenue; that you must have the revenue. Now, with a tariff duty on shingles of 50 cents a thousand you get about \$250,000 of revenue a year, although the duty is only a little over 20 per cent ad valorem, which is a very small revenue rate, so far as that is concerned; but instead of giving us even a revenue rate, with whatever incidental protection might go with it, you simply wipe out the duty entirely, without taking into account what effect it may have upon this industry, which is especially important to our State.

As to labor conditions, of course, Mr. President, they will not appeal to my Democratic friends. They are not concerned about them and do not take them into account in framing the bill. If I find that I can not appeal to them at all upon the ground of revenue, if I can not get any response from that standpoint, of course, I do not expect them to take into consideration the matter of labor conditions in our State as compared with our competing brothers to the north, because competition in cedar shingles comes from British Columbia, to the north. What are the labor conditions there and in our country? In our country the labor employed in the shingle mills is 99 per cent American, while in the Canadian mills it is about 80 per cent oriental-Chinese, Hindu, and Japanese. In our State we pay our laborers from \$2.25 to \$4 a day, while the Canadian

mills pay from \$1.25 to \$4 a day.

There are the facts. They can not be denied. They may not appeal to you. They do to me. No argument can strengthen them. I simply submit them as an appeal to your sense of what is fair and just. Of course with that difference in labor conditions there must be an advantage on the other side of the line as against our people. We shut the Chinese out of this country; and yet our friends on the other side of the Chamber seem to be perfectly willing to let the product of Chinese labor come from across the line over into our country in competition with our labor. Our people are home builders; they are home makers; they are home lovers; they are engaged in this industry in our State near their homes, and I think we ought at least to give them some consideration.

I have some letters here about the profits in the industry.

These, letters come from very reliable people; they are men, of course, who are interested in this industry, and who may be considered as interested witnesses; and yet I do not think that even our Democratic friends will think that simply because a man is interested in an industry he has no regard for the truth at all. I have here a letter from a company at Clear Lake,

Wash., in which they say this:

Wash., in which they say this:

The company which I represent is a large manufacturer of shingles. We expect to cut this year almost 150,000,000 shingles. We employ in our shingle mill alone about 60 men with a monthly pay roll of \$7,500. In addition to these men, an equal number are employed in the woods getting out the tlimber for the shingle mill, with a pay roll equal to the one in the mill itself. If the shingles from British Columbia are permitted to come into the United States free of duty, I have not the slightest doubt that it will mean a period of stagnation running over from one to three years, with possibly a large portion of these men thrown out of work. It will mean at the very least a material reduction in their wages and a very great disturbance in industrial conditions in this State.

Then here is another firm that says this:

For the past five years there has been practically no profit whatever in the manufacture of shingles, and in the meantime the British Columbia shingles have been selling in competition with us and paying 50 cents per thousand duty.

Then I have another letter from a man at Custer, a very small town in our State, which depends absolutely upon the shingle mills there. I think there is hardly any other kind of business in that place. He says this:

CUSTER MERCANTILE Co. (INC.), Custer, Wash., April 15, 1913.

Hon, Senator W. L. Jones, Washington, D. C.

Hon, Senator W. L. Jones, Washington, D. C.

Dear Sir: By instruction of our club I send you inclosed resolution, and hope and trust that you will use all your influence to have the present duty on shingles maintained. We have nine mills shipping their shingles from Custer.

I wish to state further that my partner and I have an interest in a shingle mill built in 1909, which has been operating every summer. We have paid our men from \$65 to \$135 per month, but we—the mill owners—have not yet.had one dollar paid us as profit. The time, we hope, will come when our country will not need or miss the shingle industry, but. it is not at hand yet. Any reduction on the tariff of shingles will bring the mills to close down, and it will cause a hardship all around. ingles will be a laround. I around. Respectfully submitted. Yours, truly,

P. S. MUNDAL.

So that, according to these men, they have been running their mills four or five years without a single dollar of profit coming to them from their money actually invested in the enterprise and in the plants. There are other letters that I will not take the time to read but will submit with my remarks.

As I have said, there is no trust in this industry. Many of

the mills are small; they have been started by a few men who have gathered together a little money. Possibly they have been what are shingle weavers, laborers. They have put together their little capital, consisting of their money and their skill, in this industry, have erected small mills, and have been trying to maintain themselves, make a competence for their families,

and to supply the demand for this article.

Who are our competitors? British Columbia, to the north of us, with 182,000,000 acres of timber land, much of it valuable for the making of shingles. They have been producing a great many, and under the tariff we now have they have been exporting shingles to this country. They can do this with their cheap labor and cheap timber. When we had a tariff of only 30 cents a thousand there came to this country over 5,000 carloads of shingles a year in competition with those made by the people of this country. After we increased the tariff to 50 cents a thousand on shingles the exportation of shingles to this country did not cease. In 1911 we imported over 642,000,000 shingles into this country, in 1912 over 514,000,000, in 1913 over 560,000,000 shingles, and through the little town of Blaine, in my State, on the border, not to an eastern market, but to our State, the following imports were made:

In 1907, 588 carloads; in 1908, 595 carloads; in 1909, 604 carloads; in 1910, 242 carloads; in 1911, 82 carloads. Even with a duty of 50 cents a thousand they imported into our State alone in 1911, 82 carloads, and in 1912, 142 carloads; so that a tariff of 50 cents a thousand is not a prohibitive tariff by any

What about the actual prices on these shingles? I told the Senator from Arizona that I would notice that point. He suggested one proposition that is always suggested in tariff debates when he asked if with a tariff on an article the price does not increase, then what is the use of the tariff? Well, the answer to that, so far as the shingle industry is concerned, is simply that with this tariff we have been able to maintain our market, and instead of having it overglutted, thereby not only depressing and lowering the price, but closing mills and throwing labor out of employment, we have been able to keep them employed, and with competition among, for instance, the 500 plants in my State they have kept down the price regardless of the tariff. If you take the tariff off and throw open this industry to competition of the cheaper labor of Canada, although there may be, of course, temporarily lower prices, when they get the mills closed down and force the people now engaged in that industry into some other work, then we may expect the Canadians to raise the price. This industry well illustrates what can and will be done by competing plants behind a protective wall.

What are the facts with reference to the increase of 20 cents a thousand on shingles four years ago? I have here the prices of shingles from 1908 for nearly every month in the year from that time until this. The prices range practically the same, although they were higher in 1908 than they have been at any time since then. But coming to 1909, just prior to the passage of the Payne-Aldrich law, when the tariff duty was increased from 30 to 50 cents per thousand, I find that in August, 1909, the price on clear shingles was \$2.15 to \$2.25 per thousand.

In August, 1909, the price on clear shingles was from \$2.15 to \$2.25 per thousand; on star shingles, \$1.75. Then, in September, the price was from \$2.30 to \$2.35; October, \$2.20; November, \$2.05 to \$2.10; December, \$2.05—less than it was prior to the passage of the bill.

In 1910, in January, the price was \$2.15 to \$2.20, practically the same as it was before; February, \$2.20; March, \$2.20;

April, \$2.20; May, \$2.10; June, \$2.15; August, \$2.10; September, from \$2 to \$2.05; October, from \$2 to \$2.05.

In 1911, in January, the price was \$1.90, or 30 cents a thousand less than it was just prior to the passage of the bill. In

February it was \$2.

Mr. KERN. Mr. President—

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Indiana?

Mr. JONES. Certainly. Mr. KERN. Does the Senator refer to the retail price of shingles in the State of Washington?

This is the quoted price to the jobber from the Mr JONES manufacturer.

To the jobber? Mr. KERN.

Mr. JONES. ·Yes.

Mr. KERN. I was about to say that the retail price in the East to the consumer of Washington shingles and Oregon shingles, the best shingles, is something like \$3.50 to \$4 a thousand.

Mr. JONES. That may be true, but of course that is independent of the tariff. Whatever effect the tariff has it has on the price from the manufacturer to the first buyer from him. Of course it does not affect the price from him on. Even if we should take those prices, does the Senator from Indiana know whether or not they have increased since 1909, when the Payne-Aldrich tariff bill was passed?

Mr. KERN. No; I do not. I simply know from purchases I have made that in the last year the price was from \$3.50 to \$4

Mr. JONES. Does the Senator know what it was just prior

to the passage of the Payne-Aldrich law?

Mr. KERN. That was since the passage of the Payne-Aldrich

Mr. JONES. But, I say, does the Senator know what the price was just prior to the passage of the Payne-Aldrich law?

Mr. KERN, I do not.

I am showing here that the wholesale prices Mr. JONES. were practically the same before the passage of the law as they have been since the passage of the law notwithstanding the increase in the tariff; that is all. I am simply stating the facts. I am not presenting any argument about the matter, but these They speak for themselves.

Mr. MARTINE of New Jersey. Does the Senator know as to what part of the fluctuation in the price of shingles may have been due to the use of substitutes for shingles? For instance, artificial shingles are now used very largely-asbestos shingles, metallic shingles, rubberoid shingles, and a score of other sub-

Mr. JONES. We have been using those things for several

Mr. MARTINE of New Jersey. We have been using them for

the last three to five years.

Mr. JONES. I think a good many of those things were in use before that time.

Mr. MARTINE of New Jersey. Not asbestos shingles, but

many other substitutes were.

Mr. JONES. Of course we change and use different things from time to time, but before the Payne-Aldrich law was passed those changing conditions existed, and I am simply presenting

Mr. MARTINE of New Jersey. I believe the Senator will agree that the tariff is imposed generally and is paid by some

Mr. JONES. I am not going to go into the question as to who

pays the tariff. I have my views of it.

Mr. MARTINE of New Jersey. It is paid by the consumer. Mr. JONES. But you can not get around this list, which shows that the prices before the passage of the Payne-Aldrich law were as high if not higher than they have been since. shows conclusively to my mind that the tariff was not added to the domestic price, the consumer did not pay more by reason of it. The consumer of Canadian shingles paid no more than the domestic price, and the Canadian must have paid the duty and took it out of his profits. The consumer did not pay it.

Mr. MARTINE of New Jersey. Then, I ask, what is the use

of the tariff?

Mr. WARREN. Mr. President, a point of order.

The VICE PRESIDENT. The Senator from Wyoming will state his point of order.

Mr. WARREN. I call the attention of Senators to the rule that the Chair should be addressed before interruptions are made. We wish to hear this argument, and where both Senators are speaking at once it is very difficult to hear it.

Mr. MARTINE of New Jersey. I felt that I had gained the consent of the Chair. However, I am quite willing to stand reproved if I am in error. I realize, however, that in a little

controversy of this kind we very often dip in without going through the formality of asking the permission of the Chair.

Mr. JONES. To proceed, Mr. President; in April, 1911, the price of shingles was \$2. In May it was \$1.95. I will say that in each case the prices are for the same class of shingles. In July the price was \$1.95; in August, \$1.95; in September, \$1.93;

in December, \$1.85.

In 1912, in January, the price was \$1.75 to \$1.80; in April, \$1.91; in July, from \$1.95 to \$2; in August, \$2.20. In other words, in August of 1912 they came up substantially to the same price they were in August of 1909, just prior to the passage of the Payne-Aldrich law. Then, in September, they were \$2.40, quite a little higher. In October they were \$2.30. In November, coming down again, they were \$2; in December, \$2.15. In January of 1913 they were \$2.20; in March, \$2.15; in April, \$2.20; in May, \$2.25; in July, \$2.20 to \$2.25, or substantially the same as they were prior to the passage of the Payne-Aldrich

In other words, these figures show me that with the competition among our twn people they have maintained the price at the fowest possible level. It may not appear that way to some of our friends on the other side, but that is the only conclusion I can draw from the facts as they are here. try to avoid the facts. I let them speak for themselves. They need no aid from me.

Mr. JOHNSON. Mr. President, if the Senator will pardon an interruption, he spoke of the competition in this country. should like to inquire where the mills on Puget Sound meet

competition in the western part of the country?

Mr. JONES. I do not think the Senator was present when I spoke about the condition of the industry in my State. competition is among our own mills. There are nearly 500 of these shingle mills in my State. They are practically independent of each other. The competition is keen and sharp.

Mr. JOHNSON. In what other States are there any mills that saw shingles or deal in shingles except in the Senator's

State of Washington?

Mr. JONES. I do not know of any great industry in this line in any other State. Of course, I said that we produced practically two-thirds of the shingles used in the whole United States, but the competition is so sharp among the manufacturers of shingles in our State that they keep the wholesale price down to the minimum. As I read from some of the men engaged in that industry here, some of them have made no profit at all during the last four or five years. They have simply been able to keep their mills going. They have paid their help good wages, but the owners have received practically nothing on their investment. That, of course, does not apply to all. Some of them, I suppose, have made more than others. Some of them probably have better facilities than others; but, as a whole, the industry in my State has not made money. been able to maintain themselves, but the competition between them has kept down the price of shingles to the consumer.

The tariff increase that was made four years ago has not added to the price of the shingles, but it has possibly enabled our people to maintain the industry, and keep their men employed, pay them good wages, and keep the market from being

flooded and glutted by the mills from the other side.

From the most reliable information I can get, the Canadian mills are producing only about 50 per cent of their capacity to-day. If you take off this tariff entirely those mills will be given an opportunity to run to their full capacity; and according to our people, and as it looks to me, our industry will be very greatly injure. Many of our people will either have to go out of business of have to reduce the wages of their employees-one or the other. I take it that my Democratic friends do not want either condition to come about. I am satisfied of I am sure I do not. What we should like-and we think you can justify it independently of protection—is to have you put a small tariff upon this product. You can say it is for revenue if you want to. You will not violate any of the principles of your platform by doing that. It will give us what you may call incidental protection, if you wish.

Mr. WILLIAMS. Call it anything

Mr. JONES. We are perfectly willing to call it protection and revenue together, because it will bring revenue, and it will bring protection to the people in our State and to this industry. As the Senator from Mississippi says, we will call it anything in order to get it, because we want to preserve at least the present condition of the shingle industry and prevent its demoraliza-

This means a great deal to other people in our State as well as to those actually engaged in the shingle industry. As I pointed out a while ago, there are about 60,000 people in the State dependent upon this industry. Of course you do not think the industry will be injured. I hope it will not be, but our people think it will be. We are afraid it will be, and judging from the facts as they exist we can not help believing that it will be If it is, and these men are thrown out of employment, they will go into something else, possibly into agriculture. In that event they will make more competition for the farmers of our State, and they will also deprive the farmers who now supply the mouths of 60,000 people with their farm products of that much market. So the people in eastern Washington and other parts of our State where the shingle industry is not located are interested in the preservation of this industry just the same as the people who are actually engaged in it. These 60,000 people now are splendid customers for the products of the eastern Washington farm. I want them to continue so. They will not if they are thrown out of employment, and our farmers will suffer and not get their shingles any cheaper either.

I have taken more time on this matter than I intended to take, and more than I ought to take. I could point out the benefit the shingle man is in conserving the forest, but I will not take the time to do so. What I have said is enough to show the justice of this amendment. My State needs this industry. With millions of capital employed, millions paid out in wages, thousands of men employed, and many more thousands dependent upon the industry, we can appreciate and realize what it means if it is very seriously injured. We are very fearful that it will be. We think you could justify a small tariff upon the ground of revenue. Give us the benefit of it. Remove the fear we do not like even to express by making a fair reduction instead of taking it all off at one fell sweep.

I have offered an amendment that places the tariff at 40 cents a thousand. That is a reduction of 20 per cent. It leaves the tariff less than 20 per cent. Certainly that is a small enough duty for revenue. I have heard it suggested in regard to several propositions in this bill that 20 per cent, or 25 per cent, was nothing more than a tariff for revenue. We do not ask for any more than that. It will help us in our State. It will aid this industry, and it will bring revenue to the Government.

No Democratic principle, no Democratic theory, will be vio-lated by the adoption of this amendment; but if it is not adopted it may violate the proposition in your platform where you say that in making these reductions you propose to make

them in such a way as not to injure any legitimate business.

This is a legitimate industry. You take off all the tariff, notwithstanding the fact that it was raised four years ago. You may not think the increase then was necessary; but whether it was necessary or not, in accordance with the declarations in your platform, conditions have grown up under it, and to wipe out all the tariff, it seems to me, will inevitably injure the industry; it may do it any way, and you ought to err on the safe side and in the interest of a legitimate industry.

Mr. JOHNSON. Mr. President, before the question is put I wish to read into the RECORD a statement of the imports and the production of shingles in this country for 1912.

I find in the handbook which I have before me that we imported in the year 1912 shingles of the value of \$1,194,113.88. In the year 1910, which is the year for which the production is given, we produced \$30,262.462 worth. So that our imports are about 3 per cent of the production in this country.

In line with the policy of the Democratic Party of placing upon the free list articles of extensive use, necessities of life, we have placed lumber on the free list-a thing that some of the extreme protectionists have said should first go upon the free list, because it is one of the things which men first need to shelter them. We have placed different articles, such as sawed boards, clapboards, logs, and different varieties of lumber upon the free list, and in accordance with that policy we have

also placed shingles upon the free list.

Only a small part of the shingles imported into this country are imported at Puget Sound. A great many are imported at the port of Bangor, in my own State, and also in Vermont. They come into the New England States because the depletion of our forests and the lack of access to the cedar which is needed for the shingles compels us to go elsewhere, and to open up other fields in order to supply ourselves and meet the everincreasing demand.

For this reason we have placed shingles, with other articles, upon the free list. No reason occurs to the committee why any exception should be made of shingles, or why they should be treated differently from other kinds of lumber.

Mr. JONES. Mr. President, I have here resolutions adopted by the labor organizations in my State. I will say that these resolutions were adopted, not this year, but in 1909. They urge an increase in the then rate. I will say frankly to the

Senate that I have not received a single resolution from any labor organization of the State this year protesting against putting shingles on the free list. Possibly there are local conditions that account for that. I do not know. I wish to say, however, that it has been a surprise to me that labor has not manifested any interest in this matter, because if I thought labor would not be benefited by retaining the tariff I should not be in favor of retaining it. In my judgment, practically the only justification for a protective tariff is the benefit it brings to labor. As I say, there are local conditions which possibly account for the fact that they have not sent in resolutions this year.

These resolutions were sent in with reference to the proposal to raise the tariff under the Payne-Aldrich bill. I ask that they may be printed in the RECORD, because I believe they reflect the sentiment of labor now, together with other letters which I desire to send up, and also the table of prices from which I read part of the figures

The VICE PRESIDENT. Is there any objection? The Chair hears none, and that action will be taken.

The matter referred to is as follows:

SEATTLE, WASH., April 29, 1913.

BOARD OF TRUSTEES, New Chamber of Commerce.

GENTLEMEN:

Whereas because in the consideration of the proposed reduction of the present duty of 50 cents per thousand on shingles the following facts should influence any decision in the matter:

That 78 per cent of the shingles manufactured in the United States are manufactured from cedar in territory adjoining the Canadian border and under conditions not as favorable as those enjoyed by the manufacturer of cedar shingles in adjoining territory immediately across the line:

That 75 per cent of the singles manufactured in the United States are manufacturer of codar in territory adjoining the Canadian border and under conditions as farfold as those enjoyed by the manufacturer of codar shingles in adjoining territory immediately across the line;

That 65 per cent of the shingles manufactured in the United States are manufactured in the State of Washington;

That there are 375 shingle mills in the State of Washington, which give employment to about 15,000 men, with an annual pay roll of \$7,500,000;

That there is invested in shingle mills in the State of Washington \$4,154,000; the estimated investment in logging camps that supply these mills is \$1,463,998, and an estimated investment in timber that \$1,154,000; the estimated investment in logging camps that supply these mills is \$1,463,998, and an estimated investment in timber that \$1,154,000; the estimated investment in timber that \$1,154,000; the estimated investment in timber that \$1,154,000; the estimated of the codar can be utilized only in the manufacture of shingles;

That the mills of Washington can and always have been able to supply the demand for shingles, and that they have never been able to supply the demand for shingles, and that they have never been able to supply the demand for shingles, and that they have never been able to supply the demand for shingles, and that they have never been able to supply the demand for shingles, and that they have never been able to standing timber; with the duty entirely remove all cause a waste of small means; the records of the business show that the manufacturing of shingles has never been very profitable; the admission of shingles in the United States without the duty of 50 conts a thousand standing timber; with the duty entirely remove all cause a waste of standing timber; with the duty entirely remove all cause a waste of standing timber; with the duty entirely remove all cause a waste of standing timber in the States of the States and the conditions under which it can be shipped i

Resolved, That the board of trustees of the Seattle Chamber of Commerce is unalterably opposed to any reduction in the present duty of 50 cents per thousand on shingles, which duty is absolutely essential to the life of the shingle industry in the United States.

Resolutions presented by special committee consisting of John Mc-Master, J. S. Brace, Lewis Schwager, and adopted by board of trustees Seattle Chamber of Commerce, Tuesday, April 29, 1913.

### Quotations on shingles.

TACOMA, WASH., April 29, 1913.

Hon. WESLEY L. JONES, Washington, D. C.

DEAR SIR: In the matter of the proposed reduction in the United States import duty on shingles we wish to set forth some facts pertaining to the business for your information. We trust you will read this over carefully, as we feel sure that by so doing you will be convinced—if indeed you are not already—that it will be a grave mistake to remove or, in fact, in any way reduce the present duty of 50 cents per thousand on shingles.

In the first place, that next of the country, that will be most affected.

move or, in fact, in any way reduce the present duty of 50 cents per thousand on shingles.

In the first place, that part of the country that will be most affected by any action is the Pacific Northwest, including California. This for obvious reasons. The chief wood from which shingles are manufactured is red cedar, and this wood grows in a belt running north and south on the Pacific slope, from the Cascade Mountains to the ocean. This timber belt is heaviest in cedar in the State of Washington and the Province of British Columbia. Cedar also grows in Oregon, Idaho, and Montana, and in California shingles are manufactured from redwood. A Government report dealing with the 1910 cut of shingles in the United States says: "The quantity reported in 1910—12,976,362,000 shingles—is considerably smaller than in 1909, but greater than in 1908. Although a number of woods are used for shingles, over three-fourths of the total number manufactured during the three years were of cedar. The shingle output of the State of Washington in 1910 was about two-thirds of that of the country." From this it will be readily seen that any reduction in the present tariff will have its effect, most particularly upon the State of Washington. Therefore in setting forth facts regarding the shingle industry in the State of Washington we very fairly represent the industry as it will be affected by tariff changes.

The shingle mills in the State of Washington give employment to about 15,000 men, with an anual pay roll estimated at \$7,500,000. There is invested in these shingle mills not less than \$4,154,000. The investment in the logging camps which supply these mills with their raw material is \$1,463,998. The estimated investment in standing timber at present is \$10,471,446.

According to Government reports, there is standing in the State of Washington \$91,000,000,000 feet of timber. Of this amount the Government owns \$1,600,000,000 feet of timber. Of this amount the Government owns \$1,600,000,000 feet of the ratio of cedar as compared to the other woods is 16 per cent. On this basis we have 49,500,000,000 feet of standing cedar owned outside the Government. It is usually estimated by experts that 80 per cent of all cedar timber can be utilized only in the manufacture of shingles. Accordingly, we have 39,000,000,000 feet of standing cedar owned outside the Government. It is valuable only as raw material for shingles, and likewise for the same purpose the Government reports credit the State of Washington with supplying two-thirds of the total consumption of shingles in the United States, it is a fact that at no time have the shingle mills of this State been able to run to full capacity, because the demand has not been sufficient to consume the possible supply. Should the mills of this State run to full capacity, they could easily supply the demand for shingles inthoughout the entire United States.

The shingle mills of this State are owned and operated principally by men of small means, and it is unfortunately true that the business has not been profitable. The cedar trees grow at random among the fir, and the one can not be logged without at the same time taking out the other or destroying it. The majority of mên engaged in the shingle manufacturing business to day are in it from necessity and not from choice. While there has been any market for shingles owners of the timber have preferred to remove the cedar is carefull

an American port to an American port in anything but an American ship.

Therefore the removal of the present duty would practically put the shingle men of this State out of business, as the large holdings of cedar timber north of the Canadian line would immediately be opened up under such attractive conditions and an already over-supplied market would be flooded with a product against which our manufacturers could be flooded with a product against which our manufacturers could

would be flooded with a product against which our manufacturers could not compete.

This means that 12.8 per cent of all the timber, which amount now goes into the manufacture of shingles, would be burned up and wasted. This applies alike to Government and privately owned timber, and in the Pacific Northwest means a loss to the Government of approximately 57,000,000,000 feet of timber.

When the duty on shingles was 30 cents per thousand, Canadian mills shipped into the United States about 5,000 cars annually. Since the duty has been 50 cents a thousand, British Columbia mills have been kept out of our market. Should the duty be entirely removed the volume of Canadian shipments would increase to three times the amount of imports during the years of the 30-cent duty, or at least 15,000 cars per year.

of imports during the years of the 30-cent duty, or at least 15,000 cars per year.

If the removal of this duty meant cheaper shingles to the consumer and at the same time any sort of practical conservation, there might be merit in the proposition, but it must be remembered that Canadian operators do not operate under the laws of the United States, that they know no Sherman antitrust law, that combinations to control markets are not forbidden in Canada, according to our understanding; hence the consumers of this country would not in any way be benefited; but, on the other hand, foreign capital and foreign labor would reap the benefit, while manufacturers and laborers employed in the milis of this country would have to suffer.

In the above statements we have not overdrawn the facts, but have given you figures that represent the true state of affairs, and we invite and urge careful investigation into the authenticity of these statements. When you find what we have said to be true, we feel that in all justice to our own people, none of whom will be helped by the removal of the duty, but many of whom will be greatly injured, you will vote for the retention of the whole duty as it now stands and for no reduction in it whatsoever.

Yours, respectfully,

WEST COAST LUMBER MANUFACTURERS' ASSOCIATION, By W. C. MILES, Manager.

THE QUEEN MILL Co., Edmonds, Wash., April 14, 1913.

Hon. W. L. Jones, Washington, D. C.

Washington, D. C.

My Dear Senator: In behalf of the 10 shingle manufacturers of our little city, I beg to request you and your associates from our great State of Washington to do all in your power to retain the present duty of 50 cents per 1,000 on shingles. You are well acquainted with the conditions under which we are manufacturing shingles, but I will endeavor to refresh your memory on a few points in this line.

When we had a 30-cent duty Canada shipped into the States about 5,000 cars annually, and under the present duty has been practically cut out, and there has not been any advance on shingles on account of this increase, but, in fact, the competition among our own mills has lowered the price, and the dealer has been getting his shingles at practically cost of production for several years, and if we have free shingles we will be put out of commission; that is to say, us small manufacturers. I do not know of more than 3 mills out of the 10 here that

have declared a dividend in five years, and for me personally, with \$20,000 in the business, I will have to sacrifice my site and get nothing out of my plant and quit the business, and lose nearly all my worldly possessions, and this is in a measure true of hundreds of us. We are the scavengers of the woods and use what will have to go to waste. If we are thrown in direct competition with British Columbia shingles and their oriental labor. We pay very high wages to our employees; they are from \$3 to \$3.50 for common labor and from \$4 to \$9 for skilled labor.

labor.

Should this duty be removed it would throw an untold number of men out of employment, or we would have to reduce their salaries about one-half to compete with British Columbia.

Shingle mills can be bought at present and under our 50 cents protection by the dozen for one-third the cost of the machinery alone; and what will it be if we get free shingles?

Knowing as you do the conditions under which we are laboring, we have no doubt you will do all in your power to retain the present duty on shingles.

I beg to remain,

Most sincerely, yours,

President of the Queen Mill Co.

B. F. WASSER, President of the Queen Mill Co.

P. S.—If this would be of any use to the Hon. W. E. HUMPHREY, I would be pleased to have you submit it to him.

SEATTLE, WASH., April 16, 1913.

Senator Wesley L. Jones, Washington, D. C.

Senator Wesley L. Jones, Washington, D. C.

Historius Sh.: Representing about 175 shingle mills, members of this association, we use for the professer against the placing of shingles on the free list, as we understand is proposed by the new tariff soon to be before the House.

At a hearing before the Ways and Means Committee and in debate in the House in 1909, when the Payne tariff was under discussion, the mass per thousand to for the hearing was that the duty or red leads the control of the hearing was that the duty or red leads the control of the hearing was that the duty or red leads the control of the hearing was that the duty or red leads the control of the hearing was that the duty or red leads the leads are thousand to 50 cents per thousand, where it now is.

The industry of manufacturing red cedar shingles, while a comparatively small one when compared with the commerce of the United States per thousand to 60 cents per thousand, where it now is.

The industry of manufacturing red cedar shingles, while a comparatively small one when compared with the commerce of the United States, provided the control of the state lying between the Cascade Mountains and the Pacific Ocean. In that territory is manufactured each year about 65 per cent of the entire quantity of shingles manufactured in the United States. This proportion is undoubtedly increasing from year to year with the control of the c

cedar on his land and from the tall stumps logged off years ago when the stumps were not cut as low down as now. This class of timber, while making good shingles, naturally costs more to cut up than the fine clear bolts of British Columbia and there is more waste, but it has been of almost inestimable benefit to our rancher and farmer in tiding him over the period when his land is being prepared for crops, and if you had ever attempted to clear logged-off lands in western Washington you would realize what a task that is.

The free list is supposed to contain largely raw materials. It may not have occurred to you that the value of the red cedar shingle placed on board the cars here in western Washington is largely labor. Stumpage is valued at from \$1 to \$2.50 per thousand for cedar, according to its accessibility. This means the raw material in 1,000 shingles is worth from 10 to 30 cents, the balance is labor—labor in the woods, labor in bringing the logs to the mills, labor in the mills manufacturing the shingles, and labor in the supplies used. The profit to the manufacturer is slight. Statistics will show a lamentable list of failures in the shingle-manufacturing industry. A profit of 20 cents per thousand to the mill owner would be deemed a splended return. Take 20 cents as the average raw material and 20 cents for the manufacturers' profit. This means about \$1.50 to \$1.75 that goes to labor and supplies, which are largely labor. There are few industries where the selling value is so largely labor. Why, then, should this industry be one singled out for the free list? Can wool or cotton or steel show so large a percentage of labor? We think not.

The Congressional Records of 1907 and 1908 contain all the arguments needed to show our reasons for active western the sellow the ments needed to show our reasons for active western the sellow.

so largely labor. Why, then, should this industry be one singled out for the free list? Can wooi or cotton or steel show so large a percentage of labor? We think not.

The Congressional Records of 1907 and 1908 contain all the arguments needed to show our reasons for asking you to give us a chance out here in the West. To show you, however, that the labor situation has not changed since that time we are sending to Congressman HUMPHREY a series of photographs taken during March, 1913, at a number of different mills in and near Vancouver, British Columbia.

We feel that the present duty is reasonable and just, but if along with reductions in the tariff on other commodities our industry should stand its share, would it not be reasonable to reduce the tariff on shingles to 30 cents, practically cutting the present duty in half, and in this way carrying out the pledge of the great Democratic Party to the people?

Another thing should not be lost sight of, and that is that the British Columbia manufacturers have for the past two years had an ironclad combination. The consumption of shingles in Canada is divided up among the different manufacturers according to the number of machines which they have, and they are allowed to cut only their apportionment. Our laws will not permit of this. In this way they are getting for their 6/2 shingles in Canada more than we have averaged for our thicker 5/2 shingles in the United States. They have, however, been able to run only about half their capacity and are looking anxiously to the States to enable them to run full time, holding up their market on their own shingles in Canada and using our country as a dumping ground for their surplus. If such a calamity should occur as shingles being put on the Yree list, something should be done to prevent their using this country as a dumping ground, and if they should sell shingles in the States at less than their held price in Canada, a duty to cover such difference should be imposed.

On the opening of the Panama Canal we will be at a fu

which they can use to cut us out of our own market.

If we are to compete on even terms, arrange so that our logs from British Columbia and other sources will cost the same, that our freights will be the same, that our labor cost be the same, and we will gladly withdraw opposition; but it is unfair to ask us to meet competition when we are handicapped by our own laws or the laws of neighboring countries which compel us to pay more for labor, more for raw material, and more for transportation. If we are compelled to meet British Columbia competition we should have the privilege of employing oriental labor and using foreign bottoms. This we do not want and do not ask for, but our fellow countrymen should not be handicapped by our own laws to the benefit of the foreigner.

Some of these things may not have been brought to your effection.

Some of these things may not have been brought to your aftention, and we would respectfully ask your consideration of this matter and hope you will lend your influence to help an industry which to the United States as a whole is a small one, but which is of material importance to our growing State.

importance to our Respectfully

RED CEDAR SHINGLE MANUFACTURERS' ASSOCIATION, F. A. TRAILL, Manager.

CLEAR LAKE LUMBER Co., Clear Lake, Wash, May 27, 1913.

CLEAR LAKE LUMBER CO...

Clear Lake, Wash, May 27, 1913.

Hon. W. L. Jones,

Senator, Washington, D. C.

My Dear Sir: I have no doubt that you have been and are doing everything in your power to aid the shingle manufacturers of this State in retaining the duty on shingles shipped into the United States. The company which I represent is a large manufacturer of shingles. We expect to cut this year almost 150,000,000 shingles. We employ in our shingle mill alone about 60 men, with a monthly pay roll of \$7,500. In addition to these men an equal number are employed in the woods getting out the timber for the shingle mill, with a pay roll equal to the one in the mill itself. If the shingles from British Columbia are permitted to come into the United States free of duty, I have not the slightest doubt that it will mean a period of stagnation running over from one to three years, with possibly a large portion of these men thrown out of work. It will mean at the very least a material reduction in their wages and a very great disturbance in industrial conditions in this State.

If you find, when the matter finally comes to the point of being

If you find, when the matter finally comes to the point of being decided, that the duty can not be retained, I hope that you will do everything you can to place a duty at least upon shingles and lumber exported to this country from British Columbia. This would be only a matter of fairness, since they place on any raw material exported from British Columbia an export duty. The duty on their material shipped into this country would have the effect, in my opinion, of removing this export duty on logs. If we could have their logs to cut up here in the State of Washington it would be a very material help to us.

I wish to thank you at this time for the very good work you have done so far on this case, and to advise you that the lumbermen here certainly appreciate the efforts that you have made in our behalf. Very truly, yours,

TACOMA, WASH., April 22, 1913.

Hon. Senator W. L. Jones, Washington, D. C.

Hon. Senator W. L. Jones,

Washington, D. C.

Dear Sir: Reference tariff on shingles. You perhaps are aware of the shingle situation in this State. For the past five years there has been practically no profit whatever in the manufacture of shingles, and in the meantime the British Columbia shingles have been selling in competition with us and paying 50 cents per thousand duty.

The question before us now is, What is going to happen to our shingle investments providing this duty of 50 cents is eliminated? The cost of shingles, as you are aware, is greatly made up of labor. In British Columbia they use oriental labor almost exclusively, which gives them a considerable advantage in the cost of manufacturing, as we are up against the Shingle Weavers' Union.

In addition to this, the Government stumpage in British Columbia on a license or Crown grant is from \$2 to \$2.50 per thousand board measure cheaper than ours. Under the circumstances you can readily see how and why they compete with us now and where we would be at if they did not have to pay this 50-cent duty.

A friend of mine, Mr. Stevens, of the Steavens-Eaton Co., New York, visited me yesterday, and I asked him if he had been selling many British Columbia shingles this past year or two, and he said that they represented \$5 or 90 per cent of his sales of shingles, and with the duty off there would be no doubt but that his entire sales would be British Columbia shingles.

In addition to this, the matter of free tolls enters in. Granting that the British Columbia shingle manufacturers can produce shingles at a far lower cost than we, if they have free tolls through the canal or on the same basis as ours, and we are forced to use American vessels, while they, of course, can use vessels of any nation of the world, the benefits of this canal, for which we have all paid our share, are absolutely all. This is not only true in the shingle business, but it is true in the lumber business, and unless American ships are granted free tolls we can not expect to compete wi

Thanking you very kindly in advance, we are, Yours, very truly,

TACOMA & EASTERN LUMBER CO., By E. W. DEMAREST, Manager.

PACIFIC COAST SHIPPERS' ASSOCIATION, OFFICE OF THE SECRETARY, Seattle, Wash., April 22, 1913.

Seattle, Wash., April 22, 1915.

Hon. W. L. Jones,

Senator from Washington, Washington, D. C.

Dear Sir: The International Shingle Weavers' Union of America will of course be vitally affected if duty is taken off of Canadian shingles. They are of course very busy with the strike and nothing much can be gotten out of them, but for your information I find by the Congressional Record that they sent a telegram during the former hearing under date of April 26, 1909, to the Congressmen in Washington, D. C., at that time, and their message reads as follows:

Seattle, Wash., April 28, 1900.

SEATTLE, WASH., April 26, 1909.

To the Congressmen, Washington, D. C .:

Having in mind the welfare of the wage earners of the shingle industry, whose standard of living and morals are seriously impaired by competition with Asiatic labor, we most earnestly appeal to you to use every honorable method to secure additional tariff on shingles, that our industry may be saved to white workmen.

INTERNATIONAL SHINGLE WEAVERS' UNION, C. J. FOLSON, President. W. E. WILLIS, Secretary.

We also note that the president of the Shingle Weavers' Union wrote a letter as follows:

SEATTLE, WASH., January 15, 1909.

To the CONGRESSMEN Washington, D. C .:

I am sending you herewith copy of a set of resolutions which were passed at the recent convention of the International Shingle Weavers' Union of America. I am sure that you will do all that is possible to see that the facts recounted therein are presented where the most good

will result.

Yours, very truly,

President International Shingle Weavers' Union of America.

The resolutions read as follows:

The resolutions read as follows:

"Resolutions adopted by the International Shingle Weavers' Union of America in convention at Olympia, Wash., January 4, 5, 6, 1909:

"Whereas during the past 10 years there has been a tariff of 30 cents per thousand on shingles imported by the United States;

"Whereas during all this time the imports of Canadian shingles into the United States have steadily increased—have doubled in the last few years—and in the years 1906 and 1907 reached the large total of 8,909 carloads, through which the wage loss to the white workmen in the Washington shingle industry amounted to approximately \$1,000,000, or practically \$40,000 per month;

"Whereas the shingle manufacturers in British Columbia are able to inflict this enormous loss on the wage earners in the Washington shingle industry through the employment of Asiatics, who compose 80 per cent of the working forces in the British Columbia shingle influstry through the employment of Asiatics, who compose 80 per cent of the working forces in the British Columbia shingle mills, and who accept a very much lower wage compensation and a very much lower standard of living than can the all-white labor of the Washington shingle industry;

"Whereas the white wage earners in the Washington shingle industry have better and higher conceptions of the industrial, social, hygienic, and moral well-being, and, realizing the ideas of their race and Nation, have trained themselves to conform to a standard of living in accordance with 'American ideas of American civilization;

"Whereas the increasing imports by the United States of Asiatic-made shingles of British Columbia constitute a menace to American institutions by driving white workmen out of the Washington shingle mills, depriving these workmen of the means to maintain themselves and families, thus lessening the amount of money available to farmers, merchants, and other business men in the United States:

selves and families, thus lessening the amount of money available to farmers, merchants, and other business men in the United States;

"Whereas the wage earners in the Washington shingle mills have been forcedly idle nearly 12 months during the past 24 months;

"Whereas they are to a great extent engaged in producing shingles from fallen, fire-blackened, and other cedar that would be otherwise wasted and be a dead loss to the State and to the Nation;

"Whereas the first consideration of the United States Government should be the welfare of its own citizens; and

"Whereas it is understood that some misinformed people now advocate the reduction of the present tariff of 30 cents per thousand, which is even now an inadequate protection against Asiatic shingles made in British Columbia: Wherefore, for these reasons,

"We respectfully and firmly protest against any reduction of the present tariff, and we do earnestly and strongly urge all legislators to save the industry and to protect our necessary wage interest by fixing an adequate protective tariff against Asiatic-made shingles—a tariff of, preferably, 50 cents per thousand.

"Voted, That a copy of these resolutions be sent to each member of the Washington State Legislature, with the request that they memorialize Congress to grant the Washington shingle industry an adequate protective tariff of preferably 50 cents per thousand.

"Voted, That the Ways and Means Committee of the House of Representatives and United States Congressmen from shingle manufacturing districts covered by the International Shingle Weavers' Union of America be furnished with copies of these general resolutions."

Yours, very truly,

F. D. Becker, Secretary-Manager.

TACOMA, WASH., April 12, 1913.

Senator W. L. JONES, Washington, D. C.

Senator W. L. Jones,

Washington, D. C.

Dear Sir: We are in receipt this morning of a circular from our Pacific Coast Shippers' Association, of which we are usembers, requesting us to write Members of Congress in regard to the duty of 50 cents a thousand on lumber.

We will say that we differ somewhat in this matter from the association and are not in favor of duty on steel, the breakfast table, or lumber. From an experience of something like 12 years in the lumber business we are satisfied that the duty is a scarecrow. Whereas possibly stumpage in British Columbia is somewhat less than in Washington and Oregon, the cost of logging on account of the very rough condition of the country more than makes up for the difference, and we venture to say that the cost of producing logs at the foot of the slip is more than the same in Washington. The mills in Washington have been shipping thousands of cars a month the last two or three years into British Columbia at less price than the British Columbia mills care to manufacture the same.

The same thing applies on rolled oats, which we notice in the morning paper. Washington and Oregon are the greatest producers per acre of oats of any State in the Union, and there is no reason at all for any duty on this commodity.

This is the opinion of not only ourselves but of millions of other people that originally voted the Republican ticket up to 1912.

Wheeler-Reese Lumber Co., Weller Wheeler, Vice President.

WHEELER-REESE LUMBER Co., WELLES WHEELER, Vice President.

Mr. POINDEXTER. Mr. President, my distinguished colleague has very briefly pointed out how a moderate tariff on shingles would be entirely consistent with the theory of the party which is framing this tariff bill. I think he is entirely correct in that; and in that connection it seems to me that a moderate tariff upon shingles, considering the importance of the industry, particularly to the State of Washington, would be in harmony with this declaration:

The annual revenue, after paying current expenditures, pensions, and the interest on the public debt, should furnish a moderate balance for the reduction of the principal, and that revenue, except so much as may be derived from a tax on tobacco and liquors, should be raised by duties on importations, the details of which should be so adjusted as to aid in securing remunerative wages to labor and promote the industries, prosperity, and growth of the whole country.

That was the tariff platform of the Liberal Republican Party in 1872. It was expressly indorsed by the Democratic Party and adopted as the platform of the Democratic Party in that year.

It seems to me that it would also be in harmony with this declaration:

declaration:

Knowing full well, however, that legislation affecting the operations of the people should be cautious and conservative in method, not in advance of public opinion but responsive to its demands, the Democratic Party is pledged to revise the tariff in a spirit of fairness to all interests, but in making reductions in taxes it is not proposed to injure any domestic industries, but rather to promote their healthy growth. From the foundation of this Government taxes collected at the customhouse have been the chief source of Federal revenue; as such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. * * * The necessary reduction and taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country.

That was the declaration of the Democratic Party in its plat.

That was the declaration of the Democratic Party in its platform of 1884.

It seems to me that a moderate tariff on shingles, say a reduction on the present tariff of 50 per cent, would be a pretty substantial reduction and would also be in harmony with this declaration:

Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation. On the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, must promote and encourage every branch of such industries and enterprises.

That sounds like a Republican Party platform, but as a matter of fact it was the Democratic Party platform of 1888.

It is also in harmony with this principle:

We recognize that our system of tariff taxation is intimately connected with the business of the country, and we favor the ultimate attainment of the principles we advocate by legislation that will not injure or destroy legitlmate industry.

That is the Democratic platform of 1912.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Washington.

Mr. JONES. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence, I withhold my vote.

Mr. CHILTON (when his name was called). I transfer my general pair with the junior Senator from Maryland [Mr. Jackson] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nay."

Mr. McCUMBER (when Mr. Gronna's name was called). My colleague [Mr. Gronna] is necessarily absent. He is paired

with the junior Senator from Illinois [Mr. Lewis].

Mr. LEWIS (when his name was called). I am paired with the junior Senator from North Dakota [Mr. GRONNA], and

therefore withhold my vote.

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. Newlands]. As he is absent from the Chamber, I will withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. Burton]. I transfer that pair to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "nay."

Mr. JONES (when Mr. Townsenp's name was called). I de-

sire to announce that the junior Senator from Michigan [Mr. Townsend] is necessarily absent. He is paired with the junior Senator from Florida [Mr. Bryan]. I will let this anounce-

ment stand for the day.

The roll call was concluded.

Mr. REED. I am paired with the senior Senator from Michigan [Mr. SMITH], and therefore withhold my vote.

Mr. BRYAN (after having voted in the negative). I transfer my pair with the junior Senator from Michigan [Mr. Townsend] to the junior Senator from Nevada [Mr. PITTMAN], and will allow my vote to stand.

Mr. BACON. I inquire if the senior Senator from Minnesota
[Mr. Nelson] has voted?

The VICE PRESIDENT. He has not.

Mr. BACON. I withhold my vote. If he were present, I should vote "nay.

Mr. LIPPITT. I have a pair with the senior Senator from Tennessee [Mr. Lea], which I transfer to the junior Senator from Maine [Mr. Burleigh] and will vote. I vote "yea."

Mr. GALLINGER. I have been requested to announce the following pairs: The senior Senator from Delaware [Mr. DU PONT] with the senior Senator from Texas [Mr. Culberson]; the junior Senator from West Virginia [Mr. Goff] with the Senator from Alabama [Mr. BANKHEAD]; the junior Senator from North Dakota [Mr. GRONNA] with the junior Senator from Illinois [Mr. Lewis]; and the junior Senator from Pennsylvania [Mr. OLIVER] with the senior Senator from Oregon [Mr.

The result was announced-yeas 21, nays 44, as follows:

Bradley Brady Brandegee Catron Clark, Wyo. Colt	Dillingham Gallinger Jones Lippitt Lodge McLean	Page Penrose Perkins Poindexter Root Smoot	Sterling Warren Weeks
	NA	YS-44.	
Ashurst Bristow Bryan Chilton Cummins Fletcher Hollis Hughes	Kern La Follette Lane Martin, Va. Martine, N. J. Myers Norris O'Gorman	Ransdell Robinson Saulsbury Shafroth Sheppard Shields Shively Simmons	Smith, S. C. Stone Swanson Thomas Thompson Thornton Tillman Vardaman
James Johnson Kenyon	Overman Owen Pomerene	Smith, Ariz, Smith, Ga. Smith, Md.	Walsh Williams Works

	NOT	VOTING-30.		
Bacon Bankhead Borah Burleigh Burton Chamberlain Clapp Clarke Ark	Crawford Culberson du Pont Fall Goff Gore Gronna Hitchcock	Jackson Lea Lewis McCumber Nelson Newlands Oliver Pittman	Reed Sherman Smith, Mich, Stephenson Sutherland Townsend	

So Mr. Jones's amendment was rejected.

Mr. JONES. I desire to offer the amendment so as to read 25 cents per thousand instead of 40 cents. I simply desire to say that that is a reduction of 50 per cent, or 5 cents below the Dingley law. On this amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. BANKHEAD (when his name was called). I am paired with the Senator from West Virginia [Mr. Goff]. If he were present, I would vote "nay."

Mr. BRYAN (when his name was called). I have a pair with the junior Senator from Michigan [Mr. Townsend], transfer to the junior Senator from Nevada [Mr. PITTMAN], and vote "nay."

Mr. CHAMBERLAIN (when his name was called). In the absence of my pair, the junior Senator from Pennsylvania [Mr.

OLIVER], I withhold my vote.

Mr. CHILTON (when his name was called). make the same announcement as to my pair and its transfer that I made on the former vote. I vote "nay."

Mr. LIPPITT (when his name was called). I again transfer my pair with the Senator from Tennessee [Mr. Lea] to the junior Senator from Maine [Mr. BURLEIGH]. I vote "yea."

Mr. McCUMBER (when his name was called). On account of the absence of my pair, the Senator from Nevada [Mr. New-LANDS], I withhold my vote.

Mr. THOMAS (when his name was called). I make the

same transfer as before and vote "nay."

The roll call was concluded.

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Montana [Mr. WALSH], and vote "nay."

Mr. CLARKE of Arkansas. I desire to know whether the junior Senator from Utah [Mr. Sutherland] has voted.

The VICE PRESIDENT. He has not.

Mr. CLARKE of Arkansas. Then I will not vote, being paired

with that Senator.

Mr. BACON. I again announce my pair with the senior Senator from Minnesota [Mr. Nelson]. In his absence I withhold my vote. If he were present, I should vote "nay."

Mr. WEEKS. I have a general pair with the Senator from Kentucky [Mr. James]. If he were present, I should vote

The result was announced—yeas 22, navs 42, as follows:

So Mr. Jones's amendment was rejected.

Mr. GALLINGER. Mr. President, I have an inquiry to make that may save time, and I am extremely solicitous to save time in the further consideration of the bill. If my inquiry is not answered, I might feel when the bill gets into the Senate like offering some amendments.

First, I will ask the chairman of the Committee on Finance if he has given any further consideration to the duty on granite? The Senator from North Carolina, when it was up before, said he had heard no complaints. I have a very urgent complaint from the Salisbury, N. C., branch of the Granite Cutters' International Association of America, transmitting a copy of a letter

that was sent to the distinguished chairman of the committee.

Mr. SIMMONS. The Senator understands perfectl, well that it is not possible for me to read everything that is sent to me as chairman of the Finance Committee. I did not mean to say that no such communication had come to the committee. I will state to the Senator that my plan of dealing with this matter when these communications came to me has been that by my direction my secretary sends them to the subcommittees having charge of the subjects under consideration.

Mr. GALLINGER. Oh, I understand that. I am not complaining at all. The only purpose of my question was to ask the Senator if there is any possibility of having the committee look a little further into the matter.

Mr. SIMMONS. I think, Mr. President, we very thoroughly discussed that particular question and passed upon it, and I know of no disposition to reconsider it.

Mr. GALLINGER. If it is foreclosed, that ends the matter

and answers my interrogatory.

Now, Mr. President, one other matter. I have forgotten what Senators constitute the subcommittee on Schedule C, Metals and manufactures of. I want to make a little inquiry about one item in that schedule. If the subcommittee will honor me with their attention, paragraph 137 relates to the duty on needles of vari-

think it is safe to say, Mr. President, that in all previous tariff bills-I feel sure I speak advisedly-latch needles have been differentiated from the others and given a little higher duty. They are now in this bill, thrown in with all other classes of needles, and the duty of 25 per cent allowed by the House was reduced to 20 per cent by the Senate committee, and that has been agreed to. I made my protest and was voted down

I should like to say to the subcommittee that I wish they would give the matter a little further consideration in their moments of leisure, if they ever have any, and I apprehend they have not many, with a view of seeing whether they could not, following precedents, take latch needles out of the list of the others and give those needles a duty of 30 per cent ad valorem. The present duty I think is 60 per cent or more.

I simply call it to the attention of the subcommittee. hear nothing further from it, I shall have to be satisfied. If the subcommittee, after looking into the matter and finding that that particular class of needles, on which there is more labor, has been given heretofore a little higher duty, felt like carry-

ing out my suggestion, I would be gratified.

That is all. I have said this for the purpose of saving time in

the future consideration of the bill.

Mr. SIMMONS. Mr. President, this affords me the opportunity to read a letter which I received from Torrington, Conn., written August 12. I think that was a day or two after we had under consideration and discussion in the Senate this paragraph. During the course of his speech in favor of high rates upon the industries of Torrington, and chiefly, I believe, the manufacture of needles, the Senator from Connecticut [Mr. McLean] had something to say about the probability of some of those industries moving their plants over to Germany, I think, or to Canada, possibly; I do not remember which. The letter I have is from Mr. Thomas A. Carroll. Of course, I do not know him. It is directed to me as chairman of the Committee on Finance, dated August 12, 1913. I will read only an extract from it. He says:

from it. He says:

DEAR SIR: As a constant reader of the Congressional Record I found much that displeased me with the impression George P. McLean, of this State, sought to give your body when the tariff on needles was being discussed. He referred to the speech delivered by Congressman Underwood at Waterbury and drew a vivid picture, as I understand it from the Record, of many needle workers from Torrington being in the audience, drinking in the tariff wisdom of Congressman Underwood, taking it for political gospel, being converted to the Wilson cause, and then going back home and voting the ticket on election day that put President Woodrow Wilson, Democrat, in office.

Unfortunately—and I sincerely hope that it is for the last term—both United States Senators from Connecticut are Republicans. They are about the only calamity howers from the Nutmeg State that I know of at the present time. Business at the Excelsior Needle Co.'s plant here, of which Senator McLean appears to be so solicitous, was never better, and the folly of the statements on his part that the business will have to be removed to Germany if the tariff is lowered is evidenced from the fact that at the present time a large addition is being built to this needle factory. Similar conditions obtain at the plants of the Standard and Progressive companies, both of which, like the Excelsior Needle Co.'s factory, are affiliated with the Torrington company.

There is more of the letter, but that is all I desire to read. Mr. LEWIS. Mr. President, I should like if one of the pages could inform the Senator from New York [Mr. Root] that I desire to make some references to his observation as delivered by him this morning. He went out of the Chamber, and I do not like to speak concerning his remarks during his absence.

Mr. GALLINGER. While the Senator is waiting I want to add just a sentence, if the Senator from North Carolina [Mr.

SIMMONS] will permit me.

I know nothing about the Torrington factory at all. We have, think, seven or eight needle factories in New Hampshire. Some of our most prominent men are connected with them in one way and another, some Democrats and some Republicans, and they are all very solicitous about this particular item. All I have asked is that it be looked into a little further, and whatever the conclusion is will not satisfy me, but under stress, of

course, I will have to accept it.

Mr. BRANDEGEE. In connection with the matter that the Senator from New Hampshire [Mr. Gallinger] and the Senator from North Carolina [Mr. SIMMONS] have just been discussing, I wish to interpolate a word, if the Senator from Illinois will

Mr. LEWIS. Yes; I yield for a moment. I do not yield the floor.

Mr. BRANDEGEE. Oh, no. I will not take over a minute. The Senator from North Carolina [Mr. Simmons] has referred to some statement made by my colleague [Mr. McLean] the other day in relation to the needle business in Torrington, in my State. I will say that my colleague at present is absent from the floor, attending to his duties as a member of the Banking and Currency Committee, which is having a hearing upon pending legislation.

As regards the situation in that business, I read from a letter signed by C. B. Vincent, secretary of the Excelsior Needle Co., of Torrington, Conn., which is the company to which the Senator

referred. He states:

referred. He states:

We are inclosing a brief on sewing-machine needles such as we submitted to the Ways and Means Committee. We think that this brief was not published as submitted, as we asked that some paragraphs be left out, we believing that it would injure us to give our costs so in detail to our foreign competitors, and we should like to ask that you do not allow these figures to get out for publication.

The Ways and Means Committee made the duty 25 per cent, a reduction of \$1 per thousand. The Finance Committee of the Senate have changed the already low 25 per cent to 20. This is a serious matter to us and we wish that if there is any way you can help us to at least retain the 25 per cent as fixed by the Ways and Means Committee, you will do so.

I simply put that into the RECORD to show that while the gentleman who signs the communication to the Senator from North Carolina, whose name I did not catch, and about which I do not care anything-

Mr. SIMMONS. I will give the name to the Senator again:

Thomas A. Carroll.

Mr. BRANDEGEE. I will say in passing that I think the president of the company is probably a better judge of his own business and of the proceedings of the company than the gentleman who expressed his political views to the Senator from North Carolina.

I have no doubt that is so. Mr. Carroll Mr. SIMMONS. writes a very intelligent letter, but I am sure that the president of the company knows more about the business than he does, and he is showing his confidence in the future of the business not by preparing to move his plant to Germany, as was suggested, but by doubling its capacity, if the statement of Mr. Carroll is true.

Mr. BRANDEGEE. I have no doubt that he relied upon the promises of the Senator and his President and his party that they would not hurt his legitimate business, and he started an

addition which he no doubt very much regrets at present.

Mr. SIMMONS. He has had three or four months in which to stop it if he is going to move to Germany. There is no rewhy he should continue to build if he is going to Germany. There is no reason

Mr. LEWIS. I have the floor.

Mr. BRANDEGEE. I do not wish to trespass upon the time of the Senator from Illinois at any further length.

Mr. LEWIS. Mr. President, I am emboldened at this moment to make some observations concerning the views of the senior Senator from New York [Mr. Root], just expressed by him, upon a feature of the income tax-the exemption.

I was particularly attracted, Mr. President, by the allusion of the distinguished Senator to what he feared was an invasion upon the right and privilege of the States to protect themselves it, the matter of their income, also as to the application of their incomes to their own need. The Senator was concerned as to the States maintaining their power and right to levy a tax within the State to obtain the income for their home uses. As I listened to him-I was strongly impressed with the wisdom of Thomas Jefferson's observation that "an often recurrence to fundamental principles is salutary and preserving."

The distinguished Senator from New York addressed his ob-

servations to that theory of government which the men of the

g themselves Democrats, school of politics such as I adopt, ca have ever advocated as essential to the real preservation of the theory of this Republic. That is the right of home rule in the States-the defeating of any attempt or power of the National Government to invade the precincts of the States and by presuming upon an assumed privilege of national authority prevent the local government from exercising its privilege and rights within those constitutional guaranties which the founders of our Government intended it should enjoy. I was particularly attracted by the distinguished Senator-recognizing his eminent ability and paying great tribute to his skill as a lawyer and his experience as a statesman-in warning the Democracy-turning to this side of the House-of how it was on the eve of permitting a measure to pass in this body which would not only invade the privileges of the States, but destroy their local autonomy-and greatly distress the State of New York-by its audacious intrusion.

Mr. President, I join with that distinguished statesman from New York in not only expressing the fear of such approach, but I go one step further, and denounce the evil of its present existence; but I am compelled to remind the distinguished Senator from New York that if any man should ask me as a fellow American to what source I would charge this new growth of centralism and centralization—this encroachment upon the States to which he alludes; I would be compelled to turn to the distinguished Senator from New York and in the accusation of the humble shepherd in Israel to the King say: "Thou art

the man.'

I can not forget, nor should this country forget, that at a time when a constitutional lawyer might have been prudent to guard the relative functions between the States and the Nation there arose in this country, in a national administration which was then in power, a general tendency to override both the privileges and the rights of the States; this to accommodate itself to the mere expediency of politics on the one hand and to gratify the hue and cry of multitudes on the other. Sir, I recall that it was the distinguished Senator from New York who, in a very eloquent address-characteristic of the ability that ever attends his utterances-at a state dinner of the Pennsylvania Society in the Waldorf-Astoria Hotel-struck a new keynote in the pursuit of the policy of his then chief, then President of the United Mr. Roosevelt. It was the doctrine asserted just previously by President Roosevelt at the laying of the corner stone of the capitol at Harrisburg, Pa. In the wake of this utterance threatening the existence of the States as sovereign bodies, the distinguished Senator from New York at the Waldorf gathering said, "As the States will not do their duty, and because they will not do their duty"—the Senator measuring that duty by the standard of the distinguished Senator and his distinguished chief-"the National Government must step in and do it for

Thus the people of this country were educated to the theory that wherever a State had large riches, such as New York; bountiful wealth, powerful men, eminent politicians, financial jugglers and acrobats of honesty, the State is assumed to be unable to control itself. According to the idea then put forth to the multitude all this was due to the fact that the State would not control itself. Then and there the people were educated by the Senator that it was then the duty of the National Government to step in, administer the punishment, and inflict the chastisement on the State and pluck the merely well to do because of the State's failure to act as certain interests demand.

Mr. ROOT rose.

Mr. LEWIS. I see the Senator from New York rises. I dare say he desires me to yield for an interruption. I do so at once. Mr. ROOT. I feel humiliated, Mr. President, by the revelation of the fact that the Senator from Illinois never read the speech to which he refers. I said no such thing as he has put into my mouth; I thought no such thing. I never said any such thing anywhere on any occasion, and I never shall. What I said in the speech to which he refers before the Pennsylvania Society was to put the question "How can the States preserve

their local self-government?" and to answer the question by saying, "They can preserve their local self-government only by performing the duties that rest upon them." stand, and I think I always shall stand. To that I

Mr. LEWIS. Mr. President, the distinguished Senator from New York says he feels humiliated. I can readily understand how now, upon a sober sense and upon a calm reflection, he would feel a sense of humiliation as to many utterances of his; but as to that one in particular, and the effect it has produced upon the country. I naturally realize that he would give a good deal could it be recalled. I remind him that the utterance to which I now allude was made at the Pennsylvania Society

dinner by him, while the latter part of his utterance which he now presents as a qualification of the evil to which I have alluded was not made by the distinguished Senator at the dinner at the Pennsylvania Society. I remind the Senator that the latter portion quoted by him was uttered when he sought to correct the evil of his first offense and escape the penalty. was when he assured the people of New York that his point of view was not any longer such as had been indicated in the Waldorf speech. This correction was in his able utterance when accepting the election to the Senate from the Legislature of New York. Upon the occasion of accepting his election by the Legislature of New York, was the latter part of the utterance expressed, although it might have been a duplicated one from a previous speech. I surely will admit that anything the distinguished Senator from New York may say is worthy of repetition, either by himself or from any other source; but I again say that of the speech to which I allude the distinguished Senator is conscious of the fact that all over the country this speech was referred to; it was printed in the public papers; and I now ask the distinguished Senator if in that speech he did not say that "if the States failed to do their duty, the National Government would have to do it for them "?

Mr. ROOT. No. Mr. President. I said if the States failed to do their duty the American democracy, which abhorred a vacuum in government, the National Government, would in-

evitably step in and do the duty that the States refused to do.

Mr. LEWIS. Exactly. Mr. President, it was immaterial where the Senator pleads guilty—whether it is on the first or the second count of the indictment, the judgment is the same. He admits that which I said he expressed was what occurred.

Mr. President, it is because I, knowing the Senator to be an eminent lawyer and statesman, both in matters of constitutional law and the theory of this republican Government, that I was surprised at the utterance then, and I saw that he was then planting the seed of a tree which ultimately grown he would have to draw his own ax upon, lest it should poison the

very shade in which he must survive.

ow, what finds he? That the people took his teachings in the State of New York seriously, and throughout this country are demanding through the voice of Senators in this body that they shall carry out the very creed of the distinguished Sena-tor, and inasmuch as New York has failed through her rich men to pay her proportion of taxes, and has allowed the personal-property taxes on her vast and unlimited millionaires to be less than the personal taxes paid in the lesser State of Wisconsin, cheating the public before the eyes of the Nation, swindling the citizenship before the honor of the country, and depriving the humble people of their right of proportion and their privilege of having the expenses of government borne by all to the extent of their possessions; there has sprung up in the land a sentiment of just such retaliation as forced itself over the Senate and over the doctrine of constitutional State and Federal demarcation demanding the very form of confiscatory punishment which the Senator rightfully inveighs against, They, the people, now demand that New York pay the penalty, either through the hand of the Federal Government on the one hand or the hand of the State on the other. As it has been observed that they will not obey the State law, but evade it by either failing to make their returns of taxation or committing perjury to cheat it; there was but one refuge, and that was to follow the advice of the distinguished Senator from New York; and when New York had failed to do its duty, for the National Government to step in and chastise them by doing it for them by levying any sum on New York that the "mob" on the corners, in the streets and alleys, demand.

The Senator alluded characteristically, with his wisdom, to the theory upon which this Government was established. He adverted to New Jersey and called attention to the part she played in the Constitutional Convention, where her statesmen demanded that the smaller States should have equal representation with the larger ones. But, sir, I take issue with much trepidation with the distinguished Senator on his construction of the objects of this demand. It was not merely for the reason that the States should have equal representation, but Mr. Paterson, of New Jersey, speaking on the subject, specifically urged as one of the very reasons for that claim that the local sovereignty of the distinct localities might be preserved, equally balanced one with the other in matters in which the sovereignty of the State was to exercise its function of government, and in the Senate be equal in vote to preserve its sovereign position. Mr. President, we have seen much in these later days of this

new theory advocated by the Senator. Lately the one that has gradually stolen upon this Nation, augmented by such responsible wisdom and from such an eminent source as the

distinguished Senator from New York, is designated national conservation. All around this Nation goes the impression that the time has at last come when States shall have no longer a sovereign existence, when there shall no longer be home rule, when within their precincts the States shall not be any longer permitted to control their own affairs by their voice and vote. This movement has increased to the embracing every conduct of the State from the regulation of railroad freight rates in the State and the municipal control of city utilities. Now the Federal court, as a disciple under the teachings of these brilliant masters-and before all others stands the distinguished Senator from New York-has seized the States and cities, figuratively speaking, in the clutch of its hands, dragging them into the Federal court, and, under the theory that the Federal Government has the right to suppress and control the State as its pleasure dictates, has through Federal court injunction paralyzed the construction of needed improvements in the State and city, restrained the officials of the city, county, and State governments, and denied to the local bodies the right of home rule. All this upon the theory that the Federal Government alone has the right to control the States as a body, and to direct the private affairs of the citizen of the State in his private concerns. So extensive has this vice of government grown that here in the Nation a school of gentlemen exists advocating the seizing of every Western State, and as it were, rolling it around their wrists, throwing it across their shoulders, and marching to New England and presenting the State as needing the wise men of the East as conservators. Under the theory of conservation they have locked up the resources of the West, paralyzed her industry, diminished her opportunity, discouraged her capital, and deprived her citizens, all without any regard to that fundamental doctrine which the distinguished Senator is right in now asserting, that within these localities, if there is to be preservation of the citizen in purely local affairs, let him be preserved by himself by his voice and vote; if there is to be conservation in the affairs of the State or the locality, let it be conserved by the law which is created by the ballot of the people in their home government.

The distinguished Senator may well take the suggestion from one of his colleagues in this Chamber, even though that be myself, that unless such as he shall raise his voice more frequently for this abandoned doctrine of democracy, unless there shall be a greater devotion to the Constitution and a larger degree of obedience to its spirit, the whole theory of home rule, State sovereignty, and local home rule within local precincts will all have been crushed out of existence, and there will over-come them the centralized power dictated from a Washington authority, stimulated by the sentiment of political favor to party or administration privileges to favorites. There will arise the creed proclaiming that what the Capital of Washington can not regulate shall be destroyed; what it can not punish shall be confiscated; that riches in new States is a crime and possession by industry treason.

It is the specific income tax against which the Senator in-eighs. He reminded the Senate, if I did not misunderstand him, that his people were about to have inflicted upon them some great unparalleled blunder, some inexcusable offense. Said he, "My people are to be taxed. My people will have to pay the tax you levy." Who are the Senator's people? Do I gather from the Senator that only that distinguished brood of gentle-men who nestle around Wall Street are his people? Those who have amassed millions, then hid them in strong boxes, while they have escaped the responsibility of the ballot box? Are they only his people? Are they whose vast fortunes, maintained through perjury or evasion of law, have always escaped the assessor and dodged the tax collector—are they only his peo-ple, those who have millions of dollars? Are there no millions of poor and miserable in New York? Are those who, in humble homes and amid suffering, have been compelled to pay the taxes out of their wages, laid heavily upon them by the masters who would not pay their taxes and whose failure had to be made up by taking from the humble the deficiency in order that the expenses of the government of New York might be maintainedare they not his people? Has he no voice for them?

Why should the distinguished Senator from New York ask that his people, or, to paraphrase him, "my people," should be exempt? Sir, in this Government I will not assume that any one set of people have a right to say through the voice of any man, however distinguished or elevated, that others must contribute to their burdens and bear them. That because they have managed to attract in some way a glamour about their existence and grasped power with one hand and held the privilege of wealth with the other, must be exempted from bearing their burden and discharging their responsibility, all sir, because

they are a great people in finance, a wonderful people in riches, and a shrewd and artful people in the mysterious manipulation of the thing called finance.

Why, then, sir, is this tax laid? My distinguished friend the eminent Senator who honors his seat in representing New York fails to realize or, if realizing, fails to note the real reason of the tax upon these incomes. Sir. speaking for Democracy, the object of levying a tax upon wealth is not because it is wealth. Such would be anarchy. I spurn it as a doctrine which no constitutional scholar of Democracy would accept under any conditions. Nor, sir, is it a tax on wealth because the men who have it are rich. That, I am told, is a species of socialism. I know such would violate the fundamental doctrine of a man's property having the right of protection and never to be taken from him without due process of law.

I say to the Senator that the theory of a tax upon such incomes is, as Adam Smith well put it, that they should bear the burden of the tax who draw the greater benefits from the Government in which they live. Sir, the tax is not put on incomes of wealthy men because they are able to bear it by reason of the mere volume of their wealth, but for the other reason, sir, that most large incomes from great fortunes are not earned by toil. They are not gathered by sacrifice. They are not garnered in agony. They are the results of the thing called interest, by which a man takes a fortune, however gotten by him, and lends it out in portions to others who may need to use it for such price as the owner may put upon it. It is upon the theory of this increment being unearned by toil, unearned by sacrifice, and undeserved often because of the character of men who possess it, that its levy is justified. An income tax is laid not to punish wealthy men, but in order that the other class of human beings who having no wealth are compelled to pay the general tax and bear the burdens of government may not be solely selected for sacrifice by the discriminating doctrine which has so long prevailed in government—that those who are helpless shall be hopeless against the power of privilege and taxation.

Thus, Mr. President, these incomes are laid hold of by the Democratic Party, through the constitutional doctrine of government, in order that the rich who have by privilege of government drawn to themselves these incomes may pay to the maintenance of government such proportion as the incomes bear to the needs of the country. And why? Why, Mr. President, there is a rumor in the air here and there, sometimes voiced by the distinguished Senator from Massachusetts [Mr. Lodge], whose erudite learning is always a source of joy and a tribute to the body in which he sits, that America broods for the mo-ment in the shadow of serious conflict with foreign powers.

In such an hour, sir, if war should be declared in this country, whom will we find rushing to this Capital, through their emissaries, asking for the protection for their wealth by the bayonet and gun, demanding to be barricaded in safety by the lives of the sons of the Republic? Whom shall we see rushing to the Government asking that navies be put out to the waters bordering their possessions to protect them—demanding that they may be fortified with protection in every wise, safe

against all assault?

It will be these delectable gentlemen who for awhile linger in America, absent from the polling booths, their names seldom seen upon the tax collector's list, while they flit from here to Europe, and there in their luxurious yachts or in speeding joy automobiles ensconce themselves along the Riviera in the Mediterranean in the winter or in the mountain fastness of pleasure resorts in the summer. These who contribute little to this Government and yet who would demand promptly that every man of the poor who could give his life-from the farm, the factory, and the mill-shall be summoned to die to save their wealth from the assault of those who intrude upon the Nation or threaten it with invasion. It is such as these who will be found crying for the navies with their gallant men to go out upon the broad seas with their batteries to save them and theirs. Yet, sir, shall it be said that the Senator's "people" shall not be taxed because, forsooth, they are able to pay and are his chosen people? Shall they be exempt because they will not be able to swear off the tax upon the one hand or swindle the collection of it on the other?

The time has not come, I say, speaking for myself, when the Democracy of this country will take any man's property because he is rich; but it will allow no rich man's property to escape its just burden because it is wealth and its owner powerful. The doctrine of Democracy, sir, is not that we make war against wealth for that it is wealth. The theory of Democracy can be well stated: We do not make illegal war against legal wealth, but we do make legal war against illegal wealth. There we stand. If these privileged and superior gentlemen for whom the Senator elects only to speak are those who feel that they will have this Government to protect them, that they will have this Government to sustain them in the possession of their riches, that they will have this Government send its young sons to death to save them and their wealth, then, sir, I demand that they shall contribute to help to build the Navy, to maintain the Army, to save the honor of the Nation of which

they are a part and many of them so little credit.

The Senator speaks of "my people." I would invite to his respectful consideration the fact that my observations through New York are those which would apply in any State of There is to be seen the burdened farmer bending over the ground in toll through the heat of the day, with his blistered hands and bowed body, striving for a mere existence. He pays his tax of from 100 to 200 per cent upon the mere necessities of life, ostensibly in order to maintain a Government, but really to give fortunes to those for whom the Senator speaks as "my people." There is the toiler in the mill, the man in the factory, and the slave in the workshop, all with small wages, all these being constantly reduced in their possessions and whose substance is being consumed for the mere privilege of living. This man he, too, pays the tax and also bears the burden of the tax that is evaded by those who are the Senator's "people." Why, then, shall not they the Senator's "people" be forced to pay a little out of that which they filch from others and assist to maintain the Government which protects their wealth which they now seek to have shielded and exempted from any responsibility?

The Senator says "my people" will have to pay the tax.
What law is there here which specifically applies the incometax provision to New York only? Where are there any people who will escape? The tax is paid by all those with incomes exceeding \$3,000, whether they are in the imperial State of Illinois or the empire State of New York; whether in a State demeaned by the poor representation I may give my State or honored by the magnified position the distinguished Senator gives his. None escape. All, I say to the distinguished Senator, wherever they are, from ice-bound Alaska or the Tropical Zones of Porto Rico and the Philippine Islands. From the fields of toil, where they garner the grain in sadness; in the machine shops; in the factories, where the lives of little ones are ground out in order that from their sacrifices privilege may coin money for "his people." Sir, I answer, they are all our people, these poor and broken lives spent with toil, and it is for these

I speak. It is for these all of us should speak.

New York is a great State. Her imperial magnificence I The grandeur of her position in the Republic I am delighted to admit. The noble statesmanship evidenced by every declaration on the part of the distinguished Senator, that, too. I pay tribute to. But I can not permit the doctrine to go out that the Democracy is pausing for a moment to listen to the direction of the distinguished Senator from New York as to how "his people," limited by Wall Street in the daytime and the Waldorf-Astoria Hotel at nighttime or capering upon the shores of the distant seas of pleasure or amidst the allurements of the tropic isles, shall be exempted from the just burdens of taxation because, for sooth, these select few he has selected as only "his people."

As far as I am concerned, sir, I say that I can not see how such a doctrine can have place in a legislative hall where the doctrine is the law, just the law—that equal law that applies to all mankind. Mr. President, it is remembered that Sir James Mackintosh, in a very celebrated utterance, exclaimed in a cer-

tain great assemblage:

My Lords, give me civil justice. With that, all things will be equal and just, and to all men. Deny it, and liberty will be deprived the humble, and not a crown in Britain safe from revolution.

No people, Mr. President-not the opulent State of New York, with its pretensions, nor any other-has a right to come into this Chamber through the voice of any man, however distinguished, and demand, because they are that which they assume to be superior, that they shall be exempt from paying their debts to humanity. If the people of New York have been enabled, by any manipulations of any legal policy or any machinations of financial trickery, to gather to themselves the money of the people throughout all the great West, for which I honor myself in speaking, and have been able through these means not only to amass it but to hide it within their coffers, far from the eyes of the tax-administering officers of the State law, then let them understand there will be a method obtained in this National Government by which it will be justly reached.

If the States have failed to do their duty, as the Senator well

said in his splendid speech, lately referred to, no State has

been more marked in that peculiar violation of Democracy than the State of New York. It was no doubt because it did fail to do its duty in collecting its personal tax that there arose just such sentiment throughout this country, crying out for the very retaliation against which the Senator now begs salvation. I join him in his now adopted theory of government. There is no hour in this country, under a constitutional government, when any true citizen can give his approval to the doctrine that merely because a man is rich he shall be assailed and his possessions taken from him by any policy or process of confiscation. There is no place in this land for creed or statesman whose theory is that because another man prospers he shall be destroyed. But, on the other hand, there shall not exist at any time when I am permitted to speak my protest any set of men, however high in their own imaginations or in the belief of their representatives, who shall demand and receive exemption from their responsibilities to citizenship, their duties to government, their contribution to the welfare of their Nation.

The Senator says this exemption of \$3,000 means the exemption of all of the people in the West and putting the burden upon "his people." How can he so reason? There must be some form of exemption. Shall I assure the Senator that he did not pause in his usual judgment to reflect on the reason of that exemption? The exemption of \$3,000 is not put in this bill in order to give a man \$3,000; but since the Senator admits the equity of the principle that there should be an exemption, claiming \$1,000 as proper, I answer him, then, if any exemption is equitable, the exemption should be just such an amount as is necessary to the purpose of exemption—the maintenance of the individual for mere living. This in order that he may not be doubly taxed. It is upon that great army of unfortunate citizens-unfortunate because of the great oppression that has been laid so heavily upon them; unfortunate because of the yoke that chafes on their shoulders; unfortunate because they have been subject to the obedience of such masters as the distinguished Senator refers to as "my people"-that taxation principally falls. They must pay upon their bread a bread tax, upon their meat a meat tax, upon their shoes the tax of the Shoe Trust, upon their garments the tax of the Woolen Trust. Upon their very existence they pay a double tax, and the exemption is made because of that tax that they must pay in so much greater proportion than the great wealthy, because the heavier tax seems to have been laid upon them. The theory is that those people should be exempt from this income tax in order that they may not be doubly taxed. First, the indirect tax on all their needs, by high tariff, making high prices; then on the wages coming in to pay the prices. It is not because they may have \$3,000 a year that they are not taxed, any more than because the distinguished Senator's constituents having \$3,000,000 a year they should be It is because all of the income up to \$3,000 is consumed by the Government in the mere price of living.

Mr. President, I merely rose, observing that the distinguished members of the committee had other things to occupy their minds, and possibly not being drawn to the observation of the distinguished Senator. I arose to state a view of the Democracy, that the record may be set right; that the distinguished Senator from New York may not labor under the apprehension, however flattering to his soul, that he has frightened or humiliated this side by referring to "his people" and picturing the awful calamity that will befall them should justice be done them. I speak that he might not think that this side could be moved from its duty as it saw it under the laws of men, under the doctrine of justice, under every duty to its party and to the country by his declaration of the superiorities of "his people."

I join the distinguished Senator in every effort he will assume to make in this Chamber, as long as he honors it with his presence, in bringing back the people of this Government to

the constitutional theory of this Government.

We have heard lately in a campaign, from a distinguished gentleman who was the chief of the distinguished Senator, the great war shibboleth, "Bring the Government back to the peo-ple." But I say the hour has come, sir, when our cry should be "Bring the people back to their Government." Sir, there should be something more learned and something more known of the theory of equality upon which this Government was founded by the fathers, that it may be preserved to the sons. I join the distinguished Senator in the hope that every movement and every act of ours may serve to preserve the line of demarcation between the right and privilege of the States on the one hand and the power and privilege of the Federal Gov-ernment on the other. That we may not teach the multitude that they have the right, under the name of the National Government, to intrude upon the States, depriving them of any government and robbing them of the right of their citizens to home

rule. Let us try again to educate the people in the doctrine of the fathers, that they may not have to hearken to these protests from distinguished sources, warning States that they are liable to destruction by their own hands, and through their own carelessness suffer the usurpation of Federal authority. Let us no longer indulge the false creed that if the States shall not do their duty as some outsider sees it for them that they may be driven by the Federal Government chastising them by a system of laws burdening the poor and exempting the rich. Let us teach the other and nobler creed of the Christ, of right as no respecter of persons, and say with Lord Mansfield, "Let justice be done, though the heavens fall." Then, sir, we will fulfill the hope of the fathers of a government of equality to men and justice to country.

Mr. JOHNSON. Mr. President, before leaving Schedule D, I wish to suggest an amendment of the committee to paragraph 174, on page 51. In line 19, after the word "fruit," the committee moves to amend by striking out the words "by the payment of duty at one-half the rate imposed on similar boxes of entirely foreign growth and manufacture" and substituting in lieu thereof the words "and be exempt from duty."

Mr. SMOOT. Allow me to suggest to the Senator that if, as I suppose, the purpose of his amendment is to allow all boxes containing fruit to be returned to this country free of duty, it seems to me that if the Senate will disagree to the amendment offered by the Senate committee and allow the House provision to stand as it was and not change paragraph 412, the object the Senator has in view will be accomplished, and accomplished a great deal easier. Then they will come in free under paragraph 412, and we will not have to mention anything in the dutiable list as being free.

Mr. JOHNSON. Mr. President, it seems to me the two would then conflict, because in paragraph 412, among the containers which are made free of duty after being sent from here, these

words are used:

Including shooks and staves when returned as barrels or boxes.

If the language I have suggested be stricken out, then, under that provision of paragraph 412, they would come in free of

Of course, Mr. President, it seems to me that the other would be the simplest and best form and attain the same object; but if the Senator prefers to do it in this way, I have no objection

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. In paragraph 174, page 51, line 19, after the word "fruit," strike out the words "by the payment of duty at one-half the rate imposed on similar boxes of entirely foreign growth and manufacture" and insert "and be exempt from

The VICE PRESIDENT. The question is on agreeing to the

amendment.

The amendment was agreed to.

The Secretary. The next paragraph passed over is on

page 58

Mr. WILLIAMS. Before going to that there is an amendment I desire to offer on page 53, after the words "nineteen hundred and fourteen," in line 11. I move to strike out the semicolon and insert a comma and the following words:

Until which date the rates of duty provided by paragraph 215 of the tariff act approved August 5, 1909, shall remain in force.

This is to prevent a possible hiatus during which there might be no sugar bill.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 53, line 11, after the words "nine-teen hundred and fourteen," insert a comma and the words:

Until which date the rates of duty provided by paragraph 215 of the tariff act approved August 5, 1909, shall remain in force.

The amendment was agreed to.

The Secretary. On page 58, paragraph 215 was passed over at the request of the Senator from Washington [Mr. Jones].

The VICE PRESIDENT. The paragraph has been read and

the committee amendment agreed to.

Mr. SHIVELY. At the conclusion of paragraph 215 I move to insert the following proviso:

Provided, That all mature mother flowering bulbs imported exclusively for propagating purposes shall be admitted free of duty.

This is the substance of the amendment suggested by the Senators from Washington.

Mr. POINDEXTER. That is true, Mr. President. I think it meets entirely the suggestion which we made.

Mr. SHIVELY. The Department of Agriculture holds that the words make a sufficient definition to differentiate these bulbs from the other bulbs mentioned in the paragraph.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 59, line 2, at the end of paragraph 215, insert a colon and the following proviso:

Provided, That all mature mother flowering bulbs imported exclusively for propagating purposes shall be admitted free of duty.

The amendment was agreed to.

The Secretary. The next paragraph passed over is on page 60, paragraph 221—fish.

The VICE PRESIDENT. The paragraph has been read and

the committee amendment agreed to. Mr. WILLIAMS. That was passed over at the request of some Senator who wanted to discuss it, the Senator from Massachusetts [Mr. Lodge], I think.

Mr. LODGE. I discussed it. I did not ask that it be passed

over. I spoke on it when it was up.

Mr. WILLIAMS. Does not the Senator remember that one day he was not in the Chamber and some one said that he wanted to discuss it?

Mr. LODGE. It was passed over one day when I was absent,

and I took it up as soon as I came back and discussed it.

The VICE PRESIDENT. On the same page paragraph 222 was recommitted.

Mr. WILLIAMS. The Senator from Washington [Mr. Jones] had an amendment to that paragraph. I think his amendment

Mr. POINDEXTER. The senior Senator from Washington [Mr. Jones] is not present. I would be glad to have the paragraph passed over temporarily until my colleague is present.

Mr. WILLIAMS. I think the Senator from Washington afterwards came in and offered his amendment. It was about apples, you will remember. He wanted a duty of 25 cents a bushel on apples. His amendment was offered and, I think, voted upon.

Mr. SMOOT. Paragraph 222 went over on my request. called the attention of the Senator from Mississippi to the words "pineapples preserved in their own juice, 20 per cent ad valorem." He said that he would take up the question and ad valorem." He said that he would take up the question and decide whether there should be a change in that language. I do not know whether the Senator has done so or not.

Mr. WILLIAMS. Yes; we took it up and we did not see any

reason why there should be any change made.

Mr. SMOOT. Then I will not even offer an amendment. Mr. POINDEXTER. I am not sure whether the senior Senator from Washington has any further amendment pending to that paragraph or not. I should like to have an understanding that it might be returned to at some time when he is present, if he desires to offer an amendment to the paragraph.

Mr. WILLIAMS. I do not think that could be the case, because he offered about three amendments, I believe, that were

all voted on. Let us go ahead.

The Secretary. On page 62, paragraph 234, the last five words in the paragraph were recommitted to the committee. They read:

Dead, 2 cents per pound-

Speaking of poultry.

Mr. WILLIAMS. That paragraph was passed over at the time because it reads "Poultry, live, 1 cent per pound; dead, 2 cents per pound." The Senator from Utah called attention to the fact that poultry might come in free under the head of "canned or otherwise prepared."

Mr. SMOOT. It comes in free under paragraph 548 when

"prepared or preserved."

Mr. WILLIAMS. Yes; but the committee considered that very fully. In the free list it says, "except where otherwise provided," and certainly canned poultry is about as dead as any other sort; and preserved poultry is pretty dead, too.

Mr. SMOOT. Both are; but one is carrying a duty and the

other is on the free list.

Mr. WILLIAMS. In order that there may be no trouble in the administration of the law as to whether canned and preserved poultry is dead, we offer an amendment. After the word "pound," in line 23, page 62, I move to strike out the period and insert a comma and the words "canned or preserved poultry, 2 cents per pound."

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 62, line 23, after the word "pound," strike out the period and insert a comma and the words "canned or preserved poultry, 2 cents per pound."

The amendment was agreed to.

The Secretary. The next paragraph passed over is paragraph 238, page 63, which was recommitted to the committee.

Mr. WILLIAMS. The committee has no change to recom-

mend in that paragraph.

The VICE PRESIDENT. It is then reported back without amendment.

Mr. NORRIS. I move to strike out the paragraph.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska to strike out paragraph 238. The paragraph will be read.

The Secretary read paragraph 238, as follows:

238. Dandelion root, and acorns prepared, and articles used as coffee, or as substitutes for coffee not specially provided for in this section, 2 cents per pound.

Mr. NORRIS. Mr. President, at the time this paragraph was recommitted to the committee there was some discussion in regard to it, but the discussion was closed with the suggestion of the Senator from Mississippi that if the matter was referred back to the committee they would give it consideration. I should like to inquire of the Senator if, upon consideration of it, they found that these substitutes for coffee were imported as coffee?

Mr. WILLIAMS. We did not find that they were imported as coffee, but that after they got here they were sold as coffee very frequently.

Mr. NORRIS. Did the Senator look into the question as to whether that was not a violation of the pure-food act?

Mr. WILLIAMS. I expect it is, but the danger is so great of its being the cause of a violation of the pure-food act we thought we ought to keep this duty on.

Mr. NORRIS. By charging a tariff on it, is the Senator of opinion that it will prevent the sale of it afterwards as coffee?

Mr. WILLIAMS. I think putting a duty of 2 cents a pound on it will render it less profitable to import it with coffee or sell it for coffee. It will render it less profitable to perpetrate any fraud upon the pure-food act.

Mr. NORRIS. It seems to me that the committee ought to admit free of duty anything that can be used or that is used as a substitute for coffee. At this time I am not going into a discussion of the Brazilian coffee valorization scheme. I have an amendment pending, on which I expect to submit some remarks later on; but I believe it is conceded by all that the price of coffee has been manipulated by this great international trust and has been more than doubled in price; that it is an unconscionable trust, one that has no defense, directly or indirectly, in any way; and that tribute has been levied upon the consumers of coffee in America for four or five years on account of this great combination.

The only argument which was offered the other day when we had this subject up for discussion for not striking out the paragraph and then putting these substitutes on the free list was that they might be sold under the name of coffee. I was of the opinion then that they were imported as substitutes and that there was no intention when they were imported to deceive anybody as to their nature. If I understand the Senator from Mississippi, I believe that is now conceded, but that after they are imported and the purchaser gets them they are sometimes sold as coffee.

Mr. WILLIAMS. I did not say that was conceded. I merely said we had no evidence of the fact that they are imported as coffee. I do not know whether they are or not; but what we did have evidence of, what we were satisfied of, was that after they got here they were used in certain places to mix with coffee and sold as coffee.

Mr. NORRIS. I have an idea, if it be true that they are mixed with coffee and sold as coffee, the chances are that the mixture is sold at a less rate than pure coffee. I would not want to do anything, either in this bill or in any other, to deceive any purchaser or make it possible for anyone to sell something for coffee that was not coffee, and I would not intentionally do so; but, as I look at it, it can make no difference, as far as that deception is concerned, whether the substitutes have a tariff upon them or not. The fact that they have a tariff upon them does not make it look any different to the eye, it does not make it any different to the taste, than if they were admitted free.

The result of the action of the committee, therefore, I think is that you give no relief whatever along the lines of practicing deception upon those who buy it thinking it is coffee. That can be done just the same if it had a tariff on it as though it had not a tariff on it

Now, the Senator says the duty makes it less profitable to go into that business; that they would not make as much money out of it and probably could not sell the product as cheap; that, assuming they are going to deceive the people and sell them something as coffee that is not coffee, as long as it comes in competition with the product of the international trust that can be done just the same by a tariff on as though it came in free. It

seems to me that it would be the part of wisdom to let it come in free and let the product be just as cheap as it can be made, and thus bring about more competition in the use of the article.

While there may be instances where men sell substitutes of coffee for coffee, the same as they sell almost every other article of commerce, I am constrained to believe that that is only a small part of the business and that the great amount of it is sold as substitutes for coffee. I presume that if Postum, an advertised substitute for coffee, were imported, it would have to pay duty under this provision, and yet nobody, as far as I know, has ever undertaken to sell Postum as coffee.

There are other substitutes for coffee I have seen advertised at different times, and in a little way I have known of their use, such as chicory, and so forth, but they are not sold as coffee, and we ought to give them all the opportunity we possibly can to compete with real coffee.

The only beneficiaries of this legislation, as I look at it, are those who are eugaged in the valorization of coffee and the robbery of the American people, that has been going on for the last four or five years, by which the people have been compelled to pay an extortionate and unreasonable price for that product. It seems to me that there can be no defense made of that particular trust nor against the proposition to put on the free list anything that comes in competition with them.

Mr. President, I do not care to take up the time of the Senate in debating the question further. I am willing to concede that it would not settle the subject and put this trust out of business; I am not claiming that for it, but it would have a tendency in that direction and that would be some help.

Mr. WILLIAMS. We reduced the duty in this paragraph half a cent a pound, and after full consultation we saw no reason to change our conclusion.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska to strike out paragraph 238.

Mr. NORRIS. I ask for a roll call on the motion to strike out the paragraph.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

OLIVER]. In his absence I withhold my vote.

Mr. LEWIS (when his name was called). I again announce
my pair with the Senator from North Dakota [Mr. Gronna],
and ask that this announcement stand for the day.

Mr. LIPPITT (when his name was called). I again transfer my pair with the Senator from Tennessee [Mr. Lea] to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. McCUMBER (when his name was called). I have a general pair with the Senator from Nevada [Mr. Newlands]. I understand, if present, he would vote the same way as I shall upon this question, and therefore I take the liberty of voting. I vote "nay."

Mr. THOMAS (when his name was called). I announce the same transfer of my pair as previously, and vote. I vote "nay." Mr. WARREN (when his name was called). I have a pair

Mr. WARREN (when his name was called). I have a pair with the Senator from Florida [Mr. Fletcher], and therefore withhold my vote.

The roll call was concluded.

Mr. CHILTON. I make the same announcement as to my pair and transfer that I did upon the former ballot and vote. I vote "nay."

Mr. BRYAN. I transfer my pair with the junior Senator from Michigan [Mr. Townsend] to the junior Senator from Nevada [Mr. Pittman] and vote. I vote "nay."

I desire to announce that my colleague [Mr. Fletcher] is detained from the Senate on public business.

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Oklahoma [Mr. OWEN] and vote. I vote "nay."

Mr. ASHURST. My colleague [Mr. Smith of Arizona] has been called from the Chamber on an important matter. If he were present, he would vote "nay."

Mr. LEWIS. I desire to transfer my pair with the Senator from North Dakota [Mr. Gronna] to the Senator from Arizona [Mr. Smith] and to vote. I vote "nay."

Mr. THORNTON. I announce the absence of the Senator from Alabama [Mr. Bankhead], and also that he is paired with the junior Senator from West Virginia [Mr. Goff].

Mr. BACON. I again announce my pair with the senior Senator from Minnesota [Mr. Nelson]. In his absence I withhold my vote. If he were present, I should vote "nay."

The result was announced-yeas 18, nays 44, as follows:

	YE	AS-18.	
Borah Brady Brandegee Bristow Catron	Colt Crawford Cummins Fall Jones	Kenyon La Follette Norris Page Poindexter	Sherman Sterling Weeks
	NA	YS-44.

So the amendment of Mr. Norris was rejected.

The SECRETARY. Paragraph 240, relative to spices, on page 63,

was passed over and recommitted.
Mr. WILLIAMS. In connection with that paragraph, I offer

the amendment which I send to the desk.

The VICE PRESIDENT. The paragraph has not yet been

read. The Secretary will read the paragraph.

The Secretary proceeded to read paragraph 240. The first amendment of the Committee on Finance which was passed over, in paragraph 240, was, on page 63, line 23, after the word "spices," to insert the word "unground"; so as to read:

240. Spices, unground: Cassia buds, cassia, and cassia vera; cinnamon and cinnamon chips; ginger root, unground and not preserved or candled; nutmegs; pepper, black or white; capsicum or red pepper, or cayenne pepper; and clove stems, 1 cent per pound; cloves, 2 cents per pound; pimento, § of 1 cent per pound; sage, § cent per pound; mace, 8 cents per pound.

The amendment was agreed to.

The next amendment was, in the same paragraph, on page 64, line 4, after the word "pound," to insert the words:

Bombay or wild mace, 18 cents per pound; ground spices, 20 per cent ad valorem in addition to any duty on the spices in an unground state.

The VICE PRESIDENT. The amendment proposed by the Senator from Mississippi [Mr. WILLIAMS] to the amendment of the committee will be stated.

The Secretary. On page 64, line 4, after the first words in the committee amendment, viz. "Bombay or wild mace, 18 cents per pound," it is proposed to strike out "ground spices, 20 per cent ad valorem in addition to any duty on the spices in an unground state" and to insert "ground spices, in each case, the specific duty per pound enumerated in the foregoing part of this paragraph, and in addition thereto a duty of 20 per valorem for unground spices.'

The VICE PRESIDENT. The question is on agreeing to the

amendment to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The amendment as amended was agreed to.

Mr. WILLIAMS. Mr. President, the Senator from Utah [Mr. Smoot] seems to think that the words "Bombay or wild mace, 18 cents per pound," were stricken out.

The VICE PRESIDENT. No.

Mr. SMOOT. I was not in; and I should like to ask the Senator having this portion of the bill in charge why Bombay

or wild mace should carry a duty of 18 cents per pound? The present rate is 10 cents.

Mr. WILLIAMS. It is virtually a prohibitory duty. We put it on upon this ground: Real mace is brought to us, and Bombay mace, which has no quality of a spice and is a shrunken-up thing of no value whatsoever, any more than any hull of a nut or anything dried out, is brought over here and mixed with genuine spices, so that even chemists can not distinguish it and nobody can tell anything about it.

Mr. SMOOT. It analyzes the same as the regular mace.

Mr. WILLIAMS. It is sold as the regular mace, and we wanted to discourage that. Honest importers do not import it, but dishonest ones do.

The Secretary. The next paragraph passed over is paragraph 2542, on page 70, relating to sweet wine, which continues to the end of that page, the two following pages, and a portion of page 73.

Mr. SIMMONS. That paragraph was recommitted to the committee, probably at my request, and we are not ready to report on it

Mr. WILLIAMS. The committee desires to insert as a new paragraph, to be known as paragraph 2543, the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 73, after line 6, it is proposed to in-

sert a new paragraph, as follows:

Sert a new paragraph, as follows:

Par. 254%. On and after the 1st day of January, 1914, all stamps required by law to be affixed to packages of distilled spirits filled on the premises of rectifiers or wholesale liquor dealers shall be charged to collectors as representing the value of 25 cents each, and shall be paid for at that rate by each rectifier or wholesale dealer on whose packages the stamps are used; and such stamps shall be issued and accounted for by collectors in such manner as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may by regulations prescribe.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The VICE PRESIDENT. The Chair would like to inquire of the chairman of the committee in regard to paragraph 2541. Is that still in the hands of the committee?

Mr. SIMMONS. Mr. President, as I stated a moment ago, that paragraph is still before the committee. We are not ready

to report upon it.

Now, I ask that Schedule I, cotton manufactures, passed over temporarily. The Senator from Georgia [Mr. SMITH] was not able to be with us last night, and we did not finish that schedule. I ask that we now go to Schedule J.

The VICE PRESIDENT. The Secretary will state the first

paragraph passed over in Schedule J.

The Secretary. The first paragraph passed over in Schedule J is, on page 86, paragraph 290, reading as follows:

290. Bags or sacks made from plain woven fabrics, of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, 10 per cent ad valorem.

Mr. WILLIAMS. That paragraph was passed over at the request of the Senator from Washington [Mr. Jones], wanted us to consider an amendment to put certain Calcutta sacks upon the free list. The committee have considered the matter and concluded that it was better to leave the paragraph

Mr. JONES. Mr. President, I think I discussed that matter fully the other day, and I will not take the time of the Senate in discussing it further; but I should like the amendment which I have offered put to a vote. I will not ask for a roll call on it, but merely that it be submitted to the Senate.

The VICE PRESIDENT. The amendment will be stated.
The SECRETARY. On page 86, paragraph 290, at the end of line 16, after the words "ad valorem," it is proposed to insert the following proviso:

Provided, That jute grain bags, known commercially as standard Calcutta, 22-inch by 32-inch grain bags, shall be admitted free of duty.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. POINDEXTER. Mr. President, I desire to say, supplemental to what has already been said upon that question, which is the same question as that raised by an amendment of which I gave notice some time ago, that this tax is a great burden on the wheat growers of the Pacific coast and offers no substantial return to the country in the way of protection of any important industry or any industry that is likely to become important, All of the grain raised in Idaho, Oregon, Washington, and California is garnered in sacks, and nearly all of it is shipped abroad. The sacks are imported and filled with wheat and immediately exported. The tax upon the sacks, as was very well stated by my colleague, operates as a tax upon the transaction of harvesting and shipping wheat, and because it is a crop which is exported it, in effect, operates as a tax upon exports. While, of course, it is not legally in conflict with the Constitution of the United States, which enjoins Congress from levying any tax upon exports, yet in effect that is what it amounts to

Mr. WILLIAMS. I think the Senator will find that, while there were about 40,000,000 of these bags imported, only about 4,000,000 of them are exported filled with wheat.

Mr. POINDEXTER. Mr. President, the Senator is evidently misinformed in regard to that.

Mr. JONES. Entirely so.

Mr. POINDEXTER. That would be something like 8.000,000

bushels of wheat for export. I have not the figures here, but we raise in the State of Washington alone, to say nothing of Idaho, Oregon, and California, 40,000,000 bushels of wheat a year, most of which is exported. The Senator's figures are entirely erroneous.

I ask leave, Mr. President, in connection with what I am now saying, to print a statement from the Department of Commerce in regard to the number of sacks which are used for exporting wheat and the amount of wheat exported in sacks.

The VICE PRESIDENT. In the absence of objection, permis-

sion is granted.

The matter referred to is as follows:

Exports of wheat, barley, oats, and rye from certain specified customs districts during the year ended June 30, 1913, and value of same.

	Bushels.	Dollars.
Puget Sound, Wash.: Wheat. Barley. Oats. Rye Portland, Oreg.: Wheat. Barley. Oats.	5,668,394 19,186 214,632 5,290 8,147,139 1,764,591 143,320	4,790,962 11,589 79,609 4,189 6,965,224 1,276,851 94,277

Total imports of "bags of jute" during fiscal year 1913, 51,909,003 pounds; value, \$4,278,140.

Mr. POINDEXTER. I ask for the year and nays on the amendment

Mr. SHIVELY. Mr. President, I direct the attention of the Senate to the fact that the present duty, reduced to an ad valorem basis, is 28.84 per cent; that is, the duty in the present law, under paragraph 354, is seven-eighths of 1 cent per pound and 15 per cent ad valorem. By this provision we reduce the duty to 10 per cent ad valorem.

Mr. WARREN. Mr. President, in that connection I should like to ask a question. I should like to ask it of the Senator

from Georgia [Mr. SMITH], but I see he is absent. Paragraphs 288 and 290 refer to bags and bagging. page 129, paragraph 416 provides for bagging for cotton, gunny cloth, and so forth. I am informed that the intention is to make bagging for cotton, wool, and grain free, but it does not seem to me, from a reading of these sections, as if that would be accom-If there is any reason for stating in words in the bill plished. that the bagging for cotton shall be free, it seems to me it is rather an invidious distinction that it should not also state "for grain and for wool," too.

Mr. SHIVELY. Mr. President, I think the Senator will find that the cotton bagging and grain bagging are on precisely the same basis-that is, they are both on the free list. It so happens that the bag is made on the bale in the case of cottonthat is, the burlap or cloth is sewed on the bale. Of course, in the case of grain the bag is made before the grain is put into it; but, so far as the duties are concerned, they are on the same

basis as to both articles.

Mr. WARREN. I do not yet understand that.

Mr. SHIVELY. Of course, the Senator understands that the burlap is sewed on the bale of cotton after the bale is made. After it is pressed the cloth is placed around it and sewed up with iron ties, while, on the other hand, in the case of grain, the bag is made before the grain is put into it. In both cases the burlap-the cloth out of which the article is made-is on the

Mr. WARREN. I do not understand that it is a burlap that is used in bagging for cotton.

Mr. SHIVELY. Oh, yes.

Mr. WARREN. Then I have been misinformed.

Mr. SHIVELY. Oh, yes. It is jute burlap which is used

both in cotton and in grain bagging.

Mr. WARREN. It is true, as the Senator says, that the grain sacks are made before the grain is put into them. So it is with wool; although when the wool arrives at destination, differentiating it from the grain bag, the bag is cut open lengthwise and the wool taken out, and the sack is ruined. In the

case of grain the sack is often used again.

Mr. SHIVELY. Yes. Of course, in that particular, if there be a shade of difference, it is in favor of the grain sacks, because, in the case of the cotton wrapper, when it is once used it is substantially worthless, while the grain sack may be used

half a dozen times

Mr. WARREN. Then, I am to understand, am I, that the proponents of this bill assure us that they stand exactly equal—the coverings for grain, which has been made free; the coverings for wool, which has been made free; and the coverings for cotton, which is also free?

Mr. SHIVELY. Yes; the Senator understands that whatever difference there may be arises out of the peculiar manner of the

use of the one as distinguished from the other. That is to say, in the case of the cotton sack or wrapper it is fastened or sewed together with iron ties on the bale itself when pressed, while in the case of the grain sack or wrapper the grain is put into the sack after the sack is made. The one is made on the wrapped article and the other is made before the article is placed in it. The difference is of the manner of the use and not a difference of duty.

Mr. SMOOT. If the wool were baled as we used to bale it, the burlap that would go around the bale of wool would be free, the same as the cotton bagging; but we are not handling wool in that way to-day. It is put into a wool bag, sewed up, which carries a rate of 10 per cent, just the same as grain bags under the bill

Mr. WARREN. If the covering of cotton is cotton, then there is no charge for the covering.

Mr. WILLIAMS. I will explain it to the Senator.
Mr. WARREN. I should be glad to have it explained.
Mr. WILLIAMS. The cloth out of which cotton bagging is made, and out of which wool bags are made, and out of which grain sacks are made, is all burlap. Now the cloth is put upon the free list. Of course there is no such thing as a cotton bag, because you simply take the bagging, put it in the cotton press, let it lap over in this way, press the cotton down under powerful pressure, and then, after it is pressed, you draw your bagging across it and clamp your iron ties to hold the bagging in place. You may call that a cotton sack if you choose, but it is put on after the cotton is pressed, as the Senator from Indiana says. Therefore, of course, you can not protect a cotton plant-er's cotton sack, because it is not made into a sack except right at the gin on the cotton. For that reason these three products receive precisely equal treatment in this bill.

Now we reduce the duty on made sacks from about 28 and a fraction per cent to 10 per cent; and then, besides that, we give the American manufacturers of grain sacks free raw material. They tell us that while they have not hitherto made very many bags they can now make them, as they think, with free raw material. They say that while we import some 40,000,000 of these sacks, I believe, we export only about 4,000,000 in the ex-

portation of wheat.

Mr. JONES. Mr. President, if the information that the Senator has with reference to this matter generally is no more reliable than the information that is conveyed to him to the effect that only 4,000,000 of these sacks are used for export his information is not at all reliable, because we certainly export far more than that.

Mr. WILLIAMS. That may be; but still it comes from par-

ties that are considered very reliable.

Mr. SMOOT. On the Pacific coast there were exported 11,-687.655 bushels of wheat and 9,146,052 bushels of barley; so that it takes a few over 11,000,000 bags to cover the wheat and the barley that is exported from the Pacific coast.

Mr. BRANDEGEE. Mr. President, will the Senator from Mississippi point out to me in what paragraph the bagging which

is used for making bags for wool is covered?

Mr. WILLIAMS. Paragraph 416. It covers the material out of which bags for wool are made. It does not name them as bags for wool.

Mr. BRANDEGEE. This same paragraph, 416, includes bags

in which wool is put up, does it?

Mr. WILLIAMS. It includes the cloth out of which the bags to go around the wool are made, and the cloth out of which the grain sacks are made, and the sacks out of which the cotton bagging is made.

In connection with this subject I desire to have some matter

inserted in the RECORD as a part of my remarks.

The VICE PRESIDENT. In the absence of objection, it will be so ordered.

The matter referred to is as follows:

Ames Harris Neville Co., Portland, Oreg., August 28, 1913.

Hon. George E. Chamberlain, United States Senate, Washington, D. C.

United States Senate, Washington, D. C.

MY DEAR SIR: I have just received the Congressional Record, volume 50, No. 93, of August 21, and note on page 3596 and the following pages Senator Jones's argument in support of his amendment to place certain bags on the free list.

I do not think that Senator Jones is fully advised as to the facts in this matter, for his argument contains many statements that are inaccurate and other statements that are incorrect.

First, He states that the duty on bags practically amounts to a tax on exports of the farmer's wheat. Out of the total wheat crop produced in Oregon, Washington, Idaho, California, and, in fact, all the Pacific coast, only a very small portion—i. e., from 20 to 25 per cent—is exported. Practically all the wheat that is exported is exported from Portland and Seattle, and the average exportations amount in recent years to only about 10,000,000 bushels.

Second. There are imported annually from Calcutta approximately 40,000,000 bags for harvest purposes, and of this 40,000,000 bags, ac-

cording to statistics, only about 4,000,000 are exported filled with wheat—that is, only 10 per cent of the importations—so that if the duty on the bags is a tax on the exportations it would be a most in-

duty on the bags is a tax on the exportations it would be a most insignificant tax

Third. Senator Jones states, on page 3596, that the manufacturers of the Pacific coast are not manufacturing any bags under the Payne-Aldrich tariff. It is true that the importations from Calcutta are substantial, but it is also true that all the bag factories on the Pacific coast are manufacturing at least to some degree the bags required to harvest the crop. We can not give these figures exactly, but the quantity is not entirely insignificant.

Furthermore, if the bill at present pending before the Senate is enacted into law, and burlap is on the free list, and bags carry a duty of 10 per cent, the local manufacturers will be in a position to supply a larger portion of the bags required than they are able to supply at this time.

a larger

a larger portion of the bags required than they are able to supply at this time.

In conclusion, we can only state, as we have stated before; that is, that the differential of 10 per cent is a low differential. We do not think any manufacturer has asked for a lower competitive differential, and the differential we are asking is competitive only. We do not claim that it will preclude all Calcutta importations, but we do claim that it will afford the local manufacturers an opportunity to compete, and if this opportunity to compete is not afforded them it will mean the entire industry will be transferred to Calcutta, and the Calcutta mills will then have a positive monopoly, and we believe we are fully warranted in saying that they will add to their cost of manufacture the additional cost of manufacture in this country. There is no reason why they should not add this, for they would easily be in a position to obtain it.

The facts in regard to exportation of wheat from Pacific coast ports, and also the exportation of bags filled with wheat, is readily susceptible to proof, and we believe this proof can be obtained by an inspection of the public records at Washington. If Senator Williams, who has in charge the schedules in which we are interested, or any other member of the Finance Committee, want proof of the accuracy of the statements in the wire which I sent you to-day, and of which I here with inclose a copy, we would be very glad indeed to supply such proof, and believe it can be supplied in a very short period of time.

Again thanking you for your many courtesles, I remain,

PORTLAND, OREG., August 28, 1913.

Hon. George E. Chamberlain. United States Senate, Washington, D. C.:

United States Senate, Washington, D. C.:

Have just read Congressional Record of August 21, which contains Senator Jones's argument in support of his amendment to place certain burlap bags on the free list. His argument is inaccurate and incorrect in many ways. In the first place, not more than 20 to 25 per cent of the wheat produced on the Pacific coast is exported. Out of average annual importations of 40,000,000 burlap bags from Calcutta not more than 10 per cent are exported filled with wheat. In the second place, the bag factories on the Pacific coast have during the last four years furnished some of the bags required to sack the crop. If burlap is placed on the free list and bags are assessed at 10 per cnf burlap is placed on the free list and bags are assessed at 10 per cnf during the last propertion of the bags required. Reduction of duty on burlap pags in Underwood law is very material. Bag manufacturers saking only 10 per cent differential, which is extremely low. Think if bags are put on the free list it will mean no material benefit to the farmer, but will seriously injure established industry. Facts stated in this telegram readily susceptible to proof by public records. If Senator Williams or other members of Finance Committee think proof necessary, we can immediately arrange to procure same.

EVERETT AMES.

Mr. BRANDEGEE. Why is it necessary to say what this bagging is to be used for when it is put on the free list? Why is not the article itself described by its texture, instead of saying "bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton"?

Mr. SHIVELY. The language descriptive of the cloth used

in making grain bags, and which we place on the free list, is in paragraph 416, and is in these words: "Plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process." That covers the jute cloth out of which grain hags are made

Mr. BRANDEGEE. All I want to know is, does the bagging that is suitable for making bags for wool come in free also?

Mr. WILLIAMS. Undoubtedly; and the stuff that is suitable for making bags for wool is just the fabric which was referred to by the Senator, to wit, "plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process.

Mr. BRANDEGEE. If that is so, I do not see any reason for using the word "cotton" at all, any more than for saying "bagging suitable for cotton and for wool."

Mr. WILLIAMS. There is not a particle of use; but we found it in the House text, and we saw no use in making an extra and superfluous Senate amendment to vote on in the Senate.

Mr. BRANDEGEE. I am satisfied if the two are treated equally.

Mr. WARREN. Mr. President, as I understand it now, the purpose is that the cloths for all of these articles are to be ad-

mitted free, but if any labor goes into them in the way of making sacks before they come into this country—

Mr. WILLIAMS. There is a duty of 10 per cent ad valorem.

Mr. WARREN. And therefore, in addition to a matter of revenue, it is protective to labor? Is that the contention?

Mr. WILLIAMS. It is to that extent, necessarily. It could not be otherwise.

Mr. WARREN. I want to know that, because that lies very closely along the line of some remarks I made a few days ago about the matter of tops. While I presented that matter from the standpoint of the woolgrower, there is quite a good deal of labor entering into the making of tops from ordinary grease wool.

Mr. SIMMONS. I hope the Senator from Wyoming is not

going to make another argument on tops.

Mr. WILLIAMS. We got over three-quarters of a million

dollars revenue from this source last year.

Mr. SIMMONS. I want to say that the committee certainly had the purpose of putting cotton bagging and the material out of which grain sacks are made upon an equality, and putting them both on the free list. If Senators can think of some word that will designate the class more specifically, we shall be glad to consider it; but I do not think there can be any sort of doubt about it.

Mr. WARREN. As it reads, it will be understood until it is explained, as it has been, or at least it may be construed by those who will construe the law, as an invidious distinction between products, because one is mentioned by its name and the others are not.

But returning for a moment, I am quite willing that labor should be protected in whatever line it is employed. I want the committee to remember that. As to these other items of partial manufacture that go into these uses, when a great product is made utterly free of duty, I should like to see it permit the man who raises the product and who has to go to the market to obtain the containers relieved as far as possible of duty. It is hardly fair for a man to have to raise a product free of duty and pay a duty for the wrapping for it, and then turn around and have a duty upon every article which he may use, made out of the identical material raised by such producer.

Mr. SIMMONS. I had not understood that Senators on the other side were contending for free raw materials and a duty on the manufactured product; but I wish to say to the Senator that there is a great deal of revenue involved in this item. At present it is yielding a revenue of \$847,000 a year. I do not

wish to go into that discussion, however. Mr. SMOOT. I simply wish to call attention to the fact that under the present law the equivalent ad valorem on plain woven fabrics is 23.86 per cent. The equivalent ad valorem for bags is 28.84 per cent. So the differential between cloths and bags under the present law is 5 per cent, but the committee in reporting the bill has made a differential of 10 per cent.

Mr. WILLIAMS. Yes; 10 per cent.

Mr. SMOOT. So the differential between the free cloth and the manufactured bag under the pending bill is 10 per cent, and under the present law it is only 5 per cent.

Mr. SHIVELY. With an estimated revenue of \$320,000. Mr. BRANDEGEE. The Senator from Utah does not com-

plain of that, does he? Mr. SMOOT. I was just stating the fact as it really exists. Of course the differential of 5 per cent more will be paid by the

user of the grain bag or the wool bag.

Mr. WILLIAMS. I ask for a vote upon the paragraph

Mr. JONES. Just a word, Mr. President. Most of the discussion here has been off the amendment that is pending.

The pending amendment calls for a special class of bags to be placed on the free list. 'As I said, the information that has been given to some Senators with reference to the number of these bags that are used for export is certainly very erroneous. There are many more than 4,000,000 used for export.

This tax can not be justified from a Democratic standpoint at all. It is true that it raises some revenue; but it is a tax upon an agricultural product that is used largely for export, and it certainly ought not to be imposed upon an agricultural industry.

I hope the amendment I have offered will be adopted. Mr. POINDEXTER. Mr. President, I ask for the yeas and nays upon the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRYAN (when his name was called). I transfer my pair with the junior Senator from Michigan [Mr. Townsend] to the junior Senator from Ohio [Mr. POMERENE] and vote " nay.

Mr. CHAMBERLAIN (when his name was called). announcing my pair with the junior Senstor from Pennsylvania [Mr. Oliver] I withhold my vote in his absence.

Mr. LEWIS (when his name was called). I again announce the transfer of my pair to the Senator from Arizona [Mr. SMITH] as before. I vote "nay."

Mr. REED (when his name was called). I transfer my pair with the Senator from Michigan [Mr. Smith] to the Senator from Oklahoma [Mr. Owen] and vote "nay."

Mr. THOMAS (when his name was called). I make the same transfer of my pair as previously announced and vote "nay."

Mr. WARREN (when his name was called). I again announce my pair with the Senator from Florida [Mr. FLETCHER1.

The roll call was concluded.

Mr. CHILTON. I announce my pair with the junior Senator from Maryland [Mr. Jackson] and withhold my vote.

Mr. THORNTON. I wish to announce the necessary absence

of the Senator from Alabama [Mr. BANKHEAD]. He is paired with the junior Senator from West Virginia [Mr. Goff].

Mr. POMERENE. I transfer my pair with the Senator from Michigan [Mr. Townsend] to the Senator from Montana [Mr. WALSH ] and vote " nay.

Mr. WALSH entered the Chamber and voted "nay."

Mr. POMERENE (after having voted in the negative). Senator from Montana [Mr. Walsh] has come into the Chamber and voted. I withdraw my vote.

The result was announced-yeas 26, nays 38, as follows:

the Atlantic Mills, which was in existence at the time of Collier's criticism. The Arlington Mills plant is located on both sides of the line-separating Lawrence from Methuen, and as the nearest residential section to these mills is over the Methuen line it is only natural that the agent and superintendent of this mill should choose the nearest and most convenient location for residence. The treasurer and general manager of the Lawrence Duck Mills has lived in Lawrence for not less than 30 years, and still maintains his residence here. The principal owner and manager of Kunhardi's mill lived in this city up to a few years ago, when he moved over the line into North Andover, not over 1½ miles from his manufacturing plant. The Walworth Mills are owned and operated by three brothers, lifelong residents of Lawrence. At the time the Collier article was published a Lawrence man was treasurer and general manager of both the Lawrence Dye Works and the Uswoco Mill. The above-mentioned mills comprise all the important textile concerns in this city.

Regarding the "absence of old men and old women." this can have reference only to people of such nationalities as Italian, Polish, and Syrian, who only within the last 12 or 15 years have begun to settle in this city. Of these people very few come to Lawrence past middle life, probably for the reason that they are unfitted for textile employment: they have had no previous textile training and are too advanced in years to acquire any degree of competence or skill in mill processes. This phase is referred to at greater length in the newspaper clipping inclosed. In a dew years, however, share a normal numbes of the American and wance antionalities who have been milled to the scrap heap." they carry along their aged employees, and as strength and bealth fail they are transferred to lighter and easier work that falls within their declining capacity. One reason why the average wages of textile mills is no higher is that many aged employees are carried along whose earnings, of neces

**Mr. Data Sexaron Gallations: A washingt

eign tongue, who at the best and for a long time is a cause of much defective work and a source of grave anxiety to the overseer, who is responsible for the quantity and quality of the product that emerges from his department. Instead of the southern European selling his services for a lower price than the workman of American standard, he receives fully as much wages as his American fellow workman, while for a time, until he becomes skilled and proficient, he turns out an inferior and diminished product. The mills are therefore losers and not gainers by the employment of this so-called "low-priced labor."

Present communication has been written in Bethlehem, N. H., where I am spending a brief vacation. If I had access to my papers in Lawrence some of the observations made could have been stated with greater definiteness. I have, however, arranged to have mailed to you copy of The Survey, containing Judge Rowell's article on the Lawrence strike, which is an impartial and truthful statement of conditions in our city and refutes many of the misrepresentations and misstatements which have been so widely circulated.

Yours, very truly,

John T. Lord.

Mr. SIMMONS. The bill may be laid aside for the day.

Mr. SIMMONS. The bill may be laid aside for the day.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the con-

sideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 12 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, September 3, 1913, at 11 o'clock a. m.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate September 2, 1913. AGENT 'AND CONSUL GENERAL.

Olney Arnold to be agent and consul general at Cairo, Egypt COLLECTORS OF CUSTOMS.

Zach L. Cobb to be collector of customs for the district of El Paso, Tex.

Frank Rabb to be collector of customs for the district of Laredo, Tex.

PROMOTIONS IN THE NAVY.

# HOUSE OF REPRESENTATIVES.

Tuesday, September 2, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Infinite and eternal Spirit, whose life-giving currents are ever sweeping on and out into the souls of men, purifying, fructifying, ennobling, we thank Thee that Thou art constant in Thy ministrations, and we earnestly pray that we may be more susceptible; that we may do conscientiously whatsoever we find to do, without the fear or favor of men, seeking only to do Thy will, Unite, we beseech Thee, the brain and brawn of our people, that contentions and strife may be lost in the ties of brotherhood, that thus working together with Thee the best results may obtain for all; in the spirit of the Master.

The Journal of the proceedings of Saturday, August 30, 1913,

was read and approved.

#### LEAVE OF ABSENCE.

By unanimous consent, Mr. Neeley was granted leave of absence for three days, on account of illness in his family.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

Mr. UNDERWOOD, from the Committee on Ways and Means, reported a bill (H. R. 7595) permitting the free importation of articles intended for foreign buildings and exhibits at the Panama-Pacific International Exposition and to protect foreign exhibitors, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 65), ordered to be

#### RESIGNATION OF A MEMBER.

The SPEAKER laid before the House the following communication:

59 East One hundred and fifth Street, New York, August 31, 1913.

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEAR SIR: I beg to submit herewith my resignation as a Representative in Congress from the twentieth district of the State of New York, such resignation to take effect September 1, 1913.

Yours, respectfully,

FRANCIS BURTON HARRISON, Member of Congress, Twentieth New York District.

BOLL WEEVIL.

Mr. BOOHER. Mr. Speaker, I ask for the present consideration of the following privileged resolution.

The SPEAKER. The gentleman asks consideration of a privileged resolution, which the Clerk will report.

The Clerk read as follows:

House resolution 240.

Resolved, That the Secretary of Agriculture is hereby directed to communicate to the House of Representatives at the earliest practicable day, not later than the first Monday in December, 1913, the result thus far secured in the study and investigation of the boll weevil and the amount of money thus far expended in such study and investigation.

The SPEAKER. The question is on the resolution.

Mr. Speaker, where is the resolution now?

Mr. BOOHER. I ask unanimous consent to have it considered. It is a privileged resolution asking for information.

Mr. MANN. Is it a resolution just introduced?

Mr. BOOHER. Yes. I ask unanimous consent for its consideration

Mr. MANN. Why should it not go to the Committee on Agriculture:

Mr. BOOHER. It is a privileged resolution and is not necessary. I showed the resolution to the gentleman from South Carolina [Mr. Lever], chairman of the Committee on Agriculture, and he said he had no objection.

Mr. MANN. It is not a privileged resolution yet.
Mr. BOOHER. I think it is.
Mr. MANN. Oh, no.
The SPEAKER. The gentleman from Missouri is asking unanimous consent for its present consideration.
Mr. MANN. I think these recolutions ought in the first

Mr. MANN. I think these resolutions ought, in the first place, to go to their appropriate committees, Mr. Speaker. Under the rule the committee must report back a resolution of

inquiry within a week.

Mr. BOOHER. The trouble with referring it is that these committees are not authorized to report any of these resolutions.

Mr. MANN. If the committee does not report it, then it will become privileged, and the gentleman can call it up

Mr. BOOHER. I wish the gentleman would withdraw his objection and let the resolution pass.

Mr. MANN. It does not call for a report until December.

The SPEAKER. Is there objection?

Mr. MANN. I shall have to object, Mr. Speaker.
The SPEAKER. The gentleman from Illinois objects.
Mr. BOOHER. Then let the resolution go to the Committee

on Agriculture.

The SPEAKER. It wilt be referred to the Committee on Agriculture.

# ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 52. Joint resolution to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military

#### HETCH HETCHY.

Mr. FERRIS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Hetch Hetchy bill, H. R. 7207.

The SPEAKER. The gentleman from Oklahoma moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 7207, the Hetch Hetchy bill.

The question was taken, and the motion was agreed to. cordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. Foster in the

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will read the title. The Clerk read as follows:

A bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes.

Mr. HELM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HELM. What is the parliamentary status in regard to the amendment offered by the gentleman from Illinois [Mr. MANNI, pending at the time the point of no quorum was made

on Saturday?

The CHAIRMAN. The amendment was under consideration, and on a rising vote was defeated, and then the gentleman from Texas [Mr. Dies] made the point of no quorum. So that the question now is on the amendment offered by the gentleman from Illinois.

Mr. HELM. I ask unanimous consent that the amendment

may be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The Clerk read as follows:

Amend, page 11, by striking out, after the word "year," in line 7, the remainder of the section.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. Ferris) there were, 28 ayes and 41 noes.

So the amendment was lost, Mr. MONDELL. Mr. Chairman, I offer the following amend-

Mr. FERRIS. Mr. Chairman, I would like to know how many amendments are to be offered to this section.

Mr. STEENERSON. I have an amendment.

Mr. FERRIS. How much time does the gentleman want? Mr. STEENERSON. I would like to have 10 minutes.

How much time does the gentleman from Mr. FERRIS. Wyoming want?

Mr. MONDELL. Four or five minutes.

Mr. MURDOCK. I wish the gentleman would give me five minutes. I may not use it.

Mr. HELM. And I want 5 or 10 minutes.

Mr. MONDELL. Let me suggest to the gentleman that as far as my amendment is concerned I want to present it for consideration.

Mr. FERRIS. I have no disposition to cut off debate. The bill has already occupied two days, and I want to get through with it. The committee has given two months of hard labor to it, and the bill has the approval of every departmental officer.

Mr. MANN. Find out how much time is wanted on the section, and then ask to close debate at the end of that time.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that the time on this section and all amendments thereto be limited to 25 minutes; that makes 5 minutes to each gentleman and reserves 5 to the committee.

Mr. MANN. That will not take in all the time that has been asked for.

Mr. FERRIS. Then I will make it 30 minutes, and that will take in all and give 5 minutes to the committee.

Mr. MONDELL. I suggest that my amendment be disposed of first. I do not know that gentlemen will want to take any

Mr. FERRIS. Mr. Chairman, I withdraw the request.

Mr. MONDELL. Mr. Chairman, I move to strike out all of section 7 after the word "hereof," line 24, page 10 and page 11, and place a period after the word "hereof," and add to that the following that I send to the desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend page 10 by striking out after the word "hereof," line 24, the remainder of the section and adding the following:

"3. That the grantee shall, for the benefit of the Yosemite National Park and the Stanislaus National Forest, pay for all timber taken from its right of way and shall pay annually such sums, to be fixed from

time to time by the heads of the departments having charge of the said reservations, as shall be amply sufficient for the repair and maintenance of the roads and trails herein provided to be built by the grantee, and for the enforcement of the sanitary regulations provided for in section 1 of this act, together with such further reasonable sums as shall, in the opinion of said heads of departments, fairly measure its proportionate share of the cost of maintaining and protecting that portion of the said national park and national forest as constitutes the watershed of the water supply of said grantee.

Mr. MONDELL. Mr. Chairman, my amendment strikes out the part of the section which obligates San Francisco to pay fifteen, twenty, and ultimately thirty thousand dollars per annum, and provides in lieu of that, that San Francisco shall, first, maintain the roads and trails that are to be built about the Hetch Hetchy Lake; second, that she shall pay the cost of maintaining proper sanitary conditions on the watershed; and, third, that she shall pay her proportion of the cost of the supervision and policing and superintendence of the dams within the forest reserves and in the national park which are of the watershed. I do not believe that San Francisco should be called upon to pay an arbitrary fixed sum per annum for this grant. I think that the city should pay whatever cost the grant may lay upon the people of the country or the Treasury of the United States. If we were granting something of value for which San Francisco should pay, she should pay for it outright, and settle the matter here and now; but to place an annual lease charge on this grant is in my opinion establishing a very dangerous precedent. It is not in harmony with our policy up to this time and I believe it to be unwise.

Mr. HELM. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. HELM. The gentleman states that he believes if we were granting anything of value that San Francisco and San Francisco County should pay for it. Is the gentleman aware of the fact that the report of the Army engineers says that this proposition carries with it a \$45,000,000 water-power proposi-

Mr. MONDELL. Oh, well, if the gentleman thinks that whenever

It is not what I think.

Mr. MONDELL. I will answer the gentleman's question. If it is the gentleman's opinion that wherever water power is developed in the United States, those developing it should pay something into the Federal Treasury, the gentleman is welcome to that opinion. That is not my opinion. The fact is that in making this grant to San Francisco we take nothing from the people of the United States. We are not reducing the value of the property of the people of the United States. We make an inaccessible mountain valley accessible, and we make a valley which is now valuable only for camping purposes a beautiful lake. San Francisco builds roads about it, and instead of taking from the beauty of it we add to the beauty. We are making no grant that reduces the value of the people's property; we are giving the people of San Francisco an opportunity to utilize the resources of that region. Such utilization will be of real value to all the people rather than otherwise.

Mr. HELM. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I do not consider that we are granting anything of value in the sense that we are taking something of value from the people and giving it to San Francisco. fore I do not believe there is anything to be paid for. If there were, I should want to have the price fixed now and here and San Francisco make the payment or have the payment provided for.

In my view we are establishing a most unfortunate precedent, one without any proper, reasonable, or logical basis, when we fix an arbitrary sum which shall be paid annually so long as time shall run. It is not fixed upon any estimate. There is no logical basis for it. It is either too much or too little—I do not know which—assuming that we are asking them to pay for something which we are taking from the people and giving to them exclusively, which we are not. Therefore I offer this amendment in line with our policy heretofore and the

policy I think we ought to follow in the future.

The CHAIRMAN. The time of the gentleman from Wyoming has expired. The question is on the amendment offered by the

gentleman from Wyoming.

The question was taken, and the amendment was rejected. Mr. STEENERSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read. The Clerk read as follows:

Line 6, page 11, before the word "annually," insert:

"And the sum of 5 per cent upon the gross earnings from the sale of water power and electrical energy derived from said works."

I want to remind the committee of the testimony. The testimony quoted in this report shows that the value of this site over all other rival sites for water for San Francisco is at the lowest calculation twenty millions of dollars. The ultimate analysis of all arguments that have been made, so far as the water supply available for San Francisco is concerned, is that this is the one they desire because it is the cheapest, that the others would cost more, and the reason why this is the cheapest is not because it supplies water for domestic uses more cheaply, but that coincidentally with supplying water for domestic uses it creates a water power which the city of San Francisco can sell either to private users or to railroad companies or street car companies, or anyone else who desires to exploit the public for profit.

I read from page 29 of the report in which they quote the testimony of Col. Biddle:

The Hetch Hetchy supply is estimated to cost \$77,000;000, spread over a number of years. The second and third sources are estimated to cost \$97,000,000 to \$99,000,000.

Now, that is the argument in favor of the Hetch Hetchy project, and here further on the same page he says:

The power development in the Hetch Hetchy is greater than it is at any other source of supply.

In one place here, I believe, he states that the value of the water power to be developed from this reservoir, which belongs to the United States, the banks of it and all except a very small part of the bottom of the proposed reservoir belongs to the United States. The site for the dam belongs to the United States, and the water power to be developed, to say nothing of the domestic use of water, the water power and electric energy is estimated at a capitalization of \$45,000,000. That is the cash value of the water power and electric energy to be derived from this plant—115,000 horsepower. Now, I would not for an instant impose a tax, as was proposed in a former amendment, upon the water to be supplied to San Francisco for domestic use, but it seems to me that when a city, when a municipality engages in the enterprise for profit it should be charged on the same basis and charged by the same standards as a private company. If a private corporation were to ask the United States for the privilege of building a dam and creating a reservoir in this valley whereby they would develop the horsepower worth \$45,000,000, we naturally would impose some tax upon that because that is simply water power to be sold to the public. It may be sold to a railroad company or to the Western Union Telegraph Co.-that is not an eleemosynary institution as far as I know-and similar corporations, and my amendment therefore, in addition to the annual tax of \$30,000, proposes a tax of 5 per cent upon the gross earnings derived from the sale of water power and electrical energy.

The CHAIRMAN. The time of the gentleman from Minne-

sota has expired

Mr. STEENERSON. I would like to have one minute more.

Mr. FERRIS. I have no objection.

Mr. STEENERSON. In this connection I desire to state that the people of California do not seem to be exactly united on this subject, and I have a telegram from people who are to use this water for irrigation purposes. It has been stated that they had agreed to this proposition, and they telegraphed me here that the directors of the water users' association that made the agreement misrepresented them, and they are now in the process of being discharged and dismissed because of their conduct. I ask that it be read.

The CHAIRMAN. Without objection, the Clerk will read. Mr. STEENERSON. This was just received from California.

The Clerk read as follows:

Modesto, Cal., September 1, 1913.

Congressman Steenerson, United States Representative from Minnesota.

Washington, D. C .:

Washington, D. C.:

Delay passage of Raker bill if possible. Modesto irrigation district water users opposed to bill and now recalling irrigation directors who misrepresented them. Our people able and willing to develop Hetch Hetchy for land which needs it badly. It is outrageous to crowd bill through special session. W. C. LEHANE.

Mr. STEENERSON. Mr. Chairman, I desire to have this telegram read.

Mr. FERRIS. Let the gentleman read the telegram.

The CHAIRMAN. The gentleman asks unanimous consent to read the telegram. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

SAN ANSELMO, CAL., September 1, 1913.

Hon. Halvor Steenerson,
House of Representatives, Washington, D. C.:

Your patriotic efforts in opposing the Raker bill will have the approval and commendation of the people of this entire Nation when all

the facts behind this infamous scheme are made public. Congress should demand a rigid inquiry on this matter. There is no urgent need for water in San Francisco.

Mr. FERRIS. Mr. Chairman, the gentleman from Minnesota raises two questions; the committee is entitled to a reply. This Eugene J. Sullivan, the gentleman who sent the last telegram, is the president of the Sierra Blue Lake Water Co., a rival company, which has been trying to sell to San Francisco for years a supply that she does not want and that is inadequate from viewpoint. He appeared before our committee, and we delayed the hearings for about 10 days until he could come here and present his views in person; and I only invite any Member of the House to go over the hearings and read his testimony. He is a real estate promoter, a real estate plunger. mittee postponed their hearings on account of some inflammatory telegrams he sent in for 10 days in order to give him an opportunity to appear in person with his business and all his We gave him a patient hearing and he absolutely exploded himself. There was nothing in his testimony to answer at all. He presented nothing that had meat in it. He maniat all. He presented nothing that had meat in it. fested a desire to defeat this bill, to the end that he selfishly might stand a better chance to unload his own scheme upon them against their will and against their interests. Every member of the committee will bear out what I have said, both Republicans, Democrats, and Progressives, who heard him. We gave him full latitude and a full hearing. The other gentleman I do not know, but I know enough about the equation to answer that situation. We had here Mr. Griffin and Mr. Foulkreit, two able, clearheaded attorneys for the Turlock and Modesto irrigation people. They represented their people patriotically and well. They were fair and considerate of the committee's time. They knew what

they were about. They aided us materially.

They wired back to their chambers of commerce, they wired back to their county commissioners, they wired back to their boards of directors time and time again, and the record is skyhigh here with resolutions of approval of what is being done here. San Francisco has agreed to every regulation—is giving the irrigation people more water than they can get from the natural flow of the river. They have been here in person and have had their hearings and were favorable to the legislation.

Now, there was one gentleman here, a Mr. L. L. Dennett, who was a nice, pleasant gentleman, and who presented his case to the committee. Among other things he said he was forced to admit that his rights were nebulous and of doubtful origin. He merely wanted in if he could get in, but the committee concluded that he had no rights and could not come in. San Francisco needs the water badly and it was a chance for everyone to lay claims, Whether the telegram presented is from him or not I do not know, but so far as the Turlock-Modesto irrigation people are concerned their chambers of commerce and their boards of trade and their resolutions committees have sent to each of

us very earnest and most emphatic approval of this bill.

In keeping with that I might call the gentleman's attention to the gentleman from California [Mr. Church], who represents them, and to the gentleman from California [Mr. RAKER], who represents this Hetch Hetchy dam site. Their representatives are here and they know the fact. The truth is that San Francisco is bound by this bill to turn back into the regular channel of the stream more water than the irrigation people now get. San Francisco is to corral the melting snow and the rains that fall in the mountains and to use the water for their water-supply system and incidentally generate some power. It is estimated that they will generate a lot of power. They will; that is true. This bill is safeguarded by public-utility commissions and corporation commissions of the State of California, and is absolutely clothed with every conceivable regulation that the entire coterie of departments, Gifford Pinchot, and 20 members of the Committee on Public Lands, who spent some six months examining the matter, could possibly adopt. I think the gentleman from Missouri, perhaps, and the gentleman from Oklahoma [Mr. MURRAY], and one or two others, and I think the gentleman from Michigan [Mr. MacDonald], believe that there is a little need of some additional provision with reference to forfeiture a little later on. Now, it is not-

Mr. HELM. Will the gentleman yield? Mr. FERRIS. If I may proceed for just a moment, I will yield. It was the intention of the committee to absolutely prescribe forfeiture all the way through if San Francisco did not come up to its contract. In the first part of the bill, referring to the construction period, we have provided a most rigid for--we thought we had all the way through-if they do feiturenot without cessation construct the dam and the entire project. Again, we have adopted a strong clause for forfeiture in the event of a sale or an attempted sale. But for the benefit of the gentlemen who think we ought to make it a little stouter, and to be on the safe side, a little later on the committee ought to offer an amendment or accept the amendment of somebody which will make the forfeiture provision a little more stringent.

Now, answering the gentleman from Minnesota [Mr. Steenerson]. The gentleman fears we are not charging anybody for the water power. Of course this is a nonnavigable stream. They do not get the benefit of any stream at all. They erect a dam there and collect the water from the snows of the mountain. Mr. Pinchot said in his statement before our committee that the fact is this is the highest form of conservation. I wish gentlemen would read his statement. He says we come face to face with the proposition of whether we shall use things, or whether we shall let the melting snow during the flood period run idly into the sea.

Mr. STEENERSON. Will the gentleman yield?

Mr. FERRIS. In just a moment. The gentleman says that we are not charging enough. I do not know whether we are or not. Let me call your attention to one of the safeguards. On page 11, in lines 4 and 5, it says:

And for the remainder of the term of the grant shall, unless otherwise provided for by Congress, pay the sum of \$30,000.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.]

The Chair hears none. Mr. FERRIS. Now, this may be too much, and it may be too little. I call your attention to the fact that Congress has

the right to put it in here as it ought to be. I assert that no living man can at this time tell what it ought to be.

I would be unwilling myself to fix the amount at the amount specified in the bill if that amount were to be allowed to remain forever. We may be too high. Many good, clear-headed men think we are too high. On the other hand, many good, clear-headed men think we are to low. Either may be right about it. But when we put in a provision like the one appearing in lines 4 and 5 we can not go very far amiss, because as soon as they get in motion, as soon as the construction period is over, and as soon as they have had time to operate it a little while Congress can take them by the throat and make them pay what they ought to pay. I think the thing is sufficiently safeguarded.

Now I will be glad to yield to the gentleman from Kentucky

[Mr. HELM].

Mr. HELM. I understood the gentleman to admit that this bill carried with it a water-power proposition?

Mr. FERRIS. Undoubtedly, incident to the water supply. Mr. HELM, San Francisco city and San Francisco County are the grantees?

Mr. FERRIS. Undoubtedly they are. Mr. HELM. They are the beneficiaries of this bill?

Mr. FERRIS. Yes; but they pay a large sum for the rights

Mr. HELM. Now, I want to know if the county of San Francisco is the only entity that can utilize this water power under your bill?

Mr. FERRIS. Not at all, and for two reasons. The first

Mr. STEENERSON. Then another question. You admit, then, that San Francisco city or San Francisco County can dispose of or sell this water power to some other entity?

Mr. FERRIS. Yes; to some other municipalities. There is no question about that, and they can sell it to their own people. There is no question about that, either.

Mr. MacDONALD. And they can sell it to other indi-

Mr. FERRIS. Yes; there is no doubt about that.
Mr. HELM. That was the statement I made on Saturday in the discussion of this bill, and it was vigorously disputed

by the proponents of this bill.

Mr. FERRIS. If it was so, I do not recall the colloquy, and I do not have it now before me. San Francisco could not sell to any soap manufacturer or ice manufacturer anything that they could resell, but they could sell it to them for their own use. Otherwise why would the city of San Francisco be expected to incur all this expense?

The CHAIRMAN. The time of the gentleman has expired. Mr. FERRIS. Mr. Chairman, I would like to have three minutes more.

The CHAIRMAN. Without objection, the gentleman will proceed for three minutes.

There was no objection.

Mr. FERRIS. Answering the question of the gentleman from Kentucky [Mr. Helm], I will say yes, undoubtedly, if the gentleman will pardon me. The city of San Francisco from gentleman will parton me. The city of San Francisco from the very nature of things must have the right to sell this commodity to her own people. Who or what are the people of San Francisco? Is it not made up of her own people, of her own corporations, of her own tramways, and every other purpose for which water and power can be used. They must have the right to sell to their own people, of course, for maintenance expenses, and to reimburse themselves for this expenditure of \$77,000,000, and this money which they have already expended as the initial cost, and the \$30,000 a year, and so forth. There is absolute necessity that they be permitted to use it. Otherwise they could not afford to construct it,

Mr. HELM. This \$30,000 a year could be used for the purpose of operating a cotton mill or an aluminum plant or for

mining purposes, could it not?

Mr. FERRIS. Not at all. This \$30,000 can only be expended in improving the Federal Government's property, to wit, the national parks of California.

Mr. HELM. The city of San Francisco? Mr. FERRIS. Yes; of course you must have some one to use the power.

Mr. HELM. The city of San Francisco is going to sell this right to run a cotton mill or an aluminum plant or to conduct mining operations to the citizens of San Francisco?

Mr. FERRIS. Yes; of course, the right to sell to its consumers is the principal thing that they are making the expenditure of \$77,000,000 for. It is just the same with every municipally owned light, water, or power plant in the United

Mr. HELM. What they can sell to the citizens of San Francisco they can sell to a corporation organized by a group of

San Francisco men, could they not?

Mr. FERRIS. Oh, no; because there is an express provision to the effect that they can not resell the power in any way. They can sell for use only with a positive restriction against sale for any resale purposes of any sort.

Mr. HELM. Do I understand that simply because Tom Jones lives in the city of San Francisco they could sell to Tom Jones the right to operate a cotton mill or an aluminum plant or to

conduct mining operations?

Mr. FERRIS. Undoubtedly. That is what they are going to do. There is no doubt about that. San Francisco is expending \$77,000,000 for what? The answer must be patent to all. To supply their people with water and with power.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Oklahoma yield

to the gentleman from Texas?

Mr. FERRIS. Yes.

They have the power to sell, and there is a Mr. GREGG. restriction on the price to prevent them from charging an exorbitant price?
Mr. FERRIS. Yes. They have what in our State is called

a corporation commission, which will look after that.

Mr. GREGG. The State or Federal law controls, does it not?

Mr. FERRIS. The State steps in and provides the amount Mr. FERRIS. The State steps in and provides the amount or rate which they must charge. We had that matter up for or rate which they must charge. We had that matter up for consideration before our committee, and the committee considered it very carefully. They have the power to say who shall receive the water and how they shall receive it. Water is a very much sought commodity in that State and the California Legislature and the California Conservation Commission has been active to prevent extortion in every way.

The CHAIRMAN. The time of the gentleman from Oklahoma

has again expired.

Mr. BURKE of South Dakota. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Oklahoma [Mr. Ferris] be extended five minutes more.

The CHAIRMAN. The gentleman from South Dakota [Mr. Burke] asks unanimous consent that the time of the gentleman from Oklahoma be extended five minutes. Is there objection?

There was no objection. Mr. BURKE of South Dakota. If the gentleman will yield, I desire to ask him a question. Do I understand the gentleman to state that the language in lines 5 and 6 on page 11 would authorize Congress at some future time to increase the amount to be paid by the city of San Francisco above the sum of \$30,000

Mr. FERRIS. Undoubtedly. That was the intention of

everyone connected with it.

Mr. BURKE of South Dakota. If that was the intention, I think it would be better to change the language of the bill, because in my opinion while Congress might unquestionably have the right to relieve the city of San Francisco from paying as much as \$30,000 a year, I do not believe that under that lan-guage it could ever increase the amount a dollar. The language is:

And for the remainder of the term of the grant shall, unless otherwise provided by Congress, pay the sum of \$30,000 annually.

Mr. FERRIS. What does that language mean?

Mr. BURKE of South Dakota. This is a grant to the city of San Francisco, and you are providing that it shall pay for it a certain amount annually. In my opinion, Congress would not have the power to increase that to \$200,000 or \$300,000 at some future time without express authority, and you should so provide in this bill, so that there can be no question about what the intention of Congress is; in my judgment, the only inter-pretation that can be placed upon this language is that the city of San Francisco may be relieved from paying \$30,000, but that it can not be made to pay more than \$30,000 after this bill becomes a law, and the city complies with the conditions in the

matter of the construction, and so forth.

Mr. FERRIS. If the gentleman's construction was the correct one, I should be just as much in favor of modifying this language as he is, but I can not understand the words to mean anything except what they plainly say, and this is what they

And for the remainder of the term of the grant shall, unless otherwise provided by Congress, pay the sum of \$30,000 annually.

If my interpretation is the correct one Congress could come in at the end of 30 years and 1 day from the passage and approval of this bill and make San Francisco pay whatever Congress saw fit to make them pay. I do not know where the gentleman gets his rule of construction. If the gentleman had the correct construction, I would move an amendment to the bill; but I believe he has an erroneous construction. What can words mean

neve ne has an erroneous construction. What can words mean which say "unless otherwise provided by Congress"? Can not Congress run the scale up as well as run it down?

The CHAIRMAN. The time of the gentleman has expired.

Mr. FERRIS. Mr. Chairman, I move that the committee do now rise for the purpose of allowing the gentleman from New York University Appears a privileged purpose. York [Mr. FITZGERALD] to present a privileged report.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. Foster, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Hetch Hetchy bill (H. R. 7207) and had come to no resolution thereon.

# URGENT DEFICIENCY APPROPRIATION BILL.

Mr. FITZGERALD, from the Committee on Appropriations, reported the bill (H. R. 7898) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1913, and for other purposes; which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 64), ordered to be printed.

Mr. MANN. Mr. Speaker, I reserve all points of order on the

bill.

The SPEAKER. The gentleman from Illinois reserves all points of order on the bill.

Mr. FITZGERALD. Mr. Speaker, I give notice that I shall call up the bill at the earliest possible moment.

# HETCH HETCHY.

On motion of Mr. Ferris, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Hetch Hetchy bill (H. R. 7207), with Mr. Foster in the chair.

Mr. MacDONALD. Mr. Chairman, I do not wonder that the chairman of the committee and the members of the committee having charge of the bill are a little impatient at myself and other Members who are asking questions in regard to the pro-visions of this bill. The hearings, the report of the committee, and the report of the Advisory Board of Army Engineers furand the report of the Advisory Board of Army Engineers furnish very ample and complete information, and there is no excuse for any Member not being thoroughly informed as to the provisions of the bill. But I must confess that it has taken me a long time in following the debate and considerable study of the report to find out what the bill really means, and I believe that there are many Members upon whom the responsibility of

voting on the bill will finally rest who do not realize fully what is in the bill.

This bill, I believe, not only furnishes water to San Frank .... but contains within it a great governmental change of poacy in regard to the conservation of our national resources. It means a change of policy in this very matter. The Army engineers in their very able and illuminating report, from beginning to end, sound a note of warning. They say, in effect, in the beginning and all through the report and at the end, "Look out; this is a water-power bill; look out."

On page 46 of the engineers' report they say: "The policy of the Department of the Interior as to granting privileges for making use of Government reservations for the development of power is not known to the board. Any general plan or policy, could doubtless be made applicable to this case."

Mr. Garfield, Secretary of the Interior, who first granted a permit in this matter, put in a provision which will be found on page 8 of the engineers' report, being section 6, which is

absolutely and diametrically opposed to section 6 in this bill.

It provides that "the city of San Francisco will, upon request, sell to the said Modesto and Turlock irrigation districts for the use of any land owner or owners therein for pumping subsurface water for drainage or irrigation any excess of electric power which may be developed, such as may not be used for the water supply herein provided and for the actual municipal purposes of the city and county of San Francisco, which shall not include sale to private persons nor to corporations."

This bill changes that and does include sale to private persons and corporations.

Mr. THOMSON of Illinois. Will the gentleman yield?

Mr. MacDONALD. For a question. Mr. THOMSON of Illinois. For what purpose does it authorize the sale by the city of San Francisco to private persons and corporations?

Mr. MacDONALD. For commercial purposes. Mr. THOMSON of Illinois. Where does the gentleman find that? It says that the city can sell their water power to private individuals or corporations for consumption, but not for the purpose of resale.

Mr. MacDONALD. I will answer the gentleman. On page 39 of the engineers' report it says the city of San Francisco put their request for a modification of the Garfield permit into precise language. They state exactly what they want, and this bill gives them exactly what they state they want in this paragraph. The paragraph reads as follows:

Development of electric power for municipal use and sale to irriga-tion companies, lease of power privileges for the development by other individuals or corporations.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. MacDONALD. Mr. Chairman, I ask that my time be extended five minutes.

The CHAIRMAN. The gentleman from Michigan asks that

his time be extended five minutes. Is there objection?

There was no objection.

Mr. MacDONALD. Now, paragraph F, same page, states the same matter more fully:

The city will be empowered under the new conditions to lease electric power or power privileges to private persons or corporations under proper regulations, instead of being limited, as by the Garfield permit, to municipal purposes and to the Turlock and Modesto irrigation districts.

Mr. HELM. Will the gentleman yield? Mr. MacDONALD. For a question. Mr. HELM. Does this report of the Army officer show that a

water supply could be secured from any other source?

Mr. MacDONALD. The report of the Army engineers shows that there are three or four other sources of supply which they say any one of which would furnish an ample amount of water and of sufficiently good quality, and that the only reason for preferring the Hetch Hetchy proposition is a matter of expense; that the Hetch Hetchy proposition has one commanding feature that the others have not, and that is that it is a gigantic power proposition. The Government engineers report that the initial development of power is 115,000 horsepower, with a dam 150 feet high. The bill provides for a dam 200 feet high, and the engineers report that it could be capitalized at \$45,000,000.

Under the provisions of this bill any public-utility corporation owned by private persons can tap a conduit of this plant and use all the power it wants forever at the terms that it may make with the council of the city of San Francisco or the gov-

erning body of San Francisco County.

Mr. HELM. Mr. Chairman, will the gentleman yield? Mr. MacDONALD. I yield for a question.

HELM. How does the gentleman construe section 11, page 25, of this bill, which reads as follows:

Dage 25, of this bill, which reads as follows:

Sec. 11. That this act is a grant upon certain express conditions specifically set forth herein, and nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired thereunder, and the Secretary of the Interior, in carrying out the provisions of this act, shall proceed in conformity with the laws of said State.

Mr. MACDONALD. The question here is the question of what Congress is going to do with national resources, and nothing provided in the law of California can affect the contract that Congress makes here with the city and county of San Francisco. San Francisco here is contracting not in its municipal character but in its private character as a municipal corporation, outside of the bounds of its territory. The gist of the matter is, Mr. Chairman, then, that we as individual Members here are confronted with the responsibility of how we are going to vote on this change of governmental policy in regard to the turning over of the national resources. If we are in favor of turning over to the municipalities and the States the energy and power that may be developed from these natural resources, then we should vote for this bill. That is a question upon which gentlemen have different opinions and about which

they ought to know before they vote.

The following statement, furnished at my request by the office of the National Conservation Association, of which Mr. Gifford Pinchot is president, I desire to call attention to as bearing upon

the situation in California;

In the investigation on concentration of ownership and control in 1911 California was shown to have made rapid strides in water-power development. At that time California had a total development of 1,168,216 horsepower and led the rest of the country in developed commercial water power with 435,467 horsepower. Six distinct corporations, with their subsidiaries, controlled approximately 86 per cent of the developed power. The holdings of these companies were as follows:

110	rachouer.
Pacific Gas & Electric Co- Great Western Power Co- Northern California Power Co- Sierra & San Francisco Power Co- Southern California Edison Co- Pacific Light & Power Corporation	118, 343 60, 000 46, 900 65, 500 39, 540 45, 400

Total -part of California.

CONCENTRATION, 1913.

nies together owned practically all the available water powers in that part of California.

CONCENTRATION, 1913.

The Pacific Gas & Electric Co. to-day owns or controls the following companies: San Francisco Gas & Electric Co., California Gas & Electric Corporation, California Central Gas & Electric Co., Bay Counties Power Co., Standard Electric Co., South Yuba Water Co., the Central California Electric Co., Oak Gas Light & Heat Co., Stockton Water Co., Yuba Electric Power Co., Nevada County Electric Co., Central Electric, Gas & Rallway Co., United Gas & Electric Co., Stockton Water Co., Yuba Electric Power Co., Nevada County Electric Co., Central Electric Railway Co., Blue Lakes Water Co., Fresno Gas & Electric Co., Vallejo Gas & Light Co., California Central Electric Co. Ths company has 184.327 horsepower developed and 160,000 horsepower undeveloped, a total of 344,327 horsepower. Since the Bureau of Corporations report it has been gradually acquiring the few remaining power sites in the section it operates, and is to-day rapidly monopolizing the undeveloped water powers in central California. The company serves a population of 1,290,878, or 66 per cent of the State's population. It is capitalized at \$41,998,750.

The Western Power Co. is a consolidation of the Great Western Power Co., the Golden States Power Co., the Western California Electric Co., and the Electric Co. of San Francisco. The company operates in northern California and serves the cities of Sacramento, Oakland, San Francisco, and vicinity. It owns 90,000 developed horsepower and 655,000 undeveloped horsepower on the Big Bend River, and water rights on the Feather River and the Big Meadows capable of developing 500,000 horsepower, a total of 655,000 horsepower. The company is capitalized at \$20,000,000. This company delivers a large portion of its power to the Pacific Gas & Electric Co. The directors of this company servalized at \$20,000,000. This company delivers a large portion of the Northern California Power Co., which controls the Redding

tions and sells a large part of its power to the Pacific Gas & Electric Co.

The California Railway & Power Co., a holding company, is a consolidation of the Sierra & San Francisco Power Co., coast Valley Electric Co., and United Railroads of San Francisco. The Sierra & San Francisco Power Co. owns 65,000 horsepower developed and 50,000 undeveloped, a total of 115,000 horsepower. A large part of this power is sold in Nevada. This company has transmission lines from Murphy and Sonora to San Francisco and sells power to several communities, as well as to the street railways in San Francisco. The company is capitalized at \$45,000,000 and the directors are G. W. Bacon, J. D. Conner, Pat Calhoun, B. F. Gulnne, Alexander J. Hemphill, S. H. Marsh, W. J. Maloney, R. B. Young, J. H. Reed, and M. B. Staring. Alexander J. Hemphill is a director of the Electric Bond & Share Co., which shows the relation of this company with the General Electric interest.

The Southern California Edison Co. is a consolidation of the Edison Electric Co. together with seven smaller companies. This company owns 42,500 horsepower developed on the Kern, Mohay, and Santa Anna Rivers, and serves a population of \$00,000 in the vicinity of Los Angeles. The company has doubtless a general agreement with the Pacific Light & Power Co., as they do not enter into competition in the territory in which they are situated.

The Pacific Light & Power Corporation is a consolidation of the San Gabriel Electric Co. and Pacific Light & Power Co. It is controlled by stock ownership by H. M. Huntington. This company controls the San Joaquin Light & Power Corporation. It owns 45,400 horsepower developed and 10,000 undeveloped horsepower. This corporation controls 30 electric-lighting plants and 3 street railways. It sells power, heat, and light to Los Angeles. Fresno, and many small towns.

Mount Whitney Power & Electric Co. absorbed in 1911 the Mount Hood Water Power Co., Porterville Light & Power Co., Globe Light & Power Co., It does the lighting and has the power

Estimate of water-power development.

Total	647, 427	924, 350	1,571,777

It is estimated by the Bureau of the Census (1908) that the potential water powers of California are 3,148,000 horsepower. It is therefore evident that nearly one-half the potential powers of this State have passed to private ownership, and of this amount two companies own 999,327, or about 75 per cent of the water power of California.

Mr. HELM. Just one further question. Is not the effect of this last section of the bill-

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HELM. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Michigan be extended for five minutes.

Mr. FERRIS. Mr. Chairman, I must object to that. The gentleman has already had 10 minutes. I will have to object to any extension of time.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last word.

Mr. STEENERSON. Mr. Chairman, my amendment is pending. I suggest to the gentleman from Kansas.

Mr. MURDOCK. Very well. I shall talk to the gentleman's

amendment.

Mr. Chairman, the assertion which has reached me with the greatest force this morning in the discussion of this question is the proposition that the power factor involved in the bill is really of more moment than the water supply element. I think that everyone here is in favor of supplying the city of San Francisco with this water from the Hetch Hetchy Valley, but I am fearful that one feature of the bill has not been drawn entirely with a view to the enormous potentiality there is in water power; that is, in the creation of electrical power out of water power as developed by modern scientific methods.

Some three years ago I had occasion to see a demonstration of what modern scientists can do with water power. About 100 miles out of the City of Mexico is what are known as the Falls of Necaxa. A small mountain stream drops off the plateau of central Mexico sheer 1,600 feet, 10 times the height of Niagara. A group of young American, German, and English engineers have constructed on the plateau of Mexico a chain of five or six reservoirs, have turned a little mountain brook into those reservoirs, and filled them with water. Then these young engineers drop this water in four 30-inch pipes 1,600 feet over the precipice, and the water passing through those four 30-inch pipes generate through turbines at the bottom of the precipice 50,000 horsepower. That horsepower runs virtually all of the elevators, all of the mills, the street-car systems, and furnishes the lighting of the City of Mexico. It was a revelation to me, and I think it would have been a revelation to most of the men here, could they have seen it—a small mountain brook so utilized that it actually placed under the control of one man at the power house the whole of the capital city of the Republic to the south of us. A single switch engineer, seated in front of a small marble switchboard, would be able, by turning down five or six switches, an operation that would not consume 10 seconds, to stop every street car and put out every light in the capital city.

The engineers say that 115,000 horsepower can be developed from Hetch Hetchy. I have been through the West. I have been in this particular section of the country. The great possible reservoir sites out there in the Pacific coast mountains make the thing which has been done outside the City of Mexico a great deal more possible throughout all the Pacific coast States, and I think that any law which has been drawn which is to determine, as has been said this bill will, a great national policy, should put particular emphasis upon the possibility of the development of power, should guard the Government's interests jealously, and I hope that the gentleman from Oklahoma [Mr. Ferris] is absolutely right in his assertion that lines 5 and 6 in the pending section of this bill carry language under which Congress will have the power in 30 years to raise the annual pay for this privilege to the city of San Francisco, and if there is any doubt that the gentleman from Oklahoma is right, then a new section should be written into the bill which

will remove all doubt in respect to it.

Mr. FERRIS. Well, now, I am in hearty agreement with the gentleman about that, and the only thought I had was not to run in any amendment that would cripple or change or make the bill ridiculous, and I know the gentleman does not want that to happen. The committee was of the opinion, and this bill has been submitted to the highest authorities on conservation, and has their strong approval and we have letters received from them

Mr. MURDOCK. They may be mistaken.

Mr. FERRIS. I know that may be true enough, but we were of the opinion that too many words and too much language would serve as a matter of restraint rather than establish a clearer understanding. The gentleman understands that. Now, we were of the opinion that if we left the absolute proposition for Congress to provide what the rate or charge would be we certainly would be on the safe side.

Mr. MURDOCK. Now, while the gentleman is on his feet, I want to say I hope he is right about that, and I would like to ask in regard to the last section in this bill, Does it turn this great power and its utilization and control over to the

State of California and to the city of San Francisco?

Mr. FERRIS. Oh, I do not think so. We, of course, must not invade the State laws where parties have prescribed water rights.

Mr. MURDOCK. Ought not the gentleman to be sure about that?

Mr. FERRIS. I am sure about that as far as that is concerned. This bill leaves the regulation with the State. last section lets the public-utilities commission come in and fix what they shall charge so the city of San Francisco can not practice extortion, but it will enable the people to get their water supply cheaply and reasonably. We have worked it out so carefully in the committee, the departments have all considered it, and approve it. I feel sure it is well safeguarded.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. RAKER. Mr. Chairman, I simply desire to submit a few remarks on the question involved in this amendment. The first thing I desire to say, however, is in regard to the telegrams. The gentleman who sent the first telegram is not even known by the Congressman who lives in that district and close to that vicinity. In regard to the one of Mr. Eugene J. Sullivan, I simply desire to call attention to the record in the hearings on page 343, in which the following questions and answers were given:

Were given:

Mr. Raker. Now, one of the principal reasons of your objection here is that you have a water supply that you believe is available?

Mr. Sullivan. Yes, sir.

Mr. Raker. Your purpose is to present to the committee and convey to the committee the idea that your supply ought to be bought by the city and county of San Francisco.

Mr. Sullivan. Well, we say that it is an ample supply.

Mr. Raker. But answer the question. I want to get it directly before the committee. Your proposition is to convey to the committee the idea that you have a good and sufficient water supply?

Mr. Sullivan. Yes, sir.

Mr. Raker. And that it is the duty of San Francisco to buy your supply of water reservoir sites, etc.?

Mr. Sullivan. Yes, sir.

Now, can you imagine one man standing and holding up a

Now, can you imagine one man standing and holding up a large community of practically 700,000 people of the cities sur-

rounding the bay, 400,000 of San Francisco, with a doubt as to whether the amount coming from the reservoir is to be ample to supply the city, that he alone should say to Congress and say to San Francisco, "I have a water right and I want to hold you up, and you must therefore buy my water right or have none whatever"? He was given ample time; as the chairman of the committee said, the committee adjourned 10 days for him to appear here. That is the sum and substance of his testimony before the committee. Down further-I think it is well to call the attention of the gentleman from Michigan to that fact, claiming and believing in conservation—the leader of conservation in the departments, the Chief Forester of this country, has been Gifford Pinchot, and he came before the committee and unhesitatingly and unqualifiedly said that he did not oppose the bill and that it is in behalf of conservation and that the bill ought to pass. Now, has the gentleman gone into the features of it to say that the statement of the man who has given the last 20 years to that subject is wrong on this particular bill? Unquestionably not; and the testimony appears on pages 25, 26, and 27 of the hearings and in the report of the committee.

But the committee seems to lose sight to some extent of the fact that this is a municipality, one of the great cities of the West, that is striving and working to obtain a fresh supply of water for its inhabitants, to be controlled by the people under their own laws, to be controlled under the public-utilities act of the State of California, subject to the provisions of this bill. And can there be any comparison as to granting a right to a corporation or to an individual who is trying to develop a water power, as compared with a municipality, and when the city has paid the enormous sum of over \$1,700,000 for its rights that it now holds in the park and in the reserve, and is willing to pay this large amount, not for any power right, not for any water right, but on the theory that it is a grant upon conditions of the land that the Government owns? It does not own the water. It is conceded by everyone that the water and water rights belong to the State.

The CHAIRMAN. The time of the gentleman from Cali-

fornia [Mr. RAKER] has expired.

Mr. FERRIS. Could we not agree on time? The gentleman from Minnesota [Mr. Steenerson] offered an amendment, and I think we have gone pretty well wide of the mark on that. I ask unanimous consent that at the expiration of 5 minutes; to be occupied by the gentleman from Illinois [Mr. Thomson], that we have a vote on this amendment.

Mr. STEENERSON. I will say to the gentleman that I have

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that at the expiration of 15 minutes all debate on this paragraph and amendments thereto be closed, the gentleman from Illinois [Mr. Thomson] to have 5 minutes, the gentleman from Kentucky [Mr. Helm] 5 minutes, and the gentleman from Minnesota [Mr. Steenerson] 3 minutes.

Mr. STEENERSON. Reserving the right to object, I would like to say to the gentleman that I have another amendment

that I would like to discuss.

Mr. FERRIS. We can limit it to this amendment.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that all debate on this amendment close in 15 minutes. Is there objection? [After a pause.] The Chair

Mr. THOMSON of Illinois. Mr. Chairman, there seems to be some misgivings in the minds of some of the gentlemen here about the amount of compensation, and that seems to have arisen, in some measure, at least, because of doubt on the part of some as to the power possibilities in this bill. When this bill was

4097

being considered by the committee I offered an amendment to section 6, line 16, as it appears in the bill, by adding the words "or electric energy." With those words in that section, the bill amounts to this, that San Francisco can take this water, and San Francisco may develop such power as it may develop from the drop of that water from the Hetch Hetchy to the level of the city reservoirs, and San Francisco may sell this water or electric energy-to whom? To any other municipality that may come in under the provisions of this bill, or to any private individual in the city for consumption, or to any corporation in the city for consumption, and only for consumption, and under this section it is absolutely impossible for San Francisco to sell a drop of water or a bit of electric energy to any private individual or to any corporation for the purpose of reselling it.

Mr. MacDONALD. I would like to ask the gentleman if a public-utility corporation could not buy a site along the conduit and tap the conduit and get all the water it needs to run its

plant?

Mr. THOMSON of Illinois. No; it could not. I do not see any provision in this bill that would be capable of any such construction as would permit that. If the gentleman finds any clause in the bill that he thinks will permit that, I would like to see it. Where is it?

Mr. Chairman, this bill is a grant to these cities-to San Francisco and such other cities as may come in with the con-

sent of San Francisco, under the same law.

Mr. HINEBAUGH. Does not section 6 expressly provide against the objection raised by the gentleman from Michigan

[Mr. MACDONALD]?

Mr. THOMSON of Illinois. It does. Section 6 confines the privileges of this bill to the grantee, and the grantee in this bill is distinctly defined to be San Francisco and such other cities about the bay that may, by the consent of San Francisco. or by such law as may be in effect at the time the application is made, come in under the provisions of this bill.

Mr. MacDONALD. Will the gentleman yield?

Mr. THOMSON of Illinois. Certainly.

Mr. MacDONALD. I would like to call attention to the language used as to those representing the city, on page 8 of the

Mr. THOMSON of Illinois. I beg to call the attention of the gentleman from Michigan to the fact that the thing that is going to govern the use of this water and the use of this electric energy is this bill, and not the engineers' report.

Mr. MacDONALD. This is the statement of the committee of San Francisco, who stated to the committee that this bill

gave them just what they wanted.

Mr. THOMSON of Illinois. Pardon me. Mr. Chairman, I want to call the gentleman's attention to the fact that they can not hope to do so, because this bill was not drafted until long after the report he speaks of was made. It may be that this bill contains language that the gentlemen may want; but what the bill drafted at that time may include is a different matter, because that bill was drafted months before

Mr. MONDELL. Mr. Chairman, along the line of the inquiry made by the gentleman from Michigan [Mr. MACDONALD], allow me to call the gentleman's attention to lines 7, 8, and 9, on

And no power plant shall be interposed on the line of the conduit except by the said grantee or the lessee, as hereinafter provided—

And so forth.

In other words, there is an express prohibition of the sort of

thing that the gentleman from Michigan fears.

Mr. THOMSON of Illinois. And it should be added, Mr. Chairman, that that lessee, unless it is a municipal corporation, is by the terms of the bill confined to somebody who wants to use this for consumption.

Mr. MacDONALD. I would like to ask the gentleman, Mr. Chairman, if the lessee does not mean the private individual or the corporation to whom or to which section 6 says this may be

given or sold?

Mr. THOMSON of Illinois. Let me ask the gentleman this question: Will the gentleman state whether or not he has an objection, and if so, what that objection is, to the city of San Francisco selling electrical energy to somebody, either an individual or a corporation, solely for consumption and not for the purpose of reselling? What objection is there to that?

Mr. MacDONALD. It depends on whom the consumer is and

what is the amount of power that is furnished.

The CHAIRMAN (Mr. WALSH). The time of the gentleman from Illinois has expired.

Mr. STEVENS of New Hampshire. Mr. Chairman, the chairman of this committee [Mr. Ferris] stated that under the provision on page 11, line 5, "unless otherwise provided by Congress," Congress could increase or decrease the annual rental,

and that that was the distinct intention of the committee.

If that is the intention of the committee, I think the language ought to be changed, and it ought to be specifically stated that Congress can increase the annual rental. Otherwise the point made by the gentleman from South Dakota [Mr. Burke] is absolutely sound. This provision imposes a burden upon San Francisco. It is a contract between the United States and San Francisco, by which San Francisco must pay \$30,000 a year, unless otherwise provided by the other party to the contract; and I think there can be no doubt but that it means a decrease or a waiving of it entirely and not an increase.

I think the position is exactly the same as if the gentleman held my note and it should read on that note that I must pay 6 per cent interest unless he specifically required otherwise; under that provision, in any court of law, he could not charge me 10 per cent, but he might charge me 5 per cent or 4 per cent or nothing. I think it should be specifically stated in here that Congress, which has imposed this burden, should be at liberty

ongress, which has imposed this burden, should be at liberty to increase it as well as decrease it.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. STEVENS of New Hampshire. Yes.

Mr. MURDOCK. Could there be anything to the detriment of San Francisco if this section provided that after the expiration of 20 were the material by San Francisco. tion of 30 years the rate paid by San Francisco to the Government should be such as Congress then provided?

Mr. STEVENS of New Hampshire. I think that is the way

it ought to be.

Mr. MURDOCK. At that time, 30 years from now, the conditions might be entirely different from what they are now.

Mr. BRYAN. Mr. Chairman, I would like to know what the amendment is we are now considering. I would like to have the amendment reported again so that we can have it before us.

The CHAIRMAN. Without objection, the amendment will

again be read.

There was no objection. The Clerk read as follows:

Amend line 6, page 11, by inserting, after the word "annually," the following: "And the sum of 5 per cent upon the gross earnings from the sale of water power and electrical energy derived from said works," so that the paragraph as amended will read: "And for the remainder of the term of the grant shall, unless otherwise provided by Congress, pay the sum of \$30,000 annually, and the sum of 5 per ceat upon the gross earnings from the sale of water power and electrical energy derived from said works, said sums to be paid," etc.

Mr. STEENERSON. Mr. Chairman, I desire to be recognized.

The CHAIRMAN. The gentleman from Minnesota is recognized for three minutes.

Mr. STEENERSON. Mr. Chairman, I want to call the attention of the committee to the fact that the argument in favor of taking this reservoir in preference to other sources of water supply is based upon the proposition found in the engineers' report, that this proposition affords a cheaper water supply by \$20,000,000, because the water-power privilege itself is worth \$45,000,000.

I will read from page 23 of the report of the committee on this bill, being an extract from the Army board findings:

Construction of Tuolumne system as proposed by the city of San Francisco, to be extended over about 50 years, \$77,000,000.

Against the above expenditure there will be developed 115,000 horsepower, having an estimated capitalized net value of \$45,000,000.

The amendment I offer is not a tax upon the consumption of water for domestic purposes, but is a 5 per cent tax upon the gross earnings derived from the sale of power or electrical energy. I understand that the water will fall down a vertical distance of 4.000 feet to supply the people of San Francisco for domestic purposes, and still in that fall it will develop this power, worth that much. When we grant this much, it seems to me we ought to reserve 5 per cent upon those earnings. It is a reasonable proposition, and the gentleman from Michigan [Mr. MacDonald] is absolutely right when he says that this is a most valuable concession, and that it is a change of policy to grant this valuable right to the city of San Francisco. The fact that it is a municipality makes no difference. It stands on the same basis as if it was granted to an individual. The fact is pointed out here that this bill attempts to restrict the sale of power to consumers of power. That really makes no difference, because the Standard Oil Co. might use this power for refining their gasoline.

Mr. KENT. If the gentleman is going to calculate it on that basis, and to ignore the fact that it is for general public use and benefit, he ought to realize that San Francisco owns over half the real estate now in fee simple, and so he ought to cut down his estimate.

Mr. STEENERSON. I have made the estimate as far as my reasoning and understanding enables me to make it, fairly and justly, and I take the engineers' report for it. It seems to me that 5 per cent of these earnings is perfectly fair. The city of San Francisco might lease this power, whether in the form of electrical energy or direct water power, to the greatest monopoly in the world. The fact that the city of San Francisco will do it does not make any difference.

The CHAIRMAN. The time of the gentleman has expired. Mr. HELM. Mr. Chairman, I hope that the chairman of this

committee and the other members composing it will not conclude that there is anything personal in my comments or criticisms upon this bill. I am only undertaking as best I can to direct the attention of the committee to what I consider some very vital and important features of it. I believe I am right.

The argument has been advanced here that you are creating something out of nothing. I grant you that is true, and wherever that can be done it should be done. But I want my friends on this committee to bear in mind that you are handling a big proposition, a \$77,000,000 proposition. That of itself ought to direct and focus the attention of every man here who is now trying to find the right thing to do on this bill, the right course to pursue; and I hope that when this bill shall have been passed, there will be no criticism attaching to it similar to the criticisms that attach to matters with which Mr. Bal-linger had to deal. I hope that when this bill passes it will be a credit to the chairman and the Democratic membership as well as the Republican membership of this committee, and a credit to the Democratic Party. I am somewhat apprehensive that this bill is not as well safeguarded as it ought to be; and with all good will, with the best intention, I am offering my suggestions in the hope that if I am misinformed, that if I have misinterpreted the language of this bill, that when it shall become a law it will be a credit to you and to the Democratic Party, and not a liability.

Mr. FERRIS. Will the gentleman yield?
Mr. HELM. In just a moment. It is true that this is a valuable franchise, and that if you can create a \$45,000,000 proposition out of nothing, that is a good thing. So far so good. But when you talk about Congress catching San Francisco by the throat and strangling it out of \$30,000 per annum, if I believed that it was the intention of this bill, or that there was anything in this bill that could be used to get a strangle hold upon the city of San Francisco, I would not, if I was a member of the committee, support the bill. That sounds pathetic indeed; but while Congress is putting a strangle hold upon the city of San Francisco, let us see well to it that this House is not putting a strangle hold upon some one else, and is not creating rights here the profits of which in this enormous enterprise will find their way into pockets that you do not now dream of, and whose interests do not appear on the face of this bill.

It is a great thing to produce something out of nothing. The transcontinental railroads were of incalculable benefit to the United States, but the scandalous land grants that accompanied them are still a stench in the nostrils of you men from the West who frequently take this floor and who are undertaking now through the Department of Justice to get back a part of that vast domain of public land which was unduly granted them

when the charters were granted.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. HELM. Mr. Chairman, I ask that my time be extended

three minutes.

Mr. FERRIS. I want to indulge the gentleman, but the time was fixed by unanimous consent. However, I have no objection. The CHAIRMAN. Is there objection?

There was no objection.

Mr. HELM. It would be a great thing to develop the enormous resources of Alaska, its copper and coal mines. are now of no value to the community as they lie, but I for one would not turn over all the copper, coal, and gold mines in Alaska to the Guggenheims for the purpose of creating something out of nothing. When you are passing upon this bill, when you are undertaking to do what you consider justice to

the people of San Francisco, carry along with you in your minds the fact that it would be as valuable to somebody, or to a few persons, to turn over all the copper in the great Alaskan fields so that somebody could be given the use of it. But I mistake the spirit of the American people if it is their sentiment that these enormous benefits are to be turned over to be made the profit of a few. This property belongs to the American people, and it is the duty of a well-directed Congress to see that the powers that here are being solemnly granted by this bill are granted without conferring upon any private individuals or corporations, or a few people, the right to make stupendous profits out of it. As the gentleman from South Dakota directed the attention of the House, that when once you pass this bill you have erected a barrier behind which you can not go, I ask that this House deal with this bill with that calm consideration that its magnitude requires should be given it.

The CHAIRMAN. The question is on the amendment offered

by the gentleman from Minnesota [Mr. Steenerson].

The question was taken; and on a division (demanded by Mr. Steenerson) there were—ayes 21, noes 35.

So the amendment was lost.

Mr. FERRIS. Mr. Chairman, I offer the following amend-

The Clerk read as follows:

On page 11, line 5, after the word "shall," strike out the words "unless otherwise provided by Congress," and insert in lieu thereof the words "unless in the discretion of Congress the same should be increased or diminished."

Mr. STEENERSON. Mr. Chairman, I offer the following amendment as an amendment to the amendment by way of a

The CHAIRMAN (Mr. FOSTER). The Clerk will report the amendment.

The Clerk read as follows:

Substitute for the amendment by inserting the following: "and the right to increase said charge at the discretion of Congress is hereby expressly reserved."

Mr. MURDOCK. Mr. Chairman, I would like to ask the gentleman from Minnesota wherein his proposed substitute differs from the amendment offered by the gentleman from Oklahoma?

Mr. STEENERSON. I think it is better language. that we expressly reserve the right to increase it. The other language is vague and indefinite.

Mr. MURDOCK. I do not think it is vague or indefinite.
Mr. STEENERSON. Mr. Chairman, I ask that the two
amendments, the one offered by the gentleman from Oklahoma

and my substitute, be again reported. The CHAIRMAN. Without objection, the two amendments

will be again reported. There was no objection, and the Clerk again read the amend-

ment and the substitute. The CHAIRMAN. The question is on the substitute offered

by the gentleman from Minnesota [Mr. Steenerson]

Mr. STEENERSON. Mr. Chairman, the usual language in grants of this kind where the right to increase the charge is desired is the language that I have used in my substitute. The language which the gentleman from Oklahoma proposes I do not believe can be found in any grant of this kind. Take the tax on railroads on the gross earnings and you will find that the right to increase the charge is expressly reserved. That is only embodied in the language offered by the gentleman from Oklahoma by implication. It seems to me that Congress ought reserve the right because we can not tell what this power will be used for. The power controls many things—transportation, telegraph, telephones, and various electrical The city of San Francisco in having the right to furnish this at any price it may see fit controls the destinies not only of many cities but individuals. Granted that it can only be sold to consumers, yet the power is a very great power. One hundred and fifteen thousand horsepower would be generated, which would run electric car lines, railroads, refineries, reducing works, smelting works, to which you would ship your ore from the mountains, and they could charge such a ridiculously low price to one man as to destroy the business of a neighboring smelting works. The city of San Francisco may be a very good city now. We have heard various things about it in the past. They have had their scandals, they have had their Abe Reuf and corrupt councils, and we can not tell what they will do with this momentous power of fixing the transportation rates for 150 to 300 miles out of San Francisco.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. STEENERSON, Mr. Chairman, I will say that I will be glad to yield to the gentleman from Kansas, especially in view of the fact that I hope he will change his position, and

that instead of voting against my amendment he will vote for it.

Mr. MURDOCK. I do not intend to vote against the gentleman's amendment. I want to find out what it will do. Is the gentleman's amendment intended to apply to the annual payment of \$15,000 and the annual payment of \$20,000 as well as to the annual payment of \$30,000?

Mr. STEENERSON. It applies to all payments.

Mr. MURDOCK. From the beginning?

Mr. STEENERSON. It applies to everything, because it is placed at the end of the payments specified. There are certain payments specified in the grant, and at the end of those specified payments I put in an amendment that the right to increase these charges is expressly reserved to Congress

Mr. MURDOCK. I am in sympathy with the gentleman's

amendment.

Mr. STEENERSON. His vote did not indicate it awhile ago. I thought he was in favor of it when he prompted the gentleman from Michigan, but when it came to a vote he voted the He voted against conservation.

Mr. MURDOCK. I dld nothing of the sort.

Mr. MANN. Oh, he was the one man who voted with the gentleman from Minnesota.

Mr. STEENERSON. Then I stand corrected.

Mr. BRYAN rose.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that debate on this amendment close in seven minutes, five minutes to be given to the gentleman from Washington and two minutes to myself.

The CHAIRMAN. Is there objection? Mr. THOMSON of Illinois. Mr. Chairman, I desire to offer an amendment in the nature of a substitute, but I want to wait until the substitute at present under consideration is voted upon.

I suggest to the gentleman that he give notice Mr MANN.

that he will offer it.

Mr. THOMSON of Illinois. I wish to give notice that I desire to offer an amendment in the nature of a substitute for the original amendment and to have it pending.

The CHAIRMAN. There is already one substitute pending. Is there objection to closing the debate in seven minutes?

Mr. MANN. Mr. Chairman, reserving the right to object, did not the gentleman from Illinois desire a moment to explain his amendment?

Mr. FERRIS. Mr. Chairman, I will yield the gentleman time

in which to make an explanation.

Mr. THOMSON of Illinois. I understood from the chairman of the committee that I would have time enough in which to explain the substitute after the present substitute is voted upon.

The CHAIRMAN. The Chair hears no objection.

Mr. BRYAN. Mr. Chairman, it pleases me, and it ought to please every Member in Congress, to see gentlemen who have been a number of years in Congress endeavoring now to provide some means for revenues from these water-power sites. Perhaps the distinguished gentleman from Minnesota [Mr. Steenersonl-and I have no issue with him at all-has not thought of the fact that John Hays Hammond or some of his associates practically got all of these water-power rights from the Government while the gentleman was a Member of Congress without paying a penny for them, and that water-power sites throughout the West have been given-

Mr. MANN. Oh, the gentleman is in error in respect to that. Mr. BRYAN. And that water-power sites, whether they were acquired during the term of the gentleman from Minnesota or not, have been given during the term of Members who now sit in Congress without the payment of any consideration to the Government, and large sums have been exacted for those rights by the parties who acquired them or they have been made a source

In this case this particular remnant of the Hetch Hetchy proposition is being ceded over to the people of that district. not being ceded over to any private corporation, and there are

of very great profit to private interests.

safeguards about it protecting it from any kind of exploitation. I believe that this does mark an epoch. I believe it marks an important epoch in the history of the disposition of water-power sites and holdings of this kind. I am not surprised that the gentleman from Wyoming [Mr. Mondell] should raise that question and should suggest that it is a very important course

that we are verging upon. If we require hereafter all of these people who want water-power sites, especially those who want them for private corporate purposes, who expect to turn the water-power sites and electrical energy generated into commercial purposes exclusively for private profit, to pay what the water right is worth, we will have instituted a new policy-we will have begun a new regime-and instead of owning but a small fragment of the water right, as in the present case, through which we will obtain a few thousands of dollars per annum, while the other part of the right has been taken for practically nothing, we will find that the revenues of the Government will be protected, that the people will be protected, and that all of us will stand in a better light and better credit among our people and those to whom we should account.

Mr. HELM. Will the gentleman yield? Mr. BRYAN. I must decline, as I am nearly through and have only a few moments left. Right here within a stone's throw or a short distance from the city of Washington is a magnificent water-power site, Great Falls. The people of Washington do not enjoy the benefit of it; not at all. It has passed to private hands, passed from the Government as private property. So the water-power rights of the entire country, particularly in the eastern part of the country, where the country has been populated for a long time, have passed away from the Government for nothing. Out in the West the people are going to control this and they are not going to use these water rights for private purposes. I am glad enough to see a different régime started, and I am glad to see those gentlemen who have been here for the last 11, 12, and 13 years recanting, forgetting their past methods, and desiring to change them in a more improved and reasonable way.

The CHAIRMAN. The time of the gentleman has expired. Mr. BRYAN. I ask unanimous consent to extend my remarks

in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. there objection? [After a pause.] The Chair hears none.

Mr. STEENERSON. I desire to state to the gentleman that as far as water power and conservation is concerned I have nothing to recant and nothing to regret in regard to my record, and that record is in perfect harmony with what I am now advocating.

I am glad to hear the statement, and I have no doubt it is absolutely correct. I know the gentleman is making

conscientious fight.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Minnesota.

The question was taken; and on a division (demanded by Mr. Steenerson) there were-ayes 20, noes 34.

So the substitute was rejected.

The CHAIRMAN. The question is on the amendment of the gentleman from Illinois

Mr. FERRIS. Mr. Chairman, I ask to modify my amendment in one or two words.

The CHAIRMAN. The gentleman from Oklahoma asks unan-

imous consent to modify his amendment.

Mr. STEENERSON. Mr. Chairman, I suggest to the gentleman from Oklahoma that if he accepts my language he will improve the amendment.

The Clerk read as follows:

Modify the amendment by striking out the word "sum" and inserting the words "annual charge," so that the language will read: "unless in the discretion of Congress the annual charge should be increased or diminished."

The CHAIRMAN. The Clerk will now report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Page 11, line 5, after the word "shall," strike out the words "unless otherwise provided by Congress" and insert the following after the word "annual," in line 6: "or such sum as Congress may provide."

Mr. THOMSON of Illinois. Mr. Chairman, my amendment is practically the amendment of Mr. Ferris, except it places this language which gives Congress the right to change this sum in

its logical and proper place.

I think something of the doubt about this language that arose originally in the minds of some of the gentlemen here was because of this "unless" clause coming in before the annual payment was mentioned, but if we say that before the termination of the grant they shall pay the sum of \$30,000 annually, or such sum as Congress may provide, it will give the Government the right to change that sum one way or another. I think such right ought to be reserved.

Mr. FERRIS. I have no objection to it, but I thought it was too much like the language in the bill to satisfy all these gentlemen.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Illinois [Mr. Thomson].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. THOMSON of Illinois. I ask for a division, Mr. Chairman.

The committee divided; and there were—ayes 10, noes 26.

So the substitute was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. Ferris].

The question was taken, and the amendment was agreed to. Mr. MURRAY of Oklahoma. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MUR-RAY] offers an amendment, which the Clerk will report.

Mr. FERRIS. Mr. Chairman, I wonder if we can have an

agreement? I ask unanimous consent that the debate on this amendment close at the end of five minutes.

The CHAIRMAN. The Clerk will first report the amendment.

The Clerk read as follows:

Page 11, line 7, insert before the word "said" the following: "until otherwise provided by Congress,"

Mr. FERRIS. Mr. Chairman, I think that is a good amend-

Mr. MURDOCK. Mr. Chairman, I would like to ask the gentleman from Oklahoma [Mr. MURRAY] what he seeks to accomplish by that amendment?

Mr. MURRAY of Oklahoma. I will state this: You change the capital "S" to a small "s" in the word "said" and in-sert the phrase before it "until otherwise provided by Congress."

In the event that this sum shall grow to any very large degree, we want it fixed so it might be used for other purposes. As long as it is a small amount, like the sum fixed here, of \$30,000, so long should it be used there.

Mr. MURDOCK. That is, the gentleman's amendment applies to the succeeding sentences and not to the matter we have

just had?

Mr. MURRAY of Oklahoma. Certainly.

Mr. MANN. The gentleman admits the provision is wrong, but that it is such a little wrong that he asks us to vote to sustain the little that is wrong?

Mr. HELM. I want to ask the gentleman from Oklahoma [Mr. MURRAY] a question.

Mr. MURRAY of Oklahoma. I yield for a question.

Mr. HELM. What is it that San Francisco is paying \$30,000

Mr. MURRAY of Oklahoma. I do not know anything about The bill here provides

Mr. HELM. What does it get for the \$30,000? Mr. MURRAY of Oklahoma. Who?

Mr. HELM. San Francisco.

Mr. MURRAY of Oklahoma. I do not know as that has anything to do with the amendment.

Mr. HELM. I was just asking for information.

Mr. MURRAY of Oklahoma. I do not think I could inform

Mr. HELM. Then I will ask the chairman of the committee. Mr. FERRIS. I hope the gentleman will not leave the amendment and the question for new fields; but my answer will be that we do grant them the right to construct a dam in a gorge in the Hetch Hetchy Valley, at the expense of \$77,000,000 to San Francisco, without one penny of cost to the Government. And in addition to that they spend approximately one million in improving the roads and making something of the park. They have already spent three-quarters of a million of dollars in buying land and making investigations under authority from the United States. They own twothirds of the floor of the valley now in fee simple. And that is, I should say, one of the bases on which we make this grant, and Congress reserves the right to charge them more or less as time goes on. There is every safeguard in the bill that can be There never was a devised without destroying the grant. more just and progressive conservation bill.

Mr. TALCOTT of New York. Does not the \$77,000,000 involve other dams?

Mr. FERRIS. Yes; as a part of this system, if they desire to construct them.

Mr. TALCOTT of New York. That is included in the \$77,000,000?

Mr. FERRIS. Yes; those figures are the estimate for a completed system, including the entire supply.

Mr. TALCOTT of New York. There is another dam con-

templated at Lake Eleanor and one at Cherry Creek?

Mr. FERRIS. There are three in all.

Mr. TALCOTT of New York. The \$77,000,000 includes the

three dams and not the one at Hetch Hetchy alone?

Mr. FERRIS. Yes. And I will say to the gentleman that the other dams are higher up in the mountains, so that they can save a larger amount of water, otherwise some of the water at flood times would flow over the dam and into the sea, a total waste to everyone.

Mr. TALCOTT of New York. And the plan is not to complete all the dams at the same time, but to complete the Hetch Hetchy Dam first, and Lake Eleanor next, and the Cherry Creek

Dam next?

Mr. FERRIS. I have forgotten the order of the last two, but

think the gentleman is correct.

Mr. TALCOTT of New York. The idea is not to develop them

all at once. So the initial expense will be \$21,000,000?

Mr. FERRIS. They have voted \$45,000,000 altogether.

Mr. TALCOTT of New York. The expense of the Hetch Hetchy Dam will be about \$21,000,000?

Mr. FERRIS. A larger sum than that.

Mr. HELM. Do I understand the gentleman that they have floated \$45,000,000?

Mr. FERRIS. They have voted that amount.
Mr. HELM. As I understand, San Francisco pays \$30,000 annually for 20 years.

Mr. FERRIS. Yes, sir; almost that. It is a graduated charge, subject after 30 years to be changed by Congress up or down as the facts warrant.

Mr. HELM. It gets a water supply, it gets a \$45,000,000 water-power proposition, and has the right to sell for irrigation and municipal purposes an unlimited source of water?

Mr. FERRIS. No; the gentleman gets wrong about irri-

gation, because there are limitations here that make them put the water all back for the San Joaquin Valley and other places where prescribed rights have attached.

Mr. HELM. But there are provisions that do not require them to put it back. There are provisions in there for charges

for irrigation purposes.

Mr. FERRIS. That is to make them restore that and carry out the provisions that were already made. The gentleman would not want us to overthrow vested rights, I am sure. Mr. HELM. What I would like to do is to strike a balance.

San Francisco votes bonds to the extent of \$77,000,000

Mr. FERRIS. They have not yet done so, but they anticipate doing it

Mr. HELM. They have voted already \$45,000,000, have they not?

Mr. FERRIS. Yes.
Mr. HELM. Now, they get in return for that the water supply for all these cities and municipalities, and they are to get paid for that water furnished, and they have got this \$45,000,000 proposition.

Mr. FERRIS. The gentleman could figure it that way, if he

likes, but-

Mr. HELM. Is not that a very cute proposition for San Francisco?

Mr. FERRIS. Here is the situation: The snows and rains are now flowing into the sea, and it is an absolute waste to San Francisco, the irrigationists, and the Government. I would like to ask the gentleman how long does he think it would take us to get the Federal Government to appropriate \$77,000,000 to go out there and dam up that gorge? It is a well-known fact that the Federal Government can not and will not undertake it. San Francisco will do it and only asks the chance.

Mr. HELM. As to that, I do not know of any case that stands exactly on all fours with this proposition, but I know that the Government has heretofore erected tremendous dams, either in Arizona or New Mexico, at an enormous expense.

Mr. FERRIS. Not for cities, but for irrigation.
Mr. HELM. I understand all that, but the revenues and the

incomes are enormous. Mr. FERRIS. This is what we have done: We have spent \$60,000,000 for irrigation and have got nothing back in return yet. We only hope we may get the principal back, which is doubtful. We would be awful glad to get the original money back. Here is a proposition for a great improvement and a

great saving and conserving of our national resources that will cost the Government not a cent, and the \$77,000,000 is to come from San Francisco.

I ask for a vote, Mr. Chairman. The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Sec. 8. That the word "grantee" as used herein shall be understood as meaning the city and county of San Francisco and such other municipalities or water district or water districts as may, with the consent of the city and county of San Francisco or in accordance with the laws of the State of California, hereafter participate in or succeed to the beneficial rights and privileges granted by this act.

Mr. ROGERS. Mr. Chairman, I move to amend section 8 by striking out the words "water district or water districts, in lines 17 and 18, and substituting in place thereof the fol-

lowing: "municipal water districts or irrigation districts."
The CHAIRMAN. The Clerk will report the amendm The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts [Mr. ROGERS]. First, will the gentleman read his amendment again?

Mr. ROGERS. Strike out the words "water district or water districts," in lines 17 and 18, page 17, and substitute in place thereof the words "municipal water districts or irrigation districts.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 11, lines 17 and 18, by striking out the words "water istrict or water districts" and inserting in lieu thereof the words municipal water districts or irrigation districts."

Mr. FERRIS. Mr. Chairman, what does the gentleman seek to accomplish by that?

Mr. MONDELL. Mr. Chairman, will the gentleman yield

to me for a second?

to me for a second?

The CHAIRMAN. Does the gentleman yield?

Mr. ROGERS. Yes; I yield.

Mr. MONDELL. I desire to call the gentleman's attention to the fact that this is simply a definition of the language that occurs on page 2 of the bill, and he can not very well change this language unless he goes back and changes the title of the grantee. The grantee, on page 2 of the bill, beginning with line 10, is thus described:

The city and county of San Francisco and such other municipalities and water districts as, with the consent of the city and county of San Francisco or in accordance with the laws of the State of California in force at the time application is made, may hereafter participate in the beneficial use of the rights and privileges granted by this

Now, the language the gentleman has just read is a defini-tion of that statement in the grant.

Mr. MANN. Mr. Chairman, will the gentleman yield?
Mr. ROGERS. Yes.
Mr. MANN. The gentleman from Massachusetts [Mr. Rogers] is seeking to make the bill conform with itself. Now, the gentleman from Wyoming refers to the language on page 2, when in section 6 the prohibition against selling water is against anyone selling water except a municipality, a water district, or an irrigation district. Now, the gentleman from Massachusetts offers an amendment over here as to the definition of what the word "grantee" means, so as to cover the municipal water district or the irrigation district referred to in section 6.

Mr. MONDELL. Let me suggest to the gentleman that an irrigation district can not be made a grantee under this act unless you change the language on page 2 which I have just read, because that is the language that defines the grantee.

Mr. ROGERS. Under the provisions of section 6 the grantee is permitted to assign to various public institutions, among which are:

A municipality or a municipal water district or irrigation district.

It seems to me that clearly we should have here in section 8 uniformity with the provisions of section 6. It may be that section 6 is wrong, but at all events section 8 should be made to agree with it. The gentleman from Illinois [Mr. Mann] has

stated the case in a nutshell.

Mr. THOMSON of Illinois. The language of section 6, referring to a municipal water district or irrigation district, does not refer to the grantee or a part of the grantee, but to an assignee of the grantee, or a possible assignee, and does not seek to make the municipal water district or irrigation district a grantee of this grant; but it qualifies what the grantee, the city

of San Francisco or the other bay cities, may sell to a municiof San Francisco of the other bay cities, may sell to a municipal water district or irrigation district. It is not a grantee nor does it seek to make it a grantee, but qualifies it as a possible assignee of the grantee.

Mr. ROGERS. Section 8 seems to attempt to include assignees of the grantee within the word "grantee."

Mr. THOMSON of Illinois. Mr Chairman, as I understand section 8, and as I believe we all understood it on the committee, the language of that section does not refer in any way to

tee, the language of that section does not refer in any way to any possible assignee of a grantee, but it is solely a definition of the grantee-

and such other municipalities or water district or water districts-

And that refers to the municipal water districts around the

as may, with the consent of the city and county of San Francisco, or in accordance with the laws of the State of California, come in.

There may be a municipal water district outside of that bay

district that may want to come in as an assignee.

Mr. ROGERS. May there not be irrigation districts?

Mr. THOMSON of Illinois. As an assignee, but not as agrantee. They should not come in as grantees, but they

ought to be permitted to come in as assignees if they wish to.

Mr. FRENCH. As a matter of fact the only irrigation districts that will draw water or will be benefited in any way will be the Turlock and Modesto, which are already in possession of a water system that will furnish them abundant water.

Mr. ROGERS. I am free to say that I see no sufficient explanation of the divergence in the text between the language of section 8 and the language of section 6. If there is any explanation I should be glad to withdraw the amendment.

Mr. THOMSON of Illinois. They refer to two different

things.

Mr. RAKER. Has the gentleman concluded? Mr. ROGERS. No; but I am glad to yield to the gentleman from California.

Mr. RAKER. The language in section 8 provides-

That the word "grantee" as used herein shall be understood as meaning the city and county of San Francisco and such other municipalities or water district or water districts as may, with the consent of the city and county of San Francisco or in accordance with the laws of the State of California, hereafter participate in or succeed to the beneficial rights and privileges granted by this act.

Now, those who can participate under the bill would be the city and county of San Francisco and some 10 cities comprising the bay district outside of the city and county of San Francisco, and the only irrigation districts which can qualify under cisco, and the only irrigation districts which can quality under the laws of the State of California are down in the San Joaquin or up in the Sacramento Valley. They could not come in under this bill. They are not a part of this water district. Mr. ROGERS. Are there not irrigation districts that may be

comprehended, or desire to be comprehended, within the pro-

visions of section 8?

Mr. RAKER, No; they could not, and it would not be right; because another provision of the bill contains the express condition that the water taken from the Tuolumne River or this watershed can never be conveyed out of the watershed, except that which is needed for San Francisco for domestic purposes, so as to leave the remainder of the water that may be in this watershed to be utilized in that San Joaquin Valley, where there are in the neighborhood of 7,000,000 acres of land. This is for that purpose and that alone, and does not relate to the same ones provided for in section 7.

The CHAIRMAN. The question is on the amendment offered

by the gentleman from Massachusetts.

The question was taken, and the amendment was lost. The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 9. That this grant is made to the said grantee subject to the observance on the part of the grantee of all the conditions hereinbefore and hereinafter enumerated:

(a) That upon the completion of the Hetch Hetchy Dam or the Lake Eleanor Dam, in the Yosemite National Park, by the grantee, as herein specified, and upon the commencement of the use of any reservoirs thereby created by said grantee as a source of water supply for said grantee, the following sanitary regulations shall be made effective within the watershed above and around said reservoir sites so used by said grantee:

the provisions of this grant, or in the streams leading thereto, within one mile of said reservoir; or, with reference to the Hetch Hetchy Reservoir, in the waters from the reservoir or waters entering the river between it and the "early intake" of the aqueduct, pending the completion of the aqueduct between "early intake" and the Hetch Hetchy

the provisions of this grant, or in the streams leading thereto, within one mile of said reservoir; or, with reference to the Hetch Hetchy Reservoir, in the waters from the reservoir or waters entering the completion of the aqueduct between "early intake" and the Hetch Hetchy and the Agent of the Server of the Completion of the aqueduct between "early intake" and the Hetch Hetch Hetch and the said grantee. The said grantee insufficient of the Secretary of the Interior, shall be defrayed by the said grantee. Said grantee insufficient to protect the purity of the water supply, then the said grantee shall install a filtration plant or provide other means to guard the purity of the water. No cot the said grantee as to the use of the watershed by campers, tourists, or the vater supply, then the said grantee shall install a filtration plant or provide other means to guard the purity of the water. No cot the said grantee as to the use of the watershed by campers, tourists, or the company of the said grantee as to the use of the watershed by campers, tourists, or the company of the said grantee as to the use of the watershed by campers, tourists, or the company of the said grantee and the Turkock irrigation district as now constituted under the laws of the State of California, or as said districts may be hereafter enlarged to contain in the aggregate not to constitute under the laws of the State of California, or as said districts may be hereafter enlarged to contain in the aggregate not to the company of the produce of the Turkound River, measured at the La Grange Dam, whenever the said grantee shall release free of charge, out of the natural duly flow of the stream of charges of the Turkound and the stream of the said ringation districts and the said grantee was the aggregate duly natural flow of the watershed to water out of the natural duly flow of the stream of the said ringation districts and include the said grantee shal

RECORD—HOUSE.

SEPTEMBER 2,

Tholumne River or its tributaries which he may designate, and fit the such the first with the many designate, and fit the such the first with the many the first with the such that the

be prescribed by the Secretary of the Interior. Said grantee shall have the right to build and maintain such other necessary roads or trails through the public lands, for the construction and operation of its works, subject, however, to the approval of the Secretary of Agriculture in the Stanislaus National Forest, and the Secretary of the Interior in the Yosemite National Park. The said grantee shall further lay and maintain a water pipe, or otherwise provide a good and sufficient supply of water for camp purposes at the Meadow, one-third of a mile, more or less, southeasterly from the Hetch Hetchy Dam site.

That all trail and road building and maintenance by the said grantee in the Yosemite National Park and the Stanislaus National Forest shall be done subject to the direction and approval of the Secretary of the Interior or the Secretary of Agriculture according to their respective jurisdictions.

(q) That the said grantee shall furnish water at cost to any authorized occupant within 1 mile of the reservoir, and in addition to the sums provided for in section 7 it shall reimburse the United States Government for the actual cost of maintenance of the above roads and trails in a condition of repair as good as when constructed.

(r) That in case the Department of the Interior is called upon, by reason of any of the above conditions, to make investigations and decisions respecting the rights, benefits, or obligations specified in this act, which investigations or decisions involve expense to the said Department of the Interior, then such expense shall be borne by said grantee.

(s) That the grantee shall file with the Secretary of the Interior, within six months after the approval of this act, its acceptance of the terms and conditions of this grant.

(t) That the grantee herein shall convey to the United States, by proper conveyance, a good and sufficient title free from all liens and encumbrances of any nature whatever, any and all tracts of land which are now owned by said grantee within the Yosemite Nationa

During the reading of the foregoing section the following occurred:

Mr. MONDELL. Mr. Chairman, I offer the following amend-

The CHAIRMAN. The gentleman will wait until the reading of the section is completed.

Mr. MONDELL. I am inclined to think, Mr. Chairman, that

the amendment is in order at this point. The CHAIRMAN. The bill is being considered by sections, and unless otherwise ordered by the committee the whole sec-

tion will be read.

Mr. MONDELL. Under the parliamentary rules, the bill should be considered and be open for amendment when a complete substantive proposition has been read. This section contains some five or six complete propositions, each separate and apart from the other.

Mr. MANN. I take it that there will be ample opportunity for amendment after the reading of the section is completed.

Mr. MONDELL. I think we ought to clean up the matter as

we go along. An amendment will probably be offered to something entirely dissimilar at the close of the reading of the sec-

Mr. FERRIS. I hope the gentleman will not ask a consideration of amendments until the section is completed. can go back and take up the amendments.

Mr. MONDELL. I am inclined to think that it will expedite matters. I am sure it is in accordance with the usual rule of

Mr. MURRAY of Oklahoma. The Chairman can ask if there is an amendment to the first paragraph, and so on, and go through them in that way.

Mr. MONDELL. I would like to have the Chair rule. the Chair is going to exclude my amendment at this point, I would like to know it.

The CHAIRMAN. The Chair will rule that the bill is being read by sections, and that an amendment is not now in order.

Mr. MONDELL. I want to say that that is not in accordance with the ordinary practice of the House.

Mr. MANN. I think it is difficult to state what the practice

of the House is. I can remember no instance like it. I think the Chair's ruling is sustained.

Mr. MONDELL. I think we have had many cases of this kind. If the gentleman from Illinois takes the position that a section covering 20 pages, with numerous substantive proposi-

tions, should be considered as one, he is standing for a danger-

ous proposition.

Mr. MANN. I thought so myself, and therefore I did not

desire the gentleman to insist on a ruling.

The CHAIRMAN. The Chair will say that appropriation bills are read by paragraphs, but as a rule bills of this character are read by sections, and that an amendment is not now in order. The Clerk will complete the reading of the section.

The Clerk completed the reading of the section.

Mr. MURRAY of Oklahoma. Mr. Chairman, I offer the following amendment to the first paragraph.

The Clerk read as follows:

Page 11, line 24, after the word "enumerated," insert:

"And upon the violation of the grantee of any of said conditions all the title, easements, and franchises, together with all appurtenances thereunto belonging granted by this act, shall revert to the United States"

Mr. MURRAY of Oklahoma. Mr. Chairman, I understand the members of the committee are willing to accept the amendment.

and I do not care to discuss it.

Mr. MANN. Mr. Chairman, if the committee is satisfied with that amendment, I should think it would be wiser to leave it out and put in the usual provision that Congress reserves the right to alter, amend, or repeal. To say that San Francisco, after it has expended \$75,000,000 or \$100,000,000, forfeits its entire right because, for instance, it should ask for additional rules or restrictions, seems to me to be going the limit.

Mr. MURRAY of Oklahoma. I do not understand that the

sanitary rules are really a part of the conditions of this bill.

Mr. MANN. The first thing that follows the gentleman's language here are the sanitary rules.

Mr. MURRAY of Oklahoma. No, sir. Mr. MANN. I beg the gentleman's pardon.

Mr. MURRAY of Oklahoma. The bill reads as follows:

That this grant is made to the said grantee subject to the observance on the part of the grantee of all of the conditions hereinbefore and hereinafter enumerated.

Mr. MANN. Then the gentleman's amendment follows, and then the next conditions are the provisions about the sanitary regulations. One of those conditions is that no other sanitary rule or restriction shall be demanded by or granted to the said If, under the gentleman's amendment, strictly congrantee. strued, these people should come to Congress and ask that there be a change made in this bill as to sanitary regulations, it would cause a forfeiture of the entire plant. Of course it probably would not be done, but that is the effect of the gentleman's amendment.

If it is the intention for Congress to reserve complete control over this and not give an absolute, fixed right upon which the city may borrow money, the best way to do it, it seems to me, would be to insert the ordinary provision that Congress reserves the right to alter, amend, or repeal. Then if they violated the provisions of the act so that there is substantial violation, it is within the control of Congress.

Mr. KENT. Mr. Chairman, I ask unanimous consent to have

the amendment again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection, and the Clerk again reported the amendment.

Mr. KENT. Mr. Chairman, it seems to me that this amendment, which means well, is altogether too severe. We know perfectly well that a city government may or may not be corrupt. Under as drastic an amendment as that proposed one rotten administration lasting two years in San Francisco might forfeit all those rights. San Francisco has just passed through an administration that would have wrecked the town for the purpose of boosting the present local water company, and I do not think the amendment should be so drastic. I think that all public rights are properly safeguarded in the bill as it now

Mr. MURRAY of Oklahoma. Mr. Chairman, I want to say in the beginning that I regard this measure as an enterprise the most gigantic in point of possibility ever enacted by Congress. I shall be pleased to vote for this bill with such regula-tion as to make it safe under the grant, but I would not vote for this bill, whatever may be in it, unless there is some condition that will force the State of California to obey the rules under which the grant is made. As a lawyer sitting in my office, if a client should hire me to draw a contract covering a piece of land, I would feel it to be my duty to write every

condition with a condition of forfeiture. That is the only way you can enforce it.

Let us analyze what would result from this amendment. This amendment provides that "the easements, franchises granted by this act," and so forth. I purposely worded that so as not to include the property. Suppose there should be a violation.

The first thing that could be done would be to throw this into the hands of a receiver, because the property would not revert. That would give the State of California, the city and county of San Francisco, an opportunity to perform the obligations of the contract, and the result would be that they would regain all those franchises, because the property never passes. It is absurd to contend that it is sufficient when you say to a city, "I give this to you upon conditions." If you intend to enforce those conditions you must have something that will cause the property to revert. 'We stand here as attorneys representing the people of the United States, making a grant to a city and a county of a certain State, and I say that it is a wise one. I believe in it, but in order to enforce it it must have some condition of forfeiture, and that condition must lie to every provision. I would not insist, in other words, that the language should not be amended so as to except the sanitary I do not understand that the sanitary regulations are a part of the grant, but I would be willing to have my amendment so modified that every condition of this grant shall work a forfeiture upon violation except as to sanitary regula-I think that is the effect of it after all, and it occurs to me that Members of this House representing the people, as they do, would want to make such provision as would put the people of California on the alert all of the time to do their duty.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. MURRAY of Oklahoma. Certainly.

Mr. McKENZIE. I would like to ask the gentleman from Oklahoma what effect his amendment would have upon the taxpayers of the city of San Francisco in case the amendment were adopted and the Government undertakes to forfeit this What would be the position of the taxpayers of San franchise. Francisco that have paid for this improvement?

Mr. MURRAY of Oklahoma. The property, understand, under this amendment, does not revert. It is only the rights granted under this act, under the amendment, that I submit.

The taxpayers can save themselves by performing the contract pending the throwing of the enterprise into the hands of a receiver in the Federal court. I do not understand that the Government could act contrary to this, because the property would not revert under the amendment.

Mr. McKENZIE. Let me ask the gentleman what advantage is it to the Government to have this amendment put in the

Mr. MURRAY of Oklahoma. So that the Government would have an easy and legal way of compelling performance.

Mr. MANN. May I ask the gentleman a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Well, I have the floor now. Here is a bill pending that would grant the right to dam the Hetch Hetchy Valley. Mr. MURRAY of Oklahoma. So I have heard.

Mr. MANN. If that right reverts to the Government of the United States, the right granted here is ended.

Mr. MURRAY of Oklahoma. Ask the question again. Mr. MANN. If under the gentleman's amendment the right to dam the Hetch Hetchy Valley reverts to the Government of the United States, that right is ended.

Mr. MURRAY of Oklahoma. That right would end provid-

ing it reverts before the building.

Mr. MANN. Oh, no; reverting after the building at any time; that ends it. There is no authority granted by Congress to the Government to build a dam or maintain a lake there. That is ended if this right reverts to the Government of the United States. I do not know whether anybody would go and blow up the dam or not, but the Government officers, if

Mr. MURRAY of Oklahoma. The gentleman from Illinois will understand that if the dam should be blown up that would be an act the people of California would not be liable for under

the law.

Mr. MANN. If a Government officer goes and blows it up, the right reverts to the United States, because the Government officer has no right to maintain a dam there.

Mr. MURRAY of Oklahoma. A Government officer will never act contrary

Mr. MANN. Oh, well, the gentleman admits his amendment will not amount to anything.

Mr. MURRAY of Oklahoma. I am arguing that if the people of the city and county of San Francisco are so negligent as to go to the extent of permitting a suit to be filed by the Attorney General and then a receiver to be appointed that they will continue to neglect to perform the duty-

Mr. MANN. Oh, the gentleman's amendment proposes that when a thing happens the right ceases. That is an accom-

plished fact.

Mr. MURRAY of Oklahoma. Now, the gentleman ought to draw a difference between revert and escheat.

Mr. MANN. I am drawing a difference.

Mr. MURRAY of Oklahoma. There is a distinction.

Mr. MANN. There is no distinction in this country as to a governmental grant-not the slightest. Now, the gentleman proposes when a fact happens then the other fact is accomplished and the right has reverted to the Government of the United States. It is true it might take a decree of the court to sustain-

Mr. MURRAY of Oklahoma. Certainly it would.

Mr. MANN. But the fact has been accomplished. Now here is a provision that certain rights shall be granted to certain irrigation districts. In all probability it is not improbable there will be some litigation between those districts and San Francisco as to what those rights are. It would be strange if a bill should be passed out of which litigation could not arise, and the courts would enforce those rights in those irrigation districts under the act without attempting to destroy the rights which have been granted.

Mr. MURRAY of Oklahoma. Let me make this suggestion by asking the gentleman a question. The gentleman from Illinois realizes that no act of Congress can deny the people of the State

and county, the grantee, the right to have its day in court.

Mr. MANN. Oh, an act of Congress can do it, but the gentle-

man's amendment does not do it.

Mr. MURRAY of Oklahoma. The gentleman is not insisting for a moment that Congress can cut off its day in court?

Mr. MANN. Why, certainly we can say that if the Secretary of the Interior shall find so and so that that shall be the end of it, and we frequently and usually do.

Mr. MURRAY of Oklahoma. It is a new principle of law that any municipality or any corporation or any individual, natural or artificial, can not have its day in court.

Mr. MANN. It is a principle of law that Congress in granting a right can grant it on conditions and provide for its ending as it pleases, regardless of courts.

Mr. MURRAY of Oklahoma. It can, but it is not so provided

in this amendment.

Mr. MANN. I understand that. Mr. MURRAY of Oklahoma. If the gentleman will agree that every individual has his day in court under our Constitution, and if that be true the Attorney General would proceed against the city and the county of San Francisco. The property is owned by the city. That would necessarily compel the appointment of a receiver. Pending the trial for the violation of the grant, when that was done, immediately they would perform the obligations of the grant.

Mr. MANN. It would be too late.

Mr. MURRAY of Oklahoma. No; it would not be too late. Mr. MANN. They forfeited the right whenever the act

Mr. MURRAY of Oklahoma. It is the object of the court to make performance when it is expressed in general terms. will suggest to the gentleman from Illinois [Mr. MANN] that he would not write a contract, or would not hesitate to write a contract for a client that did not put a condition of forfelture upon the grantee.

Mr. MANN. If the gentleman will permit, as attorney for municipalities I have written a good many contracts, and never endeavored to give the other fellow the slightest show on earth. I never did. But we are dealing with a municipal corporation now, and ought to deal on different terms than we would with

a private party.

Mr. TAYLOR of Colorado. Mr. Chairman, we ought to consider that we are not dealing with a private corporation that might try to speculate in and abuse the rights granted. We are dealing with a large number of the people of this country, 8 or 10 large and growing cities, and why should we jeopardize their rights by drastic and unnecessary conditions? Why should anyone want to permit some little technicality to forfeit those very important rights? Why should Uncle Sam want to even jeopardize them?

Why should we put a cloud on the title and bring about such a condition that the city could not float their bonds? It seems to me that we ought not to insert a needless possibility of

forfeiting the property of these people. It seems to me that section 6 is broad enough, and with the amendment put in by the gentleman from Arkansas [Mr. Taylon] the other day we have gotten San Francisco hedged about now as much as it is reasonably possible for us to do in any degree of fairness. If they do not diligently construct the work, they forfeit every-thing. We do not want to hand San Francisco a gold brick, something they can not handle or get anything out of without coming back to Congress again. Let us treat them in good faith. [Applause.] When we provide that any attempt to sell or alienate or speculate in any way shall work a forfeiture, for heaven's sake, let us not add a clause so that if a horse takes a drink out of a creek or some one uses a little water or does something it may afford an excuse for some superserviceable United States attorney to jump in and declare forfeiture. I want to give San Francisco in good faith a good waterworks system, a good title to it. We want to give them as near as possible a fee simple title to the lands and rights of way. want to give them the right to put that 300-foot dam on a piece of Government land, the right to furnish pure water to the city, and a right to sell to its inhabitants this electric energy.

I feel that while any ordinary forfeiture in preventing any sale, transfer, or "skullduggery," or anything of that kind is all right, the conditions imposed by this amendment are not fair to San Francisco. And I think if the gentleman from Oklahoma [Mr. Murray] will stop and look at it he will see that he is endeavoring to enact a proposition here which, if carried out, would or might render this whole act a nullity and

useless

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

consent to add three words to my amendment.

The CHAIRMAN. The Clerk will report the change.

The Clerk read as follows:

By inserting "except sanitary regulations" after the word "conditions

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MURRAY of Oklahoma. Division, Mr. Chairman.

The committee divided, and there were-ayes 5, noes 33.

So the amendment was rejected.

· Mr. MURRAY of Oklahoma. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MURRAY] offers a further amendment, which the Clerk will

Mr. MURRAY. It is to come in right at the same place. will state, Mr. Chairman, that that is taken from Mr. Mondell's

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

The Clerk read as follows:

Amend, page 11, at the end of line 24, by adding:

"That the conditions of the grant made herein shall be enforceable, and that the rights and privileges of the said grant may be canceled in whole or in part on the failure of the grantee to comply with the terms and conditions thereof, on notice by the Secretary of the Interior, in accordance with the judgment of any court of competent jurisdiction, in a suit brought by the United States or any party in interest."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MURRAY]. The question was taken, and the Chairman announced that the

seemed to have it.

Mr. MURRAY of Oklahoma. A division, Mr. Chairman. The committee divided; and there were-ayes 16, noes 27.

So the amendment was rejected.

Mr. MONDELL. Mr. Chairman, I offer an amendment. The CHAIRMAN. The gentleman from Wyoming [Mr. Mon-DELL] offers an amendment, which the Clerk will report.

Mr. MURRAY of Oklahoma. Mr. Chairman, I desire to ask the gentlemen over there if they have a substitute to offer for this provision? I make the point of order, Mr. Chairman, that there is no quorum present. I am not going to vote for a bill like this, containing that kind of a proposition.

Mr. BRYAN. Let the gentleman reserve his point of order

until we get to a vote.

Mr. MURRAY of Oklahoma. All right.

The CHAIRMAN. Does the gentleman reserve it or make it? Mr. BRYAN. I suggest, Mr. Chairman, that the gentleman from Oklahoma reserve his point of order until we get nearer to a vote.

The CHAIRMAN. Does the gentleman reserve it?

Mr. MURRAY of Oklahoma. I do not reserve the point of order. I make the point of order.

Mr. MANN. We might as well have a roll call now as at any other time.

The CHAIRMAN. The Chair will count. [After counting.] Eighty-five Members are present-not a quorum. The Clerk will call the roll.

The Clerk began the calling of the roll.

Mr. MURRAY of Oklahoma. Mr. Chairman, I would like to ask if this would give me a record vote?

R. 7207), finding itself without a quorum, he had directed the roll to be called, when 208 Members, a quorum, answered to their names, and that he reported the names of the absentees to

The SPEAKER. A quorum being present, the committee will resume its sitting.

The House accordingly resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Hetch Hetchy bill (H. R. 7207), with Mr. FOSTER in the chair.

Mr. FERRIS. Mr. Chairman, I think there is scarcely any difference in the views of the members of the committee about the amendment offered by my colleague from Oklahoma [Mr. MURBAY]. Some of us thought his amendment was too drastic, some thought there should be no amendment at all. I think the gentleman from California [Mr. RAKER] has an amendment which will accomplish all that the gentleman from Oklahoma seeks to accomplish, and will at the same time not render the bill nugatory in any way, and I yield to him for the purpose of offering that amendment.

Mr. RAKER. I offer the following amendment. In effect it is a substitute for that of the gentleman from Oklahoma, but

it goes in at another place.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

On page 25, after line 18, change the period after the word "matter" to a colon and add the following:

"Provided, however, That the grantee shall at all times comply with and observe on its part all the conditions specified in this act, and in the event that the same are not reasonably complied with and carried out by the grantee, upon written request of the Secretary of the Interior, it is made the duty of the Attorney General, in the name of the United States, to commence all necessary suits or proceedings in the proper court having jurisdiction thereof for the purpose of enforcing and carrying out the provisions of this act."

Mr. MURRAY of Oklahoma. Mr. Chairman, that amendment

is satisfactory to me.

Mr. MANN. What became of the amendment of the gentle-

man from Oklahoma?

The CHAIRMAN. The amendment of the gentleman from

Oklahoma was rejected.

Mr. MANN. I did not know whether the point of no quorum

was made at the time of the taking of the vote or not.

The CHAIRMAN. The result of the vote was announced some little time before the gentleman made the point of no quorum. The Chair will ask whether in this amendment there is a comma after the phrase "upon written request of the Secretary of the Interior"?

Mr. RAKER.

Yes. There should not be. Mr. BRYAN.

Mr. RAKER.

There should be. That is the intention. The written request of the Secretary of the Mr. BRYAN. Interior should apply to what follows, and not what goes before.

Mr. RAKER. That is the purpose of it.

Then there should be no comma. Mr. BRYAN.

Mr. RAKER. I will consent to striking out the comma. I want to say that on page 24, in lines 13, 14, and 15, subdivision S of section 9, it is made the duty of the city and county of San Francisco to file a written acceptance of this Unless it does file a written acceptance of the grant, the grant is inoperative and the city and county of San Fran-

cisco get nothing.

The provision just offered eliminates all objections that have been made by gentlemen as to the reversionary clause, and makes it the duty of the Attorney General of the United States, upon written request of the Secretary of the Interior, to commence suit in the proper court to enforce all of these conditions and contracts between the city and county of San Francisco and the United States, so there can be no question but that every provision not attempted to be complied with can be enforced by the United States against the city and county of San Francisco.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that after five minutes the debate on this amendment be closed.

The CHAIRMAN. The gentleman from Oklahoma asks

unanimous consent that debate on this amendment be closed in five minutes. Is there objection?

Mr. BRYAN. Reserving the right to object, I want one

minute in which to straighten out the matter of the punctuation of this amendment.

Mr. FERRIS. Then make it six minutes.

The CHAIRMAN. The gentleman from Oklahoma asks that at the end of six minutes debate on this amendment be closed. Is there objection?

There was no objection.

Mr. STEENERSON. Mr. Chairman, I desire to call attention to the fact that the amendment proposed by the gentleman from California makes it very easy for the grantee in this act to violate its terms. If this amendment were not inserted and there were a breach in the conditions of the grant, by force of the common-law procedure and practice the Attorney General could bring a suit for forfeiture for violation of those condi-But this amendment limits the right of the Attorney General to bring a suit not of forfeiture, which ought to be the penalty for violating the conditions of the grant, but a suit to enforce the provisions of the grant. That is a very shrewdly drawn amendment. It is drawn so as to avoid responsibility on the part of the grantee to perform the conditions inserted in the grant.

The CHAIRMAN. The Chair desires to call the attention of the gentleman from California [Mr. RAKER] to the fact that he has the word "matter" in here, which should be "manner."

Mr. RAKER. That is a mistake of the typewriter, and I ask unanimous consent to change it to "manner."

The CHAIRMAN. Without objection, the modification will be made.

There was no objection.

The question was taken, and the amendment offered by Mr. RAKER was agreed to.

Mr. MONDELL. Mr. Chairman, I move to strike out all of page 12, and page 13 down to and including line 11, and insert the amendment which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

The Clerk read as follows:

Strike out all of page 12, and page 13 down to and including line 11, and insert in lieu thereof the following:

"That it shall be the duty of the officers of the United States having supervision of the national forest and national park on and over which the said right of way shall be located to establish, maintain, and enforce such regulations affecting the use of the said national forest and national park as will reasonably protect said water supply from contamination by such use: Provided, That such sanitary regulations shall not be of such character as to deprive the public of the use and enjoyment, in a reasonable and proper way, of the said national park or national forest, and the grantee shall pay the cost of enforcing said sanitary regulations."

Mr. MANN. Mr. Chairman, I offer a preferential amend-

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Page 12, line 14, strike out the period after the word "purified" and insert the words "or destroyed."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to. Mr. MANN. Now, Mr. Chairman, in line 16, I would suggest that after the word "utensils" the word "or" be inserted, and after the word "stock" the word "in" be inserted, and that a comma be inserted after the word "pollute."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, line 16, after the word "utensils" insert the word "or," nd after the word "stock" insert the word "in," and after the word pollute" insert a comma.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to. Mr. FERRIS. Mr. Chairman, I ask unanimous consent that at the end of five minutes debate shall close on this amendment.

The CHAIRMAN. The gentleman from Oklahoma asks that all debate on this amendment be closed in five minutes. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, my amendment proposes to strike out all of the sanitary regulations contained in the bill and to substitute the language which I have sent to the Clerk's desk and which has been read. I think that anyone who has read the sanitary provisions contained in the bill will admit that they are likely to be entirely ineffectual. They were placed in the bill, as I understand it, in the form in which they are because certain gentlemen insisted that if proper sanitary regulations were enforced on the watershed it would have the effect to prevent the public from properly and reasonably enjoying the use of the region. Therefore these which appear to me rather ridiculous provisions in regard to sanitation were provided, and it is further provided that they can never be changed or amended.

Congress in the language stricken out solemnly promises that it never will at the request of San Francisco or on its own motion provide any other sanitary regulations, no matter how inadequate these regulations may prove to be. It seems to me a mere statement of the situation is sufficient to convince anyone that these regulations are not what they ought to be. I provide-and I make it a part of the grant-that the officers having charge of these watersheds shall enforce reasonable and proper sanitary regulations, provided those regulations shall not be of a character to deny the public the reasonable use of the territory

The CHAIRMAN. The question is on the amendment offered

by the gentleman from Wyoming.

The question was taken, and the amendment was rejected. Mr. CURRY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 18, line 17, after the word "districts" insert the words "And to the Tracy irrigation district, comprising 63,000 acres."

Also, on page 18, line 18, strike out the words "either or both" and insert in lieu thereof the words "any and all of."

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that debate on the pending amendment close in 10 minutes-5 minutes to be consumed by the gentleman from California and 5 minutes by the committee.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CURRY. Mr. Chairman, this amendment definitely recognizes and fixes the legal right of the Tracy irrigation district to be supplied with power at a reasonable cost by San Franclsco from the Hetch Hetchy source. The Tracy irrigation district is legally organized under the laws of the State of California, its officers have been elected, its papers are filed, the money has been subscribed, and nearly all of the acreage has been signed up. It proposes to irrigate 63,000 acres of land in San Joaquin County on the west bank of the San Joaquin The district extends from Grayson on the south to the Alameda County line on the north. It has been estimated it would take 500 second-feet of water to irrigate this land, and the Tracy irrigation district asks that San Francisco be required at a reasonable cost to supply it with the power necessary to do the pumping of the water onto the land. Every acre of land that is tributary to the watershed of the Hetch Hetchy is entitled naturally and legally to its share of water and power from that source.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. CURRY. Yes.

Mr. RAKER. Has this district ever made any water filings? Mr. CURRY. It is located on the San Joaquin River and has riparian rights.

Mr. RAKER. When was the district formed? Mr. CURRY. It started to organize more than three months ago. When I appeared before the committee in June the organization had not been completed, and that is about two and a half months ago.

Mr. RAKER. And this bill was pending while this company has gone on and organized, hoping to get the benefits of the bill. Mr. CURRY. Oh, no. It would have organized whether the bill was passed or not. This district is just as much entitled to power as the other two districts that have been included. We are not asking for water. We are asking for power from the Hetch Hetchy. The Hetch Hetchy is the last unappropriated power site in that portion of the San Joaquin Valley. We are not asking for the water but for the power to pump the water. If gentlemen will turn to page 17 of the bill and read division H they will see that the committee has recognized the fact that every irrigable acre is entitled to its share of that water. The bill provides:

(b) That the said grantee shall not divert beyond the limits of the San Joaquin Valley any more of the waters from the Tuolumne water-shed than, together with the waters which it now has or may hereafter acquire, shall be necessary for its beneficial use for domestic and other municipal purposes.

San Francisco will not need one-quarter of the electrical power that can be developed from the Hetch Hetchy, and it will not need over 50,000,000 gallons of water for its own municipal use in addition to what it can supply from its own present resources. We want San Francisco, with the help of these other municipalities and irrigation districts, to develop the surplus as rapidly as it can be used by irrigation districts, and other municipalities, and under the laws of the State of California and the decisions of the Supreme Court of California an irrigation district is recognized as a quasi municipality. We want to be treated on exactly the same footing as you have treated the others. We are not asking of San Francisco something for We want to pay our share of the interest on bonds and of the sinking fund to redeem those bonds, and our share of the maintenance and construction of the plant. We want to be treated on an equality with the Modesto and Turlock irrigation districts.

Mr. FERRIS: Mr. Chairman, I appreciate the predicament which the gentleman's constituency is in and which the gentleman himself is in. I have talked to him about it and I have talked to Mr. Dennett, who appeared before the committee on behalf of another scheme. Naturally when it looked as if this bill would pass those people out there that had no prescribed rights under the law began to hustle themselves together, and each group of them formed some sort of a district and tried to have themselves declared "in" so they might be included in on this bill. Now, San Francisco returns to the river bed of the Tuolumne River every bit of the water that was naturally flowing there, or in other words the natural flow of the stream. All they are doing is to corral the water from the mountains and the flood waters and melting snows, and the committee went into that very carefully and decided that we could not let in any more of these propositions where they did not have

prescribed legal rights. We have taken full care of the Modesto and Turlock irrigation people who have prescribed rights, who had prior rights. We were especially careful not to affect any of their prescribed rights, but I think the gentleman from California [Mr. Curry] will admit and the gentleman from California, Mr. Dennett, not a Member of the Congress, but a lawyer sent here from some outside sources, did make statements which amounted to an admission of the fact that they had no prescribed rights, that their rights were cooked up and thrown together after this bill was taken up for consideration, and while I know the gentleman would like to have more water and more power and would like to have San Francisco bound down to give them more water and more power I believe that the committee has gone as far as it can and I hope the House will support the committee.

Mr. CURRY. Mr. Chairman, San Francisco is not being asked to give the Tracy district water. The Tracy district is as much entitled to power as the other two districts you are including. The other two districts have water rights, not power

rights, and they are entitled to the water.

Now, we do not want any of the power San Francisco needs. After this bill has passed San Francisco will undoubtedly start condemnation proceedings against the United Railroad. If successful she will need considerable of this power. Let her have all the power she wants. She will not need over a quarter of the 115,000 horsepower of electrical energy that can be developed in Hetch Hetchy. What we want is power from the Hetch Hetchy. That is the last unappropriated power site in that section of the San Joaquin Valley. We want to pay what is right, but we want this bill to recognize our legal rights to have that power.

Mr. FERRIS. Let me ask the gentleman a question. Is it not true this company the gentleman refers to, the Tracy irrigation district, was formed after the Hetch Hetchy bill was

introduced and after hearings began?

Mr. CURRY. Nearly every irrigation district in the San . Joaquin Valley has been organized since the Hetch Hetchy bill was first introduced. This project was started 16 years ago, when Mr. Franklin K. Lane was city attorney of San Francisco and I was county clerk, and we were both for it. All I want is to put these irrigation districts on the same footing. irrigation district did not start in the expectation of this bill being before Congress. Mr. Dennett, who is an attorney, came here and stated, of course, that they had no legal water filings and that if we wanted water we wanted to pay for the water.

Mr. FERRIS. If there is any excess power, the gentlemen living in the San Joaquin Valley will, of course, get it under the laws of the State of California and under the State law for this does not disturb vested rights, and in my judgment the people of California have one of the best laws I have ever seen

as to their public utilities commission.

Mr. CURRY. Why not let this district be included in this

Mr. FERRIS. I think we can not include everybody in this bill. Now, we have allowed San Francisco to construct a dam under this bill. The consideration of this bill began three months ago. The Tracy district, the district represented by Mr. Dennett, and I do not know how many more, have organized themselves so as to get some of the special advantages of this bill, and I really hope the gentleman who has been very helpful to us in getting this bill in shape will let it go through as it is, because under the laws of the State of California, through your public utilities commission and under the bill itself, your people can get power on terms that will not be extortionate, but will be reasonable and decent. I hope the gentleman will not insist on this.

Mr. CURRY. There is not any question but what we can compel San Francisco to supply us with power because we have the legal right, but I want my amendment adopted so that we will not be forced to go into the courts to secure our

rights.

Mr. FERRIS. Is it not true that the reason you want this amendment in the bill is because you can float your bonds for your irrigation project?

Mr. CURRY. No, sir. Mr. FERRIS. Well, Mr. Dennett practically admitted before the committee that that was the object.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. CURRY].

The question was taken, and the amendment was rejected. Mr. MONDELL. Mr. Chairman, I offer an amendment. The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report. The Clerk read as follows:

Strike out all of page 13, beginning with line 12, all of pages 14, 15, 16, 17, and all of page 18 down to line 10, and insert the following:

"That the grantee shall, before its maps of right of way are approved, file with the Secretary of the Interior an agreement or adjudication binding all the county and city of San Francisco and those using or claiming the waters to be improved for the purposes of irrigation, relative to their respective rights."

Mr. FERRIS. Mr. Chairman, if the gentleman will pardon me just a moment, I ask unanimous consent that debate be closed at the end of 10 minutes, 5 minutes to be consumed by the gentleman from Wyoming [Mr. MONDELL] and 5 by the

The CHAIRMAN. The gentleman from Oklahoma [Mr. Ferris] asks unanimous consent that debate on this amendment

be closed in 10 minutes.

Mr. MONDELL. Mr. Chairman, reserving the right to object, here is a very important matter. The committee has, contrary to the general, or, at least, the proper practice of the House, read some 8 or 10 pages covering quite a variety of important questions without allowing opportunity for an amendment. I have a number of observations that I desire to make in regard to these matters in addition to offering this amendment, and I should like about 10 minutes on the amendment. I think if I have the 10 minutes I will not care to discuss

this phase of the question further.

Mr. FERRIS. Mr. Chairman, then I ask unanimous consent to close debate in 15 minutes, 10 minutes to be used by the gentleman from Wyoming [Mr. MONDELL] and 5 by the com-

The CHAIRMAN. The gentleman from Oklahoma [Mr. Ferris] asks unanimous consent that debate be closed in 15 minutes, 10 minutes of the time to be controlled by the gentleman from Wyoming [Mr. Mondell] and 5 minutes by himself.

Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELLL. My amendment, Mr. Chairman, strikes out

all that portion of the bill which attempts to apportion the waters which the city of San Francisco proposes to impound between the city and county of San Francisco and certain irrigation claimants. The necessity of an amendment of the kind I offer is very clear, I think, in the minds of all of those familiar with irrigation problems. The gentleman from California [Mr. Curry] has just called attention to the fact that not only is this an attempt to provide by Federal legislation to divide the waters of a California stream between certain claimants, but it forecloses, or attempts to foreclose, the rights of certain other claimants. The gentleman from California said that those on whose behalf he offered his amendment will secure their rights in any avent. Well they will be the control of the con their rights in any event. Well, they will not secure them if there is any virtue in the provision I propose to strike out. They will secure them if these provisions are just so much useless expenditure of printer's ink.

All the gentlemen know that the language I propose to strike out has no force and effect as a matter of Federal statute. It can only be made effective, if it can be made effective at all, by a contract between the city and county of San Francisco and the Secretary of the Interior. I can not refrain from again voicing the regret I expressed the other day that the people of San Francisco and those representing the people of California, generally so jealous of the rights of the State and of the people under their constitution, generally so quick to resent Federal interference with their local affairs, should in legislation of this character attempt to invite Federal jurisdiction over the distribution of the waters of one of the great streams of that State. The Tuolumne River, whose waters are to be impounded, rises and flows to the ocean within the State of California. The stream is not navigable. Therefore the Federal Government has no control whatever over its waters. The gentleman from Michigan [Mr. MacDonald] a few moments ago said we are granting water rights. He is mistaken. These people hold their rights under the laws of the State of California, and all we can do is to give them the right to build a dam and impound these waters and to build a conduit for the purpose of conducting the waters to their city. But because the city of San Francisco and the irrigation districts have had some difficulty in agreeing as to how the water shall be divided and apportioned it is proposed to attempt to do it by Federal enactment, and no one will regret this more in the future than the people of California themselves.

a State stream. You can not do it as a matter of Federal stat-If you can accomplish it in this indirect way, you have established a very unfortunate precedent. If it is effective, the gentleman from California [Mr. Curry], who has just offered his amendment, can scarcely hope that his people will still have their rights and can maintain and enforce them in the courts.

If this legislation can be made effective by the indirect methods of a contract, then the people of the San Joaquin Valley, except as is provided in this bill, can never secure any of the waters from the watershed of the Tuolumne or from the

Tuolumne River.

But that is not all. It is not only an attempt to apportion the waters, but it is an attempt to divide the waters in a way that constitutes an extremely bad bargain for the city of San Francisco, and in my opinion if this can be enforced, and shall be enforced in its entirety, there will come a time when San Francisco will have less water per capita for the increased population that she is to have than she has at the present time. For after providing that they shall recognize the fact that the irrigationists are entitled to the natural flow of the Tuolumne, which means, I assume, the natural flow during the irrigation season, provision is made which seems to give them the "natural flow" of the Tuolumne during the entire year.

What are the waters that are to be impounded in the Hetch Hetchy reservoir except the natural flow of the Tuolumne You have a provision in this bill which if enforced will River? give to the irrigationists all of the natural flow the year round. Before the bill finally passes I hope the gentlemen from Cali-

fornia will examine that carefully.

I call their attention particularly to paragraph d, on page 15, where it says that in addition to other provisions exceedingly difficult to understand—I admit I can not understand them, and yet I may not be as clear of perception as the gentlemen who wrote them-

Mr. MANN. Can not or will not?

Mr. MONDELL. Oh, I have no desire not to understand them. I should be happy to be able to understand them. I will not say there is anyone that does understand them, but I will say I trust, without offense, that that is my opinion.

Now, this in addition to granting them all the flow and the natural flow and the ordinary flow; four or five different phrases are used, and then they have attempted to group all these phrases together and to say they all mean the same thing. If

they do, why not use the same language in each place?

After they have given the irrigationists all the ordinary flow for a number of months and then, in addition to that, all the natural flow through the entire year, if there is anything left for the city of San Francisco it would have to be the dew that falls on the pipes. There would be no water in the river. Here is the way the provision reads:

(d) That the said grantee, whenever the said irrigation districts desire water in excess of that to which they are entitled under the foregoing, shall on the written demand of the said irrigation districts sell to the said irrigation districts from the reservoir or reservoirs of the said grantee such amounts of stored water as may be needed for the beneficial use of the said irrigation districts at such a price as will return to the grantee the actual total costs of providing such stored water.

After having granted them practically all of the water that can be and will be impounded the bill provides that if there shall be any moisture left in the bottom of the reservoir they

shall sell it to the irrigation districts at cost.

I am not surprised that the irrigation districts, looking at the matter simply from the selfish standpoint of attempting to protect themselves, even at the cost of surrender of their sovereignty and their self-government, are willing to subscribe to such a grab. But how anyone acting on behalf of the city of San Francisco can agree to such a division of the water, which in its final analysis gives most of the water to the irrigation districts, I can not understand.

My amendment, Mr. Chairman, is that before this grant shall be effective there shall be filed with the Secretary of the Interior an agreement or adjudication had in accordance with the laws of the State of California, settling and determining the respective rights of the claimants to the water that is to be impounded. That is in accordance with law. It is in accordance with our practice.

The CHAIRMAN. The time of the gentleman from Wyoming

has expired.

As I said the other day, it is proposed to keep the trail hot from here to the Golden Gate with the footsteps of Federal understrappers going out into the imperial State of California to divide among her people to the last bucketful the waters of Mr. FERRIS. Mr. Chairman, I will consume only a minute.

been considered by the committee at any time and it does not bear the department's O. K. or that of anyone connected with the matter. I hope the committee will be sustained in the pro-

visions that are now in the bill.

The CHAIRMAN. The question is on agreeing to the amend-

ment offered by the gentleman from Wyoming [Mr. Mondell].

The question was taken, and the amendment was rejected.

Mr. MANN. Mr. Chairman, I suggest that there should be a comma inserted in page 13, line 17, after the word "land." It is dangerous not to insert it. I ask unanimous consent to insert a comma there

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent to insert a comma after the word land," on page 13, line 17. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I move to insert, at page 22, line 8, after the word "such," the word "statutory."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the clerk will report.

The clerk read as follows:

Page 22, line 8, after the word "such," insert the word "statutory."

Mr. MANN. I take it that that is the purpose intended. Mr. RAKER. That amendment is a good one, and we accept it.

The amendment was agreed to.

The Clerk read as follows:

SEC. 10. That this grant, so far as it relates to the said irrigation districts, shall be deemed and held to constitute a binding obligation upon said grantee in favor of the said irrigation districts which said districts, or either of them, may judicially enforce in any court of competent jurisdiction.

Mr. MANN. Mr. Chairman, my colleague from Illinois [Mr. Thomson] called my attention to the fact that on page 24, line 19, at the beginning of the line, there should be inserted the word "to," so that it will provide that there shall be a conveyance to the United States of any and all tracts of land, and so forth. I ask unanimous consent to insert in page 24, line 19, at the beginning of the line, the word "to."

The CHAIRMAN. If there be no objection, the amendment

will be agreed to.

The amendment was agreed to.

The CHAIRMAN. The clerk will read. The Clerk began the reading of section 11.

Mr. MONDELL. Has section 10 been read?
The CHAIRMAN. Yes.
Mr. MONDELL. Then, Mr. Chairman, I move to strike out the last word. I want to call attention to the language in the first few lines of section 10, which provides that this grant, so far as it relates to the said irrigation districts, shall be deemed and held to constitute a binding obligation on the grantee, and There is nothing in the grant relating to the irrigation districts. The grant is to the city and county of San Francisco and other municipalities, and this language certainly is not happy, for the irrigation districts are not grantees under this act, as was very clearly and forcibly stated by the gentleman from Oklahoma a short time ago.

Mr. MANN. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. MANN. That section only says that as to matters relating to the irrigation districts the binding obligation shall be upon the grantee. There is no pretense of binding the irrigation districts. Here are certain grants in favor of the districts. Mr. MONDELL. I realize that.

Mr. MANN. It provides that these grants shall be binding on the grantee, which means that the other people have a status

and have the right to enforce the law.

Mr. MONDELL. That would be all right, Mr. Chairman, if, as a matter of fact, the statement on which this proposition is predicated were a correct one; but it is not, because there is nothing in the grant relating to irrigation districts. There are provisions and conditions of the grant that relate to irrigation districts, but there is nothing in the grant itself.

But that is only one of the many peculiar things in the legislation. I want further to call attention to the fact that a few moments ago we adopted an amendment offered by the gentleman from California [Mr. RAKER] in the nature of a general enforcement provision. Now, there is another provision of enforcement in this section which conflicts with the one just adopted. Of course I do not know that a conflict of that sort will be held to make any difference in legislation of this charac-I call attention to the fact that the last few lines of this section authorize the irrigation districts to begin suits to

enforce certain conditions of the act, whereas the amendment which the gentleman from California offered a few minutes ago was intended to prevent and preclude all others than the United States from instituting proceedings to enforce this act. I just refer to that to show the various, divers, and sundry inconsistencies in the legislation.

Mr. FERRIS. I will say to the gentleman that that section

probably does read a little peculiarly.

Mr. MONDELL. I think it reads very peculiarly, and I hope the legislation will be in different form when it becomes a law. I suggest in the interest of everybody that this section ought to be amended

Mr. FERRIS. I know that the gentleman from Wyoming does not feel friendly toward many provisions in this bill and that he dislikes many provisions in it. I say to the gentleman frankly that if the committee had an entirely free hand they might change some of these provisions; but the irrigation people In the San Joaquin Valley are out there developing these farms. and they wanted to be sure and to take every precaution that could be taken to give them assurances that they would be

Mr. MONDELL. I think this provision is entirely proper.

Mr. FERRIS. It is in the interest of the irrigationists. Mr. MONDELL. The provisions taken from my bill, offered by the gentleman from Oklahoma [Mr. MURRAY], would have given the irrigationists and all others in interest an opportunity to get into court. This ought to be done. The amendment offered by the gentleman from California attempted to preclude everybody but the Government—attempted to prevent parties from bringing suit to enforce the conditions. This modifies it

Mr. FERRIS. I can not agree with the gentleman from Wyoming that the amendment of the gentleman from California

[Mr. RAKER] has that effect. Mr. MONDELL. That is the effect of it; perhaps the gentle-

man did not intend it.

Mr. FERRIS. The gentleman from California offered an amendment to work a forfeiture in the event that they did not

comply with the conditions.

Mr. MONDELL. This is one.

Mr. FERRIS. The irrigationists want it in there, and it can do no harm, I think.

Mr. MONDELL. It is exceedingly important that it should remain in.

Mr. MANN. Will the gentleman yield? Mr. MONDELL. Yes.

Mr. MANN. I understand the position of the gentleman from Wyoming is that the Government of the United States in making this grant has nothing to do with controlling the use of the water, that that is wholly within the control of the State of California.

Mr. MONDELL. That is my position.

Mr. MANN. So the gentleman believes that he is logical in saying that any provision of the bill placed there on the assumption that the General Government in granting a right has something to say about the use of water power should be in the bill?

Mr. MONDELL. Yes; and the gentleman will agree with me that there are conditions in the bill not relating to irrigation. of the use of water; for instance, as to the rights of the water user of San Francisco as to the use of power there are various conditions with regard to which a considerable variety of people might be parties in interest, and they ought to have the opportunity to begin proceedings in court. That is why I objected to the amendment offered by the gentleman from California [Mr. RAKER].

Now, there are conditions in this bill in which various parties will be interested; individuals, corporations, water districts, municipalities, and everybody in interest ought to have an opportunity to get into court and compel the enforcement of the provisions. The amendment offered by the gentleman from California [Mr. RAKER] unfortunately would preclude or attempt to preclude them. So far as it has any force to prevent any party in interest from bringing suit unless they could persuade the Secretary of the Interior to bring a suit in their behalf it is wrong.

Mr. MANN. Mr. Chairman, the gentleman from Wyoming [Mr. Mondell] is perhaps the most conspicuous Member of the House in favor of the attitude which he has taken with reference to water rights. He believes that when water falls from heaven to earth it belongs to the State, and that the National Government may own the ground but has no right over the water. It makes no difference where the water is, the General

Government should have nothing to do with it; it is purely a matter of dirt for us and no water.

Now, the people generally believe that Congress, or the Government, does have some control over the water; that where the Government owns the land and grants rights which necessitate the use of the land, the Government can impose conditions which will affect the use of the water.

The gentleman from Wyoming naturally takes exception to these provisions in this bill which go on the theory that Concress has any control whatever over the water even as a con-That is not to be wondered at. The gentlemen on the Committee on Public Lands themselves, divided in sentiment and opinion as they are upon this subject, have executed the most skillful straddle that I have ever seen in the way of a No one can read the bill and tell what is the opinion of the committee, because in some places it assumes the water rights are wholly controlled by the laws of the State of California and in some places it assumes that Congress is imposing conditions which affect the use of the water to control the water rights. But as they have come to this compromise, and on the whole have given away nobody's case, I do not see how anyone can take exception to it, although I am always de-lighted to hear my friend from Wyoming insist upon his

The CHAIRMAN. Without objection, the pro forma amend-

ment is withdrawn.

Mr. BAILEY. Mr. Chairman, I move to strike out the last two words. It seems to me that the opposition to this measure is disingenuous. It is objected to on grounds that appear to be untenable. In this long debate I have not heard one argument advanced which appealed to me as conclusive against the claim of the people of San Francisco to a water supply that is almost obviously essential to her future growth and welfare.

If it were proposed in this bill to destroy the scenic grandeur of the Hetch Hetchy or the wonders of the Yosemite, we might well pause before granting to the people of San Francisco the concession they desire. But it is not a mission of destruction which they plan; it is rather one of adding to the natural charms of this wonderland; and it would take long to persuade me that the lake which it is proposed to create would detract anything from the glory and the splendor of the scene which

would surround it. It has been urged that San Francisco has other sources of water supply and better sources. But if that be the case, why is she clamoring for this one? Must we think that San Francisco is in need of a guardian? Must we believe her incapable of understanding her own problems? Or must we accept the implication that she is actuated by pure sordidness and an utter contempt for the rights of the American people? The city at the Golden Gate has been wrestling with her water problem for a generation, and we ought to be willing to be-lieve that by this time she knows her own needs and the way in

which they may best be met. No one can outdo me in devotion to the principle of conservation. But if the sacrifice even of Niagara Falls to human good were necessary, I should not hesitate. The highest conserva-tion is that of human life. Man is more than any marvel of mountain or lake or forest or rocky gorge. His fortunes and destiny demand the first consideration. His health and development and progress are paramount to every other factor which by any possibility may be involved. And here in this matter we have the lives and fortunes and future prospects of a great community to set over against the preservation in detail of a playground of the gods. Shall we save the people or shall we keep inviolate a spot that few can ever hope to see? Must we think first of sticks and stones and last of the planners and the upbuilders and the molders of history?

If it were proposed to turn this grant over to a private monopoly. I should fight it with all my might. But the grant is to the people of San Francisco and the towns and cities round about. It is a grant not for exploitation, not for the enriching of a favored few, not to be employed in extortion and oppres sion; it is a grant rather which will emancipate a great and growing community from galling bondage to a merciless taskmaster, whose finger may be seen in the opposition to this mens-San Francisco longs for freedom and she deserves to be free. But if we deny her this boon she must remain in thrall-She must continue to suffer as she pays tribute to a remorseless private monopoly. And she must beat vainly against her bars unless we break them down by opening the mountain streams which sing afar of freedom and of growth and of health and of all which pure water means to man. The Clerk read as follows:

Sec. 11. That this act is a grant upon certain express conditions specifically set forth herein, and nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired thereunder, and the Secretary of the Interior, in carrying out the provisions of this act, shall proceed in conformity with the laws of said State.

Mr. MURDOCK. Mr. Chairman, I know the gentleman from Oklahoma is anxious to finish this bill; but, nevertheless, I move to strike out the last word in order that I may ask him the meaning of section 11, which has just been read. Why is that section inserted in the bill?

Mr. FERRIS. Mr. Chairman, I will state to the gentleman that there are irrigation people who are interested in this bill and there are water-rights people who are interested in the They have certain prescribed rights. In addition to that, in regard to certain of the provisions of the bill to prevent extortionate charges, we have had to rely somewhat upon the public utilities commission of the State of California. did not want to strike off the map the public utilities commission, and we did not want to take away their power to see that no one practiced extortion in respect to the charges for water or power. For that reason this section went in.

Mr. MURDOCK. I thought possibly that was a sort of con-

cession to the State-rights doctrine.

Mr. FERRIS. I do not think so. I thought the gentleman from Illinois [Mr. MANN] stated the situation pretty well. The gentleman from Kansas and myself have both been here long enough to find out that there is a great divergence of opinion about these questions. The gentleman from Kansas has been here longer than I. We have a committee made up of Members from all sections of the country. We have had to compromise in places. There is no question about that; and yet I have always felt pretty safe in pinning my faith to all of the departments, and to the highest authority on conservation questions, and so long as we did not have to contract away any of the rights that seemed vital to them, or any of the questions that seemed vital to them, I think we traveled a good ways along the lines the gentleman has been thinking. I think he will surely agree that this committee has worked faithfully on this I think he will matter and that we have accomplished a good deal in the right direction.

Mr. MURDOCK. In one section of this bill we give the Federal Government the right to fix the charge in the future upon this privilege which we have granted to the city of San Francisco

Mr. FERRIS. That is true.

Mr. MURDOCK. Is there anything in this section 11 which

in any way weakens that power of the Federal Government?

Mr. FERRIS. I do not think there is, The gentleman knows that when Congress itself takes action it supersedes and transcends any of the State laws and we had that in mind. The bill is replete with restrictions and conditions that are satisfactory to the irrigation people on the one hand, and on the other they are conditions which the city of San Francisco will accept. That was satisfactory to the Secretary of the Interior; and we called in the Secretary of Agriculture, and he was satis fied. We then called in Mr. Newell, who knows more about irrigation-for he has spent \$60,000,000 in irrigation-and it is satisfactory to him. We called in Mr. George Otis Smith, who is head of the Geological Survey, who knows of the stone and mineral deposits, and it is satisfactory to him. We then called in Mr. Graves, the head of the Forestry Service, who knows how to preserve and conserve the interests of the forest, and it is satisfactory to him.

Mr. MURDOCK. When the gentleman says "it" is satisfactory to them, does he mean the text of this measure?

Mr. FERRIS. I do., We have resubmitted it. After the committee made the amendments and changes, I myself, as chairman of the committee, resubmitted it to all of the departments, and we have a second letter with their indersements.

Mr. MURDOCK. I desire to say that if I thought this last ection was anything more than a sop to those who believe in the doctrine of State rights, I would not support the bill; but I do not believe that it is anything more than that.

Mr. FERRIS. I think the gentleman believes the bill is not full of good things.

Mr. HELM. Mr. Chairman, will the gentleman yield?
Mr. FERRIS. Certainly.
Mr. HELM. The grantee mentioned in the bill is the city and county of San Francisco.

Mr. FERRIS. Yes; the city and county of San Francisco.
Mr. HELM. Then if they are the grantees, does not all of
the rights and powers under the bill pass into their hands?

Undoubtedly. Mr. FERRIS.

Mr. HELM. And the mayor and city council or board of aldermen of the city of San Francisco and the officials of the county of San Francisco control it?

Undoubtedly, subject to all of these condi-Mr. FERRIS.

Mr. HELM. In the light of past experience with the mayors of San Francisco and the city council of that city, does the gentleman consider that this is in very safe hands?

Mr. FERRIS. Well, I know that the city of San Francisco, like some other new and thriving cities, has had some dire experiences in local affairs, but I do not care to go into that question now. Mr. Chairman, I move that the committee do now rise and report the bill as amended to the House with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

Mr. MONDELL. Mr. Chairman, I trust that the gentleman

I desire to offer an amendment-only a will withhold that.

brief amendment.

Mr FERRIS. What was the request of the gentleman? Mr. MONDELL, Mr. Chairman, I move to strike out the last word.

Mr. FERRIS. Mr. Chairman, I thought the bill was closed

to amendment.

Mr. MONDELLA Well, the bill has not been.

The CHAIRMAN. The gentleman from Oklahoma moves that the committee do now rise

Mr. MONDELL. Well, Mr. Chairman, I trust the gentleman

will not press that motion. Mr. MANN. A motion to

Mr. MANN. A motion to amend takes precedence. Mr. FERRIS. I withhold the motion if the gentleman has

something to offer. I thought we were through.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I did not intend to say anything more, but my good friend from Illinois has not quite accurately stated my position in regard to water. I do not claim that the Federal Government may not fix conditions on a grant of a right of way. I do not know but what it is possible that it might make a condition as to a grant of right of way over which water is to be carried that the city shall not charge over a certain amount for the water furnished to its citizens. That is a condition that I should not consider necessary or proper, but it does not impair a constitutional right. What I claim is that Congress has no power to shorten the sovereignty of a State; to fix a condition that takes from the local authorities the right to distribute waters among users. That authority rests with the State and its courts, and I do not see how any one can hold to the contrary. The question of how much water John has the right to use and how much Joe has the right to use is a judicial question that can not be settled by an act of Congress. is my position. I do not insist that Congress may not fix many conditions in granting a right of way, but when you say that San Francisco may use so much of this water and the irrigation district so much you are attempting by legislation to settle a judicial question. Now, I want to say to my friend from Kansas that the provision that he refers to is not a new provision of law. It is the law of the land and always has been. It is the rule of the reclamation law and therefore a matter of statute, but it was the law before it went there. The attempt in this case is this. Gentlemen of the committee realize that we can not by act of Congress apportion water; that nothing written into a Federal statute would directly accomplish that, but they hope that they may divide the waters by a contract which they force the city of San Francisco to enter into. That is the proposition in this bill; that is all there is to it. merely states the law as it is, as it always has been, as it would be without this provision, but back yonder in the bill are a lot of provisions they think may be enforced, contrary to that rule, through the medium of a contract. I do not think it is good legislation, I do not think it is wise, and I think we will have a lot of trouble with and greatly regret it in the future.

Mr. CHURCH. Mr. Chairman, I move to strike out the last

Mr. FERRIS. Mr. Chairman, I ask, at the expiration of the time of the gestleman from California [Mr. Chuach], five minutes, that the committee-

Mr. MURDOCK. One moment. Will that preclude amendments of all kinds? I ask the gentleman that because I am

thinking of moving to strike out section 11-not to discuss it, but simply to make the motion to strike out.

Mr. FERRIS. I hope the gentleman will not take up any

more time.

Mr. MURDOCK. If the gentleman will permit me, I do not intend to discuss it, but if the gentleman will now allow me to make the motion he can talk to it.

The CHAIRMAN. The gentleman from California moves to

strike out the last word.

Mr. MURDOCK, Mr. Chairman, I move to strike out section 11.

The CHAIRMAN. The gentleman from California has the floor.

Mr. CHURCH. Mr. Chairman and gentlemen of the committee, I have heard it frequently mentioned during the progress of this debate that the city and county of San Francisco will be the beneficiary under this act. I rise to say that San Francisco will not be its only beneficiary, for they are numerous. Every traveler in the future who visits the Hetch Hetchy Valley will be a beneficiary under this act, for if this bill passes travelers, instead of riding mules, horses, or crawling on hands and knees up and down the narrow, rugged, and devious pathway that leads backward to this place of beauty in the heart of the mountains, can travel in an automobile over the broad and ample road provided according to the provisions of this bill.

And the nature lover, it matters not from what land he comes, in my judgment will be one of its beneficiaries, for after exerting all his strength and reaching at last the mountain top and looking for the first time downward into the Hetch Hetchy, instead of beholding it as it now is, warm, brushy, and covered with an inferior growth of oak, will see a lake, blue, beautiful, and deep, in which fishes swim and on the borders of which campers rest, far away from civilization and the humdrum of

active life.

And farmers far down at the base of the mountains on the San Joaquin plains will be beneficiaries under this act when they draw from this contemplated reservoir, he.1 by a dam, which the millions of others have made, surplus water at cost with which to irrigate their farms.

And other beneficiaries there will be who pump water with which to irrigate their vines, orchards, and alfalfa fields, pumped by electric power generated far back in the mountains, in power houses not their own, brought to their very gateways

at cost, on copper wires they did not swing.

And the great city of San Francisco, Queen City of the West, situated by the Golden Gate, will be the chief beneficiary; but I love to consider its benefit more from the standpoint of the people than I do the city, for a million men, women, and children will be there receiving benefits from this bill, for in the summer time they will have cool, refreshing water, product of Slerra's winter snow, pure as earth affords, with which to slake their thirst, and those there using electric power, whether it be the city operating electric car lines or the washerwoman using her electric iron, each and all will be benefited by this act.

The city itself will grow, and strangers on strange ships, coming from every land, will see her beauty and her growth. What helps our great city helps our State, and what helps our State adds new treasury to this great land, and so I claim from East to West, from North to South, all will be benefited by

the passage of this bill.

Mr. MURDOCK. Mr. Chairman, I move to strike out section
11, lines 24 and 25, on page 25, and lines 1 to 8, inclusive, on

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 25, strike out all of section 11, beginning with line 24 on page 25 and ending with line 8 on page 26.

Mr. MURDOCK. Now, Mr. Chairman, not to delay the committee, but in order to get the amendment itself into the Record, I will say that section 11 provides:

SEC. 11. That this act is a grant upon certain express conditions specifically set forth herein, and nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the State of California relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired thereunder, and the Secretary of the Interior, in carrying out the provisions of this act, shall proceed in conformity with the laws of said State.

Now, Mr. Chairman, it has been said that the paragraph just read, which I have moved to strike out, is not of potency and of effect; that it is surplusage. If it is, it ought to be stricken out, and for that reason I make the motion that we strike it out.

Mr. FERRIS. Mr. Chairman, just a word in reply. The section is necessary for the purpose of making it clear that the Federal Government does not intend to interfere with the prescribed and vested rights of these irrigation people. I hope the committee will retain the section as it is.

I ask for a vote, Mr. Chairman.

Mr. SISSON. Mr. Chairman, I would like to ask the gentleman from Oklahoma [Mr. Ferris] a question. This act is to go into effect subject to repeal or amendment by Congress?

Mr. FERRIS. It contains a provision to change the charter so

far as the price charged is concerned.

Mr. SISSON. I understand that. But is not this granting to the State of California in absolute perpetuity the absolute right

to control all the water?

Mr. FERRIS. No; not at all, if the gentleman will pardon me. It merely allows them to construct a dam and use the flood waters. It has nothing to do with the natural flow. That is left for the irrigation people as before.

Mr. SISSON. I understand that. But suppose in the future this would develop into a project of such a character that the Federal Government might see fit to deprive these people of this grant?

Mr. FERRIS. They can not do that, because, in other

words-

Mr. SISSON. In other words, it is a charter in perpetuity. Mr. FERRIS. They have to expend \$77,000.000 to construct this system, and of course they must have the right to go

Mr. SISSON. It does not matter what they have to expend. I understand all that. It is virtually a charter granted to them

in perpetuity.

Mr. FERRIS. It grants them the right to build a dam between two mountains. They now own three-quarters of the land that is to be flooded. The water is now a waste. This is wise conservation that all conservationists approve who understand it.

Mr. SISSON. It is admitted, however, that the Federal Government now has control of this proposition, otherwise they would not be here asking for this legislation. In other words, without this legislation the Federal Government would, as the Indians say, be in control "as long as grass grows and water

Mr. FERRIS. Mr. Chairman, no; I think the gentleman is borrowing trouble. The grant is safeguarded by carefully ap-proved regulations. This matter should be disposed of. I call

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kansas [Mr. MURDOCK].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MURDOCK. A division, Mr. Chairman, The committee divided; and there were—ayes 11, noes 52.

So the amendment was rejected.

Mr. FERRIS. Mr. Chairman, I move that the committee do now rise and report the bill with the amendments favorably to

The CHAIRMAN. The gentleman from Oklahoma [Mr. Fer-House the bill with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, and had directed him to report the same back with amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amend-

Mr. FERRIS. I move the previous question, Mr. Speaker, on

the bill and all amendments thereto.

The SPEAKER. The gentleman from Oklahoma [Mr. FERmis] moves the previous question on the bill and amendments to final passage. The question is on agreeing to that motion.

The question was taken, and the Speaker announced that the

ayes seemed to have it.

Mr. STEENERSON. A division, Mr. Speaker. The SPEAKER. The gentleman from Minnesota [Mr. Steen-ERSON] asks for a division. Those in favor of the previous question will rise and stand until they are counted. [After counting.] Seventy-nine gentlemen have arisen in the affirmative. Those opposed will rise and stand until they are counted. [After counting.] Fifteen gentlemen have arisen in the nega-

Mr. STEENERSON. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. MANN. Before the Chair counts, or while the Chair

is counting-The SPEAKER. Has the gentleman from Illinois anything

to suggest?

Mr. MANN. I was going to make a suggestion to the gentleman from Minnesota [Mr. Steenerson] as to whether he desired to make the point of no quorum on the motion for the previous question or desired to endeavor to get a quorum on the passage of the bill?

Mr. STEENERSON. I am not particular on that point. Mr. MANN. Of course, this is on the previous question. Mr. STEENERSON. I understand; but this is the first opportunity I have had.

Mr. MURDOCK. Is the gentleman opposed to the bill?

Mr. STEENERSON. I am opposed to the bill.

Mr. MANN. The gentleman from Minnesota indicated that, It is quite certain that a quorum is here. I hope that the gentleman will withdraw his point.

Mr. STEENERSON. If the gentleman states that he knows

that there is a quorum in the city I will do so.

Mr. MANN. I believe that has already been demonstrated by the vote to-day

Mr. STEENERSON. I believe it lacked nine on the roll call, Mr. MANN. No; there were more than a quorum

The SPEAKER. On the roll call there were 218 Members present, and it only takes 215 to make a quorum.

Mr. STEENERSON. In view of the statement of the gen-tleman I withdraw the point of no quorum. I do not want to bring them here unnecessarily. [Applause,]
Mr. MANN. We all thank the gentleman.

Accordingly the previous question was ordered.

The amendments recommended by the Committee of the Whole House on the state of the Union were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. STEENERSON. Mr. Speaker, I demand the reading of the engrossed bill.

The SPEAKER. The engrossed bill is not here.

## COMMITTEE RESIGNATION.

The Speaker laid before the House the following communication: WASHINGTON, D. C., August 30, 1913.

Hon. CHAMP CLARK,

Speaker House of Representatives.

MY DEAR MR. SPEAKER: I hereby tender my resignation as a member of the special investigating committee appointed under House resolution 198 to investigate the Mulhall charges.

I am unable to attend to my duties in connection with this committee on account of Illness.

Very respectfully,

JOHN I. Nolan,

Fifth District California.

JOHN I. NOLAN, Fifth District California,

The SPEAKER. If there be no objection, this resignation will be accepted, and the Chair appoints in the place of Mr. NOLAN the gentleman from Michigan [Mr. MacDonald].

### AMBASSADOR TO SPAIN.

Mr. FLOOD of Virginia. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of Senate bill 2319, which is on the Union Calendar.

Mr. MANN. I take it the gentleman is asking unanimous

consent?

I thought this was a shorter method Mr. FLOOD of Virginia. of getting at it than to call for the regular order. I will ask unanimous consent, Mr. Speaker.

The SPEAKER. The gentleman asks unanimous consent that the House resolve itself into the Committee of the Whole House on the state of the Union to consider Senate bill 2319. Is there objection?

There was no objection.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2319) authorizing the appointment of an ambassa.

The CHAIRMAN. The Clerk will report the bill.

The Clerk rend as follows:

Be it enacted, etc., That the President is hereby authorized to appoint, as the representative of the United States, an ambassador to Spain, who shall receive as his compensation the sum of \$17,500 per annum.

Mr. MANN. Mr. Chairman, I suppose the gentleman from Virginia will explain this bill.

Mr. FLOOD of Virginia. Mr. Chairman, I am not going to say very much about the bill. The purpose of it is to raise the

legation to Spain to an embassy.

The suggestion of this courtesy was made to our State Department by the Spanish Government; and the Secretary of State and the President have requested Congress to pass a bill creating this embassy. It has passed the Senate and been reported unanimously by the Committee on Foreign Affairs of the House. Among some of the reasons that were given to and occurred to the committee for giving higher rank to our diplomatic representative to Spain are:

The interests of this country in bringing about closer and more friendly relations with the Latin-American Republics ought naturally to include closer and more intimate relations with the mother country. There is little doubt that the action of the United States in sending an ambassador to Spain would have a direct effect upon the sentiments of the people of the Latin-American Republics, since the most sympathetic relations exist between the public men of Spain and those of the Latin-

American countries.

Closer relations between Spain and Spanish America are being fostered through the exchange of professorships and scholarships in the different universities. Literary competitions have been held at Cadiz between the subjects of Spain and citizens of the countries of Latin America for the purpose of fostering closer relations and there has been formed in Spain a society of Spanish-American culture, designed to strengthen the bond between Spanish-speaking countries by means of lectures, courses of study, and the presence of delegates to the various rational conventional conventions. national conventions of an intellectual order. All of these seem to emphasize the important bearing which our treatment of Spain may have upon our future relations with Spanish America.

The elevation of our diplomatic mission to Spain would help

to eliminate whatever feeling may remain growing out of the disaster to the Maine and the Spanish War of 1898.

There is no doubt that the Government of Spain feels that it is not treated by our Government with that degree of dignity which other great powers have shown in their diplomatic representation there. Spain is a proud country and might resent the failure of this country to accord her recognition which she receives from the great rations of Europe. Germany, Austria-Hungary, France, Great Britain, Italy, and Russia all maintain embassies in Madrid, and the United States sends ambassadors to those countries. To dignify the relations between the two countries by causing the representatives of both to be ambassadors instead of ministers would do much to promote good feeling

and friendly relations.

The feeling is apparent in Spain that that country ought not to be placed below Brazil and Mexico in the diplomatic representative accredited to it by the United States. Spain is a country of about 20,000,000 of inhabitants, of constantly creasing wealth and prestige, and with a great past. Her history has been intimately connected with that of nearly the whole of the Western Hemisphere and with important portions of the United States, particularly Florida, Louisiana. New Mexico, Arizona, and California. Then, Spain is taking an active interest in our great exposition of 1915, connected with the opening of the Panama Canal, and the time would seem to be especially fitting for according to her such representative as the other great powers already have.

The additional expense to our country would be comparatively trifling, amounting only to an increase of \$7,875 per annum, and would be much more than adequately compensated by the increased good feeling on the part of the Spanish Government

It is hardly consistent with the dignity of a great country like ours that its diplomatic representative on official occasions should give up to representatives of all other great powers and wait for audiences until every ambassador who chanced to appear has finished his interview and departed.

The business relations between citizens of this country and

Spain have largely increased in recent years.

The administration and the State Department earnestly desire that this courtesy should be extended to Spain, as is evidenced by this letter from the Secretary of State to me:

DEPARTMENT OF STATE, OFFICE OF THE SECRETARY,

MY DEAR MR. FLOOD: You may say to anyone who inquires that the President is heartly in favor of raising the Spanish mission to the rank away from the President.

of an embassy, and I share this desire. This action will be gratifying to all Spanish-speaking countries. Spain has, as you know, ambassadors at the leading courts of Europe and has a right to expect this mark of respect

The diplomatic appropriation act for the fiscal year ending June 30, 1904, contained a provision that-

whenever the President shall be advised that any foreign Government is represented or about to be represented by an ambassador * * * he is authorised in his discretion to direct that the representative of the United States to such Government shall bear the same designation.

Spain has indicated a desire to create an embassy in this country. This provision of the act of 1904, however, was repealed by the diplomatic appropriation act approved March 2, 1909, which provided in its place that "hereafter no new ambassadorship shall be created unless the same shall be provided for by an act of Congress." Therefore, in order to carry out the wishes of the President to give higher rank to our diplomatic representative to Spain requires resentative to Spain requires an act of Congress. [Applause.]
Mr. MURDOCK. I would like to ask the gentleman from
Virginia what does an ambassador get?

Mr. FLOOD of Virginia. Seventeen thousand five hundred dollars.

Mr. MURDOCK. What is the salary of a minister? Mr. FLOOD of Virginia. To a country of the class of Spain,

Mr. MURDOCK. Are there no added expenses by reason of

the change from minister to an ambassador?

Mr. FLOOD of Virginia. About \$2,000 additional in the way of secretaries. I made an estimate of what the legation at Spain cost and what was the cost of the Italian embassy, and the difference is nearly \$8,000.

Mr. MURDOCK. How, in the diplomatic world, does an ambassador differ from a minister?

Mr. FLOOD of Virginia. The ambassador is the highest grade of diplomatic representative. For instance, our representative at Spain has to wait upon the representatives of England, France, Germany, and Russia, all of which countries have ambassadors to Spain. In all questions of precedence the preference is given to ambassadors over the ministers, so we are in lower grade in diplomatic circles than the great countries of

Mr. MURDOCK. The appointment of an ambassador rather than a minister gives our representative a higher standing at

that court?

Mr. FLOOD of Virginia. Yes; a higher standing at the court, and also shows that we have a higher opinion of the standing

of that country

Mr. MURDOCK. If the gentleman will permit me, I remember, I think, in the beginning of my service in Congress that the ambassadors we had were limited in number to Eng-

land, St. Petersburg, Germany, and France, and, I think, Mexico. Is the number of ambassadors constantly increasing?

Mr. FILOOD of Virginia. Our first embassy was created in 1803, and in that year there were four—France, Germany, Great Britain, and Italy. In 1898 two were created—Russia and Mexico; in 1902, Austria; in 1905, Brazil; and in 1906, Turkey and Japan. There are 10 embassics altogether. This will make 11. will make 11

Mr. MURDOCK. That is my understanding-that they are

increasing.

Mr. FLOOD of Virginia. Mr. Chairman, I reserve the balance of my time.

Mr. MANN. Mr. Chairman, I do not know whether anyone else desires to take part in the general debate on this side. General debate is now open. The gentleman from Virginia [Mr. Flood] states that Spain has indicated a desire to create an embassy in this country. Of course I take his statement, but I would like to know how it was indicated.

Mr. FLOOD of Virginia. My information came from the

State Department.

Mr. MANN. Why could not that information have been com-

municated to Congress in some way?

Mr. FLOOD of Virginia. It was communicated to the committee and the committee made a report communicating it to the House.

Mr. MANN. Mr. Chairman, I should think an administration that desired to have a minister created into an ambassador ought to be willing to send a communication to Congress on the subject. Formerly the President had the power to create any position of a minister into an ambassador, and that was done in several cases where the other country indicated a desire to have an ambassador as a diplomatic representative. Because possibly it was done so often Congress took that power

Now, if the President or Secretary of State is informed that a country desires that a minister be changed into an ambassador, it seems to me that ordinary courtesy to Congress would indicate that the President or Secretary of State would say so to the House, which primarily deals with such questions, Apparently the State Department in this case has been unwilling to say anything upon the subject. The Secretary of State, in his leisure moments from lecturing on the Chautauqua circuit, has been able to write this long communication, not addressed to any committee of the House, not addressed to the chairman of a committee of the House as such, not addressed to the House, and so busy that he did not have time for dating it:

DEPARTMENT OF STATE, OFFICE OF THE SECRETARY.

My Dear Mr. Flood: You may say to anyone who inquires that the President is heartly in favor of raising the Spanish mission to the rank of an embassy, and I share this desire. This action will be gratifying to all Spanish-speaking countries. Spain has, as you know, ambassadors at the leading courts of Europe and has a right to expect this mark of respect.

No official report on the bill, no communication addressed to Congress asking for the legislation, but after the Senate has passed the bill, the distinguished gentleman from Virginia, with that graciousness which always characterizes him, succeeds in extracting from the Secretary of State, in his seldom leisure moments, this much of a recommendation of this bill.

Mr. Chairman, when the President desires to change a ministry into an embassy, it seems to me that the Congress has the right to be so informed. No one knows, except unofficially, whether Spain, so far as we are informed, desires to have an ambassador here or not. The Spanish War was in 1898. We have managed to get along very well without an ambassador at an increased salary until the new economic administration took charge of the Government. Having won the election on a platform of economy and the cutting down of expenses, the first thing that is proposed in reference to our national relations is to change the office of a ministry to an embassy, at an increased salary, in order that our representative in this particular country may get into the "eats" a little more quickly than he otherwise would, because practically that is all it amounts to, and when he is invited out to an official dinner, he will go in three or four numbers ahead of the time he would if he were a mere minister.

Mr. MURDOCK. And he gets more to eat also on account of his increased salary, does he not?

Mr. MANN. Oh, no; I do not think he gets any more to eat, but he will soon be complaining that with the salary that is given to him he can not afford to live in Madrid. [Laughter.] Just as soon as one of these gentlemen is appointed to one of these positions, as a rule before he takes the oath of office he announces to an expectant world that he can not afford to live on the salary; and I have sometimes wondered why they tried to, why they were so anxious to get the office, if they are to complain so soon that Congress did not provide a higher salary, a fancy home to live in, or something of that sort.

Mr. Chairman, I do not propose to delay the House with this illustration of democratic simplicity and economy. The first act of the new administration in its relations with European powers is to provide for the raising of a ministry to an embassy at a little more expense and a few more fangdoodles hung on to it. I leave it to the country to settle whether the Democrats got into power, after all, on a false platform. [Applause and

laughter on the Republican side.]

Mr. CLAYTON. Mr. Chairman, will the gentleman from Illinois yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Certainly.

Mr. CLAYTON. What is a fangdoodle? I ask for infor-

Mr. MANN. I will say this, that the gentleman from Alabama is not a fangdoodle. [Laughter.]
Mr. CLAYTON. I am very glad to know that I am not, and take it that the gentleman from Illinois likewise can not

Mr. MANN. There are not any frills on me. Mr. ADAMSON. Mr. Chairman, if the gentleman from Virginia will yield me a minute or two, I think I can give an illustration which will bring peace to the troubled souls about me.

Mr. FLOOD of Virginia. How much time does the gentleman

Mr. ADAMSON. Oh, only a minute or two.

Mr. FLOOD of Virginia. I yield to the gentleman from Georgia.

Mr. ADAMSON. Mr. Chairman, the gentleman from Illinois [Mr. Mann] is troubled to understand what the gentleman from Virginia [Mr. Flood] means about the matter of precedence. In order to understand it he has only to recollect the difference between a Member of the House and a Senator. All good Members of the House want to be Senators, and all of the best Senators are those who have been trained here in the House.

Mr. MANN. Mr. Chairman, is this the first time the gentleman from Georgia has announced his candidacy for the Senate?

[Laughter.

Mr. ADAMSON. Oh, no; and I am not announcing it at all. Mr. MANN. The gentleman is intimating an announcement of

it, or he is making an error of statement.

Mr. ADAMSON. If the gentleman from Illinois will just recollect how he cools his heels in the anterooms when he calls at the departments to wait until the Senators go in and get all there is to be distributed, he will understand the advantage we will have in having an ambassador at a foreign court instead of a minister to wait and walk behind the ambassadors of all of the other nations.

Mr. MANN. The gentleman from Illinois does not cool his

Mr. MANN. The gentleman from Illinois does not cool his heels waiting on a Senator.

Mr. FLOOD of Virginia. Mr. Chairman, I yield three minutes to the gentleman from Virginia [Mr. Montague].

Mr. MONTAGUE. Mr. Chairman, it seems to me—and I speak with diffidence—that we have been very long and remiss in according this appropriate distinction to the Spanish people. If there is any reason for an ambassadorship at the Court of St. James, at Berlin, at St. Petersburg, at Rome, and in Mexico, the reasons are equal, and in some instances greater, for the establishment of such a diplomatic post at Madrid. lishment of such a diplomatic post at Madrid.

When the historical relations existing between Spain and this hemisphere are recalled, the great part that Nation took in the discovery of this New World, the subsequent and constant diminution of her influence on this continent, largely brought about by the aggressive spirit of the people of our own country, as finally evidenced by the Spanish-American War, it seems a very ungracious, if not a very arbitrary, distinction not to accord this proud and sensitive people the request for this ambassadorship.

I therefore submit that considerations of generous comity, of sound diplomacy, and of regard for the multitudes upon this hemisphere and in our insular possessions, who take from this ancient and mighty race their language, their literature, their

laws, and traditions, all confirm our duty to concur in the passage of this Senate bill. [Applause.]

Mr. FLOOD of Virginia. Mr. Chairman, it is a fact that the Spanish Government has indicated time and again during the past few years a desire that their representative to this country and our representative to their country be made ambassadors instead of ministers.

Mr. MONTAGUE. Will my colleague kindly allow me to ask him this question? Am I not correct in saying that the former minister who represented so well this country, the distinguished gentleman from Illinois, Mr. Ide, has requested that we should have an ambassador sent there?

Mr. FLOOD of Virgina. He very recently so requested.

Mr. MANN. Who?

Mr. MONTAGUE. Mr. Ide, our former minister. Mr. MANN. To where?

Mr. FLOOD of Virginia. Our minister from this country to

Mr. MANN. Of course they have always wanted it. There is no minister of the United States to any country who does not want to be ambassador. I mean while he has the job, of course, Mr. MONTAGUE. He did not ask it for himself but for his

Mr. FLOOD of Virginia. He made this recommendation after he knew he would not be minister to Spain very long, after the name of his successor had been sent to the Senate by the President.

Mr. MANN. If the gentleman will pardon me, I have not criticized creating an ambassador to Spain.

Mr. FLOOD of Virginia. I know.

Mr. MANN. If there has been such a request by the State Department it seems to me that it ought to have been communicated to Congress,

Mr. FLOOD of Virginia. These suggestions do not come in the shape of a formal request of the Government that desires such a courtesy, but the diplomatic representative of that country here pays a visit to our State Department and makes the suggestion in a delicate way and not in a shape that it can be transmitted to Congress through a formal communication.

The letter of Mr. Bryan was written to me as chairman of the Foreign Affairs Committee and written for the purpose of indicating the desire of the Spanish Government in reference to this question and the wish of the administration in relation thereto. The additional expense will be something under \$8,000 and is by way of economy, because it will prove a good invest-ment. It will be appreciated by the Spanish-American Repub-lics to the south of us, who feel, as my colleague from Virginia says, a deep interest in their old mother country. Spain itself is beginning to grow and develop in population and in wealth as it has not done in 100 years, and our business relations with it are increasing greatly. It is a great country, it has had a great history, and it has done much toward the discovery, the settlement, and development of the Western Hemisphere, and I think that this is a small compliment that this Nation should pay that great country when it has indicated its desire in this regard time and again for many years. [Applause.]
The CHAIRMAN. The Clerk will read the bill.

The bill was read.

Mr. FLOOD of Virginia. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LLOYD, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2319 and had directed him to report the same back with the recommendation that it do pass.

The bill was ordered to be read a third time, was read the

third time, and passed.

On motion of Mr. Flood of Virginia, a motion to reconsider the vote by which the bill was passed was laid on the table.

### ANGELO ALBANO.

Mr. FLOOD of Virginia. Mr. Speaker, I ask unanimous consent that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 7384, which is on the Union Calendar, to authorize the payment of an indemnity to the Italian Government for the killing of Angelo Albano, an Italian subject, who was killed at Tampa, Fla., two or three years ago.

The SPEAKER. The gentleman from Virginia [Mr. Flood] asks unanimous consent that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 7384. Is there objection?

Mr. MANN. Reserving the right to object, to-morrow will be Calendar Wednesday. As I understand, we meet to-morrow.

Mr. FLOOD of Virginia. I understand the deficiency appropriation bill will come up to-morrow.

The appropriation bill could not be taken up without a two-thirds vote to dispense with Calendar Wednesday, and I think the gentleman will have a chance to dispose of his bill before the appropriation bill comes up. It will take only a few moments.

Mr. FLOOD of Virginia. I will say to the gentleman that I do not think it will take more than a few moments now.

Mr. MANN. And I think it will not take any longer to-

Mr. FLOOD of Virginia. Let us go into this to-night.

Mr. MANN. Oh, let us take it up to-morrow. It is time to adjourn.

Mr. FLOOD of Virginia. This is a very important measure. It carries but \$6,000, but the worry it entails on everybody connected with the State Department is something terrific.

Mr. MANN. There is a way for it to come up to-morrow. Mr. FLOOD of Virginia. It is the expectation of the chairman of the Appropriations Committee and the majority leader to get the deficiency bill up to-morrow. They hope to do it.

Mr. MANN. I have no doubt it will be gotten up to-morrow,

but I think the gentleman would not have any trouble because

Mr. FLOOD of Virginia. Let us start this and then adjourn. Mr. MANN. Well, we will start it to-morrow. The SPEAKER. Is there objection?

Mr. MANN. I object.

# EXTENSION OF REMARKS.

Mr. MacDONALD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a compilation

in regard to the water-power proposition on which I spoke to-day.

The SPEAKER. The gentleman from Michigan [Mr. Mac-DONALD] asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears

#### ADJOURNMENT.

Mr. FLOOD of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 4 minutes p. m.) the House adjourned until Wednesday, September 3, 1913, at 12 o'clock noon.

# EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows

1. A letter from the Secretary of the Treasury, submitting a revised estimate of appropriation for public building work (H. Doc. No. 213); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Newport River, N. C., from its mouth to the head of navigation, or as far as may be advisable (H. Doc. No. 214); to the Committee on Rivers and Harbors and ordered to be printed. with illustration.

3. A letter from the Secretary of the Treasury, transmitting a communication from the Postmaster General, submitting an estimate of appropriation in the sum of \$147.95 to pay the claim of Thomas Rogers, postmaster at Sheffield, Mo., for postage stamps lost in the burglary of his post office on October 25, 1893 (H. Doc. No. 215); to the Committee on Appropriations and ordered to be printed.

### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named as follows:

Mr. GARNER, from the Committee on Ways and Means, to which was referred the bill (H. R. 4937) extending to the port of Dallas, Tex., the privileges of section 7 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, reported the same without amendment, accompanied by a report (No. 62), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MOORE, from the Committee on Ways and Means, to which was referred the bill (H. R. 7377) extending to the port of Perth Amboy, N. J., the privileges of section 7 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, reported the same without amendment, accompanied by a report (No. 63), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

# PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:
By Mr. MOORE: A bill (H. R. 7894) to make June 17 of each

and every year a public holiday in the District of Columbia, to be known as Bunker Hill Day; to the Committee on the District of Columbia.

By Mr. CLARK of Florida: A bill (H. R. 7895) to make the 27th day of March a legal holiday and designate the same Ponce de Leon Day; to the Committee on the District of Columbia.

By Mr. CROSSER: A bill (H. R. 7896) to provide for the acquisition, ownership, and operation by the Commissioners of the District of Columbia of all the street railroads located in the District of Columbia; to the Committee on the District of Columbia.

By Mr. SPARKMAN: A bill (H. R. 7897) to provide for a site and public building at Plant City, Fla.; to the Committee on Public Buildings and Grounds.

By Mr. FITZGERALD: A bill (H. R. 7898) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1913, and for other purposes; to the Committee of the Whole House on the state of the Union. By Mr. LEVY: A bill (H. R. 7899) for the prevention of acci-

dents to operatives, employees, and passengers of common car-

riers engaged in moving interstate traffic, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BOOHER: Resolution (H. Res. 240) directing the Secretary of Agriculture to communicate to the House of Representatives the cost and result of the investigation of the boll weevil; to the Committee on Agriculture.

By Mr. BRITTEN: Resolution (H. Res. 241) to investigate wrecks on the New York, New Haven & Hartford Railroad; to the Committee on Interstate and Foreign Commerce.

By Mr. FITZGERALD: Resolution (H. Res. 242) making it in order to consider provision for abolishment of the Commerce Court in connection with H. R. 7898; to the Committee on Rules.

By Mr. LEVY: Joint resolution (H. J. Res. 126) directing the Attorney General of the United States to discontinue further proceedings in the dissolution suit brought by the United States against the United States Steel Corporation; to the Committee on the Judiciary

By. Mr. SUMNERS: Concurrent resolution (H. Con. Res. 17) authorizing the Secretary of Agriculture to make an exhibit at the Sixth National Corn Exposition to be held at Dallas, Tex., during the month of February, 1914; to the Committee on Industrial Arts and Expositions.

By Mr. AINEY: Memorial of the Legislature of Washington, favoring survey of route for an intercoastal canal from the Straits of Juan de Fuca to Grays Harbor, thence to Willapa Bay, thence to Columbia River, thence to the Canadian border; to the Committee on Rivers and Harbors.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. EDWARDS: A bill (H. R. 7900) for the relief of J. B. Shearouse; to the Committee on War Claims,

By Mr. SPARKMAN: A bill (H. R. 7901) for the relief of the heirs of Adam L. Eichelberger; to the Committee on War Claims.

By Mr. TAVENNER: A bill (H. R. 7902) for the relief of George W. Gamble; to the Committee on Claims.

By Mr. WOODS: A bill (H. R. 7903) granting an increase of pension to Theodore Walker; to the Committee on Invalid Pensions.

### PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BELL of California: Petition of the Chamber of Commerce of Long Beach, Cal., favoring the passage of legislation making an appropriation for the construction of four battleships, with necessary auxiliary boats; to the Committee on Naval Affairs.

By Mr. KEISTER: Petition of 1,800 employees of the American Sheet & Tin Plate Co., located in Kiskiminetas Valley, Pa., protesting against the dissolution of the United States Steel Corporation; to the Committee on the Judiciary.

By Mr. KENNEDY of Iowa: Petition of sundry merchants of various cities and towns of Iowa, favoring the passage of House bill 5308, compelling concerns selling goods direct to the consumer, by mail, to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Com-

By Mr. RAKER: Petition of the Oroville Chamber of Commerce, Oroville, Cal., favoring the passage of House bill 52 for the establishment of the Peter Lassen National Park; to the Committee on the Public Lands.
